2. *The covenant of grace* is that glorious scheme of wisdom and goodness by which eternal life and salvation have been provided for men in a way of free grace and mercy. It is sometimes distinguished from the covenant of redemption, inasmuch as the latter phrase may be confined to the arrangement in eternity between the persons of the Trinity, and the former to the engagement into which God enters in time with believers. On the other hand, some have contended that the covenant of redemption is that stricter arrangement according to which believers are delivered from all sin, while that of grace is that wider one according to which a sufficient atonement was provided for all men. It has, however, been most common to speak of all God's arrangements for the salvation of men as under a single covenant, which, however, may have various modes of dispensation. One may conceive of the whole race as fallen, and then of a scheme of mercy which provides first a door of mercy sufficiently open for all mankind to enter, and finally a system of means which should secure the actual salvation of a limited number; or he may conceive of the eye of God being fixed first upon a limited number of our fallen race, and for their sake alone providing an atonement sufficient indeed for all men, but designed and efficient for the salvation of only a definite number. The latter was the aspect in which the covenant of grace has usually been presented by its advocates. They have supposed that God originally anticipated the temporary character of the covenant of works, and determined upon another arrangement, by which a portion of mankind might be saved from the ruins of the apostasy. Why he did not include the whole or a larger portion of mankind within the scope of his saving mercy, they prefer to leave out of discussion as an unapproachable mystery. That he had sufficient reasons without implying a want of benevolence they assert without hesitation, but they think it best never to attempt a definition of them. Negatively they contend that the favored ones could have had no pre-eminence in natural goodness, since many of them confessed themselves to be the chief of sinners. The effort to find a sufficient reason in the anticipated circumstances

of men has usually proved so confusing to the finite intellect, that most thinkers have concluded to leave the origin of discriminating grace where the Scriptures have left it, in the mere good pleasure (*beneplicitum*) of God. As we read of some who were chosen in Christ before the foundation of the world, it has been inferred that there must have been in eternity an agreement or covenant between the persons of the sacred Trinity, according to which a seed was given to the Son to serve him, and that he became their surety to satisfy the claims of justice upon them, to give them a title to eternal life, and to bring them to everlasting glory. The Father (who in this transaction is usually regarded as personating the Deity as such) engaged to spare his beloved Son, to furnish him with all suitable endowments and preparations for his work, to support him in it, to deliver into his hands all power in heaven and on earth, to pardon and accept all who should come unto God by him, and to confer upon him a glorious reward forever and ever. The Holy Spirit, who must also be looked upon as having a part in this covenant, also engaged to become the efficient agent in the regeneration, sanctification, and glorification of the holy seed. Without ascribing to this transaction the technicalities of a human compact, and conceding that the whole mode of viewing it is anthropomorphic, it is contended that something equivalent to this, and amounting to such a mutual understanding, must have existed in the sacred Trinity. An equal love towards men is supposed to have existed in each of the divine persons. But as man was under condemnation, and could not therefore act for himself, the Son of God acted in behalf of all of whom he was to be the spiritual head. To constitute a natural ground for this headship, he was to become a man, uniting divinity in one person with humanity. He thus became a new federal head for his spiritual seed, similar to that which Adam had sustained to his natural descendants. In this relation he was to act in all he did as their representative. He was to share with them in the actual curse which the first sin had brought on the human race, not shrinking even from death in its most terrific form. Though this endurance was not the same with that which they would have endured in its spiritual results or in eternal duration, it was supposed to be infinite in value on account of the infinite dignity of his person. It was indeed sufficient in objective worth to expiate for any amount of sin in any number of worlds. It has actually conferred innumerable benefits upon all men. Pardon and salvation is offered to every one who hears the Gospel; time, opportunity, and some means of grace are afforded to all, and sufficient is done to leave those inexcusable who deny the Lord that bought them. But confessedly all are not made partakers of salvation, and only a portion of men were eternally given to Christ by the Father. Obviously it was not left to an uncertainty whether his work would be in vain or not. A seed was secured to him by covenant, and it was with an ultimate reference to these that he entered upon his work. Adapted to all, and sufficient for all as his work may be, it must have been specially designed to effect the salvation only of the covenant people. Of these alone can he be regarded as the proper head and representative, since they alone are ingrafted into him by a living and active faith. To them alone is his perfect righteousness imputed, as if he had suffered and obeyed in their stead. By his sufferings he has satisfied for their guilt, and by his perfect obedience to the law he has obtained for them a title to eternal life. He thus becomes their surety, not merely to make them inherently holy, but to perform what is required of them. He satisfies in this way both the penalty and the precept of the broken covenant. That covenant required obedience only for a limited period, and he has fulfilled the law during the time allotted him by the Father. The whole person of the Redeemer in both natures was subject to

the law, and as such an obedience (at least in this special form of it) was not obligatory, but voluntary on his part, it became available for an infinite righteousness.

Such was the covenant of grace as formed in eternity. To this must be added its actual administration in time. Of course the only administrator of it was the Son of God himself, the mediator between God and man. He has power over all flesh, in order to give eternal life to as many as had been given him. He it was who represented the divine Ruler in all those dispensations of mercy of which the sacred history informs us. Although at different periods of human history the outward forms of religion have been changed, the covenant of grace, which lay at the basis of them all, was always the same. Salvation has in all cases been by Christ, even where the subjects of it knew little or nothing respecting him. None have ever been saved by the law of works, and none have had their hopes bounded by promises of an earthly home. The antediluvians, the patriarchs, Job and his friends, the Israelites in Egypt and under the Mosaic dispensation, looked for forgiveness under certain prescribed conditions, and for a city beyond the present world whose builder and maker is God. The only difference between them was that salvation was presented with greater obscurity, under more symbolical forms, with narrower restrictions to families and nations, and with less enlarged measures of the divine Spirit at some periods than at others. Ordinarily there have been reckoned but two principal economies or dispensations, viz. that under the Old and that under the New Testament. Although the same word in the original languages of the Bible is applied to all covenants between God and man, the advocates of the federal system have translated them differently when applied on the one hand to the great covenants of nature and of grace, and on the other to the different economies under the covenant of grace. Availing themselves of the double meaning, especially of the Greek word (*διαθήκη*), they have usually designated these latter economies by the name of testaments, to indicate that they were that peculiar kind of arrangements which acquire validity only after the decease of him who makes them. Though the Redeemer had not, in fact, died before the earlier dispensation, he was looked upon as slain from the foundation of the world, and the dispensations of mercy were even then constituted in anticipation of his death. Hence, when speaking of the communication of benefits to men, no mutual conditions are implied, but Jesus Christ is said to bequeath them by testament. The death of the testator is indispensable to render the grant valid, and to make the promises sure (Heb. ix, 16-17). Conditions, in the proper sense of the word, on the part of God's people, are not required, but benefits are supposed to be bestowed absolutely, by free donation, and by an irrevocable will. Men are indeed to believe, to be holy, and to persevere faithfully unto the end, but all this is supposed to be secured by the free grace of God in Christ.

The Christian dispensation is the ultimate form in which the covenant of grace will be administered; for, since all national restrictions have been removed, and the Holy Spirit is given in his plenitude, no other is conceivable. Jesus Christ will continue to administer it until the whole world shall be subdued unto him. Finally, the present economy of things shall cease, the dead shall be raised, the living shall be changed, every human being shall be judged at Christ's bar for sins, not only against God as a moral ruler, but against himself as the mediatorial king, and sentence shall be passed upon each according to his works. Christ will claim the right to do this even with respect to such as are not under his spiritual headship, inasmuch as they too are in one sense purchased by him (2 Pet. ii, 1), and hence power over all flesh has been given him by the Father (John xvii, 2). Then, having obtained full pos-

session of his kingdom, he will present it to the Father as the economical representative of the Godhead, either in token of the completeness of his work, or as indicating the close of his mediatorship. But, whether he denits his peculiar office (1 Cor. xv, 28), or only brings his mediatorial kingdom into some new relation, he will then complete the scheme of the covenant of grace, and receive his eternally betrothed Church into an everlasting union with himself.

II. *History.*—The words rendered covenant are frequently used in the original Scriptures in application to God's dealings with his creatures. The Hebrew בְּרִית signifies undoubtedly in its primary meaning a mutual compact (Robinson's Gesenius's *Lexicon*), and yet it is not infrequently applied to transactions in which such an idea in its strictness is impossible (Gen. ix, 9-18; Jer. xxxiii, 20-21). With a true sense of its usage and idea, if not strictly according to its etymological signification, the LXX have translated this word by the Greek *διαθήκη*, the generic meaning of which is a disposition or arrangement, and lapses into the idea of a mutual compact or testament only when the author or authors of it happened to be mutual stipulators or testators. But neither in the Septuagint nor in the New Testament is the word ever applied to the relation in which man stood before the Fall, but always to some transaction or dispensation under the covenant of grace (Hos. vi, 7, with this signification, is doubtful). Nor has any clear instance of such an application of the word to man's primeval state been found in any theological writer before the commencement of the 17th century. (See, however, Bede on Gen. xvii, 14.) Certainly no one had attempted to arrange all the materials of a systematic theology under the general heads of divine covenants. And yet there was an obvious tendency in that direction among the Reformed churches of the Calvinistic school. These had become familiar with the word in relation to Christ and his people, and with all the principles involved in a covenant with Adam. They had seen that Adam's original position was not that of a mere subject of law, but that promises had been made to him with a condition, and that the whole race were represented on a limited probation in him. It is generally conceded that the federal system had its origin with Kloppenburg, a professor of theology at Franeker (died in 1652). The first, however, who had the genius and boldness to give definiteness and completeness to the system was John Koch (Cocceius), a pupil of his, and a successor in the same chair. In his *Summa doctrinae de fœdere et testamento Dei* (1648), and still further in his more enlarged *Summa Theologiae* (2d edit. 1665), he comprises all the doctrines of the Christian religion under the two great categories of the covenants of nature and of grace. The method he pursued has gained for him the appellation of "the Father of Biblical Theology;" and, laying aside the practice usual with his predecessors, of viewing divine truth in its subjective form, either as logically constructed by a human mind, or as it was supposed to lie in the divine mind around the great central doctrine of predestination, he professed to come to the Scriptures, reverently to read them, and derive his system from the inspired historical arrangement. The events of human history were regarded in their anthropological aspect as well as related to the divine efficiency. The final cause of salvation he can indeed find nowhere else than in the divine mind, and he has no occasion to impinge against the highest style of contemporary orthodoxy, and yet he succeeded in giving to theology a more practical character. Although under all dispensations he conceived of man as receptive, and God alone as communicative, he still represented man as coming under an obligation to perform certain duties which were looked upon as a virtual condition of the divine promises. This fidelity to the scriptural repre-

sentation compelled him to develop his system according to the successive periods of the sacred history (Ebrard, *Dogmen*, § 40; D. Schenkel, *Christ.-Dogmen*, § 129, note).

As often occurs when great changes are introduced in formal statements of truth, this system was as bitterly opposed as if it had been an essential error. Other principles, on which the author was more vulnerable, were introduced into the controversy; but the main features of his system soon obtained a remarkable degree of acceptance in all the Reformed churches of France, Switzerland, Holland, Scotland, and among the English Puritans. The orthodox Roman Catholics have always regarded it with aversion, and the Jansenists oppose the whole conception of a covenant with Adam as an innovation upon Augustinism, and needless to explain the natural effects of the first sin (Father Paul's *Hist. of the Council of Trent*, p. 177-201; Jansenius, *August*, ii, 208-11). The Lutheran divines have in general rejected it on account of the prominence it still gave to the doctrine of predestination, and because, when the word covenant was divested of the idea of a mutual compact, it offered no advantages over the words which had long been in use (Thomassin, *Christi Person und Werk*, § 28). The Arminians of Holland were partially conciliated by those juridical considerations by which the advocates of the system defended it, and many of them accepted of it with some important modifications. The object of these was to limit the direct consequences of Adam's sin to a privation of original righteousness, or the loss of those aids of the divine spirit on which they made the original moral image to depend, to temporal evils, and to bodily death, together with such a deprivation of our mental and moral state as renders us incapable of obedience, and so to extend the benefits of Christ's death that he should not only be regarded as dying for all men alike, but as actually restoring to them such supernatural aids as, if properly used, would enable them to lay hold upon the great salvation (Nichol's *Calvinism and Arminianism* in Watson's *Theol. Instit.* ii, 45). Notwithstanding the objections raised against the federal system, its principles were carried still further forward with fearless and logical consistency by Francis Burmann, a pupil of Koch, and a professor in the University of Utrecht. In his *Synopsis of Theology, and especially of the Economy of the Covenants* (1671), he endeavored to show that all the details of the covenant of nature were fairly to be inferred from the idea of the divine image in man in connection with what we know of the divine goodness, since that goodness would of course desire to bring man into the highest communion with itself, and would not be satisfied with the prescriptions of a mere natural justice. The difficulties, however, with which the system was pressed by its opponents were sought to be removed by Hermann Witsius, a successor and former pupil of Burmann in the theological chair of the University of Utrecht. In his *Economy of the Covenants*, the first edition of which appeared in 1685, some important distinctions maintained by his predecessors were given up (as, e. g. that between the *πάρεσις* of the Old and the *ἀφεισις* of the New Testament, as shown in Rom. iii, 25, 26, and the three dispensations or economies of the covenant of grace); a minute parallel is drawn between the two covenants by the introduction of four sacraments into Paradise (the tree of life, the tree of knowledge, the Sabbath, and Paradise itself); and a sacramental character is given to a multitude of things under the economy before the law (the coats of skins, the ark, the rainbow, etc. bk. ii, chap. viii, § 10; bk. iv, chap. vii). In 1688 a further attempt was made to complete the federal system by Melchior Leydecker, another professor in Utrecht, who, though not in the strictest sense a Federalist, professedly wrote under its spirit and tendency. In his *Seven Books upon the Truth of the Christian Religion*, he endeavors to trace the econ-

omy of the covenant of grace to the several Persons of the sacred Trinity, by showing that the Father reveals himself, especially in the Old Testament, as the universal Ruler maintaining the cause of justice; the Son, especially during his life on earth, as the Mediator dispensing mercy; and the Holy Ghost, especially since the day of Pentecost, as the Comforter exercising divine and saving power. This arbitrary assignment of the divine attributes, however, has never been acceptable. Though the Heidelberg Catechism was composed before the federal theory was distinctly broached, most of the great commentaries which have been written upon it were written by Federalists. The maturest fruit of that system may be seen in the writings of Solomon van Til (Tilenus), a professor in Dort and Leyden, whose Compend (*Compend of Nat. and Ier. Theol.* Leyden, 1704, and *Compend of Theology*, Berne, 1703) were the organic union of the three great tendencies of Scholasticism, Federalism, and Cartesianism, and have obtained general acceptance in the schools of Holland; and in those of F. A. Lampe, the pastor of several influential congregations and a professor in Utrecht (1720-27), whose doctrinal and practical works in the German vernacular have had the honor of reconciling Pietism to the orthodox Church, and have sometimes had a popularity scarcely inferior to the authorized Catechism of the national Church. It does not appear that the Federal system has at any time found universal acceptance in the Reformed churches. It has never been either condemned or sanctioned by the public synod, and such has been the balance of parties that, by right of long-established custom, one Federalist must be appointed in each of the universities of Holland (Ebrard, *Christ. Dogm.* § 41).

A modification both of the Scholastic and Federal theology made its appearance among the Protestants of France. The rival theological schools of Saumur and Montauban zealously adopted the federal system. But John Cameron, a Scotchman, who at different times was a professor in both institutions [see CAMERON], and his pupils, Moïse Amyraut (Amyraldus) and Joshua de la Place (Placeus), who were associated as professors at Saumur (1633-64), proposed, and for many years maintained, a peculiar system, which attempted to reconcile it with the doctrine of a universal redemption. See AMYRAUT and LA PLACE. The result was a crude syncretism of an ideal or hypothetical Universalism with a rigid and real Particularism. Amyraut maintained that there were three instead of two general covenants with man—the *natural*, with a positive prohibition and a promise of a blessed life in Paradise; a *legal*, promising the land of Canaan on condition of a life of faith; and the *gracious*, promising eternal life on the condition of faith in Christ. La Place also drew a distinction between a mediate and an immediate imputation, according to which Adam's sin might be imputed to his posterity, either mediately, on account of a previously recognised inherent depravity in them; or it might be imputed to them immediately, simply on account of their federal representation in Adam. This whole system was strenuously opposed by the elder Spanheim, of Geneva and Leyden; J. H. Heidegger, of Zurich; and Francis Turretin, of Geneva. At the two last national synods ever held in France (Charenton, in 1615, and Loudun, in 1659) the authors successfully defended themselves from the charge of heresy, and maintained that their views were only a more distinct statement of doctrines which had been universally held by the orthodox Church since primitive times, and especially by Augustine and Calvin; but a statement of opinions imputed to them (incorrectly, as they maintained) was condemned at a synod at Charenton (1642), and the *Formula Consensus Helvetica* was composed principally by Heidegger (1675), and was adopted and sent forth to guard the churches against such views. Al-

though this is one of the most scientific and highly esteemed of the Calvinistic confessions, and is the only one among the Continental confessions which is constructed expressly upon the basis of the federal system, its authority has never been acknowledged in France, and it was received by only five of the Swiss cantons (and there mainly through the support of the civil magistrates), and finally lost all public sanction within fifty years from its promulgation (Ebrard's *Christ. Dogm.* § 43; L. Noack's *Christ. Dogmengesch.* § 74; Sheld's *Hist. of Chr. Doct.* ii, 412).

In the British Islands, and especially in those churches which adhere to the confession of faith put forth by the Synod of Westminster (1643-8), we have the stronghold of the federal system. The representatives of the English Church at the Synod of Dort (1618-19), and especially bishop Davenant, had maintained a system similar to that of Amyraut, and a large party in that Church have always held views based upon the federal theology. Even Jeremy Taylor maintained it (1654), with some Arminian, and even Pelagian modifications, in one of his treatises (*On Repentance*, ch. i, § 1). The celebrated Richard Baxter, though he "subscribed to the Synod of Dort without any exception, limitation, or exposition of any word," was an ardent admirer of the federal theology, as qualified by Amyraut (Preface to *The Saints' Rest*, 1650; *Cath. Theol.* 1675; *Univ. Redemp.* 1657; Orme's *Life of Baxter*, vol. ii, ch. ii). The assembly of divines at Westminster was, in fact, contemporary with the first publication of Koch's principal work on the covenants (1648), and deserves a credit, perhaps, equal to his for the origination and precise statement of the doctrine. The national Scotch Church, with its affiliated branches in Scotland and Ireland, has always upheld the system in its utmost consistency and extremest form. The United Presbyterian Church alone is said to maintain it, with some modifications connected with the theory of a general atonement (Wardlaw, *On the Extent of the Atonement*, § 13-15). Among the orthodox dissenters of England it has also been accepted, and found some of its most able defenders. The Wesleyans of England and America claim that they are enabled, by their peculiar modifications of it, to "carry through the system with greater consistency than the Calvinists themselves, inasmuch as they more easily account for certain good dispositions and occasional religious inclinations in those who never give evidence of actual conversion." By their doctrine of a general redemption, they maintain that in spite of the loss of the supernatural aids through the Fall, and the consequent incapacity of unassisted man to have such good dispositions, there is given to every one, through Christ, those gracious influences which, if not resisted, would lead on to a saving conversion (Watson's *Theol. Instit.* ii, 48-52; Porter's *Comp. of Methodism*, pt. ii, ch. iv). The reason that these gracious influences are not resisted they can only refer to the doctrine of free-will, and from the nature of the case they can give no further account of it. The orthodox Congregationalists and the New-school Presbyterians of the United States usually object to the phrase "*universal redemption*" as used by the Amyraldists of France, the Baxterians of England, and the Arminians generally, inasmuch as the word redemption properly signifies more than what is obtained simply by the expiatory work of Christ, and includes an entire deliverance from sin. They therefore use the word atonement to signify the objective or expiatory work of Christ, and contend that this is *for* sin, and *for* all men, while redemption implies the salvation of men, and must, of course, be confined to such as shall be saved (Dr. W. R. Weeks, in Parks's *Collections on the Atonement*, p. 579). Such an atonement is not merely hypothetical, but really opens the door of salvation to all men, who are supposed, even since the Fall, to possess all those faculties and powers which render them responsible for

a compliance with the terms of salvation. And yet, so certain are all men to use their powers, and the best external means of grace, to their perdition, that no reason can be assigned for the repentance and faith of any but the covenant of grace formed in Christ before the world was (Dwight's *Theol. ser.* xliii; Barnes, *On the Atonement*, chap. ix; *Presb. Quart. Rev.* iii, 218-252, 630-648). Other classes of Presbyterians and Calvinistic Baptists in this country use the word redemption, and even atonement, in the sense of an entire deliverance from sin; and they, of course, confine its application to the elect. They speak in the largest terms of the sufficiency of the work of Christ for the pardon of all sin, but regard it as limited in the purpose and design of God to such as are effectually called of the Spirit, and are kept by the power of God through faith unto salvation (*Princeton Theol. Essays*, vol. v, viii, and xiv; A. Fuller's *Gospel*, etc., in *Works*, i, 312-340, vol. i, artt. viii and xiv).

**Feeling.** The relation of feeling to religion is a subject of importance both from a religious and philosophical point of view. It has been viewed in very different ways, and has led to long and animated controversies.

In Greek, the word αἰσθησις denoted every kind of perception, sensuous and spiritual, mediate and immediate; consequently, also what we call feeling. Plato referred to a sensuous spiritual feeling, though he did not call it by this name; for, according to him, the understanding (νοῦς) communes with the affections (ἐπιθυμητικόν), and the seat of this communion is the liver, from which proceed the power of divination (μαντεία) and enthusiasm (ἐνθουσιασμός). Connected with this view is the opinion of Plato, that virtue cannot be taught, and that what is substantially good breaks forth in the soul as an immediate light.

The extensive usage of the Latin word *sensus* embraces also the natural moral feeling, *sensus communis*, *sensus hominum*.

In the Septuagint the word αἰσθησις frequently occurs, and is generally rendered by "knowledge" or "wisdom," as Prov. i, 7; xii, 25. In the New Testament it occurs only once, Phil. i, 9, where it is coupled with ἐπιγνωσις (English version: and this I pray that your love may abound yet more and more in knowledge and in all judgment).

The psychological meaning of the words αἰσθησις and *sensus* in the Greek and Latin fathers is not fully settled, but in general they use them to denote a knowledge, or insight obtained by means of feeling. Origen (*contra Celsum*, i, 48) speaks of a "divine insight" (ζῆλια αἰσθησις) of the soul by means of which enlightened men perceive supernatural things just as

others perceive natural objects by means of their senses. Clement (*Stromat.* iv, p. 333, ed. Potter) ascribes to the scientific man a συναίσθησις, a faculty of inventing and understanding, analogous to the faculty of taste possessed by the sculptor, and the sense of hearing possessed by the musician. To denote a feeling accompanying the will, the Latin fathers used the word κίνησις. Among the Latin fathers, Tertullian (*De anima*, chap. ii) spoke of a *publicus sensus* which leads the soul to a knowledge of God. Augustin introduced the expression *inner sense* (*interior scensus*), which became of great importance in the writings of the mystics. The common expressions in the mystics to denote subjective and objective feeling are *sensus*, *sentimentum*, *affectus*, *gustus*. *Affectus* always embraces a practical impulse. *Gustus*, which is identified with *sensus*, does not exclude the practical impulse, but properly denotes feeling viewed in its relation to its own contents, and therefore designated as a *modus cognoscendi*, a kind of cognition. The immediateness of this *sensus*, which words cannot fully express, is therefore, in the opinion of the mystics, greatly superior to an intellectual insight. Mystic theology, according to Gerson, because it rests on feeling, is widely different from all other sciences. Thomas Aquinas regards not only mystical theology, but theology and faith in general, as founded in the *pia affectio* (pious or religious feeling), because faith supposes a movement of the will towards the first truth and the highest good which produces assent (*Summa Theol.* ii, 2, 9, 4, 5).

The mystical writers of Germany in the Middle Ages, writing on practical more than speculative subjects, spoke of feeling in particular as a subjective consciousness, and demanded its renunciation. The spiritual man, they urged, should emancipate himself from all emotion, and sever his connection with everything created, that God might become present to him, and eternity might be felt by him and tasted. The objective feeling of the supernatural God appears to these writers as the final result of the renunciation of the subjective feeling of personal and individual existence.

Luther warned against a reliance upon "feeling" instead of clinging to the "word." At the same time, however, he demands that the soul feel the call of the Lord, and the "spirit of adoption, whereby we cry Abba, father" (Rom. viii, 15), he defines as a feeling of the fatherly love of God. The testimony of the Holy Ghost he finds in the religious experience, and this experience he identifies with the religious feeling. Similar are the views of the other reformers and the early writers of the Reformed churches.

A greater stress was laid on feeling as an element of religion by the Pietists, who regarded its very inexpressibility as an argument for its truth. The same was done by the Moravians, who reduced religion to the feeling of truth. Opposition to the Pietists made most of the later dogmatic writers of the Lutheran Church suspicious of feeling as an element of religion; but some recognised its importance, as M. Pfaff (*Instit. Theol. and Moral.*), who did not hesitate to apply (like the society of Friends) to the "spiritual feeling" (*sensus* or *gustus spiritualis*) the expression "spiritual light" (*humen spirituale*).

About the middle of the 18th century arose the system of Utilitarianism. Bread and butter were now more valuable than metaphysics. In the same proportion as confidence in the truth of *thought* vanished, confidence in the objective contents of feeling was also weakened. But gradually philosophy prepared the way for a more correct appreciation of feeling. Until Wolf, philosophy had only recognised two faculties of the soul, intellect and will (or desire). Tenens added feeling as "the inner sense for the pleasant and the unpleasant." Kant, also, in his *Kritik der Urtheilskraft*, reduced all faculties of the soul to three, one of which was the *Gefühl der Lust und Unlust* (feel-

ing of the pleasant and unpleasant). Kant also called attention to the fact that in æsthetics the beautiful and sublime is felt, and the infinite is seen in the finite appearance. Here, therefore, an objective feeling was found. This idea of Kant's æsthetics was further developed by Fries, who based upon feeling an æsthetic-religious system which taught that the highest ideas must be divined by faith. Jacobi taught an immediate faculty of the divine, which he first called the faculty of faith; later, of reason; finally—adopting the terms of Fries—of feeling.

These philosophical speculations greatly influenced the various systems of Rationalism. After the times of Wolf, only a few, as Röhrl, adhered to an exclusive intellectualism. Most of the important representatives of Rationalism accept the theories of Fries and Jacobi. Thus Wegscheider refers chiefly to the philosophical works of the disciples of Jacobi—Gerlach, Bouterweck, and Salat. And Gabler, one of the keenest of the early Rationalists, defines religion as a "feeling of dependence upon the infinite."

Among the adherents of Supranaturalism, Bretschneider and Reinhard recognised only a subjective feeling, but De Wette introduced the theory of Fries into systematic theology. Unlike Fries, however, in whose system there still was some obscurity as regards the relation of feeling and will to religion, De Wette based religion altogether on feeling or an æsthetic view of the world, in which all difference between religion and art disappeared.

The system of Jacobi and of Spinoza, together with the spirit prevailing among the Moravians, worked together to produce the new doctrine of feeling which constituted the basis of the theology of Schleiermacher, and which still influences most theological systems of modern times. For Schleiermacher, religion is "the feeling of absolute dependence;" that to which our reflection traces our individual existence is called God; and thus, in feeling, God is given to us in an original manner. See SCHLEIERMACHER. This theory of feeling was defended and keenly developed by Twisten, and in particular by Nitzsch. Hegel severely attacked the views of Schleiermacher, but his own views considerably changed with the gradual development of his system. See Tholuck, in Herzog's *Real-Encyclopædie*, iv, 703. (A. J. S.)

**Feet.** See FOOT.

**Feith**, RUDOLPH, was born at Zwolle Feb. 7, 1753. He received a careful Christian training. At fifteen he entered the University of Leyden. In 1781 he competed with Lannoy in celebrating De Ruyter. His epic received the gold, and his lyric the silver medal. As a poet, he enjoyed a high reputation through life. He excelled chiefly as a didactic poet, though he also tried his hand at lyric and dramatic poetry. His lyric on Immortality (*De Onsterfelijkheid*) is beautiful and sublime. His didactic poem on the Grave (*Het Graf*) is his longest, and is regarded as one of his best productions, abounding in the beautiful, the striking, and the sublime. His poetic writings are very numerous; and he also wrote several volumes of prose. He was appointed one of a commission to prepare a book of hymns for the use of the Reformed Church in Holland. This duty he discharged with great zeal and fidelity. To this collection he contributed himself a large number of beautiful and appropriate hymns, most of them original, and a few translated from the German. Though a layman, he was a successful cultivator of theology. Two essays or treatises of his on important questions received the premium from Teyler's Theological Society, and another was crowned by the Hague Society. He died February 8, 1824, at his villa near Zwolle. See Siegenbeek's *Geschiedenis der Nederlandsche Letterkunde* (Haarlem, 1826); Hofdijk's *Geschiedenis der Nederlandsche Letterkunde*, bl. 415 en verv. (Amsterd. 1864);

**Felgenhauer**, PAUL, a Protestant theologian and mystic, was the son of a Lutheran clergyman in Bohemia. He was born at Putschwitz, in Bohemia, in 1620. He studied medicine at the University of Wittenberg, but soon after returning to his native country appeared (1620) in public as a writer on theological subjects. In his *Chronology* he maintained that Christ was born in the year 4235 after the creation of the world, and as the world was not to last more than 6000 years, it ought to come to an end in A.D. 1765. As, however, the time was to be shortened on account of the elect, he assumed that the end of the world would occur before that year, although he claimed no special revelations on the subject. In his *Zeitspiegel* he denounced the corruption of the Church and of the Lutheran clergy. The persecution of Protestantism in Bohemia compelled him to leave his country. He first (1623) went to Amsterdam, where he published a number of mystic and alchemic writings, the theological views of which may be reduced to Sabellianism and Monophysitism, resting on a pantheistic and cabalistic basis. The large circulation of some of his works alarmed the Lutheran clergy, and many wrote against him. Not satisfied with this, the clergy of Hamburg, Lubeck, and Lüneburg requested the ministry at Amsterdam to arrest the circulation of the works of Felgenhauer, and the spreading of his views, if necessary, by force. From 1635 to 1639 he lived at Bederkesa, near Bremen, where he held meetings of his adherents. Expelled from Bremen, he returned to Holland, where he, however, soon left again for Northern Germany. In 1657 he was arrested by order of the governments of Zelle and Hanover, and imprisoned at Syke. The efforts of several Lutheran clergymen to convert him to the Lutheran creed failed. About 1659 he lived in Hamburg. The year of his death is not known. A complete list of his works (forty-six in number) is given in Adelung, *Gesch. der menschl. Narrheit*, iv, 400.—Herzog, *Real-Encycl.* iii, 348; Arnold, *Kirch.-u. Ketzerhistorie*, vol. iii, ch. v. (A. J. S.)

**Felibien**, JACQUES, a Roman Catholic divine, was born at Chartres in 1636, and distinguished himself in youth by success in study, especially of the Scripture. In 1668 he became pastor at Vineuil; in 1669, canon of Chartres; in 1695, archdeacon of Vendome. He died at Chartres Nov. 23, 1716. Besides various practical works, he wrote *Le Symbole des Apôtres expliqué par l'écriture Sainte* (Blois, 1696, 12mo).—*Comment. in Oseam* (Chartres, 1702, 4to).—*Pentateuchus Historicus ex fonte Hebraico*, etc. (Chartres, 1703, 4to). This book gave rise to much clamor, and Felibien was obliged to suppress various passages in which he was supposed to have departed from the orthodox interpretations. Moreover, as it had been printed with the permission only of the bishop, and without that of the royal censor, the book was suppressed by the government, and all the printed copies confiscated.—Hofer, *Now. Biog. Générale*, xvii, 274.

**Felicissimus**, the author of a schism in the Church of Carthage in the 3d century, was appointed deacon in Carthage by the presbyter Novatus, without a previous understanding with Cyprian, who, a short time before, had been elected bishop. Cyprian declared his appointment to be an encroachment upon his episcopal prerogatives, but did not depose him. During the Decian persecution Cyprian was for some time absent from Carthage, and some of the presbyters, who claimed greater rights than Cyprian was willing to concede to them, began to readmit the *lapsi* to the communion of the Church in consequence of the *libelli pacis* given by the martyrs, without having an under-

standing on the subject with Cyprian. The latter reproached the presbyters with too great laxity, and sent a commission to Carthage which was to investigate the conduct of the *lapsi*, and to regulate the support which the treasury of the Church granted in certain cases. Felicissimus denounced the conduct of Cyprian as an encroachment upon his rights as deacon, among which belonged, in the Church of Africa, the administration of the treasury of the Church; and he even went so far as to exclude from the communion of his church those who should appear before the episcopal commission. He was joined in his opposition by five presbyters and a number of confessors, and his church became the centre of all the *lapsi* who wished to have their cases decided before the return of Cyprian. After the return of Cyprian to Carthage in 251, a synod regulated the affair of the *lapsi*, and excluded Felicissimus and the presbyters acting with him from the Church. Felicissimus, however, not only persisted in his opposition, but his party, strengthened by the accession of several African bishops, elected Fortunatus, one of the five presbyters siding with Felicissimus, bishop of Carthage, and sent Felicissimus himself to Rome—where, in the mean while, the Novatian controversy had broken out—for the purpose of gaining the Roman bishop Cornelius over to their side. The mission was, however, unsuccessful, and the schism of Felicissimus seems soon after to have become extinct.—Herzog, *Real-Encyklop.* iv, 349; Schaff, *Church History.* (A. J. S.)

**Felicitas**, a saint of the Roman calendar, supposed to have suffered martyrdom A.D. 161. According to the legend, she was a woman of high birth, who embraced Christianity and brought up her seven sons in the faith. She was denounced to Marcus Aurelius, who ordered an inquiry. The prefect ordered her to sacrifice to the gods; she refused, as did her children. After vain efforts to break their constancy, the prefect reported the case anew to the emperor, who ordered a trial before special judges. The lady and her children were all put to death. The story is plainly of comparatively modern invention. Felicitas is commemorated in the Church of Rome Nov. 13, and her seven sons July 16. The bones of two of her sons are said to be preserved in Germany!—Bolland, *Acta Sanctor.* July 10; Butler, *Lives of Saints*, July 10.

**Felicitas**, an African slave who suffered martyrdom at Carthage along with Perpetua (q. v.), in the time of Severus, A.D. 202. They are both said by Basnage to have been Montanists, but cardinal Orsi seems to have disproved this in his *Dissert. Apol. pro SS. Perpetua et Felicitate*. They were arrested at Carthage while still catechumens, and were baptized in prison. All efforts were tried in vain to induce them to abandon their faith; they were condemned to be thrown to the wild beasts at a festival in honor of the anniversary of Geta's nomination (*Annales Cesaris*). After this judgment they were remanded to prison to await the fatal day. For the account of Perpetua, see PERPETUA. "As to Felicitas, on her return to the dungeon she was seized with the pains of labor. The jailer said to her, 'If thy present sufferings are so great, what wilt thou do when thou art thrown to the wild beasts? This thou didst not consider when thou refusedst to sacrifice.' She answered, 'I now suffer myself all that I suffer; but then there will be another who shall suffer for me, because I also will suffer for him.' A custom which had come down from the times of human sacrifices, under the bloody Baal-worship of the Carthaginians, still prevailed, of dressing those criminals who were condemned to die by wild beasts in priestly raiment. It was therefore proposed, in the present case, that the men should be clothed as the priests of Saturn, and the women as the priestesses of Ceres. Nobly did their free, Christian spirit protest against such a proceeding. 'We have come here,'

said they, 'of our own will, that we may not suffer our freedom to be taken from us. We have given up our lives that we may not be forced to such abominations.' The pagans themselves acknowledged the justice of their demand, and yielded. After they had been torn by the wild beasts, and were about to receive the merciful stroke which was to end their sufferings, they took leave of each other for the last time with the mutual kiss of Christian love." Felicitas is commemorated in the Church of Rome March 7.—Neander, *Ch. Hist.* Torrey, i, 123; Butler, *Lives of Saints*, March 7.

**Felix** (*happy*, Græcied Φηλαξ, Acts xxiii-xxiv; in Tacitus, *Hist.* v, 9, called ANTONIUS FELIX; in Suidas, CLAUDIUS FELIX; in Josephus and Acts, simply FELIX; so also in Tacitus, *Ann.* xii, 54), the Roman procurator of Judæa, before whom Paul so "reasoned of righteousness, temperance, and judgment to come," that the judge trembled, saying, "Go thy way for this time; when I have a convenient season I will call for thee" (Acts xxiv, 25; see Abicht, *De Claudio Felice*, Viteb. 1752; Eckhard, *Pauli oratio ad Felicem*, Isen. 1779). The context states that Felix had expected a bribe from Paul; and, in order to procure this bribe, he appears to have had several interviews with the apostle. The depravity which such an expectation implies is in agreement with the idea which the historical fragments preserved respecting Felix would lead the student to form of the man.

The year in which Felix entered on his office cannot be strictly determined. He was appointed by the emperor Claudius, whose freedman he was, on the banishment of Ventidius Cumanus, probably A.D. 53. Tacitus (*Ann.* xii, 54) states that Felix and Cumanus were joint procurators, Cumanus having Galilee, and Felix Samaria. In this account Tacitus is directly at issue with Josephus (*Ant.* xx, 6, 2), and is generally supposed to be in error; but his account is very circumstantial, and by adopting it we should gain greater justification for the expression of Paul (Acts xxiv, 10) that Felix had been judge of the nation "for many years." Those words, however, must not even thus be closely pressed; for Cumanus himself only went to Judæa in the eighth year of Claudius (Josephus, *Ant.* xx, 5, 2). From the words of Josephus (*Ant.* xx, 7, 1), it appears that his appointment took place before the twelfth year of the emperor Claudius. Eusebius fixes the time of his actually undertaking his duties in the eleventh year of that monarch. The question is fully discussed under CHRONOLOGY, vol. ii, 311, 312.

Felix was a remarkable instance of the elevation to distinguished station of persons born and bred in the lowest condition. Originally a slave, he rose to little less than kingly power. For some unknown, but probably not very creditable services, he was manumitted by Claudius Cæsar (Sueton. *Claudius*, 28; Tacitus, *Hist.* v, 9), on which account he is said to have taken the prænomén of Claudius. In Tacitus, however (*l. c.*), he is surnamed Antonius, probably because he was also a freedman of Antonia, the emperor's mother. Felix was the brother of Claudius's powerful freedman Pallas (Josephus, *War*, ii, 12, 8; *Ant.* xx, 7, 1); and it was to the circumstance of Pallas's influence surviving his master's death (Tacitus, *Ann.* xiv, 65) that Felix was retained in his procuratorship by Nero. In speaking of Pallas in conjunction with another freedman, namely, Narcissus, the imperial private secretary, Suetonius (*Claudius*, 28) says that the emperor was eager in heaping upon them the highest honors that a subject could enjoy, and suffered them to carry on a system of plunder and gain to such an extent that, on complaining of the poverty of his exchequer, some one had the boldness to remark that he would abound in wealth if he were taken into partnership by his two favorite freedmen.

The character which the ancients have left of Felix is of a very dark complexion. Suetonius speaks of the military honors which the emperor loaded him

with, and specifies his appointment as governor of the province of Judæa (*Claudius*, 28), adding an innuendo, which loses nothing by its brevity, namely, that he was the husband of three queens or royal ladies ("trium reginarum maritum"). Tacitus, in his *History* (v, 9), declares that, during his governorship in Judæa, he indulged in all kinds of cruelty and lust, exercising regal power with the disposition of a slave; and, in his *Annals* (xii, 54), he represents Felix as considering himself licensed to commit any crime, relying on the influence which he possessed at court. The country was ready for rebellion, and the unsuitable remedies which Felix applied served only to inflame the passions and to incite to crime. The contempt which he and Cumanus (who, according to Tacitus, governed Galilee while Felix ruled Samaria; but see Josephus, *Ant. xx*, 7, 1) excited in the minds of the people, encouraged them to give free scope to the passions which arose from the old enmity between the Jews and Samaritans, while the two wily and base procurators were enriched by booty as if it had been spoils of war. This so far was a pleasant game to these men, but in the prosecution of it Roman soldiers lost their lives, and but for the intervention of Quadratus, governor of Syria, a rebellion would have been inevitable. A court-martial was held to inquire into the causes of this disaffection, when Felix, one of the accused, was seen by the injured Jews among the judges, and even seated on the judgment-seat, placed there by the president Quadratus expressly to outface and deter the accusers and witnesses. Josephus (*Ant. xx*, 8, 5) reports that under Felix the affairs of the country grew worse and worse. The land was filled with robbers and impostors who deluded the multitude. Felix used his power to repress these disorders to little purpose, since his own example gave no sanction to justice. Thus, having got one Dineas, leader of a band of assassins, into his hands by a promise of impunity, he sent him to Rome to receive his punishment. Having a grudge against Jonathan, the high-priest, who had expostulated with him on his misuse, he made use of Doras, an intimate friend of Jonathan, in order to get him assassinated by a gang of villains, who joined the crowds that were going up to the Temple worship—a crime which led subsequently to countless evils, by the encouragement which it gave to the Sicarii, or leagued assassins of the day, to whose excesses Josephus ascribes, under Providence, the overthrow of the Jewish state. Among other crimes, some of these villains misled the people under the promise of performing miracles, and were punished by Felix. An Egyptian impostor, who escaped himself, was the occasion of the loss of life to four hundred followers, and of the loss of liberty to two hundred more, thus severely dealt with by Felix (Josephus, *Ant. xx*, 8, 6; *War*, ii, 13, 5; comp. Acts xxi, 38). A serious misunderstanding having arisen between the Jewish and the Syrian inhabitants of Cæsarea, Felix employed his troops, and slew and plundered till prevailed on to desist. His cruelty in this affair brought on him, after he was superseded by Festus, an accusation at Rome, which, however, he was enabled to render nugatory by the influence which his brother Pallas had, and exercised to the utmost, with the emperor Nero. Josephus, in his *Life* (§ 3), reports that, "at the time when Felix was procurator of Judæa, there were certain priests of my acquaintance, and very excellent persons they were, whom, on a small and trifling occasion, he had put into bonds and sent to Rome to plead their cause before Caesar." At the end of a two years' term Porcius Festus was appointed to supersede Felix, who, on his return to Rome, was accused by the Jews in Cæsarea, as above noticed (*Ant. xx*, 8, 9). This was in A.D. 55 (not in the year 60, as Anzer, *De temporibus in Act. Apost. ratione*, p. 100; Wieseler, *Chronologie der Apostelgeschichte*, p. 66-82).

While in his office, being inflamed by a passion for

the beautiful Drusilla, a daughter of king Herod Agrippa, who was married to Azizus, king of Emesa, he employed one Simon, a magician, to use his arts in order to persuade her to forsake her husband and marry him, promising that if she would comply with his suit he would make her a happy woman. Drusilla, partly impelled by a desire to avoid the envy of her sister Berenice, was prevailed on to transgress the laws of her forefathers, and consented to a union with Felix. In this marriage a son was born, who was named Agrippa: both mother and son perished in an eruption of Mount Vesuvius, which took place in the days of Titus Caesar (Josephus, *Ant. xx*, 7, 2). With this adulteress was Felix seated when Paul reasoned before the judge, as already stated (Acts xxiv, 24). Another Drusilla is mentioned by Tacitus as being the wife (the first wife) of Felix. This woman was niece of Cleopatra and Antony. See DRUSILLA. By this marriage Felix was connected with Claudius. Of his third wife nothing is known. (See Salden, *De Felice et Drusilla*, Amst. 1684).

Paul, being apprehended in Jerusalem, was sent by a letter from Claudius Lysias to Felix at Cæsarea, where he was at first confined in Herod's judgment-hall till his accusers came. They arrived. Tertullus appeared as their spokesman, and had the audacity, in order to conciliate the good-will of Felix, to express gratitude on the part of the Jews, "seeing that by thee we enjoy great quietness, and that very worthy deeds are done unto this nation by thy providence" (Acts xxiii, xxiv). Paul pleaded his cause in a worthy speech; and Felix, consigning the apostle to the custody of a centurion, ordered that he should have such liberty as the circumstances admitted, with permission that his acquaintance might see him and minister to his wants. This imprisonment the apostle suffered for a short period (not two years, as ordinarily supposed, that expression having reference to Felix's whole term of sole office), being left bound when Felix gave place to Festus (q. v.), as that unjust judge "was willing," not to do what was right, but "to show the Jews a pleasure" (Walch, *De Felice procuratore*, Jena, 1747; also in his *Dissert. in Act. iii*, 29; Smith's *Dictionary of Class. Biog.* s. v.).—Kitto, s. v.; Smith, s. v.

**Felix**, MARTYR, and his companion Regula, were, according to tradition, the first Christian missionaries in the city of Zurich, which, before the Reformation, venerated them as patrons, and still has their names in the town seals. They are said to have been executed by order of the emperor Maximian. Nothing certain is known about their history.—Herzog, *Real-Encyklop.* iv, 351. (A. J. S.)

**Felix** OF NOLA was a native and presbyter of Nola. After his property had been confiscated during the persecution of Decius, he supported himself by cultivating a garden and some rented land. According to a legend, he concealed himself during the persecution in the fissures of an old building, and a spider saved him from the search of the messengers by drawing her web over him. His sufferings and alleged miracles were celebrated by Paulinus, bishop of Nola, and many pilgrims visited his grave.—Herzog, *Real-Encyklop.* iv, 355. (A. J. S.)

**Felix** THE MANICHEAN was a contemporary of Augustine. He was an elder or elect of the Manicheans, and had gone to Hippo to gain converts for his sect. Augustine had a discussion with him in the church of Hippo in the presence of the congregation which lasted two days. The proceedings were taken down by notaries, and are still extant (vol. viii of the Benedictine edition of Augustine's works: *De actis cum Felice Manicheo*, libri ii). On the day before the disputation, Felix declared his readiness to be burned with his books if anything wrong could be found in them; but during the disputation he is reported to have been

timid, weak, evasive, and it was thought that he wished to flee. Before the disputation began, his books were taken from him, and placed under the public seal. Felix undertook to prove that Mani was the Paraclete who had been promised by Christ, and he used as an argument the information given by Mani on the construction of the world, on which nothing could be found in Paul and the writings of the other apostles. Augustine replied that the Paraclete had the mission to teach the truths of religion, but not to expound mathematics. The result of the disputation was that Felix declared himself refuted, and publicly renounced and cursed Mani. The protocol of the disputation was signed by both Augustine and Felix. Posidius, in the *Life of Augustine*, also states that Felix, after the third meeting, acknowledged his error, and accepted the faith of the Church.—Herzog, *Real-Encycl.* iv, 350. (A. J. S.)

**Felix** (*Pratensis*), an eminent Jewish scholar of the 16th century, was born in Prato, Tuscany. He was the son of a rabbi, who taught him the Oriental languages. He travelled in Italy after the death of his father, and, becoming convinced of the truth of Christianity, was baptized, and shortly after entered the order of St. Augustine. The date of his profession of Christianity is uncertain, but it probably took place before 1506. He translated the Psalms into Latin, dedicating the work to Leo X, and received authority from the pope to translate the other books of the Old Testament. He revised the text of the two first Hebrew editions of the Bible published by Bomberg, carefully correcting the proofs himself. He died in 1557. His works are, 1. *Psalterium ex hebraeo ad verbum ferè tractatum adjectis notationibus* (Venice, 1515, 4to) (this version has been inserted in the *Psalterium Septuaginta* (Lyons, 1530, 8vo);—2. *Biblia sacra hebraea, cum utraque mazorá et targum, item cum Commentariis rabbinorum; curá et studio Felicis Pratensis, cum profectione latina Leonis X nuncupatá* (Venice, 1518, 4 vols. fol.). There are said to be versions of Job and other books of the Bible by Felix, but they have never been published.—*Biographie Universelle*, xiv, 273. (J. H. W.)

**Felix**, bishop of Urgel (Urgelis), in Spain, 9th century. Of his early life little is known. He became bishop of Urgel in 791. Elipandus of Toledo, who had been his pupil, consulted him as to the doctrine of the person of Christ, with regard to which he seems to have already embraced the so-called *Adoptian* doctrine. See **ELIPANDUS**. "The answer of Felix was that Christ, with respect to his divine nature, was truly and properly the Son of God, begotten of the Father, and hence he was the true God, together with the Father and the Holy Spirit, in the unity of the Godhead. But that, with respect to his humanity, Christ was the Son of God by adoption, born of the Virgin by the will of the Father, and thus he was nominally God. Hence, according to the opponents of the Felicians, it followed that there was a twofold Sonship in Christ, and that he must consist of two persons. The opinion of Felix was considered by the orthodox as nothing more than a development of the Nestorian heresy. The doctrine of Felix was adopted by Elipandus, who, being the primate of Spain, propagated it through the different provinces of Spain, while Felix himself contributed to spread it throughout Narbonne and other parts of Gaul" (Carwithen, *Church History*, p. 179). It appears to be clear that Felix had read some of the writings of Theodore of Mopsuestia (q. v.), in which a similar doctrine is taught. Felix seems, moreover, to have engaged in controversy with the Mohammedans, and, according to Alcuin, he wrote a *Dialogue* against them; and it is not unlikely that he was led to the Adoptian view by his desire to render the doctrine of the Incarnation less offensive to the Mohammedans. Alcuin (q. v.) entered into controversy with Felix, and we learn from him a large part of what is known

about the controversy (Alcuin, *Opera*, ii, 760 sq.). Neander gives the following statement: "Felix distinguished between how far Christ was the Son of God and God according to nature (*natura, genere*), and how far he was so by virtue of grace, by an act of the divine will (*gratia, voluntate*), by the divine choice and good pleasure (*electione, placito*); and the name Son of God was given to him only in consequence of connection with God (*nuncupative*); and hence the expressions for this distinction, *secundum naturam* and *secundum adoptionem*. Felix appealed to the fact that, though the name of Son by adoption (*ὁ υἱοθετίας*) is not applied in the Bible to Christ, yet there are other designations which express the same idea. He adduces John x, 34, when Jesus disputed with the Jews (*κατ' ἀνθρώπων*), and referred to the passage in the Old Testament, in which men are called *Elohim*, where Christ placed himself as a man in the category of those who were called 'gods' *nuncupative*, and not in a strict sense. Then as to the passage, 'None is good save one, that is God,' from this it appears that as man he was not to be called good in the same sense as God, and that only the divine nature in him was the source of goodness. He would allow an interchange of the divine and human predicates only in the same manner as Theodore; it could not be made without limitation, but the different senses must be observed according as they were attributed to the divine or human natures. He charged his opponents with so confounding the two natures by their doctrine of the *singularitas persone* that they left no distinction between the *suscipiens* and the *susceptum*. Expressions that were then in common use, such as *God was born, and died*, never occur in Scripture, which also never says that the Son of God, but that the Son of man was given for us. On the latter point Alcuin could easily have confuted Felix by other passages, but both were wrong in not distinguishing the various Biblical applications of the term Son of God from the Church use of it, and in taking the idea everywhere in a Church sense. Like Theodore, Felix asserted Agnoëtism of Christ. It is also a point of resemblance between them that both sought for an analogy between the union of the man Christ with the divine Being and the relation of believers to God. Felix says that Christ in an improper sense (*nuncupative*) was called the Son of God conjointly with all who are not God according to their nature, but by the grace of God in Christ have been taken into communion with God (*deificati*). In this order also the Son of God is, in respect of his humanity, both according to nature and grace. He maintained that, as far as Christ as man is reckoned among the sons of God, all believers are his members; considered according to his divine nature, believers are the temple in which he dwells. He did not wish by that to deny the specific difference between Christ and believers; whatever resemblance existed between them belonged to him in a far higher sense; he was united to God by generation, and was the medium of the communion of the rest with God. Felix also perfectly agreed with Theodore in the thought that the communion with God into which Christ was received as a man might be represented as a revelation of the divine being according to the measure of the various stages of the development of his human nature, and thus supposed various degrees of it up to the highest revelation after the glorification of Christ. It might be peculiarly offensive that he should compare the baptism of Christ with the regeneration of believers; but he certainly did not mean to say that Christ thus became partaker of communion with the divine nature, but only to point out an analogy so far, as baptism marked a distinct stage in Christ's life, after which the operation of the divine life in him was peculiarly conspicuous. It is therefore evident that the doctrine of Felix was altogether that of Theodore, excepting that the latter could express himself more freely in an

age when the doctrines of the Church were less rigorously defined, while Felix was obliged to use a terminology which was opposed to his own system. The great importance of the antagonism in which he stood to the Church doctrine is likewise manifest; it included not merely Christology, but also Anthropology; for the doctrine of the revelation of the Divine Being in Christ, conditioned by various stages of development, was connected with one of special importance—the principle of free self-determination. It is uncertain how far Felix consciously developed his principles; but there is no question that these were throughout contradictory to the prevalent Augustinian doctrine. As Felix lived in the Frankish territory, the Frankish Church was drawn into the controversy. In A.D. 792, Charlemagne convoked an assembly at Ratishon, at which Felix appeared, and was induced to recant. He was then sent to Rome, where he made similar explanations (Alcuin *adv. Elipandum*, i, c. 16; Mansi, *Concil.* xiii, 1031). But, on being permitted to return home, he repented of the steps he had taken, took refuge in Saracenic Spain, and again promulgated his doctrine. Alcuin, who had been summoned to take a part in the controversy, endeavored to win him over by a friendly epistle; but Felix regarded the subject of the controversy as too important, and thus it was carried on in his writings (Alcuin *libellus adv. Haresin Felicis*, *Opp. Alc.* i, pars ii, 759). The Spanish bishops interceded for Felix with the emperor, and applied for a new investigation (Alcuin, *Opera*, ii, 567). In consequence, Charles called a second synod at Frankfort-on-the-Maine in A.D. 794, which again decided against Felix (*Mansi*, xiii, 863); and since the Adoptianists had spread themselves even as far as France, the emperor sent a commission of three persons into those parts in order to oppose them. Felix came with them, and was prevailed upon to appear before the synod at Aix-la-Chapelle (Aix), A.D. 799. After Alcuin had disputed with him for a long time, Felix declared himself to be convinced. He made a recantation in Spain; yet he was not altogether trusted, and was placed under the oversight of Leidrad, bishop of Lyons. He could not at once give up a dogmatic tendency which was so deeply rooted; he still was always inclined to Agnœtism, and after his death a series of questions was found which showed that he firmly adhered to his fundamental views" (*Hist. of Dogmas*, tr. by Ryland, p. 44 sq.). Felix was deposed A.D. 799, and died about A.D. 818. His writings, whether in apology or retraction of his views, remain only in fragments; but his *Profession of Faith*, made at Aix-la-Chapelle in 799, is given in Alcuin *Opera* (Paris, 1617, fol.), in Mansi, *Concil.* xiii, 1035; in Labbe, *Concil.* p. 1171. See Dupin, *Eccles. Writers*, cent. viii; Neander, *Ch. History*, iii, 156, 158; Mosheim, *Ch. History*, cent. viii, ch. v, § 3; Hagenbach, *History of Doctrines*, § 179; Dorner, *Doctrine of the Person of Christ*, Edinb. transl. div. ii, vol. i, 248 sq. See ADOPTIANS; CHRISTOLOGY.

**Felix I**, bishop of Rome. According to the *Acta Sanctorum*, he succeeded Dionysius in 269, and died in 274. He was declared a "martyr" by the Council of Ephesus on "account of his sufferings for Christ," but he did not die by violence. There is extant a letter of his against the Sabellians and Paul of Samosata. Other writings, not believed to be his, are to be found in Migne, *Patrolog. Lat.* vol. v, and in Galland, *Bibl. Ant.* iii, 542.—Eusebius, *Hist. Eccl.* vii, 30; Baronius, *Annales*, p. 272-275; Bower, *History of the Popes*, i, 78.

**Felix II**, Anti-pope, was placed in the episcopal chair of Rome A.D. 355, by the Arian emperor Constantius, in place of Liberius (q. v.), who was exiled by the emperor. The clergy refused to acknowledge Felix, and Constantius recalled Liberius to hold the see conjointly with Felix; but when the decree was read in the circus, the people rejected it with the cry,

"One God, one Christ, one bishop." But Sozomen says that Felix was an adherent of the Nicene faith, and a "blameless" man. Nevertheless, Felix had to retire from Rome, and is said to have died A.D. 365; but the accounts vary very much. His name is found in the Roman Martyrology, July 29; but Baronius decides against his claims (*Annal.* A.D. 357). Nevertheless, Gregory XIII confirmed his sainthood in 1582.—Sozomen, *Hist. Eccl.* iv, 11; Tillemont, *Mém. pour Servir*, etc., vol. vi; Hoefler, *Nouv. Biog. Générale*, vol. xvii; Bower, *History of the Popes*, i, 134. See LIBERIIUS.

**Felix III (II?)** was elected successor of Simplicianus A.D. 483, under the influence of the Gothic emperor Odoacer. He and Acacius, bishop of Constantinople, mutually excommunicated each other, and thus gave occasion to the first schism between the Greek and Latin churches. He died Feb. 24 or 25, 492. He is commemorated by the Roman Church as a saint (Feb. 25).—Mosheim, *Ch. Hist.* cent. v, pt. ii, ch. v, § 18, 21; Bower, *History of the Popes*, ii, 193 sq. See MONOPHYSITES.

**Felix (III or) IV**, Pope, succeeded John I A.D. 526, by the influence of the Arian emperor Theodoric. Little is known of him, but that little is creditable. He died 530.—Baronius, *Annal.* cent. vi; Dupin, *Eccles. Writers*, cent. vi.

**Felix V**, AMADEUS (of Savoy), Pope or Anti-pope, was born Sept. 4, 1383. He succeeded his father, Amadeus VII, in the earldom of Savoy, which the emperor Sigismund raised into a duchy. In his eighteenth year he was married to Maria of Burgundy, and in those times of bloody excess was accounted a wise and just prince. He participated through an envoy in the Council of Constance, and in 1422 shared in the crusade against the Hussites. His naturally strong religious tendencies having been strengthened by his wife's death, he built a hermitage at Ripaille, on Lake Lemán, in 1434, and retired to it with the intention of spending the rest of his days in retirement. After the councils of Pisa and Constance had deposed Eugenius IV, another was assembled at Basle, and Amadeus was elected pope. He accepted the nomination, adopted the title of Felix V, and as such entered Rome June 24, 1440. Finally he made terms with Nicolas V, Eugenius IV's successor, and, having thus ended the schism, Felix V retired to his hermitage at Ripaille, with the rank of cardinal-legate and permanent vicar-general of the papal see in Savoy, Basle, Strasburg, etc. He died at Geneva January 7, 1451. See Guichenon, *Histoire générale de la roy. maison de Savoie* (1660); Æn. Sylvii *Commentar. de gestis Concil.* (Basle, 1577). See BASLE, COUNCIL OF.

**Fell, John**, D.D., bishop of Oxford, a learned theologian, was born at Longworth, in Berks, June 23, 1625, and graduated M.A. in 1643. As a devoted friend of the Stuarts, for whom he had been in arms, he was deprived of his studentship in Christ Church by the parliamentary visitors, and during the Protectorate he continued in obscurity. After the Restoration he obtained a stall at Chichester, whence he was preferred to a more valuable one at Christ Church, and soon after became dean of Christ Church. In 1666 he became vice-chancellor of the university, and in 1676 bishop of Oxford, retaining his deanery. He was a great benefactor to the university, and as a prelate was distinguished by learning and munificence; but his conduct in the matter of John Locke's illegal removal from his studentship in Christ Church is a great stain upon his memory (see *Edinburgh Review*, 1829, l, 16). Among his writings are a Latin translation of Wood's *History and Antiquities of Oxford* (2 vols. fol.):—*A Life of Dr. Hammond* (1660, prefixed to *Hammond's Works*):—*St. Clement's Two Epistles to the Corinthians* (Oxford, 1669, 12mo, Gr. and Lat.):—*Artis Logice Compendium*:—*Epistle of Barna-*

*bas* (Oxford, 1685, 12mo):—*Cypriani Opera* (Oxford, 1677):—also Athenagoras, Hermes, and Justin's *Apologia*:—*Novi Testamenti Libri Omnes; accesserunt Parallela Script. loc. necnon variae lectiones*, etc. (London, 1675; Leips. 1697, and again, edited by A. H. Francke, 1702; Oxford, ed. by Gregory, fol. 1703; Oxford, ed. by Jacobson, 1852, 8vo):—*Paraphrase and Annotations upon all the Epistles of St. Paul* (Lond. 1675, 8vo; but from the edition of 1708 it appears that this book was the work of A. Woodhead, R. Allestree, and O. Walker, "corrected and improved" by Fell). His edition of the N. T. gave a new impulse to critical science, which he farther aided by the assistance he furnished, in money and otherwise, to the critical labors of John Mill (q. v.). Indeed, bishop Fell is said to have devoted his "whole substance" to works of piety and charity. He died July 10, 1686.—Hook, *Eccles. Biog.* v, 74; Wood, *Athenæ Oxonienses; Biog. Britannica*, s. v.

**Fell, John**, an English Independent minister, was born at Cockermouth, 1735, and became pastor at Thaxted, Essex. His early opportunities were not great, but by his talents and industry he became a very respectable scholar. He was made tutor in the ancient languages in the Dissenters' seminary at Homerton. He is said to have "been dismissed from his office there for reading newspapers on Sunday." His friends got him an annuity of £100, and he was "asked to deliver lectures on the Evidences at the Scots' Church, London Wall." He had only delivered four when he died, Sept. 6, 1797. He published (in controversy with Dr. Hugh Farmer, q. v.) *Demoniacs, an Inquiry into the Heathen and Scripture Doctrine of Demons* (London, 1779, 8vo):—*The Idolatry of Greece and Rome distinguished from that of other Heathen Nations* (Lond. 1785, 8vo). After his death Dr. Hunter published his *Lectures on the Ev' d nces* (Lond. 1798, 8vo).—Bogue and Bennett, *Hist. of Dissenters*, ii, 518; Kitto, *Cyclopædia*, s. v.; Darling, *Cyclop. Bibliographica*, i, 1125.

**Fellenberg, Philippe-Emanuel de**, a philanthropist and earnest laborer in the cause of education, was born at Berne, Switzerland, June 27, 1771. His father, who was a member of the government of Berne, laid the foundation of his intellectual culture, but he received his moral bent and self-sacrificing spirit from his mother, a great granddaughter of the Dutch admiral Van Tromp. After some time spent at the University of Tübingen in the study of civil law, he devoted himself especially to politics and philosophy. "In order to acquaint himself with the moral state of his countrymen, he spent much of his time in traveling through Switzerland, France, and Germany, usually on foot, with his knapsack on his back, residing in the villages and farm-houses, mingling in the labors and occupations, and partaking of the rude lodging and fare of the peasants and mechanics, and often extending his journey to the adjacent countries." On his return to Berne in 1798 he rendered important service as "commandant of the quarter" in the revolutionary troubles. In 1799 he purchased the estate called *Hofwyl*, two leagues from Berne, and founded there, successively, a school of agriculture, a manufactory of agricultural implements, schools for the poor, for the better classes, and a normal school. He devoted the remainder of his life to education with great success, but not without opposition. He died Nov. 21, 1844. See Vericourt, *Rapport sur les Instituts de Hofwyl*; Haam, *Fellenberg's Leben und Wirken* (Berne, 1845); Hoefer, *Nouv. Biog. Générale*, xvii, 307.

**Feller, Francis Xavier**, a Flemish Jesuit, was born at Brussels Aug. 18, 1735, entered the order of Jesuits in 1754, and died May 23, 1802. He was a very learned and voluminous writer, his publications amounting to 120 volumes. Among them are *Reply to Febronius* [see HONTHEIM], 1771:—*Observat. Philos. sur le Système de Newton* (3d edit. Liege, 1778):—*Cate-*

*chisme Philosophique*—Evidences of Christianity (5th edit. Lyons, 1819, 2 vols. 8vo):—*Dictionnaire-historique* (Liege, 1818, 8 vols.; 7th ed. Paris, 1829, 17 vols. 8vo):—*Cours de Morale Chrétienne* (Paris, 1825, 5 vols. 8vo).—Hoefer, *Nouv. Biog. Générale*, xvii, 309.

**Felloes** (פֶּלְאוֹס, *chishshlukim'*, joinings, 1 Kings vii, 33) probably denotes rather the *spokes* that connect the rim with the hub of a wheel, being a kindred term with that used to denote the *coupling-rods* of the tabernacle (Exod. xxvii, 10). See CHARIOT.

**Fellow**, besides its contemptuous use (as a rendering of פֶּלְאוֹס, a man, etc.), and its frequent employment (usually as a rendering of פֶּלְאוֹס, a friend or equal), in the sense of *companion*, stands in one remarkable passage (Zech. xiii, 7) as the rendering of פֶּלְאוֹס, *amith'*, society, in the phrase פֶּלְאוֹס יְהוָה, *man of my association*, i. e. *my associate*; corresponding with פֶּלְאוֹס, *my shepherd* in the parallel member, and referred to himself by our Saviour (Matt. xxvi, 31) as the great Pastor and Sacrifice for his people; not so much in the sense of simple equality of nature with the Father, as of copartnership with him in the great work of caring for and redeeming mankind. See NEIGHBOR.

**Fellow of a College.** See FELLOWSHIP.

**Fellowes, Robert**, was born in Norfolk, England, in 1770; studied at St. Mary's Hall, Oxford, took holy orders in 1795, and died in 1847. His theological speculations gradually led him to reject the doctrines of the Established Church, and to adopt the opinions found in his *Religion of the Universe*, published in London in 1836. He was an intimate friend of Dr. Parr and baron Masères, the latter of whom left him the greater part of his large fortune, to be dispensed in literary and benevolent enterprises. He was for some time editor of the *London Critical Review*. He was an early advocate of the establishment of the University of London, of which he was a liberal benefactor. Among his works are *Christian Philosophy* (1798, 2d ed. 1799, 8vo):—*Supplement to do.*:—*Religion without Cant* (1801, 8vo):—*Guide to Immortality* (1804, 3 vols. 8vo):—*Manual of Piety* (1807, 8vo):—*A Body of Theology* (1807, 2 vols. 8vo).—Appleton, *Cyclopædia*, s. v.; Allibone, *Dictionary of Authors*, i, 584.

**Fellowship** in a college, a station of privilege and emolument enjoyed by one who is elected a member of any of those endowed societies which in the English universities are called colleges. The person so elected shares the benefits of the foundation in common with the other members, and from such participation derives the name of fellow, the Latin name for which in the statutes of most of the colleges is *socius*. See UNIVERSITY. In Oxford and Cambridge "the fellowships were either constituted by the original founders of the colleges to which they belong, or they have been since endowed. In almost all cases their holders must have taken at least the first degree of bachelor of arts or student in the civil law. One of the greatest changes introduced by the commissioners under the University Act of 1854 was the throwing open of the fellowships to all members of the university of requisite standing, by removing the old restrictions by which many of them were confined to founder's kin, or to the inhabitants of certain dioceses, arch-deaconries, or other districts. Fellowships vary greatly in value. Some of the best at Oxford, in good years, are said to reach £700 or even £800, whilst there are others which do not amount to £100, and many at Cambridge which fall short of that sum. Being paid out of the college revenues which arise from land, they also vary from year to year, though from this arrangement, on the other hand, their general value with reference to the value of commodities is preserved nearly unchangeable, which would not be the case if they consisted of a fixed payment in money. The

senior fellowships are the most lucrative, a system of promotion being established among their holders; but they all confer on their holders the privilege of occupying apartments in the college, and generally, in addition, certain perquisites as to meals or commons. Many fellowships are tenable for life, but in general they are forfeited should the holder attain to certain preferments in the Church or at the bar, and sometimes in the case of his succeeding to property above a certain amount. In general, also, they are forfeited by marriage, though this disability may now be removed by a special vote of the college, permitting the fellow to retain his fellowship notwithstanding his marriage. With the single exception of Downing College, Cambridge, in which the graduates of both universities are eligible, the fellowships are confined to the graduates of the university to which they belong" (Chambers, *Encyclopaedia*, s. v.).

**Fellowship** (κοινωνία), "joint interest, or the having one common stock. The fellowship of the saints is twofold: 1. With God (1 John i, 3; 1 Cor. i, 9; 1 Cor. xiii, 14); 2. With one another (1 John i, 7). Fellowship with God consists in knowledge of his will (Job xxii, 21; John xvii, 3); agreement in design (Amos iii, 2); mutual affection (Rom. viii, 38, 39); enjoyment of his presence (Psa. iv, 6); conformity to his image (1 John ii, 6; 1 John i, 6); participation of his felicity (1 John i, 3, 4; Eph. iii, 14-21; 2 Cor. xiii, 14). Fellowship of the saints may be considered as a fellowship of duties (Rom. xii, 6; 1 Cor. xii, 1; 1 Thess. v, 17, 18; James v, 16); of ordinances (Heb. x, 24; Acts ii, 46); of graces, love, joy, etc. (Heb. x, 24; Mal. iii, 16; 2 Cor. viii, 4); of interest spiritual, and sometimes temporal (Rom. xii, 4, 13; Heb. xiii, 16); of sufferings (Rom. xv, 1, 2; Gal. vi, 1, 2; Rom. xii, 15); of eternal glory (Rev. vii, 9)."—Buck, *Theol. Dictionary*, s. v. See COMMUNION.

**Feltham**, OWEN, an English writer of the reign of James I, who was a native of Suffolk, lived many years in the earl of Thomond's family, and died about 1678. The work by which he is remembered is *Resolves, Divine, Political, and Moral*, which has passed through many editions, and is still reprinted.

**Felton**, HENRY, D.D., a learned English divine, was born at London in 1679, and was educated at Westminster school, the Charter House, and Edmund Hall, Oxford. In 1711 he became rector of Whitewell, Derbyshire, and was finally appointed principal of St. Edmund's Hall in 1722. He died in 1740. His principal works are, *A Dissertation on reading the Classics* (Lond. 3d ed. 1723, 12mo):—*The Common People taught to defend their Communion with the Church of England* (Oxf. 1727, 8vo):—*The Christian Faith asserted against Deists, Arians, and Socinians* (Oxf. 1732, 8vo):—*The Resurrection of the same numerical Body asserted* (London, 1733, 3d ed. 8vo):—*Sermons on the Creation, Fall, and Redemption of Man*, etc. (Lond. 1748, 8vo):—*Nineteen Sermons*, 1748 (posthumous).—Darling, *Cyclop. Bibliographica*, s. v.; Rose, *New Gen. Biog. Dict.* s. v.

**Female ECCLESIASTIC.** (For monographs, see Volboding, *Index*, p. 164.) See MINISTRY; DEACONESS; AGAPETE.

**Fence** (Psa. lxii, 3), גִּדְרֵי, *gader'*, a wall (q. v.) rather than hedge (as elsewhere generally rendered). The Hebrews use two terms to denote a fence of different kinds: גִּדְרֵי, *gader'*, or גִּדְרֵיהֶם, *gederal'*, and גִּבְעוֹתֵיהֶם, *mesukah'*. According to Vitringa, the latter denotes the outer thorny fence of the vineyard, and the former the inner wall of stones surrounding it. The chief use of the former was to keep off men, and of the latter to keep off beasts, not only from gardens, vineyards, etc., but also from the flocks at night (see Prov. xv, 19; xxiv, 31). See HEDGE. From this root the Phenicians called any enclosed place *gaddir*, and particularly gave this name to their settlement in

the south-western coast of Spain, which the Greeks from them called Γάδρα, the Romans *Gades*, and the moderns *Cadiz*. See GEDERAH. In Ezek. xiii, 5; xxii, 30, *gader'* appears to denote the fortifications of a city; and in Psa. lxii, 3, the wicked are compared to a tottering fence and bowing wall; i. e. their destruction comes suddenly upon them. Fenced cities (see below) were such as were fortified.—Calmet, s. v. See AGRICULTURE.

**Fenced City** (מְצוּרָה, *metzurah'*, *intrenched*; 2 Chron. xi, 10, 23; xii, 4; xiv, 6; xxi, 3; rendered "stronghold," 2 Chron. xi, 11; "fort," Isa. xxix, 3; "munition," ii, 1. מִבְּצָר, *mibtsar'*, a fortress, is also sometimes rendered "fenced" in connection with צִיָּר, a city, Numb. xxxii, 17, 36; Josh. x, 20; xix, 35; 1 Sam. vi, 18; 2 Kings iii, 19; x, 2; xvii, 9; xviii, 8; 2 Chron. xvii, 19; Jer. v, 17; Dan. xi, 15; elsewhere "stronghold," etc.). The broad distinction between a city and a village in Biblical language consisted in the possession of walls. See CITY. The city had walls, the village was unwall, or had only a watchman's tower (מִצְדָּה, *mitsdoh*, *turris custodum*; comp. Gesen. *Thes.* p. 267), to which the villagers resorted in times of danger. A threefold distinction is thus obtained: 1. cities; 2. unwall villages; 3. villages with castles or towers (1 Chron. xxvii, 25). The district east of the Jordan, forming the kingdoms of Moab and Bashan, is said to have abounded from very early times in castles and fortresses, such as were built by Uzziah to protect the cattle, and to repel the inroads of the neighboring tribes, besides unwall towns (Ammian. Marc. xiv, 9; Dent. iii, 5; 2 Chron. xxvi, 10). Of these many remains are thought by Mr. Porter to exist at the present day (*Damascus*, ii, 197). The dangers to which unwall villages are exposed from the marauding tribes of the desert, and also the fortifications by which the inhabitants sometimes protect themselves, are illustrated by Sir J. Malcolm (*Sketches of Persia*, c. xiv, p. 148) and Frazer (*Persia*, p. 379, 380; comp. Judg. v, 7). Villages in the Hauran are sometimes enclosed by a wall, or, rather, the houses, being joined together, form a defence against Arab robbers, and the entrance is closed by a gate (Burckhardt, *Syria*, p. 212). See GATE.

A further characteristic of a city as a fortified place is found in the use of the word בָּנֵה, *build*, and also *fortify*; so that to "build" a city appears to be sometimes the same thing as to fortify it (comp. Gen. viii, 20, and 2 Chron. xvi, 6, with 2 Chron. xi, 5-10, and 1 Kings xv, 17). See WALL.

The fortifications of the cities of Palestine, thus regularly "fenced," consisted of one or more walls crowned with battlemented parapets, מְצֻרֹת, having towers at regular intervals (2 Chron. xxxii, 5; Jer. xxxi, 38), on which in later times engines of war were placed, and watch was kept by day and night in time of war (2 Chron. xxvi, 9, 15; Judg. ix, 45; 2 Kings ix, 17). Along the oldest of the three walls of Jerusalem there were ninety towers, in the second fourteen, and in the third sixty (Josephus, *War*, v, 4, 2). One such tower, that of Hananeel, is repeatedly mentioned (Jer. xxxi, 38; Zech. xiv, 10), as also others (Neh. iii, 1, 11, 27). The gateways of fortified towns were also fortified and closed with strong doors (Neh. ii, 8; iii, 3, 6, etc.; Judg. xvi, 2, 3; 1 Sam. xxiii, 7; 2 Sam. xviii, 24, 33; 2 Chron. xiv, 7; 1 Macc. xiii, 33; xv, 39). In advance of the wall there appears to have been sometimes an outwork (חֲבֵל, *proteichisma*), in A. Vers. "ditch" (1 Kings xxi, 23; 2 Sam. xx, 15; Gesenius, *Thes.* p. 454), which was perhaps either a palisade or wall lining the ditch, or a wall raised midway within the ditch itself. Both of these methods of strengthening fortified places, by hindering the near approach of machines, were usual in earlier Egyptian fortifications (Wilkinson,

*Anc. Eg.* i, 401), but, would generally be of less use in the hill forts of Palestine than in Egypt. In many towns there was a keep or citadel for a last resource to the defenders. Those remaining in the Hauran and Leja are square. Such existed at Shechem and Thebez (*Judg.* ix, 46, 51; viii, 17; 2 Kings ix, 17), and the great forts or towers of Psephizus, Hippicus, and especially Antonia, served a similar purpose, as well as that of overawing the town at Jerusalem. These forts were well furnished with cisterns (*Acts* xxi, 34; 2 Macc. v, 5; Josephus, *Ant.* xviii, 4, 3; *War.* i, 5, 4; v, 4, 2; vi, 2, 1). At the time of the entrance of Israel into Canaan there were many fenced cities existing, which first caused great alarm to the exploring party of searchers (*Numb.* xiii, 28), and afterwards gave much trouble to the people in subduing them. Many of these were refortified, or, as it is expressed, rebuilt by the Hebrews (*Numb.* xxxii, 17, 34-42; *Dent.* iii, 4, 5; *Josh.* xi, 12, 13; *Judg.* i, 27-33), and many, especially those on the sea-coast, remained for a long time in the possession of their inhabitants, who were enabled to preserve them by means of their strength in chariots (*Josh.* xiii, 3, 6; xvii, 16; *Judg.* i, 19; 2 Kings xviii, 8; 2 Chron. xxvi, 6). The strength of Jerusalem was shown by the fact that that city, or at least the citadel, or "stronghold of Zion," remained in the possession of the Jebusites until the time of David (2 Sam. v, 6, 7; 1 Chron. xi, 5). Among the kings of Israel and Judah several are mentioned as fortifiers or "builders" of cities, e. g. Solomon (1 Kings ix, 17-19; 2 Chron. viii, 4-6), Jeroboam I (1 Kings xii, 25), Rehoboam (2 Chron. xi, 5, 12), Baasha (1 Kings xv, 17), Omri (1 Kings xvi, 24), Hezekiah (2 Chron. xxxii, 5), Asa (2 Chron. xiv, 6, 7), Jehoshaphat (2 Chron. xvii, 12) but especially Uzziah (2 Kings xiv, 22; 2 Chron. xxvi, 2, 9, 15); and in the reign of Ahab the town of Jericho was rebuilt and fortified by a private individual, Hiel of Bethel (1 Kings xvi, 34). Herod the Great was conspicuous in fortifying strong positions, as Masada, Machaerus, Herodium, besides his great works at Jerusalem (Josephus, *War.* vii, 6, 1, 2; 8, 3; i, 21, 10; *Ant.* xiv, 13, 9). See **FORT**.

The so-called Golden Gate of Jerusalem, showing supposed Remains of the old Jewish Wall.

But the fortified places of Palestine served only in a few instances to check effectually the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Samaria for three years (2 Kings xviii, 10), Jerusalem (2 Kings xxv, 3) for four months, and in later times of Jotapata, Gamala, Machaerus, Masada, and, above all, Jerusalem itself, the strength of whose defences drew forth the admiration of the conqueror Titus (Josephus, *War.* iii, 6; iv, 1 and 9; vii, 6, 2-4 and 8; Robinson, i, 232). See **FORTRESS**.

The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals, of the same

Slab from ancient Thebes, representing a Phalanx of the Kheta (Cananites) drawn up as a *corps de r eserve*, with the fortified town (fig. 1), surrounded by double Ditches, over which are Bridges (figs. 2 and 3).

height as the walls, both crowned with a parapet, and a round-headed battlement in shape like a shield. A second lower wall with towers at the entrance was added, distant thirteen or twenty feet from the main wall, and sometimes another was made of seventy or one hundred feet in length, projecting at right angles from the main wall, to enable the defenders to annoy the assailants in flank. The ditch was sometimes fortified by a sort of tennail in the ditch itself, or a ravelin on its edge. In later times the practice of fortifying towns was laid aside, and the large temples, with their enclosures, were made to serve the purpose of forts (Wilkinson, *Anc. Egypt.* i, 408, 409, abridgm.).

Slab from Kouyunjik, representing a double-walled city, with arched gateway and inclined approaches leading to them from the outer walls. Within are warriors and horses; outside the fortifications is a narrow stream or canal, planted on both sides with trees, and flowing into a broad river, on which are large boats, holding several persons, and a raft of skins, bearing a man fishing, and two others seated before a pot or caldron. Along the banks, and apparently washed by the stream, is a wall with equidistant towers and battlements.

The fortifications of Nineveh, Babylon, Ecbatana, and of Tyre and Sidon are all mentioned either in the canonical books or the Apocrypha. In the sculptures of Nineveh representations are found of walled towns, of which one is thought to represent Tyre, and all illustrate the mode of fortification adopted both by the Assyrians and their enemies (Jer. li, 30-32, 58; Amos i, 10; Zech. ix, 3; Ezek. xxvii, 11; Nah. iii, 14; Tobit i, 17; xiv, 14, 15; Judith i, 1, 4; Layard, *Nin.* ii, 275, 279, 388, 395; *Nin.* and *Bab.* p. 231, 358; *Mon. of Nin.* pt. ii, pl. 39, 43).—Smith, s. v. See FORTIFICATION.

**Fencing the Tables**, a special address in the ministrations of the Lord's Supper among the Scotch Presbyterians. It is a lecture from the minister just before the distribution of the elements, pointing out the character of those who have and of those who have not a right to come to the Lord's table. It was formerly called "debarings," because in it the ministry debarred from the sacrament those who were not supposed to be worthy.

**Fénelon**, FRANÇOIS DE SALIGNAC DE LA MOTHE, the most venerated name in the modern history of the Roman Catholic Church, was born Aug. 6, 1651, at the castle of Fénelon, in Perigord. He was a younger son of the marquis of Fénelon. He was carefully trained at home up to twelve years of age, when he was sent to the University of Cahors, and afterwards to the College of Plessis at Paris. His mind was very early turned towards the Church; he preached his first sermon at fifteen. His theological studies were continued at the Seminary of St. Sulpice, then under the charge of the abbé Tronson, from whom he is believed to have imbibed the views of sanctity and of "disinterested love" which were so strongly brought out in his later life. He was ordained in 1675, and for three years was one of the priests of the parish of St. Sulpice. Before his ordination he was strongly inclined to a foreign mission in the Levant or in Canada, but was kept back, it is said, by his uncle. The *Correspondance Littéraire* (July 25, 1863) gives a letter (from the archives of the French Ministry of Marine) in Colbert's handwriting, date of 1675, to Frontenac, governor of Canada, in which Louis XIV says, "I have blamed the action of abbé Fénelon, and have ordered him not to return to Canada. But I ought to say to you that it was difficult to institute a criminal process against him, or to oblige the priests of the Seminary of St. Sulpice, at Montreal, to testify against him; and it was necessary to remit the case to his bishop or the grand vicar to punish him by ecclesiastical penalties, or to arrest him and send him back to France by the first ship." According to this, Fénelon was actually in Canada (*Am. Pres. Review*, July, 1863). About the year 1678 he was appointed superior of the "*Nouvelles Catholiques*," a society formed to educate and proselyte the children of Protestants. In this office he wrote his first work, *De l'éducation des filles*, which has been translated into English. He now became intimate with Bossuet, and under his guidance wrote *Réfutation du Système de Malebranche sur la nature et la grâce*; and also a treatise entitled *Du Ministère des Pasteurs*, in which heretics are attacked, though with moderation. Louis XIV, then about to revoke the edict of Nantes, employed Fénelon on a special mission to the Protestants of Poitou. He accepted the charge on the condition that no means of conversion were to be used but persuasion. In 1689 he was intrusted with the education of the young duke of Burgundy. For his royal pupil he wrote *Télémaque*. After five years' service, he was elevated to the archbishopric of Cambrai in 1694. He had previously become intimate with Madame Guyon (q. v.), and his relations with her, and the complications which grew out of them, embittered more or less his whole after life.

This interesting history deserves to be recounted somewhat in detail. For the special history of Quiet-

ism, see the article under that title. Suffice it here to say, that the particular form of it taught by Madame Guyon began to spread widely, and to alarm the leading clergy of the Church of France. Bossuet was soon vigorously enlisted against her. He conducted the controversy against Madame Guyon with his usual skill. He, together with the bishop of Chartres and abbé Tronson, were appointed commissioners to inquire into the doctrines advanced by Madame Guyon. The conferences between the parties lasted for six months. Bossuet was little conversant at this time with mystical theology, and at his request Fénelon provided him with extracts from the chief of the mystical writers. The commissioners assembled at Issy, a retired country house belonging to the congregation of St. Sulpice. They drew up thirty articles, in which certain alterations were made by Fénelon, by whom four were added. There was no mention in them of Madame Guyon or her doctrines, but they were supposed to express the doctrines of the established Church of France on the principal subjects in dispute. Their conclusion amounts to little more than this, that spiritualism, or an aim at the very highest devotional feeling and communion with God, is not necessary to all, and is liable to abuse. Madame Guyon immediately expressed her acquiescence in the articles of Issy. The whole question seemed now to be set at rest. Fénelon, having been nominated before these transactions to the archbishopric of Cambrai, was duly consecrated, Bossuet, bishop of Meaux, officiating, at his own earnest request. But Quietism continued to gain ground, and, to stop its progress, Bossuet published his *Instruction sur les états de l'oraison*, for which he sought the approbation of the new archbishop; but Fénelon refused on the ground that the book absolutely denied the possibility of a pure disinterested love of God, and that its censures of Madame Guyon were too severe. Thus began the bitter controversy between these two distinguished prelates, which for a long time disturbed the peace of the Church of France. Fénelon published his *Explication des maximes des saints sur la vie intérieure*, but not before it was carefully examined by the cardinal de Noailles and abbé Tronson, two of the committee at Issy, and by M. Piro, a theologian of eminence attached to Bossuet. These pronounced the *Maximes* to be a golden work. But no sooner was it published than an uproar was raised against it. In this controversy Louis XIV and Madame de Maintenon took part against Fénelon. Bossuet had the support of the court, and made vigorous use of all the weapons at his command. Fénelon defended himself with spirit. An appeal was made to Rome. Bossuet artfully brought his influence with Louis to bear upon the court of Rome, and insinuated that Fénelon was, in his own diocese, considered a heretic, and that, as soon as Rome should speak, Cambrai, and all the Low Countries, would rise against him. The pope (Innocent XII) proceeded cautiously, and delayed his decision. In the mean time the friends of Fénelon were persecuted by the court, and he himself was suspended from his office of preceptor to the royal dukes; but never, amidst all the indignities he suffered, did he lose the pious serenity of his mind. "Yet but a little while," he says in one of his letters, "and the deceitful dream of this life will be over. We shall meet in the kingdom of truth, where there is no error, no division, no scandal; we shall breathe the pure love of God; he will communicate to us his everlasting peace. In the mean while let us suffer; let us be trodden under foot; let us not refuse disgrace. Jesus Christ was disgraced for us; may our disgrace tend to his glory." At length the pope appointed a congregation of cardinals, who met twelve times without coming to any resolution; he then appointed a new congregation of cardinals, who met fifty-two times, and extracted from Fénelon's work several propositions, which they re-

ported to the pope as censurable. Meantime Louis XIV was urging the pope to condemn Fénelon, although the pope himself was unwilling to come to a final decision. It was difficult to censure Fénelon without censuring some writers of acknowledged orthodoxy. Holy, too, as Fénelon was, it was considered that to submit to a decision against him was an act of such heroic humility that it could scarcely be expected, and that a schism might be caused equal to that of the Reformation. The pope inclined to issue a brief, stating the doctrine of the Church, and calling upon each party to abstain from future discussions. But even a pope may stand in awe of worldly consequences. Louis XIV, urged on by Bossuet, insisted upon the condemnation of Fénelon, and the pope at last (March 12, 1699) issued a brief, by which twenty-three propositions were extracted from Fénelon's work and condemned, "though the expressions used in the condemnation of them were so gentle, that it is evident that if the pope had feared God as much as he feared the French king, Fénelon would have escaped all censure. By this course, the friends of Fénelon were soothed and his adversaries mortified; and their mortification was increased by an expression of the pope, which was soon in every one's mouth, that Fénelon was in fault for too great love of God; his enemies equally in fault for too little love of their neighbor" (Bausset, *Hist. de Fénelon*, ii, 220).

The controversy had been going on in France during the time occupied by the investigation at Rome. Bossuet published a succession of pamphlets. Several of the bishops who had espoused the side of Bossuet issued pastorals in the same sense. Fénelon defended himself vigorously against them all in several publications, explanatory as well of his principles as of the personal imputations in which some of his adversaries did not scruple to indulge. The last blow against the ancient friendship of the great rivals was struck by Bossuet in his celebrated *Relation sur le Quietisme*. Fénelon was wounded to the heart. The copy of Bossuet's pamphlet which first came into his hands is still preserved in the British Museum, and the margin is literally filled with remarks, annotations, replies, denials, and rejoinders, in the singularly delicate and beautiful handwriting of the indignant archbishop. The copy now in the British Museum is most probably one which, as we learn from his correspondence, he sent to his agent at Rome, and on the margin of which he corrected, for the guidance of his friend, the many false and exaggerated charges of his great antagonist. The substance of these replies he gave to the public in a most masterly defence, written, printed, and published within little more than a fortnight from the appearance of Bossuet's *Relation*" (Chambers, *Encyclopædia*, s. v.).

When the papal brief arrived, Fénelon submitted at once, and ordered all copies of the book that were in circulation to be brought that he might burn them with his own hand. He read the brief from his own pulpit, and addressed a pastoral to the people of his diocese, in which he said, "Our holy father has condemned my book, entitled *Maxims of Saints*, and has condemned in a particular manner twenty-three propositions extracted from it. We adhere to his brief, and condemn the book and the propositions simply, absolutely, and without a shadow of reserve." He even presented to the cathedral a piece of gold plate, on which is a picture engraved representing the angel of truth trampling on several erroneous books, among which is his *Maximes*. This submission appears to us Protestants to have been at once weak and ostentatious, but in the Roman Catholic Church it is one of Fénelon's highest titles to glory. Bossuet's conduct is variously represented: according to one account he was really touched by the conduct of Fénelon, and desired to be completely reconciled to him; according to others, he retained at heart his bitter feeling, and kept

up the same spirit in the mind of the king. About this time Fénelon sent a complete and corrected copy of *Télémaque* to the duke of Burgundy. The copyist, it seems, made a duplicate, and printed it at Paris, without the knowledge of Fénelon. The book was immediately suppressed by order of the king, but was printed again in Holland in 1699, spread throughout Europe, and was translated into almost every tongue. By the courtiers of Louis XIV *Télémaque* was regarded as a satire upon that monarch and his satellites, Sesostris being supposed to represent the king; Calypso, Madame de Montespan; Protesilaus, Louvois; and Eucharis, Mademoiselle de Fontanges. This scandal shut Fénelon out of the court of Louis XIV for the rest of his life. He was ordered to remain within his diocese, and was forbidden all intercourse with his pupil, the duke of Burgundy. But the displeasure of the court did not diminish the reputation of Fénelon either in France or in Europe generally. He devoted the remainder of his life to diligent care of his diocese, and to literary labors. He founded a seminary at Cambrai, to which he gave his personal attention. During the War of the Succession his diocese was often the scene of military operations, and he did his best to assuage the horrors of war. He brought together into his palace the wretched inhabitants of the country whom the war had driven from their homes, and took care of them, and fed them at his own table. Seeing one day that one of these peasants ate nothing, he asked him the reason of his abstinence. "Alas! my lord," said the poor man, "in making my escape from my cottage I had not time to bring off my cow, which was the support of my family. The enemy will drive her away, and I shall never find another so good." Fénelon, availing himself of his privilege of safe-conduct, immediately set out, accompanied by a single servant, and drove the cow back himself to the peasant. "This," said cardinal Maury, "is perhaps the finest act of Fénelon's life." He adds, "Alas! for the man who reads it without being affected." Another anecdote, showing his tenderness to the poor, is thus related of him. A literary man, whose library was destroyed by fire, has been deservedly admired for saying, "I should have profited but little by my books if they had not taught me how to bear the loss of them." The remark of Fénelon, who lost his in a similar way, is still more simple and touching: "I would much rather they were burned than the cottage of a poor peasant." In 1709, the duke of Marlborough, by express commands, exempted his lands from pillage, while that general himself and his allies showed the aged prelate every mark of courtesy.

In the Jansenist disputes Fénelon wrote against Jansenius, and expressed himself very strongly, though at first charitably, against Quesnel and Pascal. See JANSENISM; PORT ROYAL. He wrote a *Mémoire* demanding a judgment from the pope to settle the controversy by a dogmatic decision, to which all must submit. This *Mémoire* was laid before the pope (Clement XI), and his bull *Inœnam Dœmni* shows evident traces of its influence. He also wrote a treatise, *De Summi Pontificis Auctoritate* (in his *Œuvres*, Versailles, 1820, tom. ii), in which he yielded more to the papal claims than became him as a Gallican bishop. Denying the direct temporal power of the pope, he admits a *potestas directoria*, equivalent to what is called the indirect temporal power. See POPE, TEMPORAL POWER OF.

In his personal habits Fénelon was temperate almost to abstemiousness, took no repose except a few hours daily in the exercises of walking or riding, while the rest of his time was devoted to social intercourse with his friends, to visiting the poor, and other pastoral functions. The most of his revenues were devoted to benevolent uses. He died at Cambrai Jan. 7, 1715.

We cite a passage from Dr. Channing on the character and writings of Fénelon: "His works have the

great charm of coming fresh from the soul. He wrote from experience, and hence, though he often speaks a language which must seem almost a foreign one to men of the world, yet he always speaks in a tone of reality. That he has excesses we mean not to deny, but they are of a kind which we regard with more than indulgence, almost with admiration. Common fanaticism we cannot away with, for it is essentially vulgar, the working of animal passions, sometimes of sexual love, and oftener of earthly ambition. But when a pure mind errs by aspiring after disinterestedness and purity not granted to our present infant state, we almost reverence its errors; and still more, we recognise in them an essential truth. They only anticipate and claim too speedily the good for which man was made. They are the misapprehensions of the inspired prophet, who hopes to see in his own day what he was appointed to promise to remoter ages. Fénelon saw far into the human heart, and especially into the lurkings of self-love. He looked with a piercing eye through the disguises of sin. But he knew sin, not, as most men do, by bitter experience of its power, so much as by his knowledge and experience of virtue. Deformity was revealed to him by his refined perceptions and intense love of moral beauty. The light, which he carried with him into the dark corners of the human heart, and by which he laid open its most hidden guilt, was that of celestial goodness. Hence, though the severest of censors, he is the most pitying. Not a tone of asperity escapes him. He looks on human error with an angel's tenderness, with tears which an angel might shed, and thus reconciles and binds us to our race at the very moment of revealing its corruptions" (*Christian Examiner*, vi, 7).

*Literature.*—The writings of Fénelon are too numerous to be mentioned in detail. They are classified as follows in the Versailles edition of his works (1820, 22 vols. 8vo): *Metaphysical and Theological Writings*, vols. i-iii; *The Quietistic Controversy, and Discussions thereon with Bossuet*, vols. iv-ix; writings on *Jansenism*, vols. x-xvi; *Education of Girls, Sermons, Religious Meditations*, vols. xvii, xviii; *Fables, Dialogues, smaller writings*, vol. xix; *Télémaque*, vol. xx; *Diálogos on Eloquence, Correspondence, Lives of Ancient Philosophers*, vols. xxi, xxii. There are many collective editions of the writings of Fénelon, of which the most complete is that of Lebel, commenced at Versailles 1820-24, in 22 vols. 8vo., with 11 vols. additional of *Correspondance* (Paris, 1827-29), and 1 vol. of *Tables et Index* (Paris, 1830), making 34 vols. in all. The next best (in some respects the best) is that of the abbé Gosselin (Paris and Besançon, 1851-52, 10 vols. imp. 8vo), with a copious literary history of Fénelon. Of editions of his *select* works, the best are that of Périsset (Paris, 1842, 4 vols. large 8vo); that of Dufour, the first volume of which is a *Vie de Fénelon* (Paris, 1826, 12 vols. 8vo); and that of Lefevre, with *Vie* by Aimé Martin (Paris, 1835; and by Didot, 1838, 3 vols. large 8vo). Of his separate writings the editions are too numerous to be mentioned here. Many of his writings have been translated into English; among them are, *On the Education of Daughters* (Lond. 1703; Albany, 1806); *Dialogues on Eloquence* (Lond. 1808; Boston, 1832); *Demonstration of the Existence of God* (Lond. 1749, 12mo); *Spiritual Works*, translated by Houghton, with *Life* (Dublin, 1771, 2 vols. 8vo); *Télémaque* (many editions; best by Hawkesworth, Lond. 2 vols. 12mo, 1808); *Lives of the Anc. Philosophers*, with *Life of Fénelon*, by Cormach (N. Y. 1841, 12mo); *Selections from the Writings of Fénelon, with a Memoir of his Life* by Mrs. Follen (Boston, 1829; new ed. 1859, 12mo). Of *Lives* of Fénelon, besides those already cited in connection with editions of his works, we name Ramsay, *Vie de Fénelon* (Paris, 1725, 12mo); Querbeuf, *Vie de F.* (Paris, 1787); Bausset, *Hist. de Fénelon* (Par. 1817, 31 ed., 4 vols. 8vo); Mudford, *Life of F.* (transl. from Bausset, Lond. 1810, 2 vols. 8vo); Butler, *Life of Fénelon*

(abridged from Bausset, Lond. 1810, 8vo); Tabaranl, *Suppl. aux histoires de Bossuet et de Fénelon* (Paris, 1822, 8vo). See also Mackintosh, *Ethical Philosophy* (Philadelphia, 1832, 8vo), p. 96 sq.; *Quarterly Review* (Lond.), x, 409; *Princeton Review*, April, 1853, art. i; Hoefler, *Nouv. Biog. Générale*, xvii, 319 sq.; Hook, *Eccles. Biog.* v, 78 sq.; Matter, *Le Mysticisme en France au Temps de Fénelon* (Par. 1864); Sainte Beuve, *Nouv. Luidis* (Par. 1864), ii, 113 sq.; *Revue Chrétienne*, 1863, 513 sq.; *Methodist Quarterly Review*, Jan. 1866; *Zeitschrift f. d. hist. Theologie*, 1869, 239.

**Fenestella**, the niche at the side of an altar, containing the piscina (q. v.) or water-drain, into which was poured the water in which the priest washed his hands, and that with which the chalice was rinsed at the celebration of the mass. There is frequently a shelf above the water-drain, on which could be placed certain vessels which were required at the altar. A second niche, at the side of the fenestella, sometimes held the credence-table. In England the fenestella is almost universally at the south side of the altar. (G. F. C.)

**Fenner**, WILLIAM, B.D., an English Puritan, was born in 1600, and was educated at Pembroke Hall, Cambridge. He was appointed rector of Rochford, Essex, in 1629, and died about 1640. He was a very popular preacher, and his works, which have become very scarce, are written in a plain, earnest, and impressive style. The principal are, *A Treatise of the Affections; or the Soul's Pulse* (Lond. 1641, 8vo);—*The Sacrifice of the Faithful; or the Nature, Property, and Efficacy of zealous Prayer* (Lond. 1648, sm. 8vo);—*The spiritual Man's Directory, guiding to true Blessedness in his three main Duties* (Lond. 1649, sm. 8vo), collected, with other writings, in his *Works* (Lond. 1658, 1 vol. in 2, fol.).—Darling, *Cyclopædia Bibliographica*, s. v.

**Fereter** usually indicates the portable shrine in which the relics of saints are carried about in procession; it is also applied to the fixed shrines or tombs in which the bodies or relics of saints are deposited. (G. F. C.)

**Feretry**, the inclosure or chapel of a church in which the fereter is placed. (G. F. C.)

**Ferguson**, Adam, a Scotch philosopher, was born in 1724 at Logierait, Perthshire. He studied at St. Andrew's and at Edinburgh with a view to the Christian ministry. On being ordained, he was appointed chaplain to the 42d regiment, in which he remained till 1757, when he retired, and was appointed keeper of the advocates' library of Edinburgh. In 1759 he was made professor of natural philosophy in the college of that city, and in 1764 he was appointed to the chair of moral philosophy, a branch of science to which he had more particularly applied himself. In 1767 he published *Essay on the History of Civil Society*; in 1776, *Remarks on a Pamphlet of Dr. Price, entitled Observations on the Nature of Civil Liberty*. "In 1778 he was appointed secretary to the commissioners who were sent to America in order to try to effect a reconciliation with the mother country, an office in which Ferguson took a clearer view of the state of the question, and of the temper of the American people, than was common at that time with Englishmen. On his return in 1779 he resumed the duties of his professorship, and in 1783 he published *History of the Progress and the Termination of the Roman Republic* (3 vols. 4to)." In 1784 he resigned his professorship. "In 1792 he published *Principles of Moral and Political Science*, being chiefly a retrospect of lectures on ethics and politics, delivered in the College of Edinburgh (2 vols. 4to). Another work of Dr. Ferguson on the same subject, though a more elementary one, the *Institutes of Moral Philosophy*, which he first published in 1769, has been translated into the French and German languages, and often reprinted." He died at St. An-

drew's, February 22, 1816.—Chambers, *Encyclopædia*, s. v.

**Ferguson, James**, minister of Kilwinning, Scotland, a preacher and commentator of some eminence. Little is known of his life; he died about 1670. He published *Brief Exposition of Philipians and Colossians* (1656);—*Brief Exposition of Galatians and Ephesians* (1659); and after his death appeared his *Brief Exposition of 1 and 2 Thessalonians* (1674). Orme (*Biblioth. Biblica*) says that these "expositions are uncommonly sensible." They have been republished in one volume (London, 1841, large 8vo).

**Ferguson, Samuel D.**, a Methodist Episcopal minister, was born in the city of New York in 1798, but removed with his parents at an early age to Delaware County, where he was converted at fourteen. He entered the New York Conference in 1819, and died in New York, December 30, 1855. He was a highly influential and useful minister, and an able presiding elder. He was three times a delegate to the General Conference, in 1832, 1836, and 1844. He served some time as agent for the Troy Conference Seminary, and spent four years with eminent success as superintendent of the Leake and Watts Orphan House, New York.—*Minutes of Conferences*, vi, 64.

**Ferloni, Severus Antonius**, a Roman ecclesiastic, born in the States of the Church in 1740. He employed himself for thirty years on a *History of the Variations in the Discipline of the Church*, which was to form 30 vols., and was on the point of completion when the French army entered Rome in 1798. His papers were destroyed and his labor lost. Ferloni was soon after engaged on the side of Napoleon, wrote homilies in his favor, and was made theologian to the privy council of the viceroy at Milan. Among other things he wrote a treatise *De Auctoritate Ecclesie*, maintaining French views, but the censors would not allow it to appear. He died at Milan, 1813.—Migne, *Biographie Chrét.* s. v.

**Ferne** (or *Fairholme*), **Charles**, a Scotch divine, was born in Edinburgh, and was educated at the university there, where he became M.A. in 1587. In 1593 he was made one of the regents of the university. He afterwards became minister at Fraserburgh, and (1600) principal of the college there; he died at Fraserburgh in 1617. He wrote a *Logical Analysis of the Epistle of Paul to the Romans*, which was published under the care of Dr. Adamson in 1671, and has been republished by the Wodrow Society (Edinburgh, 1850, 8vo). In the preface to this edition, Dr. W. L. Alexander gives the work high praise, even saying, "So sagacious, exact, and perspicuous a commentary on the Romans I had not before had the good fortune to peruse."

**Ferment.** See LEAVEN; WINE.

**Fermentarians** (*Fermentarii*), a name given to the Greek Church by the Latins, because the former use *leavened bread* in the Eucharist; the Greeks calling the Latins *Azymites* (q. v.). The word *fermentum* was used, even in the Latin Church, at an early period, to designate the Eucharist, showing that then fermented bread was used.—Bingham, *Orig. Eccles.* bk. xv, ch. ii, § 5.

**Fernand** (**Phernandus**, **Ferdinand**, or **Ferrand**), a Belgian monk and reformer, was born at Bruges in 1450. He either lost his sight in childhood or was born blind, which, however, did not prevent him from studying philosophy, theology, rhetoric, poetry, and music. He pursued these studies in Paris, and was appointed by Charles VIII to the chair of belles-lettres in the University of Paris. It is possible that he may also have occupied the chair of theology. In 1490 he entered the order of the Benedictines, and soon after, by special dispensation from the pope, he was allowed, in spite of his blindness, to take deacon's orders, and began to preach. He died in 1496. His blindness did not prevent him from writing many

books, among which are *Epistolæ Caroli Phernandi, Brugensis* (Paris, no date, 4to);—*De Animi Tranquillitate libri duo* (Paris, 1512);—*Speculum monasticæ discipline Patris Benedicti Magni*, etc. (Par. 1515, fol.);—*Elegiæ de Contemptu Mundi*; *Odarum in laudem Christi Libri* (Paris, 1815).—Hoefler, *Novæ Biog. Génér.* rate, xvii, 455.

**Ferne, Henry, D.D.**, bishop of Chester, was born at York in 1602, and was educated at St. Mary's Hall, Oxford, and at Trinity College, Cambridge, of which he became a fellow. He was made chaplain to the bishop of Durham, and was successively presented to the livings of Masham, of Medburn, and to the archdeaconry of Leicester. He took his doctor's degree in 1642, and espoused the cause of Charles I, who made him his chaplain. On the Restoration Charles II gave him the mastership of Trinity College, and he was twice chosen vice-chancellor. He was made bishop of Chester in 1660, died in 1661, and was buried in Westminster Abbey. He published four tracts against the rebellion, 1642-43; two sermons, 1644-49; and five treatises in defense of the Church of England against Romanism and Presbyterianism, 1647-60. He is said to have aided Walton in the Polyglot Bible.—Hook, *Eccles. Biography*, v, 89.

**Ferrand, Louis**, a French Orientalist. He was born at Toulon October 3, 1645, and was educated in his native city and at Lyons, where he studied Hebrew and other Oriental languages. At twenty he went to Paris, and soon after to Mayence, to undertake a translation of the Hebrew Bible. This project not succeeding, he returned to France, studied law, and was received as advocate in the Parliament of Paris. He, however, occupied himself much less with his new profession than with controversial writings, and works on the history of the East. He died Mar. 11, 1699. His works are, *Conspectus seu Synopsis libri hebraici qui inscribitur: Annales Regum Franciæ et regum domus Othomanicæ* (Paris, 1670, 8vo);—*Réflexions sur la Religion Chrétienne, contenant les prophéties de Jacob et de David sur la venue du Messie*, etc. (Paris, 1679, 2 vols. 12mo);—*Liber Psalmorum, cum argumentis, paraphrasi et annotationibus* (Paris, 1683, 4to);—*Traité de l'Église, contre les hérétiques et principalement contre les calvinistes* (Paris, 1685, 12mo);—*Réponse à l'Apologie pour la Réformation, pour les réformateurs et pour les réformés* (Paris, 1685, 12mo);—*Psaumes de David en latin et en français selon la Vulgate* (Paris, 1686, 12mo);—*Lettre à M<sup>r</sup>. l'évêque de Beauvais sur le Monachisme de saint Augustin* (Journal des Savants);—*Discours où l'on fait voir que saint Augustin a été moine* (Paris, 1689, 12mo);—*Summa Biblica seu dissertationes prolegomenicæ de Sacra Scriptura* (Paris, 1689, 12mo).—Hoefler, *Novæ Biog. Générale*, xvii, 488.

**Ferrandus Fulgentius.** See FULGENTIUS FERRANDUS.

**Ferrar, Nicholas**, a clergyman of the Church of England, eminent for piety, was born in London in 1592, and was carefully trained at home both in religion and letters. At fourteen he entered the University of Cambridge, and was eminently distinguished there by his abilities and learning, so that his tutor used to say of him, "May God keep him in a right mind! for if he should turn schismatic or heretic, he would make work for all the world." In 1612 he went abroad, studied at Leipsic and Padua, and, after visiting Rome, returned to England in 1618, and soon after became actively engaged in the affairs of a great company for colonizing Virginia, in America, of which he was chosen deputy governor. In 1624 he was elected to Parliament, where he was highly distinguished for eloquence and ability, but soon decided to quit public life and devote himself to a religious life. In the Church of Rome he would have been a monk, and he came as near to it as possible for a Protestant. He purchased in 1612 the manor of Little Gidding, in

Huntingdonshire, and organized in the mansion a religious community of some forty persons, male and female, including his mother. In 1626 he was ordained deacon by Laud (then bishop of St. David's). He now "signed a vow, that since God had heard his most humble petitions, and delivered him out of many dangers, and in many desperate calamities had extended his mercy to him, he would therefore now give himself up continually to serve God to the utmost of his power in the office of a deacon, into which office he had that morning been regularly ordained; that he had long ago seen enough of the manners and of the vanities of the world, and that he did hold them all in so low esteem that he was resolved to spend the remainder of his life in mortifications, in devotion and charity, and in a constant preparation for death." Benefices of great value were offered him, but he refused, saying that his fixed determination was to rise no higher in the Church than the place and office which he now possessed, and which he had undertaken only with the view to be legally authorized to give spiritual assistance, according to his abilities, to his family and others with whom he might be concerned; and that, as to temporal affairs, he had now parted with all his worldly estate, and divided it among his family. Ferrar allotted one room in his house as an oratory for the devotions of the whole family, besides two separate oratories for the men and women at night. His own lodgings were so contrived that he could conveniently see that everything was conducted with decency and order. He established a school close to the house, and provided masters for the free instruction of the children. He was diligent in catechizing the children of the neighborhood; and every Sunday, after service, these children, more than one hundred in number, were hospitably entertained. After evening service, all went into the oratory, when select portions of the Psalms were repeated. After this they were at liberty till eight o'clock, when the bell again summoned them to the oratory, where they sang a hymn to the organ and went to prayers, and then all retired. On the first Sunday in every month they received the communion. On week-days they rose at four, at five went to prayers, at six said the Psalms of the hour; then they sang a hymn, repeated some passages of Scripture, and at half past six went to church. "At seven they said the Psalms of the hour, sang a hymn, and went to breakfast. At ten they went to church to litany; at eleven to dinner, during which Scripture and pious books were read aloud. They went to evening prayers in the church at four, after which came supper and recreations till eight, at which time they prayed in their oratory. During the night there was a continual vigil or watching, in which several of the men and women, in their respective oratories, repeated the whole Psalter, together with prayers for the life of the king and his sons, from nine at night till one in the morning. The time of this watch being ended, they awoke Nicholas Ferrar, who constantly rose at one o'clock, and betook himself to religious meditation, according to these words, 'At midnight will I rise and give thanks.' Ferrar himself lay upon a skin stretched on the floor, arrayed in a loose frieze gown, and he watched in the oratory or the church three nights in the week. King Charles I held Nicholas Ferrar in great reverence, and came more than once to visit this religious society; and, having perused the Harmony of the Gospels which they had compiled, he was so much pleased with it that he requested them to prepare a copy for his own peculiar use." He died in 1637. Ferrar translated and published (though without his own name) the *CX Considerations* of Valdes (1638). — Hook, *Eccles. Biography*, v, 108; Peckard, *Life of Ferrar*, in Wordsworth, *Eccles. Biography*, iv, 111; Palmer, *Church History*, 184 sq. See VALDES, JUAN.

**Ferrar, Robert**, bishop of St. David's, a martyr

of the reign of queen Mary, was born at Halifax, Yorkshire, and was educated at Oxford, where he became B.D. and a regular canon of the order of St. Augustine. The duke of Somerset, lord protector in the reign of Edward VI, was his patron, and employed him in carrying on the Reformation. He was one of the committee nominated to compile the English liturgy. The zeal of Ferrar, who was consecrated bishop in 1547 (under Edward VI), soon procured him many enemies among the Papists, and after the fall of his eminent patron he was, under a false charge, committed to prison some time before the death of the king. On the accession of Mary he was tried on the new charge of *heresy* as a Protestant, degraded from his ecclesiastical functions, and, in company with Hooper, Bradford, Rogers, Saunders, and others, delivered over to the secular power for punishment. A little before this good bishop suffered, a young gentleman who visited him lamented the severity of the kind of death he was about to undergo. Ferrar replied, "If you see me once to stir while I suffer the pains of burning, then give no credit to those doctrines for which I die." By the grace of God he was enabled to make good this assertion, for he never moved until he was struck down in the flames by a blow on his head. He was burned at Caermarthen, in Wales, March 30, 1555.—Middleton, *Evangelical Biography*, i, 346; Burnet, *Hist. of Reformation* (4 vols.), ii, 347 sq.; Fox, *Book of Martyrs*; Hook, *Eccles. Biography*, v, 96.

**Ferrara, Council of** (*Concilium Ferrariense*), falsely styled œcumenical. Eugene VI having published a bull Sept. 18, 1437, for the transfer of the Council of Basle (q. v.) to Ferrara, a few bishops and abbots assembled Jan. 8, 1438, viz. cardinal Julian, who presided, five archbishops, eighteen bishops, ten abbots, and some generals of the monastic orders; of these bishops only four had left the Council of Basle, which continued its sitting, justly regarding the pope's bull as illegal, and passing sentence of suspension on him Jan. 24, 1438. Charles VII, indeed, forbade any of his subjects to attend at Ferrara. On Jan. 10 the first sitting was held, in which the translation of the council from Basle was pronounced to be canonical, and therefore the œcumenical Council of Ferrara lawfully assembled. Pope Eugene presided in the second session, March 15, at the head of seventy-two bishops, and promulgated a decree against the fathers at Basle. The Greek emperor, John Manuel Paleologus, and the patriarch of Constantinople, Joseph II, arrived Feb. 9 at Venice, and were received with great pomp, together with Mark, archbishop of Ephesus; twenty-one other prelates (among whom was Isidore, a Russian bishop, and Bessarion of Nicaea), and other ecclesiastics, amounting in all to seven hundred persons. Before holding the first session with the Greeks, a scheme was drawn up of the different questions to be debated: 1. The procession of the Holy Spirit; 2. the addition "*filioque*" to the creed; 3. purgatory, and the intermediate state; 4. the use of unleavened bread in the holy Eucharist; 5. the authority of the Roman see and the primacy of the pope. These questions were debated in thirteen sessions, up to the sixteenth, Jan. 10, 1439, when it was proposed to transfer the council from Ferrara to Florence, and, this being agreed to, publication was made of the change.—Labbe, *Concil.* xiii, 1-222, 825-1061; Landon, *Manual of Councils*, p. 242; Mosheim, *Ch. Hist.* cent. xv, pt. ii, ch. ii, § 13; Mansi, t. xxix, xxxi; Ffoulkes, *Christendom's Divisions*, Lond. 1867, pt. ii, ch. vii. See FLORENCE, COUNCIL OF.

**Ferrara (RENATA), Duchesse de**, celebrated for her virtues and for her attachment to the Reformation, the daughter of Louis XII and Anne of Bretagne, was born at Blois Oct. 25, 1510. In 1527 she was married to Hercule d'Este, duke of Ferrara and Modena. She is said to have been very learned, excelling in mathe-

matics, especially in astronomy. Her husband died in 1559, and the next year she left Italy on account of her religion, and returned to France, where she was permitted to profess the Protestant faith. She resided at Montargis, and there gave protection to as many as were persecuted till she was forced to desist. During the civil war in France she fed and maintained in her castle a great number of Protestants who had fled to her for refuge. She interceded strongly for the prince of Condé when he was imprisoned at Orleans in the time of the young king Francis, but was afterwards displeased with him, because neither she nor her ministers approved of the Protestants taking up arms. She died at Montargis June 12, 1575, in full profession of the Reformed faith, though the Jesuit Le Laboureux seeks to show that she abjured her religion.—Bayle, *Dictionary*, ed. Des Maizeaux (Lond. 1736), iii, 30.

**Ferrari, FRANCESCO BERNARDINO**, an Italian archæologist, was born at Milan in 1576. Entering the Congregation of St. Ambrose, he studied philosophy and divinity, as well as the Latin and Greek languages, and was admitted doctor. Borromeo, archbishop of Milan, appointed him to travel into various parts of Europe to purchase the best books and MSS. to form a library at Milan. Ferrari passed over part of Italy and Spain, and collected a great number of books, which laid the foundation of the famous Ambrosian Library. About 1638 he was appointed director of the College of the Nobles, lately erected at Padua, which office he discharged two years, and then, on account of indisposition, returned to Milan. He died at Milan Feb. 3, 1663. Among his writings are, *De Antiquo Eccles. Epistolarum Genere libri tres* (Milan, 1613);—*De Ritu Sacrarum Ecclesie Catholice concionum libri tres* (Milan, 1620; Utrecht, 1692, cum præfatione Joannis Georgii Grævii);—*De Veterum acclamationibus et plursu libri septem* (Milan, 1627; also in vol. vi of Grævius's *Thesaur. Antiq. Rom.*). His writings are full of learning; he is very judicious in his conjectures, and exact in his quotations.—Du Pin, *Bibl. des Auteurs Ecclés.* xvii, 109 (Amst. 1711).

**Ferraris, LUCIUS**, an Italian divine, author of a large encyclopedic work, entitled *Promta bibliotheca canonica, juridica, moralis, theologica, necnon ascetica, polemica, rubricata, historica* (edit. noviss. Venetæ, 1782, 10 vols. 4to). A new edition, revised and enlarged, was published by Migne (Paris, 1866, 8 vols. royal 8vo).

**Ferrer, Bonifácio**, brother of St. Vincent Ferrer, and prior of the Carthusian monastery of Portaceli, in Valencia. He translated the whole Scriptures into the Valencian or Catalanian dialect. This translation, which was printed at Valencia in 1478, although it was the work of a Roman Catholic author, and had undergone the examination and correction of the inquisitor James Borrell, had scarcely made its appearance when it was suppressed by the Inquisition, and consigned to the flames. He died in the year 1417.—McCrie, *Reformation in Spain*, ch. v.

**Ferrer, Rafaél**, a Spanish missionary, was born at Valencia. Having entered the order of the Jesuits, he devoted himself to the preaching of the Gospel in the deserts bordering on the Amazon River. It was, in particular, the ferocious and numerous nation of the Cofanes, which had never yet seen a missionary, and which, divided into twenty tribes, occupied a territory about sixty miles from Quito, to which he devoted his labors. The Cofanes had never been subjected to Spanish rule, and had recently destroyed the town of Ecija and a number of villages. In 1603, after fourteen months of labor, Ferrer succeeded in organizing the mission of *San Paulo y San Pedro de los Cofanes*. In 1604 two other villages swelled the number of the converted population to 6500. In 1605 Ferrer followed the course of the Aguatico, penetrated into the

Napo, and altogether, in the course of two years and a half, travelled more than 1000 miles, and acquired a better acquaintance with the savage nations in the vicinity of the Amazon than any man of that time. In 1608 he returned to the Cofanes. He then prepared a Grammar of the language of the Cofanes, and translated for them the Catechism. He next undertook a journey to Quito, to induce the authorities to establish new missions. His petition having been granted, he again returned to the Cofanes, when his earnest sermons against polygamy cost him his life in 1611, one of the chiefs whom he had compelled to give up his concubines precipitating him from a steep rock.—Hoefer, *Nouv. Biog. Génér.* xvii, 535. (A. J. S.)

**Ferrer or Ferrier, Vincentius** (St.), a Dominican monk, was born in Valencia Jan. 23, 1357. He entered the order in 1374, and in 1380 he went to the University of Barcelona, where he spent two years. In 1384 he was made doctor at Lerida. In 1395 he was called to Avignon by pope Benedict XIII as master of the palace, and here he conceived the idea of devoting his life to the healing of the schism in the papacy which then threatened the destruction of the Roman Church. He carried out this idea by declaring for Martin V, and by striving for a reunion in many writings, and by vast labors and travels in Spain, France, Italy, and the British Islands. He died at Vannes, in Brittany, April 5, 1419, and was canonized by pope Calixtus in 1455. His writings are said to be poor in thought and language.—Mosheim, *Ch. Hist.* cent. xv, pt. ii, ch. ii, n. 75; Butler, *Lives of the Saints*, April 5.

**Ferret**, evidently a conjectural rendering for *anakh' (אֲנַחַךְ, a sighing; Sept. μυγάλη, Vulg. mygale)*, one of the unclean creeping things mentioned in Lev. xi, 30. The Rabbinical writers seem to have identified this animal with the hedgehog (see Lewysohn, *Zool. des Talmuds*, § 129, 134). The Sept. and Vulg. refer to an animal which, according to Aristotle (*Hist. Anim.* viii, 24), is the *Mus araneus*, or shrew-mouse; but the associated names render it more probable that the animal referred to in Leviticus was a reptile of the lizard tribe (so Bochart and Gesenius), deriving its name from the mournful cry, or wail, which some lizards utter, especially those of the Gecko family. The *Lacerta gecko* (otherwise called "fan-foot" lizard; *Gecko ululatus*, the *Ptyodactylus* of Hasselquist) is perhaps the animal intended. "The geckos are small

The Gecko.

lizards, usually somewhat clumsy in form, stealthy and cat-like in their actions, secreting themselves in holes and crevices by day, and at night coming forth to prey upon nocturnal insects. The form of the eye indicates their season of activity, for the pupil, which is capable of great expansion and contraction, closes to a vertical line. The animals crawl with ease and confidence on perpendicular walls, and even on the under sides of ceilings, beams, and the like, provided these have a somewhat roughened surface. This curious power, the rapidity with which they disappear in some crevice when alarmed, and their sombre and lu-

rid hues, their association with night, their loud and harsh croak, their slow and stealthy pace, and especially a certain sinister expression of countenance, produced by the large globular eye, unprotected by an eyelid and divided by its linear pupil, have combined to give to these reptiles in all countries a popular reputation for malignity and venom, and they are generally much dreaded. This reputation, however, appears to be wholly groundless; and the story told by Hasselquist of a man who would lay hold of the reptile, and whose hand instantly became covered with red pustules, inflamed and itching, must be received with suspicion. Still more incredible is another account by the same naturalist, to the effect that he saw at Cairo two women and a girl at the point of death from having eaten some cheese over which a gecko had crawled! The most interesting point in the economy of these curious lizards is the structure of their feet, by which they are enabled to defy the laws of gravity. The feet are nearly equal, short, stout, and terminated by five toes, differing little in length, which radiate as if from a centre, so as to form two thirds of a circle. The under surface of the toes is, in most of the genera, much widened, and furnished with small plates or laminae, overlapping each other in a regular manner, which varies in different genera and species. The toes are frequently united by a membrane at their base. The claws are pointed, hooked, and kept constantly sharp, by an apparatus by which they are capable of retraction, like those of the cat. It is by means of the singular lamellated structure of the under surface of the toes that these reptiles, or at least many of them, are enabled to cling to vertical or even inverted surfaces, as house-flies do. The mode in which this is effected we do not thoroughly understand; but we may conjecture that it is by the raising of these imbricated plates by muscular action, so as to form a vacuum beneath the sole, when the pressure of the external air causes the toe to adhere firmly to the surface. The similarity of the structure to that of the coronal sucker in the remora suggests this explanation. A familiar illustration of the principle is seen in the leathern suckers which children make, which adhere so firmly that large stones are lifted by them" (Fairbairn, s. v.). See LIZARD.

Under Surface of the Feet of the Gecko.

**Ferrier, JEREMY**, a French Protestant minister, was born about 1560, became professor of theology at Nîmes, and is remarkable for having become a Papist, even after having maintained in a public disputation in 1602 that "pope Clement the VIIIth was properly the Antichrist." The Parliament of Toulouse having ordered his arrest, it became necessary for Henry IV to intervene to save him from the results of his temerity. In gratitude for this, Ferrier favored the restrictive measures adopted by the court against the Protestants. For this he was suspected by his Protestant friends, and was forbidden to preach by the Synod of Privas in 1612. He did not, however, change his religion till a popular tumult arose against him, in which his house was plundered, and himself so near being murdered, that, for the sake of escaping, he was obliged to lie three days concealed in a tomb. He then became a Roman Catholic, and removed to Paris, where he was subsequently made counsellor of state by Louis

XIII. He died Sept. 26, 1626. He wrote a treatise, *De l'Antichrist et de ses marques, contre les ennemis de l'Eglise catholique* (Paris, 1615).—Hoefler, *Nouv. Biog. Générale*, xvii, 550; Bayle, *Dictionary* (London, 1736), iii, 39.

**Ferry, Paul**, a French Protestant divine, was born at Metz Feb. 24, 1591, and was educated at the Seminary of Montauban. He became pastor at Metz in 1612, and held that position during sixty years. He was one of the most eloquent men in the province, and by his powers of mind, his activity, and his prudence, he gained the esteem of the most influential men of his time, and early obtained great influence over Roman Catholics as well as Protestants. Being troubled by the divisions which existed among the Protestants, and hoping to do something towards removing them, he held a correspondence on the subject with Duraeus [see DURY], the great "pacifiator." Dury even came to Metz in 1662 to discuss the subject. Nothing substantial came of it; but Ferry carried his love of conciliation so far that he even regarded as possible the reunion of Protestants and Romanists; at all events, it is certain that he had on this subject a long correspondence with Bossuet. It occurred in this way. Ferry had published in 1654 a *Catéchisme général de la Réformation*, in which he showed that the Reformation was a necessary reaction against the corruption of the Church. Bossuet, at that time canon and archdeacon of Metz, wrote a refutation of this little work. The discussion led to a mutual esteem between the disputants; and when, in 1667, the project of the reunion of Protestants and Roman Catholics was considered by the government, Ferry was consulted, and entered into correspondence with Bossuet on the subject. This correspondence is printed in vol. xxiv of the *Œuvres de Bossuet* (edition of Versailles). It has been proved almost beyond doubt that Ferry was one of the ministers gained over by the cardinal Richelieu to agitate in favor of the reunion of the two religions, and that he received a pension of five hundred crowns for so doing. The receipt of Ferry for this sum is said to be shown in the Imperial Library of Paris. Ferry died at Metz July 28, 1669. He left a large number of writings, most of which remain in MS. Those which are published are, besides a volume of poetry, *Scholastici orthodoxi Specimen, hoc est Salutis nostrae methodus analytica, ex ip[s]is Scholasticorum veterum & recentiorum intimis juxta normam Scripturarum adornata et instructa* (Geneva, 1616, 8vo; 2d ed. Leyden, 1630, 8vo):—*Le dernier Désespoir de la Tradition contre l'écriture* (Sedan, 1618, 8vo):—*Réfutation des Calomnies semées nouvellement contre certain endroit d'un livre publié il y a plusieurs années et intitulé: Le dernier Désespoir*, etc. (Sedan, 1624, 8vo):—*Remarques d'historie sur le "Discours de la vie et de la mort de St. Serier," mépris par le Sieur de Ramberville* (1624, 8vo):—*Vindicie pro Scholasticis orthodoxis adversus Leon. Perinium, Jesuit., in quibus agitur de predestinatione et annexis, de gratia et libero arbitrio, de causis peccati et justificatione* (Leyden, 1630, 8vo):—*Quatre Sermons prononcés en divers lieux et sur différents sujets* (La Ferté-au-Col, 1646, 12mo):—*Lettre aux ministres de Genève*, vol. ii of the *Bibliothèque Anglaise*.—Hoefler, *Nouv. Biog. Générale*, xvii, 563; Bayle, *Dictionary* (Lond. 1736), iii, 33; Haag, *La France Protestante*; Floquet, *Études sur la vie de Bossuet* (Par. 1855, 3 vols. 8vo), vol. i; *London Rev.* July, 1856, p. 409 sq.

**Ferri, Paul**. See FERRY.

**Ferry-boat** (פֶּרִי־בֵּרֶה, *abarab'*, passage; Sept. διάβασις), a vessel for crossing a stream (2 Sam. xix, 18). The Syriac and Vulg. refer this word to the men mentioned in the above text, and accordingly Boothroyd renders the passage, "And these went over Jordan before the king, and performed the service of bringing over the king's household," which, as some of the Rabbins understand, was accomplished by carry-

ing over on their backs the women and children who could not conveniently ford the river. This, however, is not in accordance with the construction of the original (which, moreover, has the article emphatically *הַפֶּרֶךְ הַיָּמִינִי*, and *THE ferry[-boat] crossed*). Some suppose (so Josephus, *Ant.* vii, 11, 2) that there was a bridge of boats employed on this occasion, and others that a ferry-boat of some kind was used for this purpose (see Kitto, *Pict. Bible*, note in loc.). It is probable that a raft, or float, was constructed; if not, some kind of boat, for the use of these must have been known to the Hebrews, as we find vessels apparently of this description delineated among the paintings of ships on the Egyptian monuments. Floats of various

Ancient Egyptian Ferry-boat for Funerals.

kinds, buoyed up by inflated bladders, calabashes, wicker-work, and even earthen or metallic vessels, have been used from the earliest ages on the Nile (*Isa.* xviii, 2) and Tigris, for transporting passengers or goods; and modern travellers frequently allude to similar modes of conveyance at the present day among the Arabs. See *FLOAT*. Similar scenes are depicted upon the Assyrian monuments (*Layard's Nineveh*, i, 276). See *BOAT*.

Ancient Assyrian Monarch preparing to cross a River.

**Ferus**, JOHANNES (originally WILD), a Franciscan monk and cathedral preacher at Mentz, lived in the 16th century. He published a large number of sermons and Biblical commentaries. Of the latter several were put on the Roman Index. Ferus clings to the literal meaning of the Scriptures, and avoids allegorical interpretations. He recommends the reading of the Scriptures, and refutes the objection that the Scriptures are obscure. He complains of the prevalence of a Pharisaic spirit in the Roman Catholic Church, since there was in it a great deal of outward ceremonial, but little truth. He preached that repentance does not consist in outward works, such as fasting, praying, and giving alms, but that it begins, on the one hand, with the announcement of the divine law, the consciousness of one's sinfulness, and the fear of the judgment of God, and, on the other hand, with the announcement of the grace of God, and with confidence in the divine promise. Ferus thought that popes, emperors, councils, and the diets could do nothing so long as the Church was full of errors and her doctrines corrupt. He died in 1554.—*Herzog, Real-Encyclop.* xvi, 141. (A. J. S.)

**Fesch**, JOSEPH, a French cardinal, was born in Ajaccio, Corsica, Jan. 3, 1763. His father's second wife was the mother of Lætitia Bonaparte. He studied at the College of Aix, in Provence, entered the

Church, and was archdeacon and provost of the chapter of Ajaccio when the revolution broke out. The Bonaparte family being exiled from Corsica in 1793 for their opposition to Paoli and his British allies, Fesch followed them to Toulon, where his circumstances compelled him to enter the commissariat of the army. In 1795 he was appointed to the commissariat of the Army of Italy, just placed under the command of his nephew, Napoleon Bonaparte. After the 18th Brumaire he resumed his ecclesiastical functions, and was actively engaged in the negotiations concerning the Concordat of July 15, 1801. Napoleon made him archbishop of Lyons, and Fesch took possession of that see Aug. 15, 1802. Six months later he was created cardinal of St. Laurent in *Lucina*. In 1804 he was appointed ambassador to Rome, and was accompanied in this mission by Châteaubriand, who thus began his diplomatic career. He subsequently decided Pius VII to come to Paris to crown the emperor. Napoleon appointed him high almoner, commander of the Legion of Honor, and senator. Fesch paid great attention to the interests of his diocese, and established a high theological school. During the difficulties between Napoleon and the pope he showed much consideration for the latter, declining in 1809 the archbishopric of Paris, which was offered him by the emperor, and even rejecting the petitions of the chapter that he would at least administer the diocese. In 1811 Napoleon called a council to settle his difficulties with Pius VII, and appointed Fesch its president, in which capacity he seems not to have acted according to the views of the emperor, for he was sent back to his diocese. A letter of his addressed to the pope, then at Fontainebleau,

caused him to be deprived of his stipend. He introduced into France the order of the "Brethren of the Christian Schools," founded at Lyons a college of home missions, and was instrumental in procuring the recall of the Jesuits. When Napoleon I was sent to Elba, Fesch withdrew to Rome, where he was well received by Pius VII. During the "hundred days" he returned to France and into his archbishopric. After the battle of Waterloo he re-

tired to Rome, declining, however, to resign his office as archbishop of Lyons. He died May 13, 1839. See *Biog. du Clergé contemporain; L'Ami de la Religion; L'Abbé Lyonnet, le Cardinal Fesch, fragments biographiques* (Lyons, 1841, 2 vols. 8vo); *Le Vêtu sur le cardinal Fesch* (Lyons, 1842, 8vo); *Thiers, Hist. du Consulat et de l'Empire*, t. xiii; *Hofer, Nouv. Biog. Générale*, xvii, 572.

**Fessler**, IGNAZ AURELIUS, a Hungarian historian, was born at Czörendorf, Lower Hungary, in July, 1756. He became a Capuchin in 1773, and in 1784 or 1786 was appointed professor of Oriental languages and hermeneutics in the University of Lemberg. He afterwards joined the freemasons, and withdrew from the Capuchins. In 1787 the representation of a tragedy of his, entitled *Sidney*, which was denounced as impious, obliged him to retire to Silesia; here he became tutor to prince Carolath's sons. In 1791 Fessler became a Protestant. After remaining a long time in Berlin he went to Russia, and became professor of Oriental languages in the Academy of St. Alexander Newski, but was afterwards accused of atheism, and lost his situation. After being for a while a member of the Legislative Assembly, he went in 1817 to Screepta, the head-quarters of the Moravians in Russia. In 1820 he became superintendent of the evangelical community at Saratof, and in 1833 general superin-

tendent of the Lutheran congregation at Petersburg, where he died Dec. 15, 1839. His principal works are, *Marc-Aurel*, a historical novel (Bresl. 1790-92, 3 vols.); — *Matthias Corvinus* (Bresl. 1793); — *Aristides u. Themistokles* (Berlin, 1792 and 1818, 3d ed.); — *Attila* (Breslau, 1794); — *Gesch. d. Ungarn*, etc. (Lpz. 1812-25); — *Rückblicke a. meine 70 jaehrige Pilgerschaft* (Breslau, 1826); — *Hoefler*, *Nouv. Biog. Gén.* (Paris, 1857).

**Festival** (properly פֶּסַח, *chag, iopri*, "feast"), RELIGIOUS, OF THE ISRAELITES (compare Lev. xxiii). These were occasions of public religious observances, recurring at certain set and somewhat distant intervals. In a certain sense, indeed, each day was such an occasion, for at the daily service two lambs of the first year were to be offered at the door of the tabernacle; one in the morning, the other in the evening, a continual burnt-offering. With each lamb was to be offered one tenth of an ephah of flour, mingled with one fourth of a hin of fresh oil, for a meat-offering, and one fourth of a hin of wine for a drink-offering. Frankincense was to be placed on the meat-offering, a handful of which, with the frankincense, was to be burnt, and the remainder was to be eaten by the priest in the holy place, without leaven. The priests were to offer daily the tenth of an ephah of fine flour, half in the morning and half in the evening, for themselves. The high-priest was to dress the lamps in the tabernacle every morning, and light them every evening; and at the same time burn incense on the altar of incense. The people provided oil for the lamps which were to burn from evening to morning: the ashes were removed by a priest, dressed in his linen garment and his linen drawers, and then carried by him out of the camp in his common dress. Great stress was laid on the regular observance of these requirements (Numb. xxviii, 1-8; Exod. xxix, 38-42; Lev. vi, 8-23; Exod. xxx, 7-9; xxvii, 20; Lev. xxiv, 1-4; Numb. viii, 2). See DAILY SACRIFICE.

So, likewise, there was a weekly, a monthly, and a yearly festival, as will presently appear. At the *New-moon* festival, in the beginning of the month, in addition to the daily sacrifice, two heifers, one ram, and seven lambs of the first year were to be offered as burnt-offerings, with three tenths of an ephah of flour, mingled with oil, for each heifer; two tenths of an ephah of flour, mingled with oil, for the ram; and one tenth of an ephah of flour, mingled with oil, for every lamb; and a drink-offering of half of a hin of wine for a heifer, one third of a hin for the ram, and one fourth of a hin for every lamb. One kid of the goats was also to be offered as a sin-offering (Numb. x, 10; xxviii, 11-15). See NEW MOON.

**I. Pre-exilian Festivals.**—The religious times ordained in the law fall under three heads: 1. Those formally connected with the institution of the Sabbath. These were the following:

(1.) *The weekly Sabbath itself.*—On this day two lambs of the first year, without blemish, were to be offered for a burnt-offering, morning and evening, with two tenths of an ephah of flour, mingled with oil, for a meat-offering, and one half of a hin of wine for a drink-offering, thus doubling the offering for ordinary days. Twelve cakes of fine flour were to be placed every Sabbath upon the table in the tabernacle, in two piles, and pure frankincense laid on the uppermost of each pile. These were to be furnished by the people; two were offered to Jehovah, the rest were eaten by the priests in the holy place (Exod. xxxi, 12; Lev. xxiii, 1; xxvi, 2; Exod. xix, 3-30; xx, 8-11; xxiii, 12; Deut. v, 12-15; Lev. xxiii, 3; xxiv, 5-9; Numb. xv, 55; xxviii, 9). See SABBATH.

(2.) *The seventh New Moon, or Feast of Trumpets.*—The first day of the seventh month was to be a Sabbath, a holy convocation, accompanied by the blowing of trumpets. In addition to the daily and monthly sacrifices, one ram and seven lambs were to be offered

as burnt-offerings, with their respective meat-offerings, as at the usual New-moon festival (Numb. xxviii, 11-15; xxix, 1-6; Lev. xxiii, 23-25). See TRUMPETS, FEAST OF.

The other septenary festivals were: (3.) *The Sabbatical Year* (q. v.), and (4.) *The Year of Jubilee* (q. v.).

2. The great feasts (פֶּסָחִים, *set times*; in the Talmud, פֶּסָחִים, *pilgrimage feasts*) are: the Passover; the feast of Pentecost, of Weeks, of Wheat-harvest, or of the First-fruits; the feast of Tabernacles, or of Ingathering. In the arrangement of these festivals likewise a sabbatical order remarkably prevails (compare *Midrash Rabba* on Lev. xxiii, 24), and serves to furnish a strong proof that the whole system of the festivals of the Jewish law was the product of one mind. Pentecost occurs seven weeks after the Passover; the Passover and the feast of Tabernacles last seven days each; the days of Holy Convocation are seven in the year—two at the Passover, one at Pentecost, one at the feast of Trumpets, one on the Day of Atonement, and two at the feast of Tabernacles; the feast of Tabernacles, as well as the Day of Atonement, falls in the seventh month of the sacred year; and, lastly, the cycle of annual feasts occupies seven months, from Nisan to Tisri. See SEVEN.

On each of these occasions every male Israelite was commanded "to appear before the Lord," that is, to attend in the court of the tabernacle or the Temple, and to make his offering with a joyful heart (Deut. xxvii, 7; Neh. viii, 9-12; comp. Josephus, *Ant.* xi, 5, 5). The attendance of women was voluntary, but the zealous often went up to the Passover. Thus Mary attended it (Luke ii, 41), and Hannah (1 Sam. i, 7; ii, 19). As might be supposed, there was a stricter obligation regarding the Passover than the other feasts, and hence there was an express provision to enable those who, by unavoidable circumstances or legal impurity, had been prevented from attending at the proper time, to observe the feast on the same day of the succeeding month (Numb. ix, 10-11). None were to come empty-handed, but every one was to give according as Jehovah had blessed him; and there before Jehovah was every one to rejoice with his family, the Levite, the stranger, the fatherless, and the widow (Exod. xxxiii, 14-17; xxxiv, 22-24; Deut. xvi, 16, 17). On all the days of Holy Convocation there was to be an entire suspension of ordinary labor of all kinds (Exod. xii, 16; Lev. xvi, 29; xxiii, 21, 24, 25, 35). But on the intervening days of the longer festivals work might be carried on. The law always speaks of the days of Holy Convocation as Sabbaths. But the Mishna makes a distinction, and states in detail what acts may be performed on the former, which are unlawful on the Sabbath, in the treatise *Yom Tob*; while in *Mod Katan* it lays down strange and burdensome conditions in reference to the intermediate days. See CONVOCATION, HOLY.

Brown has spoken (*Antiquities of the Jews*, i, 522) of the defenceless state in which the country lay when all the males were gathered together at Jerusalem. What was to prevent an enemy from devastating the land, and slaying women and children? He refers the protection of the country to the express interposition of God, citing "the promise," as found in Exod. xxxiv, 23, 24. He adds, "During the whole period between Moses and Christ we never read of an enemy invading the land at the time of the three festivals. The first instance on record was thirty-three years after they had withdrawn from themselves the divine protection by imbruing their hands in the Saviour's blood, when Cestius, the Roman general, slew fifty of the people of Lydda, while all the rest had gone up to the Feast of Tabernacles, A. D. 66" (Josephus, *War*, ii, 19). The objection, however, which this writer thus meets is founded on the assumption that the law was strictly, uniformly, and lastingly obeyed. But the re-

quirement that all males should appear three times a year before Jehovah is not without some practical difficulty. During the sojourn in the wilderness its observance would not only be easy, but highly useful in preventing the dispersion of individuals or numbers from the main body—an influence the more needful, because many persons would doubtless stray from time to time in search of pasture. In subsequent and more settled times it must have been a serious inconvenience for all the males of the nation to leave their families unprotected and their business neglected for so many days every year as would be necessary in going to and from Jerusalem. It is true that the seasons of the festivals were well fixed and distributed for the convenience of an agricultural people. Yet to have to visit Jerusalem thrice in seven months was a serious thing, especially in later times, when Israelites were scattered far abroad. Even if the expense was, as many think [see *ASSESSMENT*], a small consideration, yet the interruption to domestic life and the pursuits of business must have been very great; nor would it be an exaggeration to say that the observance was an impossibility to the Jews, for instance, who were in Babylon, Egypt, Italy, Macedonia, Asia Minor, etc. How far the law was rigorously enforced or strictly obeyed at any time after the settlement in Palestine, it would not be easy to say. Palfrey (*Lectures on the Jewish Scrip.* i, 199) supposes that "a man might well be said to have virtually executed this duty who appeared before the Lord (not in person, but) with his offering, sent by the hand of a friend, as a suitor is said in our common speech to appear in a court of justice when he is represented there by his attorney;" a conjecture which, to our mind, savors too much of modern ideas and usages. That some relaxation took place, at least in "the latter days," appears from John vii, 8, in which more or less of what is voluntary is obviously connected in the mind and practice of our Lord with "the feast," though it must be allowed that the passage is an evidence of the general observance, not to say the universal obligation, in his days, of at least the feast of Tabernacles. If, however, there was in practice some abatement from the strict requirements of the law, yet obviously time enough was saved from labor by the strong hand of religion to secure to the laborer a degree of most desirable and enviable rest. Not, indeed, that all the days set apart were emancipated from labor. At the feast of Tabernacles, for instance, labor is interdicted only on the first and the last day. So, on other occasions, business and pleasure were pursued in connection with religious observances. But if all males appeared before Jehovah even only once a year, they must, in going and returning, as well as in being present at the festival, have spent no small portion of time in abstinence from their ordinary pursuits, and could not have failed to derive singular advantages alike to their bodies and their minds. The rest and recreation would be the more pleasant, salutary, and beneficial, because of the joyous nature of the religious services in which they were, for the greater part, engaged. These solemn festivals were not only commemorations of great national events, but they were occasions for the reunion of friends, for the enjoyment of hospitality, and for the interchange of kindness. The feasts which accompanied the sacrifices opened the heart of the entire family to joy, and gave a welcome which bore a religious sanction even to the stranger, the fatherless, and the widow (Michaelis, *Mos. Recht*, art. 199). On these solemn occasions food came partly from hospitality (a splendid instance of which may be found in 2 Chron. xxxv, 7-9), partly from the feasts which accompanied the sacrifices in the Temple, and partly also from provision expressly made by the travellers themselves. It appears that the pilgrims to Mecca carry with them every kind of food that they need except flesh, which they procure in the city itself. Lodging, too, was af-

forded by friends, or found in tents erected for the purpose in and around Jerusalem. See *HOSPITALITY*.

Besides their religious purpose, the great festivals must have had an important bearing on the maintenance of a feeling of national unity. This may be traced in the apprehensions of Jeroboam (1 Kings xii, 26, 27), and in the attempt at reformation by Hezekiah (2 Chron. xxx, 1), as well as in the necessity which, in later times, was felt by the Roman government of mustering a considerable military force at Jerusalem during the festivals (Josephus, *Ant.* xvii, 9, 3; xvii, 10, 2; compare Matt. xxvi, 5; Luke xiii, 1). Another effect of these festivals Michaelis has found in the furtherance of internal commerce. They would give rise to something resembling our modern fairs. Among the Mohammedans similar festivals have had this effect. In Article 199 the same learned writer treats of the important influence which the festivals had on the Calendar, and the correction of its errors. See *YEAR*.

The agricultural significance of the three great festivals is clearly set forth in the account of the Jewish sacred year contained in Lev. xxiii. The prominence which, not only in that chapter, but elsewhere, is given to this significance, in the names by which Pentecost and Tabernacles are often called, and also by the offering of "the first-fruits of wheat-harvest" at Pentecost (Exod. xxxiv, 22), and of "the first of the first-fruits" at the Passover (Exod. xxiii, 19; xxxiv, 26), might easily suggest that the origin of the feasts was patriarchal (Ewald, *Alterthümer*, p. 385), and that the historical associations with which Moses endowed them were grafted upon their primitive meaning. It is perhaps, however, a difficulty in the way of this view that we should rather look for the institution of agricultural festivals among an agricultural than a pastoral people, such as the Israelites and their ancestors were before the settlement in the land of promise. The times of the festivals were evidently ordained in wisdom, so as to interfere as little as possible with the industry of the people. The Passover was held just before the work of harvest commenced, Pentecost at the conclusion of the corn-harvest and before the vintage, the feast of Tabernacles after all the fruits of the ground were gathered in. In winter, when travelling was difficult, there were no festivals. See *SEASONS*.

(1.) The first of these three great festivals, that of Unleavened Bread, called also the Passover, was kept in the month Abib, in commemoration of the rescue of the Israelites by Jehovah out of Egypt, which took place in that month. The ceremonies that were connected with it will be detailed under the head *PASSOVER*. Every one who was ritually clean, and not on a journey, and yet omitted to keep the Passover, was to be cut off from the people. Any one who was disabled for the observance, either by uncleanness or being on a journey, was to keep the Passover on the fourteenth day of the next month. In order to make the season more remarkable, it was ordained that henceforward the month in which it took place should be reckoned the first of the national religious year (Exod. xii, 2). From this time, accordingly, the year began in the month Abib, or Nisan (March—April), while the civil year continued to be reckoned from Tisri (September—October) (Exod. xii, 2, 14, 27, 43-49; Lev. xxiii, 5; Numb. xxviii, 16; Deut. xvi, 1-7). The Passover lasted one week, including two Sabbaths (De Wette, *Archæolog.* p. 214). The first day and the last were holy, that is, devoted to the observances in the public temple, and to rest from all labor (Exod. xii, 16; Lev. xxiii, 6; Numb. xxviii, 18; Deut. xvi, 8). The modern Jews observe the 15th and 16th, and the 20th and 21st-days of Nisan, as holy days in connection with this festival. See *NISAN*.

On the day after the Sabbath, on the feast of Passover, a sheaf of the first-fruits of the barley harvest was to be brought to the priest to be waved before Je-

hovah, accompanied by a burnt-offering. Till this sheaf was presented, neither bread nor parched corn, nor full ripe ears of the harvest, could be eaten (Exod. xii, 15-20; xiii, 6-10; Lev. xxiii, 6-8; Deut. xvi, 2-8; Numb. xxviii, 17-25). See HARVEST.

(2.) The feast of Pentecost or of Weeks was kept to Jehovah at the end of seven weeks from that day of the festival of Unleavened Bread, on which the sheaf was presented. On the morrow after the seventh complete week, or on the fiftieth day, two wave loaves were presented as first-fruits of the wheat-harvest, together with a burnt-offering, a sin-offering, and a peace-offering, etc. The day was a holy convocation, in which no servile work was done. The festival lasted but one day. The Jews of the present day, however, hold it during two successive days. It is said to have been designed to commemorate the giving of the law on Mount Sinai (Deut. xvi, 9-11; Lev. xiii, 15-21; Numb. xxviii, 26-31; xv, 17-21). See PENTECOST.

(3.) The feast of Ingathering or of Tabernacles began on the fifteenth day of the seventh month, and continued eight days, the first and last being Sabbaths. During the feast all native Israelites dwelt in booths made of the shoots of beautiful trees, palm branches, boughs of thick-leaved trees, and of the willows of the brook, when they rejoiced with their families, with the Levite, the stranger, the fatherless, and the widow, before Jehovah. Various offerings were made. At the end of every seven years, in the year of release, at the feast of Tabernacles, the law was required to be read by the priests in the hearing of all the Israelites (Deut. xvi, 13-15; xxxi, 10-13; Lev. xxiii, 39-43, 43-46; Numb. xxix, 12-38, 40). The feast of Tabernacles was appointed partly to be an occasion of annual thanksgiving after the ingathering of the harvest (Exod. xxxiv, 22; Lev. xxiii, 39; Deut. xvi, 13), and partly to remind the Israelites that their fathers had lived in tents in the wilderness (Lev. xxiii, 40-43). This feast took place in the end of the year, September or October. The modern Jews observe it for seven successive days, the first two and the last two of which are holy days. See TABERNACLES, FEAST OF.

(4.) The festival of *New Year's Day* (*Rosh hash-Shannah* in the Talmud) is held by modern Jews for two days at the beginning of Tisri. See TRUMPETS, FEAST OF.

3. The tenth day of the seventh month was the *Day of Atonement*—a day of abstinence, a day of holy convocation, in which all were to afflict themselves. Special offerings were made (Lev. xxiii, 26-32; xvi, 1, 34; Numb. xxix, 7-11; Exod. xxx, 10). See ATONEMENT, DAY OF.

II. *Additional Post-exilian Festivals.*—1. The term "the festival of the Basket" (*εορτή Κεράλλου*) is applied by Philo (*Opp.* v, 51) to the offering of the first-fruits described in Deut. xxvi, 1-11, and occurring on the 16th of the first month (Nisan). See FIRST-FRUITS.

2. The *Festival of Acra*, which was instituted by Simon Maccabæus, B.C. 141, to be celebrated on the 23d of the second month (Ijar), in commemoration of the capture and purifying of Acra (q. v.), and the expulsion of the Hellenists from Jerusalem (1 Macc. xiii, 50-52). See MACCABEES.

3. The *Festival of Wood-carrying*, as it was called (*εορτή τῶν ξυλοφοριῶν*), is mentioned by Josephus (*War.* ii, 17, 6) and the Mishna (*Taanith*, iv, 5). What appears to have been its origin is found in Neh. x, 34. It was celebrated on the 15th (21st) of the fifth month (Ab). See XYLOPHORIA.

4. The *Festival of Water-drawing* (*מִיּוֹת הַבַּיִת*), which was held on the 22d of the seventh month (Tisri), the last day of the feast of Tabernacles (comp. John vii, 37; Mishna, *Succa*, iv, 9; v, 1-3; see Frey, *De aquæ libatione in festo tabernaculorum*, Altorf, 1744). See SILOAM.

5. The *Festival of Dedication* was appointed by Judas Maccabæus on occasion of the purification of the Temple and reconstruction of the altar after they had been polluted by Antiochus Epiphanes. The hatred of this monarch towards the Jews had been manifested in various ways: he forbade their children to be circumcised, restrained them in the exercise of their religion, killed many who disobeyed his mandates, burnt the books of the law, set up idolatry, carried off the altar of incense, the shew-bread table, and the golden candlestick, with the other vessels and treasures of the Temple, and went to such extremes as to sacrifice a sow upon the altar of burnt-offerings, build a heathen altar on the top of that sacred pile, and with broth of swine's flesh to sprinkle the courts and the Temple (1 Macc. i; 2 Macc. v; Pridæaux, *sub* A.C. 167-8, 170). The new dedication took place on the 25th day of the ninth month, called Kislev, in the year before Christ 170. This would be in December. The day was chosen as being that on which Antiochus, three years before, had polluted the altar by heathen sacrifices. The joy of the Israelites must have been great on the occasion, and well may they have prolonged the observance of it for eight days. A general illumination formed a part of the festival, when it obtained the name of the feast of Lights. In John x, 22 this festival is alluded to when our Lord is said to have been present at the feast of Dedication. The historian marks the time by stating "it was winter." (Compare 1 Macc. iv, 52-59; Mishna, *Taanith*, ii, 10; *Moed Katon*, iii, 9; Josephus, *Ant.* xii, 7, 7; *Ap.* ii, 39.) See DEDICATION, FEAST OF.

6. The *Festival of Nicanor*, to commemorate the defeat by Judas Maccabæus of the Greeks when the Jews "smote off Nicanor's head and his right hand which he stretched out so proudly," caused "the people to rejoice greatly, and they kept that day a day of great gladness; moreover, they ordained to keep yearly this day, being the thirteenth day of Adar"—the twelfth month (1 Macc. vii, 47; Josephus, *Ant.* xii, 10, 5; *Taanith*, xii; Talm. Jerus. *Taanith*, ii, 13; Josippon ben-Gorion, iii, 22, p. 244, ed. Breith.). See NICANOR.

7. The *Festival of Purim* or of Lots originated in the gratitude of the Jews in escaping the plot of Haman designed for their destruction. It took its name from the lots which were cast before Haman by the astrologers, who knew his hatred against Mordecai and his wish to destroy his family and nation (Ester iii, 7; ix, 2, 5). The feast was suggested by Esther and Mordecai, and was celebrated on the 13th, 14th, and 15th days of the twelfth month (Adar). The 13th was a fast, being the day on which the Jews were to have been destroyed; and the 14th and 15th were a feast held in commemoration of their deliverance (see 2 Macc. xv, 36). The fast is called the Fast of Esther, and the feast still holds the name of Purim. Pridæaux (*Connex.*) styles it the bacchanalia of the Jews. See PURIM.

The slaughter of Holofernes by the hand of Judith, the consequent defeat of the Assyrians, and the liberation of the Jews, were commemorated by the institution of a festival (Judith xiv, xv). See HOLOFERNES. Some other minor festivals may be found noticed in Brown's *Antiquities*, i, 586, and in Simon's *Dictionnaire de la Bible*, art. "Fêtes."—Kitto, s. v.; Smith, s. v. See CALENDAR, JEWISII.

See SACRIFICE.

**Festivals in the Christian Church.** See FEASTS.

**Fes'tus** (*festal*), PORCIUS (Græcized Πόρκιος Φη-στος), the successor of Felix as procurator of Judea (Acts xxiv, 27; Joseph. *Ant.* xx, 8, 9; *War.* ii, 14, 1), sent by Nero, probably in the autumn of A.D. 55. See FELIX. A few weeks after Festus reached his province he heard the cause of the apostle Paul, who had been left a prisoner by Felix, in the presence of Herod Agrippa II. and Bernice his sister. Not finding any thing in the apostle worthy of death or of bonds, and being confirmed in this view by his guests, he would have set him free had it not been that Paul had himself previously (Acts xxv, 11, 12) appealed to Cæsar. In consequence, Festus sent him to Rome. See PAUL. Judea was in the same disturbed state during the procuratorship of Festus, which had prevailed through that of his predecessor. Sicarii, robbers, and magicians were put down with a strong hand (*Ant.* xx, 8, 10). Festus had a difference with the Jews at Jerusalem about a high wall which they had built to prevent Agrippa seeing from his palace into the court of the Temple. As this also hid the view of the Temple from the Roman guard appointed to watch it during the festivals, the procurator took strongly the side of Agrippa, but permitted the Jews to send to Rome for the decision of the emperor. He, being influenced by Poppæa, who was a proselyte (Joseph. *Ant.* xx, 8, 11), decided in favor of the Jews. Festus probably died in the summer of A.D. 62, and was succeeded by Albinus (Joseph. *War.* xx, 9, 1). The chronological questions concerning his entrance on the province and his death are too intricate and difficult to be entered on here, but will be found fully discussed by Anger, *De temporum in Act. Apost. ratione*, p. 99 sq.; and Wieseler, *Chronologie der Apostelgeschichte*, p. 89-99. See also CHRONOLOGY. Josephus implies (*War.* ii, 14, 1) that Festus was a just as well as an active magistrate.—Smith, s. v.

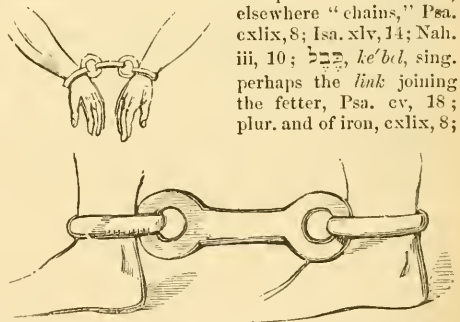

**Fetichism** or **Fetishism**, a term recently introduced to denote the lowest forms of human worship, "in which the shapeless stone, the meanest reptile, or any object however worthless or insignificant, is consecrated by a vague and mysterious reverence" (Milman). It is derived from *Feticco*, a term borrowed from the Portuguese *fétisso*, and used by the negroes of Senegal to denote an instrument of witchcraft. It was first brought into use in Europe by De Bosses, in his *Du Culte des Dieux Fétiches* (Dijon, 1760). Fetichism is practised in Greenland, Africa, Australia, and Liberia. The fetiches in use in Africa are either *natural* (as a tiger, serpent, etc.) or *artificial* (as skins or claws of beasts, stones, etc.). Sometimes a single fetich is made the object of worship for a whole tribe, e. g. the *tiger* in Dahomey, the *serpent* by the Whydahs. The negroes of Benin make a fetich of their own shadows. But, besides these, each individual almost has his own

particular fetich or fetiches. Any object may become one by the merest accident; e. g. by having been the subject of a dream. When any one has a fetich supposed to possess extraordinary powers of injuring others, no efforts are spared to get it from the owner. Collections of them are highly prized, and a traveller on the coast of Guinea saw as many as 20,000 fetiches in the possession of one negro. Sometimes they are purely imaginary, and are fantastic forms, such as are never found in nature, and generally contrived for the purpose of producing fear. At Cape Coast there is a public guardian fetich, supreme in power and dignity. This is a rock which projects into the sea from the bottom of the cliff on which the castle is built. To this rock annual sacrifices are presented, and the responses given through the priests are rewarded by the blinded devotees.

With regard to the religious relation between the fetiches and their worshippers, we find that, although undoubtedly sinking often to the rank of mere instruments of sorcery in practice, fetiches are yet essentially idols. They receive, every morning and evening, offerings of spices, milk, tobacco, etc., and are always approached with marks of respect and of fear. They are resorted to for protection against lightning, beasts of prey, murder, etc. They also serve to protect property, to attest oaths, and the negroes have even a vague idea that after death they will have to render an account to their fetiches. Yet the moral hold of the fetich over its worshipper is, after all, very weak; the object of worship is discarded or broken as soon as its efficacy is distrusted.

Substantially, fetichism is a rude form of pantheism. Its root is to be found in the fear generated in the rude nature of the savage by the unknown forces of the universe.—Herzog, *Real-Encyklop.* iv, 395; Scholten, *Geschichte der Relig. und Philosophie* (Elberfeld, 1868); Lecky, *Rationalism*, i, 208 sq.; Hardwick, *Christ and other Masters*, ii, 127.

**Fetter** (פֶּתֶל, *zek*, bond or chain in general, only in the plur. Job xxxvi, 8, elsewhere "chains," Psa. cxlix, 8; Isa. xlv, 14; Nah. iii, 10; כְּבָבִים, *ke'bal*, sing. perhaps the link joining the fetter, Psa. cv, 18; plur. and of iron, cxlix, 8;

Ancient Assyrian Handcuffs and Fetters for Captives.

Ancient Egyptian Captive handcuffed.

נְשֵׁתַי, *necho'seth*, *braces*, in the dual, the appropriate term, Lam. iii, 7; Judg. xvi, 21; 2 Sam. iii, 34; 2 Kings xxv, 7; Jer. xxxix, 7; lii, 11; πῆδη, implying that they were for the feet, in the plur., Mark v, 4; Luke viii, 29; Eccles. vi, 24, 29; xxi, 19), shackles or chains for binding prisoners, whether by the wrists or ankles. The Philistines bound Samson with fetters of copper (Judg. xvi, 21). Manasseh and Zedekiah, kings of Judah, were

bound with fetters by the Chaldeans and carried to Babylon (2 Chron. xxxiii, 11; 2 Kings xxv, 7). Manacles for the feet and hands are represented on the Assyrian monuments (Layard, *Nineveh*, ii, 376; Kitto, *Daily Bible Illustrations*, ii, 437). See CHAIN. One mode of securing prisoners among the Egyptians, as depicted on the monuments, was to enclose their hands in an elongated fetter of wood, made of two opposite segments, nailed together at each end, such as are used for a similar purpose in Egypt at the present day (Wilkinson, *Ancient Egyptians*, i, 410, abridgm.).

#### Feudal System. See FIEF.

**Feuguières.** GUILLAUME, was born at Rouen. In his native place he became minister of the Reformed Church. In 1578, at the recommendation of prince William the First, he was appointed first professor of theology in the recently founded University of Leyden. His influence was of decided advantage to the new institution, but his connection with it was of short continuance. In 1579 he resigned his professorship, in order to accept the pressing invitation of his former charge to again become their pastor. There he spent the remainder of his days, and died in 1613 at an advanced age. He wrote several works in Latin, of which we deem the following most worthy of mention: *G. Feuguerii prophetice et apostolice, i. e. totius divine et canonice scripturæ thesaurus, in locos communes rerum, dogmatum suis divinis exemplis illustratorum, et phrasion scripturæ familiarium, ordine alphabetico Augustini Marlbrati adversarius* (Lond. 1574; reprinted at Berne in 1601, and at Geneva in 1624. A compendium of it was published at Geneva in 1613):—*Novum Testamentum latine, ex versione et cum annotationibus Th. Beze, p. n. c. etiam additis ex Joachimi Camerarii notationibus, studio Petri Loselerii Villerii, theolog. prof. s. s. Genevensis, et nunc postremo G. F. opera* (Lond. 1587). See B. Glasius, *Godgeleerd Nederland*, Deel i, blz. 464 en verv.; also Soermans, *Acad. Regist.* bl. 32; Paquot, i, frag. 178. (J. P. W.)

**Feuillants** (*Feuillants, Congregatio beate Mariæ Fulviensis*), a reformed congregation of the Cistercians (q. v.). Their founder, Jean de la Barrière, of the family of the Vicomtes de Turennes, was born at St. Cère in 1544, and finished his education at the University of Paris. In 1562, when only 18 years of age, he received the Cistercian abbey of Notre Dame de Feuillants in commendam, and three years later took possession of it. After having received the income of the abbey for eleven months, he entered the order himself. His efforts to restore a stricter monastic discipline met with the unanimous opposition of the members of the abbey, and he was even in danger of being assassinated. He was charged at the chapter general held at Cîteaux with introducing innovations, but his defence made so deep an impression that many of the assembled monks placed themselves under his spiritual guidance, and enabled him to carry through a thorough reformation in his abbey. La Barrière and his friends now suffered a great deal of persecution from the old Cistercians; but their reformation was, in 1586 and 1587, approved by the pope, though they remained subject, with regard to such points as were not at variance with their new discipline, to the abbot of Cîteaux. Other abbeys were authorized to adopt the reformation of Feuillants, and pope Sixtus V gave them the house of San Vito at Rome, to which, after a time, was added the house of St. Pudentiana, and somewhat later a beautiful monastery. In 1588 Henry III gave them a monastery in Paris. During the civil war La Barrière remained loyal to Henry III, whose funeral sermon he preached at Berdeaux, but many members of the order became ardent partisans of the Ligue. One of them, Bernard de Montgaillard, became celebrated under the name of "The Little Feuillant." By these partisans of the Ligue, La Barrière was denounced as a traitor to the interests of the Catholic Church. At a

chapter held in 1592, under the presidency of the Dominican monk Alexander De Francis, subsequently bishop of Forlì, he was deposed from his position, forbidden to say mass, and required to report himself once every month to the Inquisition. A revision of the trial by cardinal Baronius led, however, to the acquittal of La Barrière. Pope Clement VIII fully dissolved the connection of the new congregation with Cîteaux, placed them under the immediate jurisdiction of the papal see, and commissioned six of the members with framing new statutes. These new statutes provided for the mitigation of some of the rules, the rigor of which, it was reported, had caused the death of fourteen members, and they received the sanction of the Church in 1595. The congregation now spread in France and Italy, and at its head in France was an abbot elected for three years. As discipline again began to slacken, pope Urban VIII in 1630 divided the congregation into two—the French, called after Notre Dame de Feuillants, and the Italians, the members of

A member of the French Congregation of Feuillants.

Member of the Italian Congregation of Feuillants or Reformed Bernardines.

which were called reformed Bernardines. At the head of each was henceforth a general. Subsequently considerable alterations were made in the statutes of each (of the French in 1634, of the Italian in 1667). Among the most celebrated members of the two congregations belong cardinal Bona and Cosmus Roger. Joseph Meratius wrote their history (*Cistercii reforescentis seu Congregationum Cistercio-Monasticarum B. M. Fulviensis in Gallia et reformatorum S. Bernardi in Italia chronologica historia*, Turin, 1690).

The first convent of nuns according to the reformed rule of Feuillants was organized in 1588 at Montesquieu. It was subsequently transferred to Toulouse. The chapters general held in 1595 and 1598 forbade the establishment of new convents, but in 1662 the wife of king Louis XIII succeeded in establishing one in Paris. According to a bull of Clement VIII of 1606, these nuns were subject to all the rules of the congregation of the Feuillants.

Nun of the Congregation of Feuillants.

It seems that the congregation has become entirely extinct in consequence of the French Revolution.—Helyot, *Ordres Religieux*, ed. Migne, s. v.; Henrion-

Fehr, *Mönchsorden*, i, 159; Wetzler u. Welte, *Kirchen-Lex.* iv, 61. (A. J. S.)

**Fever**, the rendering, in the A. V., of the Hebrew  $\text{קדחת}$ , *kaddach'ath* (Deut. xxviii, 22), and the Greek  $\text{πυρετός}$  (Mat. viii, 14; Mark i, 30; Luke iv, 38; John iv, 52; Acts xxviii, 8). Both the Hebrew and Greek words are derived from the association of burning heat, which is the usual symptom of a febrile attack; the former coming from the verb  $\text{קדח}$ , *to burn*, the latter from  $\text{πύρ}$ , *fire* (comp. Aram.  $\text{ܩܕܚܐ}$  from  $\text{ܩܕܚ}$ ; Goth. *brinno*, from *brinnan*, to burn; Lat. *febris*, and our own *fever*, from *fervere*). In Lev. xxvi, 16, the A. V. renders  $\text{קדחת}$  by "burning ague," but the rendering *fever* seems better, as it is not necessarily the intermittent type of the disease which is thus designated. In all Eastern climates febrile diseases are common, and in Syria and Palestine they are among the commonest and severest afflictions under which the inhabitants suffer (Russell's *Aleppo*, bk. v, ch. iii). They are especially prevalent in the vicinity of Capernaum (Thomson, *Land and Book*, i, 547). The fever under which Peter's wife's mother suffered is called by Luke  $\text{πυρετις μέγας}$ , "a great fever," and this has been regarded as having reference to the ancient scientific distribution of fevers into the great and the less (Galen, *De diff. febr.*; see Wetstein, in loc.), and as an instance of Luke's professional exactitude in describing disease. His use of  $\text{πυρετοί}$  in the plural in describing the disease under which the father of Publius labored (Acts xxviii, 8) has also been adduced as an instance of the same kind, inasmuch as that disease was, from its being conjoined with dysentery, not a continuous, but an intermittent fever. To this much importance cannot be attached, though it is probable that Luke, as a physician, would naturally use the technical language of his profession in speaking of disease. In Deut. xxviii, 22, besides  $\text{קדחת}$ , two diseases of the same class are mentioned,  $\text{דלקת}$ , *dalle'keth*, a burning (A. V. "inflammation"), and  $\text{חַרְחָר}$ , *charchur'*, intense parching (A. V. "extreme burning"). The Sept. renders the former of these by  $\text{πίρος}$ , *shivering*, and the latter by  $\text{ἐπιθυσμός}$ , a word which is used by the Greek writers on medicine to designate "quodvis Naturæ irritamentum, quo sollicitata natura ad obundas motiones excitatur" (Foes, *Oecon. Hippoc.*). The former is probably the ague, a disease of frequent occurrence in the East; and the latter probably dysentery, or some species of inflammatory fever. The Syriac version renders it by *burning*, which favors the latter suggestion. Rosenmüller inclines to the opinion that it is the *catarrhus suffocans*, but this is without probability. There is no ground for supposing it to be erysipelas. Fever constantly accompanies the bloody flux or dysentery (Acts xxviii, 8; compare De Mandel-lo, *Travels*, ed. 1669, p. 65). Fevers of an inflammatory character are mentioned (Burekhardt, *Arab.* i, 446) as common at Mecca, and putrid ones at Jeddah. Intermittent fever and dysentery, the latter often fatal, are ordinary Arabian diseases. For the former, though often fatal to strangers, the natives care little, but much dread a relapse. These fevers sometimes occasion most troublesome swellings in the stomach and legs (ii, 290-291).—Kitto, s. v.; Smith, s. v. See DISEASE.

**Few**, IGNATIUS A., a minister of the Methodist Episcopal Church. He was born in Columbia County, Georgia, April, 1791. About the year 1804 he was sent North to be under the care of his uncle, then residing in New York, for the benefits of a Northern education. He was prepared for college by a Mr. Traphagen, at Bergen, N. J., and afterwards went to Princeton, but, instead of entering the regular college course, he preferred devoting himself to such accomplishments as music and French, drawing and fencing. After remaining at Princeton some time he went to the city

of New York, and after prosecuting his studies there a short time he returned to Georgia. He commenced the study of law, but after his marriage, which took place in 1811, he gave up his legal pursuits, and settled down into the life of a planter, from which he was only aroused by an appointment as colonel of a regiment to repair to Savannah in 1815. At the end of the war he returned to his studies with such intensity as to lead to the neglect of his business and the loss of his property. In the year 1823 he removed to Augusta, and engaged in the practice of the law with flattering success, but in 1824 he was attacked with hemorrhage of the lungs, and from that time was unable to attend to the duties of his profession, and never afterwards fully regained his health. At this period of his life a great change in his character took place. Heretofore he had been inclined to one or other of the forms of scepticism, but Fletcher's *Appeal to Matter of Fact and Common Sense* falling in his way, his scepticism was dissipated, and his heart opened to the influence of Christianity. In 1828 he was admitted on trial in the South Carolina Conference of the Methodist Episcopal Church. "Notwithstanding he was always an invalid from the time he entered the ministry, he performed a great amount of labor, and filled some of the most important places in the gift of his denomination. He was the projector, and for a time the president, of Emory College, at Oxford, Ga., and rendered important service to the cause of education and sound morals." The degree of LL.D. was conferred upon Mr. Few by the Wesleyan University in 1838. Dr. Few's last public act was the drawing up of the report on the division of the Methodist Church, which was adopted by the Georgia Conference in 1845. The excitement produced by this effort was too much for his strength, and, though he partially rallied and lingered during the greater part of the year, his debilitated constitution sank at last, and he died in great peace at Athens, Ga., Nov. 21, 1845, and was buried in Oxford, the seat of Emory College. He left a widow, but no children.—Sprague, *Annals*, vii, 739.

**Fiacre**, SAINT, an Irish hermit, who died at Breuil (Erie), in France, about 670. He was originally called in France Fèvre, and, according to some writers, the name Fiacre was given to him about five or six hundred years after his death. Little is known about his life. According to some writers, he descended from an illustrious Irish family; according to others, he was the son of a king of Scotland. He came to France with some companions while still very young, cultivated a tract of land, and built cells for himself and his companions, and an asylum for foreigners. An Irish or Scotch nobleman, by the name of Chillen, induced him to preach in the neighboring provinces, and his sermons are said to have had great results. He was buried in his oratory at Breuil, and subsequently an oratory was erected on the spot. His relics became quite celebrated, as a number of miracles were ascribed to them; as, for instance, by queen Ann, wife of Louis XIII. In the former province of Artois, where he is the object of a particular veneration, he is commemorated on the 13th of November. He is also the patron of the gardeners, who commemorate him on the 6th of August. A class of four-wheeled French carriages, which became common in the 17th century, are said by some to have been named after him, as the inventor had on his sign the words *A Saint Fiacre*; but others explain the origin of the word differently. Some writers make mention of a letter written by Fiacre to his sister Syra, and containing some exhortations.—Hofer, *Nouvelle Biographie Générale*, xvi, 614. (A. J. S.)

**Fichte**, JOHANN GOTTLIEB, a German philosopher, was born May 19, 1762, at the village of Rammenau, near Bischofswerda, in Lusatia. The baron Milletz, struck with the promise of the boy, assumed

the charge of his education. At thirteen he was placed in the gymnasium of Schulpforte, and while there he imbibed (from reading Lessing) a spirit of free inquiry which animated his whole intellectual life. At eighteen he entered the University of Jena as a student of theology, and while there he seems to have adopted the philosophy and theology of Spinoza. But the sense of "personality" soon lifted him out of that abyss. The death of baron Miltetz threw him on his own resources, and privation added strength to his character. For a while he was tutor in a family at Zurich, and in 1790 he went to Leipzig, where he suffered greatly from poverty. "I have nothing," he writes, "excepting courage left." Kant's *Kritik der reinen Vernunft* (the Criticism of Pure Reason) wrought a revolution in his mode of thinking, and freed his mind entirely from the remains of Determinism. "I now heartily believe in the freedom of man, and am well convinced that it is only on this supposition that duty, virtue, and morality is so much as possible. . . . It is now evident to me that the doctrine of the necessity of all human actions is the source of a great part of the immorality of the so-called higher classes" (*Letter to Achelis*, 1790). In 1791 he went to Warsaw to fill a place as private tutor, but soon threw it up in disgust, and on his way home stopped at Königsberg to visit Kant (June, 1791). Not finding at first a very cordial reception, he wrote, between July 13 and Aug. 18, his *Kritik aller Offenbarung* (Criticism of all possible Revelation), and laid it before Kant, as an introduction of "his mind" to that philosopher. Kant was, indeed, conciliated; but yet, when Fichte soon after asked for a small loan to help him forward, Kant refused. The book appeared in the spring of 1792, and attracted universal attention. It was everywhere ascribed to Kant, who was compelled to name Fichte as the author, in order to disclaim it completely for himself. The work seeks to determine the necessary conditions under which revelation must be given by God to man, and to lay down the criteria by which every professed revelation must be tested. In October, 1792, Fichte was married, and took up his abode with his father-in-law (Rahn) at Zurich, where he spent several months. Here he published a work on the French Revolution (1793, 2 vols.), in which he advocated the modern principle that no political constitution can be unchangeable; and that the best constitution is that which carries in itself the principle of progress, and provides a method for its own change and improvement. He was charged with Jacobinism and democracy on account of this work. In 1794 he became professor of philosophy at Jena, as successor of Reinhold. His lectures awakened great enthusiasm among the students. Part of them were published under the title *Die Bestimmung des Gelehrten* (transl. by W. Smith, *The Vocation of the Scholar*, London, 1847, 12mo). In 1795 he published *Wissenschaftslehre* (Doctrine of Knowledge), and in 1798 his *Sittenlehre* (Doctrine of Ethics). The freedom and novelty of the doctrines taught in these lectures, together with the fact that he delivered many of them on Sunday (see below), brought upon him a charge of atheism, which he vigorously repelled in his *Appellation gegen die Anklage des Atheismus*. Nevertheless, he was compelled to resign his chair in 1799. He went to Berlin and delivered private lectures, which were very popular; and in 1800 he published his *Bestimmung des Menschen* (transl. by Mrs. Sinnott under the title *The Destination of Man*, Lond. 1846, 12mo). In 1805 he held the chair of philosophy at Erlangen for a few months. Between 1805 and 1807 he published lectures, *Ueber das Wesen des Gelehrten* (transl. by W. Smith under the title *The Nature of the Scholar and its Manifestations*, Lond. 1854, 12mo); lectures delivered at Berlin on *Grundzüge des gegenwärtigen Zeitalters* (transl. by W. Smith, *The Characteristics of the present Age*, London, 1847, 12mo); and *Anweisung zum seligen Leben, oder die Religionslehre*, the most impor-

tant of his later writings, as giving what he considered to be the ethical and religious results of his philosophy (translated by W. Smith, *The Way towards the blessed Life, or the Doctrine of Religion*, London, 1849, 12mo). Returning to Berlin in 1807, he published *Reden an die Deutsche Nation* (Addresses to the German People), which awakened great political enthusiasm. On the restoration of peace he was called by the king to aid in reorganizing the University of Berlin, and in 1810 he was made rector of the university, which then included among its faculty Schleiermacher, Neander, De Wette, Von Humboldt, and other brilliant names. During the subjection of Germany to Napoleon, much of Fichte's time and thoughts were given to politics; his patriotism was pure, fervent, and self-sacrificing. After the great battles of 1813, the hospitals were filled with wounded men, and his wife was an assiduous and devoted nurse. She was seized with typhoid fever early in 1814, and her husband imbibed the infection from her; she recovered, but he died, Jan. 27, 1814. His son, Immanuel Hermann (born in 1797), inherited his father's aptitudes to a certain extent, has edited his works, and has also vindicated him from the charge of atheism and irreligion. Besides the works of J. G. Fichte already mentioned, we name *Grundlage des Natur-Rechts* (Jena, 1767-9, 2 parts):—*Die Thatachen des Bewusstseyns* (Stuttgart, 1817). The following were edited by his son after his death: *Nachgelassene Werke* (Bonn, 1834, 3 vols.):—*Religions-philosophische Schriften* (Berlin, 1847):—*Populärphilos. Schriften* (Berlin, 1807, 7 vols.):—*Briefwechsel mit Schelling* (Stuttgart, 1856):—*J. G. Fichte's Sämmtliche Werke* (Berlin, 1845 sq. 8 vols.).

We can give only a summary view of the attempts of Fichte to found a complete philosophy. Historically he stands between Kant and Hegel, and forms the point of transition from the one to the other. "The end which Fichte proposes to himself in his *Wissenschaftslehre* is to give to science a true, that is to say, an absolute principle, reposing only upon itself, and leaving a basis to all the rest. Here the idealism of Kant is accepted in all its rigor. There is no longer any arbitrarily supposed objective element, even as a simple phenomenon. All is severally deduced from the subject, the sole term of knowledge admitted by idealism. Fichte's problem is just this: to bring out philosophy whole and entire from the *Ego*; and this bold reasoner proposes to give his deduction a more than mathematical exactitude. Algebra rests upon the law of identity, which is thus expressed:  $A=A$ . Fichte maintains that this law implies another, the only one which a philosopher is entitled to admit without proof, and also the only one which he requires:  $Me=Me$ . When you say  $A=A$ , you intend to affirm nothing upon the existence of  $A$ . You only affirm that if  $A$  is  $A$ ,  $A$  can be nothing else than  $A$ . The proposition  $A=A$  is therefore, says Fichte, absolute only in its *form*, and not in its *matter* or contents. I know not if  $A$  exists practically and materially or not; but it matters not. I am formally certain that *given*  $A$ ,  $A$  cannot differ from  $A$ , and that there is necessary relation between these two terms. It is by the analysis of this relation that Fichte undertakes to prove the existence of *Ego*. In the proposition  $A=A$ , he argues, the first  $A$  is not considered under the same point of view as the second. The first  $A$ , as we have seen, is laid down conditionally, the second absolutely. What reduces these two terms to unity, puts them in a certain relation, judges, affirms, and constitutes this relation? Evidently the *Ego*. Take away the *Ego*, and you take away the relation, the two terms, the proposition  $A=A$ . Above it, then, there is a higher and more immediate truth. The principle of identity is only absolute in *form*; the principle  $Me=Me$  is absolute both in *form* and matter; it alone is *truly absolute*. I need not follow Fichte in the course of his deduction, the most subtle and artificial which can be

conceived. It is enough for me to know that he pushed to the utmost the strange idea of deducing a vast system of philosophy from this one principle, the *Ego*. The *Ego* alone is the principle, explaining, laying down, creating itself. I know not whether I should wonder more at the excess of extravagance to which the human mind may be carried, or at the amazing richness of its resources. By Kant it was condemned to be ignorant of the universe and of God, locked up in the prison of the *Ego*. Let him alone. This one reserved point will give him back all the rest. From the furthest limits of skepticism he will even pass to the most absolute dogmatism. But a little while ago he doubted of everything. Now he vaunts, not merely that he *knows* Nature, but that he *creates* her. Nay, he vaunts that he creates God. Such are the very expressions, at once absurd and logical, of Fichte. He draws nature and God from the *Ego*. The *Ego* implies the *Non-Ego*. It limits itself. It is only itself by opposing to itself another which is not itself. It poses itself only by opposing its contrary. It is itself the link of this opposition, the synthesis of this antinomy. In fact, if the *Ego* only exists for itself, the faculty of self-limitation which it possesses implies that, in itself, it is infinite and illimitable. Beyond the divisible and *relative Ego*, opposed to the *Non-Ego*, there is, therefore, an *absolute Ego*, comprising nature and man. This absolute *Ego* is God. Here, then, is thought in possession of its three essential objects; here are man, nature, and God, in their necessary relation, members of one identical thought, with three terms, at once separated and reconciled; here is a philosophy worthy of the name; a rigorous, demonstrated, homogeneous science, starting from one great principle to follow out and to exhaust all its consequences.

"Such, in its general principle, is the metaphysics of Fichte. His morality is a logical, though perhaps unforeseen consequence of this. It is founded upon the *Ego*, whose eminent characteristic is liberty. To preserve one's own liberty, one's *Ego* is duty; to respect the *Ego*, the liberty of others, is another not less sacred duty which becomes the foundation of right. Hence the noble stoicism of Fichte, and that passion for liberty, which were in such perfect harmony with the masculine strength of his character and the generous part which he played in the political affairs of Germany. But the importance of the system of Fichte does not lie here. I find his greatness and originality in the extraordinary metaphysics so justly and boldly called by himself subjective absolute idealism. It has this singular feature, that in pushing the scepticism of Kant to its extremest consequences, it prepares the way for the dogmatism of Schelling and of Hegel. Not only does it prepare the way for, but even begins and contains this dogmatism. Fichte openly aspires to absolute science. He explains all things—man, nature, and God. He leads German philosophy, if I may venture to say so, from the subjective to the objective by the subjective itself. From absolute scepticism he flings it into an enormous dogmatism. Setting out from a teaching so timid that it scarcely ventures to affirm one actual being, it is the prelude of that ambitious philosophy which embraces in its enormous frameworks the history of man and that of nature, and pretends to an unmeasured, unreserved, and universal explanation of all things" (Saisset, *Modern Pantheism*, Edinb. 1863, ii, 2 sq.).

On the relations of Fichte's life and works to theology and to the Christian Church, we make the following extracts from Hagenbach, *German Rationalism* (transl. by Gage and Stuckenberg, N. Y. 1865): "It would certainly be doing Fichte injustice to interpret his system to mean that he wished to make himself, J. G. Fichte, God. We might say with more propriety that Fichte, like Spinoza, denied the existence of God only in order to conceive him more spiritually;

stripping off all associations of created things from the idea of the Creator, lest he should be dragged down into the sphere of the finite. The human mind is too apt to think of God in an anthropomorphic manner. Fichte was a teacher of academic youth. At his feet sat many who were destined to proclaim to Christian congregations the God of the Gospel; a God who is only Creator if there are creatures of his creation, who has called a world into being, not as a visionary world, but as an actual and real one; a world in which sin, misery, and affliction appear but too real, from which the mere *imagination* that they do not exist cannot save us, but which can only be removed by a higher reality, a divine fact, by God's act of love, as it appears historically in the redemption through Christ. If now the ground were taken from under the feet of those destined to proclaim such a doctrine, if nothing religious remained for them but their miserable *Ego*, of which they were not even as fully and energetically conscious as Fichte of his, must not many just scruples have arisen in the minds of those, too, who were not accustomed to restrain the freedom of investigation hastily? Hence Fichte was charged with no less an error than atheism, and to this day the learned are not agreed whether this oft-abused term may be applied to Fichte's system as represented in his *Wissenschaftslehre*. To this must be added, as Fichte himself remarks, that his democracy was as much a thorn in the eyes of his opponents as his atheism. The fact that he disregarded all established customs offended many. He chose Sunday for delivering moral lectures to the students. In this the Consistory of Weimar, of which at that time Herder was a member, thought they recognised the secret intention of gradually undermining public worship, although Fichte protested solemnly against this, and appealed to the example of Gellert, whose moral lectures had also been delivered on Sunday, and why not then the philosophical lecture-room? The dispute about reading lectures on Sunday was, however, only the prelude to a fiercer contest. Fichte published a work *On the Grounds of our Faith in the Divine Government of the World*, in which the moral order of the world was denoted as God, and the assertion was made that we need and can conceive of no other God. 'The existence of this God cannot be doubted; it is the most certain of all things, and the ground of all other certainty; but the idea of God as a particular substance is impossible and contradictory. It is proper to say this candidly to strike down the prating of the schools, so that the true religion of doing right cheerfully may be elevated.' Many pious minds, of course, took offence at these expressions. Although Fichte might be satisfied with this moral order of the world, *the Christian's faith in God*, a faith, too, in 'doing right cheerfully,' but at the same time in a real God, could by no means be content with this philosophical theory. This faith would not, however, have been destroyed by this theory, even if no interdiction had been issued against it. Such an interdiction appeared. The book in which Fichte advocated the theory of the divine order of the world was attacked in the electorate of Saxony, and from this place the attention of the court at Weimar was called to the dangers of Fichte's doctrine, 'as one not only openly hostile to the Christian, but even to natural religion.' . . . It is remarkable in the case of Fichte that, after he had removed himself farthest from the common Christian feeling, he was led nearer and nearer it again. . . . After Fichte had called attention to the deep importance of faith, in the book *Die Bestimmung des Menschen*; after he had pointed out the importance of Christianity 'as the only true religion' in the history, and the great importance of the Christian state, in the *Grundzüge des gegenwärtigen Zeitalters*, he attempted, especially in his *Anweisungen zum selbigen Leben, oder Religionshere*, to prove the agreement of his philosophy of that time with the principles

of Christianity, which he regarded in a light entirely different from Kant. Kant and the Rationalists placed the essence of Christianity chiefly in morality and the fulfilment of the moral law, and, in accordance with this, esteemed and used with a special predilection those passages in Scripture in which the various moral precepts are drawn in distinct outlines, as, for instance, the Sermon on the Mount, and several parables of Jesus in the first three gospels (while they had no taste for John, who appeared to them a mystic); Fichte, on the other hand, threw himself on the fourth gospel, and regarded it as the only true source of the genuine doctrine of Christ; he, of course, did this in a one-sided manner, and with a denial of the other truths of Scripture, which belong fully as much to the totality of Christian doctrine and history as the gospel of John. . . . The person of Jesus had with him a signification entirely different from that of the Rationalists. He does not behold in him the teacher of morality, nor simply the moral example. No; exactly that oneness with God, as Christ expresses it in the gospel of John, exactly that *real unity with the Father* which the Rationalists desired to remove as a metaphysical formula of no use to morality, was to him the heart and the star of the Gospel. On this account he held himself so closely to John and his doctrine of the Logos having become flesh, in which he beheld the fullness of all religious knowledge. We should, however, make a great mistake if from this we concluded that Fichte agreed with the old orthodox doctrine in reference to Christ. What this doctrine regarded as a historical fact, which had occurred once, that Fichte regarded as a fact eternally repeating itself, as occurring in every religious man. Christ was not the *Saviour* to him in the old sense; he was only the representative of that which is continually occurring still. 'The eternal Word becomes flesh at all times, in every one, without exception, who understands, in a living manner, his oneness with God, and who really yields his entire individual life to the divine life in living . . . quite in the same manner as in Christ Jesus.' . . . In the house of the distinguished philosopher, each day, without exception, was closed with proper and solemn evening devotions, in which the domestics were also accustomed to take a part. After several verses had been sung from a choral-book, accompanied with the clavichord, the father of the family would make some remarks on some passage of the New Testament, most frequently on his favorite gospel of John. In these discourses he was less concerned about moral applications and rules of life than about freeing the mind from the distraction and vanity of the common affairs of life, and elevating the spirit to the eternal." Dörner regards Fichte as closing what he calls the period of "reflection" in philosophy by his theory of absolute subjective idealism; and holds the later form of Fichte's teaching to be Spinozistic, as denying the idea of a self-conscious God distinct from the world (*Person of Christ*, Edinb. transl., div. ii, vol. iii, 93 sq.).

Fichte's *Wissenschaftslehre* has recently been admirably

bly translated by A. E. Kroeger, under the title *The Science of Knowledge* (Philadelphia, 1868, 12mo).

**FICINUS, MARSIILIUS** (*Marsiglio Ficino*)—the principal restorer of the Platonic philosophy, and the most enthusiastic of its modern advocates—was born at Florence Oct. 18, 1433, and died at his villa of Careggi, in the neighborhood, Oct. 1, 1499. He was the son of the chief physician of Cosmo di Medici, and was designed for the same profession; but his youthful intelligence attracted the great Florentine, and induced his selection as the prospective head of the projected Medicæan Academy. During the sessions of the Council of Florence, the conversations of Gemistus Pletho had inspired Cosmo with profound admiration for the Platonic doctrine, and with a desire to disseminate it in Tuscany. The excessive refinements and logomachies of the later schoolmen had discredited the system of Aristotle; the disturbance and alarms preceding the capture of Constantinople had driven many educated Greeks into Italy, and introduced the works and the followers of Plato and the Neo-Platonists; and the acrimonious controversy of Pletho and Gennadius attracted attention to the sublime reveries and eloquent expositions of the Platonic school.

Marsilius Ficinus devoted himself with ardor to the acquisition and illustration of the Platonic doctrines, and was abundantly supplied by the Medici with MSS., and with the other requirements for the successful prosecution of his task. At the age of 23 he presented to his patron a synopsis of the tenets of the academy, but was recommended to suppress it, as his knowledge was obtained at second-hand, and he had not yet attained an adequate acquaintance with the Greek language. Ficinus continued his studies, and devoted his whole life to the translation and interpretation of the academic texts, inclining strongly to the views of the later Platonists. He rendered into Latin the whole works of Plato and of Plotinus, and parts of the writings of Proclus, Porphyry, Iamblichus, etc. The translation of Plotinus was undertaken at the suggestion of Pico di Mirandola, and was published in 1492. His whole heart seems to have been thrown into this labor of love. In part he transforms himself into Plotinus; in a greater degree he constrains Plotinus to give utterance to his own preconceptions. To each chapter of the work is prefixed a copious summary, which presents rather Ficino's scheme of transcendentalism than an accurate abbreviation of the text. It, however, affords something like an intelligible and coherent exposition, in place of the dark, oracular, and loosely-connected pantheism of his author, which baffled even the penetration of Longinus. The intricacy, the opacity, and the mysticism of the doctrine expounded, and the ruggedness of its original exposition, are not relieved by any literary graces on the part of the summarist and translator. His style is inconceivably harsh, angular, and obscure; yet it is impossible to withhold admiration from the vigor, and skill, and grasp with which he compels the reluctant Latin to lend itself to the demands of the subject—to twist, and wind, and adapt itself to the sinuosities of the most plastic of all languages, applied to the most perplexed and attenuated of all speculations—and to interpret a style and a system totally foreign to the air of Latium. Lucretius apologized in the Golden Age for the stubbornness of his native tongue in the treatment of the simple and perspicuous doctrines of Epicurus; and a much more wonderful power is exhibited by Ficinus in constraining the dead and stiffened tongue of Rome to conform itself to all the convolutions of Greek thought and fantasy in their most bewildering license. Nor is it just to leave unnoticed the frequency with which Ficinus catches and reflects the splendors of his original, and reproduces the magnificences of their expression.

Attempts had often been made, and were renewed in the 15th century, to conciliate the teachings of Ple-

to and Aristotle, and the evident aim of Ficinus was to impose upon Plato and the Neo-Platonists a significance which might identify, or at least harmonize, their doctrines with the Christian creed. It was a preposterous revival of a design fruitlessly attempted at Alexandria in the age of Origen and his successors. Pantheism is wholly antipathetic to Christianity, whether presented as Neo-Platonism, as Spinozism, or as German transcendentalism. But it was a natural effort in that era of confusion and hopeful anticipation which witnessed the Renaissance. Moreover, the doctrines of Plotinus himself are manifestly moulded and modified by the contemporaneous influences of Christianity; and it is a curious taste to detect the Christian impress which marks so much of his abstruse metaphysics, especially in the closing books of the last *Enchiridion*. It is scarcely possible to read the concluding *capitulum*, or summary, without feeling that the hallucination of Ficinus was an honest as well as an earnest delusion; and that, if he misrepresented both Plato and the Alexandrian school by Christianizing their doctrine, he did not suffer himself to be seduced from a recognition of the personality of the Supreme Being, or into any position consciously at variance with the Christian creed.

Ficinus was liberally maintained throughout his life by his generous patrons of the house of the Medici, retaining their favor for three generations—*μετὰ δὲ τριτάτοιςιν ἀνασσειν*. He was equally countenanced by Cosmo, Pietro, and Lorenzo. He took holy orders in the forty-third year of his age, having, according to some accounts, had his thoughts earnestly directed to religion by the preaching of the celebrated Savonarola.

He was placed in charge of two churches in Florence by Lorenzo di Medici, and promoted to a canonry in the cathedral by the future pope Leo X. Lorenzo made him a present of the villa of Careggi, where he died, seven years after the death of the donor, and five years after the expulsion of his patrons from Florence. His constitution was always very feeble, his health uncertain, and his temperament melancholy. His frail body—for he scarcely attained half the ordinary stature of man—required constant care and nursing, and it is surprising that he was not worn out by continual study long before reaching his climacteric. His character was singularly pure and amiable; his attachments were strong and enduring; his tastes simple, and his desires moderate. He refused to profit by his powerful connections to enrich either himself or his family. He partook largely of the popular superstitions of the time, which were accordant with the later Platonism which he professed; and is said to have reappeared after death to his friend Michele Mercati, according to promise, to assure him of the immortality of the soul.

The Medicean Academy was extinguished by the invasion of Charles VIII.; but Ficinus had disseminated his influence and renown through the chair of philosophy in the University of Florence, to which he had been appointed by the Cardinal di Medici, afterwards Leo X. Here he acquired many distinguished pupils and friends, among them Giovanni Pico di Mirandola, Cavalcanto, Politian, etc. Enthusiasts came from the depths of Germany to profit by his instructions. Reuchlin regarded him with reverence, and among other illustrious admirers he numbered Matthias Corvinus, the accomplished king of Hungary, and pope Sixtus IV.

The numerous productions of Ficinus are enumerated by Moreri, and a more correct list is given in the *Bibliographie Universelle*. A life of him was written by Domenico Mellini, but it was never published, and it disappeared. Another life, composed by Giovanni Corsi in 1506, was published by Bandini (Pisa, 1771). The best account of the philosophy of Ficinus is given by Böhle, *Geschichte der Philosophie*; but the following authorities may be consulted: Schellhorn, *Amanitatis Lit.* tom. i.; Nicéron, *Mém. des Hommes Illustres*; Negri,

Ital.* tom. vi, lib. ii, c. ii, § xix-xxi; Brucker, *Hist. Crit. Phil.* per. iii, pt. i, lib. i, c. ii, § iii; Roscoe, *Life of Lorenzo di Medici*; Hallam, *Hist. Lit.* i, ch. iii, § 85-7, 115. (G. F. H.)

**Fiddes**, RICHARD, a clergyman of the Church of England, and author of several works marked by industry and research rather than talent, was born at Hunmanby, Yorkshire, in 1671. He took his bachelor's degree at University College, Oxford, in 1693. He was made rector of Halsham in 1694, but, losing his health, he devoted himself to authorship. Among his works are, *A Body of Divinity* (London, 1718-20, 2 vols. fol.);—*Fifty-two practical Discourses* (London, 1714, 3 vols. 8vo);—*Life of Cardinal Wolsey* (London, 1724, fol.);—*General Treatise on Morality* (London, 1724, 8vo). He died at Putney in 1725. Knight, in his *Life of Erasmus* (Introd. p. 15 sq.), accuses Fiddes of being at heart a Romanist. Knight accounts for Fiddes's speaking irreverently of Erasmus "probably because he had by his writings favored the Reformation. Dr. Fiddes censures the Reformation; and, to give it the more home strokes, goes to the very root of it, and does all he can to evince the unjustifiable grounds it proceeded upon, ridicules the instruments of it, and would insinuate that there was a change made for the worse, and therefore palliates some of the most absurd doctrines of the Church of Rome, which were happily thrown off at the Reformation." He afterwards goes further, asserting, among other particulars, that Fiddes had "most partially, and indeed scandalously, reflected upon the opening of the Reformation, laying on the grossest colors to hide the deformities of Popery." He then proceeds "to give the true rise and occasion of writing his *Life of Wolsey*," which he declares to have been at the solicitation of the late bishop Atterbury, on occasion of the dispute in which he was then engaged with archbishop Wake.—*New General Biog.* Dict. v, § 323.

**Fidejussores**, sureties, a title borrowed from the Roman law, and employed by Augustine to represent the office of sponsor. Baptism at an early period was considered in the light of a contract; and as many of the leaders in the early Church had, before their conversion, been engaged in the interpretation or administration of law, it was natural for them to use a term which they had been accustomed to employ in civil transactions. See SPONSORS.

**Fideles**. See FAITHFUL.

**Fidélis**, St., properly MARCUS ROY, was born at Sigmaringen in 1577. He studied law, and in 1604-10 visited the principal cities of Europe, but on his return he quitted his profession, and entered the order of the Capuchins under the name of Fidélis. After studying theology in the convents of Constance and Frauenfeld, he was ordained, and in 1621 obtained charge of Feldkirch, in Vorarlberg, Tyrol. Here he labored with great success, trying to re-establish the sway of the Roman Church among the Grisons. When Austria afterwards attempted to put down Protestantism by force of arms, Fidélis was sent by the pope as a member of the Propaganda, and the ruffian general Baldiron, with his dragoons, travelled from town to town exterminating those who refused to obey. But the peasants rose, defeated Baldiron, and only spared his life upon his taking the oath not to bear arms against them any more. The promise was soon broken; but the peasants rose again, and during the insurrection, Fidélis, having fallen into the hands of a party of peasants, was put to death, April 24, 1622. He was canonized by Clement XIII.—Herzog, *Real-Encyclop.* iv, 403.

**Fidelium Missa**, *Mass of the Faithful*. Under the *Arcani Disciplina* (q. v.) the catechumens were not permitted to partake of the Lord's Supper with the

faithful (q. v.): they were allowed to join with them in worship only until the offertory. Then the deacon gave a signal to the catechumens to leave the church, saying *Ite, missa est*, "Depart, the assembly is dismissed." Hence arose the twofold *missa*, namely, the *missa catechumenorum* and the *missa fidelium*; the former meaning that portion of the public worship which was performed before the dismissal of the catechumens, and the latter that portion which was continued until the communicants went away.—Bingham, *Orig. Eccl.* bk. xiii, ch. i, § 3; bk. xv, ch. i, § 1; Far-*rar, Dictionary*, s. v. See MASS.

**Fief, Feod, Feud; Feudalism; Feudal System.** These terms relate to the peculiar organization of society in Western Europe during the Middle Ages, and specifically to institutions affecting real estate more profoundly than it has ever been affected by any others—institutions whose influence is still manifest in the language, doctrines, and procedure of law throughout Christendom.

A fief, feod, feud, or fee is an estate—and, primarily, an estate in land—held of a superior on condition of the faithful discharge of prescribed services, chiefly military. Feudalism denotes the essential character of the organization founded on the basis of such estates, and is frequently employed in a concrete sense to signify the organization itself and its accompaniments. The Feudal System is the name given to this organization, or to that body of institutions, political and social, established upon the military tenure of land which characterized the rising kingdoms of modern Europe. In the period of its incipient growth, in its maturity, and in its decline, the feudal system, like all other political arrangements, assumed diverse aspects, and assimilated to itself other coincident tendencies, but its identity may be discerned through all its manifold transformations. Its existence has been distributed by Sir Thomas Craig into four periods: I. From the barbarian invasions of the Roman empire to the reunion of the Frank monarchy under Dagobert I in 628; II. To the restoration of the Western empire in the person of Charlemagne in 800; III. To the accession of the Capetian dynasty in France, and of the Franconian line in Germany; IV. From the commencement of the 11th century to the gradual extinction of the polity at different times and in different degrees, in different countries. This division has not been universally accepted, and is open to many objections, but it may be of service. The culminating era of feudalism may be assigned to the times of the first crusade, and to the early ages of chivalry which constituted its bloom and expedited its decay.

An examination of the principles and phenomena of the feudal system will furnish all necessary information in regard to the other terms included in this title, so far as these illustrate the religious, moral, and social aspect of Europe during the period over which feudalism extends.

Under the feudal system the whole order of society rested directly on the tenure of land by military service. Territorial possessions were granted by the suzerain, or supreme lord, in consideration of prompt and gratuitous service in war, and participation in his deliberative and judicial courts. Lands were held of the principal lords, or tenants *in capite*, by the lesser barons, by similar obligations. By the like service, lands were held by vassors, knights, and squires. Even the lowest tenure of all, the peculiarly English tenure of socage, frank and villein, was of an analogous character, and secured the cultivation of the lord's domain, and the maintenance of himself, his family, and his retainers, in war and in peace. The system was strictly military in its nature—a uniform organization from the crown to the lowest landholder, establishing a regularly appointed army in scattered strongholds through every part of the country, to insure the support of the whole body politic in arms for the repression of do-

mestic insurrection and the repulsion of foreign attack.

Though such was the feudal system in its definite constitution, it did not, of course, begin in this closely articulated and rigorous form. It assumes much of this aspect even in the Lombard occupancy of Northern Italy in the 6th century; and its general outline may be imperfectly distinguished in the Ostrogothic kingdom of Theodoric (Sartorius, *Peuples d'Italie sous les Goths*, v, 61). But it had a simpler commencement, and both expanded and modified itself with the changing necessities of successive generations. It is in its rudimentary types, however, that its essential principles, and its singular adaptation to urgent contemporary needs, can be best detected. Inattention to its humbler beginnings has occasioned numerous controversies with regard to its origin, and rendered the information accessible on the subject often perplexed, contradictory, and uninteresting.

The vital germ of feudalism is contained in the act of homage—*hominagium, hominatum, hominagium, hominatium, hominatum*, etc.—the solemn formula by which a dependent professed himself *the man*, and faithful adherent of a superior, originally of his own selection, and always theoretically so ("Integrum et perfectum in se continet fidelitatem," *Libri Feudorum* ii, vii). The liegeman knelt down, placed his hands between the hands of his intended chief, and took upon himself the obligation of absolute *fidelity* in certain prescribed relations, so long as his superior performed the corresponding duties of protection and support. The contract was sealed with a kiss, and confirmed with the sanctions of religion (Galbert, *Vie de Charles-le-Bon, de Flandres*, ch. xii; Guizot, *Mém. pour servir*, etc., viii, 339-40). The profession of *fidelity* was ultimately expressed by the following declaration in the presence of the baronial court: "*Devenio homo vester de tenemento quod de vobis teneo, et fidem vobis portabo contra omnes gentes, salva fide debita Domino Regi et hereditibus suis*" (Bracton, ii, xxxv, 8; *Libb. Feud.* ii, x). With this declaration should certainly be compared the statement of Procopius in regard to the ancient usage under the Roman empire (*De Bello Vandal.* ii, xviii, vol. i, p. 491).

Homage, then, was the pledge of true and loyal service to a superior—liege faith and liege obedience—given in consideration of defence and maintenance promised by the baron (*man, par excellence* "baronem *ingenitum*," a free man. *Lex Satic.* xxxi; see Du Cange, *Gloss. Med. et Inf. Latin.* tit. *Baro*, who omits in his classical authorities for the word, Petron. *Satyr.* liii). One man voluntarily became the man of another, and that other became the chief, leader, adviser, patron, and protector of his homager. The vassal originally had, and long retained, the right of formally renouncing the reciprocal obligations contracted by the process of *diffidatio*, or defiance. By carrying this relation of perfect trust and faithful dependence through all gradations of society till it reached the head of the tribe or nation, the whole fiefal hierarchy was constructed, and all the members of the associated body were linked together in strict military union and subordination.

The principal object of this close correlation of the constituents of society was to maintain the population in a constant state of preparation for war, "with its captains over tens, and its captains over fifties, and its captains over hundreds, and its captains over thousands." For this purpose the lord granted to his liegeman a definite quantity of land, to be held on condition of rendering a definite amount of service in the wars and other affairs of his chief. In this way, every man within the feudal circle was professed the *faithful* follower of some lord—except the chief lord of all—the suzerain; and every piece of land was held *in fee* of some feudal superior. Hence arose the doctrine that the eminent domain of the whole realm belonged to the king, and that all honor, authority, and ownership of

the soil descended from him. Hence, too, the maxim of the English law, *nulla terra sine domino*—no estate in land without its lord. But these deductions were not drawn by the companions of Ataulph the Visigoth, of Clovis the Frank, or of Alboin the Lombard.

The principle of homage and the principle of the military tenure of land are not necessarily, though they are usually connected. They have existed separately, but they coalesced in the Middle Ages, and engendered by their conjunction what is so familiar under the name of the Feudal System.

When society was disintegrated by internal discord, misery, and both civil and foreign war; when it was constantly assailed by new hordes of barbarians; when life and property, the fruits of industry and tranquillity, were continually imperilled by the hazards of the times, the weakness of the government, and the exactions of imperial officials; when there was no longer any *faith* between man and man, any honesty of dealing, any security or protection against violent or insidious attacks (all which phenomena characterized the declining age of the Western empire and the ensuing centuries, Lactant. *Div. Inst.* vii, xv; Salvian. *De Gubernat. Dei*, iv, v-vi, et *passim*), the social ties which bind men together snapped like flax in the fire, and the social organism rotted into incoherent atoms, which were totally deprived of old mutual attractions, and of capacity for continued combination in the ancient forms. In order that men might live together—and together they must live in order to live at all in such times—it was necessary to provide mutual support against aggression, and to establish entire fidelity at least between individual men, so that conjoint resistance might be obtained by reliance on reciprocal support. These wants were satisfied by the feudal relation, which, commencing with the elements of society, reunited them, separately man to man, under pledges of mutual trust, fidelity, and dependence. It provided also for the defence of the soil and the fruits of the soil, nearly the sole productions of such disordered times, by resisting any attack upon the community or its members (Salvian. *Ibid.* v, viii). Feudalism thus supplied the means of reconstructing society from its very foundations, and of restoring coherence and some degree of security to distracted and dissociated populations. Of course, the scheme was cradled in weakness and imperfection, and grew, through many changes of feature and fluctuations of fortune, into perfect symmetry of form. Of course, long and anxious generations were required to permit the confluence and full development of arrangements at first local and obscure. And of course, too, the scheme expanded and became more systematic among an intrusive band of foreign warriors, settled in the midst of a larger and more intelligent population, and menaced from without by new intruders, and it developed itself still further and more predominantly as new necessities, new temptations, and new opportunities arose.

This organization of society, with the corresponding tenure of land, is so essential to the maintenance of any degree of social order or public safety in certain conditions of society, that it has presented itself, in some form or other, in analogous circumstances, in widely separated ages and countries. So frequent and so striking is this recurrence, that it suggested to Sir Walter Scott in 1789 an essay, in which he undertook to prove that the feudal system "proceeds upon principles common to all nations when placed in a certain situation." Sir Walter was delighted in his old age by finding this view illustrated and enforced in colonel Tod's *History of Rajahstan* (Lockhart, *Life of Scott*, ch. vi). It contains a considerable amount of truth, but is far from expressing the whole truth.

There are distinct indications of something very like feudalism in ancient Egypt. Approximations to it are found in the early history of China, India, and Persia. Analogies of the same sort may be discovered among

the Jews in their early occupation of the Holy Land. They may be suspected in the Spartan constitution; they are very evident in the institutions of Macedonia. The principles of feudalism are involved in Plato's ideal state (*De Legg.*). The relation of patron and client at Rome was essentially feudal. A semi-feudal organization was adopted by the Saracens in Spain, and exhibited by the Timariots, or mounted militia, among the Ottoman Turks. It may still be detected among the warlike tribes of Afghanistan, and among the Mongolian tributaries of the Chinese empire. Humboldt recognised it among the Guanches of Teneriffe, and among some of the South-Sea Islanders (*Personal Narrative*, ch. ii). Other instances might be noted. All show how some arrangement of the kind is inspired or necessitated by appropriate social requirements; they explain the facility with which feudalism was adopted, and its vitality when adopted; but they do not interpret its special forms in mediæval Europe, nor supply any testimony to the historical origin of the feudal system.

In regard to this origin a wide divergence of opinion has existed. Montesquieu, Guizot, and the generality of recent writers refer feudalism to the voluntary followers and companions—*comites*—of the Germanic chieftains, who invaded the Roman empire in the 5th and succeeding centuries; but it was never found among these Northern races in their original abodes. Some juridical antiquaries of the 16th century traced it to the *patronatus* and *clientele* of ancient Rome; but these resembled much more nearly the clans of the Scotch Highlands and the septa of Ireland. The better opinion appears to be that the principles and general framework of the system were of later Roman origin, whatever modifications and developments they may have received in the Teutonic kingdoms. This is the view espoused by Franciscus Balduinus (*ad Leges Romulæ*, apud Heineccii *Jurispr. Rom. et Att.* i, 50), the profound but inconstant jurist of the 16th century. It was entertained by his rival, the greater jurist Cujacius, and favored by Camden in his *Britannia*, and by Du Cange in his wondrous *Latin Glossary*. It has been reaffirmed, with suitable rectifications, by Sir Francis Palgrave, Lehuéron, Ozanam, and a few recent students of mediæval archaeology. This view does not conflict with the distinct acknowledgment of Teutonic influences in animating, sustaining, and moulding the fœdal elements.

It is impossible to introduce here either the arguments or the evidences by which this conclusion may be confirmed; but it is scarcely necessary to do more than examine the titles *Beneficiarius*, *Englytenis*, *Militis Limitanei*, *Lati*, *Coloni*, *Adscriptitii*, *Inquilini*, in the *Corpus Juris Civilis*, and the same titles, with the addition of *Commendatio*, *Feudum*, and its derivatives, in Du Cange, in order to be assured of its substantial correctness. It may be expedient to corroborate this position by citing the earliest distinct notice in a Latin author of such an organization: "*Sola, que de hostibus capta sunt, limitaneis ducibus et militibus donavit, ita ut eorum ita essent, si heredes illorum militarent, nec unquam ad privatos pertinerent; illi, ceteris attentis eos militarent, si etiam sua rura defendere vellent*" (Lampriid. *Alex. Severus*, c. lviii; *Cod. Theod.* vii, xv, ii; *Novell. Theod.* xxxiv; *Cod. Just.* xi, lx [lix], 3; Böcking, *Notit. Dign.* i, 292; ii, 168\*). To this may be added a significant exposition of the manner in which like arrangements sprung up in the interior of the Roman empire. . . . "Tradunt se ad tenendum protogendunque majoribus, dedititios se divitum faciunt, et quasi in jus eorum ditonenque transcendunt: nec tamen grave hoc aut indignum arbitror, immo potius gratulari hanc potentium magnitudinem quibus se pauperes debent; si patrocinia ista non vellent, si quod se humiles d'cunt defendere, humanitati tribuerent, non cupiditati" (Salvianus, *De Gubernat. Dei*, v, viii). The class technically designated *dedititii* ulti-

mately merged into serfdom, it is true, but only by Justinian's edict of 530 (*Cod. vii, v*); and the term is plainly metaphorical in Salavian.

Wherever the Teutonic hordes passed the frontiers of the Roman empire, they found the presence or the memory of the *Milites Limitanei*, whose constitution, traceable beyond the reign of Augustus, accorded with all the essential characteristics of undeveloped feudalism. These military borderers were, indeed, of kindred blood and race, and when they were supplanted or overlaid by new tribes, the institutions were retained, which had been designed as a protection against incursion. This was only the observance of the habitual policy of the barbarians in regard to the Roman civilization.

As has been already observed, the feudal scheme, like all other imperial forms, was contracted or extended, weakened or strengthened, according to the changes of fortune and social condition which checkered the agitated and anxious periods attending the overthrow of the Western empire. At times it was as much disguised and obscured, as largely recompounded with Teutonic associations, as was the ever-subsisting Roman jurisprudence during the same ages. But it survived in spirit and in outline, ready always to multiply its ramifications, and to attain such proportions as contemporaneous necessities might induce. It is thus that its existence and operation so frequently elude regard during the earlier centuries of its growth, and that its origin is so often referred to the late era when it became predominant and universal as the sole corrective of returning anarchy under the feeble successors of Charlemagne.

It is impracticable, within the space at command, to recount and explain the successive transformations of feudalism which culminated in the perfect type of the feudal system in the 9th, 10th, and 11th centuries. Its development accompanied and was due to the progressive dissolution and increasing inaptitude of the complex administrative organization of imperial Rome. A distinction of ages and a contradistinction of institutions have been suspected in the succession of the terms *munera*, *beneficia*, and *feuda*; and feudalism has been restricted to the period when the last of these designations prevailed. *Munera* is supposed to represent estates at will; *beneficia*, estates for life; and *feuda*, estates of inheritance. It has been assumed that feudalism could not properly be said to exist until benefices became hereditary. But the essence of feudalism does not reside in the duration of the estate, but in the nature, and especially in the obligation of the tenure. Moreover, the contrasted terms may be in some measure concurrent with, but they do not denote, such diversities of duration. *Munera* is a generic term applied to all honors, dignities, offices, and donations. There was no such clear line of demarcation, in meaning or in time, as Montesquien and others imagine, between estates for life and estates heritable. Such precision was entirely foreign to the habits and the dispositions of those troubled but practical ages. Life estates were conceded in Germany as late as 1378. The commencement of hereditary feuds is often referred to Hugh Capet, in 947. Montesquien assigns it to the reign of Charles the Bald, in 877. But such tenures are found under Louis le Debonnaire in 814; and in the form of *beneficia* they were customary under the Roman empire. Estates in perpetuity are mentioned under the name of *beneficia* as early as 759 (Ratpert, *Causa S. Galli*, § 2, *apud* Pertz, *Mon. Germ. Hist.* ii, 63; comp. S. Anskarii *Vita S. Willehadi*, § 8; *Ibid.* p. 382). But, in order to ascribe a purely Germanic origin to feuds, *beneficia* and *feuda* have been represented as diverse institutions. They are used as convertible terms throughout the *Book of Feuds*. "*Feudum idem cum beneficio*," says Du Cange (s. v., p. 258, col. 1). King Alfonso the Wise of Castile, declares in *Las Siete Partidas*: "*Feudo es bene-*

*fechio que da el señor a algun home, porque se torna su vasallo, et le fece homenage de serle leal. E tomo este nombre de fe que debe siempre guardar el vasallo al señor.*"

The term *feudum* is a barbarous, and probably hybrid compound, whose first employment Illallam assigns to a constitution of Robert I of France in 1008, though it is found in a constitution, of somewhat doubtful authenticity, of Charles the Fat, in 884. Were there no fiefs antecedent to the introduction of this name? If there were, then *beneficia* are fiefs. If there were not, then fiefs are the same things as *beneficia*. The confusion has proceeded from the fantastic derivation of *Feod*, from the supposed Teutonic word *Fe*, represented by the Anglo-Saxon *Fea*, *Froh*, *fee*, and the Scandinavian *od*, *odh*, property. Unfortunately, feudalism was a late and very partial innovation among both Anglo-Saxons and Scandinavians, while the term *Feudum* springs up along the Rhine; and the Anglo-Saxon *Froh* is congenuous to the Latin *pecus*—*pecoris*—if not borrowed from it. The *fe* in *Fe-od*, the Spanish and Provençal *fe*, the modern French *foi*, the Scotch *fen*, are apparently nothing but contractions of the Latin *fide* or Italian *fide*. "*Feudum, credo, a fide, quia vox ex Italia in Germaniam venit. Et ante seculum xii feuda in Germania et apud omnes Francos beneficia appellabantur*" (Leibnitz, *Collect. Etymolog. Opp.* ed. Dutens, tom. vi, pt. ii, p. 58, 59). "*Nulla autem investitura debet ei fieri, qui fidelitatem fovere recusat, quam a fidelitate feudum dicatur vel a fide*" (*Libb. Feud.* ii, iii, 3; compare vii). This derivation of the term *Feod* is singularly corroborated by the use of the word "*truage*" in Sir Thomas Malory's *Morte d'Arthur*: "And thus Sir Marhans every day sent unto king Marke for to pay the *truage* which was behind of seven years, or else to find a knight to fight with him for the *truage*" (pt. ii, ch. iv, *Romance of Sir Tristrem*).

It is indubitable that feudal tenures long existed in the midst of Roman *fundis* and *possessionses*, and of Germanic allodial estates; it is also unquestionable that these were gradually absorbed or transmuted into feudal tenements, for the conversion of allodial into feudal holdings is illustrated by ample documentary evidence; and it is also certain that this feudalization of the land was not completed till the times when the word *feuda* comes into use. But this will not justify the juridical distinctions which have been proposed, nor sanction the alleged derivation of *Feod*, nor sustain the Germanic origination of the tenure. The designation of *Feod* may well have been devised as a counterpart to *alodh*; but the generally received etymology of *alodh* is very unreliable, and strong arguments may be adduced for referring it to the same source as the common English word *lot*. This question, however, cannot be examined here. (Compare Kemble, *The Saxons in England*, bk. i, ch. iv, vol. i, p. 90, 91, with Procopius, *De Bell. Vandal.* i, v, in regard to the κλιποι βασιλικων.)

In the 10th and 11th centuries the feudal system acquired its widest extension, assumed its full, symmetrical form, and engrossed nearly all the functions of government, judicature, police, war, and industrial organization. It constrained and overshadowed the attenuated framework of the Roman administrative constitution (which, however, coexisted with it), and adapted itself to it by making the king the feudal suzerain of the nation—the emperor, the supreme temporal head of Christendom. Everything accepted a feudal complexion and a feudal structure—"nothing but did sniffer a sea-change." The process of government, the public revenue, the offices of state, the modes of jurisdiction, the command in war, the ecclesiastical constitution, the municipal arrangements, the guilds and corporations of arts and trades, the occupations of rural, mining, and other industry, were all feudalized. Everything rested on homage, fealty, and the military tenure of land, or was assimilated to the forms springing from that basis. As in the Russian empire, all

office or authority is invested with a military character and designation, so everything under the feudal system adopted a feudal type. To this cause we must attribute the ecclesiastical baronies which arose during the period, and also the priestly warriors, the fighting abbots, and the knightly bishops, who inspire such surprise and disgust during the Middle Ages. The Roman Church, with the pope at its head, was the spiritual empire, rivalling and co-ordinate with the secular empire of Germany, and contending for a loftier supremacy. The ecclesiastical organization became baronial and feudal throughout all its provinces and dioceses, as the counterpart and counterpoise of the feudal kingdoms, and duchies, and counties, under the acknowledged but disregarded suzerainty of the holy Roman empire. No other scheme, no idea inconsistent with the prevailing scheme, could be entertained among populations saturated with feudalism, and environed with its universal atmosphere. How thoroughly the Church had accepted the general feudalization is shown by an allocution of pope Innocent II to the Lateran Council, April 20, 1139: "The pontifical throne is the source of all ecclesiastical authority and dignity; so that every such office or dignity is to be received at the hands of the Roman pontiff as a *feoff of the Holy See, without which enjoyment no such office can be lawfully exercised or enjoyed*" (quoted by Greenwood, *Cathedra Petri*, bk. xii, ch. i).

By this process, infinitely diversified, though ever essentially the same, society was slowly reconstructed and re-edified through long generations of anarchy, wretchedness, and foreign peril from new swarms of ruthless assailants. The elements and forces of a new civilization were thus collected and harmonized, and were recombined into a uniform and coherent system on the simple basis of fidelity between man and man. Ancient paganism had died out, and universal scepticism had supervened before the new religious faith which was to regenerate the world had been accepted by minds still largely tainted with heathenism. All human trust had been betrayed and dissipated; all social ligaments had been corroded or ruptured; all dependence upon government, law, and public force had been deceived and outraged; and yet—consentaneously with the introduction of a new religious creed, and of fresh races to maintain that creed (*Salvian, De Gubernat. Dei; Augustine, Civitas Dei*)—the seeds of a renovated social union were sprouting in the dust and ashes of the dissolving empire, and grew up in the midst of violence and disorder:

"Per damna, per cales, ab ipso  
Ducit opes animamque ferro."

This new growth, from its earliest development, protected life and property, rendered industry possible once more, sustained or revived languishing hope, defended the shattered relics of the old civilization from the ruin of interminable swarms of ever-increasing barbarians, disciplined communities in habits of obedience and order, renewed the culture of the soil, reorganized the nations, and inaugurated a new series of the ages by introducing loyal faith between lord and vassal, and the honorable protection of the weak by the powerful. The political renovation thus ran parallel with the spiritual transmutation, deriving life and encouragement from it even when resisting its influence, and confirming its dominion even while contaminating its morality by the infection of worldly interests and passions. Though the feudal order never realized in practice the ideal which its function suggests—what human institution has ever done this?—though sore blemishes at all times stained its actual manifestations, yet the strong but rare eulogies bestowed upon it are fully justified by the inestimable services which it rendered to the nations during the millennial agony of humanity. High, indeed, must be the merits which provoke a concert of praise from such antipodes as Montesquieu and De Maistre, and

make the former proclaim his conviction that "the feudal system was the best-constituted government that ever existed upon earth;" and the latter declare that "feudalism was the most perfect institution that the universe has seen." The crinations which have been so bitterly, and not altogether unjustly, directed against the feudal spirit, are applicable to its decline, when it had rendered its incomparable service to mankind, and had become an embarrassment and a tyranny amid the enlarging industry, the augmented intelligence, and the ampler aspirations which its long duration had cherished and trained.

Montesquieu boasted of closing his discussion of feudalism where others commenced, yet he mistook or overlooked its true antecedents and characteristics. From this notice nearly everything has been excluded which is repeated in familiar or accessible authors; nor has the associated topic of serfs and serfdom been noticed, as it presents an occasion for extended and independent consideration.

From Blackstone, Robertson, Hallam, etc., may be learned the habitual organization of nations during the maturity of the feudal system. From authors of a like character may be pleasantly ascertained the romantic and other aspects of those memorable developments of feudalism, the Crusades and Chivalry—"a gilded halo hovering round decay." From similar sources may be drawn all needful information in regard to the various species of feuds or fees, and to what are called feudal incidents. These incidents attached to every fief, and consisted of, 1. Reliefs; 2. Fines on alienation; 3. Escheats; 4. Aids; 5. Wardship; 6. Marriage (Hallam, *Hist. Middle Ages*, ch. ii, pt. i; Blackstone, *Comm.* bk. ii, ch. v; Robert (du Var), *Hist. de la Classe Ouvrière*, liv. iv, ch. vi; liv. v, ch. i-iv). These *servitia*, or burdens, varied somewhat at different times and in different countries; they were incidental rather than essential to feudalism, and most of them accompanied the early Roman *clientela*. Their exposition, therefore, is not indispensable in a summary appreciation of the general characteristics and operation of the feudal system.

*Authorities.*—To give a list of authorities for such topics as Fief, Feudalism, Feudal System, would require the enumeration of volumes sufficient for an extensive library. It may suffice to note here some of the principal works connected with the subject, a few of which have been already referred to, and most of which have never been seen by the writer:—*Codex Theodosianus* (ed. Gothofredus); *Corpus Juris Civilis* (ed. Gothofredus); *Basilica* (ed. Hembach); *Baluzii Capitularia*—a more complete and satisfactory edition is found in Pertz, *Monumenta Hist. Germ.*; *Libri Feudorum*, cum commentatione J. Cujacii; Foncher, *Assizes de Jerusalem*; Bengnot, *Assizes de Jerusalem* (very instructive extracts from this text are given in Cantu, *Hist. Universelle*, vol. ix, append. A); Lespeyres, *Entstehung u. älteste Bearbeitung der Libb. Feudorum*; Marculfi *Formularie*; Beaumanoir, *Coustumes de Beauvoisis*; Honard, *Coutumes Anglo-Normandes*; Loysel, *Institutions Coutumières*; Alteserra, *Origines Feudorum*; Caravita, *Praelectiones Feodales*; Cragius, *De Feudis*; Dalrymple, *History of Feudal Property*; Boehmer, *Principia Juris Feudorum*; Salvaing, *L'Usage des Fiefs*; Brussel, *Usage Général des Fiefs*; Jenichen, *Thesaurus Juris Feudalis*; Turzole, *Traité de la Seigneurie Féodale Universelle*; Guyot, *Des Fiefs*; *Institutions Féodales*; Winspeare, *Abusi Feudali*; Gebauer, *Origines Feodi*; Le Févre, *De l'Origine des Fiefs*; De Gaillardon, *Scènes de la Vie Féodale au XIII<sup>e</sup> Siècle*; Galland, *Traité du Franc-Alléu*; La Boulaye, *Hist. du Droit Foncier en Occident*; Lehuérou, *Institutions Mirroringiennes et Carolingiennes*; Böcking, *Notitia Dignitatum Utriusque Imperii*; Meyer, *Esprit, Origine, et Progrès des Institutions Judiciaires*; Allen, *On the Royal Prerogative*; Spence, *Inquiry into the Origin of the Laws and Institutions of Modern Europe*; *Equitable Jurisprudence of the Court of Chancery*, vol. i;

Savigny, *Hist. du Droit Romain*; Mortreuil, *Hist. du Droit Byzantin*; Du Cange, *Glossarium Med. et Inf. Latinitatis*; Du Bos, *Hist. Crit. de la Monarchie Française*; Boulainvilliers, *Mem. Hist. sur l'Etat de France*; Mably, *Observations sur l'Histoire de France*; Made-moiselle De Lézardière, *Théorie des lois politiques de la Monarchie Française*; Montlosier, *De la Monarchie Française*; Montesquieu, *Esprit des Lois*, liv. xxx, xxxi; Guizot, *Hist. de la Civilisation en Europe*; *Hist. de la Gr. en France*; Ozanam, *La Civilisation ou Cinquième Siècle*; *Etudes Germaniques*; Blackstone, *Commentaries on the Laws of England*; Robertson, *Life of the Emperor Charles V*; Lyttelton, *History of Henry II, King of England*; Hallam, *History of the Middle Ages*; and *Supplement*; Kemble, *The Saxons in England*; Palgrave, *The English Commonwealth*; *Hist. of Normandy and England*; St. Palaye, *Histoire de la Chevalerie*; St. Marie, *Diss. Hist. sur la Chevalerie*. (G. F. II.)

**Field** (usually שָׂדֵה, *sadeh'* [poetic שָׂדֵי, *saday'*], ἄγρος; but occasionally שְׂדֵי, *s'rets*, land [Chald. ܒܪ, *bar*, open country], χώρα; חוּץ, *chuts*, out-doors; חֵלְקֵה, *chelk'h'*, a portion or plot, χωρίον; שְׂדֵי, *shelemah'*, a cultivated field, according to Gesenius and Fürst from the context, in the plur. Deut. xxxii, 32; 2 Kings xxiii, 4; Isa. xvi, 8; Jer. xxxi, 40; IIab. iii, 17; also שָׂדֵי, *shad'eb'*, an arable field, in the plur. Jer. xxxix, 10). The Hebrew *sadeh* is not adequately represented by our "field;" the two words agree in describing cultivated land, but they differ in point of extent, the *sadeh* being specifically applied to what is unenclosed, while the opposite notion of enclosure is involved in the word *field* (compare DESERT). The essence of the Hebrew word has been variously taken to lie in each of these notions, Gesenius (*Thesaurus*, p. 1321) giving it the sense of freedom, Stanley (*Palest.* p. 481) that of smoothness, comparing *arum* from *arare*. On the one hand *sadeh* is applied to any cultivated ground, whether pasture (Gen. xxix, 2; xxxi, 4; xxxiv, 7; Exod. ix, 3), tillage (Gen. xxxvii, 7; xlvii, 24; Ruth ii, 2, 3; Job xxiv, 6; Jer. xxvi, 18; Mic. iii, 12), woodland (1 Sam. xiv, 25; A. V. "ground"; Psa. cxxxii, 6), or mountain-top (Judg. ix, 32, 36; 2 Sam. i, 21); and in some instances in marked opposition to the neighboring wilderness, as in the instance of Jacob settling in the field of Shechem (Gen. xxxiii, 19), the field of Moab (Gen. xxxvi, 35; Numb. xxi, 20, A. V. "country"; Ruth i, 1), and the vale of Siddim, i. e. of the cultivated fields, which formed the oasis of the Pentapolis (Gen. xiv, 3, 8), though a different sense has been given to the name (by Gesenius, *Thesaur.* p. 1321). On the other hand, the *sadeh* is frequently contrasted with what is enclosed, whether a vineyard (Exod. xxii, 5; Lev. xxv, 3, 4; Numb. xvi, 14; xx, 17; compare Numb. xxii, 23, "the ass went into the field," with ver. 24, "a path of the vineyards, a wall being on this side and a wall on that side"), a garden (the very name of which, גַּן, implies enclosure), or a walled town (Deut. xxviii, 3, 16): unvalled villages or scattered houses ranked in the eye of the law as fields (Lev. xxv, 31), and hence the expression εἰς τοὺς ἀγρούς = houses in the fields (Vulg. in villas; Mark vi, 36, 36). In many passages the term implies what is remote from a house (Gen. iv, 8; xxiv, 63; Deut. xxii, 25) or settled habitation, as in the case of Esau (Gen. xxv, 27; the Sept., however, refers it to his character, ἀγροικος); this is more fully expressed by שְׂדֵי הַבָּיִת, "the open field" (Lev. xiv, 7, 53; xvii, 5; Numb. xix, 16; 2 Sam. xi, 11), with which is naturally coupled the notion of exposure and desertion (Jer. ix, 22; Ezek. xvi, 5; xxxii, 4; xxxiii, 27; xxxix, 5). See MEADOW.

The separate plots of ground were marked off by stones, which might easily be removed (Deut. xix, 14; xxvii, 17; comp. Job xxiv, 2; Prov. xxii, 28; xxxiii, 10); the absence of fences rendered the fields

liable to damage from straying cattle (Exod. xxii, 5) or fire (ver. 6; 2 Sam. xiv, 30); hence the necessity of constantly watching flocks and herds, the people so employed being in the present day named *Natur* (Wortabst, *Syria*, i, 293). A certain amount of protection was gained by sowing the tallest and strongest of the grain crops on the outside: "spelt" appears to have been most commonly used for this purpose (Isa. xxviii, 25, as in the margin). From the absence of enclosures, cultivated land of any size might be termed a field, whether it were a piece of ground of limited area (Gen. xxiii, 13, 17; Isa. v, 8), a man's whole inheritance (Lev. xxvii, 16 sq.; Ruth iv, 5; Jer. xxxii, 9, 25; Prov. xxvii, 26; xxxi, 16), the *ager publicus* of a town (Gen. xli, 48; Neh. xii, 29), as distinct, however, from the ground immediately adjacent to the walls of the Levitical cities, which was called שְׂדֵי הַבְּרִיחַ (A. V. "suburbs"), and was deemed an appendage of the town itself (Josh. xxi, 11, 12), or, lastly, the territory of a people (Gen. xiv, 7; xxxii, 3; xxxvi, 35; Numb. xxi, 20; Ruth i, 6; iv, 3; 1 Sam. vi, 1; xxvii, 7, 11). In 1 Sam. xxvii, 5, "a town in the field" (Auth. Vers. "country") was a provincial town as distinct from the royal city. A plot of ground separated from a larger one was termed שְׂדֵי הַבְּרִיחַ (Gen. xxxiii, 19; Ruth ii, 3; 1 Chron. xi, 13), or simply שְׂדֵי הַבְּרִיחַ (2 Sam. xiv, 30; xxiii, 12; comp. 2 Sam. xix, 29). Fields occasionally received names after remarkable events, as Helkath-Hazzurim, the *field of the strong men*, or possibly of swords (2 Sam. ii, 16), or from the use to which they may have been applied (2 Kings xviii, 17; Isa. vii, 3; Matt. xxvii, 7). See LAND.

It should be observed that the expressions "fruitful field" (Isa. x, 18; xxix, 17; xxxii, 15, 16) and "plentiful field" (Isa. xvi, 10; Jer. xlviii, 35) are not connected with *sadeh*, but with *karmel*, meaning a park or well-kept wood, as distinct from a wilder ess or a forest. The same term occurs in 2 Kings xix, 23, and Isa. xxxvii, 24 (A. Vers. "Carmel"); Isa. x, 18 ("forest," and Jer. iv, 26 ("fruitful place"). See CARMEL. Distinct from this is the expression in Ezek. xvii, 5, שְׂדֵי הַבְּרִיחַ (A. V. "fruitful field"), which means a field suited for planting suckers.—Smith, s. v. See AGRICULTURE.

**Field, David Dudley**, D.D., a Congregational minister, was born in East Guilford, Conn., May 20, 1781, prepared for college under Dr. John Elliott, of Guilford, and graduated at Yale in 1802. After studying theology under Dr. Backus, he was licensed to preach in 1803, and was installed pastor at East Haddam in 1804. He filled this charge with great diligence and success until 1818, and in 1819 accepted a call to Stockbridge, Mass. After eighteen years' pastoral service at Stockbridge, he was called in 1837 to his old parish at Haddam. In 1848 he travelled in Europe. In 1851 he gave up his charge at Haddam, and spent the remainder of his life in quiet retirement at Stockbridge, where he died April 15, 1867. Dr. Field was a man of strong character. His mental powers were vigorous and comprehensive; his culture was at once thorough and varied. His duties as preacher and pastor were always filled with conscientious care; and his long pastorates, with the unusual ease of his return to his first charge after an absence of thirty-three years, sufficiently attest the confidence and affection of his parishioners. Of his ten children, six sons are now living, and all eminent as professional men; among them are Cyrus W. Field, the "father" of the Atlantic Telegraph, and Dr. H. M. Field, editor of *The New York Evangelist*. Besides a number of occasional sermons, Dr. Field published *History of Middlesex:—History of Berkshire:—Genealogy of the Braintree Family*.—Appleton's *Annual Cyclop.* 1867, p. 301.

**Field, Richard**, D.D., one of the best of the High-

Church writers of the Church of England, was born at Hampstead, Hertfordshire, in 1561, and was educated at Magdalen Hall, Oxford, where he lectured for seven years on logic and philosophy, and gained the reputation of a learned preacher and an acute disputant. He was afterwards reader of divinity at Lincoln's Inn, London, and rector of Burghleas in Hampshire. Here he refused the offer of St. Andrew's, in Holborn, London, a much more valuable living, that he might serve God and pursue his studies in a more retired situation. In 1598 queen Elizabeth made him one of her chaplains, and he formed a warm friendship with Richard Hooker, a man of kindred spirit. In 1604 he was made canon of Windsor, and in 1609 dean of Gloucester. "He was esteemed a perfect oracle in ecclesiastical learning. Divines, even of the first order, scarce ever went to him without loading themselves with questions. Fuller calls him 'that learned divine, whose memory smelleth like a field which the Lord hath blessed.' When king James heard him preach the first time, he said, 'This is a Field for God to dwell in.' His majesty retained so good an opinion of him that he designed to raise him to the bishopric of Oxford; but God was pleased, as Mr. Wood remarks, to prefer him for a better place, for, on the 21st of November, 1616, he died, leaving behind him a character equally great and amiable. His reputation rests securely on his great work, *The Book of the Church*, which was originally issued in 1606, and with a fifth book added in 1810. A new edition, printed for the "Ecl. Hist. Society," appeared at Cambridge, 1847-52 (4 vols. 8vo).—Hook, *Ecl. Biog.* v, 116; Middleton, *Ecl. Biog.* ii, 374.

**Field-preaching**, or preaching in the open air, "a plan adopted by reformers in every age, in order to propagate more extensively and effectually their peculiar sentiments among the great masses of the people. Christ and his apostles not only availed themselves of the privileges which the synagogues afforded of making known the 'Gospel of the Kingdom' to those who assembled therein from Sabbath to Sabbath, they also proclaimed the doctrines and precepts of the new dispensation on the highways and hedges, on the seashore and on the barren glade, on the mountain's side and in the streets of the teeming city. Wherever men were found, and under whatever circumstances they were placed, if their ears could be reached, there the voice of the first teachers of Christianity was heard, warning sinners of coming danger, and pointing out the only way of escape—the only medium of access unto God. So was it, too, with other reformers, whose labors our limits forbid our noticing, as we desire to add a few words on the field-preaching of Whitefield and Wesley. The practice was commenced by the former, and that without any misgivings as to the 'irregularity' of such a strange proceeding; whereas the latter, though a man of more highly cultivated intellect, and who, on that account, ought to have risen superior to the prejudices of his order, was, with much reluctance, induced to follow in the course so heroically opened up by the eloquent Whitefield. But having once commenced, there was no drawing back; he had taken to the field, and no man's face or frown should cause him to retire. John Wesley was not a man of a weak and shrinking spirit, as his whole life testifies; but he was a man who proved himself on all occasions to be a good soldier of Jesus Christ. When Whitefield was refused the pulpits of the London and Bristol churches, and after he had been threatened by the chancellor of the diocese of the latter place with suspension and excommunication if he persisted in preaching in his diocese without a license, he resolved in his mind whether it might not be his duty to preach in the open air. Indeed, he had thought of this before he was refused permission to preach in the pulpits of the establishment, when he saw that thousands who sought to hear him could not gain admittance into the churches. He mentioned his thoughts to some friends, who

pronounced the idea to be a mad one; but now, he believed that in Bristol his duty in this respect was no longer doubtful. Moreover, many persons said to him, 'What need of going abroad? Have we not Indians enough at home? If you have a mind to convert Indians, there are colliers enough at Kingswood.' To these, therefore, he determined to preach the message of reconciliation. The colliers at Kingswood were without any means of religious instruction; they had no church in which to worship, no minister to teach them the duties of religion, or to pray with them; hence they were notorious for their brutality and wickedness, and in times of excitement were a terror to all around them. On February 17, 1739, Whitefield proceeded to Rose Green, Kingswood (his first field-pulpit), where he preached to as many as the novelty of the scene collected, which were about 200. 'The ice being now broke'—to use his own observation on this first open-air sermon—he determined to persevere in the same course. Accordingly, he visited Kingswood frequently, and every time he went there the number of his hearers increased; for, besides the colliers, thousands of all ranks flocked from Bristol and the neighborhood, and the congregation was sometimes computed at 20,000. With gladness and eagerness many of these despised outcasts, who had never been in a church in their lives, received the instruction of this eminent follower of him who '*went about doing good.*' 'The first discovery,' says he, 'of their being affected was to see the white gutters made by their tears, which plentifully fell down their black cheeks, as they came out of their coal-pits. . . . Sometimes, when 20,000 people were before me, I had not, in my own apprehension, a word to say, either to God (in prayer) or to them (by preaching). . . . The open firmament above me, the prospect of the adjacent fields, with the sight of thousands and thousands, some in coaches, some on horseback, and some on the trees, and at times all affected and drenched in tears together, to which sometimes was added the solemnity of the approaching evening, was almost too much for, and quite overcame me.' Whitefield was then requested to preach in a bowling-green in the city, and he complied. Many of the audience sneered to see a stripling with a gown mount a table on unconsecrated ground; for field-preaching, since common enough in England, was then unknown, and therefore obloquy was poured upon it. His engagements so increased that he sought the help of Mr. Wesley. Without delay Mr. Wesley proceeded to Bristol, and on his arrival was invited to preach in the open air. 'I could scarce reconcile myself at first,' says he, 'to this strange way of preaching in the fields, of which he (Whitefield) set me the example on the Sunday, having been all my life, till very lately, so tenacious of every point relating to decency and order that I should have thought the saving of souls a sin if it had not been done in a church.' However, on the following day, Mr. Wesley preached from a little eminence in an open ground adjoining the city to about 5000 people. In the days of Whitefield and the Wesleys field-preaching was not unfrequently attended with danger. Though they often met with a kind reception from the multitudes, yet at other times they experienced the rudest and most determined opposition, and often their lives were in imminent peril from the violence of an ignorant, depraved, and excited populace. In his *Earnest Appeal*, Mr. Wesley asks, 'Who is there among you, brethren, that is willing (examine your own hearts) even to save souls from death at this price? Would not you let a thousand souls perish rather than you would be the instrument of rescuing them thus? I do not speak now with regard to conscience, but to the inconveniences that must accompany it. Can you sustain them if you would? Can you bear the summer sun to beat upon your naked head? Can you suffer the wintry rain or wind, from whatever quarter it blows? Are

you able to stand in the open air, without any covering or defence, when God casteth abroad his snow like wool, or scattereth his hoar frost like ashes? And yet these are some of the smallest inconveniences which accompany field-preaching. Far beyond all these are the contradiction of sinners, the scoffs both of the great vulgar and the small; contempt and reproach of every kind; often more than verbal affronts—stupid, brutal violence, sometimes to the hazard of health, or limbs, or life. Brethren, do you envy us this honor? What, I pray you, would buy you to be a field-preacher? When Mr. Wesley had been accustomed to field-preaching for more than twenty years, he made the following remarks: 'One hour in Moorfields might convince any impartial man of the expediency of field-preaching. What building, except St. Paul's church, could contain such a congregation? and if it would, what human voice could have reached them there? By repeated observations, I find I can command thrice the number in the open air that I can under a roof. And who can say the time for field-preaching is over, while, 1. Greater numbers than ever attend; 2. The converting as well as the convincing power of God is eminently present with them?' One extract more, and this article must close. Mr. Wesley thus describes these open-air services: 'I cannot say I have ever seen a more awful sight than when, on Rose Green or the top of Hannan Mount, some thousands of people were calmly joined together in solemn waiting upon God, while

““They stood, and under open air adored  
The God who made both air, earth, heaven, and sky.””

And whether they were listening to his word with attention still as night, or were lifting up their voice in praise as the sound of many waters, many a time have I been constrained to say in my heart, "How dreadful is this place!" This, also, "is no other than the house of God! this is the gate of heaven!"' (See *Memoirs of Wesley*, by Coke, Southey, and Watson; also Jackson's *Centenary of Wesleyan Methodism*.) Having now once adopted this mode of imparting instruction to the neglected classes of the community, Mr. Wesley never abandoned it to the end of his life; and in a short time his brother Charles followed his example in the same self-denying labor of love, being urged thereto by the indefatigable Whitefield. Mr. Charles Wesley's first field-sermon was preached at Moorfields on June 24, 1739, his congregation amounting to about 1000, and in the evening of the same day he preached to multitudes on Kennington Common. A few weeks afterwards he preached to about 10,000 people in Moorfields; and for several years he followed with equal steps both his brother and Mr. Whitefield in laborious zeal and public usefulness. It is not to be supposed that Mr. Wesley had not preached in the open air till the time he was induced by Mr. Whitefield to do so at Bristol. He had done so in Georgia before Mr. Whitefield was ordained, but he had no intention of resuming the practice in England until compelled to do so by the necessities of the case. He says, "Wherever I was now desired to preach (in churches), salvation by faith was my only theme. . . . Things were in this posture when I was told I must preach no more in this, and this, and another church; the reason was usually added without reserve, "Because you preach such doctrine." . . . After a time I determined to do the same thing in England which I had often done in a warmer climate—to preach in the open air.' 'Be pleased to observe,' he adds, '1. That I was forbidden to preach in any church "for preaching such doctrine." 2. That I had no desire nor design to preach in the open air till after the prohibition. 3. That when I did, as it was no matter of choice, so neither of premeditation. There was no scheme at all previously formed which was to be supported thereby. 4. Field-preaching was therefore a sudden expedient—a thing submitted to rather than chosen; and therefore sub-

mitted to because I thought preaching even thus better than not preaching at all.' Field-preaching, or, as it was called, tent-preaching, that is, preaching from a tent, was common in Scotland on summer sacramental occasions up till a very recent period. The practice still survives in some parts of the Highlands. Thousands from neighboring parishes used to assemble on the brae or in the quiet hollow, and listen to the word of life. But unhallowed scenes sometimes occurred, of which Burns's *Holy Fair* is an exaggerated picture; and such gatherings have been discontinued. Of late, however, field-preaching has been resorted to for a different purpose—that of evangelization—so that the masses may be reached which have given up attendance at the house of God. Everywhere the result seems to be satisfactory, and the practice is every year more and more extensively followed in Great Britain."—Eadie, *Ecol. Cyclop.* s. v. See CAMP-MEETING.

**Fifth-monarchy-men**, a sect of Millenarians which sprung up in the time of Cromwell, and held that the millennial reign of Christ on earth, styled by them the fifth great monarchy, reckoned in succession with the Assyrian, Persian, Grecian, and Roman ones, was then to begin. Under the lead of Thomas Venner, a wine-cooper, they formed a plot to inaugurate their kingdom of the saints on April 9th, 1657, but were foiled by the vigilance of Thurloe, the secretary of state, and a number of the conspirators, arrested with arms in their hands, were sent to the Tower, though the penalty of the law, death, was not inflicted on any of them. On the 6th of January, 1661, some fifty or sixty of these madmen, led by the same Venner, rose in insurrection, if we may term it such, against the government of Charles II, proclaimed "king Jesus," attacked the police force, and, after concealing themselves for two days in Caen Wood, near Hliligate, returned to encounter the train-bands, insanely believing that neither bullet nor steel could harm them. Most of them, refusing quarter, were slain outright; but Venner and sixteen others were taken, tried, and executed.—Knight, *Popular Hist. of England*, iv, 206, 251; *Pictorial Hist. of England*, iii, 421, 679 (Chambers's ed.); Burnet, *Hist. of His Own Times*, vol. i, bk. ii; Baxter, *Hist. of the Church of England*, p. 606, 611; Neal, *Hist. of the Puritans* (London), iv, 186. (J. W. M.)

**Fig**, The usual Hebrew word for this is תְּמָרָה (*te'mah'*, of uncertain etymology), which is universally translated *fig* (N. T. *σίκκιον*) and *fig-tree* (N. T. *σικκίη*) in both ancient and modern versions, and no doubt correctly so. It has from the earliest times been a highly esteemed fruit in the East, and its present as well as ancient Arabic name is *tin*. When figs are spoken of as distinguished from the fig-tree, the masc. plur. form תְּמָרִים is used (see Jer. viii, 13). The other words rendered *fig* in the Auth. Vers. are: *פַּג* (*pag*, "green fig," Cant. ii, 13; *δωριζος*, "untimely fig," Rev. vi, 13), a designation of the late fig, which, being unripe at the proper time for gathering, frequently hangs on the tree over winter (comp. also the name BETH-PHAGE); and *בִּכְרִיָּה* (*bikkurah'*, "first ripe," Isa. xxviii, 4; Jer. xxiv, 2; Mic. vii, 1; Hos. ix, 10), which denotes the early or spring fig, still called *boccore* in Mauritania, and in Spanish *abocora* (Shaw, *Travels*, p. 370, fol.). See also SYCAMORE.

The fig is mentioned in so many passages of Scripture that our space will not allow us to enumerate them, but they are detailed by Celsius (*Hierobot.* ii, 368). The first notice of it, however, occurs in Gen. iii, 7, where Adam and Eve are described as sewing fig-leaves together to make themselves aprons. The common fig-leaf is not so well suited, from its lobed nature, for this purpose; but the practice of sewing or pinning leaves together is very common in the East even in the present day, and baskets, dishes, and un-

brellas are made of leaves so pinned or sewn together. Hence some have supposed the *Ficus Indica* to be the tree there referred to, but this is unlikely and unnecessary. The fig-tree is enumerated (Deut. viii, 8) as one of the valuable products of Palestine, "a land of wheat, and barley, and vines, and fig-trees, and pome-

The Fig (*Ficus Carica*).

granates." The spies who were sent from the wilderness of Paran brought back from the brook of Eshcol clusters of grapes, pomegranates, and figs. Mount Olivet was famous for its fig-trees in ancient times, and they are still found there (see Stanley, *Sinai and Palestine*, p. 187, 421, 422). The fig-tree is referred to as one of the signs of prosperity (1 Kings iv, 25). Hence "to sit under one's own vine and one's own fig-tree" became a proverbial expression among the Jews to denote peace and prosperity (Mic. iv, 4; Zech. iii, 10). The failure of this fruit is likewise noted as a sign of affliction (Psa. cv, 33). The very frequent references which are made in the Old Testament to the fig and other fruit-trees are in consequence of fruits forming a much more important article of diet in the warm and dry countries of the East than they can ever do in the cold and moist regions of the North (see Judith x, 5; comp. Mishna, *Shebi'ith*, iv, 7). Figs are also used medicinally; and we have a notice in 2 Kings xx, 7, of their employment as a poultice (comp. Pliny, xxiii, 62; Dioscor. i, 184). In the historical books of the Old Testament mention is made of cakes of figs, used as articles of food, and compressed into that form for the sake of keeping them (*σχάδες, carica*, Lucian, *Vit. Auct.* 19; Martial, xiii, 28). Such a cake was called *הַבְּרֵכָה* (Talmud, *בבב, טניל, בבב, Mishna, Terumoth*, iv, 8), or more fully *הַבְּרֵכָה הַרְבֵּעִי*, on account of its shape, from the root *הַבְּרֵכָה*, to make round (see 1 Sam. xxx, 12; Jer. xxiv, 2 sq.). Hence, or rather from the Syrian *דבבל*, the first letter being dropped, came the Gr. word *παλάθη* (see Wesseling, *ad. Diol. Sic.* xvii, 67). Athenæus (xi, p. 500, ed. Casaub.) makes express mention of the *παλάθη Συριακή*. Jerome, on Ezek. vi, describes the *παλάθη* as a mass of figs and rich dates, formed into the shape of bricks or tiles, and compressed in order that they may keep. Such cakes hardened so as to need cutting with an axe. The fig is still extensively cultivated in the East, and in a dried state, strung upon cords, it forms an extensive article of commerce from Persia to India. The fig-tree, though now successfully cultivated in a great part of Europe, even as far north as the southern parts of

England, is yet a native of the East, and probably of the Persian region, where it is most extensively cultivated. The climate there is such that the tree must necessarily be able to bear some degree of cold, and thus be fitted to travel northwards, and ripen its fruit where there is a sufficient amount and continuance of summer heat. It has a smooth stem, which is seldom quite straight, and is covered with a gray bark; the leaves are of the shape of a heart, with three or five lobes, and are indented; the upper side is rough, the lower is covered with fine hair. The fruit makes its appearance before the leaves, but not before the flowers or blossom, which lies concealed within a hollow, fleshy receptacle (Hogg, *Vegetable Kingdom*, p. 676). The fertilization of the blossoms is often assisted by an artificial process called *caprification* (Pliny, xx, 21; Tournefort, ii, 52; Russel, *Alippo*, i, 168; Hasselquist, p. 221). See the *Penny Cyclopædia*, s. v.

Fig-tree (*Ficus Carica*).

**FIG-TREE, CURSED.** Few passages in the Gospels have given occasion to so much perplexity as that of Mark xi, 13, where the evangelist relates the circumstance of our Lord's cursing the fig-tree near Bethany: "And seeing a fig-tree afar off having leaves, he came, if haply he might find anything thereon: and when he came to it he found nothing but leaves, for the time of figs was not yet." The apparent unreasonableness of seeking fruit at a time when none could naturally be expected, and the consequent injustice of the sentence pronounced upon the tree, has been made the ground of grave impeachment of the Gospel record, and of our Saviour's character itself.

The fig-tree (*Ficus Carica*) in Palestine produces fruit at two, or even three different periods of the year: first, there is the *bikkurah*, or "early-ripe fig" (*πρόδρομος, praeoos*, Pliny, xv, 19; xvi, 49; Macrobi. *Sat.* ii, 16), frequently mentioned in the O. T. (see Mic. vii, 1; Isa. xxviii, 4; Hos. ix, 10), which ripens on an average towards the end of June, though in favorable places of soil or temperature the figs may ripen a little earlier, while under less favorable circumstances they may not be matured till the middle of July (Buhle, *Calendar Econ.* p. 15). The *bikkurah* drops off the tree as soon as ripe; hence the allusion in Nab. iii, 12, when shaken they "even fall into the mouth of the eater." Shaw (*Trav.* i, 264, 8vo ed.) aptly compares the Spanish name *breba* for this early fruit, "quasi breve," as continuing only for a short time. About the time of the ripening of the *bikkurim* the *kermis* or summer fig begins to be formed; these rarely ripen before August (Buhle, *ut sup.* p. 41), when another crop, called "the winter fig," appears. Shaw describes this kind as being of a much longer shape and darker

complexion than the *kermis*, hanging and ripening on the tree even after the leaves are shed, and, provided the winter proves mild and temperate, as gathered as a delicious morsel in the spring (see Miss Bremer's *Travels in the Holy Land*, i, 195; compare Pliny, *N. H.* xvi, 26, 27). Thus, especially in sheltered situations (e. g. the plain of Gennesareth, Josephus, *War*, iii, 10, 8), fresh figs might be had at almost all seasons of the year (compare Strabo, xi, 508; Columella, *Arbor.* 21).

The attempts to explain the above-quoted passage in Mark are numerous, and for the most part very unsatisfactory; passing over, therefore, the ingenious though objectionable reading proposed by Dan. Heinsius (*Exercit. Sac.* ed. 1639, p. 116) of *οὐ γὰρ ἦν, καρπὸς σίκων*—"where he was, it was the season for figs"—and merely mentioning another proposal to read that clause of the evangelist's remark as a question, "for was it not the season of figs?" and the no less unsatisfactory rendering of Hammond (*Annot. ad St. Mark*), "it was not a good season for figs," we come to the interpretations which, though not perhaps of recent origin, we find in modern works.

The explanation which has found favor with most writers is that which understands the words *καρπὸς σίκων* to mean "the fig-harvest;" the *γὰρ* in this case is referred, not to the clause immediately preceding, "he found nothing but leaves," but to the more remote one, "he came if haply he might find anything thereon;" for a similar *trajectio* it is usual to refer to Mark xvi, 3, 4; and the sense of the whole passage would then be as follows: "And seeing a fig-tree afar off having leaves, he came if perchance he might find any fruit on it (and he ought to have found some), for the time of gathering it had not yet arrived, but when he came he found nothing but leaves." (See the notes in the Greek Testaments of Burton, TroLope, Bloomfield, Webster, and Wilkinson; Macknight, *Harm. of the Gospels*, ii, 591, note, 1809; Elsley's *Annot.* ad l. c., etc.) A forcible objection to this explanation will be found in the fact that at the time implied, viz. the end of March or the beginning of April, no figs at all eatable would be found on the trees: the *bikkurim* seldom ripen in Palestine before the end of June, and at the time of the Passover, the fruit, to use Shaw's expression, would be "hard, and no bigger than common plums," corresponding in this state to the *puggim* (פֻּגִים) of Cant. ii, 13, wholly unfit for food in an unprepared state; and it is but reasonable to infer that our Lord expected to find something more palatable than these small, sour things upon a tree which by its show of foliage bespoke, though falsely, a corresponding show of good fruit, for it is important to remember that *the fruit comes before the leaves*. Again, if *καρπὸς* denotes the "fig-harvest," we must suppose that, although the fruit might not have been ripe, the season was not very far distant, and that the figs in consequence must have been considerably more matured than these hard *puggim*; but is it probable that Mark would have thought it necessary to state that it was not yet the season for gathering figs in March, when they could not have been fit to gather before June at the earliest? It would be better to understand the *γὰρ* here in an adversative-illative sense = *although*.

There is another way of seeking to get over the difficulty by supposing that the tree in question was not of the ordinary kind. Celsius (*Hierob.* ii, 385) says there is a peculiar fig-tree known to the Jews by the name of *Benoth-shuach* (בְּנֵי תֵּיטֵי), which produces *grossuli*, "small unripe figs" (*puggim*) every year, but only good fruit every third year; and that our Lord came to this tree at a time when the ordinary annual *grossuli* only were produced! We are ignorant as to what tree the *Benoth-shuach* may denote, but it is obvious that the apparent *unreasonableness* remains as it was. As to the tree which Whitley (*Commentary in*

*Mark*, l. c.) identifies with the one in question, that it was that kind which Theophrastus (*Hist. Plant.* iv, 2, § 4) calls *αἰφώλλον*, "evergreen," it is enough to observe that this is no fig at all, but the carob or locust tree (*Ceratonia siliqua*). Dr. Thomson, however, speaks of a large green-colored fig that ripens in May on Lebanon, and probably much earlier in milder positions (*Land and Book*, i, 538).

But, after all, where is the *unreasonableness* of the whole transaction? It has been stated above that the fruit of the fig-tree appears before the leaves (see Hackett, *Illust. of Scripture*, p. 133); consequently, if the tree produced leaves, it should also have had some figs as well. As to what natural causes had operated to effect so unusual a thing as for a fig-tree to have leaves in March, it is unimportant to inquire; but the stepping out of the way with the possible chance (*εἰ ἄρα, si forte*, "under the circumstances," see Winer, *Gram. of N. Test. Diction.* p. 465, Masson's transl.) of finding eatable fruit on a fig-tree in leaf at the end of March, would probably be repeated by any observant modern traveller in Palestine. The whole question turns on the *pretensions* of the tree; had it not proclaimed by its foliage its superiority over other fig-trees, and thus proudly exhibited its *precoiousness*; had our Lord at that season of the year visited any of the other fig-trees upon which no leaves had as yet appeared with the prospect of finding fruit, then the case would be altered, and the unreasonableness and injustice real. The words of Mark, therefore, are to be understood in the sense which the order of the words naturally suggests. The evangelist gives the reason why no fruit was found on the tree, viz. "because it was not the time for fruit;" we are left to infer the reason why it *ought to have had* fruit if it were true to its pretensions; and it must be remembered that this miracle had a typical design (see the *Christ. Annotator*, i, 228), to show how God would deal with the Jews, who, professing, like this precocious fig-tree, "to be first," should be "last" in his favor, seeing that no fruit was produced in their lives, but only, as Wordsworth well expresses it, "the rustling leaves of a religious profession, the barren traditions of the Pharisees, the ostentatious display of the law, and vain exuberance of words without the good fruit of works" (comp. Ezek. xvii, 24). So Trench (*Notes on the Miracles*, p. 438) concludes: "All the explanations which go to prove that, according to the natural order of things in a climate like that of Palestine, there might have been, even at this early time of the year, figs on that tree, either winter figs which had survived till spring, or the early figs of spring themselves—all these, ingenious as they often are, yet seem to me beside the matter. For, without entering further into the question whether they prove their point or not, they shatter upon that *οὐ γὰρ ἦν καρπὸς σίκων* of Mark, from which it is plain that no such calculation of probabilities brought the Lord thither, but those abnormal leaves which he had a right to count would have been accompanied with abnormal fruit."—Smith, s. v.

Monographs on this fig-tree cursed by the Saviour have been written in Latin by Flensburg (Hafn. 1775), Gösigen (Lips. 1697), Hofmann (Jena, 1670), Iken (Bremen, 1741), Juster (Abo, 1724), Muler (Hafnia, 1739), Schmidt (Viteb. 1701), Majus (in *Obs. sacr.* p. 71 sq.), Simonis (Fr. ad V. 1689), Withon (in *Opusc.* p. 159 sq.), Witsius (Lugd. Bat. 1709); in German by Pagendarm (Wolfenb. 1755), Ebeling (in *Hamb. gel. Briefwechsel*, 1750, p. 513 sq.), Stosch (in Rathlef's *Theol.-g.* 1754, p. 27 sq.), Kunze (in the *Studien u. Krit.* 1841, iii, 702). See Jesus.

**Fight** (מִלְחָמָה, *milchamah'*, Deut. ii, 32; 1 Kings xx, 26; 2 Chron. xxvi, 11; xxxii, 2, *war* or *battle*, as usually rendered; or מִרְכָּבָה, *marak'ah'*, 1 Sam. xvii, 20, *battle-array*, as often rendered; in other passages some form of the verbs מָלַח, נָלַח, etc.; Gr. πόλε

*μῆρ*, war, as usually rendered, or *μαχὴ*; also *ἀγῶν*, etc.). The Israelites began their existence as a nation with an aggressive campaign, in the sequel of which nevertheless they were from time to time compelled to occupy a defensive position throughout the entire period of the Judges (q. v.). This consisted, however, for the most part, of tumultuary and disconnected skirmishes. Regular engagements first occurred under (Saul and) David; and the frequent hostile collisions of disciplined Hebrew generals in the civil and foreign commotions of subsequent periods must have greatly stimulated military training. The opening of a campaign (generally in spring, 2 Sam. xi, 1; Josephus, *Ant.* vii, 6, 3; Harmer, ii, 283), as well as of single engagements, although not prefaced by regular diplomatic communications or a declaration of war (but see Judg. xi, 12 sq.; 1 Kings xx, 2 sq.; 2 Kings xiv, 8; Josephus, *Ant.* iv, 8, 41), was preceded in important and deliberate cases by an interrogation of the Urim (q. v.) and Thummim (Judg. xx, 27 sq.; 1 Sam. xiv, 37; xxiii, 2; xxviii, 6; xx, 8) or a prophet (1 Kings xxii, 6 sq.; 2 Chron. xviii, 4 sq.; 2 Kings xix, 2 sq.), in like manner as the Greeks consulted oracles before beginning a contest, and even took seers with them to the field (see Wachsmuth, *Hellen. Alterth.* iii, 390, 411). A peculiar species of divination prior to an attack is mentioned (Ezek. xxi, 20 sq.) with regard to the Chaldeans (see LOT), like the *extispicium* of the Romans (Cicero, *Divin.* i, 16; ii, 12 sq.). See SOOTHSAVER. In solemn instances, while the army stood in sight of the enemy, an offering was brought (1 Sam. vii, 9; xiii, 9 sq.), and a priest (Deut. xx, 2 sq.), who always appears to have accompanied the prince to the field (2 Chron. xiii, 12, 14; comp. Num. x, 9; a specially selected and anointed functionary of this kind, like a modern field-chaplain [Mill, *De sacerdote castronsi veter. Hebr.* Utr. 1728], is mentioned in the Mishna, *Sotah*, viii, 1, by the name of *הַכֹּהֵן הַמְּבַרֵךְ*; see Reland, *Antiq. Sacr.* ii, 3, 2; Otho, *Lex. Rab.* p. 89; Van Alphen, in Oelrich's *Collectio*, ii, 515 sq.; Tatii *Diss. de sacerdote castr. Hebr.*, and Ugolini *Diss. de sacer. castr.* [both in Ugolini *Thesaur.* xii]; Thorschmiel, *De sacerdote ad bell. uncto*, Torg. 1737; Kretzschmar, *De uncto bell.*, Dresd. 1738; although not mentioned in the O.-T. books; comp. Deyling, *Observ.* ii, 298; Lakemacher, *Observ. Philol.* iii, 236 sq.), or the commander himself, delivered a hortatory oration (2 Chron. xx, 20). Then followed by a trumpet blast the signal for the conflict (Numb. xiii, 12; 1 Macc. xvi, 8), and the struggle began amid terrific battle-cries (*הַבְּרָחָה*, 1 Sam. xvii, 52; Isa. xlii, 13; Amos i, 14; Jer. i, 42; Ezek. xxi, 22; as among almost all ancient nations; see especially Homer, *Il.* ii, 144 sq., 394 sq.; iii, 2 sq.; iv, 452 sq.; Curt. iii, 10, 1; Tacit. *Germ.* iii, a; Doughtai *Analect.* i, 74 sq.; Potter, *Greek Antiq.* ii, 174 sq.). The battle-array (*הַמַּחֲרָה* or *הַמַּחֲרָה*, 1 Sam. iv, 2; xxii, 8, 20, etc.; comp. *מַחֲרָה*, Judg. xx, 30; 1 Sam. xvii, 21) appears to have been a simple ranging of the troops in line; and even in the Maccabean period, when the Jews had acquired some of the strategic art of the Greek Syrians, their leaders seem to have rested in their simple tactics, gaining advantage over the martial skill of the enemy chiefly by their patriotic valor. Scientific marshallings and exact military lists are mentioned in 1 Macc. vii, 26 sq.; ix, 11; comp. ver. 45 (see Joseph. *Ant.* xiii, 12, 5); x, 77 sq.; xii, 28. The foreign troops of the later Jewish kings were manoeuvred according to Greek and Roman tactics (comp. Joseph. *Ant.* xiii, 12, 5). For stratagems of the Jews during their final war, see Josephus, *War*, iii, 7, 13, 14, 20, 28. Nevertheless we can early trace a division of the army into three corps, probably with a view to charge the enemy in the centre and upon both flanks (Judg. vii, 16, 19; 1 Sam. xi, 11; 2 Sam. xviii, 2; comp. 1 Macc. v,

33; so four divisions, 2 Macc. viii, 22: the expression *wings* of the army was already known, comp. *כַּנְפֵי צְבָא*, Isa. viii, 8; *כַּנְפֵי צְבָא*, Ezek. xii, 14, 17; xxxviii, 6, etc.; see Gesenius, *Comment. zu Jes.* i, 335, and *Thesaur.* p. 229). The field was probably fought man against man. The extended arms of the combatants appear to have been bare ("exserti lacerti, humeri," etc. Sil. Ital. xii, 715; Lucan, ii, 543; Statius, *Theb.* i, 413, etc.), the military mantle having no armlets (comp. Ezek. iv, 7; Isa. lii, 10; so Doughtai *Analect.* i, 257 sq.). Great prowess, especially bodily dexterity and agility (for attack and pursuit), was a main qualification for the soldier or officer (2 Sam. i, 23; ii, 18; 1 Chron. xii, 8; Hab. iii, 19; the "swift of foot" of the Homeric heroes). Signals for retreat or desisting from pursuit of the enemy were sounded on the trumpet (*הַבְּרָחָה*, 2 Sam. ii, 28; xviii, 16; xx, 22). Single combat (q. v.) between two champions, which decided the battle (like the Horatii and Curiatii of Livy, i, 24), is the well-known one between David and Goliath (1 Sam. xvii); another example occurs 2 Sam. ii, 14 sq. Sometimes peculiar stratagems were resorted to in the fight (comp. 2 Kings vii, 12 sq.; see Rosenmüller, *Morgenl.* iii, 233 sq.), especially the surprise (Judg. vii, 16 sq.), the ambuscade (*מַחְסֵי*, Josh. viii, 2, 12; Judg. xx, 36; 1 Sam. xv, 5), and surrounding (2 Sam. v, 23). Informants and spies (*מַחְסֵי*, *κατάσκοποι*) were also employed (Josh. ii, vi, xxii; Judg. vii, 10 sq.; 1 Sam. xxvi, 4; 1 Macc. v, 38; xii, 26). Distinguished acts of individual valor were often secured by an appointed prize (Josh. xv, 16; Judg. i, 12; 1 Sam. xvii, 25 sq.; xviii, 25 sq.; 1 Chron. xi, 6). With the design of insuring a successful issue in battle, the sanctuary (ark of the covenant) was sometimes carried into the field (1 Sam. iv, 4 sq.; comp. 2 Sam. v, 21). We have no sufficient accounts as to the disposition of the Hebrew camp aside from the Mosaic arrangement (Numb. ii); although from 1 Sam. xvii, 20; xxvi, 5, it appears to have had a circular form, like that of the Arabs (also the Bedouins, Arvieux, iii, 214) and ancient Greeks (Xenoph. *Rep. Laccd.* xii, 1), and we may understand the term *מַחְסֵי* (Auth. Vers. "trench") to refer to the bulwark of vehicles and beasts of burden, or (with Thenius) the circumvallation of the encampment (q. v.). The camps were usually guarded by carefully-posted sentinels (Judg. vii, 19; 1 Macc. xii, 27), and during the action a garrison remained in them or among the baggage (1 Sam. xxx, 24). Vanquished enemies were in general treated very severely: the captured generals and princes were put to death (Josh. x, 24; Judg. vii, 25); not unfrequently they were cut to pieces alive or beheaded when dead (2 Macc. xv, 30; 1 Sam. xvii, 54; comp. Herodot. vii, 77; Joseph. *War*, i, 17, 2); all warriors were stripped (1 Sam. xxxi, 8; 2 Macc. viii, 27), and the living captives either carried into slavery (Numb. xxxi, 26 sq.; Deut. xx, 14; some mitigation, however, being shown in the case of females, Deut. xxi, 11 sq.) or put to death (Judg. ix, 45), sometimes in a cruel manner (2 Sam. xii, 31; 2 Chron. xxiii, 12; comp. Judg. viii, 7), or even mutilated (Judg. i, 6 sq.; 1 Sam. xi, 2), although these cases of extreme severity are evidently peculiar and exceptional. As in all ancient warfare, the gentler sex and tender age were not always spared amid the ruthless fury of vengeance: there are notices of women violated or dismembered of their unborn infants, and of children dashed in pieces against stones and the corners of streets (2 Kings xv, 16; comp. 2 Kings viii, 12; Isa. xiii, 16; Amos i, 13; Hos. x, 14; xiv, 1; Nah. iii, 10; 2 Macc. v, 13; see Schultens, *Monument. histor. Arab.* p. 125; Wachsmuth, *Hellen. Alterthümer*, iii, 425); although these occur chiefly in connection with heathen countries (comp. Josephus, *Apion*, ii, 29). Captured horses were hamstringed (2 Sam. viii, 4; Josh. xi, 6, 9). But

see **BOOTY**. Conquered cities were occasionally burnt or demolished (Judg. ix, 45; 1 Macc. v, 28, 52; x, 84); at least heathen sanctuaries were destroyed (1 Macc. v, 68; x, 84) or carried away (Isa. xlvi, 1; see Gesenius, *Comment.* in loc.). The open country itself was laid waste (Judg. vi, 4; 1 Chron. xx, 1; 2 Kings iii, 19, 25; comp. Judith ii, 17; Herodot. i, 17). Sometimes the conquerors contented themselves with pulling down the fortifications and carrying away the treasures (2 Kings xiv, 14; comp. 1 Kings xiv, 26; 2 Kings xxiv, 13), demanded hostages (2 Kings xv, 14), and exacted contributions (2 Kings xviii, 14; see Isa. xxxiii, 18); garrisons were also left in charge (2 Sam. viii, 6, 14). But a more absolute war of extermination was waged by the Hebrew people against the Canaanites on the esode into Palestine. See **ACCURSED**. Victory was celebrated with joyful shouts, songs, and dances (Judg. v; 1 Sam. xviii, 6 sq.; 2 Sam. xxii; Judith xvi, 2, 24; 1 Macc. iv, 24); trophies were also set up (1 Sam. xv, 12; 2 Sam. viii, 13; but see Thenius, ad loc.). As permanent memorials of good fortune in war, captured weapons or pieces of armor were deposited in the sanctuary (1 Sam. xxi, 9; see xxxi, 10; 2 Kings xi, 10; 1 Chron. x, 10; comp. Homer, *Il.* vii, 83; Virg. *Æn.* vii, 183 sq.; Justin, ix, 7; Lucan, i, 240; Tacit. *Annal.* i, 59, 2). For military exploits, individuals were honored with presents or a promotion (1 Sam. xviii, 25 sq. [comp. Rosellini, *Monum. Stor.* iv, 74]; 2 Sam. xviii, 11), and David had a sort of honorary legion (2 Sam. xxiii, 8). Herod the Great once rewarded all his soldiers for a hard-earned victory with money (Joseph. *Ant.* xiv, 15, 4). Leaders who fell were honored by the army with military mourning (2 Sam. iii, 31), and their weapons were placed in their grave (Ezek. xxxii, 27; comp. Doughty *Anal.* ut sup.), as in that case the burial (with the tumultuary pomp of war, Amos ii, 2) of the remains was a cardinal duty of the army and its commander (1 Kings xi, 15). The scrupulousness of the later Jews respecting the observance of the Sabbath (q. v.) sometimes gave the enemy an advantage over them. See generally Lydiî *Spatuqna de re mi'itari*, c. notis Van Til (Dordæi, 1638; also in Ugolini *Thes.* xxvii). Kausler's *Wörterb. der Schlachten aller Völker* (vol. i, Ulm, 1825) is of little value for Hebrew archaeology.—Winer, i, 680. Compare **BATTLE**. On 1 Cor. ix, 26, see **GAMES**.

**Figure** stands in the Auth. Vers. as the representative of the following words in the original:  $\text{כָּרָת}$ , *se'mel*, Dent. iv, 16, i. e. an *idol*, as elsewhere rendered;  $\text{מִקְלָאֵת}$ , *mikla'ath*, 1 Kings vi, 29, a *carving*, as elsewhere rendered; but usually, in a metaphorical sense,  $\text{תְּבַרִיחַ}$ , *tabnâh'*, Isa. xliv, 13, *likeness* or *pattern*, as elsewhere rendered; to which correspond in the N. T.  $\tauύπος$ , Acts vii, 43; Rom. v, 14, a *type*;  $\alpha\nu\tau\acute{\iota}\tau\upsilon\pi\omicron\varsigma$ , Heb. ix, 24, 1 Pet. iii, 21, an *antitype*; and  $\pi\alpha\rho\alpha\beta\omicron\lambda\eta$ , Heb. ix, 9; xi, 19, a *parable*, as elsewhere rendered. See **TYPE**; **PARABLE**.

**Fiji Islands**, a group of islands in Polynesia, situated 340 miles north-west of the Friendly Islands, between lat. 15° 30' and 19° 30', and long. 177° and 178° West. It comprises 225 islands, of which 95 are inhabited. The others are occasionally resorted to by natives for the purpose of fishing, and taking the *bêche-de-mer*, or sea-slug. Two are large islands, stretching north-east and south-west nearly throughout the whole extent of the group, and are supposed to be each about 300 miles in circumference. The group comprises seven districts, and is under as many principal chiefs. All the minor chiefs on the different islands are more or less connected or subject to one of these. The area of the whole group is estimated at 8033 sq. miles, and the population at from 200,000 to 300,000. The white population is about 600, among whom are 40 Americans. The people are divided into a number of tribes,

independent of and often hostile to each other. In each tribe great and marked distinction of rank exist. The classes which are readily distinguished are as follows: 1. kings; 2. chiefs; 3. warriors; 4. the king's messengers (*matanivanua*, literally "eyes of the lands"); 5. slaves (*kaisi*). Mbau, the metropolis and imperial city, is situated on a small island, about two miles in circumference. It contains nearly one thousand inhabitants.

War is a constant occupation of the natives, and engrosses most of their time and thought. In 1809 they became acquainted with the use of fire-arms. The crew of a brig which had been wrecked on the reef off Nairai, in order to preserve their lives, joined the Mbau people, instructed them in the use of the musket, and assisted them in their wars. Next to war, agriculture is the most general occupation of this people. They have a great number of esculent fruits and roots, which they cultivate in addition to many spontaneous productions of the soil.

Of the religion of the natives, the following account is given in Newcomb, *Cyclopædia of Missions*: "The pantheon of the Fijians contains many deities. 'Many of the natives,' says Mr. Hunt, in his Memoirs of Mr. Cross, 'believe in the existence of a deity called *Ovê*, who is considered the maker of all men; yet different parts of the group ascribe their origin to other gods. A certain female deity is said to have created the Vewa people; and yet if a child is born malformed it is attributed to an oversight of *Ovê*.' The god most generally known next to *Ovê* is *Ndengei*. He is worshipped in the form of a large serpent, alleged to dwell in a district under the authority of Mbau, which is called *Nakauvandra*, and is situated near the western end of Viti-Levu. To this deity they believe that the spirit goes immediately after death for purification, or to receive sentence. All spirits, however, are not believed to be permitted to reach the judgment-seat of *Ndengei*; for, upon the road, it is supposed that an enormous giant, armed with a large axe, stands constantly on the watch. With this weapon he endeavors to wound all who attempt to pass him. Those who are wounded dare not present themselves to *Ndengei*, and are obliged to wander about in the mountains. Whether the spirit be wounded or not depends not upon the conduct in life; but they ascribe an escape from a blow to good luck. They have four classes of gods besides their malicious deities. The occasions on which the priests are required to officiate are usually the following: to implore good crops of yams and taro; on going to battle; for propitious voyages; for rain; for storms, to drive boats and ships ashore, in order that the natives may plunder them; and for the destruction of their enemies. Their belief in a future state, guided by no just notions of religious or moral obligation, is the source of many abhorrent practices, among which are the custom of putting their parents to death when they are advanced in years, suicide, the immolation of wives at the funeral of their husbands, and human sacrifices."

The islands were discovered in 1643 by Tasman, partly rediscovered in 1773 by Cook, visited in 1789 and 1792 by Bligh, but accurate information about them was for the first time obtained through the expeditions of Dumont d'Urville (1827) and Wilkes (1840). The history of the Christianization of the Fiji Islands began in 1855. In October of that year, the Rev. Wm. Cross and D. Cargill, Wesleyan missionaries from England, proceeded from Vavau, one of the Friendly Islands, to Lakemba, one of the Fiji Islands. It is but a small island, being only about 22 miles in circumference, and did not contain above 1000 inhabitants. The chief, to whom their object was explained, appeared friendly, gave them a piece of land on which to live, and built a temporary dwelling for each of their families. In a few months the missionaries baptized a number of the natives, some of whom had previously

obtained a knowledge of Christianity in the Friendly Islands. The chief, being only a tributary chief, appeared unwilling to take any step in favor of Christianity until he knew the minds of the more powerful chiefs of Fiji, and even threatened and persecuted the converts. In the course of a few years, the missionaries, with the aid of native teachers and preachers, some of whom came from the Vavau Islands, introduced the Gospel into various other islands of the Fiji group besides Lakenba, as Rewa, Vewa, Bua, Nandy, and some others of minor importance. They were favorably received by a number of the chiefs and the people, in some instances, however, from motives of a secular character. In 1845 and the following year there was a great religious movement in the islands of Vewa, which extended also to other islands, and resulted in large additions to the Christian churches. Among the most remarkable fruits of the movement was the conversion of a chief whose name was Varin, and who had long acted as the human butcher of Seru, being called the Napoleon of Fiji.

In 1854, the chief king of the islands, king Thakombau, who occupied several of the smaller islands and the eastern coast of Viti-Levu, together with his tribe, embraced Christianity. Since this time the prosperity of the islands has rapidly increased, and they are now partially civilized. A number of whites have settled on the island, and have developed to a considerable extent the natural resources of the soil. A great part of the territory of Thakombau is now mapped off into cotton and sugar plantations, most of the planters being Australians. There is also in the island of Levuka, now the head-quarters of the king and his seat of government, a flourishing little town called Ovalau, which has a hotel and a number of stores, all of them kept by whites. There is a British consul also stationed in this island, and in 1868 an agent of the American government was sent there from Sidney. About the same time that king Thakombau embraced Christianity, the crews of two American whalers were murdered by his subjects. The American government preferred a claim for compensation, and it was ultimately agreed that \$45,000 should be paid by the Fijians in reparation for the outrage committed. The king, finding it difficult to raise the sum agreed upon, offered in 1858 his entire territory to the English government, by which it was, however, declined. In 1868 the king's prime minister, C. H. Hare (an Englishman), proposed that the American government should not only take possession of the three islands which had been mortgaged to it, but that it should also purchase all the other islands of the group. As the government of the United States was disinclined to buy the islands, an offer was accepted from a company in Melbourne, the Fiji Trading and Banking Company, which undertook to pay the amount due to the U. States, and in return received very extensive rights and privileges.

Christianity is now the predominant religion in the Fiji Islands. In the *Wesleyan Methodist Calendar* for 1869, the statistics of the mission are reported as follows: circuits, 9; chapels, 453; other preaching-places, 339; missionaries and assistant missionaries, 58; subordinate paid and unpaid agents, 4051; members, 17,836; on trial for membership, 4609; scholars in schools, 35,617; attendants on public worship, 109,088. The Christianization of the whole group makes rapid progress. One heathen island was visited in 1867 for the first time. In the same year the Rev. Mr. Baker, a Wesleyan missionary, also a native assistant missionary, a native catechist, and six native students, were murdered by the people in the interior of Viti-Levu. See Newcomb, *Cyclopedia of Missions*, p. 720; Brown's *History of Missions*, vol. i; J. Hunt's *Life of Mr. Cross*; Walter Lawry, *Missions in Tonga and Fiji*; G. R. Rowe, *Life of John Hunt*; T. Williams and James C. Ivert, *Fiji and the Fijians* (London, 2d edit. 1863, 2 vols.). (A. J. S.)

**File** is the incorrect rendering in the Eng. Bible of the expression פִּימָה פִּימָה (petsirah' pim, found only in 1 Sam. xiii, 21), which literally signifies a *notching of the mouth or edge of tools*, i. e. bluntness or dullness of the agricultural instruments, in consequence of the want of smiths to sharpen them by welding out the point.

**Filiation** (OF SON OF GOD). The state of relationship in which the Second Person of the Godhead stands to the First, as the *Son of the Father*. See CHRISTOLOGY; FATHER; SON OF GOD; SONSHIP; TRINITY.

**Filioque Controversy**, a historical question as to the introduction of the words *kai ek tou viou* (*filioque*, and from the Son) into the Nicene Creed, to denote the procession of the Holy Ghost from the Son as well as from the Father. The Western churches admit the *filioque*; the Eastern deny it; and this is the chief doctrinal point of division between the Greek and Latin churches.

1. The original Nicene Creed (A.D. 325), it is admitted on all hands, does not contain the *filioque*. The simple statement there made is, "we believe also in the Holy Ghost" (*kai eis to Pneuma to agion*). See CREED, vol. ii, p. 562. The Niceno-Constantinopolitan Creed (A.D. 381) adds the phrase *to ek tou patros ekporomeuon*, who proceedeth from the Father; but says nothing about "the Son" (CREED, vol. ii, p. 562). The Council of Chalcedon (A.D. 451) made certain modifications of the language of the creed [see CHALCEDON, vol. ii, p. 196], but left the passage relating to the Holy Ghost unchanged. Nor has any change on this point ever been authorized by any general council recognised as such either by the Eastern or Western churches. To this day the creed is recited and used throughout the East in the original form. But the Roman Church, and also the Reformed churches, used it with the words "and from the Son." The historical question is, When and how did this interpolation take place?

2. It was said under CREED (vol. ii, p. 563) that this addition of *filioque* first appeared in the acts of a synod at Braga, in Spain, A.D. 412 (A.D. 411; Bingham, *Orig. Eccl.* x, 4, 16), but the records of that synod are now acknowledged, even by the Latins, to be spurious (Hefele, *Concilien-geschichte*, ii, 91). In 446, Turibius, bishop of Astorga, addressed a letter to Leo the Great complaining of the Priscillianist heresy in Spain. Leo ordered a council of all Spain, but the troubles of the time (the Goths controlling much of the country) made this impossible; and two synods were held, one in Toledo, the other in Galicia (A.D. 447; Mansi, vi, 491). At Toledo, nineteen bishops were present; and here, and by these nineteen Spanish bishops, the words *filioque* were first used of the procession of the Holy Ghost in a creed (Hefele, *Concilien-geschichte*, ii, 289). But the words were not added here to the Niceno-Constantinopolitan Creed. This was first done at the third Council of Toledo (A.D. 589), held by order of king Reccaredus, on the occasion of his abjuring Arianism (Hefele, iii, 44). At this council, and by order of Reccaredus, an anathema was declared against all who should deny the procession from "the Son also" (*filioque*). It is doubtful, however, whether the reverend fathers really knew what was the original form of the creed, as they issued a canon at the same time ordering the creed to be recited "according to the form of the Oriental churches." But the General Council of Constantinople (A.D. 681) paid no attention to this obscure Spanish innovation, and promulgated the creed in its original form, as also did the seventh General Council at Nicea, A.D. 787. But the habit of using the creed with the *filioque* had now grown up in the West, and was favored by Charlemagne. In 809 two Western monks from the court of Charlemagne were at Mount Olivet, and there used this new

Western form, for which they were accused of heresy by the Easterns. Charlemagne hated the East heartily, drew up a refutation of the Eastern doctrine, and summoned a council at Aix-la-Chapelle (809), which sanctioned the *filioque*, and sent deputies to Leo III to obtain his confirmation of their decision. Leo refused to add the *filioque* to the creed, and even had the creed itself, in its original form, engraved on two silver shields (in Greek and Latin), which he hung up in St. Paul's Church as a testimony to his unwillingness to break his oath of allegiance to the general councils by adding to the creed. At the same time, he gave his sanction to the doctrine of the *filioque* as scriptural and sound. In the latter part of the century the troubles with Photius (q. v.) renewed the controversy between East and West; and the Council of Constantinople (A.D. 879), which was attended by 380 bishops, anathematized all who add the *filioque*. No pope had as yet formally authorized the addition, and yet it was coming into general use in the West, under the authority, especially, of pope Nicholas I (Neale, *Eastern Church*, p. 1155 sq.; Mansi, xv, 255). Finally, Rome did add the *filioque* to the creed, but in no public or open way; "no decretal, encyclical or synodical, announcing her adhesion. The thing was done in a corner, and, but for a curious liturgical writer of the Western empire, who went to see his sovereign, Henry II, crowned at Rome, A.D. 1014, by pope Benedict VIII, nobody could have guessed when it occurred. Berno therefore records what he witnessed with his own eyes and ears; and being engaged himself in a work on the Mass, he would naturally be very particular in his inquiries when he came to Rome, of all places, how things were done there. Now his account is that 'up to that time the Romans,' that is, the Church of Rome generally, 'had in no wise chanted the creed after the gospel; but that the lord emperor Henry would not desist till, with the approval of all, he had persuaded the apostolic lord Benedict to let it be chanted at high mass.' Thus Recard inaugurated the addition, Charlemagne patronized it, and Henry II got it adopted by the popes themselves. When this had been done, the pontifical oath was changed. Later popes, of course, shrank from imprecating a judgment upon themselves, according to the terms of their oath, in case they failed to keep the decrees of the general councils enumerated in it, '*usque ad uerum apicem*,' when they felt they had notoriously failed to do so by the creed. That clause was accordingly struck out. For the last 1000 years the Roman communion has been committed to the use of a creed which is not that of the Church, but of the Crown! I do not say, therefore, to the use of a creed which is heterodox. On the theological question involved in it I would wish to speak with becoming reverence; but thus much is certain, that the addition which forms its distinguishing feature was made and had been in use many centuries before any pope judged it allowable, much less necessary; many centuries before theologians in the West had agreed among themselves whether the terms 'mission' and 'procession' were distinguishable. Doubtless it has since found able defenders; but among them there are scarce two who give the same account of it, historically or doctrinally, and some of them are neither consistent with each other nor with themselves. Others, in arguing for it against the Easterns, have grievously misstated facts, and numberless passages have been adduced in support of it from the fathers, either wholly spurious or interpolated. I know of no parallel to it in this respect in any religious controversy before or since. If the Athanasian Creed was not expressly coined for this controversy, it was employed in this controversy first as a polemical weapon" (Foulkes, *Letter to Archbishop Manning*, London, 1868).

For the renewal of the question, with a view to union between the Greeks and Latins at the Council

of Florence, see FLORENCE. The great English divines, Pearson and Waterland, while adhering to the doctrine of the West, condemn the interpolation of the creed. So Pearson remarks: "Thus did the Oriental Church accuse the Occidental for adding *filioque* to the creed, contrary to a general council, which had prohibited all additions, and that without the least pretence of the authority of another council; and so the schism between the Latin and the Greek Church began and was continued, never to be ended until those words, *kai ek tou viov*, or *filioque*, are taken out of the creed" (*Exposition of the Creed*, art. viii, Oxford, 1820, ii, 394).

The commissioners for a review of the English Prayer-book, 1689, expressed in a note their opinion that something should be done to satisfy the Greek Church. At a later period the non-juring prelates made proposals to the Greeks, stating that in the clause *filioque* nothing more is meant than "from the Father by the Son;" to which the Greek patriarch and Synod of Constantinople replied (April 12, 1718): "We receive no other rule or creed than that which was set forth by the first and second holy General Council, in which it was decreed that the Holy Ghost proceeds 'from the Father.' Therefore we receive none who add the least syllable (and the most perfect word would fall far short), either by way of insertion, commentary, or explication to this holy creed, or who take anything from it. For the holy fathers at that time anathematize all such as shall either take from or add to it any word or syllable. If any one has formerly inserted any word, let it be struck out, and let the creed be unaltered as it was at first written, and is to this day, after so many years, read and believed by us. Now, concerning this point, we thus believe that there is a *twofold processio* of the Holy Spirit: the one natural, eternal, and before time, according to which the Holy Spirit proceeds from the Father alone; and of which it is both written in the creed, and the Lord has said, 'the Comforter, whom I will send unto you from the Father, even the Spirit of truth, which PROCEEDETH FROM THE FATHER' (John xv, 26). The other procession is temporal and deputative, according to which the Holy Spirit is externally sent forth, derived, proceeds, and flows from both the Father and the Son for the sanctification of the creature. As to his temporal and outward procession, we agree that he proceeds, comes, or is sent by the Son, or through the Son's mediation, and from the Son, in this sense of an outward procession, for the sanctification of the creature. But this *πρόσβσις*, or mission, we do not call procession, lest we should be as unhappy as the Papists, who, because of the limited dialect of the Latin language, which is unable to express the *πρόσβσις*, or mission, by one word, and the *εκπόρευσις*, or procession, by another, have called them both processions, which afterwards grew into error, and made them take the eternal procession for that *πρόσβσις* which was *in time*" (*Amer. Quart. Church Rev.*, April, 1868, p. 93).

The historical question is very thoroughly discussed by the Rev. E. S. Foulkes (a convert from the Anglican to the Roman Church) in several recent works of his, especially in *A Historical Account of the Addition of the Words Filioque to the Creed* (Lond. 1867). Mr. Foulkes states that he has no objection to the doctrine of the double procession in the abstract, but he objects to its "embodiment in the creed in a word of four syllables, foisted in without authority, retained there without authority, in a place that was never designed for it, in a proposition set apart for the declaration of another truth" (p. 31). Moreover, he objects to the clause because it binds to the acceptance of a proposition which has two meanings: "the sense in which the Holy Ghost is said to proceed from the Son not being in every way coextensive with the sense in which he is said to proceed from the Father." And he expresses his conviction that this clause has a good deal to do

with the Socinianism and Unitarianism so long rife in the West. Mr. Foulkes notices that in the East, where the *filioque* is not adopted, "there is positively no such thing known as Unitarianism among baptized Christians;" and it happened to himself once to meet with this reply from a literary friend with whom he had been discussing the clause—"I find my escape from it in Unitarianism."

3. For the theological question involved, see HOLY GHOST, PROCESSION. Suffice it here to say, that while the Latins are inexcusable, according to their own canon law, for their addition of the *filioque* to the creed, they are still correct as to the doctrine. Their deeper anthropological investigations naturally developed the doctrine of the mission of the Holy Ghost by the Son. Palmer (*Dissertations on Subjects relating to the Eastern Communion*, Lond. 1853, 8vo, p. 103 sq.) gives the following summary of the controversy: "I. That when the expression of the Holy Ghost proceeding 'also from the Son' was first noticed and objected against by the Greeks, the Latins explained it away or dissembled it, instead of openly insisting on it as truth. Again, II. That when, at length, they had all received it themselves, the Latins attempted to force it into the creed, and to impose it on the Church at large by overbearing violence, not by an œcumenical council. Again, III. That in seeking to impose it upon the Easterns, the Latins generally have rested it upon manifestly false grounds, as upon the ground of unbroken and explicit tradition. Again, IV. That a vast multitude of passages, formerly alleged by the Latins, both from Greek and Latin fathers, have been proved either to be interpolations altogether, or to have been corrupted. Lastly, V. That some of the texts most insisted on by the Latins at the Council of Florence, and shown afterwards, by Zuernikaff, to have been corrupted, have, since Zaernikoff wrote, been surrendered, even by Latin editors; so that the Greek cause, as respects the critical examination of passages, has gained materially in strength since the Council of Florence. But to reject a doctrine not revealed in Scripture, nor handed down by unbroken tradition from the beginning, but 'dug out' or developed by a part of the Church in later ages, and violently thrust upon the rest on false grounds, can never be heresy. If, indeed, it were confessed to be a novelty and a development, and sufficiently shown to be, notwithstanding, a legitimate and necessary development, there might be a greater responsibility in rejecting it. On the other side, very many of the Greeks assert, not only that the Latin doctrine is false in itself, but also that it is a heresy, and that the Latins are heretics for maintaining it. But against this view it is fair to object, I. That those heretical consequences which seem to flow from the assertion of the procession from the Son as well as from the Father, and on account of which the doctrine itself is said to be heresy, are clearly rejected and condemned as heresies by the Latins, no less than by the Greeks; which would seem to reduce the Latin error, if it be an error, to a mere misconception and misuse of words. II. That all heresies spring from evil motives; but the motive which prompted the assertion of this doctrine is commonly admitted, even by the Greeks, to have been good, namely, the desire to maintain, against the Arians and other heretics, the co-equality of the Son with the Father. III. That the Greeks have repeatedly and all along offered to unite and communicate with the Latins, winking at all other faults if only the form of the creed were restored, which they could not have done if the doctrine of the procession from the Son had been held to be heresy in itself. IV. That until not only some or many passages, but all those passages in St. Augustine and other Latin fathers which assert the procession from the Son, have been shown to be corrupt or interpolated, or, in sense, to mean no more than they were stated to mean in the explanation given at Rome to Maximus the

martyr in the 7th century, the Latins, even if they be in error, cannot be called heretics for adhering to a doctrine seemingly taught and bequeathed to them by great saints, who are venerated as such by the Eastern Church, no less than by their own. 'We conclude, then, that so long as the "*Filioque*" is not interpolated into the creed without the consent of a council, the question of the doctrine in itself is still open and pending; and that neither are the Greeks heretics if they deny it, nor the Latins if they assert it, so long as they both desire that the subject may be fairly and religiously decided by an œcumenical council.'

See FLORENCE, COUNCIL OF; GREEK CHURCH; HOLY GHOST; PROCESSION.

FILLAN, ST. "Two Scoto-Irish saints of the name of Fillan appear in the Church calendars, and have left their mark on the topography of Scotland and Ireland. (1.) ST. FILLAN, or Faolan, surnamed the Lep-er, had his yearly festival on the 20th of June. His chief church in Scotland was at the east end of Loch Erne, in Perthshire, where 'St. Fillan's Well' was long believed to have supernatural powers of healing. A seat in the rock of Dumfillan still keeps the name of 'St. Fillan's Chair;' and two cavities beside it are said to have been hollowed by St. Fillan's knees in prayer. His Irish church is at Ballyheyland (anciently called Killhelan or Kill Faclain), in the barony of Cullenagh, in Queen's County. (2.) ST. FILLAN, the abbot, the son of St. Kentigerna of Inchealeoch, in Loch Lomond, lived in the 8th century, and had his yearly festival on the 7th or 9th of January. His church in Ireland was at Chlain Maosena, in Fartullach, in the county of Westmeath. His chief church in Scotland was in Perthshire, in the upper part of Glendochart, which takes from him the name of Strathfillan. Here a well-endowed priory, dedicated in his honor, was repaired or rebuilt in the beginning of the 14th century. King Robert Bruce made a grant of money to the work, in gratitude, probably, for the miraculous encouragement which he was said to have received on the eve of Bannockburn from a relic of the saint—one of his arm-bones enclosed in a silver case. Another relic of St. Fillan's—the silver head of his crosier or pastoral staff—has been preserved to our time. It is called the 'Coygerach' or 'Quigrich,' and appears in record as early as the year 1428, when it was in the hereditary keeping of a family named Jore or Dewar, who were believed to have been its keepers from the time of king Robert Bruce. They had half a boll of meal yearly from every parishioner of Glendochart who held a merk land, and smaller quantities from smaller tenants; and they were bound, in return, to follow the stolen cattle of the parishioners wherever their traces could be found within the realm of Scotland. The Quigrich, besides its virtues in the detection of theft, was venerated also for its miraculous powers of healing. In 1487, the right of keeping it was confirmed to Malice Doire or Dewar by king James III in a charter, which was presented for registration among the public records of Scotland

so lately as the year 1734. Sixty years later, the Quigrich still commanded reverence; but its healing virtues were now only tried on cattle, and its once opulent keepers had fallen to the rank of farm-laborers. It was publicly exhibited in Edinburgh in the year 1818, before being carried to Canada, where it now is, in the hands of a descendant of its old custodians, a farmer named Alexander Dewar. He puts such a value on the relic that he has hitherto refused to part with it for less than £100 sterling, or 1000 acres of Canadian land. It has been recently figured and described by Dr. Daniel Wilson in a paper in the *Canadian Journal*, No. xxiv, reprinted in a pamphlet, with the title of *The Quigrich, or Crosier of St. Fillan* (Toronto, 1859); and in the *Proceedings of the Society of Antiquaries of Scotland*, vol. iii, pt. ii, p. 233, plate xxvi (Edinb. 1861). A linn in the river Fillan or Dochart, in Strathfillan, was long believed to work wonderful cures on insane persons, who were immersed in the stream at sunset, and left bound hand and foot till sunrise in the ruins of the neighboring church of St. Fillan. A hand-bell, which bore the name of St. Fillan, was also believed to work miracles" (Chambers, *Encyclopaedia*, s. v.

**Fillet** is an erroneous translation in the A. V. of two Heb. words:  $\text{צַחְצְחִים}$ , *chashukim'*, *joinings* (comp. Exod. xxxviii, 17, 28; xxvii, 17), the poles or rods which served to join together the tops of the columns around the court of the tabernacle (q. v.), and from which the curtains were suspended (Exod. xxvii, 10, 11; xxxvi, 38; xxxviii, 10, 11, 12, 17, 19).  $\text{צִוּת}$ , *chut*, a *thread* (as elsewhere rendered), a measuring-line 12 cubits long for the circumference of the pillars of copper in Solomon's Temple (Jer. lii, 21). See COLUMN; GARLAND.

**Fillet**, a small flat face or band in classical architecture, used to separate mouldings; in Gothic architecture, a flat band on a curved moulding, used to decorate a shaft on a larger moulding. When on the front of a large moulding, it is called its keel; on the sides, it is called a wing. In the cut, *a a* are examples of fillets.

Fillets.

**Fin** ( $\text{סַנְאִי}$ , *senappi'*, of uncertain etymol.), the fin of a fish (q. v.), a distinctive mark of such as might be eaten under the Mosaic law (Lev. xi, 9, 10, 12; Deut. xiv, 9, 10). See CLEAN.

**Final Perseverance.** See PERSEVERANCE.

**Fine** or *mulet* for damages (q. v.). In some instances, by the Mosaic law, the amount of a fine, or of an indemnification that was to be made, was determined by the person who had been injured; in other instances it was fixed by the judge, and in others was defined by the law (Exod. xxi, 19-36; Deut. xxii, 19, 29). Twofold, fourfold, and even fivefold restitution of things stolen, and restitution of property unjustly retained, with twenty per cent. over and above, was required. Thus, if a man killed a beast, he was to make it good, beast for beast. This ordinance, observes Michaelis (*Laws of Moses*, art. 160), appears only incidentally in Lev. xxiv, 18, among criminal laws. If an ox pushed or gored another man's servant to death, his owner was bound to pay for the servant thirty shekels of silver (Exod. xxi, 32). In the case of one man's ox pushing or goring another's to death, it would have been a very intricate point to ascertain which of the two had been to blame for the quarrel, and therefore both owners were obliged to bear the loss. The living ox was sold, and the price, together with the dead one, equally divided between them (Exod. xxi, 35). If, however, the ox had previously been notorious for pushing, and the owner had not

taken care to confine him, this made a difference; for then, to the man whose ox had been pushed, he was obliged to give another, and the dead ox he got himself (Exod. xxi, 36). If a man dug a pit and did not cover it, or let an old pit belonging to him remain open, and another man's beast fell into it, the owner of the pit was obliged to pay for the beast, and had it for the payment (Exod. xxi, 33, 34). When a fire was kindled in the fields, and did any damage, he who kindled it was obliged to make the damage good (Exod. xxii, 6). See PUNISHMENT.

**Finer** ( $\text{צַרְפָּטָא}$ , *tsoreph'*), a gold and silver worker (Prov. xxv, 4). See REFINER. In Judg. xvii, 4, our version renders the word "founder;" in Isa. xli, 7, "goldsmith." It refers especially to the melting of fine metal. See FURNACE. The Egyptians carried the working of metals to a very extraordinary degree of perfection, as their various articles of jewellery preserved in our museums evince; and there is no doubt the Hebrews derived their knowledge of these arts from this source, though there is at the same time reference to their being known before the Flood (Gen. xiv, 19-22). See METAL.

**Finger** ( $\text{אֶצְבָּע}$ , *etsba'*,  $\text{δάκτυλος}$ ), besides its ordinary meaning, is used in Scripture to denote the special and immediate agency of any one. See ARM. The Egyptian magicians, terrified by the numerous plagues inflicted upon their country, at length said, "This is the finger of God," i. e. this is done by the power of God himself (Exod. viii, 19). Moses gave the tables of the law written by the finger (personal direction) of God to the Hebrews (Exod. xxxi, 18). The heavens are said to be the work of God's fingers, i. e. his power (Psa. viii, 3). Christ cast out devils with the finger or power of God (Luke xi, 20). "To put forth the finger" is a bantering, insulting gesture (Isa. lviii, 9). Some take this for a menacing gesture, as Nicanor stretched out his hand against the Temple, threatening to burn it (2 Macc. xiv, 33). "Four fingers thick" occurs as a measure in Jer. lii, 21. See RING.

**Finial**, the cluster of foliage that is frequently used to ornament the top of pinnacles, canopies, pediments, etc., in Gothic architecture. The term is also often used as synonymous with the pinnacle of a spire, roof, or canopy. (G. F. C.)

Finials (Chambers).

1, from Bishop Bridport's Monument, Salisbury Cathedral, 2, York Minster; 3, Maulbronn, Germany; 4, Crew Hall, Cheshire; 5, Augsburg.

**Finning-pot** ( $\text{מַצְרֵפֶת}$ , *matsreph'*), a crucible or melting-pot (Prov. xvii, 3; xxvii, 21). See METALLURGY. The use of these for reducing gold was familiar to the ancient Egyptians. "Much cannot, of course, be expected from the objects found in the excavated

tombs to illustrate the means employed in smelting the ore, or to disclose any of the secrets they possessed in metallurgy; and little is given in the paintings beyond the use of the blow-pipe, the forceps, and the mode of concentrating heat by raising cheeks of metal round three sides of the fire in which the crucibles were placed. See FURNACE. Of the latter, indeed, there

Furnace.—An Egyptian blowing the Fire for melting Gold (Wilkinson).

is no indication in these subjects, unless it be in the accompanying woodcut; but their use is readily suggested, and some which have been found in Egypt are preserved in the museum of Berlin. They are nearly five inches in diameter at the mouth, and about the same in depth, and present the ordinary form and appearance of those used at the present day" (Wilkinson, *Anc. Eg.* abridgm. ii, 138). See HANDICRAFT.

**Finland**, when first mentioned in history, was inhabited by savage tribes belonging to the Finnish nations, which by piracy and frequent inroads became especially formidable to the Swedes. The latter subjugated with difficulty and only for a short time the coast of Finland, while the republic of Novgorod extended its rule over the southern branches of the Finns. The frequent robberies of the pagan Suomi induced king Eric of Sweden to conquer them, and compel them to adopt Christianity. Accompanied by bishop Henry, of Upsala, an Englishman, he landed in 1157 on the south-western coast, and at first met with but little resistance. The first church was built at Rendamecki, near the town of Abo, the foundation of which had likewise been laid by Eric. When Eric returned to Sweden, bishop Henry remained in the country, but the progress of Christianity was very slow, as the Finns had yielded only to compulsion; the missionaries had a very imperfect knowledge of the language, and the poverty of the language presented the greatest obstacles to an adequate designation of the new Christian ideas. While outwardly professing Christianity, most of the converts remained secretly addicted to their old pagan ideas, or at least mixed up Christian doctrines with pagan mythology. Bishop Henry baptized a large number, established an episcopal see at Rendamecki, and finally lost his life (1160) in consequence of his zeal in enforcing Church discipline. After the complete triumph of Christianity, the Finns venerated him as their apostle and patron saint. He was commemorated on the 19th of January and the 18th of June; his picture, exhibiting his full episcopal ornament, with an axe by his side and the murderer at his feet, was hung up in every church, and many miracles were ascribed to his relics (see HENRY, apostle of the Finns). His successor, Rudolphus, was carried off by the Courlanders and killed. The progress of Christianity was considerably delayed by the opposition of the Russians to the advance of the Swedes, on whom the existence of the feeble Christian Church was wholly dependent. In 1198, Abo was burned by the Russians, and the fourth bishop, also an Englishman, had to seek a refuge upon the island of Gothland. In 1249, the brother of the king of Sweden, Birger Magnusson, the first yarl of the kingdom, landed on the southern coast of Aestbothnia, routed the tribe of the Tavasti, established the fortress of Tavastehus, subsequently called Tavastehus, built several churches, and compelled the inhabitants to accept Christianity and to pay taxes to the bishop. These taxes the fifth bishop, Bero, of his own accord, ceded to the king. Another great Swedish expedition was undertaken in 1293 by Thorkel Knutson, the guardian of the minor king, Birger II. The pope not only sanctioned this expedition, but granted to the knights and warriors who took part in

it the same indulgences as to the Crusaders. Thorkel landed with a large fleet, overpowered the inhabitants, and established the fortress of Wiborg. Bishop Peter, of Westeras, announced Christianity to the tribes which were still pagans, and the Swedish arms left to the natives only the choice between Christianity and slavery. Thus Christianity was gradually forced upon the whole nation, with the exception of a few remote districts where paganism continued to maintain itself. Though planted and spread by force, Christianity finally rooted itself in the minds of the people by means of schools and churches. The episcopal see at Abo attained considerable celebrity. The number of churches was largely increased, the cathedral school of Abo was numerously attended, and gradually six monasteries were established. The Reformation met in Finland with comparatively little resistance, and soon the Lutheran Church superseded Roman Catholicism altogether. In consequence of the wars between Sweden and Russia in the 18th and the beginning of the 19th centuries, Finland was lost to Sweden and gained by the emperor of Russia. In 1721, at the peace of Nystadt, Russia received the towns of Wilorg and Keyholm; in 1743, at the peace of Abo, a territory of about 4800 square miles, with the fortresses of Nyslott, Frederiksham, and Savolax; and in 1809, at the peace of Frederiksham, the whole of Finland. Emperor Alexander I reunited Wiborg, which for some time had constituted a Russian province, with Finland, which retains its old Constitution, its Swedish laws, and Lutheran religion. Finland is, in point of administration, wholly separated from Russia Proper; the highest authority is the imperial senate for Finland, consisting of 16 natives, under the presidency of a governor general. The diet, as formerly in Sweden, consists of four estates, nobility, clergy, burghers, and peasants.

The population of Finland in 1865 amounted to 1,840,957, of whom 41,760 were connected with the Greek Church, which has 17 churches and 2 monasteries. The Roman Catholics have a church in Wiborg and in Helsingfors. Nearly the whole remainder, a population of about 1,500,000, belongs to the Lutheran Church. The organization of the Lutheran Church of Finland is in every respect similar to that of the Lutheran Church of Sweden. Liturgies, hymn-book, catechism, and other Church books, are substantially the same as in Sweden. The Church has one archbishopric, of Abo (the archbishop resides at Helsingfors), and two bishoprics, of Borgio and Kuopio, the latter of recent origin. The number of parishes in 1867 was 214. Most of the congregations have, besides the pastor, a chaplain, also a church council. The churches are generally well attended. In most of the churches, especially in the country, the sermons are preached in the Finnish language; in others, both Finnish and Swedish are used; and in some, Swedish exclusively. The highest literary institution is the University of Helsingfors (until 1847 at Abo). It has among the faculties one of Lutheran theology, about 45 professors, and 600 students. There is also at Helsingfors a theological seminary. Finland has 6 gymnasias, 13 secondary and 33 primary schools, 3 female institutions, and a number of schools for special purposes. At the higher institutions instruction is generally given in Swedish; but the use of the Finnish language is advancing at the expense of the Swedish, and this movement is greatly encouraged by the Russian government. An Evangelical Society was established in 1817; there are also several Bible Societies.—Wetzer u. Welte, *Kirchen-Lexikon*, iv, 70; Wiggers, *Kirchl. Statistik*, ii, 423; Rühls, *Finland u. seine Bevolner* (Leipz. 1808). (A. J. S.)

**Finley, James Bradley**, one of the most distinguished and useful pioneers of Methodism in Ohio, was the son of the Rev. R. W. Finley, and was born in North Carolina, July 1, 1781. He received a good

education from his father. In 1801 he married, and settled in what is now Highland County, Ohio. In 1802, while returning from a camp-meeting in Kentucky, he was converted. He at once felt called to preach, but refused to obey, lost all religion, and lived for seven years a worse sinner than before. At the end of this time he was again converted, and immediately began to persuade his wicked neighbors to seek God, and soon formed a large society. In 1809 he entered the Western Conference, travelled with great success for six years, and was in 1816-21 presiding elder on Steubenville, Ohio, and Lebanon Districts. Through the labors of John Stewart, the colored preacher, and Between-the-Logs, a converted chief, a great revival had begun among the Wyandotte Indians at Upper Sandusky. Thither Finley was sent in 1821, and spent six years of labor, suffering, and glorious success among the Indians. After his removal he still had supervision of the mission, and from 1829 to 1845 served the Church as preacher or presiding elder in the principal cities of Southern Ohio. He served as chaplain of the Ohio Penitentiary, at Columbus, from 1845 to 1849, when his health failed, and he was made supernummate. He was afterward appointed to Clinton Street, Cincinnati (from him named Finley Chapel). His last appointment was that of Conference missionary. He was thus forty-five years a laborious and successful minister. He was eight times a delegate to the General Conference. He died Sept. 6, 1856, in Cincinnati. Both in character and labors he was an extraordinary man. His zeal, his indomitable courage, which the Indian chiefs both respected and feared, his sympathy and his integrity, gave him a dominant control over men of all professions and conditions. His eloquence in the pulpit, especially at camp-meetings, often brought down thousands almost at a stroke, and wherever he went conversions were multiplied. He published an *Autobiography* (Cincinnati, 1854, 12mo):—*Wyandotte Mission* (12mo):—*Sketches of Western Methodism* (Cincinnati, 1857, 12mo):—*Life among the Indians* (Cincinnati, 1857, 12mo):—*Memorials of Prison Life* (Cincinnati, 1860, 12mo).—*Minutes of Conferences*, vi, 441; *Autobiography of J. B. Finley* (Cincinnati, 1854); Stevens, *History of the Methodist Episcopal Church*, vol. iv.

**Finley, John P.**, a Methodist Episcopal minister and professor of languages in Augusta College, Kentucky, was born in South Carolina in June, 1783, and though early removed by his parents to the West, "through their exertions and his own he obtained a classical education." From 1810 to 1822 he taught in schools and academies in Ohio, and preached also with zeal and success. In 1822 he was elected to the chair of languages in Augusta College, and the same year entered the itinerancy, and in both labored zealously and usefully until his death in May, 1825.—*Minutes of Conferences*, i, 505. (G. L. T.)

**Finley, Robert, D.D.**, a Presbyterian minister, and president of the University of Georgia, was born at Princeton, N. J., in 1772, and graduated at Princeton College in 1787. From 1793 to 1795 he was a tutor in the college, and a trustee from 1807 to 1817, when he resigned. He was the minister of a Presbyterian church at Baskingridge, N. J., from June, 1797, till 1817. In 1816 he became greatly interested in the welfare of the free blacks, and formed a plan of sending them to Africa. He was thus the founder of the American Colonization Society. He was chosen president of Athens College, Ga., and went there in 1817, but died Oct. 3d of that year.—Sprague, *Annals*, iv, 126.

**Finley, Robert Smith**, a Presbyterian minister, was born at Basking Ridge, New Jersey, May 9, 1804, and was educated at Princeton College. He studied law, and was admitted to the bar at Cincinnati; but in 1833 he determined to enter the ministry, and spent

a short time at Lane Seminary. In 1835 he was licensed by the Presbytery of Mississippi, and was ordained in 1842. His first charge was Pine Grove, La.; and for some time he was missionary among the slaves near Natchez. For six years he edited, at St. Louis, the *Liberian Advocate*, devoted to African colonization, in which cause he was greatly interested through life. In 1850 he became pastor of the Presbyterian church at Metuchen, N. J., and in 1858 principal of the Presbyterian Female Institute at Talladega, Ala., where he died July 2, 1860.—Wilson, *Presbyterian Almanac*, 1861, p. 85.

**Finley, Robert W.**, a distinguished Methodist Episcopal minister, was born in Bucks County, Pa., June 9, 1750. He was converted at seventeen. Soon after he entered Princeton College, N. J., where he spent seven years in general and theological studies. In 1774 he was licensed to preach in the Presbyterian Church, and was sent as a missionary to Georgia and the Carolinas. Here he was a patriot as well as a preacher, and was often with general Marion in his expeditions, and incurred much enmity and risk of life from the Tories. In 1784 he went to Hampshire County, then in New Virginia, where he preached two years. In 1788 he emigrated to Kentucky, and eventually opened a school for students in divinity, and a number of his pupils were distinguished in subsequent life. In 1795 he went with general Massie to explore the Scioto country, then in the Northwest Territory, and in May, 1796, he settled on the Scioto, below Chillicothe. In 1808 he connected himself with the Methodist Church, and in 1811 or 1812 joined the Ohio Conference as a travelling preacher. For many years he labored with great success, and received hundreds into the Church. When almost eighty and supernummate, he mounted his horse, with his books and clothes, and set off as a missionary to Saut St. Marie, and there formed a circuit and appointed a camp-meeting. He died at Germantown, Ohio, Dec. 8, 1840.—*Minutes of Conferences*, iii, 239. (G. L. T.)

**Finley, Samuel, D.D.**, a Presbyterian minister and president of New Jersey College, was born in County Armagh, Ireland, and came to America in 1734. On his arrival at Philadelphia he renewed his studies preparatory to the ministry, and was licensed in 1740. He labored long and successfully in West Jersey, in Deerfield, Greenwich, and Cape May, and supplied the church in Philadelphia for a time. He was ordained by the Presbytery of New Brunswick in 1742, and in 1744 he accepted a call from Nottingham, Maryland, where he continued for nearly seventeen years, and where he kept an academy of great reputation. In 1761 he was called to the presidency of New Jersey College, and removed to Princeton, and soon after was honored with the degree of D.D. from Glasgow. He died July 17, 1766. He published a sermon entitled *Christ triumphing and Satan raging*, 1741:—*A Refutation of a Sermon on the Doctrine of Convictions*, 1743:—*Satan stripped of his angelic Robes*, 1743:—*A charitable Plea for the Speechless*, 1747:—*A Vindication of the preceding*, 1748:—*A Sermon—The Curse of Meroz, etc.*, 1757:—*A Sermon on the Death of President Davies*, 1761.—Sprague, *Annals*, iii, 96.

**Finnan**, an Irish ecclesiastic whom Oswin, king of Northumberland, called to the abbacy of Lindisfarne, and to superintend the churches in his kingdom. The Venerable Bede says, "He was a man of fierce and rough nature, but very successful in ministerial labors. He baptized Peada, king of the Middle Angles, and sent four priests to instruct his subjects in Christianity." He also consecrated Ceadmon, who afterwards became a very prominent bishop among the East Angles, and baptized Siegebirt their king, together with great numbers of the common people. He was very active in promoting the temporal as well as the spiritual interest of the Church. During his

superintendency, Bede says "he erected a church on the island of Lindisfarne fit for an episcopal see, which, nevertheless, he built after the manner of the Scots [Irish], not of stone, but of sawn oak, and covered it with thatch" (*Eccles. Hist.* lib. iii. c. xxv). Years afterwards, when the British clergy took possession of these churches in Northumberland, Theodore, archbishop of Canterbury, required this church to be reconsecrated, and dedicated to the patronage of St. Peter. Finnan, having for ten years superintended the abbacy of Lindisfarne and the churches of Northumberland under the simple title of "bishop," died A. D. 661. He left a treatise entitled *Pro Veteri Paschali Ritu*, regarding the Irish and Oriental time of keeping Easter as the old and true time, and that of Rome as of recent date. See Bede's *Eccles. Hist.*; *Illust. Men of Ireland*, vol. i. (D. D.)

**Finns**, "geographically the name of the inhabitants of Finland, but in ethnology that of a considerable branch of the Ugrian race, dwelling for the most part in Finland, though with some representatives in Sweden and Norway as well. The Ugrians have been classed among the nations said to have a Mongolian origin. Dr. Latham places them among the 'Tauranic Altaic Mongolids,' and divides them into Ugrians of the East and Ugrians of the West. The Western Ugrians consist of Lapps, Finns, Permians, and other nations or tribes in the north and north-west of Russia, and of the Magyars in Hungary. The Magyars are the most numerous, and next after these come the Finns, comprising about 2,000,000 of individuals. All the other tribes of Western Ugrians do not together comprise so many. The Finns, in common with the other Ugrians, are of the Mongolian type. The Finns, from having been originally a nomadic race, have for many centuries been stationary and civilized. Long before the arrival of the German and Slavic nations in the north of Europe, the Ugrians, or *Oyres* (for the name, so common in fiction, is really of historic origin), possessed it, and were gradually pushed further north and east by the new invaders. Both Finns and Lapps, there is good reason to believe, originally extended much further south than they do at present, occupying, perhaps, the whole of Sweden and Norway. 'The Finns,' says Prichard, 'were in the time of Tacitus as savage as the Lapps; but the former, during the succeeding ages, became so far civilized as to exchange a nomadic life for one of agricultural pursuits, while the Lapps have ever continued to be barbarous nomades, as well as the Siberian tribes of the same race—namely, the Woguls and Ostiaks. The Finns, as well as their brethren the Beornmahs, or Finns of the White Sea, had probably undergone this change long before the time when they were visited by Othar, the guest of Alfred. When the Finns were conquered by the Swedes, they had long been a settled people, but one of curious, and singular, and isolated character.'—Chambers, *Cyclopaedia*, s. v. See FINLAND.

**Fintanus or Fintan**, the founder of the monastery of Rheinau (q. v.), in the canton of Zurich. He descended from a noble family in the province of Leinster, Ireland. In a war between two chieftains, one chieftain killed Fintan's brother, and, fearing that Fintan would avenge the brother's death, caused him insidiously to be carried off by the Normans. Having changed his master several times within a few days, Fintan was to be taken to Scotland, but escaped when the vessel landed at one of the Orkney Islands. He had to spend three days on this uninhabited island, after which he swam, miraculously supported, to Scotland. He remained for two years with a bishop who had studied in Ireland; then, in compliance with a vow, he journeyed, through Gallia, Alemannia, and Lombardy, to Rome. After his return he first went to the monastery of Pfäfers, and from there to Rheinau, where he completed, conjointly with Wolfen, a scion of the

house of the Welfs, the monastery which the grandfather and father of Wolfen had begun. After working at Rheinau for five years as a priest, he entered the monastery in 851, remained there five years, and thereupon became a hermit, leading for 22 years, from 856 to 878, the year of his death, a life of extreme asceticism. Thus he came to be venerated as a saint, even during his lifetime, throughout the whole region. When his friend Wolfen, who in the mean time had become abbot of Rheinau, returned from Rome with the relics of St. Blasius, Fintan took a portion of them to a cell in the Black Forest, which subsequently was called St. Blasien.—Herzog, *Real-Encyclop.* xix, 491. (A. J. S.)

**Fir** (*קברן*, the name of an extensive family of coniferous evergreens; see *Penny Cyclopaedia*, s. v. *Abies*) is the uniform rendering in the Auth. Vers. of *קברן*, *berosh'* (from its being cut into planks, Gesenius, *Thes. Heb.* p. 246), which frequently occurs (2 Sam. vi, 5; 1 Kings v, 8, 10; vi, 15, 34; ix, 11; 2 Kings ix, 23; 2 Chron. ii, 8; iii, 5; Psa. civ, 17; Isa. xiv, 8; xxxvii, 24; xli, 19; lv, 13; lx, 13; Ezek. xxvii, 5; xxxi, 8; Hos. xiv, 8; Nah. ii, 3; Zech. xi, 2), and *קברן*, *beroth'*, which is said to be only the Aramæan form of the same word (in Cant. i, 17). In most of the passages the terms rendered cedar and fir in the Auth. Vers. are mentioned together. *Berosh* is translated variously in the Sept. *πίτυς*, *πίσκη*, *κνάρισσος*, and (Ezek. xxvii, 5) *κίερος*; in Isa. xiv, 8, *ξύλα Αιβάνου*; in the Vulg. chiefly *abies*, *cypressus*. It was a lofty tree (Isa. lv, 13), growing on Lebanon (Isa. xxxvii, 24), and of an ornamental figure (Isa. lx, 13). The passages from which any special account of its use can be derived are, 1. Of musical instruments (2 Sam. vi, 5); 2. Of doors (1 Kings vi, 34); 3. Of gilded ceilings (2 Chron. iii, 5); 4. Boards or decks of ships (Ezek. xxvii, 5), or planks for flooring (1 Kings vi, 15). Rosenmüller says, "In most of the passages where the Hebrew word occurs, it is by the oldest Greek and the Syriac translators rendered *cypressus*." Celsius, on the contrary, is of opinion that *berosh* indicates the cedar of Lebanon, and that *erez*, which is usually considered to have that meaning, is the common pine (*Pinus sylvestris*), apparently because he conceives *berosh* to be changed from *sherbin*, the Arabic name of pine. J. E. Falter, as quoted by Rosenmüller, conjectures that the Hebrew name *berosh* included three different trees which resemble each other, viz. the evergreen cypress, the thyme, and the savine. The last, or *Juniperus sabina*, is so like the cypress that the ancients often called it by that name, and the moderns have noticed the resemblance, especially as to the leaves. "Hence, even among the Greeks, both trees bore the old Eastern names of *berosh*, *beroth*, *brutha*, or *brathy'* (Rosenmüller, *Bot. of the Bible*, transl. p. 200). The word *berosh* or *beroth* is slightly varied in the Syriac and Chaldee versions, being written *berutha* in the former, and *berath* in the latter. All these are closely allied to *bruta*, a name of the *sarvine* plant, which is the *βαύρα*, *βραβέρν*, and *βαράβωρε* of the Greeks, and which the Arabs have converted into *buras* and *burat*. By them it is applied to a species of juniper, which they call *abihl* and *aris* or *oris*. It appears that many of these terms must be considered generic rather than specific in the modern sense, when so much care is bestowed on the accurate discrimination of one species from another. Thus *arus*, applied by the Arabs to a juniper, indicates a pine-tree in Scripture, whether we follow the common acceptance and consider it the cedar, or adopt the opinion of Celsius, that the *Pinus sylvestris* is indicated. So *burat* may have been applied by the Arabs, etc. not only to the savine and other species of juniper, but also to plants, such as the cypress, which resemble these. In many of those cases, therefore, where we are unable to discover any absolute identity or similarity of name, we must be guided by the nature of

the trees, the uses to which they were applied, and the situations in which they are said to have been found. Thus, as we find *erez* and *berosh* so constantly associated in Scripture, the former may indicate the cedar with the wild pine-tree, while the latter may comprehend the juniper and cypress tribe. See CEDAR; CYPRESS; JUNIPER. All these were extensively used for architecture, and are at this day found in Lebanon (Balfour, *Trees of Scripture*, p. 11; Thenius on 1 Kings vi, 34; Saalschütz, *Hebr. Arch.* i, 280, note 4; Miller, *Gardener's Dict.* s. v. Cupressus; Stephens, *Thest. Ling. Gr.* s. v. *πίεκη*; Belon, *Obs.* c. 110, p. 165; Loudon, *Arboretum*, iv, 2163).—Kitto, s. v.; Smith, s. v. In Hos. xiv, 8, the "stone-pine" (*Pinus pinea*), which has a cone containing an edible nut, seems to be intended (Kitto, *Pict. Bible*, in loc.), although Henderson (*Comment.* in loc.) thinks that a fruitless tree is there referred to by way of contrast. See TREE.

**Fire** (properly *עֵשׂ, esh, פִּיֶּקֶת*). On the origin of fire, see Kitto's *Daily Bible Illust.* i, 94. The applications of fire in Scripture are susceptible of the following classification:

I. *Religious*.—1. That which consumed the burnt sacrifice and the incense-offering, beginning with the sacrifice of Noah (Gen. viii, 20), and continued in the ever-burning fire on the altar, first kindled from heaven (Lev. vi, 9, 13; ix, 24), and rekindled at the dedication of Solomon's Temple (2 Chron. vii, 1, 3). See SACRIFICE.

"Fire from heaven," "fire of the Lord," usually denotes lightning in the Old Testament; but, when connected with sacrifices, the "fire of the Lord" is often to be understood as the fire of the altar, and sometimes the holocaust itself (Exod. xxix, 18; Lev. i, 9; ii, 3; iii, 5, 9; Numb. xxviii, 6; 1 Sam. ii, 28; Isa. xx, 16; Mal. i, 10). See LIGHTNING.

The perpetual fire on the altar was to be replenished with wood every morning (Lev. vi, 12; comp. Isa. xxxi, 9). According to the Gemara, it was divided into three parts, one for burning the victims, one for incense, and one for supply of the other portions (Lev. vi, 15; see Reland, *Antiq. Hebr.* i, 4, 8, p. 26; and ix, 10, p. 98). Fire for sacred purposes obtained elsewhere than from the altar was called "strange fire," and for use of such Nadab and Abihu were punished with death by fire from God (Lev. x, 1, 2; Numb. iii, 4; xxvi, 61). See ALTAR.

2. Parallel with this application of fire is to be noted the similar use for sacrificial purposes, and the respect paid to it, or to the heavenly bodies as symbols of deity (see below), which prevailed among so many nations of antiquity, and of which the traces are not even now extinct: e. g. the Sabeian and Magian systems of worship, and their alleged connection with Abraham (Spencer, *De Leg. Hebr.* ii, 1, 2); the occasional relapse of the Jews themselves into sun- or its corrupted form of fire-worship (Isa. xxvii, 9; compare Gesenius, s. v. *שֶׁמֶשׁ, Theaur.* p. 489; see Dent. xvii, 3; Jer. viii, 2; Ezek. viii, 16; Zeph. i, 5; 2 Kings xvii, 16; xxi, 3; xxiii, 5, 10, 11, 13; comp. Jahn, *Bibl. Arch.* c. vi, § 405, 408); the worship or deification of heavenly bodies or of fire, prevailing to some extent, as among the Persians, so also even in Egypt (Herod. iii, 16; see Wilkinson, *Anc. Eg.* i, 328, abridgm.); the sacred fire of the Greeks and Romans (Thucyd. i, 24; ii, 15; Cicero, *De Leg.* ii, 8, 12; Livy, xxviii, 12; Dionys. ii, 67; Plutarch, *Numa*, 9, i, 263, ed. Reiske); the ancient forms and usages of worship, differing from each other in some important respects, but to some extent similar in principle, of Mexico and Peru (Prescott, *Mexico*, i, 60, 64; *Peru*, i, 101); and, lastly, the theory of the so-called Guebres of Persia, and the Parsees of Bombay. (Frazer, *Persia*, c. iv, p. 141, 162, 164; Sir R. Porter, *Travels*, ii, 50, 424; Chardin, *Voyages*, ii, 310; iv, 258; viii, 367 sq.; Niebuhr, *Travels*, ii, 36, 37; Mandelslo, *Travels*, b. i, p. 76; Gibbon, *Hist.* c. viii, i, 335, ed. Smith;

Benj. of Tudela, *Early Trav.* p. 114, 116; Burckhardt, *Syria*, p. 156.) See IDOLATRY. On the heathen practice of children "passing through the fire," see MOLOCH.

3. In the case of the spoil taken from the Midianites, such articles as could bear it were purified by fire as well as in the water appointed for the purpose (Numb. xxxi, 23). The victims slain for sin-offerings were afterwards consumed by fire outside the camp (Lev. iv, 12, 21; vi, 30; xvi, 27; Heb. xiii, 11). The Nazarite who had completed his vow, marked its completion by shaving his head and casting the hair into the fire on the altar on which the peace-offerings were sacrificed (Numb. vi, 18).

II. *Domestic*.—Besides for cooking, baking, and roasting purposes [see BREAD, FOOD, etc.], fire is often required in Palestine for warmth (Jer. xxxvi, 22; Mark xiv, 54; John xviii, 18; see Harmer, *Obs.* i, 125; Raitner, p. 79). For this purpose a hearth with a chimney is sometimes constructed, on which either lighted wood or pans of charcoal are placed (Harmer, i, 405). In Persia, a hole made in the floor is sometimes filled with charcoal, on which a sort of table is set covered with a carpet; and the company, placing their feet under the carpet, draw it over themselves (Olearius, *Travels*, p. 294; Chardin, *Voyages*, viii, 190). Rooms in Egypt are warmed, when necessary, with pans of charcoal, as there are no fireplaces except in the kitchens (Lane, *Mod. Eg.* i, 41; *Eng. in Eg.* ii, 11). See COAL; FEEL.

On the Sabbath, the law forbade any fire to be kindled even for culinary purposes (Exod. xxxv, 3; Numb. xv, 32). As the primary design of this law appears to have been to prevent the proper privileges of the Sabbath day from being lost to any one through the care and time required in cooking victuals (Exod. xvi, 23), it is doubted whether the use of fire for warmth on the Sabbath day was included in this interdiction. In practice, it would appear that the fire was never lighted or kept up for cooking on the Sabbath day, and that consequently there were no fires in the houses during the Sabbaths of the greater part of the year; but it may be collected that in winter fires for warming apartments were kept up from the previous day. Michaelis is very much mistaken with respect to the climate of Palestine in supposing that the inhabitants could, without much discomfort, dispense with fires for warmth during winter (*Mosäisches Recht*, iv, 195). To this general prohibition the Jews added various refinements; e. g. that on the eve of the Sabbath no one might read with a light, though passages to be read on the Sabbath by children in schools might be looked out by the teacher. If a Gentile lighted a lamp, a Jew might use it, but not if it had been lighted for the use of the Jew. If a festival day fell on the Sabbath eve no cooking was to be done (*Mishna, Shabb.* i, 3; xvi, 8, vol. ii, p. 4, 56; *Moed Katan*, ii, vol. ii, p. 287, ed. Surenhus). The modern Jews, although there is no cooking in their houses, have fires on the Sabbath day, which are attended to by a Christian servant; or a charwoman is hired to attend to the fires of several houses, which she visits repeatedly during the day. See SABBATH.

III. *Statutory Regulation*.—The dryness of the land in the hot season in Syria of course increases the liability to accident from fire (Judg. ix, 15). The law therefore ordered that any one kindling a fire which caused damage to corn in a field should make restitution (Exod. xxii, 6; comp. Judg. xv, 4, 5; 2 Sam. xiv, 30; see Mishna, *Maccoth*, vi, 5, 6; vol. iv, 48, Surenhus.; Burckhardt, *Syria*, p. 496, 622). This law was calculated to teach caution in the use of fire to the herdsmen in the fields, who were the parties most concerned. And it is to be remembered that the herdsmen were generally substantial persons, and had their assistant shepherds, for whose imprudence they were made responsible. Still no inference is to be drawn

from this law with regard to fires breaking out in towns, the circumstances being so very different. See DAMAGES.

IV. *Penal.*—Punishment of death by fire was awarded by the law only in the cases of incest with a mother-in-law, and of unchastity on the part of a daughter of a priest (Lev. xx. 14; xxi. 9). In the former case both the parties, in the latter the woman only, was to suffer. This sentence appears to have been a relaxation of the original practice in such cases (Gen. xxxviii. 24). Among other nations, burning alive appears to have been no uncommon mode, if not of judicial punishment, at least of vengeance upon captives; and in a modified form was not unknown in war among the Jews themselves (2 Sam. xii. 31; Jer. xxix. 22; Dan. iii. 20). In certain cases the bodies of executed criminals and of infamous persons were subsequently burnt (Josh. vii. 25; 2 Kings xxiii. 16). See PUNISHMENT.

V. *Military.*—In time of war towns were often destroyed by fire. This, as a war usage, belongs to all times and nations; but among the Hebrews there were some particular notions connected with it, as an act of strong abhorrence, or of devotedness to abiding desolation. See ACCURSED. The principal instances historically commemorated are the destruction by fire of Jericho (Josh. vi. 24); Ai (Josh. viii. 19); Hazor (Josh. xi. 11); Laish (Judg. xviii. 27); the towns of the Benjamites (Judg. xx. 48); Ziklag, by the Amalekites (1 Sam. xxx. 1); Jazer, by Pharaoh (1 Kings ix. 16); and the Temple and palaces of Jerusalem by Nebuchadnezzar (2 Kings xxv. 9). Even the war-chariots of the Canaanites were burnt by the Israelites (Josh. vi. 24; viii. 28; xi. 6, 9, 13), probably on the principle of precluding the possibility of recovery by the enemy of instruments of strength for which they had themselves no use. The frequency with which towns were fired in ancient warfare is shown by the very numerous threats by the prophets that the towns of Israel should be burned by their foreign enemies. Some great towns, not of Israel, are particularly named; and it would be an interesting task to trace, as far as the materials exist, the fulfilment of these prophecies in those more marked examples. Among the places thus threatened we find Damascus (Isa. xliii. 12, 13), Gaza, Tyre, Teman (Amos i. 7, 10, 11). The temples and idols of a conquered town or people were very often burnt by the victors (Isa. liii. 12, 13). The Jews were expressly ordered to destroy the idols of the heathen nations, and especially any city of their own relapsed into idolatry (Exod. xxxii. 20; 2 Kings x. 26; Deut. vii. 5; xii. 3; xiii. 16). One of the expedients of war in sieges was to set fire to the gate of the besieged place (Judg. ix. 49, 52). See SIEGE.

In battle, torches were often carried by the soldiers, which explains the use of torches in the attack of Gideon upon the camp of the Midianites (Judg. vii. 6). This military use of torches was very general among ancient nations, and is alluded to by many of their writers (Statius, *Theb.* iv. 5, 7; Stobæus, *Serm.* p. 194; Michaelis, in *Symbol. Liter. Bremens.* iii. 254). See TORCH.

Signal fires on the tops of mountains were also anciently common as a telegraphic mode of conveying intelligence both in civil and military matters (Judith vii. 5). See BEACON.

VI. *Funeral.*—Incense was sometimes burnt in honor of the dead, especially royal personages, as is mentioned specially in the cases of Asa and Zedekiah, and negatively in that of Jehoram (2 Chron. xvi. 14; xxi. 19; Jer. xxxiv. 5). See FUNERAL.

VII. *Metalurgic.*—The use of fire in reducing and refining metals was well known to the Hebrews at the time of the Exodus (Exod. xxxii. 24; xxxv. 32; xxxvii. 2, 6, 17; xxxviii. 2, 8; Numb. xvi. 38, 39).—Kitto, s. v.; Smith, s. v. See HANDICRAFT.

VIII. *Figurative Senses.*—1. Fire is in the Scriptures considered as a symbol of Jehovah's presence (see

Mehner, *De Deo in igne*, Dresd. n. d.) and the instrument of his power, in the way either of approval or of destruction (Exod. xiv. 19; Numb. xi. 1, 3; Judg. xiii. 20; 1 Kings xviii. 38; 2 Kings i. 10, 12; ii. 11; vi. 17; comp. Isa. li. 6; lxxvi. 15, 24; Joel ii. 30; Mal. iii. 2, 3; iv. 1; 2 Pet. iii. 10; Rev. xx. 14, 15; see Reland, *Ant. Sacr.* i. 8, p. 26; Jennings, *Jewish Ant.* ii. 1, p. 301; Josephus, *Ant.* iii. 8, 6; viii. 4, 4). Thus he appeared in this element at the burning bush and on Mount Sinai (Exod. iii. 2; xix. 18). He showed himself to Isaiah, Ezekiel, and John in the midst of fire (Isa. vi. 4; Ezek. i. 4; Rev. i. 14), and it is said that he will so appear at his second coming (2 Thess. i. 8). The people of Israel wandered through the desert, guided by the Lord under the form of a pillar of fire [see PILLAR] (Exod. xiii. 21); and Daniel, relating his vision, in which he saw the Ancient of days, says, "A fiery stream issued and came forth before him" (vii. 10). God may be compared to fire, not only by reason of his glorious brightness, but also on account of his anger against sin, which consumes those against whom it is kindled, as fire does stubble (Deut. xxxii. 22; Isa. x. 17; Ezek. xxi. 3; Heb. xii. 29). Coals of fire proceeding from God's mouth denote his anger (Psa. cxvii. 8). His word also is compared to fire (Jer. xxiii. 29). Thus, in Jer. v. 14, "Behold, I will make my words in thy mouth fire, and this people wood, and it shall devour them." See FLAME.

2. Hence the destructive energies of this element and the torment which it inflicts rendered it a fit symbol of (1) whatever does damage and consumes (Prov. xvi. 27; Isa. ix. 18); (2) of severe trials, vexations, and misfortunes (Zech. xii. 9; Luke xii. 49 [see the dissertations on this text by Scharhan (*Obs. Sacr.* p. 127-146), Ellrod (Erlang. 1774)]; 1 Cor. iii. 13, 15 [see the dissertations on this text by Lichtenstein (Helmst. 1771), Georgi (Viteb. 1748)]; 1 Pet. i. 7); (3) of the punishments beyond the grave (Matt. v. 22; Mark ix. 44; Rev. xiv. 10; xxi. 8). See HELL.

3. Fire or flame is also used in a metaphorical sense to express excited feeling and divine inspiration (Psa. xxxix. 3; Jer. xx. 9). Thus the influences of the Holy Ghost are compared to fire (Matt. iii. 11), and the descent of the Holy Spirit was denoted by the appearance of lambent flames, or tongues of fire (Acts ii. 3). See TONGUE. The angels of God also are represented under the emblem of fire (Psa. civ. 4). These are the more benign applications of the figure, in the sense of warmth, activity, and illumination (see Wemyss's *Symbol. Diet.*). Compare LIGHT.

FIRE-BAPTISM. The expression "baptize with fire" (Matt. iii. 11; Luke iii. 16) is understood by most modern interpreters to be synonymous with *baptism by the Holy Spirit*, e. g. on the day of Pentecost (see Arthur, *Tongue of Fire*, passim, Lond. 1856, N. Y. 1857). Olshausen (*Comment.* ad loc., Am. ed. i. 269) regards "fire" here as put in contrast with the opposite element "water," i. e. the spiritual as distinct from the material baptism. So also Alford (*Greek Test.* ad loc. Matt.), who remarks that "to separate off *πῦρ*. 'Ay. as belonging to one set of persons, and *πῦρ* as belonging to another, when both are united in *ἵνα*, is harsh and confused." Yet so Origen early understood the passage, and in this Neander, De Wette, Meyer, and many other expositors coincide. Dr. Robinson observes that "the *wheat* are evidently those who receive Christ as the Messiah, and embrace his doctrines; these he will baptize with the Holy Ghost, i. e. he will impart to them spiritual gifts, the teachings and consolations of the Holy Spirit; while the *chaff* are as evidently those who reject Christ and his doctrines, and live in sin; these he will baptize with *fire* unquenchable" (in Calmet, s. v. Baptism). There are monographs on this subject by Iken (*Dissert.* p. 300-316), Mieg (*Misc. Duisb.* i. 205 sq., 602 sq.), Oslander (Tubingen, 1755), Schmid (Lips. 1706), Ribow (Gött. 1744), Zeibich (Ger. 1781). Compare BAPTISM WITH FIRE.

**Firebrand** (פֶּתֶל, *ud*, a *poker* or burnt end of a stick, Isa. vii, 4; Amos iv, 11; "brand," Zech. iii, 2; פֶּתֶל, *lappid*, Judg. xv, 4, a *lamp* or torch [as often elsewhere], i. e. flambeau; פֶּתֶל, *zek*, only in the plur., burning *darts*, i. e. arrows [q. v.] fitted with combustibles, Prov. xxvi, 18; comp. Eph. vi, 16). In Judg. xv, 4, it is said, "And Samson went and caught three hundred foxes [jackals], and took firebrands, and turned tail to tail, and put a firebrand in the midst between two tails." A firebrand in such a position, if sufficiently ignited to kindle a blaze in the shocks of corn, would soon have burnt itself free from the tails of the foxes, or have been extinguished by being drawn over the ground. A torch or flambeau, on the other hand, made of resinous wood or artificial materials, being more tenacious of flame, would have answered a far better purpose, and such is the legitimate import of the original. His "turning them tail to tail" was apparently intended to prevent them making too rapid a retreat to their holes, or, indeed, from going to their holes at all. They were probably not so tied that they should pull in different directions, but that they might run deviously and slowly, side by side, and so do the more effectual execution. Had he put a torch to the tail of each, the creature, naturally terrified at fire, would instantly have betaken itself to its hole, or some place of retreat, and thus the design of Samson would have been wholly frustrated. But by tying two of them together by the tail they would frequently thwart each other in running, and thus cause the greater devastation. Similar conflagrations produced by animals, particularly by foxes, were well known to the Greeks and Romans. Thus Lycophron (*Alexandra*, 344) makes Cassandra represent Ulysses as a cunning and mischievous man, the "man for many wiles renowned" of Homer, and styles him, very properly, *λαμπούρις*, *fire-tail*, a name for the fox (*Æsch. Fragm.* 386). The Romans, also, at their feast in honor of Ceres, the patron goddess of grain, offered in sacrifice animals injurious to corn-fields, and therefore introduced into the circus, on this occasion, foxes with firebrands so fastened to them as to burn them: a retaliation, as Ovid seems to explain it, of the injuries done to the corn by foxes so furnished (*P'asti*, iv, 681, 707, 711). In Leland's *Collectanea*, there is an engraving representing a Roman brick found twenty-eight feet below a pavement in London, about the year 1675, on which is exhibited, in basso-relievo, the figure of a man driving into a field of corn two foxes with a fire fastened to their tails, which many have supposed to refer to the feat of Samson, or at least to be a memento of the Roman usage just mentioned. Richardson, in his *Dissertation on the Eastern Nations*, speaking of the great festival of fire celebrated by the ancient Persians on the shortest night of the year, says, "Among other ceremonies common on this occasion, there was one which, whether it originated in superstition or caprice, seems to have been singularly cruel. The kings and great men used to set fire to large bunches of dry combustibles, fastened around wild beasts and birds, which being let loose, the air and earth appeared one great illumination; and as these terrified creatures naturally fled to the woods for shelter, it is easy to conceive that the conflagrations which would often happen must have been peculiarly destructive." See Fox.

**Firepan** (מִצְבֵּי, *machtah'*, from מִצְבֵּי, to take up coals of fire, etc.; Sept. *πυρρίον*, Vulg. *ignium receptaculum*), one of the vessels of the Temple service (Exod. xxvii, 3; xxxviii, 3; 2 Kings xxv, 15; Jer. lii, 19); elsewhere rendered "snuff-dish" (Exod. xxv, 38; xxxvii, 23; Numb. iv, 9; Sept. *ἐπαρσστήρ*, *ἐπαρσστήρις*, *ὑπόζευμα*, Vulg. *emunctorium*) and "censer" (Lev. x, 1; xvi, 12; Numb. xvi, 6 sq.; 2 Chron. iv, 22; Sept. *θυσιαστήριον*, Vulg. *thuribulum*). These appear, however, not to have been two or three forms of utensils, but essentially the same kind of article, probably i. q.

a metallic *cinder-basin*, of different sizes, for at least two uses: one, like a chafing-dish, to carry live coals for the purpose of burning incense; another, like a snuffer-dish, used in trimming the lamps, in order to (carry the snuffers and) convey away the snuff. See CENSER.

**Fire-worship.** For an account of the fire-worshippers of modern times, the reader is referred to the article PARSEES. We attempt here only a brief sketch of the origin and extent of pyrolatry among ancient nations. Under varying conceptions, as the symbol of purity, or of the divine presence and power, or as one of the constituent elements, or as typifying the destructive principle in nature, fire was early and among many nations an object of religious worship. If we attach any credit to the statements of the reputed Sanchoniathon, Usous, whose name reminds us of the Biblical Uz, the son of Aram, was the first to introduce the worship of fire. The violence of the winds at Tyre, by rubbing the branches of trees together, caused this element to manifest its presence, and Usous thereupon erected rude altars to fire and wind, and made libations thereon of the blood of animals captured in the chase.

The prevalence of pyrolatry among the Canaanites is frequently referred to in the Scriptures, and the people of God are solemnly and repeatedly warned against forsaking his worship to join in the abominations which belonged to the worship of Molech, the fire-god of these people (Lev. xviii, 21; xx, 2-5; Deut. xii, 31; 1 Kings xi, 7; 2 Kings xvi, 3; xxxiii, 10, 13; 2 Chron. xxviii, 3; Psa. cvi, 37, 38; Jer. vii, 31; xix, 5, 6; xxx, 35; Ezek. xvi, 20, 21; xxxiii, 37); yet, despite the denunciations of divine wrath and punishment, the Israelites sometimes apostatized to this worship, and caused their seed to pass through or be burnt in the fire to Molech. Solomon and Ahaz were notable instances of such apostasy, and from the terms employed to describe the conduct of the latter, "and burnt his children in the fire after the abominations of the heathen whom the Lord had cast out before the children of Israel" (2 Chron. xxviii, 3), we learn that the worship of Molech in the time of Ahaz was the same as in that of the old Canaanites. For the ceremonies of this worship, see MOLECH.

"Adrammelech, the fire-god of Sepharvaim; Chemosh, the fire-god of Moab; Uroal, Dusares, Sair, and Thyadrites, of the Edomites and neighboring Arab tribes, and the Greek Dionysus, were worshipped under the symbol of a rising flame of fire, which was imitated in the stone pillars erected in their honor" (*Movers, Phönizier*, i, c. 9). Among the ancient Persians and Medes fire-worship was practised in very early times by their religious teachers, the Magi, though pyra- or fire-temples probably date no further back than Zoroaster. Herodotus states (iii, 16) that the Persians regarded fire as a god, and sacrificed to it, as also to the heavenly bodies, and the other terrestrial elements (i, 131), using the tops of mountains or hills, for they had no temples or altars for the worship of their deities. Strabo, in agreement with Herodotus, states (§ 732) that they worshipped on high places, had no images or altars, and called the heavens Zeus; that they made sacrifices, especially (*ἑλαφρόντων*) to fire and water, placing dry wood without the bark, and putting fat upon it, then kindling the fire from beneath, not blowing it with the breath, but fanning it, for they esteemed it worthy of death to defile this sacred element by blowing the breath or placing a corpse or excrement upon it. In speaking of Cappadocia (§ 733), he, moreover, tells us that there were many magi there, called fire-worshippers (*πύραθοι*), and also pyra- or fire-temples, in which the sacred fire was kept perpetually burning by the Magi. Fire-temples also were found in Persia and other places. The chief men of Persia went to feed the sacred fires with precious oils and rich aromatics, styled by them fire-

banquets (*epule ignis*). For the ceremonies of worship in connection with these fire-temples, see MAGI and PARSEES.

Fire-worship was practised also among the Carthaginians, Scythians, the ancient Germans, and the ancient inhabitants of the British Isles, and we find traces of it also in the Mexican and Peruvian worship (Prescott, *Mexico*, i, 60, 64; *Peru*, i, 101). Diodorus Siculus states (xx, 14) that the Carthaginians, when hard pressed by Agathocles, attributing their reverses to the anger of their ancestral divinities, whose worship they had neglected, sacrificed 200 of the noblest children (to which number 300 were added by voluntary offerings) to Chronos or Saturn, whose brazen statue was so constructed that a child placed in its arms rolled into a pit of fire. This deity was therefore evidently the same as the Molech of their Tyrian ancestors. The Hindoos worshipped Agni, the god of fire, and in their mythology fire was the symbol of Siva, the destroyer, a conception of this element seemingly in accord with that of the ancient Egyptians (Herod. iii, 16).

The sacred fire was carefully watched in the temple of Vesta, at Rome, by virgins consecrated to this special service (*Virginesque Vestales in urbe custodiunt ignem foci publici sempiternum*, Cic. *De Leg.* ii, 8), and the extinction of this fire was regarded as a fearful omen, portending great disaster to the state, so that the unhappy Vestal who careless or ill luck was the occasion of such a misfortune atoned therefor by a severe and degrading punishment (Liv. xxviii, 11). The ancient Greeks paid worship to the same divinity in Hestia, reckoned one of the twelve great gods, and symbolized by the fire which burns upon the hearth, a deity admitted to the penetralia of domestic life.

We find the worship of the heavenly bodies frequently mentioned in connection with that of the gods of fire, and the former was doubtless older, as it was the higher form of worship (Dent. xvii, 3; 2 Kings xvii, 16, 17; xxi, 3; xxiii, 5, 11; Isa. xxvii, 9; Jer. vii, 2; Ezek. viii, 16; Zeph. i, 5; Herodotus, *l. c.*; Strabo, *l. c.*). There appears, therefore, to have been some connection between them. According to the Greek legends, it was Prometheus, the fire-bearer, who, purloining the ethereal and beneficent element from the sun, the high divinity of the Sabeian worship, conveyed it by stealth to earth as a gift to men, braving therefor and incurring thereby the anger of Zeus, the Greek form of the name by which, according to Herodotus and Strabo, the circuit of the heavens was called by the Magi, and probably the same as Mithra. May we not find symbolized in this Promethean legend the connection and the conflict between sun-worship and fire-worship, Sabeianism and Magism? For an abstract of the relation of the Mithraic worship and the original doctrines of the Zend-Avesta, with references to works of modern writers on this subject, see De Guignaut's translation of Creuzer's *Rel. de l'Antiquité*, notes viii, ix, to bk. ii, vol. i, pt. ii, p. 728.—Smith, *Dict. of the Bible*, s. v. Molech and Fire; *Auct. Univ. Hist.* (Lond. 1747, 21 vols. 8vo; see index in vol. xx); Gibbon, *Decline and Fall of Rom. Empire* (N. Y. 1852, 6 vols. 12mo), i, 226-238; Smith, *Gentile Nations* (N. Y.); Stoddard, *Introd. Univ. Hist.*, p. 228-9, 301; Hyde, *De Relig. vet. Persarum* (Oxon. 1700, 4to); Creuzer, *Religion de l'Antiquité*; Anquetil du Perron, *Zend-Avesta*, etc. (improved in German translation by discussions of Kleuker); Richter, *Älteste Religionen des Orients.* (J. W. M.)

**Firkin** (*μετρητής*, a measurer, occurs only in John ii, 6), a *metretēs*, i. e. the Attic AMPHORA, a measure for liquids, equivalent to the Hebrew BATH, and containing about 8½ gallons (Smith's *Dict. of Class. Antiq.* s. v. Metretes). See METROLOGY.

**Firmament**, a term introduced into our language from the Vulgate, which gives *firmamentum* as the equivalent of the *σφραῖμα* of the Sept. and the *rakia* of

(רָקִיעַ) of the Hebrew text (Gen. i, 6); more fully רָקִיעַ הַשָּׁמַיִם, *firmament of the heavens*, Gen. i, 14, 15, 17). See HEAVEN.

1. The Hebrew term is generally regarded as expressive of simple *expansion*, and is so rendered in the margin of the A. V. (l. c.); but the true idea of the word is a complex one, taking in the *mode* by which the expansion is effected, and consequently implying the *nature of the material* expanded. The verb רָקַע, *rakā'*, means to expand by *beating*, whether by the hand, the foot, or any instrument. It is especially used, however, of beating out metals into thin plates (Exod. xxxix, 3; Numb. xvi, 39), and hence the substantive רָקִיעַ, "broad plates" of metal (Numb. xvi, 38). It is thus applied to the flattened surface of the solid earth (Isa. xlii, 5; xlv, 24; Psa. cxxxvi, 6), and it is in this sense that the term is applied to the heaven in Job xxxvii, 18, "Hast thou spread (rather *hammered*) out the sky which is strong, and as a molten looking-glass"—the mirrors to which he refers being made of metal. The sense of *solidity*, therefore, is combined with the ideas of *expansion* and *tenuity* in the term *rakia*. Saalschütz (*Archæol.* ii, 67) conceives that the idea of solidity is inconsistent with Gen. ii, 6, which implies, according to him, the passage of the mist through the *rakia*; he therefore gives it the sense of pure *expansion*—it is the large and lofty room in which the winds, etc. have their abode. But it should be observed that Gen. ii, 6 implies the very reverse. If the mist had penetrated the *rakia* it would have descended in the form of rain: the mist, however, was formed under the *rakia*, and resembled a heavy dew—a mode of fructifying the earth which, from its regularity and quietude, was more appropriate to a state of innocence than rain, the occasional violence of which associated it with the idea of divine vengeance. But the same idea of *solidity* runs through all the references to the *rakia*. In Exod. xxiv, 10, it is poetically represented as a solid floor, "a paved work of a sapphire stone;" nor is the image much weakened if we regard the word רָקִיעַ as applying to the *transparency* of the stone rather than to the *paring* as in the A. V., either sense being admissible. So again, in Ezek. i, 22-26, the "firmament" is the floor on which the throne of the Most High is placed. That the *rakia* should be transparent, as implied in the comparisons with the sapphire (Exod. l. c.) and with crystal (Ezek. l. c.; comp. Rev. iv, 6), is by no means inconsistent with its solidity. Further, the office of the *rakia* in the economy of the world demanded *strength* and *substance*. It was to serve as a division between the waters above and the waters below (Gen. i, 7). In order to enter into this description we must carry our ideas back to the time when the earth was a chaotic mass overspread with water, in which the material elements of the heavens were intermingled. The first step, therefore, in the work of orderly arrangement was to separate the elements of heaven and earth, and to fix a floor of partition between the waters of the heaven and the waters of the earth; and accordingly the *rakia* was created to support the upper reservoir (Psa. cxlviii, 4; comp. Psa. civ, 3, where Jehovah is represented as "building his chambers of water," not simply "in water," as the A. Vers.; the prep. *ב* signifying the *material* out of which the beams and joists were made), itself being supported at the edge or rim of the earth's disk by the mountains (2 Sam. xxii, 8; Job xxvi, 11). In keeping with this view the *rakia* was provided with "windows" (Gen. vii, 11; Isa. xxiv, 18; Mal. iii, 10) and "doors" (Psa. lxxviii, 23), through which the rain and the snow might descend. A secondary purpose which the *rakia* served was to support the heavenly bodies, sun, moon, and stars (Gen. i, 14), in which they were fixed as nails, and from which, consequently, they might be said figuratively to drop off (Isa. xiv, 12; xxxiv, 4;

Matt. xxiv, 29). In all these particulars we recognise the same view as was entertained by the Greeks, and, to a certain extent, by the Latins. The former applied to the heaven such epithets as "brazen" (χάλκεον, Homer, *Iliad*, xvii, 425; Pind. *Pyth.* x, 42; *Nem.* vi, 6; πολύχαλκον, *Il.* v, 504; *Od.* iii, 2) and "iron" (σίδηρον, *Od.* xv, 328; xvii, 565)—epithets also used in the Scriptures (Lev. xxvi, 19)—and that this was not merely poetical embellishment appears from the views promulgated by their philosophers, Empedocles, who described the heavens as *σπερμίονον* and *κρυσταλλοειδής*, composed of air glaciated by fire (Plutarch, *Plac. Phil.* ii, 11; Stobæus, *Eclóg. Phys.* i, 24; Diog. Laertius, viii, 77; Lactant. *De Opif. D. i.*, c. 17; comp. Karsten, *Phil. Gr. Veter. Operum Reliquiæ*, ii, 422); and Artemidorus, who taught that "summa cæli ora solidissima est, in modum tecti durata" (Seneca, *Quest.* vii, 13). The same idea is expressed in the *cælo affixa sidera* of the Latins (Pliny ii, 39; xviii, 57). Plato also, in his *Timæus*, makes mention of the visible heaven under the notion of *τάσις* (from *τείνω*, to extend), not unlike the Hebrew derivation. If it be objected to the Mosaic account that the view embodied in the word *rakia* does not harmonize with strict philosophical truth, the answer to such an objection is, that the writer describes things as they appear rather than as they are. But, in truth, the same absence of philosophic truth may be traced throughout all the terms applied to this subject, and the objection is levelled rather against the principles of language than anything else. Examine the Latin *cælum* (κόλιον), the "hollow place" or cave scooped out of solid space ("cavernæ cæli," Lucret. iv, 172; compare Pott, *Etymol. Forschungen*, i, 23, 27); our own "heaven," i. e. what is *heaved up*; the Greek *οὐρανός*, similarly significant of height (Pott, *Etym. Forsch.* i, 123); or the German "himmel," from *heimeln*, to cover—the "roof" which constitutes the "heim" or abode of man: in each there is a large amount of philosophical error. Correctly speaking, of course, the atmosphere is the true *rakia* by which the clouds are supported, and undefined space is the abode of the celestial bodies. There certainly appears an inconsistency in treating the *rakia* as the support both of the clouds and of the stars, for it could not have escaped observation that the clouds were below the stars; but perhaps this may be referred to the same feeling which is expressed in the *cælum ruit* of the Latins, the downfall of the *rakia* in stormy weather. Although the *rakia* and the *shamayim* ("heavens") are treated as identical in Gen. i, 8, yet it was more correct to recognise a distinction between them, as implied in the expression "firmament of the heavens" (Gen. i, 11), the former being the upheaving power and the latter the upheaved body—the former the line of demarcation between heaven and earth, the latter the *strata* or stories into which the heaven was divided. See COSMOGONY.

2. Hence it is easy to conceive how the Gr. translators came to render the Heb. term in question by *σπερμίονον*, a word which is commonly used to designate some compact solid, such as the basis of a pillar, or a pillar itself, and which is used elsewhere by the Sept. as equivalent to the Heb. רֹכֶן, a rock (Psa. xviii, 2), and by Symmachus and Theodotion as the rendering of the Heb. מַטֵּה, a staff. Basil. (*Hexæm.* Hom. 3) explains the term as not intended to describe what is naturally hard, and solid, and weighty, which belongs rather to the earth; but says that because the nature of the object above it is fine and thin, and not perceptible by sense, it is called *σπερμίονον*, by a comparison between things of extreme rarity and such as can be perceived by sense (*συγκρίσει τῶν λεπτοτάτων καὶ τῇ αἰσθησῇ καταληπτῶν*). It is not very clear what his meaning here is, but probably he intended that as a solid extension would be properly called a *σπερμίονον*, so this mass of light and vapory substances might by analogy receive this name. Others have suggested

that this term was employed to indicate that the רֹכֶן is the "universitas τῶν λεπτομερῶν in regionem superam conglobata et firmata," along with the idea that this "nihil habet uspiam inanitatis, sed omnia sui generis naturæ plena" (Fuller, *Miscel. Sac.* bk. i, c. vi). Fuller thinks also that the Sept. selected *σπερμίονον* rather than *πέτασμα* or *περιπέτασμα* in order to convey the idea of *depth* as well as superficial expansion. The general opinion, however, is, that the Sept. adopted this term rather than one exactly equivalent to the original, because it conveys what was the Hebrew belief concerning the upper atmosphere or visible heavens, which they regarded as a solid expanse encircling the earth, although the true state of the case was probably not unknown to them (Job xxxvi, 27, 28). Others, nevertheless, think that the waters above the *rakia* are merely the clouds, which need no solid support (Delitzsch, *Comment.* on Gen. i, 6; Kurz, *Bible and Astronomy*, in *Hist. of the Old Covenant*, i, 30).

3. With some old astronomers the *firmament* is the orb of the fixed stars, or the highest of all the heavens. But in Scripture and in common language it is used for the middle regions, the space or expanse appearing like an arch immediately above us in the heavens. Many of the ancients, and of the moderns also, account the firmament a fluid substance; but those who gave it the name of "firmament" must have regarded it as solid. In the Ptolemaic astronomy, the *firmament* is called the eighth heaven or sphere, with respect to the seven spheres of the planets, which it surrounds. It is supposed to have two motions—a diurnal motion imparted to it by the *primum mobile*, from east to west, about the poles of the ecliptic, and another opposite motion from west to east, which last is completed, according to Tycho, in 25,412 years; according to Ptolemy, in 36,000; and according to Copernicus, in 25,800; in which time the fixed stars return to the same points in which they were at the beginning. This period is called the *Platonic*, or *Great Year*.—Kitto, s. v.; Smith, s. v. See ASTRONOMY.

**Firmicus, JULIUS MATERNUS**, a Christian writer of the 4th century, of whom little is known. There was an astrologer of the same name and time, who wrote *Matheseos lib. viii.* There was a bishop of Milan of the same name, who flourished at the same time, but probably not the same person. He wrote a book, *De Errore Profanarum Religionum*, which he dedicated to Constantius and Constans; and from this it appears he was bred up in heathenism, and afterwards converted to the Christian faith. He is not mentioned by any ancient writer; and there is no direct evidence that he held any sacred office in the Christian Church. From internal evidence, it appears certain that the treatise was written between A.D. 343 and 350. An analysis of it is given by Ceillier, *Auteurs Sacrés* (Par. 1865), iv, 310 sq. The object of the treatise is to trace the history of the pagan faith, and to demonstrate the falsehood of its various forms. It adopts and applies the theory of Euhemerus (q. v.). It was first printed by Matt. Flacius (Strasburg, 1562); the latest separate edition is that of Munter (Copenhagen, 1826, 8vo), with prolegomena and notes. It may be found also in *Bib. Max. Patrol.* iv, 164; Galland, *Bib. Patrol.* v, 23; and Migne, *Patrol. Lat.* vol. xii.

**Firmilian, Sr.**, bishop of Caesarea, in Cappadocia, was an intimate friend both of Origen (Euseb. vi, 27) and Cyprian, with the latter of whom he took part in the controversy relative to the necessity of rebaptizing those who had been baptized by heretics. On this subject he wrote an *Epistle to St. Cyprian*, which was undoubtedly written in Greek, though the epistle extant in St. Cyprian's works is in Latin; it is generally allowed to have been translated by Cyprian himself. It is very valuable in disproving the authority of the bishop of Rome as *pope* in the 3d century. This epistle, which is a very long one, is the sixty-fifth among

those of St. Cyprian, and may be found in Oberthür's edition of Cyprian (i, 254); also in Routh, *Script. Eccl. Opuscula* (Oxon. 1840, i, 227); and in Migne, *Patrol. Lat.* vol. iii. Baronius places the death of Firmilian A. D. 272.—Clarke, *Succession of Sacred Literature*, i, 172; Cave, *Hist. Liter.* (Geneva, 1720), i, 78; Ceillier, *Auteurs Sacrés* (Paris, 1865), ii, 435 sq.

**Firmin**, THOMAS, an English Unitarian, noted for public benefactions and charities, was born at Ipswich, in Suffolk, June, 1632. His parents were Puritans, very reputable and substantial people, and at a proper age put out their son to an apprenticeship in London. His master was an Arminian, a hearer of Mr. John Goodwin, to whose sermons young Firmin resorting, "exchanged," as we are told, "the harsh opinions of Calvin, in which he had been educated, for those more reasonable ones of Arminius and the Remonstrants." He was led to certain opinions not agreeable to the orthodox faith, for instance, that "the unity of God is a unity of person as well as of nature, and that the Holy Spirit is indeed a person, but not God." He settled in business in Lombard Street, and became intimate with Whicheote, Wilkins, Tillotson, etc.; so particularly with the last that, when obliged to be out of town, at Canterbury, perhaps, where he was dean, he left to Mr. Firmin the provision of preachers for his Tuesday's lecture at St. Laurence. Queen Mary heard of his usefulness, and that he was heterodox in the articles of the Trinity, the divinity of our Saviour, and the atonement. She spoke to Tillotson, therefore, to set him right in those weighty and necessary points, who answered that he had often endeavored it, but that Mr. Firmin had now so long imbibed the Socinian doctrine as not to be capable of renouncing it. However, his grace, for he was then archbishop, published his sermons, formerly preached at St. Laurence's, concerning those questions, and sent Mr. Firmin one of the first copies from the press, who, not convinced, caused a respectful answer to be drawn up and published, with this title, *Considerations on the Explications and Defences of the Doctrine of the Trinity*, himself giving a copy to his grace. The plague in 1665, and the fire in 1666, furnished him with a variety of objects of charity. He went on with his trade in Lombard Street till 1676, at which time his biographer supposes him to have been worth £9000, though he had disposed of incredible sums in charities. This year he erected his warehouse in Little Britain for the employment of the poor in the linen manufacture, on which Tillotson spoke honorably in his funeral sermon on Mr. Gouge in 1681. In 1680 and 1681 came over the French Protestants, who furnished new work for Mr. Firmin's zeal and charity, and in 1682 he set up a linen manufacture for them at Ipswich. During the last twenty years of his life he was one of the governors of Christ-church Hospital in London, to which he procured many considerable donations. In April, 1693, he became a governor of St. Thomas's Hospital in Southwark; and, indeed, there was hardly any public trust or charity in which he either was not or might not have been concerned. He was buried, according to his desire, in the cloisters of Christ-church Hospital, and there is placed in the wall near his grave an inscription in terms of the highest panegyric. His *Life* was published in 1698, and again by Cornish, 1780, 12mo.—*New Gen. Biog. Dict.* s. v.; Wesley, *Works* (N. Y.), ii, 574.

**First-born** (בְּרִיָּה, בְּרִיָּה, from בָּרָא, to ripen early; Sept. and N. T. πρωτότοκος, Vulg. *primogenitus*), applied equally to animals and human beings. Among the Hebrews the first-born son had many privileges, to be entitled to which it was not only required that a man should be the first child of his mother, but that he should be, at the same time, the first son of his father (Deut. xxi, 15-17). The eldest son received a double portion of the father's inheritance (Deut. xxi,

17), but not of the mother's (Mishna, *Bekoroth*, viii, 9). If the father had married two wives, of whom he preferred one to the other, he was forbidden to give precedence to the son of the one if the child of the other were the first-born (Deut. xxi, 15, 16). In the case of levirate marriage, the son of the next brother succeeded to his uncle's vacant inheritance (Deut. xxv, 5, 6). Under the monarchy, the eldest son usually, but not always, as appears in the case of Solomon, succeeded his father in the kingdom (1 Kings i, 30; ii, 22). That some rights of primogeniture existed in very early times is plain, but it is not so clear in what they consisted. They have been classed as (a.) authority over the rest of the family; (b.) priesthood; (c.) a double portion of the inheritance. The birthright of Esau and of Reuben, set aside by authority or forfeited by misconduct, prove a general privilege as well as quasi-sacredness of primogeniture (Gen. xxv, 23, 31, 34; xlix, 3; 1 Chron. v, 1; Heb. xii, 16), and a precedence which obviously existed, and is alluded to in various passages (as Psa. lxxxix, 27; Job xviii, 13; Rom. viii, 29; Colos. i, 15; Heb. xii, 23); but the story of Esau's rejection tends to show the supreme and sacred authority of the parent irrevocable even by himself, rather than inherent right existing in the eldest son, which was evidently not inalienable (Gen. xxvii, 29, 33, 36; Grotius, Calmet, Patrick, Knöbel, on Gen. xxv). See Hottinger, *De primogenitis* (Marb. 1711); Schröder, *De rect. Hebr. et primogenitis* (Marb. 1741); Fabricius, *Bibliogr. Antiq.* p. 892; Gerdes, *De variis locis in quibus primogenitorum mentio occurrit* (Duisb. 1730); Frischmuth, *De primogenitura* (Jen. 1649). See BIRTHRIGHT.

The expression "first-born" is not always to be understood literally; it is sometimes taken for the prime, most excellent, most distinguished of things. Thus "Jesus Christ" is "the first-born of every creature, the first-begotten, or first-born from the dead;" begotten of the Father before any creature was produced; the first who rose from the dead by his own power (see *Jour. Sac. Lit.* Apr. 1861). Wisdom says that she came out of the mouth of the Most High before he had produced any creature (Prov. viii, 22; Eccles. xxiv, 3; Isa. xiv, 30). "The first-born of the poor" signifies the most miserable of the poor (Job xviii, 13); "the first-born of death," the most terrible of deaths (see Wemyss, *Symbol. Dict.*). The "Church of the first-born" (Heb. xii, 23) signifies the Church of the redeemed—those who have become peculiarly the Lord's, and through the blood of the everlasting covenant, applied to their consciences, are consecrated to him for evermore, in accordance with the custom of consecration described below (see Schöttgen, *Hor. Hebr.* i, 922).

**DESTRUCTION OF THE FIRST-BORN.** This was the tenth and last plague inflicted on the Egyptians (Exod. xi, 1-8; xii, 29, 30). We learn from Herodotus (ii, 85) that it was the custom of the Egyptians to rush from the house into the street, to bewail the dead with loud and bitter outcries; and every member of the family united in these expressions of sorrow. How great must their terror and grief have been when "at midnight Jehovah smote all the first-born in the land of Egypt." Hengstenberg remarks (*Egypt and the Books of Moses*) that "the phrase 'all the first-born' must not be pressed too far. The whole tenor of the narrative is opposed to such a proceeding, and particularly the declaration, 'There was no house where there was not one dead;' since in every house there was not a first-born. It must not be inferred that none of the first-born remained alive in the land, or that none besides the first-born died. That the Egyptians were swept off by an epidemic is indeed probable, and much more than probable, from Exod. ix, 15. What the Lord there says, he had long been able to do, that he now really does; since the reasons here given in ver. 16, which until now have prevented him from proceeding to this last resource, have now ceased; since, in short, he has by a series of acts sufficiently unfold-

ed his omnipotence and grace." See PLAGUES OF EGYPT.

**FIRST-BORN, SANCTIFICATION AND REDEMPTION OF** (פְּרִי־הַבְּיָרֵךְ, קִרְוֵי־בְּיָרֵךְ). Males of human beings and animals were strictly enjoined to perpetuate the remembrance of the death of Egypt's first-born, whereby the liberty of the Israelites was secured, and of the preservation of Israel's first-born. Compare Exod. xii, 2, 11-15.

1. *Sanctification of the First-born, its significance, etc.*—The fact that the first-born of Egypt were selected to be smitten down for the hard-heartedness of Pharaoh, and that their death was regarded as the greatest calamity, shows of itself that a peculiar sanctity had already been attached to the first-born of both man and cattle. The cause of this is easily traced in the Scriptures. The power of procreation was declared by God himself to be a special blessing (Gen. i, 22, 28; ix, 1; xvii, 16; xxix, 31), and was granted as a reward to those who were well pleasing in his sight (Gen. xv, 4; Psa. cxxviii, 4). This was fully appreciated by the Jews; for the possession of children, especially of the male sex, was esteemed the climax of social happiness (Gen. xvi, 2; xxix, 31; Deut. vii, 13, 14; Psa. cxxviii, 3, 4), and the absence of them was considered a *reproach* (קִרְוֵי־בְּיָרֵךְ), since it implied divine displeasure (Gen. xxx, 23), and no other earthly blessing could compensate for it (Gen. xvi, 1-5). Moreover, the first-born of newly-married young people (קִרְוֵי־בְּיָרֵךְ, Psa. cxxvii, 4) were believed to represent the prime of human vigor (פְּרִי־הַבְּיָרֵךְ), being born before the strength of the father began to diminish (Gen. xlix, 3; Deut. xxi, 17; Psa. lxxxviii, 51; cv, 36). It was therefore natural that the first instalment of God's blessing, and the prime of man's strength, should be regarded with peculiar affection, and have special sanctity attached to him, and that by virtue of the claim which God has to what is most loved and held sacred by us, and gratitude on the part of man, the first-born males, both of man and animals, should be consecrated to the Giver of all good things; the one as a priest, representing the family to which he belonged (Exod. xix, 22, 24), and the other as a sacrifice (Gen. iv, 4), just as the fat of sacrifices was devoted to God because it was regarded as the prime part of the animal. See FAT. This explains the fact why the plague of the first-born of the Egyptians was so terribly felt; it was the destruction of the objects most dear and sacred to them, whilst the first-born of the Hebrews, i. e. their priests and sacrifices, were spared. Moreover, it shows the import of the consecration enjoined in Exod. xiii, 1. Hitherto it was optional with the Hebrews whether they would devote the first-born to the Lord, but now God, by virtue of having so signally interposed for their deliverance, *claims the public consecration of the first-born of man as his priests, and of the first-born of animals as sacrifices.*

2. *Origin of the Redemption of the First-born.*—This devotion of the first-born was believed to indicate a priesthood belonging to the eldest sons of families, which being set aside in the case of Reuben, was transferred to the tribe of Levi. This priesthood is said to have lasted till the completion of the tabernacle (Jahn, *Bibl. Arch.* x, § 165, 387; Selden, *De Syn.* c. 16; Mishna, *Zebuchim*, xiv, 4, vol. v, 58; comp. Ezek. xxiv, 5). After the building of the tabernacle and the introduction of the extensive sacrificial service, which required a special priestly order, as well as a separate staff of servants, who could *exclusively* devote themselves to the ministry of the sanctuary, the offices of the first-born were superseded by those of the Levites (Numb. iii, 11-13), and it was ordained that the first-born of the other tribes, as well as the first-born of the animals which could not be sacrificed, should henceforth be redeemed (ib. xviii, 15).

3. *Redemption of the First-born of Man.*—The redemption of a child is to take place when it is a month old, when the father is to give to the priest five silver shekels of the sanctuary, i. e. about three dollars as the maximum. If it died before the expiration of 90 days, the Jewish doctors held the father excused, but liable to the payment if it outlived that time (Exod. xiii, 12-15; xxii, 29; Numb. viii, 17; Lev. xxvii, 6; Lightfoot, *Hor. Hebr.* on Luke ii, 22; Philo, *De Pr. Sacerd.* i, ii, 233; Mangey). If the child was sickly, or appeared otherwise to be inferior to children generally, the priest could estimate it at less than this sum (Numb. iii, 46, etc.; xviii, 16). The priest had to come to the house of the infant, as the mother could not appear with it in the Temple because her days of purification, according to the law (Lev. xii, 2, 4), were not as yet accomplished. No bargaining was allowed, but if the priest saw that the parents were poor, he could, if he chose, return the money when the ceremony was over. When the mother's days of purification were accomplished, and she could appear in the Temple, she then brought the child to the priest to be presented publicly to the Lord (Luke ii, 22). The Jews still observe this law of redemption. When the first-born male is thirty days old, the parents invite to their house their friends and a priest (קִרְוֵי־בְּיָרֵךְ) to a meal for the following day. The priest, having invoked God's blessing upon the repast, and offered some introductory prayers, etc., looks at the child and the price of redemption presented before him, and asks the father which he would rather have, the money or the first-born child. Upon the father's reply that he would rather pay the price of redemption, the priest takes the money, swings it round the head of the infant in token of his vicarious authority, saying, "This is for the first-born, this is in lieu of it, this redeems it; and let this son be spared for life, for the law of God, and for the fear of Heaven. May it please Thee, that, as he was spared for redemption, so he may be spared for the Law, for matrimony, and for good works. Amen." The priest lays his hand upon the child's head and blesses it, as follows: "The Lord make thee as Ephraim and Manasseh!" etc. It is to this that the apostle Peter refers when he says, "Ye were not redeemed with corruptible things, as silver and gold," etc. (1 Peter i, 18). When the first-born son is thirteen years of age, he fasts the day before the feast of Passover, in commemoration of the sparing of the first-born of the Hebrews in Egypt. See FASTER.

4. *Redemption of the First-born of clean Animals.*—The male first-born of animals (קִרְוֵי־בְּיָרֵךְ; Sept. *ἀναβοῶντων μῆτρων*; Vulg. *quod aperit vulvam*) was also devoted to God (Exod. xiii, 2, 12, 13; xxii, 29; xxxiv, 19, 20; Philo, *l. c.*, and *quis rerum die. hæres.* 24, i, 489, Mang.). The first-born of every clean animal (i. e., ox, sheep, goat, etc.), from eight days to twelve months old, had to be taken to Jerusalem every year (Deut. xii, 6, etc.), and delivered to the priest, who offered it as a sacrifice to Jehovah, sprinkled its blood upon the altar, burned the fat, and ate the flesh (Exod. xiii, 13; xxii, 30; xxxiv, 20; Numb. xviii, 15-17; Neh. x, 36). In the mean time the animal was not to be used for any work, for it belonged to the Lord (Deut. xv, 19); but if it had any blemish it was not to be sacrificed, but eaten up at home (ib. xv, 21, 22). Various refinements on the subject of blemishes are to be found in Mishna, *Bekoroth*. (See *Mab.* i, 8. By "firstlings," Deut. xiv, 23, compared with Numb. xviii, 17, are meant tithe animals: see Reland, *Antiq.* iii, 10, p. 327; Jahn, *Bibl. Arch.* § 387). If, however, the man whose cattle had first-born lived at too great a distance from Jerusalem to carry them thither, he was commanded to sell them, and take the money to the sanctuary (Deut. xiv, 24, 25).

5. *Redemption of the First-born of unclean Animals.*—The first-born of unclean animals, not being allowed

to be offered as sacrifices, were either to be redeemed according to the valuation of the priest, with the addition of one fifth of the value, and then remain with their owner, or be sold, and the price given to the priests (Lev. xxvii, 11-13, 27). The first-born of an ass was to be redeemed with a lamb, or, if not redeemed, put to death (Exod. xiii, 13; xxxiv, 20; Numb. xviii, 15). Commentators hold that the first-born of dogs were killed, because they were unclean; and that nothing was given for them to the priests, because there was no trade or commerce in them. See Dent. xxiii, 18.

6. *Literature*.—Josephus, *Ant.* iv, 4, 4; Mishna, *Bechoroth*; Maimonides, *Mishna Torá*, iii, 241; *Hilchoth Bechoroth*; Ibn Ezra's comments on the passages cited in this article; Calmet, on Numb. xviii; *The Hebrew Prayer-Book*, by Knöplfmacher (Vienna, 1859), entitled *Derech Ha-Chajim*, p. 407; *Der Israelitische Volkslehrer*, vii, 41 sq.; ix, 138 sq., 212 sq., 248 sq.—Kitto, s. v.; Smith, s. v.

**First Day of the Week.** See LORD'S DAY.

**First-fruit** (in the sing. רֵשִׁית, *reshith'*, beginning; in the plur. בִּקְרֻרִים, *bikkurim'*, first-ripe fruits; Sept. *πρωτογεννηματα*, ἀπαρχή, ἀπαίσιμα; Vulgate *primitia*, *primitiva*, *frugum initia*; comp. תְּרוּמָה, *terumah*, oblation; A. V. "heave-offering," etc.). The same natural feeling which at first led man out of gratitude to consecrate to the Giver of all good things the first-born of both man and animals, and the prime parts of sacrifices, because they were regarded as the first instalments of his blessings, and which afterwards led to the legalizing of these offerings, also gave rise to the offering of the first-fruits and to its becoming law. This was done publicly by the nation at each of the three great yearly festivals, and also by individuals without limitation of time. No ordinance appears to have been more distinctly recognised than this, so that the use of the term in the way of illustration carried to it a full significance even in N.-T. times (Prov. iii, 9; Tob. i, 6; 1 Macc. iii, 49; Rom. viii, 23; xi, 16; James i, 18; Rev. xiv, 4).

1. *Character and Classification of the First-fruits*.—(1.) On the morrow after the Passover Sabbath, i. e. on the 16th of Nisan, a sheaf of new corn was to be brought to the priest, and waved before the altar, in acknowledgment of the gift of fruitfulness (Lev. xxiii, 5, 6, 10, 12; ii, 12). Josephus tells us that the sheaf was of barley, and that, until this ceremony had been performed, no harvest work was to be begun (*Ant.* iii, 10, 5). See PASSOVER.

(2.) At the expiration of seven weeks from this time, i. e. at the feast of Pentecost, an oblation was to be made of two loaves of leavened bread made from the new flour, which were to be waved in like manner with the Passover sheaf (Exod. xxxiv, 22; Lev. xxiii, 15, 17; Numb. xxvii, 26). See PENTECOST.

(3.) The feast of ingathering, i. e. the feast of Tabernacles in the 7th month, was itself an acknowledgment of the fruits of the harvest (Exod. xxiii, 16; xxxiv, 22; Lev. xxiii, 39). See TABERNACLES.

Besides these stated occasions, the law also required every individual to consecrate to the Lord a part of the first-fruit of the land (comp. Exod. xxii, 29; xxiii, 19; xxxiv, 26; Numb. xv, 20, 21; xviii, 12, 13; Deut. xviii, 4; xxvi, 2-11). The first-fruits to be offered are restricted by Jewish tradition to the seven chief productions of Palestine, viz. wheat, barley, grapes, figs, pomegranates, olives, and honey, mentioned in Deut. viii, 8 in praise of the land (comp. Mishna, *Bikurim*, i, 3; *Berachoth*, 35, a; Maimonides, *Jod Ha-Chezaka*, *Hilchoth Bikurim*, ii, 2), to which perhaps may be added dates (Gesenius, *Thes.* p. 219; Mishna, *Bikurim*, i, 3; Hasselquist, *Travels*, p. 417); but the law appears to have contemplated produce of all sorts, and to have been so understood by Nehemiah (Deut. xxvi, 2; Neh. x, 35, 37). By the Talmudists they are divided into

two classes: 1. *The actual produce of the soil, the raw material, such as corn, fruits, etc., which are denominated* רֵשִׁית, *πρωτογεννηματα*, *primitiva*; and, 2. *Preparations of the produce, as oil, flour, wine, etc., which are called* תְּרוּמָה, *ἀπαρχαι*, *primitia* (comp. Midrash *Rabba*, the Chaldee Paraphrases of Onkelos and Jonathan ben-Uziel, and Rashi on Exod. xxii, 29). (Gesenius, *Thes.* p. 1276; Augustine, *Quæst. in Hept.* iv, 32, vol. iii, p. 732; Spencer, *De Leg. Hebr.* iii, 9, p. 713; Reland, *Antiq.* iii, 7; Philo, *De Pr. Sacerd.* i [ii, 233, Mang.]; *De Sacrific. Abel. et Cain*, 21 [i, 177, M.]; *De Monarchia*, ii, 3 [ii, 224, Mang.]

2. *Quantity and Time of Offering*.—Of the public offerings of first-fruits, the law defined no place from which the Passover sheaf should be chosen, but the Jewish custom, so far as it is represented by the Mishna, prescribed that the wave-sheaf or sheaves should be taken from the neighborhood of Jerusalem (*Terumoth*, x, 2). Deputies from the Sanhedrim went out on the eve of the festival, and tied the growing stalks in bunches. In the evening of the festival day the sheaf was cut with all possible publicity, and carried to the Temple. It was there threshed, and an omer of grain, after being winnowed, was bruised and roasted: after it had been mixed with oil and frankincense laid upon it, the priest waved the offering in all directions. A handful was thrown on the altar-fire, and the rest belonged to the priests, to be eaten by those who were free from ceremonial defilement. After this the harvest might be carried on. After the destruction of the Temple all this was discontinued, on the principle, as it seems, that the house of God was exclusively the place for oblation (Lev. ii, 14; x, 14; xxiii, 13; Numb. xviii, 11; Mishna, *Terum.* v, 6; x, 4, 5; *Shekalim*, viii, 8; Josephus, *Ant.* iii, 10, 5; Philo, *De proem. sac.* i [ii, 233, Mang.]; Reland, *Antiq.* iii, 7, 3; iv, 3, 8).

The offering made at the feast of Pentecost was a thanksgiving for the conclusion of wheat harvest. It consisted of two loaves (according to Josephus one loaf) of new flour baked with leaven, which were waved by the priest as at the Passover. The size of the loaves is fixed by the Mishna at seven palms long and four wide, with horns of four fingers length. No private offerings of first-fruits were allowed before this public oblation of the two loaves (Lev. xxiii, 15, 20; Mishna, *Terum.* x, 6; xi, 4; Josephus, *Ant.* iii, 10, 6; Reland, *Antiq.* iv, 4, 5).

The quantity of private first-fruits to be consecrated to the Lord has neither been fixed by the law nor by tradition; it was left entirely to the generosity of the people. "Yet," says Maimonides, "it is implied that a sixtieth part is to be consecrated, and he who wishes to devote all the first-fruits of his field may do so" (*Hilchoth Bikurim*, ii, 17). The way in which a proprietor fixed which first-fruit he should offer was this, as the Mishna tells us, "when he went into his field and saw a fig ripening, or a bunch of grapes, or a pomegranate, he tied a rush about it, and said, 'Lo, this is first-fruit'" (*Bikurim*, iii). All the first-fruits thus devoted to the Lord had to be delivered at Jerusalem before the feasts of Pentecost and Dedication (Exod. xxiii, 16; Lev. xxiii, 16, 17; *Bikurim*, i, 36); any offering brought after this time was not received.

3. *Manner in which these Offerings were taken to Jerusalem*.—The first-fruits of the land were to be brought in a basket to the holy place of God's choice, and there presented to the priest, who was to set the basket down before the altar. The offerer was then, in words of which the outline, if not the whole form was prescribed, to recite the story of Jacob's descent into Egypt, and the deliverance therefrom of his posterity, and to acknowledge the blessings with which God had visited him (Deut. xxvi, 2-11). The law that every one should take up the first-fruits to Jerusalem was soon found impracticable, since even the most pious Israel-

ite found it very difficult, in addition to his appearing at the three great festivals, to have to go to the Temple with every newly-ripened fruit. Nor was it found convenient for every one to go up with his first-fruits separately. Hence the custom arose, that when the first-fruits were ripe, all the inhabitants of one district who were ready to deliver them assembled together in the principal town of that locality where their representative lived, with a basket containing the ripe fruits of the seven several kinds, arranged in the following manner: "The barley was put lowermost, the wheat over it, the olives above that, the dates over them, the pomegranates over the dates, and the figs were put uppermost in the basket, leaves being put between every kind to separate it from the other, and clusters of grapes were laid upon the figs to form the outside of the basket" (Maimonides, *Hilchoth Bikurim*, iii, 7; *Tosifia Bikurim*, ii). With this basket all the pilgrims (or at least a company of twenty-four persons) staid up all night in the open market-place, because they were afraid to go into houses to sleep lest any inmate of them should die, and thus cause pollution. Early in the morning the representative of the district, who was the official (בְּרֵאשִׁית) and *ex officio* the leader of the imposing procession, summoned them with the words of the prophet Jeremiah, "Arise, and let us go up to Zion, to the house of Jehovah our God" (xxxii, 6). The whole company were then ready to start. We cannot do better than give literally the description which the Mishna and the Talmud give of this imposing procession: An ox [destined for a peace-offering] went before them with gilded horns and an olive crown upon its head, and a piper who played before them, whilst the air rang with the song of the people, "I was glad when they said unto me, Let us go into the house of the Lord" (Psa. cxxii, 1). On approaching Jerusalem a messenger was sent forward to announce their arrival, and the first-fruits were tastefully arranged. The officiating priest, the Levites, and the treasurers went out to meet them, the number of officials who went out being in accordance with the largeness of the party that arrived, and conducted them into the holy city, singing, as they entered, "Our feet stand within thy gates, O Jerusalem" (Psa. cxxii, 2), whilst all the workmen [who plied their craft] in the streets of Jerusalem stood up before them and welcomed them, saying, "Brethren of such and such a place, peace be with you." The piper continued to play before them till the procession came to the mount of the Temple. Here every one, even the king, took his own basket upon his shoulders, and went forward till they all came to the court of the Temple, singing, "Praise ye the Lord, praise God in his sanctuary," etc. [through the whole of Psalm c] ; whereupon the Levites sang, "I will extol thee, O Lord! because thou hast lifted me up, and hast not made my foes to rejoice over me" (Psa. xxx). Then the pigeons which were hung about the baskets were taken for burnt-offerings, and the pilgrims gave to the priests what they brought in their hands. With the baskets still upon their shoulders every one repeated, "I profess this day unto the Lord thy God," etc., till he came to the words, "A wandering Syrian was my father" (i. e. from Deut. xxvi, 3-5), when he took the basket off his shoulders and laid hold of it by its brim; the priest then put his hands under it and waved it, whilst the offerer continued to recite from the words "A wandering Syrian," where he had left off, to the end of the section (i. e. to Deut. xxvi, 10), then put the basket by the side of the altar, threw himself down on his face, and afterwards departed (Mishna, *Bikurim*, iii, 2-6; *Jerusalem Bikurim*, 65; Maimonides, *Hilchoth Bikurim*, iv, 16, 17). These first-fruits then became the property of the priests who officiated during that week. The baskets of the rich were of gold or silver, those of the poor of peeled willow. The baskets of the latter kind were presented to the priests, who waved the offerings at the S.W. corner of

the altar: the more valuable baskets were returned to the owners (*Bik.* iii, 6, 8). After passing the night at Jerusalem, the pilgrims returned on the following day to their homes (Deut. xvi, 7; *Terum.* ii, 4). It is mentioned that king Agrippa bore his part in this highly picturesque national ceremony by carrying his basket like the rest to the Temple (*Bik.* iii, 4). Among other by-laws were the following: 1. He who ate his first-fruits elsewhere than in Jerusalem, and without the proper form, was liable to punishment (*Maccoth.* iii, 3, vol. iv, 284, Surenh.). 2. Women, slaves, deaf and dumb persons, and some others, were exempt from the verbal oblation before the priest, which was not generally used after the feast of Tabernacles (*Bik.* i, 5, 6).

4. *Exemption from the Offering or the connected Service.*—Those who simply possessed the trees and not the land were exempted from the offering of first-fruits, for they could not say "the land which thou hast given me" (Maimonides, *Hilchoth Bikurim*, ii, 13). Those, too, who lived beyond the Jordan could not bring first-fruits in the proper sense of the libation, inasmuch as they could not say the words of the service, from "the land that floweth with milk and honey" (Deut. xxvi, 15; compare Mishna, *Bikurim*, i, 10). A proselyte, again, though he could bring the offering, from "the land that floweth with milk and honey" (Deut. xxvi, 3), "I am come to the country which the Lord sware unto our fathers to give us" (*Bikurim*, i, 4). Stewards, servants, slaves, women, sexless persons, and hermaphrodites were also not allowed to recite the service, though they could offer the libation, because they could not use the words, "I have brought the first-fruits of the land which thou, O Lord, hast given me" (Deut. xxvi, 10), they having originally had no share in the land (*Bikurim*, i, 5).

5. *Offering of the prepared Produce.*—In this, too, the quantity to be offered was left to the generosity of the people. But it was understood, says Maimonides, that "a liberal man will give a fortieth part of his first-fruits; one who is neither liberal nor illiberal will give a fiftieth part, and a covetous man will give a sixtieth" (*Hilchoth Teruma*, iii, 2). They had to be presented even from the produce of Jewish fields in foreign countries, and were not allowed to be taken from the portion intended for tithes, nor from the corners left for the poor (*Teruma*, i, 5; iii, 7), and were not required to be delivered in the Temple, but might be given to the nearest priest (*ib.* iv, 3; *Bikurim*, ii, 2). They consisted of wine, wool, bread, oil, date-honey, onions, cucumbers (*Terum.* ii, 5, 6; *Numb.* xv, 19, 21; Deut. xviii, 4). The measuring-basket was to be thrice estimated during the season (*ib.* iv, 3). He who ate or drank his offering by mistake was bound to add one fifth, and present it to the priest (Lev. v, 16; xxii, 14), who was forbidden to remit the penalty (*Terum.* vi, 1, 5). The offerings were to be eaten or used only by those who were clean from ceremonial defilement (*Numb.* xviii, 11; Deut. xviii, 4).

6. *The First-fruit of the Dough.*—Besides the offering of the first-fruits themselves, the Israelites were also required to give to the Lord a cake made of the first corn that was threshed, winnowed, and ground (*Numb.* xv, 18-21). Tradition restricts this to wheat, barley, casmin, or rye, fox-ear (barley), and oats (*Chab.* i, 1; Maimonides, *Bikurim*, vi, 1), of which a twenty-fourth part had to be given, but the baker who made it for sale had to give a forty-eighth part (Maimonides, *Hilchoth Bikurim*, v, 2, 3). This was the perquisite of the priest, and it is to this that the apostle refers in Rom. xi, 16.

7. *First-fruits of Fruit-trees.*—According to the law, the fruits of every newly-planted tree were not to be eaten or sold, or used in any way for the first three years, but considered "uncircumcised" or unclean. In the fourth year, however, the first-fruits were to be consecrated to the Lord, or, as the traditional explana-

tion is, eaten in Jerusalem, and in the fifth year became available to the owner (Lev. xix, 23-25). The three years, according to Rabbinic law, began with the first of *Tisri*, if the tree was planted before the sixteenth of *Ab*. The reason of this is that the fruits of those three years were considered imperfect; such imperfect fruit could not, therefore, be offered to God; and as man was not allowed to partake of the produce before he consecrated the first instalment of God's blessings to the giver of all good things, the planter had to wait till the fifth year (comp. Josephus, *Ant. iv*, 8, 19; and *Aben Ezra* on Lev. xix, 23). The law may also have had the ulterior object of excluding from use crude, immature, and therefore unwholesome fruits. Michaelis (iii, 267-8), indeed, finds a benefit to the trees themselves in this regulation: "The economical object of the law is very striking. Every gardener will teach us not to let fruit-trees bear in their earliest years, but to pluck off the blossoms; and for this reason, that they will thus thrive the better, and bear more abundantly afterwards, since, if we may not taste the fruit the first three years, we shall be the more disposed to pinch off the blossoms, and the son will learn to do this of his father. The very expression 'to regard them as uncircumcised' suggests the propriety of pinching them off; I do not say *cutting* them off, because it is generally the hand, and not a knife, that is employed in the operation." The trees found growing by the Jews at the conquest were treated as exempt from this rule (*Mishna, Orlah, i*, 2). See *FRUIT*.

8. *Historical Notices*.—The corruption of the nation after the time of Solomon gave rise to neglect in these as well as in other ordinances of the law, and restoration of them was among the reforms brought about by Hezekiah (2 Chron. xxxi, 5, 11). Nehemiah also, at the return from captivity, took pains to reorganize the offerings of first-fruits of both kinds, and to appoint places to receive them (*Neh. x*, 35, 37; xii, 44). Perversion or alienation of them is reprobated, as care in observing is enlorged by the prophets, and specially mentioned in the sketch of the restoration of the Temple and Temple-service made by Ezekiel (*Exod.* xx, 40; xliv, 30; xlviii, 14; Mal. iii, 8).

An offering of first-fruits is mentioned as an acceptable to the prophet Elisha (2 Kings iv, 42).

Offerings of first-fruits were sent to Jerusalem by Jews living in foreign countries (Josephus, *Ant. xvi*, 6, 7).

Offerings of first-fruits were also customary in heathen systems of worship (Homer, *Il. ix*, 529; *Odys. iii*, 44; Eurip. *Orest.* 96; *Phon.* 1523; Callim. *in Ceres.* 19; Theoc. vii, 31; *Stat. Theb.* ii, 742; Aristoph. *Ran.* 1272; Pausan. i, 43, 4; ix, 19, 4; Long, *Pastor.* ii, 2 and 22; Diol. Siculus, i, 14; Plutarch, *Isid.* 66; Pliny, xviii, 2; iv, 6; Calpurn. *Ecl.* iv, 122; Ovid, *Mel.* viii, 273; x, 431; *Fast.* ii, 519; Tibul. i, 1, 13; Spanheim, *ad Callim. Del.* 283; Porphyry, *De Abst.* ii, 56, 32; Epictet. 38; etc.). See Patrick, *On Deut.* xxvi; Spencer, *De Leg. Hebr.* iii, 9, *De Primitiarum Origine*; Leslie, *On Tithe*, in *Works*, vol. ii; Douglai *Analect.* i, 89; Lakemacher, *Ant. Gr.* p. 402; Munter, *Relig. der Karthog.* p. 54.

9. *Figurative Allusions*.—In the New Testament, the "first-fruits" are emblematical of abundance and excellence, and also the earnest or sample of a full harvest at hand. Paul says (*Rom.* viii, 23), Christians "have the first-fruits of the Spirit," i. e. the first gifts of the Spirit, the earnest, the pledge of future and still higher gifts. (See the monographs on this text by Gruner [Hal. 1767], Anon. [Gott. 1767], Müller [*Satura Obs. Philol.* p. 120], Keil [Lips. 1869].) Christ is called "the first-fruits of them that slept," i. e. the first who rose from the dead (1 Cor. xv, 20, 23; xvi, 15; *Rom.* xi, 16; James i, 18; Rev. xiv, 4).

10. *Literature*.—*Mishna, Bikurim, Teruma, Chala, and Orla*; Maimonides, *Jod Ha-Chezaka, Hillotho Bikurim*, iii, 121; Lewis, *Antiq. of the Hebrew Republic*, i, 145, etc. (Lond. 1724); Saalschütz, *Mosaische Recht*, p. 343 sq., 416 sq., 433 sq.; Herzfeld, *Geschichte d. Volkes Israel*, ii, 128 sq.; Jost, *Geschichte des Judenthums*, i, 172 sq.; Carpov, *Appar.* p. 611 sq.; Bauer, *Gottesd. Verf.* i, 251 sq.; Gruner, *De primitiarum oblatione* (Lugd. B. 1739; also in Ugolino, xvii).—Kitto, s. v.; Smith, s. v. See OFFERING.

1. True Christians are called 'a kind of first-fruits of God's creatures (James i, 18), as being specially consecrated to him.' 2. The communications of God's grace on earth, as an earnest of future glory, are also so called (*Rom.* viii, 23), and for the same reason, the resurrection of Christ, as 'the pledge of the resurrection of the just' (1 Cor. iv, 20). 3. In an ecclesiastical sense, this term is applied to the first year's produce of benefices, which the pope demanded of foreigners to whom he gave benefices of the Church of England. Henry VIII rescued this payment from the pope, but annexed it to the crown. Queen Anne, however, gave them back to the Church for the augmentation of small livings" (Eden). See ANNATES. The *valor beneficiorum*, commonly called the value in the King's Books, was made at the same time as the statute 26 Henry VIII, c. 3, by which these payments were transferred to the crown. A former valuation had been made, 20 Edward I, which still exists in the exchequer. By this statute and one subsequent, 1 Elizabeth IV, every spiritual person admitted to a benefice must pay his first-fruits within three months after induction, in proper proportion: if he does not live half a year, or be ousted before the expiration of the first year, only one quarter is required; if he lives the year, or be ousted before eighteen months, one half; if a year and a half, three quarters; if two years, the whole. Archbishops and bishops have four years allowed them, and shall pay one quarter every year, if they live so long on the see. Other dignitaries pay as rectors and vicars. By several statutes of Anne, all livings under £50 per annum are discharged of the payment of first-fruits and tenths. The following notice of the valuation in the King's Books, and the former payments to the pope as *primicia*, is taken from Godwin's work, *De Præsulibus Angl.* The florin was 4s. 6d., the ducat 8s. It will be observed that the bishoprics of Oxford, Gloucester, Peterborough, Bristol, and Chester, as creations or revivals by Henry VIII, are not included in the above catalogue as paying to the pope.—Eadie, *Eccle. Cyclop.* s. v.; Bingham, *Orig. Eccle.* bk. v, ch. vi, § 4.

**Fish** (אֵיִשׁ, *dag*, so called from its great fecundity; Gr.

יצְהוּץ, Gen. ix, 2; Numb. xi, 22; Jonah ii, 1, 10; Matt. vii, 10; xiv, 17; xv, 34; Luke v, 6; John xxi, 6, 8, 11). The Hebrews recognised fish as one of the great divisions of the animal kingdom, and, as such, give them a place in the account of the creation (Gen. i, 21, 28; where, however, they are included under the general terms יְרֵבִיבִים, *she'rets*, *swarm*, and רֵמֵשׁ, *rome'seth*, *creeping thing*, i. e. destitute of legs; and as distinguished from the larger inhabitants of the deep, דַּגִּים, *tanninim*), as well as in other passages where an exhaustive description of living creatures is intended (Gen. ix, 2; Exod. xx, 4; Deut. iv, 18; 1 Kings iv, 33). They do not, however, appear to have acquired any intimate knowledge of this branch of natural history. Although they were acquainted with some of the names given by the Egyptians to the different species (for Josephus, *War*, iii, 10, 8, compares one found in the Sea of Galilee to the *coracinus*), they did not adopt a similar method of distinguishing them; nor was any classification attempted beyond the broad divisions of clean and unclean, great and small. The former was established by the Mosaic law (Lev. xi, 9, 10), which pronounced unclean such fish as were devoid of fins and scales: these were and are regarded as unwholesome food in Egypt (Wilkinson, *Anc. Egypt*, iii, 58, 59), so much so that one of the laws of El-Ilakim prohibited the sale, or even the capture of them (Lane, *Modern Egyptians*, i, 136, note; De Sacy, *Chrestomathie Arabe*, 2d ed. i, 98). This distinction is referred to in the terms *σαρούα* (*esui non idonea*, Schleusner's *Lex.* s. v.; Trench, *On Parables*, p. 137) and *καλά* (Matt. xiii, 48). This law of Moses may have given rise to some casuistry, as many fishes have scales, which, though imperceptible when first caught, are very apparent after the skin is in the least dried. Maimonides, with less reason, sees in the Levitical distinctions of *fins* and *scales* among fishes "marks whereby the more noble and excellent species might be distinguished from those that were inferior" (Townley's *More Nevochim*, p. 305). In no ordinance of the laws of Moses do we find *fishes* prescribed as religious offerings. In this respect, as well as many others, these laws were opposed to the heathen rituals, which appointed fish-offerings to various deities. Besides the *bipi lotus*, the *oxyrhincus*, the *phrygus* (*eel*, "from its unwholesome qualities not eaten by the ancient Egyptians," Wilkinson, v, 251), *latas*, and *maotes* were held sacred in various parts of ancient Egypt (Clem. Alex., Plutarch, Strabo, Athenæus, and the authorities referred to by Sir G. Wilkinson, v, 125). In the *Ordi-nances of Menu*, ch. v (on *Diet, Purification*, etc.), secs. 15, 16, "the twice-born man is commanded diligently to abstain from *fish*; yet the two fishes called *pathina* (sheat-fish, *Silurus pelorius*) and *rohita* (rohi-fish, *Cyprinus denticulatus*) may be eaten by the guests, when offered at a repast in honor of the gods or manes; and so may the *rajiva* (a large fish, *Cyprianus Niloticus*), the *sihatunda*, and the *susalca* (probably shrimps and prawns) of every species" (Sir W. Jones's *Laws of Menu*, by Haughton, p. 146). Similarly in the heathen observances of other nations; thus "Apu [query, *Anchovy*] Veneri erat sacra; Concha [perhaps *Pearl-oyster*] Veneri stat; Mullus Diane; pisces omnes Neptuno: Thuanus Neptuno." (Beyer, *Adit. ad Seldeni Syntag. de Diis Syriis*; Ugolini *Theaur.* xxxiii, 338. Vossius, in Hoffmanni *Lexicon*, iii, 771, has a much longer list of fourteen fishes, "a veteribus pro Diis habiti." Consecrated fishes were kept in reservoirs, with rings of gold, or silver, or brass attached to them. So Sir J. Chardin in Harmer, iii, 58.) It was perhaps as an image of fecundity that the fish was selected as an object of idolatry: the worship of it was widely spread, from Egypt (Wilkinson, iii, 58) to Assyria (Layard, *Nineveh*, ii, 467), and even India (Baur, *Mythologie*, ii, 58). Among the Philistines, Dagon (= *little fish*) was represented by a figure half man and half

fish (1 Sam. v, 4). On this account the worship of fish is expressly prohibited (Deut. iv, 18). See DAGON. The form of a fish (*Notius Poseidon*) was, from remote ages, a type of protective dominion, which the symbolizing spirit of the ancients caused to pass into Christianity, as appears from Eusebius (*Life of Constantine*) and St. Augustine (*De Civitate Dei*). On the walls of the oldest catacombs of Rome the representation of the ΙΧΘΥΣ is frequently discernible, and always interpreted as an emblem of the Saviour.

Taking fishes in the scientific sense of "oviparous, vertebrated, cold-blooded animals, breathing water by means of gills or *branchie*, and generally provided with fins," none are mentioned by name throughout the O. T. and N. T.; but, regarded in the popular and inexact sense of aquatic animals, inhabitants more or less of the water, we meet with eleven instances which require some notice here. 1. That well-known batrachian reptile, the frog (צְבָרָדִים, *tsopardé'û*), which emerges from a fish-like infancy, breathing by gills instead of lungs, and respiring water instead of air, is often mentioned in Exod. viii, but only in two passages else, Psa. lxxviii, 45, and cv, 30. See FROG. 2. The annelid *horse-leech*, whose name occurs only once, Prov. xxx, 15 (רֵמֵשׁ, *alukah*). "It would appear that the blood-sucking quality of this useful little animal is a direct and exclusive ordination of Providence for man's advantage. That blood is not the natural food of the animal is probable from the fact that, in the streams and pools which they inhabit, not one in a hundred could, in the common course of things, ever indulge such an appetite; and even when received into the stomach, it does not appear to be digested; for, though it will remain there for weeks without coagulating or becoming putrid, yet the animal usually dies unless the blood be vomited through the mouth" (Gosse's *Zool.* ii, 374). Of course it is the smaller species, the *Hirudo medicinalis*, that is here referred to. But the larger species, the *Hæmopsis sanguisuga*, or "horse-leech," has a still greater voracity for blood. Bochart (*Hieroz.* ii, 796-802) and Schultens (Prov. in loc.) give another turn to Prov. xxx, 15, by identifying רֵמֵשׁ with the Arabic *aluk*, and making *fate* or *destiny*, instead of the *horse-leech*, the insatiable exacter. The ancient versions, however, must be deemed to outweigh their learned speculations; added to which the Arabic *alukat*, the Syriac *aluka*, and the Chaldee and Talmudic רֵמֵשׁ, or רֵמֵשׁ, all designate the *leech*, which is as abundant in the East as it ever was in our Western countries. The blood-appetite of this animal made it suitable to point a proverb: Horace says, *Non missura cutem, nisi plena cruoris, hirudo* (De Arte Poet. 476). With this comp. Plautus, *Epidicus*, ii, 2, 4, 5; and Cicero, *ad Atticum*, lib. i, epist. 13. See HORSE-LEECH. 3. The testaceous mollusk (*Ostrea marina*, Gesenius, *Theas.* p. 1263), called by the Hebrews רֵמֵשׁ, *argamenu'*; by Avicenna, *Alargawean*; by Galen, *Θαλασσία φοφύρα*, is the *Murex trunculus* of zoology, from which the renowned Tyrian dye used to be obtained. This shell-fish (and not the "purple" extracted from it) is with good reason supposed by Gesenius to be referred to in Cant. vii, 5: *The tresses of thine head are like the wreathed shell of the purple-fish*: reminding us of the ancient head-dresses of the Athenians, described by Thucydides, i, 6, 3 (comp. the conical head-tuft of the Roman *Tutulus* [Varro, *De Ling. Lat.* vii, 3, 90], and Virgil's *Crines nodantur in aurum*). A second reference to this shell-fish probably occurs in Ezek. xxvii, 7. The Tyrians seem to have imported some *murexes* from the Peloponnesus (the same as "Elishah" according to Heeren, *Researches, Asiatic Nations* [Oxford, trans.], i, 361); and Gesenius supposes that these, the material out of which the celebrated dye was procured, are referred to by the prophet in his enumeration of the Tyrian merchandise. That

these fishes were supplied from the coast of Greece we learn from Horace, *Od.* ii, 18, 7 (*Laconice purpure*); from Pausanias, iii, 21, 6; and from Pliny, ix, 36. See PURPLE. 4. The other word used by Ezekiel in this passage, תֵּלֶלֶת, *tele'leth*, is described by Gesenius, *Thes.* p. 1503, as "a species of shell-fish (*Conchylium, Helix vandina* [*concha*]), found cleaving to the rocks in the Mediterranean Sea, covered with a violet shell (Forsk., *Descript. animal.* p. 127), from which was procured a dark-blue dye." In the many other passages where these two words occur, they undoubtedly designate either the colors or the material dyed in them. The phrase "treasures hid in the sand" (Dent. xxxii, 19) is supposed to refer to the abundance of the rich dyes afforded by the תֵּלֶלֶת and other testaceous animals found in the sand, on the Phœnician coast, assigned to Zebulon and Issachar (Targum of Jonathan b. Uziel, Walton, iv, 387, and Gesenius, *Thes.* p. 1503). See BLUE. 5. The תַּמִּי' (*plur.* תַּמִּיִּם or תַּמִּיִּת) must be carefully distinguished from תַּמִּי, *tamim'*, the plural of the unused word תַּמִּי, a *jackal*, according to Gesenius, *Thesaur.* p. 1138. "The sea-monsters," which are described by Jeremiah (Lament. iv, 3) as "suckling their young," used to be regarded as the mammiferous whales or other large *cetacea* (Calmet by Taylor, "Fragments" on *Natural History*, No. xxvi). They are by Gesenius (*l. c.*) supposed to be rather תַּמִּי, *jackals*; this is the reading of some of the MSS. (Kennicott, ii, 546), and Gesenius accepts the Masoretic text as an Aramaic form of it. In Ezek. xxix, 3, and xxxii, 2, the textual reading תַּמִּי, which is represented usually as an anomalous singular noun, should no doubt be תַּמִּי, the regular singular, which may well bear (what the other word could not) the suitable sense of *crocodile*; the MS. authority in favor of the latter word is overwhelming (Kennicott, ii, 212). For a description of the תַּמִּי, see WHALE. 6. תַּבְּחִי, *Behemoth'* (q. v.). 7. לֵוִיָּתָן, *Leviathan*. See CROCODILE. 8. "The great fish," גִּבְרִי' גָּדוֹל, of Jonah i, 17 (גִּבְרִי' in ii, 1), was probably some species of shark, such as the *Zypræna mælieus*, or the *Carcharias vulgaris* (the white shark), therefore strictly a fish. Of the same kind of huge fish, ἀθροιστάγοι, does Amos speak in prophecy, ix, 3, "I will command the serpent from the bottom of the sea, and he shall bite them" (Bochart, *Hieroz.* i, c. 40, l. 40). The difficulty that in the Sept. of Jonah, and in the Greek Testament (Matt. xii, 40), κήτος is the word by which the fish is designated, is removed by the fact that this Greek term does not specifically indicate whales only, as the objection supposes, but any of the larger inhabitants of the deep. (Wesseling's Herodot. *Fragm. de Incremento Nilæ*, p. 789, as quoted in Valpy's *Stephani Thes.* s. v. κήτος; here "piscis," as well as "bellue quælibet ingentes, veluti crocodilus et hippopotamus," are included.) Accordingly κήτος stands in the Sept., *passim*, for תַּבְּחִי, as well as for תַּמִּי (see Schleusner, *Lex. Y. T.* s. v. κήτος). Admiral Smyth, in the chapter on Ichthyology, in his *Mediterranean*, p. 196, says the white shark has been called "*Jona piscis*" from its transcendent claim "to have been the *great fish* that swallowed the prophet, since he can readily engulf a man whole." For more on the subject of this fish, see Kitto, *Bibl. Illustr.* vi, 399-404, and JONAH. 9. Of Tobit's fish, O. F. Fritzsche, in his commentary on the passage (Tobit vi, *passim*) enumerates nine or ten speculations by different writers. According to Bochart and Helvigius, the *Silurus* has the best claim. This the former describes as "being very large, of great strength and boldness, and ever ready to attack other animals, even men, an inhabitant of the rivers Euphrates and Tigris." C. H. Smith, in the first edition of Kitto's *Cyclopædia*, combats Bochart's conclusions,

and suggests "the *Sisar* of the Indus, a crocodile, probably of the genus *Gavial*, which grows to a great size, is eaten, and has a gall bladder, still used to cure obstinate wounds and defluctions." Glaire suggests the *sturgeon*, but this is more suitable to Northern rivers. Pennant mentions the capture of one in the Esk weighing 464 pounds (*British Zoology*, iii, 127). See more in Bochart, *Hieroz.* v, 14; Glaire, *Introduction de l'Ancien. et du N. T.* ii, 91 [ed. 3], Paris, 1862, and TORR. 10. If Dr. French and Mr. Skinner, in their *Translation of the Psalms*, are right in rendering Psa. civ, 26, "There swimmeth the *nautilus* and the *whale*," etc. (as if the sacred writer meant to indicate a *small*, though conspicuous, as well as a *large* aquatic animal, as equally the object of God's care), we have in the תַּמִּיִּם, *amiyoth'*, A. V. "ships," an unexpected addition to our Scripture nomenclature of fishes, in what lord Byron calls—

"The tender Nautilus who steers his prow,  
The sea-born sailor of his shell canoe,  
The ocean Mab, the fairy of the sea."—*The Island*.

In their note the translators say, "*The Nautilus*.—This little creature floats at pleasure upon the surface of the sea. Its shell resembles the *hull of a ship*, whence it has its name." Mr. Thrupp accepts the new rendering as having "much apparent probability" (*Introduction to the Psalms*, ii, 178). Another recent expositor of the Psalms, J. Olshausen (*Exeg. Handb.* p. 402), remarks that "the introduction of *ships* amongst the living creatures of the sea has always presented an obstacle" to the understanding of the sentence. The paper nautilus (*Argonauta*) frequents the Mediterranean. The verb תַּמִּי, *proceed, walk*, very well describes the stately progress of the nautilus as it floats upon the wave. We may add that it gives greater fitness to the 27th verse, which at present is hardly compatible with the 25th and 26th, owing to the intrusion of the clause, *there go the ships*. Replace this by the *nautilus*, and the coherence of the 27th verse with the two preceding is complete in all its terms. 11. Our last specific fish is rather suggested than named in Ezek. xxix, 4, where the prophet twice mentions "the fish of the rivers which cleave to the scales" [of the crocodile]. This description seems to identify this fish with the *Echeneis remora*, so remarkable for the adhesive or sucking disc which covers the upper part of the head, and enables it to adhere to the body of another fish, or to the bottom of a vessel. (Its fabulous powers of being able even to arrest a vessel in her course are recorded by Pliny, *Hist. Nat.* xxxii, 1; it is mentioned by Aristotle, *Hist. Anim.* ii, 14, ἡ ἐχένη τῶν ἰσθίων, ὁ καλοῦσι τῶν ἐχένην. It is also mentioned by Forskal as seen at Gidda, and by Hasselquist at Alexandria). The *lump-sucker* (*Cyclopterus lumpus*) is furnished with ventral fins which unite beneath the body and form a concave disc, by which the fish can with ease adhere to stones or other bodies. Either in the *remora*, with its adhesive apparatus *above*, or in the *lump-sucker* with a similar appendage *below*, or in both, we have in all probability the prophet's fishes which cleave to the monster of the Nile.

The species of fishes known to the Hebrews, or at least to those who dwelt on the coast, were probably very numerous, because the usual current of the Mediterranean sets in, with a great depth of water, at the Straits of Gibraltar, and passes eastward on the African side until the shoals of the delta of the Nile begin to turn it towards the north; it continues in that direction along the Syrian shores, and falls into a broken course only when turning westward on the Cyprian and Cretan coasts. Every spring, with the sun's return towards the north, innumerable troops of littoral species, having passed the winter in the offings of Western Africa, return northward for spawning, or are impelled in that direction by other unknown laws. A small part only ascend along the Atlantic coast of

Spain and Portugal towards the British Channel, while the main bodies pass into the Mediterranean, follow the general current, and do not break into more scattered families until they have swept round the shores of Palestine. Lists of species of the fish frequenting various parts of the Mediterranean may be found in Risso (*Ichthyol. de Nice*), who describes 315 species he had observed at Nice; and in Adm. Smyth's *Mediterranean*, where in the chapter on *Ichthyology* he gives a list of about 300 fishes haunting the waters of Sicily, besides 240 *crustacea*, *testacea*, and *mollusks*. Admiral Smyth remarks generally of the Mediterranean fish, that, "though mostly handsomer than British fishes, they are, for the most part, not to be compared with them in flavor" (p. 192-209). Professor E. Forbes (in his *Report on Aegean Invertebrata*) divides that part of the East Mediterranean, in which for many years he conducted his inquiries, into eight regions of *depth*, each characterized by its peculiar fauna. "Certain species," he says, "in each are found in no other; several are found in one region which do not range into the next above, whilst they extend to that below, or *vice versa*. Certain species have their maximum of development in each zone, being most prolific in individuals at that zone in which is their maximum, and of which they may be regarded as especially characteristic. Mingled with these true natives are stragglers, owing their presence to the secondary influences which modify distribution." The Syrian waters are probably not less prolific. The coasts of Tyre and Sidon would produce at least as great a number. The name of the latter place, indeed, is derived from the Phœnician word *fish* (see Gesenius, s. v. צִדֹן, *Sidon*: the modern name has the same meaning, *Saida*; Abulfar. *Syria*, p. 93. See *SDON*), and it is the oldest fishing establishment for commercial purposes known in history. The Hebrews had a less perfect acquaintance with the species found in the *Red Sea*, whither, to a certain extent, the majority of fishes found in the Indian Ocean resort. Besides these, in Egypt they had anciently eaten those of the Nile (for the fish of the Nile, see Rawlinson's *Herodotus*, ii, 119-121, and, more fully, Wilkinson's *Ancient Egyptians*, iii, 58; v, 248-251); subsequently, those of the lake of Tiberias and of the rivers falling into the Jordan (Von Raumer, *Palästina*, p. 105, after Hasselquist, mentions the *Sparus Galileus*, a sort of bream, the *silurus* and *mugil*; and Reuchlin, in *Herzog*, after Dr. Barth, adds the *Labrus Niloticus* as inhabiting this lake, which Stanley, *Sinai and Palestine*, p. 375, represents as abounding in fish of all kinds [comp. John xxi, 11, with Matt. xiv, 17 and xv, 34]. From the earliest times—so said the Rabbinical legends—this lake had been so renowned in this respect [see Reland, p. 260, who quotes the *Baba Bathra* of the Babylonian Gemara], that one of the ten fundamental laws laid down by Joshua was, that any one might fish with a hook in the Sea of Galilee [see Lightfoot, *Tal. Ezerit.* on Matt. iv, 8]. Two of the villages on the banks derived their name from their fisheries, the west and the east *Bethsaida*, "house of fish" [compare the modern name of Sidon just mentioned]. The numerous streams which flow into the Jordan are also described by Stanley as full of fish, especially the Jabbok, p. 323; and they may have been acquainted with species of other lakes, of the *Orontes*, and even of the *Euphrates*. The supply, however, of this article of food, which the Jewish people appear to have consumed largely, came chiefly from the *Mediterranean*. From Neh. xiii, 16, we learn that the Phœnicians of Tyre actually resided in Jerusalem as dealers in fish, which must have led to an exchange of that commodity for corn and cattle. They must have previously salted it (in which form it is termed כִּלְיָה in the Talmud; Lightfoot on Matt. xiv, 17): the existence of a regular fish-market is implied in the notice of the fish-gate, which was probably contiguous to it (2 Chron. xxxiii,

14; Neh. iii, 3; xii, 39; Zeph. i, 10). In addition to these sources, the reservoirs formed in the neighborhood of towns may have been stocked with fish (2 Sam. ii, 13; iv, 12; Isa. vii, 3; xxii, 9, 11; Cant. vii, 4, where, however, "fish" is interpolated in the A.V.). See *FOOD*. The most nutritious and common of the fishes which must have filled the Jewish markets were genera of *Percade* (perch tribes); *Sciænide* (much resembling the perches); and particularly the great tribe of the *Scomberide* (mackerel, with its numerous genera and still more abundant species, frequenting the Mediterranean in prodigious numbers, and mostly excellent for the table; but being often without perceptible scales, they may have been of questionable use to the Hebrews. All the species resort to the deep seas, and foremost of them is the genus *Thynnus*, our tunny, a fish often mentioned with honor by the ancients, from Aristotle downward; a specimen taken near Greenock in 1831 was nine feet in length. Its flesh is highly prized, and from its great solidity it partakes much of the character of meat. Although repeatedly taken on the English coast, it is really a native of the Mediterranean, where it abounds, not only in Sicilian waters, but, in three or four species, in the Levant. The following complete the catalogue: the *Mugilide* family (the sea mullets, *mugiles*, being valuable in every part of the Mediterranean), the *Labride* (or *Wrasse* of Pennant), and *Cyprinide* (carps, particularly abundant in the fresh waters of Asia); after these may be ranged the genus *Mormyrus*, of which the species, amounting to six or seven, are almost exclusively tenants of the Nile and the lake of Tiberias, and held among the most palatable fish which the fresh waters produce. Cat or sheat-fish (*Siluride*) are a family of numerous genera, all of which, except the *Loricaria*, are destitute of a scaly covering, and were consequently unclean to the Hebrews; though several of them were held by the ancient Gentile nations and by some of the modern in high estimation, such as the blackfish, probably the shilbeh (*Silurus Shilbe Niloticus*) of the Nile, and others. Of salmon (*Salmonide*), the *Myletes dentex* or *Hasselquisti* belongs to the most edible fishes of the Egyptian river; there were also *Clupeide* (herrings) and the *Gadide* (or cod), these last being present about Tyre; *Pleuronectes* (or flatfish) are found off the Egyptian coasts, and eel-shaped genera are bred abundantly in the lakes of the Delta. A comparison of this list with the enumeration of the ancient Egyptian fish given by Strabo (xvii, 823), or by Sir G. Wilkinson in his *Ancient Egyptians* (iii, 58), will show us that some of the fish which have to the present day preserved their excellent character as wholesome food (such as some species of the *Percade* [e. g. the "gisher"], and the *Labride* [e. g. the "bulti"], and the *Cyprinide* [e. g. the "bemi"; "the carpe is a dayntous fische," wrote old Leonard Maschal in 1514, when he introduced the fish into England]), were the identical diet which the children of Israel "remembered" so invidiously at Taborah, when they ungratefully loathed the manna (Numb. xi, 5). Finally, there are the cartilaginous orders, where we find the file-fish (genus *Balistes*), having a species (*B. vetula*) in the waters of the Nile; and true chondropterygians, containing the sharks, numerous in genera and species, both in the Mediterranean and Red Sea. We notice only *Carcharias Lamia*, the white or raging shark, often found of enormous size off Alexandria, and always attended by several pilot-fish (*Naucrates*), and the saw-fish (*Pristis antiqorum*), most dreaded by the pearl-fishers in the Persian Gulf, and which has been seen in the Red Sea pursuing its prey even into the surf, with such force and velocity that, on one occasion, half of a fish cut asunder by the saw flew on shore at the feet of an officer while employed in the surveying service. On rays we shall only add that most of the genera are represented by species in either sea, and in particular the sting rays (*Trigon*) and electric rays (*Torpedo*),

with which we close our general review of the class, although many interesting remarks might be subjoined, all tending to clear up existing misconceptions respecting fishes in general—such as that cetaceans, or the whale tribe, belong to them; and the misapplication of the term when tortoises and oysters are denominated fish; for the error is general, and the Arabs even include lizards in the appellation. See ZOOLOGY.

ἰχθύων ἄγονος ἔστιν). This epithet ἄγονος is applied to the Dead Sea itself by Josephus, *War*, v, 4 (see Bochart, *Hieroz.* i, 40).—Kitto, s. v.; Smith, s. v. See DEAD SEA.

FISH IN CHRISTIAN SYMBOLISM. Of all the symbols used by the early Christians, none was more widely used than that of the fish. It was employed as a metaphor in the writings of the fathers of the Church,

Ancient Egyptians curing Fish. Fig. 1, splits them open, *a*, and removes the entrails, as at *b*, *b*; 2, takes out the backbone, *d*, and salts them from the pot, *c*; 3 and 4, bring them in whole, *e*, *f*, *g*.

The extreme value of fish as an article of food [when cooked, or otherwise prepared as a relish, *ὀψάσιον*, lit. *sauce*] (our Lord seems to recognise this as sharing with bread the claim to be considered as a prime necessary of life, see Matt. vii, 9, 10) imparted to the destruction of fish the character of a divine judgment (see Isa. i, 2; Hosea iv, 3; Zeph. i, 3; compare with Exod. vii, 18, 21; Psa. cv, 29; and Isa. xix, 8). This would especially be the case in Egypt, where the abundance of fish in the Nile, and the lakes and canals (Strabo, xvii, p. 823; Diod. i, 36, 43, 52; Herod. ii, 23, 149), rendered it one of the staple commodities of food (Numb. xi, 5; comp. Wilkinson, iii, 62). How fish is destroyed, largely in the way of God's judgment, is stated by Dr. E. Pococke on Hosea iv, 3, where he collects many conjectures of the learned, to which may be added the more obvious cause of death by disease, such as the case mentioned by Welsted (*Travels in Arabia*, i, 310) of the destruction of vast quantities of the fish of Oman by an epidemic, which recurred nearly every five years. St. John (*Travels in Valley of the Nile*, ii, 246) describes a vast destruction of fish from cold. Aristotle (*Hist. Anim.* viii, 19) mentions certain symptoms of disease among fish as known to skillful fishermen; but he denies that epidemics such as affect men and cattle fall upon them. In the next section he mentions the *mullein plant* (*verbascum*, *πλόμοε*) as poisonous to fresh-water and other fish. Certain waters are well known to be fatal to life. The instance of the Dead Sea, the very contrast of the other Jordan lakes so full of life, is well described by Schwarz (*Descriptive Geography of Palestine*, p. 41–45), and by Stanley (*Sinai and Palestine*, p. 290–294), and more fully by De Saunay (*Dead Sea*, passim). Contrast the present condition of this Sea of Death with the vitality which is predicted of it in the vision of Ezekiel (xlvi, 9, 10). Its healed waters and renovated fish “exceeding many,” and “the fishers which shall stand on it from Engedi even unto Eneglaim,” and “the places on its coast to spread forth nets”—all these features are in vivid opposition to the present condition of “the Asphaltic lake.” Of like remarkable import is 2 Esdr. v, 7, where the writer, among the signs of the times to come, predicts, “The Sodomitic sea shall cast out fish.” For ancient testimonies of the death which reigns over this lake, see St. Jerome on Ezekiel, lib. xiv; Tacitus, *Hist.* v, 6; Diod. Sic. ii, 48, and xix, 98; and the Nubian Geographer, iii, 5, as quoted by Bochart, *Hieroz.* i, 40. But there are other waters equally fatal to fish life, though less known, such as the lake called *Canonidan* (Avicenna, i, q. ἄγονος, without life), in Armenia, and that which Ælian (*Hist. Animal.* iii, 38) mentions (ἡ δὲ ἐν Φνεῖν λίμνη

and was graven or painted as a secret sign upon monuments of all kinds. We do not speak, of course, of the fish introduced into arabesque ornamentation, or into the scenes drawn from the New Testament, nor of those cases where it was used upon tombs to indicate the calling of the deceased, but of those cases where it was used independently, and manifestly in a purely symbolical sense. Numberless examples are extant of its being thus used on tombstones, rings, seals, and amulets. It manifestly had two significations, sometimes referring to Christ, and sometimes to the Christian Church.

I. Referring to Christ, it was in familiar use as early as the 2d century. Its significance was drawn from the fact that the letters of the acrostic ἰχθύς, the Greek word for fish, form the initials of the acrostic Ἰησοῦς, Χριστός, Θεοῦ, Υἱός, Σωτήρ (*Jesus Christ, Son of God, Saviour*). The complete acrostic is found upon but one monument, a tombstone. It is explained in the writings of St. Augustine. Sometimes the entire word was used; in other cases there were but parts of it. The figure of a fish was very frequently cut or painted to represent the Saviour. Fishes of glass or of bronze were often hung upon the necks of believers as amulets. Seals and rings often had other symbols also, as the anchor, the cross, and the A Ω. The fish was especially used for baptismal fonts and on the walls of baptisteries. A ship resting on a fish was used to indicate that Christ supports the Church.

II. The fish represents the Christian in all artistic presentations of those parables where the apostles are spoken of as fishers of men. The fish, attached to a hook and line, with or without a fisherman, always refers to the Christian, as do those representations of a number of fishes on pavements of churches, and on those tombstones where funeral inscriptions, as *in pace*, are added. Often two fishes are given, one on each side of an anchor or a cross. Many interpretations are given of this, the best established being the one that considers them as referring to the Jews and Gentiles, though much weight is attached to the interpretation which considers the two fishes to allude to the two covenants, the Jewish and the Christian. The baptisteries were therefore sometimes called *piscinæ*. Tertullian speaks of Christians as accustomed to please themselves with the name *pisciculi*, “fishes,” to denote that they were born again into Christ's religion by water. He says, *Nos pisciculi secundum ἰχθύον, nostrum Jesum Christum, in aquâ nascimur* (*De Bapt.* ch. i).

The use of the fish as a symbol ceased almost entirely with the death of Constantine the Great, though examples are found of it as late as the 5th or 6th century.—Rossi, *De Christianis Monumentis* IXΘΥΝ *er-*

*hibentibus* (Par. 1855); Martigny, *Dictionnaire des Antiquités Chrétiennes* (Paris, 1865); Piper, *Die christliche Kunst*; Becker, *Die Darstellung Jesu Christi unter dem Bilde des Fisches* (Breslau, 1866, 8vo); Didron, *Christian Iconography*, i. 344; Bingham, *Orig. Eccles.* bk. i, ch. i, § 2. (G. F. C.)

**FISHING** (אִיִּשׁ, *dig*; ἀλιεύειν). The copious supply of fish in the waters of Palestine encouraged the art or avocation of fishery, to which frequent allusions are made in the Bible: in the O. T. these allusions are of a metaphorical character, descriptive either of the conversion (Jer. xvi, 16; Ezek. xlvii, 10) or of the destruction (Ezek. xxix, 3 sq.; Eccl. ix, 12; Amos iv, 2; Hab. i, 14) of the enemies of God. In the N. T. the allusions are of a historical character for the most part (see Thomson, *Land and Book*, ii, 79), though the metaphorical application is still maintained in Matt. xiii, 47 sq. It was from the fishing-nets that Jesus called his earliest disciples to "become fishers of men" (Mark i, 16-20); it was from a fishing-boat that he rebuked the winds and the waves (Matt. viii, 26); it was from a fishing-boat that he delivered his wondrous series of prophetic parables of the kingdom of heaven (Matt. xiii); it was to a fishing-boat that he walked on the sea, and from it that Peter walked to him (Matt. xiv, 24-32); it was with fish (doubtless dried) as well as with bread that he twice miraculously fed the multitude (Matt. xiv, 19; xv, 36); it was from the mouth of a fish, taken with a hook, that the tribute-stater was paid (Matt. xvi, 27); it was "a piece of broiled fish" that he ate before his disciples on the day that he rose from the dead (Luke xxiv, 42, 43); and yet again, before he ascended, he filled their net with "great fishes, an hundred and fifty and three," while he himself prepared a "fire of coals," and "laid fish thereon," on which then he and they dined (John xxi, 1-14).

The most prevalent method of catching fish in use among the Hebrews was by *nets* of various kinds and sizes. Four of these are mentioned: two in Hab. i, 15, 16, חֶרֶם (che' rem, Sept. ἀμφίβληστρον: no doubt in v, 16 this word and σαγήνη have been by some means transposed; verse 17 compared with verse 15 makes this evident), the *casting-net*, Matt. iv, 18 (δίκτυον), and Mark i, 16; and מִקְמֶתֶת (mikmeteth, Sept. σαγήνη), the *drag-net*, a larger kind (see Matt. xiii, 48), requiring the use of a boat: the latter was probably most used on the Sea of Galilee, as the number of boats kept on it was very considerable (Josephus, *War*, iii, 10, 9). The third occurs Eccl. ix, 12, מִצְדוּחַ (mits'uduh, Sept. ἀμφίβληστρον), a *casting-net*. The fourth, רֶשֶׁת (re'sheth, Sept. πᾶγίς), a *fowler's net* as well as a *fisher's*. In Psa. xxxv, 7, 8, the רֶשֶׁת, net, is used with פִּתּוּל, a *pit* ("they have hid for me their net in a pit"): the allusion would seem to be to that mode of winter-fishing which Aristotle describes as practised by the Phœnicians (*Hist. Animal.* viii, 20). Net-fishing is still used on the lake of Tiberias (Dr. Pococke, *Descrip. of the East*, ii, 69). See NET. This mode of fishing prevailed in Palestine, and is a prominent feature of the piscatorial associations in the Gospel history to the very last (see John xxi, 6, 8, 11). It is certainly less characteristic of *Egyptian* fishing, of which we have frequent mention in the O. T. See **ANGLING**. The instruments therein employed were the חֶקֶה (chakkah, Sept. ἀγκίστρον, comp. Matt. xvii, 27), *angling-hook*, for smaller fish; Isa. xix, 8; Hab. i, 15. These hooks were (for disguise) made to resemble *thorns* (on the principle of the fly-fishing instruments, though not in the same manner; for the Egyptians, neither anciently nor now, seem to have put winged insects on their hooks to attract their prey; Wilkinson, iii, 54), and were thence called כִּרְרוֹת, *s'roth'*, Amos iv, 2 ("from their resemblance to thorns," Gesenius, *Lex. s. v.*); and (in the case of the larger

sort) זְבִיִּים, *sukkah'*, A. V. "barbed iron;" Job xli, 7 [xli, 31]. Another name for these *thorn-like* instruments was רִיבֵי, *istinnoth'*, Amos iv, 2 (a generic word, judging from the Sept., ὄπλα). רִיחַ, *cho'ach*, was either a hook or a ring put through the nostrils of fish to let them down again alive into the water (Gesenius), or (it may be) a *crook* by which fishes were suspended to long poles, and carried home after being caught (such as is shown in plate 344 [from a tomb near the Pyramids] in Wilkinson, iii, 56). The word is used in Job xli, 2 [xli, 26] with רִיבֵיִם, *agnon'*, a *cord of rushes* (σχοῖνον). Rosenmüller, ad loc., applies these two words to the binding of larger fish to the bank of the river until wanted, after they are captured, and quotes Bruce for instances of such a practice in modern Egyptian fishing. The rod was occasionally dispensed with (Wilkinson, iii, 53), and is not mentioned in the Bible: ground-bait alone was used, fly-fishing being unknown. Though we have so many terms for the *hook*, it is doubtful whether any have come down to us denoting the *line*; and אֲנָמֵן, אֲנָמֵן, though the most nearly connected with piscatorial employment, hardly express our notion of a line for *angling* (see Gesenius, s. v.); while פְּרִיֵת, פְּרִיֵת (thread, twine) are never used in Scripture for fishing purposes. See HOOK. The large fish-spear or *harpoon* used for destroying the crocodile and hippopotamus was called צַבְצַל הַגֵּרִים (Job xli, 7 [xli, 31]; comp. with Wilkinson, iii, 72, 73). צַבְצַל means a *cymbal* or any clang-

Ancient Egyptian spearing Fish.

ing instrument, and this seems to have led to the belief of fishes being attracted and caught by musical sounds; stories of such, including Arion and the dolphin, are collected by Schelhorn in his *Dissertatio de Jobi* (Ugolini *Thesaur.* xxix, 329). "The Egyptian fishermen used the net; it was of a long form, like the common drag-net, with wooden floats on the upper and leads on the lower side; though sometimes let down from a boat, those who pulled it generally stood on the shore and landed the fish on a shelving bank" (Wilkinson, ii, 21). This net is mentioned in Isa. xix, 8, under the name מִקְמֶתֶת. It is, however, doubtful whether this be anything more than a frame, somewhat between a basket and a net, resembling the *landing-net* represented in Wilkinson, iii, 55. The Mishna (vi, 76, 116) describes it by the word אֲכוּן, *akun'*, *nassa*, *corbis piscatoria*, a basket. Maillet (*Epist.* ix) expressly says that "*nets for fishing are not used in Egypt.*" If this be so, the usage has much altered since the times which Wilkinson has described. Frames for fishing, attached to stakes driven into the bottom, were prohibited in the lake of Tiberias, "because they are an impediment to boats" (Talmudic Gloss, quoted by Lightfoot, *Horæ Hebr.* on Matt. iv, 18). No such prohibition existed in Egypt, where wicker-traps, now as anciently, are placed at the mouths of canals, by which means a great quantity of fish is caught (Rawlinson, *Herod.* ii, 232, note). The custom of drying fish is frequently represented in the sculptures of Upper and Lower Egypt (p. 127, note). There was a caste of fishermen; and allusion to the artificial reservoirs and fish-ponds of Egypt occurs in the Prophe-

Ancient Egyptians fishing with the Net and drying Fish in the rigging of the Boat. A kite sits upon the mast waiting for the entrails of the fish.

ets (Isa. xix, 8-10). Fishing pavilions, apparently built on the margin of artificial lakes, also appear in the Assyrian sculptures (Layard's *Nineveh*, i, 55). Ac-

Ancient Assyrian fishing in a Lake with a Line, without a Rod, and carrying a rush Basket on his Shoulders.

cording to Aristotle (*Hist. Anim.* viii, 19), comp. with Luke v, 5, *the night* was the best time for fishing operations: "before sunrise and after sunset."—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

**Fisher** (פִּיֶּשֶׁר, *davrag'*, Jer. xvi, 16 [marg.]; Ezek. xlvii, 10; or פִּיֶּשֶׁר, *davrag'*, Isa. xix, 8; Jer. xvi, 16 [text]; Gr. ἄλιος, *seaman* or sailor, hence fisherman, as rendered Luke v, 2), a term used, besides its literal import [see FISHING, above], in the phrase "fishers of men" (Matt. xix, 1; Mark i, 17), as applied by our Saviour to the apostles (q. v.) in calling them to their office; and in a like typical manner, but in an unfavorable sense, the word occurs Jer. xvi, 16. The application of the figure is obvious (see Wemyss, *Symbolical Diet.* s. v.). On the "fisher's coat" (ἑπενδύτης, John xxi, 7), see COAT.

**Fisher, Edward**, an English Protestant theologian, was born in 1597, and was educated at Oxford, where he became a gentleman commoner in 1627. He taught a school at Caermarthen, in Wales, and died in Ireland. He was a strong Calvinist. His *Marrow of Modern Divinity*, published in 1644, excited a vigorous controversy when republished in Scotland by Hogg (1718, 8vo). It went through numerous editions (12th ed. Lond. 1726, with notes by Thomas Boston, 2 vols. 8vo). Fisher also wrote *Appeal to the Conscience* (Oxford, 1644, 8vo):—*Fest of Asses* (1644, 4to):—*Caveat to the Sabbatarians* (1650, 4to).—Allibone, *Dictionary of Authors*, s. v.; Hagenbach, *History of Doctrines*, ed. Smith, ii, 431. See MARROW CONTROVERSY.

**Fisher, John**, bishop of Rochester, was born at Beverly, in Yorkshire, in 1459. He was educated at Michael House, Cambridge, of which house he became master in 1495; and being appointed confessor to Margaret, countess of Richmond, mother of Henry VII, he

induced her to found St. John's and Christ's colleges. He was made divinity-professor in Cambridge, 1502, and bishop of Rochester, 1504. He was a great benefactor to the University of Cambridge. He opposed the Lutheran reformation, and was supposed by some to be the real writer of Henry VIII's book against Luther; and on Luther's replying, he wrote a *Defence of the King of England's Assertion of the Catholic Faith*. He continued in high favor with Henry VIII till he opposed the king's divorce, and to his honest views on this point he adhered unflinchingly. He remained unmolested till 1534, when he refused to take the oath of allegiance, and was committed to the Tower. He was attainted by Parliament November 3, 1534, and his bishopric was declared void January 2, 1535. He would probably have been permitted to remain quietly in prison during the rest of his life had not Paul III, by making him, in May, 1535, cardinal-priest of St. Vitalis, angered the king, who issued orders that no person should be permitted to bring the hat into his dominions. Lord Cromwell, being sent to examine the bishop, asked him, "My lord of Rochester, what would you say if the pope should send you a cardinal's hat; would you accept of it?" The bishop replied, "Sir, I know myself to be so far unworthy any such dignity, that I think of nothing less: but if any such thing should happen, assure yourself that I should improve that favor to the best advantage that I could, in assisting the Holy Catholic Church of Christ, and in that respect I would receive it upon my knees." When this answer was brought to the king by secretary Cromwell, Henry said in a great passion, "Yea, is he yet so lusty? Well, let the pope send him a hat when he will, Mother of God, he shall wear it on his shoulders then, for I will leave him never a head to set it on." Fisher was convicted of high treason, and beheaded on Tower Hill, June 22, 1535. His *Life* by Bailely is published with those of *More* and *Roper* (Dublin, 1835, 7th edit.). There is also a *Life* by Lewis (Lond. 1862, 2 vols. 8vo). His polemical and miscellaneous writings will be found in the edition *Opera J. Fisherique hæc hactenus inveniri potuerint omnia* (Wurtzb. 1597, fol.). "The character of Fisher is remarkable for firmness. In his steady maintenance of the fallen cause of queen Catharine, undaunted by the anger of the vindictive king, this quality peculiarly shone forth; and still more with regard to the oath of supremacy, refusal to take which was certain to call forth severe punishment, and in all probability death. Fisher was immovable, not being convinced that he was in the wrong; his fearless firmness allowed him to maintain an open profession that he was in the right. He was a learned and devout man, and his conduct fully proved his sincerity."—Dupin, *Eccles. Hist.* cent. xvi, p. 412; Burnet, *Hist. Reform.* ii, 248, 567 sq.; Hook, *Ecl. Biography*, v, 132.

**Fisher, Jonathan**, a Congregational minister, was born Oct. 7, 1768, at New Braintree, Mass. He graduated at Harvard College, 1792, entered the ministry Oct. 1793, and was installed pastor at Blue Hill,

Me., July 13, 1796, where he labored until Oct. 24, 1837, and died Sept. 22, 1847. He published a volume of *Miscellaneous Poems; Scripture Animals*; and a sermon.—Sprague, *Annals*, ii, 341.

**Fisher, Richard Adams**, a minister of the German Reformed Church, was born in Berks Co., Pa., Oct. 25, 1805. Having finished his preparatory studies under his own pastor, Rev. F. Herman, Jr., he began the study of theology with Rev. Dr. Herman; was licensed and ordained in 1826. He took charge of the German Reformed congregation in Sunbury, Pa., together with several affiliated churches, in 1827, and continued in this field of labor till 1854, when failing health compelled him to resign. Recovering somewhat, he labored a short time in Lyken's Valley, Dauphin Co., Pa., where he died Jan. 27, 1857. Mr. Fisher had a good mind, was a logical and instructive preacher, a genial and kind friend, and was greatly beloved throughout the church in which he labored. He preached well in both the German and English languages. (H. H.)

**Fisher-Ring or Fisherman's Ring.** See ANULUS.

**Fish-Gate** (פֶּתַח הַדִּיגִים, *sha' ar haad-digim'*, gate of the fishes; Sept. ἡ πύλη ἢ ἐχθρική, in Neh. ἡ πύλη ἐχθρὰ, in Zeph. πύλη ἀποικιστῶν; Vulg. *porta piscium*), the name of one of the gates of Jerusalem (2 Chron. xxxiii, 14; Neh. iii, 3; xii, 39; Zeph. i, 10); probably on the east side, just north of the Temple enclosure (Strong's *Harm. and Expos. of the Gospels*, Appendix, i, p. 18), although Bartlett (*City of Great King*, p. 153) locates it on the west side of the Temple, supposing it to have been near the mediæval "piscina" (p. 301); a very unsuitable position, as it doubtless derived its name from the fact that fish (q. v.) from the lake of Tiberias (or perhaps from the Mediterranean) were brought to the city by that route, or that they were sold there (Gesenius, *Thes.* p. 1054, who identifies it with the present gate of St. Stephen). See JERUSALEM.

**Fish-hook** (in the plur. סִירוֹת דִּיגִים, *thorns* [as often rendered] of fishing; Sept. at random λίβηται ἔμπροσθ, Vulg. equally so *olle ferentes*, both taking the term in the sense of *pots*, contrary to the synonymous סִירוֹת, "hooks," of the other hemistich), used figuratively of an instrument of control (Amos iv, 2), after the analogy of animals which were tamed by putting hooks and rings in their noses (comp. Isa. xxxvii, 29; Ezek. xxxix, 4; Job xl, 26; see Oedmann, *Samm.* v, 5). Others, as Döderlein (in loc.), prefer to retain the simple meaning of *thorns*, as referring to pastoral customs. See FISHING.

**Fish-pool** (בְּרֵכַת, *berekah'*, a pool, as often elsewhere), a pond or reservoir in general; presumed by our translators at Cant. vii, 4 to be intended for fish (q. v.), such as we know were anciently constructed for the purpose of pleasure angling. See FISHING (above).

**Fish-spear** (זֶבֶל דִּיגִים, lit. a *prong of fishes*; Sept. and Vulgate vaguely *πλοία ἀλωίσωσ, gurgustium piscium*), a harpoon or trident for spearing fish (Job xli, 2 [in the Heb. xi, 31]). See FISHING.

**Fisk, Ezra, D.D.**, a Presbyterian minister, was born in Shelburne, Mass., Jan. 10, 1785, graduated at Williams College in 1809, and was licensed in 1810. After preaching for some months, he was ordained as an evangelist, and labored chiefly among destitute congregations of Georgia; after which he engaged as missionary in Philadelphia. In 1813 he was chosen pastor of the Presbyterian church in Goshen, N. Y., where he continued for upwards of twenty years. He became a trustee of Williams College in 1823, and a director of the Theological Seminary at Princeton in 1825. He retired to Georgia in 1832 for his health,

and was appointed the following year professor of ecclesiastical history and Church government in the Western Theological Seminary, and moderator of the General Assembly. He removed to Philadelphia, and died Dec. 5, 1833. He published *An Oration delivered before the Society of Alumni of Williams College* (1825):—*A Lecture on the Inability of Sinners* (Phila, 1832):—*A Firewell Sermon* (1833):—*Articles on Mental Science*, in *Church Advocate* (1832).—Sprague, *Annals*, iv, 457.

**Fisk, Pliny**, a Congregational minister and missionary, was born at Shelburne, Mass., June 24, 1792. He graduated at Middlebury College in 1814, studied theology at Andover, entered the ministry in January, 1814, and preached for a time in Wilmington, Vt. Having determined to be a missionary, he was, with Mr. Levi Parsons, appointed by the American Board of Missions to the Palestine mission in September, 1818, and spent the winter travelling through the South, raising money for the missionary cause. With his colleague, he sailed from Boston for Smyrna, Nov. 3, 1819, and arrived at their port Jan. 15, 1820. The two missionaries spent some time in Scio to study modern Greek, then visited the "seven churches" in Asia Minor, and finally settled in Smyrna. Early in 1822 Mr. Fisk accompanied Mr. Parsons to Egypt, where the latter died, Feb. 10. His successor, the Rev. J. King, met Mr. Fisk at Malta, and in April, 1823, they went, together with Mr. Wolff, by way of Egypt and the desert, to Judea. After visiting Jerusalem and Beyrout, they visited the principal cities in Northern Syria to "spy out the land," and spent some part of 1824 at Damascus and Aleppo studying Arabic. In May, 1825, he joined the mission already established at Beyrout, and died there on the 23d of October following. See Bond, *Life of Pliny Fisk* (Boston, 1828, 12mo).—*American Miss. Memorial*, p. 254; Sprague, *Annals*, ii, 622.

**Fisk, Samuel.** See FISKE, SAMUEL.

**Fisk, Wilbur**, first president of the Wesleyan University, was born in Brattleboro, Vt., August 31, 1792. His parents were of the old Puritan stock, and he was trained in habits of virtue and religion, especially by his mother. In 1809 he went to the Grammar School at Peacham, and in 1812 to the University of Vermont, where he passed A.B. in 1815. In 1818 he entered the ministry of the Methodist Episcopal Church, and soon became remarkable for piety and success in his ministry. His talents as a preacher were of a very high order; indeed, he has hardly been surpassed in this respect in the American pulpit. His health was feeble, however, from the beginning, and his unwearied labors in the itinerant ministry were too great for him. In 1823 he was made presiding elder of the Vermont district, and in 1824 was chosen delegate to the Vermont Conference, a rare distinction for so young a man. From this time onward his life was devoted to the cause of Christian education in the Methodist Episcopal Church. When he entered the ministry in 1818 "there was not a single literary institution of any note under the patronage of the Church. A few years later, in 1824, he was appointed agent to collect funds for one which had been established in Newmarket, N. H.; but he declined the service because, as he said, it was not established on a permanent basis. Still he was anxious that one should be established, and through his efforts, with others, the academy at Wilbraham was commenced, and he was appointed its principal in 1826. The spirit which was thus aroused soon demanded an institution of a higher grade. The Northern and Eastern Conferences united to found the Wesleyan University at Middletown, and Dr. Fisk naturally, and without a rival, was chosen its president in 1830. The part he had already taken in awaking the people to the subject, his devotion to it, and his abilities, made him more than ever a leader in the cause of education in the Church. Stu-

dents gathered to the institution from every part of the nation, and many soon went forth from it who, by his recommendation, became presidents, professors, and teachers in the rapidly multiplying colleges and seminaries under the patronage of the Church throughout the United States. His heart was in this work. He believed, too, that he was where Providence designed him to be. And when, in 1863, he was elected bishop, he declined the office, for he said, 'If my health would allow me to perform the work of the episcopacy I dare not accept it, for I believe I can do more for the cause of Christ where I am than I could do as a bishop.' Who shall say that his decision was not only honest, but wise; that his duties as an educator of the young, and the part he took in awaking the people to the great value of general education, were less important than the work of any bishop?" (*Centenary Memories, in The Methodist, N. Y.*) In 1828 he had been elected bishop of the Canada Conference, but declined the office. In 1829 he received the degree of D.D. from Brown University, and in the same year was elected president of Lagrange College, Alabama, and also professor in the University of Alabama, both which offices he declined. For many years his life was an incessant struggle with pulmonary disease, and in 1835-6 he travelled in Europe for the benefit of his health. He died at Middletown, Feb. 22, 1838. Among his writings are, *The Calvinistic Controversy* (N. Y. 18mo); —*Travels in Europe* (N. Y. 1838, 8vo); —*Sermons and Lectures on Universalism:—Reply to Pierpoint on the Atonement*, and other tracts and sermons.

Dr. Fisk was a saintly man, of the type of Fénelon, and endowed with some of Fénelon's best moral and mental traits—clearness and logical force; flexibility and adroitness in controversy; with earnest love of truth and goodness for the animating spirit of all his life and thought. As a preacher, few surpassed him in eloquence, none in fervor. As a teacher, he had that highest of all qualities, the power to kindle the enthusiasm of his pupils. Take him for all in all, he was a man of rare symmetry of character, moral and intellectual, of whom all whom he knew would be more willing to say, "Mark the perfect man, and behold the upright," than of any man of his time who held so high a place. Dr. Stevens describes him as follows: "Wilbur Fisk's person bespoke his character. It was of good size, and remarkable for its symmetry. His features were beautifully harmonious, the contour strongly resembling the better Roman outline, though lacking its most peculiar distinction, the *nasus aquilinus*. His eye was nicely defined, and, when excited, beamed with a peculiarly benign and conciliatory expression. His complexion was bilious, and added to the diseased indication of his somewhat attenuated features. His head was a model, not of great, but of well-proportioned development. It had the height of the Roman brow, though none of the breadth of the Greek. There is a bust of him extant, but it is not to be looked at by any who would not mar in their memories the beautiful and benign image of his earlier manhood by the disfigurements of disease and suffering. His voice was peculiarly flexible and sonorous; a catarrhal disease affected it, but just enough, during most of his life, to improve its tone to a soft orotund, without a trace of nasal defect. Few men could indicate the moral emotions more effectually by mere tones. It was especially expressive in pathetic passages. His pulpit manner was marked in the introduction of the sermon by dignity, but dignity without ceremony or pretension. As he advanced into the exposition and argument of his discourse (and there were both in most of his sermons), he became more emphatic, especially as brilliant though brief illustrations ever and anon gleamed upon his logic. By the time he had reached the peroration his utterance became rapid, his thoughts were incandescent, the music of his voice rang out in thrilling tones, and sometimes even quivered with

trills of pathos. No imaginative excitement prevailed in the audience as under Maffitt's eloquence, no tumultuous wonder as under Bascom's, none of Cookman's impetuous passion, or Olin's overwhelming power, but a subduing, almost tranquil spell of genial feeling, expressed often by tears or half-suppressed ejaculations; something of the kindly effect of Summerfield combined with a higher intellectual impression. Fisk lived for many years in the faith and exemplification of Paul's sublime doctrine of Christian perfection. He prized that great tenet as one of the most important distinctions of Christianity. His own experience respecting it was marked by signal circumstances, and from the day he practically adopted it till he triumphed over death, its impress was radiant on his daily life. With John Wesley, he deemed this important truth—promulgated, in any very express form, almost solely by Methodism in these days—to be one of the most solemn responsibilities of his Church, the most potent element in the experimental divinity of the Scriptures" (*Methodist Quarterly Review*, July, 1852, p. 446). See Holdich, *Life of Wilbur Fisk* (N. Y. 1840, 8vo); *Methodist Quarterly*, 1842, p. 579; Sherman, *New-England Divines*, p. 238; M'Clintock, *Lives of Methodist Ministers* (N. Y. 8vo); sketch of Fisk by the Rev. O. H. Tiffany, D.D.); Sprague, *Annals*, vii, 576; Stevens, *History of the Methodist Episcopal Church*; *Christian Review*, July 9, 1868; *Zion's Herald*, vii, 400 sq. See also NEW ENGLAND THEOLOGY.

**Fiske, John, D.D.**, a Congregational minister, was born Oct. 26, 1770, in Warwick, Mass. He graduated at Dartmouth College, 1791; entered the ministry May 6, 1794; and was ordained pastor in New Braintree Oct. 26, 1796, where he remained until his death, Mar. 15, 1855. Dr. Fiske assisted largely in the founding of Amherst College. He published a *Spelling-book* (1807), and two sermons.—Sprague, *Annals*, ii, 367.

**Fiske, Nathan Welby**, an eminent Congregational minister, was born April 17, 1798, at Weston, Mass. He graduated at Dartmouth College 1817; was chosen tutor 1818, in which position he remained two years, and then entered the Theological Seminary at Andover. In Nov. 1823, he went to Savannah, and preached among the seamen and others not belonging to any church. He was chosen professor of languages in Amherst Collegiate Institution (afterwards Amherst College), 1824. A few years after, he was transferred to the chair of intellectual and moral philosophy, which he held until his death. In 1846, on account of ill health, he sailed (Nov. 5) for Palestine, and died in Jerusalem May 27, 1847. Mr. Fiske published a translation of Eschenburg's *Manual of Classical Literature* (1856), which went through three editions, and was stereotyped for the fourth ed. (1843). A volume of his *Sermons* was published in 1850, and also *Memoirs of N. W. Fiske, with Selections from his Sermons and other Writings*, by Heman Humphrey, D.D. (Amherst, 1850). The *New Englander* (Feb. 1850, p. 70) speaks of his sermons as follows: "They are eminently suggestive. Some of them, like that on 'the analysis of conscience,' are fine specimens of philosophical analysis. Some, like that on 'the wonderfulness of man's mental constitution,' and that on 'the fearfulness of man's mental constitution,' lead the reader over a track almost untrodden by sermonizers, and yet presenting grounds for most powerful appeals. No thinking mind can fail to be enriched by the attentive reading of these discourses. They belong in many respects to the class of bishop Butler's sermons; yet with the bishop's strong reasoning and clear analysis of principles, they have much more of the direct and powerful application of the truth to the conscience, and are more imbued with the very essence of the doctrines of the cross."

**Fiske, Samuel**, a Congregational minister, was born in Shelburne, Mass., July 23, 1828, and was edu-

cated at Amherst College, where he graduated in 1848. After two years spent in teaching, he studied theology at Andover until 1852, when he became tutor at Amherst, where he remained until 1855, when he sailed for Europe and the East. His letters describing this journey were collected under the title of *Mr. Dunn Brown's Experiences in foreign Parts* (Boston, 1857, 12mo), and abound with wit, humor, and graphic power. In 1857 he was ordained pastor of the Congregational church at Madison, Conn., where he was remarkably useful and successful. During the Civil War his patriotism led him to join the army; and failing to secure a chaplaincy, he entered the service as private, but soon rose to be captain. While in service he wrote *Mr. Dunn Brown's Experiences in the Army* (Boston, 1866, 12mo). Made prisoner at Chancellorsville, he spent some time in Libby prison, Richmond. He fell in the first battle of the Wilderness, May 6, 1864. His Christian life in the army was kept up as at home, and he was more than a chaplain could be to his men. "He was a Christian officer, illustrating in camp, and on the march, and in battle the noblest Christian character. He decidedly rebuked all the vices of the army; he gently soothed the sick and wounded, prayed with the dying and over the dead. Touching memories of him have been recalled in our hospitals at the mention of his name. 'Oh,' said one in Washington, 'he is the man who put his arm around me so kindly, and begged me to promise him that I would never utter another oath, and I never have.' Said another; 'Captain Fiske—oh yes; he helped me off the field after that dreadful battle, gave me his blanket, and spoke kind words of cheer that helped to keep me alive.' Multitudes could testify of his fidelity to them. It was his daily duty to care both for the bodies and the souls of all about him."—*New Englander*, January, 1866, art. iv; *Congregational Quarterly*, 1866, art. i.

**Fistulæ, pipes or reeds** used in the administration of the wine in the Eucharist from the 8th century to the 12th. The deacon held the cup in his own hand, a small reed or pipe was introduced into the wine, and the communicant drew up the wine into his mouth through this pipe. The object was to prevent the possibility of spilling any of the wine.

**Fitch, EBENEZER, D.D.**, a Presbyterian minister, and president of Williams College, Mass., was born in Norwich Sept. 26, 1756, and graduated in Yale in 1777. After teaching for some time in Hanover, N. Y., he became tutor in Yale, and remained there till 1783, when he formed a mercantile connection, which proving disastrous, he returned to his former office, to which was added that of librarian. He was licensed to preach in 1787, and in 1791 became preceptor of the academy in Williamstown, Mass., of which, with the title of Williams College, he was appointed president in 1793. He resigned in 1815, and was installed pastor of the Presbyterian church, West Bloomfield, N. Y., which he resigned in 1828, after a zealous and efficient ministry. He died March 21, 1833. He published *A Baccalaureate Discourse*, 1799.—Sprague, *Annals*, iii, 511.

**Fitches** (i. e. VETCHES or chick-pea), the incorrect rendering, in the Auth. Vers., of two Heb. words. See BOTANY.

1. כֶּסֶחַ (*ke' tsach*, something strewn), which occurs only in Isa. xxviii, 25, 27, where especial reference is made to the mode of threshing it; not with "a threshing instrument," כֶּסֶחַ יָדָאֵן (קָדָאֵן), but "with a staff" (כֶּסֶחַ יָדָאֵן), because the heavy-armed cylinders of the former implement would have crushed it. Although *ketsach*, in Chaldee כֶּסֶחַ (Buxtorf, *Lex. Talm.* col. 2101), is always acknowledged to denote some seed, yet interpreters have had great difficulty in determining the particular kind intended, some translating it *peas*, others, as Luther and the English version, *vetches*, but without any proof. Meibomius considers it to

be the *white poppy*, and others a *black seed*. This last interpretation has the most numerous, as well as the oldest authorities in its support. Of these a few are in favor of the black poppy-seed, but the majority of a black seed common in Egypt, etc. (Celsius, *Herobot.* ii, 70). The Sept. translates it *μελάνθιον*, the Vulg. *gith* (perhaps from the Heb. גִּית, coriander; see Plautus, *Rud.* v, 3, 39), and Tremellius *melanthium*, while the Arabic has *shinez*. All these mean the same thing, namely, a very black-colored and aromatic seed, "*fennel-flower*" or "*black cumin*," still cultivated and in daily employment as a condiment in the East. Thus Pliny (xx, 17, 71), "*Gith*, from the Greeks, others call *melanthion*, and still others *melanspermon*. The best is that of the most pungent smell, and blackest." By Dioscorides (iii, 93), or the ancient author who is supposed to have added the synonyms, we are informed that *μελάνθιον* was also called the "wild black poppy," that the seed was black, acrid, and aromatic, and that it was added to bread or cakes. Pliny also says, "The seed of the melanthium or melanspermon makes an excellent confection in the loaves" (xix, 8). *Melanthium* is universally recognised by botanists to be the *Nigella*. Thus Bauhin Pinax, "*Nigella*, from the black color of the seed, is commonly called *μελάνθιον*." The *shinez* of the Arabs is, moreover, the same plant or seed, which is usually called "black cumin." So one kind of cumin is said by Dioscorides to have seeds like those of *melanthion* or *nigella*. It was commonly cultivated in Egypt, and P. Alpinus mentions it as "Suneg Egyptiis." The Arabs, besides *shinez*, also call it *hub-al-souda*, and the Persians *seah dana*, both words signifying *black seed*. One species, named *Nigella Indica* by Dr. Roxburgh, is called *kala jira* in India, that is, black zira or cumin, of the family of Ranunculaceæ. "*Nigella sativa* is alone cultivated in India, as in most Eastern countries, and continues in the present day, as in the most ancient times, to be used both as a condiment and as a medicine" (*Illustr. Himal. Bot.* p. 46). If we consider that this appears to have always been one of the cultivated grains of the East, and compare the character of *nigella* with the passages in which *ketsach* is mentioned, we shall find that the former is applicable to them all. Indeed, Rabbi Obadiah de Bartenora states that the barbarous or vulgar name of the *ketsach* was *nielle*, that is, *nigella*. The *Nigella sativa* is a gar-

*Nigella Sativa.*

den plant, which commonly attains the height of an ell, with narrow leaves, like the leaves of *fennel*, a blue flower, out of which is formed, on the very top of the plant, an oblong muricate capsule, the interior of which is, by means of thin membranes, separated into compartments containing a seed of a very black color not unlike the poppy, but of a pleasant smell, and a sharp taste not unlike pepper. The various species of *nigella* are herbaceous (several of them being indig-

enous in Europe, others cultivated in most parts of Asia), with their leaves deeply cut and linear, their flowers terminal, most of them having under the calyx leafy involucre which often half surround the flower. The fruit is composed of five or six capsules, which are compressed, oblong, pointed, sometimes said to be hornlike, united below, and divided into several cells, and enclosing numerous angular, scabrous, black-colored seeds. From the nature of the capsules, it is evident that, when they are ripe, the seeds might easily be shaken out by moderate blows of a stick, as is related to have been the case with the *ketsach* of the text. See TUBESHING.

Besides the *N. sativa*, there is another species, the *N. arvensis*, which may be included under the term *ketsach*; but the seeds of this last-named plant are less aromatic than the other. They are annual plants belonging to the natural order *Ranunculaceæ*, and sub-order *Uelleborææ*. The *nigella* forms a singular exception among the family to which it belongs, inasmuch as they are terrible poisons, while the *nigella* produces seeds that are not only wholesome and aromatic, but are in great reputation for their medicinal qualities. See AROMATICS.

2. In Ezek. iv, 9, "fitches" are mentioned among the materials of the bread the prophet was bidden to make, but there it represents the Heb. word כִּסְסִים, *kusse' meth*. This word is incorrectly translated in A. V. "rye" (q. v.) in Exod. ix, 32, and Isa. xxviii, 25; but in the latter place, as in Ezek. iv, 9, we have the marginal reading "spelt," which is the true rendering of the word. The root of כִּסְסִים is סָסַם, to shear, and the species of corn to which it gives a name is the *Triticum spelta* of Linnæus—in Greek ζῆα; in Latin *far* and *ador*. "Spelt" has a four-leaved blunted calix, small blossoms, with little awns, and a smooth, slender ear (as it were shorn), the grains of which sit so firmly in the husks that they must be freed from them by peculiar devices; it grows about as high as barley, and is extensively cultivated in the southern countries of Europe, in Egypt, Arabia, and Palestine, in more than one species. The Sept. translate it by ἄλρα, in Pliny *arinea*, which corresponds with the French *riguet*; and Herodotus (ii, 36) observes that it was used by the Egyptians for baking bread" (Kalisch on Exod. ix, 32).—Kitto, s. v.; Smith, s. v. See CEREALS.

**Five-mile Act, or Oxford Act**, an act of the British Parliament, passed in 1665, which imposed an oath on all nonconformists, binding them at no time to endeavor any alteration of the government in either Church or State; and ordering that nonconforming ministers should neither live in, nor come within *five miles* (except in crossing the road) of any borough, city, or corporate town, or within five miles of any parish, town, or place in which they had been, since the Act of Oblivion, parson, vicar, or lecturer, under a penalty of forty pounds, or six months' imprisonment, and being rendered incapable of teaching any school, or taking any boarders to be taught or instructed.—Baxter, *Church History of England*, ii, 632; Neal, *History of the Puritans* (Harpers' ed.), ii, 255.

**Five Points**, the five doctrines controverted between the Calvinists and Arminians, viz. predestination, extent of the atonement, grace, free-will, and final perseverance. The *quinquarticular controversy* in England was a dispute which arose at Cambridge in 1594 respecting the above points. In 1626 two fruitless conferences were held on these points; and in 1630 bishop Davenant preached at court on these disputed matters, and thereby gave great offence to Charles I. The next year the controversy was revived at Oxford and in Ireland, of which archbishop Usher was then primate. The king issued certain injunctions concerning the bounds within which these points might be discussed. See ARMINIANISM; CALVINISM; DORT.

**Flaccus**, CAIUS NORBANUS (Græcized Γάιος Νόρβανος Φλάκκος, Josephus, *Ant.* xvi, 6, 6), son of a somewhat notable consular Roman of the same name (see Smith's *Dict. of Class. Biogr.* s. v.), was consul with Octavianus in A.D. 51 (Tacitus, *Ann.* i, 54; Sueton. *Vit.* 3). While proconsul of Asia Minor, he promulgated the emperor's decrees to the provincial magistrates in favor of the Jews (Joseph. *Ant.* xvi, 6, 3-6); and when præses of Syria he befriended Herod Agrippa till influenced by Aristobulus (*ib.* xviii, 6, 2-3).

**Flacians**, a name given to those who adhered, in the controversies among the German reformers, to Matthias Flacius (q. v.).

**Flacius** (*Flach*), MATTHIAS, also called ILLYRICUS from his native country, an eminent Lutheran reformer, was born at Albouna, in Illyria, about 1520. At sixteen he proposed entering a convent, but Baldo Lupetino, the provincial of the Franciscans, who had imbibed Protestant tendencies, advised him to study theology in the universities of Germany. Accordingly he went to Basle in 1539, to Tübingen in 1540, and in 1541 to Wittenberg, where he gave private lessons in Greek and Hebrew. In his travels he became acquainted with Grynaeus, Leonard Fuchs, Eber, and finally with Luther himself, whose zealous disciple he soon became. He was after a while appointed professor of O.-T. literature at Wittenberg, but, driven away by the issue of the Smalcaldic War in 1547, he went to Brunswick. Recalled by prince Maurice, he came back, but, having opposed Melancthon's *Leipsic Interim* [see ADIAPHORA and INTERIM], he went to Hamburg, and thence to Magdeburg, whence he published several writings against the *Interim*, though in other points, especially in the Osiandrian controversy, he sided with Melancthon. He was also for several years engaged in theological controversies with Major, Strigel, Schwenkfeld, etc. See SYNERGISTIC CONTROVERSY. About the same time he projected the *Magdeburg Centuries* [see CENTURIES], of which great work he was the life and soul. In 1557 he was made professor of the newly-organized University of Jena, which became the stronghold of strict Lutheranism, and where he was chiefly instrumental in the drawing up of the *Sächsische Confutationsschrift*, to enforce Lutheran views. It, however, proved injurious both to the university and to himself, as it led the duke to establish a censorship, to which Flacius and his colleagues were unwilling to submit, and were dismissed in 1561. He had made himself especially odious by the rash statement (in his discussion with Strigel at Weimar, 1560) that original sin is the very substance of man in his fallen state. He was accused, therefore, of Manicheism. After spending five years in Regensburg, he accepted a call to Antwerp, and from thence to Frankfort and Strasburg. Obligated to leave the latter city on account of his opinions, he returned to Frankfort, where he died in the hospital in 1575.

The career of Flacius was, on the whole, a stormy and unhappy one. But, after all the abuse that has been heaped upon him, it cannot be denied that he was a consistent upholder of the doctrines which he learned originally from Luther. The writers in the Reformed interest have generally treated him too severely; an unfavorable view of him is given by Planck, *Geschichte des Protestant. Lehrbegriffs*. The best account of him is to be found in Preger, *Matthias Flacius Illyricus u. seine Zeit* (Erlangen, 1859-61, 2 vols.), from a notice of which, in the *Bibliotheca Sacra* (1862, p. 226), we make the following extracts: "If it was right for a sincere follower of Luther to espouse the cause of his deceased friend and teacher, and to show by the severest logic that the Lutheran Church was, under Melancthon's guidance, drifting away from its moorings, then Flacius is to be exonerated from the charge of uncharitableness, and his plea must be allowed, that the unhappy division was not chargeable

to him who defended the old Wittenberg theology, but rather to him who introduced innovations. We say nothing now about the truth of the one or the other view; we only remark that Flacius was the undoubted champion of the genuine theology of Saxony, as taught by Luther. We cannot, therefore, uphold Luther and condemn Flacius. In theology we cannot say that what Luther, as the first reformer, had a right to teach, Flacius, his inferior in authority, had not a right to maintain against so great a man as Melancthon; for the theologian swears allegiance not to men, but to principles. Flacius could justly reply to all who thus reproached him, that if Melancthon was great, truth was greater. . . . But how stands the matter as it affects the intellectual and moral character of the two chief combatants? Flacius clearly had Luther's great authority on his side, and that was enough for him. Melancthon saw that the Genevan and Strasburg theologians entertained clearer and more scriptural views of the subject than Luther and the party of Flacius. With him the authority of Luther was not final. According to Flacius, all questions of theology and church usages were to be decided by the authority of the Bible and of Luther. According to Melancthon, they were to be decided by the authority of the Bible and of reason. Both were sincere and deeply in earnest. Both make out their points by irresistible logic. Schmidt, in the new Life of Melancthon just published by him, vindicates Melancthon's character in this controversy triumphantly. Preger has done the same for Flacius. Flacius shows more firmness and tenacity, Melancthon more conciliation and forbearance. The former had such a reverence for truth, or for what seemed to be truth, that he forgot the respect due to a great and good man. He was mercilessly but conscientiously contentious. The latter was so amiable and fond of peace that he would for the sake of it yield what he might have maintained. He was never a polemic, except by necessity. . . . It is a somewhat remarkable fact that Flacius was incessantly persecuted, and often driven from place to place for teaching exactly what Luther taught. He was evidently a tenacious man, and born to be a polemic; but, notwithstanding his bad name for disputatiousness, he was far less violent and abusive in his language than his opponents, and more measured and unimpassioned than Luther. It was the sharpness of his logic, and the unsparring severity with which he exposed to the light of day any deviation from Luther, that so galled his opponents. They charged him, and perhaps not unjustly, with assuming to be the guardian of the Church. He did, indeed, endeavor to persuade princes and magistrates to watch over the purity of Christian doctrine, and confessed that he called every man to account, no matter what his rank or position was, who either openly or secretly attempted to destroy what Luther had built up. At the same time, he affirmed that he did it as a faithful son of the Church, doing only what every one was bound to do, namely, to guard its purity with all the power and skill he possessed. He furthermore maintained that, as the pupil and friend of Luther, he owed it to his memory to defend him and his doctrines against all assaults, even though they were made at Wittenberg itself, and by no less a man than Melancthon. He was undoubtedly governed by conscientious motives, however he may have erred both in matters of doctrine and of expediency; but when he trusted in princes to preserve the orthodoxy of the Church, he found, to his grief, that he trusted to a broken reed. Though unfortunate in his life, and a wanderer and fugitive in his old age, and apparently unsuccessful in the chief aim of his life, still he ranks third among the men of his age in his influence upon the doctrines of the old Lutheran Church. He has, indeed, been long almost forgotten, except as an ecclesiastical historian." The chief writings of Flacius are *Omnia Scripta Latina contra adiphoristicas fraudes edita* (Magde-

burg, 1550, 8vo):—*Osiandri de Justificatione Refutatio* (Franf. 1552, 4to):—*Catalogus Testium Veritatis*, etc. (Bâle, 1556; Franf. 1674, 4to):—*Unan. Prim. Ecclesie consensus de non scrutando divinæ generationis Filii Dei modo* (Bâle, 1660, 8vo):—*Historia certaminum de primatu Papæ* (Bâle, 1554, 8vo):—*Clavis Scripture Sacre* (Bâle, 1567, 4to; Jena, 1675, fol.; a valuable Biblical and hermeneutical dictionary). See, besides the works already noticed, Twisten, *M. Flacius Illyricus* (Berlin, 1844); Adami, *Vita Theolog. Germ.*; Hoefler, *Nouv. Biogr. Générale*, xvii, 808; Herzog, *Real-Encyclopædie*, iv, 410 sq.; Heppé, *Die confess. Entwicklung der altprotest. Kirche Deutschlands* (Marburg, 1854); *Studien u. Kritiken*, 1855, 648; Schmidt, in *Zeitschrift f. d. histor. Theologie*, 1849; Dörner, *Geschichte d. prot. Theologie* (München, 1867, 8vo), 361-374; Gieseler, *Ch. History*, ed. Smith, vol. iv, § 87; and the articles ADI-PHORISTIC CONTROVERSIES; SYNERGISTIC CONTROVERSIES.

**Flag** (as the name of a plant) stands in the Auth. Vers. as the representative in part of two Heb. words. See BOTANY.

1. *Achu'* (אָחַי; Sept. Græcizes ἄχι, ἄχει, βούτρομον; Vulg. *locus palustris, carectum*), a word, according to Jerome (*Comment. in Isa. xix. 7*), of Egyptian origin, and denoting "any green and coarse herbage, such as rushes and reeds, which grows in marshy places" (comp. Gesenius, *Thes. Heb.*, p. 67). In Job viii, 11, it is asked, "Can the *achu* ("flag") grow without water?" It seems probable that some specific plant is here denoted, as Celsius has endeavored to prove (*Hierob. i*, 342), for the *achu* is mentioned with the *gome* or "papyrus." See the treatise of Haploch, *De papyro*, etc. (Coburg, 1772; with the *Additament. ib.* 1777). The word occurs once again in Gen. xli, 2, 18, where it is said that the seven well-favored kine came up out of the river and fed in an *achu* ("meadow"). Now it is generally well known that most of the plants which grow in water, as well as many of those which grow in its vicinity, are not well suited as food for cattle; some being very watery, others very coarse in texture, and some possessed of acrid and even poisonous properties. None, therefore, of the *Alge* can be intended, nor any species of *Bulmus*, or "flowering rush" (as might be inferred from one rendering of the Sept.). The different kinds of *Juncus*, or rush, though abounding in such situations, are not suited for pasturage, and, in fact, are avoided by cattle. So are the majority of the *Cyperaceæ*, or sedge tribe; and also the numerous species of *Carex*, which grow in moist situations, yet yield a very coarse grass, which is scarcely if ever touched by cattle. A few species of *Cyperus* serve as pasturage, and the roots of some of them are esculent and aromatic; but these must be dug up before cattle can feed on them. Some species of *Scirpus*, or club-rush, however, serve as food for cattle: *S. cespitosus*, for instance, is the principal food of cattle and sheep in the highlands of Scotland from the beginning of March till the end of May. Varieties of *S. maritimus*, found in different countries, and a few of the numerous kinds of *Cyperaceæ* common in Indian pastures, as *Cyperus dubius* and *hexastachyus*, are also eaten by cattle. Therefore, if any specific plant is intended, as seems implied in what goes before, it is perhaps one of the edible species of *scirpus* or *cyperus*, perhaps *C. esculentus*, which, however, has distinct Arabic names; or it may be a true grass; some species of *panicum*, for instance, which form excellent pasture in warm countries, and several of which grow luxuriantly in the neighborhood of water. But it is well known to all acquainted with warm countries subject to excessive drought that the only pasturage to which cattle can resort is a green strip of different grasses, with some sedges, which runs along the banks of rivers or of pieces of water, varying more or less in breadth according to the height of the bank, that is,

*Cyperus Esculentus.*

the distance of water from the surface. Cattle emerging from rivers, which they may often be seen doing in hot countries, would naturally go to such green herbage as intimated in this passage of Genesis, and which, as indicated in Job xviii, 2, could not grow without water in a warm, dry country and climate. Kitto (*Pict. Bib.* on Genesis, l. c.) identifies this sedge with the *μαλαθαία* of Theophrastus (*Hist. Plant.* iv, 8, 12), which plant was much eaten by sheep and cattle. There is, however, much doubt as to what the *malinathalla* denotes, as Schneider has shown. Theodotion, in Job viii, 11, has *ἀχι*; and *ἄχι* occurs in the Sept. (Isa. xix, 7) also as the representative of *אֲחִי* (A. V. "paper reeds"), which word is explained by Gesenius, naked places without trees—the grassy places on the banks of the Nile. The same Greek word is used by the son of Sirach, Eccles. xi, 16 (*ἄχι* or *ἄχαι*, for the copies vary). As no similar name is known to be applied to any plant or plants in Hebrew, endeavors have been made to find a similar one so applied in the cognate languages (see Jablonski, *Opusc.* i, 45; ii, 159, ed. Te-Water), and, as quoted by Dr. Harris (*Nat. Hist. of the Bible*, s. v.), the learned Cappellon says, "We have no radix for *אֲחִי*, unless we derive it, as Schultens does (*Comment. in Job*, l. c.), from the Arabic *achi*, to bind or join together." Hence it has been inferred that it might be some one of the grasses or sedges employed in former times, as some still are, for making ropes. But there is probably some other Arabic root which has not yet been ascertained, or which may have become obsolete; for there are numerous words in the Arabic language having reference to greenness, all of which have *akh* as a common element. Thus *akhyas*, thickets, dark groves, places full of reeds or flags, in which animals take shelter; *akhevas*, putting forth leaves; so *akhzivar*, greenness, verdure; *akchishub*, abounding in grass. These may be connected with *kah*, a common term for grass in Northern India, derived from the Persian, whence amber is called *kah-robehy*, grass-attracter.—Kitto, s. v.; Smith, s. v. See REED.

2. *Suph.* (סֹפֶר, Sept. *Ḥoc*, Vulg. *carectum*, *pelagus*) occurs frequently in the O. T. in connection with *yam*, "sea," to denote the "Red Sea" (q. v.). The term here appears to be used in a very wide sense to denote "weeds of any kind." The *yam-suph*, therefore, is the "sea of weeds," and perhaps, as Stanley (*S. and P.* p. 6, note) observes, *suph* "may be applied to any aqueous vegetation," which would include the arborescent coral growths for which this sea is celebrated, as well as the different algae which grow at the bottom: see Pliny (*H. N.* xiii, 25) and Shaw (*Travels*, p. 387, fol. 1738), who speaks of a "variety of *algæ* and *fuci* that grow within its channel, and at low water are left in great quantities upon the sea-shore" (see also p. 384). The word *suph* in Jonah ii, 5, translated "weeds" by

the A. V., has, there can be no doubt, reference to "sea-weed," and more especially to the long, ribbon-like fronds of the *Laminaria*, or the entangled masses of *Fuci*. In Exod. ii, 3, 5, however, where we read that Moses was laid "in the *suph*, A. V. 'flags,' by the river's brink," it is probable that "reeds" or "rushes," etc., are denoted, as Rab. Salomon explains it, "a place thick with reeds." (See Celsius, *Hierob.* ii, 66.) The *yam-suph* in the Coptic version (as in Exod. x, 19; xiii, 18; Psa. cvi, 7, 9, 22) is rendered "the *Sari-sea*." The word *sari* is the old Egyptian for a sedge of some kind. Jablonski (*Opusc.* i, 266) gives *Juncus* as its rendering, and compares a passage in Theophrastus (*Hist. Plant.* iv, 8, § 2, 5) which thus describes the *sari*: "The *sari* grows in water about marshes and those watery places which the river after its return to its bed leaves behind it; it has a hard and closely-twisted root, from which spring the *suria* (stalks) so-called." Pliny (*H. N.* xiii, 23) thus speaks of this plant: "The *sari*, which grows about the Nile, is a shrubby kind of plant (?), commonly being about two cubits high, and as thick as a man's thumb; it has the panicle (*coma*) of the papyrus, and is similarly eaten; the root, on account of its hardness, is used in blacksmiths' shops instead of charcoal." Sprengel (*Hist. Herb.* i, 78) identifies the *sari* of Theophrastus with the *Cyperus fastigiatus*, Linn.; but the description is too vague to serve as a sufficient basis for identification. There can be little doubt that *suph* is sometimes used in a general sense like our English "weeds." It cannot be restricted to denote *algæ*, as Celsius has endeavored to show, because none of the proper *algæ* are found in the Nile. Lady Calcott (*Script. Herb.* p. 158) thinks the *Zostera marina* ("grass-wrack") may be intended, but there is nothing in favor of such an opinion. The *suph* of Isa. xix, 6, where it is mentioned with the *kaneh*, appears to be used in a more restricted sense to denote some species of "reed" or "tall grass." There are various kinds of *Cyperaceæ* and tall *Graminaceæ*, such as *Arundo* and *Saccharum*, in Egypt.—Smith, s. v. See WEED.

Flag (as a military term) is represented generally in Heb. by *לָבַד*, *dé'gel*, such being those borne by the Israelitish camp during their march through the wilderness. Each three tribes had a banner of this description (Numb. i, 52; ii, 2 sq.; x, 14 sq.), of the color and form of which the Rabbins have many legendary stories (see Jonathan on Numb. ii; comp. Carpzov, *Appar.* p. 667 sq.). The tribe of Judah (together with Issachar and Zebulun) bore as a device a young lion (compare Gen. xlix, 9); the tribe of Reuben (with Simeon and Gad), a man (according to Jonathan, a stag, instead of the bullock, as a memento of the golden calf, Gen. xlix, 6); Ephraim (with Manasseh and Benjamin), a steer (boys, according to Jonathan); Dan (with Asher and Naphtali), an eagle (according to Jonathan, a cerastes; comp. Gen. xlix, 17), on their tribal standard. How the *field-ensigns* of the several families, which in those passages are called *לָבַד*, *signs*, differed from these *לָבַד*, is not clearly defined. The assertion of colored pennants (Harmer, i, 478) is not sustained by proof. On the pretended motto upon the banner of the Maccabees, see MACCABEES. *סָרָס*, *ves*, which is often taken for a banner, is a military signal raised upon a mountain as a telegraphic notice (Isa. v, 26; xiii, 2; xxiii, 3; xxx, 17; lxii, 10, etc.; comp. Cicero, *Attic.* x, 17; Macrobius, *Satur.* i, 16), and may have usually consisted of a high pole with a streamer flying from its summit. Others regard it rather as a beacon fire (*πυρρός*, *φωκρός*; comp. Curtius, v, 2, 7; vii, 7, 5, 13). See generally Faber, ii, 462 sq.; Jahn, II, ii, 462 sq.; Celsius, *De Vexillis Hebr.* (Upsal. 1727). To the Roman standards, *aquile* (Josephus, *War.* iii, 62; comp. Hiermann, *ad Lucian. conscrib. hist.* p. 185), an allusion apparently occurs in Matt. xxiv, 28. (On the Egyptian ensigns, see Wilkinson, i, 294; Rosel-

lini, II, iii, 230.) The Persians under Cyrus bore the same symbol (Xenoph. *Cyrop.* vii, i, 4; but Ezek. xvii, 3 is not in point, being a reference to Chaldean usages). See generally Lydii *Synt. Sacr. de re milit.* iii, 7.—Wiener, i, 362. Compare BANNER.

**Flagellants** (Lat. *flagellare*, to scourge), a name given to certain fanatical sects from the 12th to the 15th century, who used the scourge as a means of purification. See DISCIPLINE OF THE LASH. They were also called *cruciferi*, *crucifratres*, because they held it their duty, as they said, to copy the sufferings of Christ; and *acephali*, because of their separation from the Roman Church authority. Their excesses were only the natural development of certain features of the Roman discipline [see PENANCE; PENITENTIAL DISCIPLINE]; especially of the belief, springing from the system of indulgences, that the mercy of God could be propitiated by self-inflicted punishments. It is said that the first society of Flagellants appeared in Padua in the beginning of the 12th century. Amid the contests between the Guelphs and Ghibellines, cruelty and rapine were followed by remorse; and about 1260 public associations sprang up for the purpose of discipline, under the name of Flagellantes. In an edict of the marquis of Este and the people of Ferrara for their suppression, they are termed *Le Compagnie de' Rattuti*, and *Soldatis Scopre sive Flagitationis*. Muratori has given a plate of the thongs which they employed against themselves (*Antiq. Ital. med. ævi*, vi, 463). Self-scourging was practised in the open streets, and little regard was paid to decency. A hermit named Rainier, of Perugia, is named as the founder of the sect, and his success was wonderful. Vast bodies of men, girded with ropes, marched in procession, with songs and prayer, through the cities, and from one city to another, calling on the people to repent. All hostilities ceased. The momentary impression produced by these movements was profound, but it did not last long. From Italy the contagion passed over the Alps; large bodies wandered over Carniola, Austria, and even as far as Poland. In a few years they disappeared. Under the alarm of the great plague of the following century the Flagellants revived again. The plague reached Italy in 1347, and carried off throughout Europe millions of persons: 1,200,000 in Germany, where, in 1349, the Flagellants "arose afresh, with increased enthusiasm. They wandered through several provinces, whipping themselves, and propagating the most extravagant doctrines, namely, that flagellation was of equal virtue with the sacraments; that the forgiveness of all sins was to be obtained by it, exclusive of the merits of Christ; that the old law of Christ was soon to be abolished, and that a new law, enjoining the baptism of blood, to be administered by whipping, was to be substituted in its place. Clement VI issued a bull against them (Oct. 20, 1349), and in many places their leaders were burned. They are again mentioned in the beginning of the 15th century as venting yet stranger and more mystical tenets in Thuringia and Lower Saxony. They rejected every branch of external worship, entertained some wild notions respecting the evil spirit, and held that the person who believes what is contained in the Apostles' Creed, repeats frequently the Lord's Prayer and the Ave Maria, and at certain times lashes his body severely as a voluntary punishment for the transgressions he has committed, shall obtain eternal salvation. The infection spread rapidly, and occasioned much disorder; for, by travelling in such numbers, they gave rise to seditious disturbances and to very many excesses. The shameful exposure of their persons, and their extortion of alms, rendered them so obnoxious to the higher clergy and to the more respectable classes, that several princes in Germany and Italy endeavored to suppress their irregularities, and the kings of Poland and Bohemia expelled them from their territories. A numerous list of these fanatics who were condemned to the

flames is preserved by the German ecclesiastical historians. At Sangerhausen, in the year 1414, no fewer than ninety-one were burned" (*Encyc. Metrop.* s. v.). In the year 1399 a society of this character, the White Brethren (Bianchi), descended from the Alps into Italy, and were everywhere enthusiastically welcomed both by the clergy and the populace; but no sooner had they reached the papal territory than their leader was put to death, and the whole array dispersed. After this processions of Flagellants were led through Italy, Spain, and the south of France by the Dominican Vincentius Ferrentius, who may perhaps have been the secret instigator of the White Brethren. But such processions having been condemned at the Council of Constance, he also discontinued them (Gieseler, § 120). Gieseler gives extracts from the trial at Sangerhausen, 1414, with many of their articles of doctrine (*Church History*, § 120). See Boileau, *Histoire des Flagellans* (Paris, 1700, 12mo); Mosheim, *Ch. Hist.* cent. xiii, pt. ii, ch. iii; cent. xiv, pt. ii, ch. v; cent. xv, pt. ii, ch. v; Förstemann, *Die christ. Geisslergesellschaften* (Halle, 1828); Herzog, *Real-Encyclop.* iv, 726 sq.; Neander, *Ch. Hist.* (Torrey's), v, 512.

**Flagellation.** See SCOURGE.

**Flagon**, a word employed in the A. V. to render two distinct Hebrew terms.

1. *Ashishah*, אִשִּׁיחַ (2 Sam. vi, 19; 1 Chron. xvi, 3; Cant. ii, 5; Hos. iii, 1). The real meaning of this word, according to the conclusions of Gesenius (*Thest. Heb.* p. 166), is a *cake* of pressed raisins (q. v.), such as are a common refreshment in the East, especially for travellers. See CAKE. He derives it from a root signifying to *compress*, and this is confirmed by the renderings of the Sept. (*λάγανον*, ἀροῖτήν, πύμακα) and of the Vulgate (*simila*, but in Hos. *vinacia*, in Cant. *jores*, where the Sept. has *μύρα*), and also by the indications of the Targum Pseudojon. and the Mishna (*Nedarim*, 6, § 10). In the passage in Hosea there is probably a reference to a practice of offering such cakes before the false deities. The rendering of the A. V. is perhaps to be traced to Luther, who in the first two of the above passages has *ein Nüssel Wein*, and in the last *Kanne Wein*; but primarily to the interpretations of modern Jews (e. g. Gemara, *Baba B'bra*, and Targum on Chronicles), grounded on a false etymology (see Michaelis, quoted by Gesenius, and the observations of the latter, as above). It will be observed that in the first two passages the words "of wine" are interpolated, and that in the last "of wine" should be "of grapes." See FRUIT.

2. *Ne'bel*, נֶבֶל (Isa. xxii, 24), which is commonly used for a bottle (q. v.) or vessel, originally probably a skin, but in later times a piece of pottery (Isa. xxx, 14). But it also frequently occurs (Psa. lvii, 9, etc.) with the force of a musical instrument (A. V. generally "psaltery," but sometimes "viol"), a meaning which is adopted by the Targum, and the Arabic and Vulgate (*musicus*), and Luther, and given in the margin of the A. V. The text, however, seems to have aimed to follow the rendering of the Sept. (confusedly *ἰπυκομάκρονοι*), and with this agree Gesenius (*Comment.* in loc.) and Fürst (*Hebr. Handb.* s. v.), as being agreeable to the parallel *בַּכּוּפִּים*, *bowls* ("cups," Vulg. *cratera*).—Smith, s. v. See MUSICAL INSTRUMENTS; PITCHER.

**Flake** is the rendering in the A. V. at Job xli, 15 ("the *flakes* of his [i. e. Leviathan's] flesh are joined together," חֲבֵטֵי הָאֵרֶץ, *have chung*, i. e. are rigid), for חֲבֵטֵי הָאֵרֶץ, *mappal'*, something *pendulous* (elsewhere only Amos viii, 6, for *refuse* of grain, as that which falls away in winnowing, i. e. chaff), referring to the *develaps* or flabby parts on the belly of the crocodile (q. v.), which are firmly attached to the body, instead of loosely hanging as in the ox.

**Flamboyant** (Fr. *flambeau* = a torch), "a term applied by the antiquaries of France to the style of architecture which was contemporary in that country with the Perpendicular of England, from the flame-like wavings of its tracery. It ought perhaps to be regarded as a vitiated Decorated rather than a distinct style, though some of its characteristics are peculiar, and it seldom possesses the purity or boldness of earlier ages; in rich works the intricacy and redundancy of the ornaments are sometimes truly surprising. One of the most striking and universal features is the waving arrangement of the tracery of the windows, panels, etc."—Parker, *Glossary of Architecture*, s. v.

ST. OULIN, ROUEN.

**Flame** (prop.  $\text{לָהָב}$ , *lu' hab*,  $\phi\lambda\omicron\gamma$ ), the incandescent vapor of fire, with which latter term it is usually found connected in the Bible. The only thing respecting fire which calls for explanation here is its symbolical use. In this we may distinguish a lower and a higher sense: a lower, when the reference is simply to the burning heat of the element, in which respect any vehement affection, such as anger, indignation, shame, love, is wont to be spoken of as a fire in the bosom of the individual affected (Psa. xxxix, 3; Jer. xx, 9); and a higher, which is also by much the more common one in Scripture, when it is regarded as imaging the more distinctive properties of the divine nature. In this symbolical use of fire the reference is to its powerful, penetrating agency, and the terrible melting, seemingly resistless, effects it is capable of producing. So viewed, fire, especially a "flame  $\text{לָהָב}$  of fire" (Exod. iii, 2), is the chosen symbol of the holiness of God, which manifests itself in a consuming hatred of sin, and can endure nothing in its presence but what is in accordance with the pure and good. There is considerable variety in the application of the symbol, but the passages are all explicable by a reference to this fundamental idea. God, for example, is called "a consuming fire" (Heb. xii, 29; comp.  $\text{אֵשׁ מְדֹבְרֵת}$ , an intense flame); to dwell with him is to dwell "with devouring fire" (Isa. xxxiii, 14); as manifested even in the glorified Redeemer, "his eyes are like a flame of fire" (Rev. ii, 18); his aspect when coming for judgment is as if a fire went before him, or a scorching flame compassed him about (Psa. xcvi, 3; 2 Thess. i, 8)—in these, and many similar representations occurring in Scripture, it is the relation of God to sin that is more especially in view, and the searching, intense, all-consuming operation of his holiness in regard to it. They who are themselves conformed to this holiness have nothing to fear from it; they can dwell amid its light and glory as in their proper element; like Moses, can enter the flame-enwrapping cloud of the divine presence, and abide in it unscathed, though it appear in the eyes of others "like devouring fire on the top of the mount" (Exod. xxiv, 17, 18). Hence we can easily explain why in Old-Testament times the appearance of fire, and in particular the pillar of fire (enveloped in a cloud, as if to shade and restrain its excessive brightness and power), was taken as the appropriate form of the divine presence and glory; for in those times, which were more peculiarly the times of the law, it was the holiness of God that came most prominent-

ly into view; it was this which had in every form to be pressed most urgently upon the consciences of men, as a counteractive to the polluting influences of idolatry, and of essential moment to a proper apprehension of the covenant. But in the new, as well as in the old, when the same form of representation is employed, it is the same aspect of the divine character that is meant to be exhibited. Thus, at the commencement of the Gospel era, when John the Baptist came forth announcing the advent of the Lord, he spoke of him as coming to baptize with fire as well as with the Spirit, not less to burn up the chaff with fire unquenchable than to gather in the wheat into his garner (Matt. iii, 11, 12). The language is substantially that of an Old-Testament prophet (Mal. iii, 2; iv, 1); and it points, not, as is often represented, to the enlightening, purifying, love-encending agency of Christ, but to the severe and retributive effects of his appearance. He was to be set for judgment as well as for mercy; for mercy indeed first, but to those who rejected the mercy, and hardened themselves in sin, also for judgment. To be baptized with the Spirit of light, holiness, and love, is what should ever follow on a due submission to his authority; but a baptism with fire—the fire of divine wrath here (John iii, 36), growing into fire unquenchable hereafter—should be the inevitable portion of such as set themselves in rebellion against him.

It is true that fire in its symbolical use is also spoken of as purifying—the emblem of a healing process effected upon the spiritual natures of persons in covenant with God. We read, not merely of fire, but of refiner's fire, and of a spirit of burning purging away the dross and impurity of Jerusalem (Mal. iii, 2; Isa. iv, 4). Still it is a work of severity and judgment that is indicated; yet its sphere is, not the unbelieving and corrupt world, but the mixed community of the Lord's people, with many false members to be purged out, and the individual believer himself with an old man of corruption in his members to be mortified and cast off. The Spirit of holiness has a work of judgment to execute also there; and with respect to that it might doubtless be said that Christ baptizes each one of his people with fire. But in the discourse of the Baptist the reference is rather to different classes of persons than to different kinds of operation in the same person; he points to the partakers of grace on the one side, and to the children of apostasy and perdition on the other. Nor is the reference materially different in the emblem of tongues, like as of fire, which sat on the apostles at Pentecost, and in the fire that is said to go out of the mouth of the symbolical witnesses of the Apocalypse (Acts ii, 3; Rev. xi, 5). In both cases the fire indicated the power of holiness to be connected with the ministrations of Christ's chosen witnesses—a power that should, as it were, burn up the corruptions of the world, consume the enmity of men's hearts, and prove a resistless weapon against the power and malice of the adversary.—Fairbairn, s. v. Compare FIRE.

**Flamen**, according to Varro and Festus, from *flamen*, the band of white wool wrapped about the cap, was the title given to members of a college of Roman priests devoted severally to the service of a particular deity. "*Divisque aliis Sacerdotes, omnibus Pontifices, singulis Flamines sunt,*" says Cicero (*De Leg. ii*, 8). Each received his distinctive name from that of the god to whose service he was devoted—"horum singuli cognomen habent ab eo deo quod sacra faciunt" (Varro, *De Ling. Lat.* v, 84). There were two classes of flamens, (1.) those styled *flamines majores*, and always patricians, viz. the fl. dialis, martialis, and quirinalis, instituted by Numa, according to Livy (i, 20), to take charge of those religious services which had hitherto been functions of the kingly office; and (2.) the *flamines minores*, who might be, and usually were plebeians, about twelve in number, and instituted at various times.

The flamens were in the earlier times nominated by the Comitia Curiata (in the case of the dialis three being designated), but after the enactment of the *Lex Domitia* (B.C. 104) they were named by the Comitia Tributa, and when thus nominated were received (*capiti*) and inaugurated by the pontifex maximus, who always claimed paramount authority over them. The office was for life, but forfeitable for a breach of duty, or on the occurrence of some accident of ill omen while engaged in priestly functions. Their official dress was the apex, a sort of close-fitting cap, the *læna*, *χλαῖνα*, a thick woollen cloak (see Smith, *Diet. Antiq.* s. v.), and a laurel wreath. The highest in rank and honor was the flamen dialis, or priest of Jupiter, who must be the son of parents united in marriage by the ceremony of *confarreatio* (which rule probably applied to all the *maiores*), and who was himself married by the same form to his wife, officially styled flaminica, whose aid was so indispensable to him in the performance of his priestly offices that, in the event of her death, he was forced to resign, since the flamen dialis could not marry again. He was subject to many restrictions—among others, was forbidden to leave the city for a single night (though this rule was somewhat modified by Augustus and Tiberius), or to sleep out of his bed for three consecutive nights; to touch or mount a horse, or look upon an army drawn up outside of the *pomerium*; nor could he take an oath, hence he could not be a consul or governor of a province, and was, it would appear, *summo jure*, excluded from all civil offices, and made *Jove aeternum sacerdotem* (Liv. i, 20). Furthermore, he could not wear a ring *nisi perrio et casso*, whatever that may mean, or go out without his proper head-dress, or allow a knot in his attire, touch flour, leaven, leavened bread, a dead body, a dog, a she-goat, ivy, beans, or raw flesh. Similar restrictions followed the actions of the flaminica. On the other hand, the flamen dialis enjoyed peculiar privileges, viz. exemption from parental control, an ex officio seat in the senate, a licitor, the right to use the *sella curulis* and the *toga pretexta*, the seat next below the *rex sacrificulus* at banquets, and the right of sanctuary for his house. His distinctive dress was the *albugalerus* (see Hope's *Costumes*, pl. 266). Of the *flamen martialis*, or priest of Mars, and the *flumen quirinalis*, or priest of Quirinus, less frequent mention is made, and of the *flamines minores* but little is known beyond the names. The municipal towns also had flamens, and after it became a custom to deify the emperors, flamens were appointed, both in Rome and the provinces, to attend to their worship.—Smith, *Diet. Greek and Roman Antiq.* s. v.; Ramsay, *Man. Rom. Antiq.* s. v.; Livy, i, 20; v, 52; Epit. xix, xxvii, 8; xxix, 38; xxx, 26; xxxi, 50; xxxvii, 51; Tacitus, *Ann.* iii, 58, 71; iv, 16; Plutarch, *Numa*, 7, and *Quest. Rom.* p. 114, 118, 119, 164–170 (ed. Reiske); Festus, s. v. *Maximæ dignationes et majores Amnes*; Aulus Gellius, x, 15, etc. (J. W. M.)

**Flamingians.** See MENNONITES.

**Flank**, פֶּסֶל, *ke'sel*, the *loin* of an animal (Job xiv, 27, where fatness is noted as a sign of self-pampering); elsewhere in the plur. for the internal muscles of the loins near the kidneys, to which the fat adheres, Gr. *ἰσάα* (Lev. iii, 4, 10, 15; iv, 9; vii, 4); hence the viscera in general, metaphorically for the inmost feelings ("loins," Psa. xxxviii, 8). See REINS.

**Flash of lightning** (Ezek. i, 14). See LIGHTNING.

**Flatt**, a name borne by several theological writers of Germany. I. JOHANN JAKOB, born at Balingen in 1724, studied theology at Tübingen, and became tutor in that university in 1749. He was successively appointed deacon of Leonberg in 1753, of Tübingen in 1757, of St. Leonard's Church at Stuttgart in 1759, pastor in the latter city in 1781, court preacher in 1783, counsellor of the Consistory in 1784, and abbot

of Herrenalb in 1791. He died Sept. 16, 1792. His principal works are: *Meletemata philosophico-theologica ad materias gravissimas (de imputatione peccati Adami: cæci: — De vicaria Christi satisfactione: — De humane Christi nature omnipresentia* [Tüb. 1759]); — *Untersuchung, v. d. Sünde wider d. Heiligen Geist* (Lpz. 1770).

II. JOHANN FRIEDRICH, son of the foregoing, was born at Tübingen Feb. 20, 1759, became professor of theology in the university of his native city in 1798, and died Nov. 24, 1821. His principal writings are: *Versuche theolog.-kritisch-philosophischen Inhalts* (Lpz. 1785); — *Beiträge z. Bestimmung, etc. d. Causalität* (Lpz. 1788); — *Briefe ü. d. moralischen Erkenntnisgründe der Religion* (Tüb. 1789); — *Vorlesungen ü. christliche Moral*, herausgeg. v. Steudel (Tüb. 1823); — *Opuscula Academica*, herausgeg. v. Stüsskind (Tüb. 1826); — *Magazin für christliche Dogmatik u. Moral* (Tüb. 1796–1810). Hoffmann and Kling have also published his *Vorlesungen ü. d. Briefe a. d. Römer* (Tübing. 1825); — *a. d. Korinther* (1827); — *a. d. Galater und Epheser* (1828); — *a. d. Philipper, Kolosser, Thessalonicher u. Philemon* (1829); — *a. d. Timotheus u. Titus* (1831).—Doering, *Gelehrte Theologen Deutschlands*, i, 408.

III. KARL CHRISTIAN, brother of the preceding, was born at Stuttgart in 1772. He became in 1812 high counsellor of the Consistory and prebendary of Stuttgart, counsellor of the university in 1813, prelate in 1822, and general superintendent at Ulm in 1828. He resigned his office in 1842, and died in 1843. He wrote, in connection with Storr, *Lehrbuch d. christl. Dogmatik* (2d ed., 1813, 2 vols.; transl. by Schmucker, Storr and Flatt's *Biblical Theology*, Andover, 2d ed., 1836); and published, in connection with Ewald, the *Zeitschrift z. Nahrung christlichen Sinnes* (1815–1819, 3 vols.).—Pierer, *Universal-Lexikon*, s. v.

**Flattich**, JOHANN FRIEDRICH, a German theologian and educator, was born in 1713 at Beyhingen, near Ludwigsburg. After studying theology at Tübingen, he became in succession preacher of the garrison of Hohenasberg (1742), pastor of Metterzimmern (1747), and pastor at Münchening (1760). At the latter place he died in 1797. Flattich wrote a number of works and essays on education, as *Hausregeln, Vom Ehestand, Unterschiedliche Gedanken, Von der Aufzucht der Kinder*. Most of his works are collected in *Leiderhose, Leben und Schriften des J. F. Flattich* (3d edit. Heidelberg, 1856). He also enjoyed the reputation of being one of the most successful educators in Southern Germany, and was on intimate terms with many of the prominent men of that period. See Palmer, in Herzog, *Real-Encyclop.* xix, 493; Völter, in Schmid, *Encyclop. für das Erziehungs- und Unterrichts-wesen*, ii, 382. (A. J. S.)

**Flavel**, JOHN, a nonconformist divine and writer of practical works, was born in Worestershire, England, in 1627. He was in early life religiously educated by his father, and completed his public education at Oxford. Having devoted himself to the Gospel ministry, he was settled at Deptford in 1650 as curate to Mr. Walpole, and on his death succeeded to the rectory. In 1655 he accepted a unanimous and pressing call to remove to Dartmouth, where he received a much smaller stipend, but had a larger field of usefulness. In 1662 he was ejected from his living for nonconformity; he did not, however, forsake his flock, but seized every opportunity of ministering to their spiritual necessities. His colleague dying soon after, the whole care devolved on him. On the execution of the Oxford Act he was compelled to remove five miles from Dartmouth, to Slapton, where he was out of the reach of legal disturbance, and where many of his former flock, in spite of the severity of the laws, resorted to him, and he at times stole into the town to visit them. Once, while preaching in a wood, he was just entering on his discourse, when the soldiers suddenly rushed in and dispersed the conventicle. Sev-

eral of the fugitives were apprehended and fined; but the remainder, rallying after the effects of their first surprise had subsided, conveyed Mr. Flavel to a more retired spot, where he resumed his sermon. In 1687, when James II dispensed with the penal laws, Mr. Flavel came forth from obscurity, and renewed his self-sacrificing labors. He took a lively interest in the proposed union between the Presbyterian and Independent churches, which was effected in 1691, and, like many a good man in those days, fondly anticipated from that consummation a season of ecclesiastical peace and concord which never arrived. He died in 1691, leaving behind him the name of a most faithful minister. Flavel's writings are valued more for their pungent and practical earnestness than for any other qualities. His *Whole Works* were published in London in 1820 (6 vols. 8vo). The American Tract Society publishes, in cheap form, his *Fountain of Life, Method of Grace, Christ knocking at the Door, On keeping the Heart, and Touchstone of Sincerity*.—Jamieson, *Religious Biography*, s. v.; Jones, *Christian Biography*, s. v.; Bogue and Bennett, *History of Dissenters*, i, 340.

**Flaviānus**, patriarch of Antioch, was born of one of the best families in that city in the early part of the 4th century. Even while a layman he was an earnest opponent of Arianism. Theodoret (who gives a full account of Flavian) says that he, associated with another lay monk, Diodorus, "by night and day exhorted all men to be zealous in religion." He says also that "they were the first to devise the choir, and to teach them to sing the Psalms of David responsively" (*Hist. Eccles.* ii, 24). His zeal did not diminish after his ordination as priest by Meletius (q. v.), about A. D. 365 (?). When Meletius was banished from his see by Valens, Flavian remained to serve the churches in Antioch. But the Eustathian (q. v.) bishop Paulinus contested the right of Meletius, and the churches were divided. On the death of Meletius, A. D. 381, Flavian was elected to succeed him, although (according to the accusation of Paulinus) he had bound himself by oath not to accept the office while the Eustathian bishop survived. The dispute was a fierce one; but at last, when Evagrius, successor of Paulinus, died, 390, Flavian was acknowledged by both the Eastern and Western churches. He was held in great respect: Chrysostom, who was his pupil, speaks very highly of him. He died A. D. 404. He treated the Messalians severely [see MESSALIANS].—Socrates, *Hist. Ecc.* bk. v, ch. xxiv; Sozomen, *Hist. Eccles.* viii, 24; Theodoret, *Hist. Ecc.* ii, 24; Cave, *Hist. Litt.*; Ceillier, *Auteurs Sacrés* (Paris, 1860), vi, 310. See EUSTATHIUS; MELETIUS.

**Flavianus** of CONSTANTINOPLE was chosen bishop of that city, as successor to Proclus, A. D. 446 or 447. The emperor Theodosius was set against him from the beginning of his episcopate. Eutyches and his friends were very strong at court, but at a *Home Synod* at which Flavian presided (A. D. 448) at Constantinople, Eusebius of Dorylaum presented a formal complaint against Eutyches. Flavian, knowing the danger of attacking persons so powerful in court influence, at first sought to quiet the matter; but, as Eutyches was stubborn, the trial was had, and ended in his condemnation for heresy. The emperor was greatly offended, and, under the advice of Dioscurus, summoned a council at Ephesus (the Robber Council), at which Dioscurus presided, and where the most violent courses were pursued. Flavian was not only deposed, but so brutally beaten by the Egyptian attendants of Dioscurus that he died three days after (A. D. 449). The Council of Chalcedon named him martyr, and his name is to be found in the Roman martyrology, Feb. 18. See Evagrius, *Hist. Ecc.* i, 8; Neander, *Church History*, ii, 506 sq.; and arts. EUTYCHES; EUTYCHANISIS; EPIESUS, ROBBER COUNCIL OF; EUSEBIUS OF DORYLEUM.

**Flavigny**, VALERIAN DE, a French Hebrew schol-

ar, was born at Villers-en-Prayères, near Laon, about the commencement of the 17th century; was made doctor of the Sorbonne in 1628, and in 1630 professor of Hebrew at the College of France. Flavigny was master of several Oriental languages, and was considered one of the best critics of the Bible text of his time. He was engaged in a controversy with Abraham Echellensis (q. v.) and Gabriel Sionita with regard to the correctness of the polyglot of Le Jay, which was finally decided against him by a committee of the Sorbonne. He condemned the Copernican system as heretical in his *Expostulatio adversus thesim*, etc. (Paris, 1666, 12mo). He died April 29, 1674. Flavigny's writings on the text of the Bible are, *Epistole iv de incoenti Bibliorum opere septemlingui* (1636);—*Epistole duce in quibus de ingenti Bibliorum opere quod nuper Lutetia Parisiorum prodit ac ei prefata prefatione*, etc. (1646);—*Epistola iii<sup>a</sup> in qua de libello Ruth Syriaco, quem Abr. Echellensis insertum esse voluit ingenti Bibliorum operi*, etc. (1647);—*Epistola adversus Abr. Echellensem de libello Ruth, simulque sacrosancta veritas hebraica strenue defenditur atque propugnatur* (1648);—*Disquisitio theologica, an, ut habet Capellanus, nonnulla sancte Scripturæ testimonia alio modo proferantur a rabbinis quam nunc leguntur in voluminibus hebraicis* . . . (1666). Flavigny published also a dissertation against the propositions of Louis of Clèves on the episcopacy and priesthood. He was also editor of the works of Guillaume de Saint-Amour, a divine of the 13th century.—Dupin, *Bibliothèque des Aut. ecclésiastiques*, xviii, 99; Hofer, *Nouv. Biographie Générale*, xvii, 864; *Biographie Universelle*, xv, 27.

**Flax**, פִּשְׁתָּהּ, *pishtah'* (Exod. ix, 31; Isa. xlii, 3; "tow," xliii, 17); and פִּשְׁתֵּל, *pishtel'* (rendered "flax" or "linen"); Greek λίνον. As regards the latter of these two Heb. terms, there is probably only one passage where it stands for the plant in its undressed state (Josh. ii, 6). Eliminating all the places where the words are used for the article manufactured in the *thread*, the *piece*, or the *made-up garment* (q. v. severally), we reduce them to two: Exod. ix, 31, certain, and Josh. ii, 6, disputed. In the former the flax of the Egyptians is recorded to have been damaged by the plague of hail. The word פִּשְׁתֵּל, there rendered "boll," is retained by Onkelos; but is rendered in the Sept. σπερματίζον, and in the Vulg. *folliculos germinabat*. Rosenmüller renders it "the globe or knob of ripening flax" (*Schol.* ad loc.). Gesenius makes it the *calix* or *corolla*; refers to the Mishna, where it is used for the calix of the hyssop, and describes this explanation as one of long standing among the more learned Rabbins (*Thees.* p. 261). See BOLLED. As the departure of the Israelites took place in the spring, this passage has reference no doubt to the practice adopted in Egypt, as well as in India, of sowing grain partly in the months of September and October, and partly in spring, so that the wheat might easily be in blade at the same time that the barley and flax were more advanced. From the numerous references to flax and linen, there is no doubt that the plant was extensively cultivated, not only in Egypt, but also in Palestine. Ritter (*Erdkunde*, ii, 916; compare his *Vorhalle*, etc., p. 45-48) renders it probable that the cultivation of flax for the purpose of the manufacture of linen was by no means confined to these countries, but that, originating in India, it spread over the whole continent of Asia at a very early period of antiquity. For the culture of flax, low alluvial lands which have received deposits left by the overflowing of rivers are deemed the most favorable situations. To this circumstance Egypt must have been indebted for the superiority of her flax, so famous in the ancient world, and which gave to her more elaborate manufactures the subtlety of the most exquisite muslin, well meriting the epithet "woven air." Herodotus mentions (iii, 47) as laid up in a temple at Lindus, in Rhodes, a linen corslet which

had belonged to Amasis, king of Egypt, each thread of which was composed of 360 strands or filaments. In length and in fineness of fibre no country could compete with the flax which produced the "fine linen of Egypt," and which made the Delta "the great linen market of the ancient world" (Kalisch). By annihilating this crop, the seventh plague inflicted a terrible calamity. It destroyed what, next to corn, formed the staple of the country, and would only find its modern parallel in the visitation which should cut off a cotton harvest in America. That it was grown in Palestine even before the conquest of that country by the Israelites appears from Josh. ii, 6, the second of the two passages mentioned above. There is, however, some difference of opinion about the meaning of the words פְּתִיחֵי הַיַּיִץ (Sept. *λινοκαλίμη*, Vulg. *stipulae lini*, and so A. V. "stalks of flax"); Josephus speaks of *λίνου ἀγκυλίδες*, armfuls or bundles of flax; but Arab. Vers. "stalks of cotton." Gesenius, however, and Rosenmüller are in favor of the rendering "stalks of flax." If this be correct, the place involves an allusion to the custom of drying the flax-stalks by exposing them to the heat of the sun upon the flat roofs of houses; and so expressly in Josephus (*Ant.* v, i, 2). See STALK.

rendering of Lev. xiii, 47 (*ματίω στριπνίνω*), and Judg. xv, 14 (*στριπνίον*; comp. Isa. i, 31). In several other passages, as Lev. xiii, 48, 52, 59; Deut. xxii, 11; Jer. xiii, 1; Ezek. xl, 3; xlv, 17, 18, we find it mentioned as forming different articles of clothing, as girdles, cords, and bands. In Prov. xxxi, 13, the careful housewife "seeketh wool and flax, and worketh it willingly with her hands." The words of Isaiah (xlii, 3), "A bruised reed shall he not break, and the smoking flax shall he not quench," are evidently referred to in Matt. xii, 20, where *λίνον* is used as the name of flax, and as the equivalent of *pishtak*. But there can be no doubt of this word being correctly understood, as it has been well investigated by several authors. (Celsius, *Hierobot.* ii, 283; Yates, *Textinum Antiquorum*, p. 253). See COTTON.

Few plants are at once so lovely and so useful as the slender, upright herb, with taper leaves and large blue-purple flowers, from which are fashioned alike the coarsest canvas and the most ethereal cambric or lawn—the sail of the ship and the fairy-looking scarf which can be packed into a filbert shell. It was of linen, in part at least, that the hangings of the tabernacle were constructed, white, blue, and crimson, with cherubim inwoven; and it was of linen that the vestments of Aaron were fashioned. When arrayed in all his glory, Solomon could put on nothing more costly than the finest linen of Egypt; and describing "the marriage of the Lamb," the seer of Patmos represents the bride as "arrayed in fine linen, clean and white; for the fine linen is the righteousness of saints." As to Egypt, we have proof in the mummy-cloth being made of linen, and also in the representations of the flax cultivation in the paintings of the Grotto of El-Kab, which represent the whole process with the utmost clearness; and numerous testimonies might be adduced from ancient authors of the esteem in which the linen of Egypt was held (Wilkinson, *Anc. Eg.* iii, 133). From these pictures, preserved at Beni Hassan, it would seem that the Egyptian treatment of the flax-plant was essentially the same as that which was pursued till quite lately by ourselves, which even now is only modified by machinery, and which is thus described by Pliny: "The stalks are immersed in water warmed by the heat of the sun, and are kept down by weights placed upon them, for nothing is lighter than flax. The membrane or rind becoming loose is a sign of their being sufficiently macerated. They are then taken out, and repeatedly turned over in the sun until perfectly dried, and afterwards beaten by mallets on stone slabs. The tow which is nearest the rind is inferior to the inner fibres, and is fit only for the wicks of lamps. It is combed out with iron hooks until all the rind is removed. The inner part is of a finer and

Flax (*Linum Usitatissimum*).

In later times this drying was done in ovens. There is a decided reference to the raw material in the Sept.

Ancient Egyptians preparing the Flax, beating it, and making it into Twine and Cloth.

a, steps leading up to the top of the pits, b b, where the flax was steeped; c c, the flax taken by fig. 3 to dry, previous to beating; d, the stalks fresh cut.

Fig. 1 brings water in earthen pots; 2 pours it over the stalks; 4 and 5 are engaged in beating them with mallets, e e; 6, pounding the coarser parts; 7 and 8, striding the tow, after it is made into yarn, on a stone; 9; 9 and 10, twisting the yarn into a rope; 4; 11 and 12 show that a piece of cloth, i, has been made of the yarn 13, a superintendent.

winter quality. After it is made into yarn, it is polished by striking it frequently on a hard stone, moistened with water; and when woven into cloth it is again beaten with clubs, being always improved in proportion as it is beaten" (*Hist. Nat.* xix, 1). The various processes employed in preparing the flax for manufacture into cloth are indicated in Scripture. 1. The drying process (see above). 2. The peeling of the stalks and separation of the fibres (the name of flax itself being derivable either, as Parkhurst, from פֶּשֶׁתִּים, *pashat'*, to strip, peel, or as Gesenius, from פֶּשֶׁשׁ, *pashash'*, to separate into parts). 3. The hackling (Isa. xix, 9; Sept. λίνον τὸ σχιστόν; see Gesenius, *Lex. s. v.* פֶּשֶׁשׁ; and for the combs used in the process, comp. Wilkinson, *Anc. Egypt.* iii, 140). The flax, however, was not always dressed before weaving (see *Eclus.* xl, 4, where ὀμόλωρον is mentioned as a species of clothing worn by the poor). That the use of the coarser fibres was known to the Hebrews may be inferred from the mention of tow (פֶּשֶׁתִּים) in *Judg.* xvi, 9; *Isa.* i, 31. That flax was anciently one of the most important crops in Palestine appears from *Hos.* ii, 5, 9; that it continued to be grown and manufactured into linen in N. Palestine down to the Middle Ages we have the testimony of numerous Talmudists and Rabbins. At present it does not seem to be so much cultivated there as the cotton-plant. For the flax of ancient Egypt, see *Herodot.* ii, 37, 105; *Cels.* ii, p. 285 sq.; *Heeren, Ideen.* ii, 2, p. 368 sq. For that of modern Egypt, see *Hasselquist, Journey.* p. 500; *Olivier, Voyage.* iii, 297; *Girard's Observations in Descript. de l'Egypte.* xvii, 98; *Paul Lucas, Voyages.* ii, 47.—*Kitto, s. v.*; *Smith, s. v.*; *Fairbairn, s. v.* See LINEN.

Flea (פֶּשֶׁתִּים, *parosh'*, from its leaping; a name found in the Arab. equivalent: see *Bochart*, iii, 474, ed. *Rosenm.*) occurs only 1 *Sam.* xxiv, 14 [15]; *xxvi*, 20, where David thus addresses his persecutor Saul at the cave of Adullam: "After whom is the king of Israel come out? after whom dost thou pursue?—after a flea;" "The king of Israel is come out to seek a flea!" In both these passages our translation omits the force of the word פֶּשֶׁתִּים, which is found in the Hebrew of each; thus, "to pursue after, to seek one or a single flea" (*Sept.* ψάλλος *εἰς*, *Vulg.* *pulex unus*). David's allusion to the flea displays great address. It is an appeal founded upon the immense disparity between Saul, as the king of Israel, and himself as the poor contemptible object of the monarch's laborious pursuit. Hunting a flea is a comparison in other ancient writings (*Homer, Il.* x, 378; *Aristoph. Nub.* i, 2; iii, 1) for much labor expended to secure a worthless result. This insect, in the East, is often used as a popular emblem for insignificance (*Roberts, Oriental Illustrations*, p. 178). An Arabian author thus describes this troublesome insect: "A black, nimble, extenuated, hunch-backed animal, which, being sensible when any one looks on it, jumps incessantly, now on one side, now on the other, till it gets out of sight." The flea belongs to the Linnean order *aptera* (*Latreille, siphonaptera*; *Kirby, aphanaoptera*). For a description of itself and congeners, see the *Penny Cyclopædia*, s. v. *Pulex*. Owing to the habits of the lower orders, fleas abound so profusely in Syria (see *Thomson, Land and Book*, ii, 94), especially during the spring, in the streets and dusty bazaars, that persons of condition always change their long dresses on returning home. There is a popular saying in Palestine that "the king of the fleas keeps his court at Tiberias," though many other places in that region might dispute the distinction

Common Flea (*Pulex Irritans*), magnified.

with that town (*Kitto, Physical History of Palestine*, p. 421).

**Flechner, ESPRIT**, a celebrated French orator and prelate, was born June 10, 1622, at Pernes, near Avignon. After studying in the college of the "Fathers of the Christian Doctrine," he went to Paris, and soon became known by a Latin poem on the famous carousal given by Louis XIV in 1662. His sermons and funeral orations soon raised him to such a pitch of reputation that the duke of Montausier recommended him to fill the office of reader to the dauphin. In 1673 he was chosen a member of the Academy, and in 1682 he was appointed almoner to the dauphiness. In 1685 he obtained the bishopric of Lavaur. When the monarch gave it to him, he said, "Do not be surprised that I have been so tardy in rewarding your merit; I was loth to be deprived of the pleasure of hearing you preach." In 1687 he was removed to the bishopric of Nismes. The Protestants of his neighborhood suffered greatly from the revocation of the Edict of Nantes, but Flechner administered his office so mildly and tenderly that he gained the love of even the Protestants. He died in February, 1710; and when Fénelon heard of his death, he cried out, "We have lost our master!" His *panegyric on Turenne* is considered his masterpiece of eloquence. Among his writings are, *Les Panegyriques des Saints* (Paris, 1697, 2 vols. 12mo); *Oraisons Funèbres* (4to); *Histoire de l'Empereur Theodoce le Grand* (Paris, 1679, 4to, and often 12mo); *Vie du Card. Ximenes* (2 vols. 12mo). They may all be found in the collection of his works, *Œuvres complètes, recues sur les manuscrits de l'auteur*, etc. (Nismes, 1782, 10 vols. 8vo).—*Biog. Universelle*, xv, 35.

**Fléchière, DE LA.** See FLETCHER, JOHN.

**Fledgling** would be a proper rendering for גִּזְיָה, *gozal'* (so called from its peeping; the Arab. and Syr. use essentially the same word in the sense of *nestling*), a "young" bird, e. g. of the dove [squab], or pigeon (*Gen.* xv, 9), or eagle [eaglet] (*Deut.* xxxii, 11. The Greek corresponding term is νεοσσός ("young" pigeon, *Luke* ii, 24). See BIRD.

**Fleece** (צֶמֶד, *gez*, so called from *shearing*, *Deut.* xviii, 4; *Job* xxxi, 20; or צֶמֶדִים, the fem. form, *Judg.* vi, 37, 39, 40), the wool of a sheep, whether on the back of the animal, or shorn off, or attached to the flayed skin, which last appears to have been the case in the passage last cited. The threshing-floor of Gideon appears to have been an open uncovered space, upon which the dews of heaven fell without interruption. See THRESHING-FLOOR. The miracle of Gideon's fleece consists in the dew having fallen one time upon the fleece, without any on the floor, and that at another time the fleece remained dry while the ground was wet with it. See GIDEON. It may appear a little improbable to us who inhabit northern climates, where the dews are inconsiderable, how Gideon's fleece in one night should contract such a quantity of water that, when he came to wring it, a bowl-full was produced; but *Kitto* observes (*Pict. Bible*, note ad loc.), "We remember, while travelling in Western Asia, to have found all the baggage, which had been left in the open air, so wet, when we came forth from the tent in the morning, that it seemed to have been exposed to heavy rain, and we could with difficulty believe that no rain had fallen. So also, when sleeping in the open air, the sheep-skin cloak which served for a covering has been found in the morning scarcely less wet than if it had been immersed in water." See DEW.

**Fleetwood, WILLIAM**, bishop of Ely, and one of the most eloquent preachers of his time, was born January, 1656, in the Tower of London, and was educated at Eton and King's College, Cambridge. After having held the preferments of rector of St. Austin's and canon of Windsor, he was made bishop of St. Asaph in 1706, and was translated to Ely in 1714. He died at

Tottenham, Middlesex, Aug. 4, 1723. In politics he held liberal views. His principal works are, *An Essay on Miracles* (1701, 8vo);—*Inscriptionum Antiquarum Sylloge* (1691, 8vo);—*Chronicon Pretiosum, or an Account of English Money* (1707);—*Method of Devotion, translated from Jurieu* (1692; of which the 27th edition appeared in 1750);—*The Judgment of the Church of England concerning Lay Baptism* (1712);—*The Life and Miracles of St. Winifred* (1713). His sermons, etc., are gathered in *A complete Collection of the Sermons, Tracts, etc., of Bp. Fleetwood* (London, 1737, fol.); and there is a new edition of his *Whole Works* from the University Press (Oxford, 1854, 3 vols. 8vo).—*New Gen. Biog. Dict.* v, 373; Allibone, *Dictionary of Authors*, p. 604.

**Fleming, Robert, sen.**, an eminent Scotch divine, was born at Yester in 1630. He studied philosophy at the University of Edinburgh, and divinity at St. Andrew's, under Rutherford. His first pastoral charge was at Cambuslang, in Clydesdale. He was one of four hundred ministers ejected by the Glasgow Act after the restoration of Charles II. He was imprisoned in the Tolbooth of Edinburgh, but was liberated in 1673, and went to Holland, where he succeeded Mr. Brown as pastor of the Scots congregation at Rotterdam. He died July 15, 1694, leaving behind him several works, of which the most remarkable is *The fulfilling of the Scriptures*, complete in three parts: 1. Providence; 2. in the word; 3. in the Church (Lond. 1726, 5th ed. fol.), with memoir of the author by D. Burgess.—Middleton, *Biog. Evang.* iv, 69.

**Fleming, Robert, jun.**, son of the above, was born at Cambuslang, and was educated at Leyden and Utrecht. In 1692 he became minister of the Scottish church at Leyden. In 1694 he succeeded his father at Rotterdam, and in 1698 became minister at Lothbury, London, where he died in 1716. He wrote a remarkable *Discourse on the Rise and Fall of the Papacy*, the predictions of which have received a singular fulfillment. In this sermon, published in 1701, Fleming ventures his opinion that the French monarchy would be humbled in 1794, that the period of the fifth vial extended from 1794 to 1848, and that in the last-mentioned year the papacy would receive its most signal blow, and that it would be followed by the destruction of the Turk. The sermon was reprinted in 1848. He published also *Christology, a Discourse concerning Christ* (Lond. 1705-8, 3 vols. 8vo), in which he maintains the eternal pre-existence of the human soul of Christ.—Jamieson, *Religious Biography*, p. 200; Dörner, *Person of Christ*, Edinb. transl., div. ii, vol. ii, p. 329.

**Fleming, Thornton**, a Methodist Episcopal minister, was born at Williamsburg, Va., Oct., 1764; was converted at about twenty; entered the itinerant ministry in 1788. He was set off with the Pittsburg Conference from the Baltimore Conference in 1825, superannuated in 1834, and died at Elizabethtown, Pa., in 1846. He was fifty-eight years in the ministry, fifteen of which he was presiding elder. He possessed rare endowments as a man and a minister, and was widely useful in his life and labors.—*Minutes of Conferences*, iv, 139; Stevens, *Hist. of the Methodist Episcopal Church*.

**Flemingians or Flamingians.** See MENNONITES.

**Flemming, Paul**, a German poet and hymn maker, was born October 15, 1609, at Hartenstein, in Schönburg, and studied medicine at Leipsic. In 1633 he accompanied the embassy sent by the duke of Holstein to Russia, and in 1635 was attached to an embassy to Persia. He returned in 1639, and died in Hamburg April 2, 1640. His *Geistliche und weltliche Poemata* (Jena, 1642) contain many love songs, and also sacred poems; among them the beautiful hymn *In allen un-*

*seren Thaten*, a translation of which is given in Miss Winkworth's *Lyra Germanica*, second series, p. 149. His life, with his select poems, was published by Schwab (Stuttgart, 1820). See Knapp, *Evangelischer Liederschatz* (Stuttg. 1837), and Müller, in the *Bibliothek deutscher Dichter des 17 Jahrhunderts* (Lpz. 1822, 3 vols.).—Chambers, *Cyclopædia*, s. v.

**Flentes**, προκλαιοντες, mourners or weepers, candidates for penance in the early Church. Their station was in the church porch, where they lay prostrate, begging the prayers of the faithful as they went in, and desiring to be admitted to do public penance in the church. See PENITENTS.

**Flesh.** בָּשָׂר, *basar'* [Chal. בְּשָׂר, *besar'*] (so called from its plump freshness), σαρκίς, terms of extensive application in the O. and N. T. (see Gesenius, *Heb. Lex.*; Robinson, *N. T. Lexicon*; Wemyss, *Clavis Symbolica*). They are applied generally to the whole animal creation, whether man or beast; or to all beings whose material substance is flesh (Gen. vi, 13, 17, 19; vii, 15, 16, 21; viii, 17); and to the flesh of cattle, meat, as used for food (Exod. xvi, 12; Lev. vii, 19; Numb. xi, 4, 13). See FOOD. Specialty: 1. All flesh, i. e. all men, the human race, mankind (Gen. vi, 12; Psa. vi, 2; exlv, 21; Isa. xl, 5, 6; Luke iii, 6; John xvii, 2; Acts ii, 17; 1 Pet. i, 24; Matt. xxiv, 22; Rom. iii, 20; Gal. ii, 16); 2. "Flesh," or the body, as distinguished from "soul" or "spirit" (Job xiv, 22; xix, 26; Prov. xiv, 30; Isa. x, 18; John vi, 52; 1 Cor. v, 5; 2 Cor. iv, 11; vii, 1; Colos. ii, 5; 1 Pet. iv, 6); so also "flesh and blood" [see BLOOD] as a periphrasis for the whole animal nature or man (Heb. ii, 14); 3. Human nature, man (Gen. ii, 23, 24; Matt. xix, 5, 6; 1 Cor. vi, 16; Ephes. v, 29-31); spoken also of the incarnation of Christ (John i, 14; vi, 51; Rom. i, 3; Ephes. ii, 15; Colos. i, 22; 1 Tim. iii, 16; Heb. v, 7; x, 20; 1 Pet. iii, 18; 1 John iv, 2, 3; 2 John 7); 4. As the medium of external or natural generation, and of consequent kindred relationship (Gen. xxix, 14; xxxvii, 27; Judg. ix, 2; 2 Sam. v, 1; xix, 13; John i, 13; Rom. ix, 8; Heb. ii, 11-14; xii, 9); of one's countrymen (Rom. ix, 3; xi, 14; Acts ii, 30; Gal. iv, 23); also of any other person, a fellow-mortal (Isa. lviii, 7); 5. "Flesh" is also used as a modest general term for the secret parts (Gen. xvii, 11; Exod. xxviii, 42; Lev. xv, 2, 3, 7, 16, 19; Ezek. xxiii, 20; 2 Pet. ii, 10; Jude 7); in Prov. v, 11, the "flesh" of the intemperate is described as being consumed by infamous diseases; 6. Spoken of circumcision in the flesh, the external rite (Gen. xvii, 11; Rom. ii, 28; 2 Cor. xi, 18; Gal. iii, 3; Ephes. ii, 11); 7. Spoken figuratively of human nature as opposed to the Spirit of God (Gen. vi, 3; Job x, 4; Isa. xxxi, 3; Psa. lvi, 4; Jer. xvii, 5; Matt. xvi, 17; 2 Cor. x, 4; Gal. i, 16); the unregenerate nature, the seat of carnal appetites and desires (*Meth. Quart. Rev.* April, 1861, p. 240 sq.), whether physical or moral (Rom. vii, 5; viii, 1, 4, 5, 8; Gal. v, 16, 17; Ephes. ii, 3); and as implying weakness, frailty, imperfection, both physical and moral (Psa. lxxviii, 39; Matt. xxvi, 41; Mark xiv, 38; John iii, 6; Rom. vi, 19; 1 Cor. xv, 50; 2 Cor. x, 3; Ephes. vi, 12).

Other terms occasionally rendered "flesh" in the O. T. are שֶׁמֶר', *sheer'* (from a similar idea of *fulness*), Psa. lxxiii, 26; lxxviii, 20, 27; Prov. xi, 17; Jer. li, 35; Mic. iii, 2, 3 (elsewhere "food," "body," "kin"), which has more especial reference to the *muscle* or physical element, as food or a bodily constituent (see Weller, *Erklärung d. zwei hebr. Wörter. בָּשָׂר und שֶׁמֶר'*, Lpz. 1757); also תְּבַחָה, *tibchah*, a slaughtered carcase (1 Sam. xxv, 11; "slaughterer," i. e. slaughter-house, Psa. xlv, 22; Jer. xii, 3); and לֶחֶם, *lechem*, food (Zeph. i, 17; "eating," Job xx, 23).

2. עֶשְׂפָר' (*eshpar'*), an obscure Heb. word, found only in 2 Sam. vi, 19; 1 Chron. xvi, 3. The Sept. appears to understand by the term some peculiar sort

of bread (*ἰσχαρίτης, ἄρτοκοπιτικός* v. r. *ἀρτοκοπικός*), and the Auth. Vers., following the Vulg. (*assatura bubule carnis, pars assæ carnis bubule*, apparently with the absurd derivation from *ῥῆ, fire*, and *ῥῆ, a bullock*), renders it "a good piece of (roasted) flesh." But there can be little doubt that it was a certain measure of wine or drink (for *ῥῆ* with *ῥ* prosthetic), a measure, cup. An approach to the truth was made by L. de Dieu, who, following the same etymology, understands a portion of the sacrifice measured out (Gesenius, *Heb. Lex.* s. v.) See MEAT.

**FLESH.** The word flesh (*ἄρῶν, σάρξ*) is used both in the O. and N. T. with a variety of meanings, physical, metaphysical, and ethical, the latter occurring especially in the writings of St. Paul.

I. *Old Testament.*—In the O. T. it designates (1.) a particular part or parts of the body of man and of animals (Gen. ii, 21; xli, 2; Job x, 11; Psa. cii, 6); (2.) in a more extended sense, the whole body (Psa. xvi, 9; lxxxiv, 2) in contradistinction from the heart (*לב*) or soul (*נפש*)—the body, that is, as possessed of a soul or spirit (Lev. xvii, 11; Job xii, 10). Hence it is also applied (3.) to all living things having flesh (Gen. vi, 13), and particularly to man and humanity as a whole, which is designated as "all flesh" (Gen. vi, 12). It is often connected (4.) with the ideas of mutability, of degeneracy, and of weakness, which are the natural defects of the flesh proper. It is thus represented as the counterpart of the divine strength, as the opposite of God or of the Spirit, as in 2 Chron. xxxii, 8, "With him is an arm of flesh, but with us is the Lord our God to help us" (see also Isa. xxxi, 3; Psa. lxxxviii, 39). To this we can also add Gen. vi, 3, the only passage in the O. T. in which the word approaches to an ethical sense, yet without actually acquiring it. The peculiar softness of the flesh is also (5.) the basis of the expression "heart of flesh" (*לב*) as opposed to "heart of stone" (Ezek. xi, 19). (6.) The expression "my flesh" (oftener "my flesh and bone"), to indicate relationship (Judg. ix, 2; Isa. lviii, 7), evidently refers to the physical and corporeal connection between persons sprung from a common father. In all these cases the O. T. only uses the word flesh in the physical and metaphysical senses.

II. *New Testament.*—These senses of the word "flesh" are also found in the N. T. (1.) As a name for the body, the exterior appearance of humanity, it easily passes on also to denote *external phenomena* in general, as opposed to what is inner and spiritual. So, when Christ says to the Jews, "I judge not after the flesh," he means "the flesh is the rule by which you judge" (John vii, 15; compare also Phil. iii, 3; 2 Cor. v, 16). In Rom. iv, 1, the ethical sense appears. The word "flesh" here denotes man's incapacity for good apart from divine aid. This impotence, both practical and spiritual, is also expressed in other passages, as in Rom. vi, 19; Matt. xvi, 17; and in Matt. xxvi, 41, where the lower, earthly, and sensual element in humanity, as opposed to the "spirit," is, as such, incapable of bearing trial and temptation. The root of this weakness is *sin dwelling in the flesh* (Rom. vii, 18; xvii, 20), by which man is divided within himself as well as separated from God, inasmuch as he has, on the one side, the self-conscious spirit (*νοῦς*), which submits to the divine law, and takes pleasure in this obedience, desiring all that is commanded, and avoiding all that is forbidden; and, on the other hand, the *flesh*, which, being inhabited by sin, seeks only for the lower satisfactions, thus inclining to evil rather than good, and opposed to the divine law (see Rom. vii, 7-25; viii, 3). The "sinful flesh" (*σάρξ ἀμαρτίας*) hinders the efficacy of the divine law, so that, although it (the law) gains the assent of the "inner man," it is not fulfilled, because of this tendency of the flesh towards what is forbidden. Hence the "being 'n the flesh" means, in fact, such ac-

tivity of the sinful passions (*παθήματα ἀμαρτῶν*) of the organism (*ἐν τοῖς μέλεσιν*) as results in death (Rom. vii, 5; viii, 8, 9). To live and act "according to the flesh" is to live and act sinfully; the "carnal mind is enmity against God" (Rom. viii, 4, 5, 7, 12). The "wisdom according to the flesh" is a mistaken, Godless wisdom (1 Cor. i, 26). All efforts, boasts, etc., having the flesh for object or for motive (*βουλεύεσθαι σαρπηύεσθαι, κενύεσθαι κατὰ σάρκα*, 2 Cor. i, 17; x, 2; xi, 18), are foreign to the life of the true Christian. The *lusts, desires, and works of the flesh* are sinful, and opposed to holy, divine impulses and actions (Gal. v, 16; Eph. ii, 3). To crucify the flesh and the works of the flesh is the great object of the Christian, which he attains through the power of the spirit of Christ which dwells in him (Gal. v, 25; Rom. viii, 13). The fleshly mind is the mistaken mind, leading away from Christ to pride, and consequently to error (Col. ii, 18, 19). Finally, to act according to the flesh is called to "be sold under sin" (Rom. vii, 12; comp. 1 John ii, 16; Rom. viii, 3).

But "flesh" does not always denote sinfulness (see Rom. i, 3; ix, 5; 1 Tim. iii, 16; John i, 14). The flesh, in Christ, was not sinful; God sent him only "in the likeness of sinful flesh" (*ἐν ὁμοιωματι σαρκὸς ἁμαρτίας*, Rom. viii, 3). This sinless flesh, as the organ of the Word of life, contains the divine life, which is communicated to men also living in the flesh, to redeem them from the death of sin, and to make them partakers of everlasting life (John vi, 51).

We see, then, that the meaning of the word flesh was, on the one hand, gradually extended from a physical to a metaphysical, and finally to an ethical sense. In the ethical use in the N. T., moreover, of the term "flesh," we do not find the idea of *essential sin* as lying in the flesh. Flesh in itself is neither bad nor sinful. It is the living body, the casket of the soul, containing within itself the interior and exterior organism of the senses, which, by its union with the spirit, conceives ideas, sensations, desires, and contains the so-called faculties of the soul with their divers functions. In the normal state, its whole activity is governed by the spirit, and in so far as the latter remains in unison with God from whom it proceeds, it is in turn governed by him. But sin, which disturbs this unison of the spirit with God, alters also the power of the spirit over the body. The *ego* oversteps the bounds of the divine life, moves no longer in harmony with the divine spirit, and, being no longer supported by the divine power, gradually becomes earthly and worldly, and all its functions partake of this character. The spirit endeavors, it is true, to bring the flesh under subjection to the higher laws, but does not succeed. It may, under the form of conscience, succeed in regaining some ground, but not in bringing back the state of abnegation and of detachment from the world. It is only through an immediate action on the part of God that the original relation of the flesh to the spirit is restored, the lost power regained, and the flesh brought back to its normal condition (*And the Word was made flesh, and dwelt among us, full of grace and truth*, John i, 14).

The original source of sin in man is neither to be found in the spirit, the organ of God's revelation within us, nor in the flesh, which is in turn the physical organ of the spirit. According to Scripture, it is the *heart*, the centre of our personality, in which all the influences, both godly and ungodly, meet—in which the choice between them is made. If the heart then gives entrance to sin, permits any doubt of God's truth, any mistrust of his love and kindness, and thus lowers him to put *self* in his place (Gen. iii), the union between God and man ceases; the inner man loses his energy to govern the *σάρξ*; the flesh starts up in opposition to the divine commands in its feelings and its desires. It asserts its independence. Self is made the centre. Hence hatred, strife, desire for worldly superiority,

creating envy, and giving rise to all the "lusts of the flesh." That both selfishness and sensualism have their seat in the *σάρξ*, and that the actions of men are guided by one or the other, is clearly shown in the enumeration given by the apostle of the works of the flesh (Gal. v, 19), which are clearly the effects of selfishness and of sinful passions; and that the word *flesh*, as used by Paul, is intended to signify both, is proved by the apostle's warning (Gal. v, 13) not to use Christian liberty for "an occasion to the flesh," i. e. to satisfy the desires of the flesh, adding to it the recommendation "*but by love serve one another.*" Whichever of the two is then especially alluded to when the Scriptures, and especially St. Paul, speak of the nature, the life, or the works of the flesh, the context will show. Sometimes both are equally active, sometimes the one only to the exclusion of the other. This is the only way in which we can arrive at a true appreciation of the meaning in each case. Those interpreters who, in view of the substitution of *σάρξ* for *σώμα* and *μέλη*, consider it as meaning exclusively the bodily, sinful side of human nature, fall into the errors of the Manichæans. See Tholuck, *Erneute Untersuchung ü. sārξ als Quelle d. Sünde* (Theol. Stud. u. Kritiken, 1855, 3); Stirm, *i. d. Tub. Zeitschr.* 1834 (ü. d. n. t. Anthropol.); Neander, *Planting and Training*, vol. ii; Kling, in Herzog, *Real-Encyclopädie*, from which this article is condensed; Campbell, *On Four Gospels*, diss. i, § 2.

**Flesh and blood.** An expression employed by our Lord to denote (after an Oriental figure) "his Spirit," represented by his flesh and blood, as these again are by the sacramental bread and wine (Eden). See EUCHARIST.

**Flesh-hook** (מַזְלֵג, *mazleg'*, and מִזְלָגָה, *mizlagah*), an instrument used in the sacrificial services (1 Sam. ii, 13, 14; Exod. xxvii, 3; xxxviii, 3; Numb. iv, 14; 1 Chron. xxviii, 17; 2 Chron. iv, 16), probably a many-pronged fork, bent backward to draw away a flesh. The priests required such an instrument that, if the flesh burnt too quickly, they might draw it out, and again throw it into the flame or upon the coals. The implement in 1 Sam. ii, 13, 14 (where the

Ancient Etruscan sacrificial Flesh-hook.

first or masc. form of the above Heb. term is used), is stated to have been three-tined, and was apparently the ordinary fork with prongs for culinary purposes, such as was familiar likewise to the Greeks and Romans (κράταρα; see Smith's *Dict. of Class. Antiq.* s. v. Harpago).

**Flesh-pot** (סִיר הַבָּסָר, *sir hab-basar'*, *pot of the flesh*, Exod. xvi, 3), probably a bronze vessel, standing on three legs, appropriated for culinary purposes among the Egyptians, such as we frequently see represented in the paintings of the tombs, with a fire lighted beneath it. See Por.

Ancient Egyptian Flesh-pot.

**Fletcher, Alexander, D.D.**, was born at the Bridge of Teith, Scotland, in 1787. He studied divinity in the University of Glasgow, and succeeded his

father as minister of the secession church at the Bridge of Teith in 1807. In 1808 he came to London to supply the Presbyterian chapel in Miles's Lane, and his popularity soon became so great that a spacious building (Albion Chapel, Moorfields) was erected for him. Some indiscretion in a love affair caused him to be cut off from the Presbyterian Church, but did not injure his moral character. A great chapel in Finsbury Circus was built for him, where he preached for many years as an Independent, but both he and his church were finally admitted into the Presbyterian body. The University of Glasgow made him D.D. During thirty years of service he was one of the most popular dissenting ministers of London, especially for his Sunday-school addresses and sermons. He published a number of works, chiefly for children and youth, among them, *Scripture Sacred History* (16mo);—*Scripture Natural History* (16mo);—*The Christian Conqueror* (12mo);—*Guide to Family Devotions* (4to);—*Sermons for Children* (3 vols. 18mo);—*Warning to Evil Speakers* (12mo);—*Sabbath Remembrancer* (12mo);—*Sabbath-school Preacher* (12mo). It is computed that 70,000 copies of his *Guide to Family Devotions* were sold before his death. He died at his residence in Clapton, Sept. 30, 1860.—*The Christian World*, Oct. 5, 1860.

**Fletcher, John (FLÉCHIERE, JOHN W. DE LA)**, an early Methodist and saintly minister of the Church of England, was born Sept. 12, 1729, at Nyon, Vaud, of a distinguished family. He was educated at Geneva, where he studied profoundly both in philology and philosophy. At an early period he was, to a certain extent, master of the French, German, Latin, Greek, and Hebrew languages. His parents intended him for the ministry, but he preferred the sword, and at twenty he entered the service of Portugal as captain. Peace returning, he went to England, and became tutor in the family of T. Hill, Esq., Shropshire. About 1755 he joined the Methodist society, and in 1757 he took orders in the Church of England. Through the influence of Rowland Hill, he received, three years after, a presentation to the living of Dunham, worth £400 a year; but, finding that in this place there was "too much time and too little labor," he, with characteristic zeal and disinterestedness, accepted Madeley in preference, as, though the income was just the half of the other, it afforded a more extensive sphere of usefulness. This was a situation for which, by his energy of character and varied accomplishments, he was peculiarly adapted. The fact is, he was such a parish priest that it is surprising he was tolerated at all within the pale of the Church of England; he belonged more to the Methodists than to the Establishment, and he was too apostolical for those who are fondest of talking about apostolical succession. The country gentlemen resisted him for reproving some of their barbarous sports and pastimes, and even many of the clergy looked on him with an evil eye, as disturbing the quiet of their lifeless routine. Opposition was shown to him in many quarters by refusals of admissions into houses—by placards posted on the doors of his chapel—and in a variety of other forms. But, unmoved by slander and undaunted by menaces, he pursued the onward tenor of his way, and did his Master's work according to the dictates of his conscience, whether men would hear or whether they would forbear. With incessant preaching he combined the most diligent pastoral labors. He went from house to house, sympathizing with the afflicted, helping the poor, ministering to the sick, and admonishing the vicious. His liberality to the poor is said, by his successor in the parish, to have been scarcely credible. He led a life of severe abstinence that he might feed the hungry; he clothed himself in cheap attire that he might clothe the naked; he sometimes unfurnished his house that he might supply suffering families with nec-

essary articles. Thus devoted to his holy office, he soon changed the tide of opposition which had raged against him, and won the reverence and admiration of his people, and many looked upon their homes as consecrated by his visits. In the summer of 1769 Mr. Fletcher visited France, Italy, and Switzerland. Towards the close of the summer he returned to England, when, at the request of Lady Huntingdon, he became president of her seminary for educating young men for the ministry at Trevecca, in Wales. In 1770 he went there to reside, but shortly afterwards resigned, on account of some difference with Lady Huntingdon. Benson describes Fletcher at Trevecca in glowing terms: "The reader," he says, "will pardon me if he thinks I exceed; my heart kindles while I write. Here it was that I saw, shall I say, an angel in human flesh? I should not far exceed the truth if I said so. But here I saw a descendant of fallen Adam so fully raised above the ruins of the fall, that though by the body he was tied down to earth, yet was his whole conversation in heaven; yet was his life from day to day hid with Christ in God. Prayer, praise, love, and zeal, all ardent, elevated above what one would think attainable in this state of frailty, were the elements in which he continually lived. Languages, arts, sciences, grammar, rhetoric, logic, even divinity itself, as it is called, were all laid aside when he appeared in the school-room among the students. And they seldom hearkened long before they were all in tears, and every heart caught fire from the flame that burned in his soul." On leaving Trevecca he resumed his missionary and pastoral labors, making Madeley his centre. But his health failed, and again he was obliged to visit Switzerland. He derived great benefit from the change of climate, and, soon after his return to England in 1781, he married. Mr. Fletcher had for many years seen, with regret and pain, the neglected condition of poor children, and he opened a school-room for them in Madeley Wood, which was the last public work in which he was employed. On the 14th of August, 1785, he expired, in sure and certain hope of a joyful resurrection. In his life the primitive excellence of apostolical Christianity was emulated and illustrated; and if any man, since the apostolic time, has deserved the title of *saint*, it is Fletcher. "For a time he fell into asceticism, living on vegetables and bread, and devoting two whole nights each week to meditation and prayer, errors which he afterwards acknowledged. He received Wesley's doctrine of Perfection, and not only wrote in its defense, but exemplified it through a life of purity, charity, and labor, which was as faultless, perhaps, as was ever lived by mortal man. Southey says: 'No age or country has ever produced a man of more fervent piety or more perfect charity; no Church has ever possessed a more apostolical minister' (*Life of Wesley*, ch. xxv). His preaching is described as greatly effective. He spoke the English language not only with correctness, but with eloquence. There was, says Gilpin, who heard him often, an energy in his discourse which was irresistible; to hear him without admiration was impossible. Powerful as are his writings, his preaching was mightier; 'his living word soared with an eagle's flight; he basked in the sun, carried his young ones on his wings, and seized the prey for his Master.' He was Wesley's most ardent coadjutor among the clergy; his counsellor, his fellow-traveler at times in his evangelical itinerancy, an attendant at his Conferences, the champion of his theological views, and, above all, a saintly example of the life and power of Christianity as taught by Methodism, read and known, admired and loved by Methodists throughout the world. Madeley, his vicarage, is familiar and dear to them next to Epworth itself" (Stevens, *Methodism*, i, 367, 422). He was eminent, also, as a controversial writer, for point, directness, acuteness, and logical skill. He wrote largely upon the Calvinistic controversy, against Top-

lady and others; and his writings, especially his *Checks to Antinomianism*, are essential to the thorough study of that controversy. "Written as detached pamphlets, and abounding in contemporary and personal references, the *Checks* could not possibly have the consistence and compactness of a thorough treatise on the difficult questions of the great 'Quinquarticular Controversy.' But they comprehend, nevertheless, nearly every important thesis of the subject. Its highest philosophical questions—theories of the freedom of the will, prescience, fatalism—are elaborately discussed by them, as in the *Remarks on Top-lady's Scheme of Necessity*, and the *Answer to Top-lady's Vindication of Decrees*. The scriptural argument is thorough; and exegetical expositions are given in detail, as in the *Discussion of the ninth Chapter to the Romans*, and the *View of St. Paul's Doctrine of the first Chapter to the Ephesians*. No writer has better balanced the apparently contradictory passages of Scripture on the question. The popular argument has never, perhaps, been more effectively drawn out. No polemical works of a former age are so extensively circulated as these *Checks*. They are read more to-day than they were during the excitement of the controversy. They control the opinions of the largest and most effective body of evangelical clergymen on the earth. They are staples in every Methodist publishing-house. Every Methodist preacher is supposed to read them as an indispensable part of his theological studies, and they are found at all points of the globe whither Methodist preachers have borne the cross. They have been more influential in the denomination than Wesley's own controversial writings on the subject; for he was content to pursue his itinerant work, replying but briefly to the Hills, and leaving the contest to Fletcher" (Stevens, *History of Methodism*, ii, 53-55). His *Appeal to Matter of Fact and Common Sense* is an admirable, and, in some respects, novel treatise on the doctrine of universal depravity. Mr. Fletcher's English style is a marvel of purity and precision, considering that he acquired the language after twenty. His writings have been collected in several editions in England, and also in America, under the title, *The Works of the Rev. John Fletcher* (New York, Methodist Book Concern, 4 vols. 8vo). For his life, see Gilpin's account, prefixed to Fletcher's *Portrait of St. Paul*; and Benson's *Life of the Rev. J. W. de la Flèche* (New York, 1833, 12mo). See also Stevens, *History of Methodism*, vols. i and ii; Jones, *Christian Biography*; *New York Review*, i, 76.

**Fletcher, Joseph, D.D.**, an Independent minister, was born at Chester in 1784. He entered Hoxton Academy in 1803, and the University of Glasgow in the following year. In 1807 he became minister of the Independent chapel at Blackburn, being at the same time engaged as theological tutor in an academy, and in 1823 he accepted a call as minister at Stepney. He died in 1813. His principal writings were edited by the Rev. Joseph Fletcher, jun., under the title of *Select Works and Memoirs* (London, 1846, 3 vols. 8vo), including the Memoir, vol. i; essays on Romanism and Puseyism, vol. ii; Sermons, vol. iii. There appeared separately, *A Discourse* (Rom. viii, 3) on *Spirituality of Mind* (London, 1824, 2d. ed. 8vo);—*A Discourse* (1 John ii, 18) on *the Prophecies concerning Antichrist* (London, 1825, 8vo);—*Discourse* (Jude 21), *the Christian's Hope of Mercy* (London, 1832, 8vo).—Darling, *Cyclopædia Bibliographica*, s. v.

**Fleury, Claude**, an eminent French historian and divine, was born in Paris Dec. 6, 1640. He was educated as an advocate at the College of Clermont, and became a counsellor of the Parliament of Paris in 1658, but subsequently took orders, and, acquiring a great reputation for learning, he was appointed in 1674 preceptor to the princess of Conti, and afterwards associated with Fénelon in educating the young dukes

of Burgundy, Anjou, and Berri. He was made member of the Academy in 1696, and in 1707 obtained from Louis XIV the priory of Argenteuil, where he resided till 1716, when he left it to become confessor to Louis XV. He died July 14, 1723, greatly respected for his learning and his virtues. His reputation rests chiefly upon his *Church History*, in twenty volumes, the first of which was published in 1691, and the last in 1722, ending with the year 1414. This work, as Fleury says in the preface, was meant to be rather a popular history than one of research and erudition; but yet it is a clear and generally fair account of the progress of Christianity, and evinces a large amount of the proper talent of the historian. It is written from the Gallican stand-point. "Fleury writes diffusely and in the spirit of a monk, but with taste and skill, in mild temper and strong love for the Church and Christianity, and with a view always to edify as well as to instruct. He follows the order of time, though not slavishly, prefacing some of his volumes with general characteristics. He also defends antiquity and the Gallican ecclesiastical constitution, without, however, surrendering at all the credit of the Church, its general tradition, or the necessity of the pope as its head. His principal concern is with doctrine, discipline, and practical piety" (Schaff, *Apost. Church*, § 26). Fleury, as a writer of Church history, is not at all in favor with Ultramontanists; a specimen of their feeling towards him is given by the *Univers* (Paris) for July 8, 1856, which calls him "the worthless and hateful Fleury, so ardent and furious in his calumnies and spite against the pope!" His *Church History* was continued by Fabri, but feebly, down to A. D. 1598. The last edition is *Histoire Ecclésiastique avec continuation par Fabri et Gouget* (Paris, 1769-74, 36 vols.; indexes, 4 vols.; in all, 40 vols. 12mo). A very good recent edition is that of Didier (Paris, 1840, 6 vols. 8vo). A translation by Herbert, up to the 9th century, was published in London (1727, 5 vols. 4to); and a partial translation by Rev. J. H. Newman appeared in 1842-44 (3 vols. 8vo). The *Abrégé de l'Histoire Ecclésiastique de Fleury*, published at Berne in 1776, is ascribed to Frederick the Great. His other writings were very numerous; the most important are, *Mœurs des Chrétiens* (Paris, 1682);—*Mœurs des Israélites* (Paris, 1681), which was translated and published, with additions, by Dr. Adam Clarke (Manchester, 1805; New York, 1836);—*Institution du droit ecclésiastique* (Paris, 1771, 2 vols. 12mo);—*Discours sur les libertés de l'Eglise Gallicane*. His minor works are collected in Martin's edition of *Œuvres de l'abbé Fleury* (1837, imp. 8vo), to which is prefixed a life of Fleury. Jortin translated his *Discourse on Eccles. History* from 600 to 1100 (see Jortin, *Remarks on Ecclesiastical History*, Lond. 1773, v, 72 sq.). See also Dupin, *Ecclesiast. Writers*, cent. xvii; Hofer, *Nouv. Biog. Générale*, xvii, 916; Dowling, *On the Study of Ecclesiastical History*, ch. iii.

**FLIEDNER, THEODOR**, a German philanthropist, was born at Eppstein, Rhenish Prussia, in 1798, where his father was pastor. His early education was conducted by his father, and he entered the ministry with some misgiving, rather doubting his fitness, and choosing rather the function of teacher. But in 1820 a call to the pastorate of the little village community of Kaiserswerth, a small town on the Rhine, opened his way, and he diffidently began his work in the place now forever associated with his name, and which became, under his hand, the centre of an influence approaching that of Wesley himself, whose power of endurance, faith, and incessant labor Fliedner rivalled. The inhabitants of Kaiserswerth were chiefly supported by a large manufactory, which failed in 1822. Fliedner devoted himself to the work of helping his flock instead of being supported by them. "Never did a man begin to ask for help with a heavier heart, nor with worse success, till a brother pastor at Elberfeld took him home to dinner, and told him that the three requi-

sites for his work were 'patience, impudence, and a ready tongue.' The receipt, to which Fliedner added much prayer and much faith, proved so successful that he was spoken of before his death as the most accomplished beggar ever known in Germany. England, America, and many distant regions learned to pour their contributions into his wallet, and often his worst necessities were relieved by what seemed almost miraculous unsolicited gifts, which exactly answered the demands upon him." In 1823 he visited England on a begging excursion, and there became acquainted with Elizabeth Fry and with her benevolent movements. See FRY, ELIZABETH. On his return he examined the prisons of his neighborhood, and found them in a wretched state. "The convicts were crammed together in narrow, dirty cells, often in damp cellars without light or air; boys who had fallen into crime from thoughtlessness were mixed up with hoary, cunning sinners; young girls with the most corrupt old women. There was absolutely no classification; even accused persons waiting for trial, who might soon be released again as innocent, were placed with criminals who might be undergoing a lengthened term of imprisonment. There was as good as no supervision at all; as long as the jailers allowed no one to escape, they had fulfilled their duty." For more than two years Fliedner tried to bridge the gulf which lay between this criminal class and the rest of the community in his own person, visiting, teaching, reorganizing, and in 1826 he founded the first German society for improving prison discipline. "Seeking a matron for the female wards at Dusseldorf, he found his wife, whose parents refused to let her take the position first offered to her, but approved her acceptance of the young pastor himself, although the second involved all the duties of the first. In 1833 he took a poor creature released from prison into a summer-house in his garden, and so practically started a scheme which had for some time been in his mind, to provide a refuge for such women as desired to reform on the expiration of their sentences. A friend of Mrs. Fliedner's came to take charge of this minute beginning, and assumed the title of deaconess. The summer-house gave way to a house, the deaconess got companions, and the establishment grew. Then the thought of founding an order of deaconesses for the care of the sick poor dawned upon him. He bought a house in 1836, having no money, but a vast amount of faith. The same may be said of all his subsequent enlargements of his borders. His hospital was started with one table, some broken chairs, a few worn knives and two-pronged forks, worm-eaten bedsteads, seven sheets, and four severe cases of illness. The effort soon flourished under royal favor." In 1838 Fliedner first sent deaconesses from his establishment to work in other places; they spread, fresh mother-houses multiplied, till now there are 129 stations. (For statistics, see DEACONESSES, vol. ii, p. 709.) In 1849 he visited America, and travelled widely. He founded a "house" at Pittsburg, Pennsylvania. "In the course of his life Fliedner established at Kaiserswerth schools, training colleges for middle-class school-mistresses as well as for governesses, a lunatic asylum, a boy's school, and a training college for schoolmasters. The hospital, the asylum, the schools, are all utilized for the training of deaconesses, whom Fliedner frequently taught himself by the example of his wonderful gifts for interesting the young. Comical stories might be told of his doings in his infant-schools, where he would fall prostrate by way of illustration of the story of Goliath, distribute bread and honey to fix the excellence of the heavenly manna on the children's minds, or suddenly send a boy under the table to vivify his tale of the fall of a traveller over a precipice. His labors lasted till his death. He died at Kaiserswerth, Oct. 4, 1864, worn out by journeys in Germany, France, Great Britain, and America, which had brought on disease of the lungs.

To the very last day of his life, he continued, in spite of painful weakness, to exhort those near him to a religious and earnest life, took keen interest in the details of daily work going on around him, and died a day or two after taking the communion with his whole establishment and family, including two sons, whose entrance into the Church he specially rejoiced to see." Fliedner published (after 1836) annual reports of his institution, and a monthly periodical called *Der Armen- und Krankenfreund*. He also wrote a work, in four volumes, on the martyrs of the Evangelical Church, *Buch der Märtyrer und anderer Glaubenszeugen der evangel. Kirche von den Aposteln bis auf unsere Zeit*, 1852-1860, 4 vols.—*London Quarterly Review*, April, 1868, p. 247; *Spectator*, April 11, 1868; Winkworth, *Life of Pastor Fliedner* (Lond. 1867); Appleton, *Am. Cyclop.* (1864), p. 377.

**Flies.** See FLY.

**Flinn, ANDREW, D.D.**, a Presbyterian minister, was born in Maryland in 1773, graduated at the University of North Carolina in 1799, and was licensed to preach by Orange Presbytery in 1800. In 1803 he became pastor of the Presbyterian church at Fayetteville, and in 1811 he was installed pastor of a new church, expressly organized for him, in Charleston, S. C. Here he gained a brilliant and solid reputation, which was soon widely diffused throughout the country. He was "one of the most impressive and attractive preachers of his day." He died Feb. 24, 1820. He printed a few occasional sermons.—*Sprague, Annals*, iv, 276.

**Flint** (חַלְמִישׁ, *challamish'*, from its smoothness, *Ps.* cxiv, 8; *Isa.* i, 7; "rock," *Job* xxviii, 9; frequently with the accompaniment חֲבֵר, a rock, *Deut.* viii, 15; xxxii, 13; once for צַר itself, *Ezek.* iii, 9; "sharp stone," *Exod.* iv, 25), any hard stone, especially of a silicious character, as quartz or granite; but in mineralogical science it is applied only to silicious nodules. In the three passages first cited above the reference is to God's bringing water and oil out of the naturally barren rocks of the wilderness for the sake of his people. In *Isaiah* the word is used metaphorically to signify the firmness of the prophet in resistance to his persecutors. So also in *Isa.* v, 28 we have *like flint*, in reference to the hoofs of horses. In *1 Macc.* x, 73, κόχλαξ is translated *flint*, and in *Wisd.* xi, 4 the expression ἐκ πέτρας ἀκροτόμου is adopted from *Deut.* viii, 15 (*Sept.*). See **ROCK**. Flints abound in nearly all the plains and valleys through which the Hebrews marched during the forty years of wandering. In the northward desert, low hills of chalk occur, as well as frequent tracts of chalky soil, for the most part overspread with flints. In the western desert Burckhardt saw some large pieces of flint perfectly oval, three to four feet in length, and about a foot and a half in breadth. This desert presents to the traveller's view its immense expanse of dreary country, covered with black flints, with here and there some hilly chains rising from the plain. See **DESERT**.

**Flint, ABEL, D.D.**, a Congregational minister, was born Nov., 1765, at Windham, Conn. He graduated at Yale in 1785, and in 1786 was elected tutor in Brown University, where he remained until 1790, and on April 20, 1791, was installed pastor of the Second Church, Hartford. He was chosen secretary of the Connecticut Missionary Society at its organization, June, 1798, and held the

office for twenty-four years. In January, 1824, he was dismissed from his pastoral charge on account of his failing health, and died March 7, 1825. Dr. Flint published *A Treatise on Surveying*, and several occasional discourses. He assisted in compiling *The Hartford Selection of Hymns*, and was also assistant editor of the *Connecticut Evangelical Magazine* for seven years.—*Sprague, Annals*, ii, 273.

**Float** (only in the plur. דְּבֵרוֹת, *doberoth'*, *drifts*, *1 Kings* v, 9; דְּבֵרוֹת, *rhapsodoth'*, of uncertain derivation, *2 Chron.* ii, 15; *Sept.* in both passages *σχεδία*, as also in *1 Esdr.* v, 55), a raft for conveying bulky substances by water. Two methods of conveying wood in floats appear to have been practised in ancient times. The first was by pushing single trunks of trees into the water, and suffering them to be carried along by the stream: this was commonly adopted with regard to firewood. The other was ranging a number of planks close to each other in regular order, binding them together, and steering them down the current: this was probably the most ancient practice. The earliest ships, or boats, were nothing more than rafts, or a collection of deals and planks bound together. They were called *σχεδία* by the Greeks, and *rates* by the Romans. The ancients ventured out to sea with them on piratical expeditions, as well as to carry on commerce; and after the invention of ships they were still retained for the transportation of soldiers (*Scheffer, De Milit. Nav. Vet.*). Solomon, it appears from the above passages, entered into a contract with Hiram, king of Tyre, by which the latter was to cause cedars for the use of the Temple to be cut down on the western side of Mount Lebanon, above Tripolis, and to be floated to Jaffa. At present no streams run from Lebanon to Jerusalem, and the Jordan, the only river in Palestine that could bear floats, is at a considerable distance from the cedar forest. The wood, therefore, must have been brought along the coast by sea to Jaffa. The Assyrian monuments represent men

Ancient Assyrian Floats.

crossing rivers on inflated skins [see **FERRY**] and in basket-boats, precisely as described by ancient authors (*Herod.* i, 194); and in the same region transportation and travelling is still largely carried on by means of floats, some of them open rafts, and others with an awning or cabin. See **NAVIGATION**.

Modern Assyrian Kellek, or Raft.

**Flock** (usually and properly  $\text{צֹדֵן}$ , *e'der*,  $\text{ποιμήνη}$  [or dimin.  $\text{ποιμνιον}$ , a "little flock," like  $\text{צֹאֵן}$ , *chasipt'*, 1 Kings xx, 27]; occasionally  $\text{מִקְנֵה}$ , *mikneh'*, cattle, as generally rendered; frequently  $\text{צֹאֵן}$ , *sheep* collectively, as commonly rendered; also  $\text{מַרְיָה}$ , *marith'*, Jer. x, 21, *pasture*, as elsewhere rendered; and  $\text{אַשְׁתְּרוֹת}$ , *ashteroth'* [q. v.], Dent. vii, 13; xxxviii, 4, 18, 51, i. e. *Venuses*, ewes for breeding). See FOLD; PASTURAGE; SHEEP.

**Flock**, the correlative term to "pastor." "The way in which this term, or the language which implies it, invariably occurs in Scripture (1 Pet. v, 2; John xxi, 15), points out to the people that they are not properly the minister's flock (which would exalt him into the mediator between them and God), but Christ's."—Eden, *Church Dictionary*, s. v.

**Floardoard** (*Floardardus* or *Froardardus*) OF RHEIMS, a French chronicler, was born at Epernay in 894, and became canon of Rheims. He was persecuted by count Heribert for opposing the raising of his unqualified son Hugo to the archbishopric of Rheims, and was imprisoned for several months. After the death of the count, Hugo the son did justice to Floardoard. He died March 28, 966. He wrote *Chronica* or *Annales*, a chronicle of France from 919 to 966, published by Pithou (Paris, 1588). He also wrote a *Historia Ecclesie Remensis*, in four books, giving an account of the prelates who had presided over its affairs (printed by Colvener, Douay, 1617). Both these works, as far as extant, are given in Migne, *Patrologia Latina*, vol. 135, together with the *Opuscula Metrica* of Floardoard, including his *Triumphus Christi*, a sort of Church History in verse.—Hoefler, *Nouv. Biog. Gén.* xvii, 936; Clarke, *Succession of Sacred Literature*, ii, 565.

**Floh**, JACOB HENDRIK, was born in the year 1758, at Crefeld. He studied theology in the Baptist seminary in Amsterdam. He was invited in 1783 to take charge of the Baptist church at Enschedé. Here he labored between forty and fifty years. He was a man of extensive knowledge and of a ready wit, and was indefatigable in his labors. He contributed greatly to promote the cause of education in the section of the country where he was located. Several valuable essays were written by him on the subject of education. One, on the *Best Theory of Punishments and Rewards in Schools*, received the prize from the Maatschappij tot nut van 't algemeen. Several works on other subjects were written by him. One, on the *Indissoluble Connection between Virtue and true Happiness*, was crowned by the same society. Another, on a kindred subject, we deem worthy of mention here: *National Happiness cannot Exist without national Virtue*. For a few years Floh allowed himself to be drawn aside from his ministerial vocation to engage in political life. In 1796 he was chosen representative of the people in the National Convention at the Hague. In 1798 he was chosen secretary of the first chamber of the representative body of the Batavian people. He acquitted himself in these positions with great credit. His theological views were Latitudinarian. His principal works are, *Proeve eener bereideneerde verklaring der geschiedenis van 's Heilands verzoeking in de woestijn*, Deventer, 1790; *Iets over bedestonden*, 1817. His attack on the Heidelberg Catechism, as teaching, in the answer to the fifth question, a doctrine dangerous to the state, made in the National Assembly at the Hague, was regarded as highly injudicious, and excited great indignation. It elicited a triumphant reply from the pen of Ewaldus Kist, one of the most highly esteemed ministers of the Reformed Church. Floh attempted no reply. It was thought that he was himself convinced by the moderate and judicious reply of Kist. We may add in honor of Floh that this attack of his was regarded as an exception to his otherwise impartial conduct as a public representative. He died at Enschedé in March,

1830. See B. Glasius, *Godgeleerd Nederland*, i Deel, blz. 467 en verv.; Ypey en Dermont's *Geschiedenis der Nederlandsche Hervormde Kerk*, iv Deel, blz. 206 en verv. (Breda, 1827). (J. P. W.)

**Flohr**, GEORGE DANIEL, a minister of the Lutheran Church, was a native of Germany, born in 1759. He died in Wytheville, Va., in 1826. He studied medicine in Paris, and was one of the throng that witnessed the execution of Louis XVI. The accidental but tragical death of an individual in the crowd standing near him, part of whose mangled body was thrown upon his person, most deeply affected him, and so operated upon his mind as to lead him to change all his purposes and plans for the future. This was the turning-point in his character. A train of serious thought was awakened which resulted in his conversion, and subsequent consecration to the work of the ministry. Soon after he came to America, and pursued the study of theology under the direction of the Rev. William Carpenter, Madison County, Va. After his licensure to preach the Gospel, he engaged in successful missionary service in south-western Virginia, but subsequently took charge of several congregations in Wythe County, among whom he faithfully labored till his death. Mr. Flohr exercised an extraordinary influence not only upon the members of his church, but upon all classes of society. When difficulties occurred in the community they were always referred to him for adjustment, and from his decision scarcely any one ever thought of an appeal. The basis of this influence was the unlimited confidence which every one had in his personal worth and Christian integrity. So far as his professional engagements allowed, Mr. Flohr was devoted to study. His acquaintance with the German and French was extensive and thorough, and his attainments in Latin and Greek considerable. The only work of his ever published was a posthumous volume of sermons. (M. L. S.)

**Flood** (the rendering of several Heb. words [see RAIN], but especially of  $\text{מַבּוּל}$ , *mabbul'*,  $\text{κατακλυσμός}$ ), an event related in the book of Genesis (ch. vii and viii), by which, according to the usual interpretation of the description, the whole world was overwhelmed and every terrestrial creature destroyed, with the exception of one human family and the representatives of each species of animal, supernaturally preserved in an ark, constructed by divine appointment for the purpose. See ARK.

1. The successive stages of its progress were in order and at intervals as follows. In the 600th year of his life, Noah was commanded to enter the ark, taking with him his wife, and his three sons with their wives. One week afterwards, on the 17th day of the 2d month (answering nearly to our November), there began a forty-days' rain, and the fountains of the great deep were broken up, so that its waters rose over the land until all the high hills under the whole heavens were covered. Fifteen cubits (twenty-seven feet) upward did the waters prevail (rise). On the 17th day of the 7th month (about April), or 150 days after the deluge began, the ark rested on the mountains of Ararat, or Armenia, the waters having begun to abate. They continued to decrease till the 1st day of the 10th month (July), when the tops of the mountains were visible. Forty days after this, Noah sent forth a raven from the ark, which never returned. He next (apparently after seven days) sent forth a dove, which came back. Seven days afterwards he dispatched the dove again to ascertain the state of the earth, and in the evening she returned with an olive-leaf in her mouth. After an interval of seven days the dove was sent forth a third time, and returned no more. On the first day of the 1st month of the new year (Sept.—Oct.) the waters were dried from off the earth, and on the 27th day of the 2d month (Nov.) Noah came out of the ark, built an altar, and offered sacrifice. See NOAH.

2. The truth of the Mosaic history of the deluge is confirmed by the tradition of it which universally obtained. A tradition of the deluge, in many respects accurately coinciding with the Mosaic account, has been preserved almost universally among the ancient nations. It is a very remarkable fact concerning the deluge that the memory of almost all nations begins with the history of it, even of those nations which were unknown until they were discovered by enterprising voyagers and travellers; and that traditions of the deluge were kept up in all the rites and ceremonies of the Gentile world; and it is observable that, the farther we go back, the more vivid the traces appear, especially in those countries which were nearest to the scene of action. Such narratives have formed part of the rude belief of the Egyptians, Chaldeans, Greeks, Scythians, and Celtic tribes. They have also been discovered among the Peruvians and Mexicans, the aborigines of Cuba, North America, and the South-Sea Islands. See ARARAT.

3. The account furnished by the sacred historian is circumstantially distinct, and the whole is expressly ascribed to divine agency: but in several of the lesser particulars secondary causes, as rain, "the opening of the windows of heaven" (vii, 11), and the "breaking up of the fountains of the great deep," are mentioned, and again the effect of wind in drying up the waters (viii, 1). It is chiefly to be remarked that the whole event is represented as both commencing and terminating in the most gradual and quiet manner, without anything at all resembling the catastrophes and convulsions often pictured in vulgar imagination as accompanying it. When the waters subsided, so little was the surface of the earth changed that the *vegetation* continued *uninjured*; the olive-trees remained from which the dove brought its token. We allude particularly to these circumstances in the narrative as being those which bear most upon the probable *nature* and extent of the event, which it is our main object in the present article to examine, according to the tenor of what little evidence can be collected on the subject, whether from the terms of the narrative, or from other sources of information which may be opened to us by the researches of science. See Cockburn, *Inquiry into the Truth and Certainty of the Mosaic Deluge* (London, 1756).

The evidence which geology may disclose, and which can in any degree bear on our present subject, must, from the nature of the case, be confined to indications of superficial action attributable to the agency of water, subsequent to the latest period of the regular geological formations, and corresponding in character to a temporary inundation of a *quiet* and tranquil nature, of a depth sufficient to cover the highest mountains, and, lastly (as indeed this condition implies), extending over the whole globe; or, if these conditions should not be fulfilled, then indications of at least something approaching to this, or with which the terms of the description may be fairly understood and interpreted to correspond. (See Prof. Hitchcock, on "The Historical and Geological Deluges compared," in the *Bib. Repos.* January, 1837; April, 1837; April, 1838; also Brown's translation of "twelve dissertations" [on the Flood] out of Le Clerc [Commentary, i, 66-70, 1710] on Genesis, London, 1696.) Of those geological facts which seem to bear at all upon such an inquiry, the first, perhaps, which strikes us is the occurrence of what was formerly all included under the common name of *diluvium*, but which more modern research has separated into many distinct classes. The general term may, however, not inaptly describe superficial accumulations, whether of soil, sand, gravel, or loose aggregations of larger blocks, which are found to prevail over large tracts of the earth's surface, and are manifestly superinduced over the deposits of different ages, with which they have no connection. An examination of the contents of this accumulated detritus soon

showed the diversified nature of the fragments of which it is composed in different localities. The general result, as bearing on our present subject, is obviously this: the traces of currents, and the like, which the surface of the earth does exhibit, and which *might* be ascribed to diluvial action of some kind, are certainly not the results of *one universal* simultaneous submergence, but of *many distinct*, local, aqueous forces, for the most part continued in action for long periods, and of a kind precisely analogous to such agency as is now at work. While, further, many parts of the existing surface show no traces of such operations; and the phenomena of the volcanic districts prove distinctly that during the enormous periods which have elapsed since the craters were active, no deluge could possibly have passed over them without removing all those lighter portions of their exuvia which have evidently remained wholly untouched since they were ejected. Upon the whole, it is thus apparent that we have no evidence whatever of any great aqueous revolution at any comparatively recent period having affected the earth's surface over any considerable tract: changes, doubtless, may have been produced on a small scale in isolated districts. The phenomena presented by caves containing bones, as at Kirkdale and other localities, are not of a kind forming any breach in the continuity of the analogies by which all the changes in the surface are more and more seen to have been carried on. But a recent simultaneous influx of water covering the globe, and ascending above the level of the mountains, must have left indisputable traces of its influence, which not only is *not* the case, but against which we have seen *positive* facts standing out. Such traces must especially be expected to be found in the masses of *human remains* which such a deluge must have imbedded in the strata of soil and detritus, if these were formed by that event. Now it is quite notorious that no bed indisputably attributable to diluvial action has ever been found containing a single bone or tooth of the human species. We must therefore contend that *no evidence has yet been adduced* of any deposit which can be identified with the Noachian deluge. See GEOLOGY.

Apart from the testimonies of geology, there are other sciences which must be interrogated on such a subject. These are, chiefly, terrestrial physics, to assign the possibility of a supply of water to stand all over the globe five miles in depth *above* the level of the ordinary sea; natural history, to count the myriads of species of living creatures to be preserved and continued in the ark; mechanics, to construct such a vessel; with some others not less necessary to the case. But we have no space to enter more minutely on such points: the reader will find them most clearly and candidly stated in Dr. Pye Smith's *Geology and Scripture*, etc., p. 130, 2d edit. See ARK.

Let us now glance at the nature and possible solutions of the difficulty thus presented. We believe only two main solutions have been attempted. One is that proposed by Dr. Pye Smith (*ib.* p. 294), who expressly contends that there is no real contradiction between these facts and the description in the Mosaic record, *when the latter is correctly interpreted*. This more correct interpretation then refers, in the first instance, to the proper import of the Scripture terms commonly taken to imply the *universality* of the deluge. These the author shows, by a large comparison of similar passages, are only to be understood as expressing a *great extent*; often, indeed, the very same phrase is applied to a very limited region or country, as in Gen. xli, 56; Deut. ii, 25; Acts ii, 5, etc. Thus, so far as these expressions are concerned, the description may apply to a local deluge. Next, the destruction of the whole existing human race does not by any means imply this universality, since, by ingenious considerations as to the multiplication of mankind at the alleged era of the deluge, the author has shown that they

probably had not extended beyond a comparatively limited district of the East. A local destruction of animal life would also allow of such a reduction of the numbers to be included in the ark as might obviate objections on that score; and here again the Oriental idiom may save the necessity of the *literal* supposition of every actual species being included. This is a consideration of very great importance when we take into account the countless varieties of animated beings for which the ark itself made no provision, such as reptiles, insects, and even fishes, which could not exist in the brackish waters, even if they survived the collisions of the flood. The other difficulties above alluded to, arising from kindred sciences, such as the lack of water, the effect of so large an accession of water upon the temperature and upon the rotation of the earth, the unfitness of such a place as the ark for the long confinement of so many animals, the actual existence of trees in different parts of the world older than the deluge, and the impossibility of preserving even vegetable life for so long a time under water, are all likewise obviated by the supposition of a local deluge. Again, the difficulties in the way of the descent of so many animals from so lofty, bleak, and craggy a mountain as Ararat, and their dissemination thence over all the world, are obviated in this way, by supposing that it was on one of its lower eminences that the ark grounded, as it floated by the force of the southerly irruption towards the great mountain barriers of Armenia. Lastly, this author suggests considerations tending to fix the region which may have been the scene of the actual inundation described by Moses in about that part of Western Asia where there is a large district now considerably depressed below the level of the sea (see the *Bibliotheca Sacra*, July, 1867, p. 465); this might have been submerged by the joint action of rain, and an elevation of the bed of the Persian and Indian Seas. Finally, he quotes the opinions of several approved divines in confirmation of such a view, especially as bearing upon all the essential religious instruction which the narrative is calculated to convey.

The only other mode of viewing the subject is that which, accepting the letter of the scriptural narrative, makes the deluge strictly universal; and allowing (as they *must* be allowed) all the difficulties, not to say contradictions, in a natural sense, involved in it, accounts for them all by *supernatural* agency. In fact, the terms of the narrative, strictly taken, may perhaps be understood throughout as representing the whole event, from beginning to end, as entirely of a miraculous nature. If so, it may be said, there is an end to all difficulties or question, since there are no limits to omnipotence, and one miracle is not greater than another. In a word, if we suppose the flood to have been miraculously produced, and all the difficulties thus overcome, we must also suppose that it was not only miraculously terminated also, but every trace and mark of it supernaturally effaced and destroyed. Now, considering the immense amount of supernatural agency thus rendered necessary, this hypothesis has appeared to some quite untenable. Dr. Pyle Smith, in particular (whom no one will suspect of any leaning to scepticism), enlarges on the difficulty (p. 157, and note), and offers some excellent remarks on the general question of miracles (p. 84-85); and there can be no doubt that, however plausible may be the assertion that all miracles are alike, yet the idea of supernatural agency to so enormous an amount as in the present instance is, to many minds at least, very staggering, if not wholly inadmissible. In fact, in stretching the argument to such an extent, it must be borne in mind that we may be trenching upon difficulties in another quarter, and not sufficiently regarding the force of the evidence on which *any* miracles are supported. See MIRACLE.

If we look to the actual tenor of the whole narrative as delivered by Moses (Gen. viii and ix), we shall ob-

serve that the manifest *immediate* purport of it is the same as that of the rest of the early portion of his history, viz. as forming part of the *introduction* to THE LAW. Thus we find, in the first instance, the narrative dwelling on the distinction of clean and unclean beasts (vii, 2); afterwards on the covenant with Noah; the promise of future enjoyment of the earth and its fruits; the prohibition of eating blood; the punishment of murder (ix, 4, etc.); all constituting, in fact, some of the *rudiments* out of which the Mosaic law was framed, and which were thus brought before the Israelites as forming an anticipatory sanction for it. Regarded in a Christian light, the narrative is important solely in respect to the applications made of it in the New Testament, and these are only of the following kind: it is referred to as a warning of Christ's coming (Matt. xxiv, 38; Luke xvii, 27); as an assurance of judgment on sin (2 Pet. ii, 5); and of God's long-suffering; while the ark is made a type of baptism and Christian salvation (1 Pet. iii, 20); and, lastly, Noah is set forth as an example of faith (Heb. xi, 7). In these applications no reference is made to the physical nature of the event, nor even to its literal universality. They are all allusions, not to the event abstractedly, but only in the way of *argument with the parties addressed* in support of *other* truths; an appeal to the Old Testament addressed to those who already believed in it—in the first of the instances cited, to the Jews—in the others, to *Jewish* converts to Christianity (compare 1 Pet. i, 1, and 2 Pet. iii, 1). Indeed, if the terms "earth" (אֶרֶץ) and "heavens" (שָׁמַיִם) be referred in the Mosaic narrative itself to the visible extent of *land* and superincumbent arch of *sky* (as they often signify), all direct statement of the universality of the deluge over the surface of the globe will at once disappear. That it was coextensive with the spread of the human race at the time is indeed demanded by the conditions of the sacred history [see ANTEDILUVIANS]; but there is no evidence that the population before the flood was either so extensive or so widely disseminated as many have imagined, calculating upon the inapposite rate of modern increase and later usages. On the contrary, it appears that even after the deluge the inhabitants were still so greatly inclined to cluster around one native centre that the catastrophe of Babel was requisite in order to induce a fulfilment of the divine behest that mankind should "fill the earth." Undoubtedly, if read from the present advanced stage of the world's history, it would be impossible to understand the language otherwise than of an absolute universality; for, now that every region of the world is known, and known to be more or less occupied by man and beast, it must have been in the strictest sense a world-embracing catastrophe which could be described as enveloping in a watery shroud every hill under the whole heaven, and destroying every living thing that moved on the face of the earth. But here it must be remembered, the sacred narrative dates from the comparative infancy of the world, when but a limited portion of it was peopled or known; and it is always one of the most natural, as well as most fertile sources of error, respecting the interpretation of such early records, that one is apt to overlook the change of circumstances, and contemplate what is written from a modern point of view. Hence the embarrassments so often felt, and the misjudgments sometimes actually pronounced, respecting those parts of Scripture which speak of the movements of the heavenly bodies in language suited to the *apparent*, but at variance, as has now been ascertained, with the *real* phenomena. In such cases it is forgotten that the Bible was not intended to teach the truths of physical science, or point the way to discoveries in the merely natural sphere. Of things in these departments of knowledge it uses the language of common life. So, whatever in the scriptural account of the deluge touches on geographi-

cal limits or matters strictly physical, ought to be taken with the qualifications inseparable from the bounded horizon of men's views and relations at the time. Accordingly, there were not wanting theological writers who, long before any geological fact, or well-ascertained fact of any sort in physical science, had appeared to shake men's faith in a strictly universal deluge, actually put the interpretation now suggested as competent upon the narrative of the deluge. Thus Poole, who flourished in the middle of the 17th century, says in his *Synopsis* on Gen. vii, 19: "It is not to be supposed that the entire globe of the earth was covered with water. Where was the need of overwhelming those regions in which there were no human beings? It would be highly unreasonable to suppose that mankind had so increased before the deluge as to have penetrated to all the corners of the earth. It is, indeed, not probable that they had extended beyond the limits of Syria and Mesopotamia. It would be absurd to affirm that the effects of the punishment inflicted upon men alone applied to places in which there were no men." Hence he concludes that "if not so much as the hundredth part of the globe was overspread with water, still the deluge would be universal, because the extirpation took effect upon all the part of the world which was inhabited." In like manner Stillingfleet, a writer of the same period, in his *Origines Sacre* (bk. iii, ch. iv.), states that "he cannot see any urgent necessity from the Scripture to assert that the flood did spread over all the surface of the earth. The flood was universal as to mankind; but from thence follows no necessity at all of asserting the universality of it as to the globe of the earth, unless it be sufficiently proved that the whole earth was peopled before the flood—which I despair of ever seeing proved." Indeed, this view dates much farther back than the comparatively recent time when these authors lived; for while bishop Patrick himself took the other and commoner view, we find him thus noting in his commentary on Gen. vii, 19: "There were those anciently (i. e. in the earlier ages), and they have their successors now, who imagined the flood was not universal—ἀλλ' ἐν ᾧ οἱ τῶρε ἀνθρώποι ᾤκουν—but only there where men then dwelt; as the author of the *Questiones ad Orthodoxos* tells us, Quest. 34." It is certain, therefore, that this is not a question between scientific naturalists on the one side, and men of simple faith in Scripture on the other. Apart from the cultivation or the discoveries of science, we have two classes of interpreters of Scripture, one of which find no reason to believe in more than a restricted universality, while the other press the language to its farthest possible extent—take it, not as descriptive of God's judgment upon the earth, in so far merely as it was occupied by men, but with reference to the globe at large, and to an event in its natural history. See Offerhaus, *De diluvio Noëico* (Franck, 1694); Hardt, *Historia diluvii Noachi* (Helmst. 1728); Diecke, *Ueber die Sündfluth* (St. Gall, 1861); Rendell, *History of the Flood* (Lond. 1851, 1864).—Kitto, s. v.; Fairbairn, s. v. Compare DELUGE.

**Floor** (ἵστῖς, *go' ren*; ἄλων), prop. a level or open area (as the "place" or square around the gates of Oriental cities, 1 Kings xxii, 10; 2 Chron. xviii, 9); hence usually the spot, well-beaten and smooth, on which grain is trodden out by cattle in the East, i. e. the "barn-floor" or "threshing-floor." See THRESHING. For the floor of rooms, see HOUSE; for that of court-yards, see PAVEMENT.

**Flore**, ORDER OF (*Floriacenses, Florenses, or Florianses*), a monastic order of the Roman Catholic Church, was founded, in 1189, by Joachim de Celico (generally called Joachim of Floris), who resigned his position of abbot of the Cistercian monastery of Corazzo in order to withdraw with some companions into the desert of Flora. Soon a monastery arose there, the statutes of

which were sanctioned in 1196 by pope Celestine III. Gradually the statutes were adopted by several monasteries in Naples and the two Calabrias; but, as the founder was suspected of heresy, the order had repeatedly to suffer persecution. In 1470 began the rule of commendatory abbots, which led to a rapid degeneration. In 1505 most of the monasteries connected with the order joined the Cistercians, while a few others were incorporated with the Carthusians and Dominicans. At the close of the 16th century no more monasteries of the order seem to have been in existence. There were also a few convents of nuns following the rule of Flore. The order differed but little from the Cistercians.—Wetzer u. Welte, *Kirchen-Lexikon*, iv, 102. (A. J. S.)

**Florence, Council of** (transferred from Ferrara in 1439). The circumstances under which the Council of Ferrara was called by Eugenius IV are stated under BASLE, COUNCIL OF; FERRARA, COUNCIL OF. The plea for the transfer of the council from Ferrara to Florence was the prevalence of the plague in Ferrara; but this must be pronounced a blind, as the plague had prevailed for months, and was nearly over when the transfer took place. "Are we, then, free to surmise that the true reason was kept a profound secret after all, and was, really, that the Latins were getting thoroughly the worst of it on the point of adding to the creed, and that attention was to be diverted from the subject by a change of scene and improved fare?" (Foulkes, *Christendom's Divisions*, ii, 346). "It is clear that the Greek bishops were only led to consent to obey the pope and go from Ferrara to Florence by the promise that their allowance for expenses, which had been withheld for several months, should be promptly paid" (Popoff, *History of the Council of Florence*, edited by Neale, Lond. 1861, ch. vi).

The bull transferring the council to Florence was read in the cathedral of Ferrara, Jan. 10, 1439; on Feb. 9 the pope and bishops entered Florence; the emperor, John Palæologus, arrived on the 15th. The aim of the council was (in continuation of that at Ferrara) to restore union between the churches of the East and the West. Eugenius IV desired this greatly, in order to confound his enemies at the Council of Basle, who were still in session, and who soon afterwards deposed him (June 25, 1439; see BASLE); while the emperor John Palæologus sought to gain the aid of the West in his wars with the Turks. The chief topic of discussion was the addition of the *filioque* to the creed [see FILIOQUE]; but the Latins succeeded in taking up the doctrinal question of the procession of the Holy Ghost instead of the historical one of the additions to the creed. The cardinal Julian chiefly represented the Latin side, and Mark of Ephesus was the strongest disputant on the side of the Greeks. Bessarion, of the Greek side, was won over to the Latin by promises of rewards from the pope. See BESSARIION.

At the first session, Feb. 26, 1439, Joseph, patriarch of Constantinople, was absent on account of illness. He died before the close of this council. Cardinal Julian proposed a discussion of the means of union; the emperor reminded him that the dispute on the *filioque* was not ended. At the end of the sitting, he held a private meeting of the Greeks to consider terms of union, but nothing came of it. In the second session (March 2) a beginning was made in discussing the doctrine of the procession, the Latin side being ably represented by Johannes de Monte Nigro, provincial of the Dominicans in Lombardy. The discussion was continued in several sessions up to the ninth (March 25). The Greeks succeeded best in the scriptural argument, and also showed that many of the passages from Epiphanius, Basil, and Augustine, cited by the Latins, had been corrupted. After the session of Mar. 17, the emperor prohibited Mark of Ephesus and Anthony of Heraclea, the two strongest advocates on the

Greek side, from taking further part in the discussions. The emperor was bent on union at any price. At the end of the session of March 24, the pope sent word to the patriarch that the Greeks must either express their assent to the Roman view, or return home by Easter, April 5. From this time the emperor vacillated: on the one side was his conscience, and also the fear that the whole East would brand him as a traitor to orthodoxy; on the other hand was his desire for the aid of the West in maintaining his falling empire. Policy triumphed. Moreover, the Greeks were far from home, and without money, and they received nothing on account of the allowance promised them by the pope from the time of their arrival in Florence until May 22. The emperor summoned a meeting of the Greek bishops, March 30, in the apartment of the invalid patriarch Joseph, and other such meetings followed. The discussions were stormy. Dositheus of Jerusalem declared that he would rather die than be false to the creed and "Latinize." Mark declared that the Latins were not only schismatics, but heretics. It was finally agreed that a committee of twenty should be appointed, ten from each side, to lay down the doctrine of the procession in a form that might be accepted by both sides. "After many unsuccessful endeavors, they drew up a profession of faith upon the subject of the procession of the Holy Spirit, in which they declared as follows: 'That the Holy Spirit is from all eternity from the Father and of the Son; that he from all eternity proceedeth from both, as from one only principle, and by one only *spiratio*; that by this way of speaking it is signified that the Son also is, as the Greeks express it, the *cause*, or, as the Latins, the *principle* of the subsistence of the Holy Spirit equally with the Father. Also we declare that what some of the holy fathers have said of the procession of the Holy Spirit *from* (ex) the Father *by* (per) the Son is to be taken in such a sense as that the Son is, as well as the Father, and conjointly with him, the cause or principle of the Holy Spirit; and since all that the Father hath he hath, in begetting him, communicated to his only begotten Son, the paternity alone excepted; so it is from the Father from all eternity that the Son hath received this also, that the Holy Spirit proceedeth from the Son as well as from the Father.' In the same decree the council declared that it was lawful to consecrate unleavened bread as well as that which had been leavened; and upon the subject of purgatory, that the souls of those who die truly penitent in the love of God, before bringing forth fruit meet for repentance, are purified after death by the pains of purgatory, and that they derive comfort in those pains from the prayers of the faithful on earth, as also by the sacrifice of the mass, alms, and other works of piety. Concerning the primacy of the pope, they confessed the pope to be the sovereign pontiff and vicar of Jesus Christ, the head of the whole Church, and the father and teacher of all Christians, and the governor of the Church of God, according to the sacred canons and acts of the oecumenical councils, *saving the privileges and rights of the Eastern patriarchs.*

After various conferences, the decree of union was drawn up in due order, in Greek and in Latin; it was then read and signed by the pope, and by eighteen cardinals, by the Latin patriarchs of Jerusalem and Grenada, and the two episcopal ambassadors of the duke of Burgundy, eight archbishops, forty-seven bishops (who were almost all Italians), four generals of monastic orders, and forty-one abbots. On the Greek side, it was signed by the emperor John Paleologus, by the vicars of the patriarchs of Alexandria, Antioch, and Jerusalem (the patriarch of Constantinople had lately died), and by several metropolitans. This decree was published on the 6th of July, 1439, after which the Greeks, to the number of thirty, left Florence, and arrived at Constantinople, February 1, 1440. The union thus formed was of very short duration. See GREEK

CHURCH. After their departure, the council continued its sittings; and in the next session, held September 4th, the fathers at Basle were declared to be heretics and schismatics. In the second, November 22d, a very long decree was made upon the subject of the union of the Armenians with the Roman Church. This decree runs in the name of the pope only. In the third, Mar. 23, 1440, the anti-pope Amadeus, whom the council at Basle had elected pope (Felix V), was declared to be a heretic and schismatic, and all his followers guilty of high treason; a promise of pardon being held out to those who should submit within fifty days. In the fourth session, 4th of February, 1441, a decree for the reunion of the Jacobites of Ethiopia with the Roman Church was published, signed by the pope and eight cardinals. Andrew, the deputy of John XI, the patriarch of Alexandria, received it in the name of the Ethiopian Jacobites. In the fifth session, 26th of April, 1442, the pope's proposal to transfer the council to Rome was agreed to, but only two sessions were held there, in which decrees for the union of the Syrians, Chaldeans, and Maronites with the see of Rome were drawn up" (Landon, *Manual of Councils*, s. v). On the return home of the Greeks, they found no welcome: Mark of Ephesus was held up as the true representative of orthodoxy, and the signers to the union were denounced as recreants. Most of those who had signed their names recanted, saying, "Alas! we have been seduced by distress, by fraud, and by the hopes and fears of a transitory life. The hand that has signed the union should be cut off, and the tongue that has pronounced the Latin creed deserves to be torn from the root."

*Literature.*—For the acts of the council (on the Latin side), see Hor. Justinianus, *Acta Concilii Florentini* (Rom. 1638, 3 parts fol.); Mansi, *Concilia*, v, ix; Labbe et Cossart, *Concil.* xiii, 223, 510, 1034; Harduin, *Concil.* ix. The acts are summed up in Semler, *Selecta Historiæ Eccles.* capit. iii, 140 sq. On the Greek side we have Sylvester Sguroplous (often written Syropoulos), *Ἀπομνημονεύματα, Vera Hist. unionis non vere inter Græcos et Latinos, s. Concilii Florent. narratio*; Gr. et Lat., ed. Rob. Creighton (Hague, 1660, fol.); in reply to which, Leo Allatius wrote *Exercit. in R. Creightonii apparatus*, etc. (Romæ, 1674, 1665, 4to). See also Schröckh, *Kirchengeschichte*, xxxiv, 388 sq.; Ffoulkes, *Christendom's Divisions* (Lond. 1867), ii, 332 sq.; Milman, *Latin Christianity*, bk. xiii, ch. xiv; Hefele, in *Tübing. Quartal-Schrift*, 1847, 183 sq.; Grier, *Epitome of Councils* (Dublin, 1827, 8vo), ch. xxvi; *The History of the Council of Florence translated by Basil Popoff*, ed. by J. M. Neale (Lond. 1861, 12mo); Cunningham, *Historical Theology*, i, 468 sq.; Elliott, *Delineation of Romanism*, bk. iii, ch. iii.

**Florentius Radewins**, successor of Gerhard Groot as director of the Brethren of the Common Life (q. v.), was born at Leerdam in 1350. He became M.A. at the University of Prague, and on his return to Holland came under the influence of Gerhard, and became his close friend, and a leader among the Brethren. He died A.D. 1400. His life was written by Thomas à Kempis (*Vita Florentii*, in *Opera Omnia*, ed. 1635, vol. iii). See Ullmann, *Reformers before the Reformation*, ii, 82 sq. See BRETUREN.

**Florian**. 1. A martyr (saint in the Roman Catholic Church), was the son of Christian parents of Celia, and served in the Roman army at the time of the emperor Dioclesian. When the prefect Aquilinus went to Loreh to search for Christians, Florian voluntarily confessed his faith and was drowned in the Enns. A pious matron, Valeria, in pursuance of a vision, had his corpse buried at the place where subsequently the monastery of St. Florian was erected. Later, his relics were taken to Rome, and in 1183 pope Lucius III sent them to king Casimir, of Poland, and bishop Gedeon, of Cracow. Thus he became the patron saint

of Poland. He is commemorated on the 4th of March. As he is particularly invoked by those in danger of fire, he is represented in Christian art with a vessel extinguishing flames.

2. One of the most celebrated Augustinian monasteries of Austria. It was erected over the grave of St. Florian (see FLORIAN, 1) in the 6th century, and built anew in 1713.—Stülz, *Gesch. des regulären Chorherren-Stiftes St. Florian* (Linz, 1835). (A. J. S.)

**Florida**, a diocese of the Protestant Episcopal Church of the United States coextensive with the state of the same name. It was organized in 1838. The first bishop was Francis Huger Rutledge, D.D., a native of South Carolina, consecrated in 1851; died at Tallahassee Nov. 4, 1866. He was succeeded by John Freeman Young, consecrated July 25, 1867. From 1862 to 1865 Florida belonged to the "General Council of the Confederate States of America." In 1868 the diocese counted 16 clergymen, 14 parishes, and 738 communicants. (A. J. S.)

**Florinians**, a sect in the 2d century who inclined to the views of the Valentinians. They were so named from Florinus, a Roman presbyter who was deposed by Eleutherius. His views are only to be gathered from a letter of Irenæus and from a passage in Eusebius (v, 20). It appears that Florinus at first pushed monarchianism so far as to make God the author of evil; and afterwards, on the other extreme, in connection with the peculiar dogmas of Valentinus, Florinus maintained that light and darkness were two eternal principles from which all the good and evil respectively in the universe had proceeded.—Neander, *Ch. Hist.* i, 680; Mosheim, *Ch. Hist.* i, 408. See VALENTINIANS.

**Floris**, JOACHIM OF. See JOACHIM.

**Florus**, **Drepanius** (commonly called FLORUS DIACONUS or MAGISTER), a deacon of the Church of Lyons in the 9th century, noted especially for the share he took in the disputes with Gottschale and Johannus Scotus, and also between Agobard and Amalarius. Against the former he wrote (A.D. 852) *Liber de Predestinatione contra Joh. Scoti erron. definitiones*. He asserts a twofold predestination, or, rather, predestination under a twofold aspect: a gratuitous predestination of the elect to grace and glory, and a predestination of the reprobate to damnation for their sins, which they commit by their own free will; and maintains that, though our free will can choose that which is good, yet it never would choose, or do it, if it were not assisted by the grace of Jesus Christ. And to explain this, he makes use of the comparison of a sick man, of whom we may say that he may recover his health, although he hath need of physic to restore it; or of a dead man, that he may be raised, but by the divine power. In like manner, saith he, the free will being distempered, and dead, by the sin of the first man, may be revived, but not by its own virtue, but by the grace and power of God, who hath pity on it, which Florus understands not only of that grace which is necessary for actions, but of that also which is necessary to seek conversion by prayer, and begin to do well. "While he censured Scotus on account of his abuse of the worldly sciences, he did not suffer himself to be so far misled by the zeal of the polemic as to discard them as useless in themselves to theology; but he had the discretion to distinguish the right use of them, in investigating truth, from that abuse. He only demanded that everything should be tried by the test of the sacred Scriptures. But, at the same time, he declared that, in order rightly to understand and apply Scripture truth, it was not enough to study the letter alone, but that the inward illumination of a Christian temper was also required. The holy Scriptures themselves could not be rightly understood and profitably read unless faith in Christ first existed in the heart of the reader, so that the truth might be

rightly apprehended by means of that, or unless faith in Christ was truly sought, and found in them by the light which cometh from above." This, and his tract *De Actione Missarum*, and *De electionibus Episcoporum*, may be found in *Bib. Max. Patr.* tom. xv; the *Opusc. ad. Amalarium* in *Martene et Durand*, collect. ix, p. 577. He compiled, chiefly from Augustine, a *Comm. in Omnes Pauli Epistolas*, which was published as Beda's until Mabillon showed it to be Florus's. All his extant writings are given in Migne, *Patrol. Lat.* cxix, 1-423.—Mosheim, *Ch. Hist.* cent. ix, pt. ii, ch. ii, n. 45; Hook, *Ecol. Biog.* v, 153; *Hist. Litt. de la France*, tom. v; Neander, *Ch. Hist.* (Torrey), iii, 489; Ceillier, *Auteurs Sacrés* (Paris, 1862), xii, 478 sq.

**Florus**, **Gessius** (Grecized Γέσιος Φλώρος by Josephus), sometimes with the prænomén *Festus* or *Cestius*, a native of Clazomenæ, appointed procurator of Judea, A.D. 64, in place of Albinus, by Nero, through the influence of his wife Cleopatra with Poppæa, the empress. His rule was marked with such unprecedented rapine and violence as to drive the Jews into their final rebellion (Tacit. *Hist.* v, 10), a result apparently intended by him in order to cover his own enormities (Josephus, *Ant.* xviii, 1, 6; xx, 11, 1; *War.* ii, 14). He took a bribe at Cæsarea from the Jews for protecting them in their synagogue worship, and then abandoned them to the fury of the Greeks, imprisoning those who came to supplicate his promised protection. He massacred and impaled Jewish citizens of rank at pleasure, and publicly derided their efforts to secure the intervention of Cestius Gallus, proconsul of Syria, in their favor. His term ended with the Jewish insurrection, A.D. 65, in which he was superseded by Vespasian, or perhaps perished (Josephus, *Life*, 6; *Ant.* xiv, 9, 2; xx, 9, 5; *War.* ii, 15; Suetonius, *Vesp.* iv; Orosius, vii, 9; Sulpic. Sev. *Sacr. Hist.* ii, 42; Eusebius, *Chron.* lxxvi).—Smith, *Dict. of Class. Biog.* s. v. See GOVERNOR.

**Flote**. See FLOAT.

**Flour** stands in the Auth. Vers. as the representative of the following Heb. words: כֶּמֶח (ke'mach, literally *marrow* [see FAT], Judg. vi, 19; 1 Sam. i, 24; xxvii, 24; 2 Sam. xvii, 28, *meal*, as it is elsewhere rendered), סוֹלֶת (so'leth, from *stripping off* the hull, the finest and purest part of the meal, usually rendered "fine flour," Sept. and N. Test. *σπιρίδις*, Rev. xviii, 18), and בַּטֶּשֶׁק (batsek', from its *swelling* in rising, 2 Sam. xiii, 18, *dough* as it is elsewhere rendered). See MEAL.

In early times corn was often eaten whole without any preparation at all (Deut. xxiii, 25), and the custom was not entirely disused in the time of our Saviour (Matt. xii, 1). Parching it afterwards became so general that the words which properly mean parched were also used for corn or meal (Ruth ii, 14; 2 Sam. xvii, 28). See PARCHED CORN. Mortars were used in the time of Moses for bruising corn, as was also the mill (Numb. xi, 8). See MORTAR. Fine meal, that is, corn or grain ground or beaten fine, is spoken of as far back as the time of Abraham (Gen. xviii, 6). At first, barley alone was ground, but afterwards wheat, as only the poor used barley. Barley-bread appears to have been more suitable in the warm climate of the East than in a colder climate. See BREAD. On the second day, however, it becomes insipid and rough to the palate, as is likewise the case with wheaten bread; hence the necessity of baking every day, and hence also the daily grinding at the mills about evening alluded to by the prophet Jeremiah (xxv, 10). See MILL. The flour, being mingled with water, was reduced to a solid mass in a sort of wooden tray or kneading-trough (q. v.); this, after remaining a little time, was kneaded, some leaven being also added to it (Exod. xii, 34). See LEAVEN. In case it was necessary to prepare the bread very hastily, the leaven

was left out (Gen. xviii, 6; xix, 3). The cakes, when made, were round, and nine or ten inches in diameter, and often not thicker than a knife.—Jahn, *Archæol.* § 137-140. See CAKE. Fine flour was especially offered by the poor as a sin-offering (Lev. v, 11-13), and in connection with other sacrifices in general (Numb. xv, 3-12; xxviii, 7-29). See OFFERING.

**Flower** (usually some form of the kindred roots פָּרַח and פָּרַח, to *glitter*, and hence to *blossom*; Sept. and N. T. ἀνθος), a generic term, not designating any particular species. Flowers grow in great variety and abundance in Palestine, and from the month of January to May the groves and meadows are adorned with the blossoms of different species of wild plants. Travellers have noticed different species of anemone, ranunculus, crocus, tulip, narcissus, hyacinth, lily, violet, aster, pink, iris, asphodel, daffodil, crowfoot, wind-flower, willow-herb, hyssop, dragon-wort, periwinkle, squill, the spiked veronica, white clover, and a flower resembling the hollyhock, and several others, which, by their variety and multitude, perfume the air, and yield a very lovely prospect. The rose of Sharon, which is not properly a rose, but a cistus, white or red, grows abundantly; also the rose of Jericho, though not properly so, grows spontaneously, particularly near the Dead Sea and the Jordan. The celebrated henna plant abounds in several places. With the jasmine, as well as with the vine, the people ornament the alleys and the arbors of their gardens. Burckhardt noticed the pretty red flower of the nomen plant, which abounds in all the valleys of Sinai, and is also seen among the most barren granitic rocks of the mountains (see Tyas, *Flowers of Holy Land*, Lond. n. l.). See PALESTINE.

Flowers in the Bible are not treated from a scientific point of view. Very few species are mentioned; and, although their beauty is once or twice alluded to in descriptive passages (sometimes under the general term "grass," Matt. vi, 38; Cant. ii, 12; v, 13), they are seldom introduced, except in the single pathetic analogy which they afford to the transitory life and glory of mankind (Job xiv, 2; Psa. ciii, 15; Isa. xxviii, 1; xl, 6; Jas. i, 10; 1 Pet. i, 24). See BOTANY. The ancient Egyptians were exceedingly fond of flowers, and they are often represented on the monuments (see Wilkinson, i, 19, 37, 57, 78, 141, 257, etc.). Gardens (פָּרַח, פָּרַח, פָּרַח, παράδεισος) were in use among Orientals from the earliest times (Gen. xiii, 10; Deut. xi, 12, etc.); but, although they were planted with flowers and fragrant herbs (Cant. vi, 2; iv, 16), often chosen for their beauty and rarity (Isa. xvii, 10), yet they appear to have been chiefly cultivated for useful and culinary purposes (Jer. xxix, 5; Cant. vi, 11; iv, 13; Deut. viii, 8, etc.). See GARDEN.

**Flower** (פָּרַח, *pe'rach*, a bud, Isa. xviii, 5; Numb. xvii, 8, as just *bursting* open into a blossom, Isa. v, 24; Nah. i, 4) is used to describe the floral ornaments of the golden candelabrum (Exod. xxv, 31 sq.; xxxvii, 17; 1 Kings vii, 26), and also the artificial lily-ornaments around the edge of the great laver (1 Kings vii, 26; 2 Chron. iv, 5) in the tabernacle and Temple. See CANDLESTICK, GOLDEN; BRAZEN SEA.

**Flowers** (פָּרַח, *niddah'*, uncleanness, as often elsewhere rendered) stands in Lev. xv, 21, 33, for the menstrual discharge of females.

**Flowers.** (1.) It was an ancient practice to strew flowers on graves. Jerome bestows the following commendation on Pammachius: "While other husbands throw thorns, lilies, violets, roses, and purple flowers upon the graves of their wives, our Pammachius waters the bones and holy ashes of his wife with the balsam of alms. With these perfumes and odors he solaces the ashes of the dead that lie at rest" (*Epist.* 26). (2.) The practice of decorating churches with flowers is very common in the Roman, and some of

the Protestant churches of the Continent, and exists in various parts of England. It probably arose out of a desire to "honor the first-fruits" of nature's most beautiful productions, and may therefore be retained among things in themselves indifferent. The modern Ritualists, however, carry this, as other things, to excess.—Bingham, *Orig. Eccles.* bk. xxiii, chap. iii, § 20; Walcot, *Sacred Archaeology*, p. 280; Barrett, *Flowers and Festivals, or Directions for the Floral Decoration of Churches* (London, 1868).

**Floy, JAMES, D.D.**, a minister of the Methodist Episcopal Church, was born in the city of New York Aug. 20, 1806. He received his academical education at Columbia College, New York, but left college before graduating, and went to London, where he was for some time a student of botany and horticulture at the Royal Botanical Gardens. Returning to New York, he became a clerk in the Methodist Publishing House. In 1831 he joined the Bowery Village (now Seventh Street) Methodist Episcopal Church, and for some time acted as teacher and superintendent of a Sunday-school for colored persons under the care of that church. He was also appointed a class-leader; was licensed to preach in February, 1833; was received into the travelling ministry as a probationer at the New York Conference of 1835, and appointed to Riverhead, Long Island, N. Y. His subsequent appointments were: 1836-37, Hempstead Circuit; 1837-39, Harlem Mission. He was an earnest abolitionist at a time when abolitionism cost a man something; and in 1838 he was censured by his Conference for attending an abolition Convention. He lived to see his principles triumph both in Church and State. At the Conference for 1839 he was ordained elder, and appointed to Kortright Circuit, Delaware County, N. Y., but, on account of the illness of his wife, he was released from the appointment. From 1840 to 1842 he was at Washington-street Church, Brooklyn; 1842-44, Danbury, Conn.; 1844-46, Madison Street, New York; 1847-48, Middletown, Conn.; 1848-50, New Haven, Conn.; 1850-52, Madison Street, New York, second time; 1852-54, Twenty-seventh Street, New York; 1854-56, presiding elder of New York District; 1856-60, editor of National Magazine and Secretary of the Tract Society of the Methodist Episcopal Church; 1861-63, Seventh Street, New York; 1863, Beekman Hill, New York. Three times his Conference elected him a delegate to the General Conference. His appointments during the twenty-four years of his pastoral life strongly indicate the high appreciation that was held of his merits; and it is believed that he never failed to leave any charge better than when he came to it. He also took a lively interest in the general affairs of the Church; was diligent in his attendance on the sessions of his Conference, where his influence was always potent. As assistant secretary and secretary, he kept the Conference journals fourteen years. In 1848 he received the degree of D.D. from the Wesleyan University. As a preacher, he was clear, direct, and earnest; eminently evangelical in doctrine; in exhortation, pungent and effective; elevated in matter, and rigidly correct in style and manner. His death was sudden. On the evening of Oct. 14, 1863, in his study, with only a son with him, he was seized with apoplexy, and expired almost instantly. Dr. Floy was a man of powerful personal character, and of vigorous as well as acute intellect. His critical faculty was largely developed; his personal culture was careful and thorough; his English style was pure and clear to a rare degree. For twenty years he was a contributor to the *Methodist Quarterly Review*, and some of the best articles in that journal are from his pen. He was devoted to Sunday-schools, and wrote several books for the use of the schools, among them *Harry Budd*, a very successful juvenile tale. One of his most important labors was the editing of the *Methodist Hymn-book*, a task assigned to a committee, of which Dr. Floy was the

most active member, by the General Conference of 1849. The Hymn-book now in use owes its comprehensiveness and general excellence largely to Dr. Floyd. He edited the posthumous works of Dr. Olin (q. v.). After his death appeared his *Old Testament Characters delineated and illustrated* (N. York, 12mo).—*Occasional Sermons, Reviews, and Essays* (N. Y. 12mo).—Curry, in *Methodist Quarterly Review*, January, 1864, article vi; Woodruff, in *The Ladies Repository*, July, 1865, art. i; *Minutes of the Annual Conferences*, 1864, p. 88.

**Floyd, JOHN**, an English Jesuit, was born in Cambridgeshire. He became a Jesuit on the Continent in 1593, and returned to England as a missionary. He was afterwards banished, and was employed by his superiors to teach polite literature and divinity at St. Omer and Louvain. The time of his death is not known. He was involved in controversies with Chillingworth, Antonius de Dominis, Crashaw, Sir Edward Hobby, and other Protestants, in which he assumed the names of *Daniel à Jesu*, *Hermannus Lamelius*, and *Annosus Fidelis Verimontanus*. Under these names he wrote *Synopsis Apostasie M. A. de Dominis* (Antwerp, 1617, 8vo):—*Detectio Hypocrisis M. A. de Dominis* (1619, 8vo):—*The Church Conquerant over human Wit*, against Chillingworth (St. Omer, 1631, 4to):—*The Total Sum*, against the same (1639, 4to):—*Answer to William Crashaw* (1612, 4to):—*A Treatise of Purgatory*, in answer to Sir Edward Hobby (1613).—*Alegambe, De Script. Frat. Jesu*; Hook, *Eccl. Biog.* v, 154.

**Fludd, ROBERT** (Latin, *DE FLUCTIBUS*), an English physician and theosophist, was born at Millgate, in Kent, in 1574. He was educated at Oxford, and afterwards travelled on the Continent, where he became a Rosicrucian (q. v.). Returning to England, he became M.D., and practised in London, devoting himself also to the study of the natural sciences, in which he showed rare aptitudes. He was also a zealous student of the occult sciences. He died at London Sept. 8, 1637. He was a man of real genius. Kepler and Gassendi thought it worth while to write against him. Fludd's works were published in Latin at Oppenheim, 1617-33, 6 vols. folio. His *Mosaical Philosophy, grounded upon the essential Truth or eternal Sapience* (Lond. 1659, fol.), is translated from the Latin text. See Rich, *Biog. Dictionary*; Brucker, *Hist. Crit. Philosophiæ*; Wood, *Athenæ Oxonienses*. See THEOSOPHY.

**Flüe, NIKOLAUS VON DER**, also known under the name of *Brother Klaus*, was born at Flüeli, in the canton of Unterwalden, Switzerland, March 21, 1417. He was religiously educated, and was early distinguished for his asceticism, while, at the same time, he neglected none of his social duties. He served in the army with distinction, and afterwards was nineteen years councillor of state and judge. His countrymen would have appointed him to the highest offices, but he declined, and, resigning even his function of judge, he left his family Oct. 16, 1467, barefooted, bareheaded, and coarsely clad, to withdraw from the world entirely, and live in the wilderness. He settled among the Alps, where he is said to have lived for twenty years without touching any food except the consecrated wafer brought to him by the priest. The people erected a chapel for him, and he gained great renown. After 1477 he began preaching in the chapel. In 1481 he suddenly appeared at a diet of the eight cantons, which at that time composed the Swiss Confederation, held at Slanz, and by an effective address averted the threatening disruption of the Confederation. He died March 21, 1487. He was canonized in 1669 by Clement IX.—Herzog, *Real-Encyklop.* iv, 431; Piper, *Evang. Kalender*, 1851; Goldlin von Tiefenau, *Geist und Leben des heil. Bruders Klaus* (2d edit. Lucerne, 1808); Businger, *Bruder Klaus in sein Zeitalter* (Lucerne, 1827); Schneller, *Ueber Nicolaus von der Flüe* (Einsied. 1852). There are also biographies by

Wysing, Weissenbach, Herzog, Widmer, Geiger, and G. Göres.

**Flute** (מַשְׁרוּקָה, *mashrokitha'*, from its hissing or whistling sound; Theodot. σὺφιάξ, a *pipe*), a musical instrument, mentioned among others (Dan. iii, 5, 7, 10, 15) as used at the worship of the golden image which Nebuchadnezzar had set up. (Comp. the αὐλός of 1 Esdr. v, 2, as a Persian instrument.) According to the author of *Shilte-Haggiborim*, this instrument was sometimes made of a great number of pipes—a statement which, if correct, would make its name the Chaldee for the musical instrument called in Hebrew מַשְׁרָף, *ugab'*, and erroneously rendered in the A. V. "organ."—Smith, s. v. See PIPE.

There is notice taken in the Gospels of players on the flute (*αὐλητής*, "minstrel"), who were collected at funerals (Matt. ix, 23, 24). The Rabbins say that it was not allowable to have less than two players on the flute at the funeral of persons of the meanest condition, besides a professional woman hired to lament; and Josephus relates that, a false report of his death being spread at Jerusalem, several persons hired players on the flute by way of preparation for his funeral. In the Old Testament, however, we see nothing like it. The Jews probably borrowed the custom from the Romans. When it was an old woman who died they used trumpets, but flutes when a young woman was to be buried.—Calmet, s. v. See FUNERAL.

Flutes, or rather *flageolets*, were very early in use in ancient Egypt, where they were of various forms and lengths, both single and double, with different numbers of holes, and used by players of both sexes.

Ancient Egyptian Flutes.

So also among the Greeks and Romans these instruments were common (Wilkinson, *Anc. Eg.* i, 126 sq., abridgm.; Kitto, *Pictorial Bible*, note on Dan. iii, 10).

Ancient Roman Double Flutes.

They are likewise frequent in the modern East (Lane's *Egyptians*, ii, 82). See MUSICAL INSTRUMENTS.

Modern Egyptian Nay or Flute.

**Flutes or Flutings**, curved channels cut perpendicularly in the shafts of columns of classical architecture. In the Doric order the column has twenty flutes, separated by a sharp edge. In the Ionic, Corinthian, and Composite there are twenty-four, sepa-

rated by a small fillet. Spiral flutes occur in some classical, and in early Romanesque architecture. Flutes also occur, but rarely, in pillars and pilasters of Gothic buildings. (G. F. C.)

Doric.

Ionic.

**Flux, BLOODY** (*δυσεντερία*, Acts xxviii, 8), the same as our *dysentery*, which in the East is, though sometimes sporadic, generally epidemic (as in the case of the Asiatic cholera), and then assumes its worst form. It is always attended with fever (q. v.), frequently in an intermittent form, the presence of which Luke, with professional accuracy, intimates by the plural (*πυρετοί*) in the above case of Publius. A sharp gnawing and burning sensation seizes the bowels, which give off in purging much slimy matter and purulent discharge. When blood flows it is said to be less dangerous than without it (Schmidt, *Bibl. Medic.* c. xiv, p. 503-507). King Jehoram's disease is thought by Dr. Mead to have been a chronic dysentery, and the "bowels falling out" the *prolapsus ani*, known sometimes to ensue (2 Chron. xxi, 15, 19).—Smith, s. v. See DISEASE.

**Fly** is the rendering in the Auth. Vers. of two Heb. words. (Egli has a curious article on the name of the butterfly among the Hebrews, in the *Zeitschr. für wissenschaftl. Theologie*, Jena, 1864, i.) See ANT; BEE; FLEA; GNAT; HORNET; LICE; LOCUST; SCORPION, etc.

1. *Zebub'* (זְבֻבִי; Sept. *μῦια*, Vulg. *musca*) occurs only in two passages (comp. Wisd. xvi, 9; xix, 10), namely, Eccles. x, 1, "Dead *zebum* cause the ointment of the apothecary to send forth a stinking savor," and in Isa. vii, 18, where it is said, "The Lord shall hiss for the *zebug* that is in the uttermost part of the rivers of Egypt." The Heb. name, it is probable, is a generic one for any insect, but the etymology is a matter of doubt (see Gesenius, *Thes.* p. 401; *Heb. and Chald. Lex.* s. v.; and Fürst, *Heb. Concord.* s. v.). The word *zebug*, fly, enters as an element into the name originally appropriated to an idol worshipped at Ekron, Baalzebug (2 Kings i, 2); but, according to the English version and the Vulgate, in the time of our Lord applied to the prince of *dæmons*, interchangeable with "Satan" (Matt. xii, 24, 26, 27). This "lord of flies" corresponds to the *Ζεὺς ἀπόμυιας* of the Greeks and Romans, as if a defender from flies (see Kitto, *Pict. Bible*, note on 2 Kings i, 2). The Greek in the New Testament reads Beelzebul (*Βεελ-ζεβοὺλ*, which is said to mean "lord of dung" instead of "lord of flies," and has been considered as one of those contemptuous puns which the Jews were in the habit of making by slight changes of letters. There might be a peculiar sting in this particular case, from the circumstance that flies are chiefly bred in dunghills, and many species do greatly congregate thither; hence the deity in question, being confessedly a "lord of flies," must *ipso facto* be a "dungy lord." One of the names by which "idols" are expressed in the Old Testament is זְבֻבִים, *gillulim'*, which has the closest affinity with זְבֻבִים, *ge'el*, dung. The margin of the English Bible, indeed, gives "dungy gods" as the rendering of this word in Deut. xxix, 17. See BEELZEBUL.

Silver Coin of Aradus, with a figure of a Fly.

chiefly of the family *Muscivora*, getting into vessels of ointment or other substances; even in this country we know what an intolerable annoyance the house-flies are in a hot summer when they abound, crawling everywhere and into everything; but in the East the nuisance is tenfold greater. There the common house-flies (*Musca domestica*) swarm in immense numbers; and though they inflict no physical injury, yet, from their continual settling on the face, they are inexpressibly annoying (Rosenmüller, *Alterth.* IV, ii, 420 sq.; Kussel, *Aleppo*, ii, 123 sq.; Tavernier, i, 74; compare Prosp. Alp. *Descr. Egypt.* iv, 3, p. 207). In Egypt the peasants are so subject to a virulent kind of ophthalmia that almost every second person is said to be affected with it, and multitudes are blind of either one or both eyes. The complaint is greatly augmented by the constant presence of the flies, which congregate around the diseased eyes, attracted by the moisture which exudes; and so useless is it to drive them away, that the miserable people submit to the infliction, and little children are seen with their eyes margined with rows of black flies, of whose presence they appear unconscious, though presenting a most painful sight to Europeans (Lorent. p. 25, 48; compare Forskal, *Descr. Anim.* p. 85; Rosenmüller, in Bochart's *Hierez.* iii, 342). The "ointment of the apothecary," composed of substances perhaps peculiarly attractive to these impudent intruders, would be likely to become choked up with their entangled bodies, which, corrupting, would be the more offensive for their contrast with the expected odor. Thus would little follies render despicable him who had a reputation for wisdom. The man is the ointment, his reputation the perfume, his little folly the dead fly, his disgrace the stinking savor. See UNGUENT.

In the other passage, the *zebug* from the rivers of Egypt has by some writers, as by Oedmann (*Vermisch. Samm.* vi, 79), been identified with the *zimb* of which Bruce (*Trav.* v, 190) gives a description, and which is evidently some species of *Tabanus*. Sir G. Wilkinson has given some account (*Transac. of the Entomological Soc.* ii, p. 183) of an injurious fly under the name of *altheab*, a term almost identical with *zebug*. It would not do to press too much upon this point when it is considered that Egypt abounds with noxious insects; but it must be allowed that there is some reason for this identification; and though, as was stated above, *zebug* is probably a generic name for any flies, in this passage of Isaiah it may be used to denote some very troublesome and injurious fly, *κατ' ἰξοχῆν*. "The *altheab* is a long gray fly which comes out about the rise of the Nile, and is like the *cleg* of the north of England; it abounds in calm hot weather, and is often met with in June and July, both in the desert and on the Nile." This insect is very injurious to camels, and causes their death if the disease which it generates is neglected; it attacks both man and beast. The phrase hissing, or, rather, *histing*, for the fly (Isa. vii, 18) is explained in the article BEE.

2. *Arob'* (אַרֹב; Sept. *κνῆμυια*, Vulg. *omne genus muscarum, musce diversi generis, musca gravissima*; but in *Psa. canomyia*; A. V. "swarms of flies," "divers sorts of flies"), the name of the insect or insects which God sent to punish Pharaoh (Exod. viii, 21-31; see *Psa.* lxxviii, 45; cv, 31). The question as to what particular insect is denoted by *arob*, or whether any one species is to be understood by it, has long been a matter of dispute. The scriptural details are as follows: the *arob* filled the houses of the Egyptians, they covered the ground, they lighted on the people, the land was laid waste on their account. From the expression in ver. 31, "there remained not one," some writers have concluded that the Heb. word points to some definite species; we do not think, however, that much stress ought to be laid upon this argument; if the *arob* be taken to denote "swarms," as the A. V.

renders it, the "not one remaining" may surely have for its antecedent an individual fly understood in the collective "swarms." The Sept. explain *arob* by *κνρόμια*, i. e. "dog-fly;" it is not very clear what insect is meant by the Greek term, which is frequent in Homer, who often uses it as an abusive epithet. Thus he represents Mars as applying the epithet to Minerva for instigating the gods to quarrel (*Il.* xxi, 394). It is also referred to as an insect by Elian, who, in describing the *myops*, *tabanus*, or horse-fly, says it is similar to what is called the *κνρόμια* (*Hist. Anim.* iv, 51). Philo, in his *Life of Moses* (i, 23, p. 401, ed. Mangey), expressly describes it as a biting insidious creature, which comes like a dart, with great noise, and, rushing with great impetuosity on the skin, sticks to it most tenaciously. It seems likely that Jerome, in translating Exodus, derived the word from *מִצְרָה*, "to mingle," and understood by it a mixture of noxious creatures, as did Josephus, Aquila, and all the ancient translators. The diversity of Jerome's renderings in Exodus, however, betokens his uncertainty, and in the Psalms he has adopted that of the Septuagint. More modern writers, reasoning on other senses of the Hebrew word, which are somewhat numerous, have proposed several different insects. Thus one of the meanings of *מִצְרָה* is "to darken," and Mouffet observes that the name *cynomyia* agrees with no kind of flies better than with those black, large, compressed flies which boldly beset cattle, and not only obtain ichor, as other flies, but also suck out blood from beneath, and occasion great pain. He observes that they have no proboscis, but, instead of it, have double sets of teeth, like wasps, which they infix deeply in the skin; and adds that they greatly infest the ears of dogs (*Theat. Insect.* xi). Pliny describes an insect of this kind (*Hist. Nat.* xi, 40); so also Columella (vii, 13). (See Pliny by Grandsagne and Cuvier, Parisii, 1828, ii, 461, note.) But the ancient naturalists generally describe the *cynomyia* as a sort of whame-fly (*Tabanus*), which might include both senses, for this genus is most impudently pertinacious in its assaults, spares neither man nor

son to restrict the *arob* to any one family. "Of insects," says Sonnini (*Trav.* iii, 199), "the most troublesome in Egypt are flies; both man and beast are cruelly tormented with them. No idea can be formed of their obstinate rapacity. It is in vain to drive them away; they return again in the self-same moment, and their perseverance wearies out the most patient spirit." The *arob* may include various species of *Culicidae* (gnats), such as the musquito, if it is necessary to interpret the "devouring" nature of the *arob* (in *Psa.* lxxviii, 45) in a strictly literal sense; though the expression used by the Psalmist is not inapplicable to the flies, which even to this day in Egypt may be regarded as a "plague," and which are the great instrument of spreading the well-known ophthalmia, this being conveyed from one individual to another by these dreadful pests; or the literal meaning of the *arob* "devouring" the Egyptians may be understood in its fullest sense of the *Muscidae* if we suppose that the people may have been punished by the larvae gaining admittance into the bodies, as into the stomach, frontal sinus, and intestines, and so occasioning in a hot climate many instances of death (see, for cases of *Myasis* produced by *Dipterous larvae*, *Transactions of Entomol. Soc.* ii, 266-269). See GNAT.

The identification of the *arob* with the cockroach (*Blatta Orientalis*), which Oedmann (*Vern. Sam.* pt. ii, c. 7) suggests, and which Kirby (*Bridgw. Treat.* ii, 357) adopts, has nothing at all to recommend it, and is purely gratuitous, as Mr. Hope proved in 1837 in a paper on this subject in the *Trans. Ent. Soc.* ii, 179-183. The error of calling the cockroach a beetle, and the confusion which has been made between it and the sacred beetle of Egypt (*Ateuchus sacer*), has recently been repeated by M. Kalisch (*Hist. and Crit. Comment.* Exod. l. c.). The cockroach, as Mr. Hope remarks, is a nocturnal insect, and prowls about for food at night; "but what reason have we to believe that the fly attacked the Egyptians by night and not by day?" The miracle involved in the plague of flies consisted, partly at least, in the creature being brought against the Egyptians in so great an abundance during winter. Possibly, however, the better rendering of the Hebrew would be beetles. (See Wibel's treatise, *Ueber der Arob*, in the "*Frühaufgeseene Früchte*," 1738, p. 244.)—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v. See BETLE.

**Flying buttress**, in Gothic architecture, a buttress extended above the wall of the side aisles, or other outer wall, and connected with the wall of the clerestory, or of a tower, by a portion of an arch, to afford lateral support.

**Fo, Foë** (or *Fu*), the Chinese name for Buddha (the first syllable of *Fo-l'a* or *Fu-l'a*—Buddha). See Hardwick, *Christ and other Masters*, ii, 74, 84, 95; and the articles **BUDDHISM**; **CHINA** (ii, 249); **FU-HE**; **LAMAISM**.

**Foal** (רִפְיָה, *a'yir*, or simply רִפְיָה, the son of an ass, *Zech.* ix, 9, as *νιός* in *Matt.* xxi, 5), an ass's colt (*Gen.* xxxii, 15; *xlix*, 11). See **ASS**; **COLT**.

**Foam** occurs as a translation of *קִפְיָה* (*ke'feseh*, something broken): in *Ios.* x, 7, "As for Samaria, her king is cut off as the foam upon the water," after the *Vulg. spuma*. The Sept. doubtless gives the correct sense, *φρίγγανον*, a dry twig or splinter. Horsley (*Comment.* in loc.) renders "bubble."

"Foam" is the true meaning of *ἀφρός*, *froth* (*Luke* ix, 39; with its derivatives in *Mark* ix, 18, 20; *Jude* 13).

**Fodder** (לֶחֶם, *bellil*, *Job* vi, 5; *xxiv*, 6; *Isa.* xxx, 24). In the second passage in *Job* this word is rendered in our version "corn;" the margin gives "mingled corn or dredge;" in that of *Isaiah* it is rendered "provender." The word properly signifies a mixture, a *medley*. Gesenius (*Heb. Lex.*) says, "The two latter passages are most clearly understood by a reference

*Tabanus Alpivus.*

beast, gorges itself to bursting with blood, infusing an irritating venom at the same time, and occurs, in suitable localities even in our own climate, in immense numbers. If the *arob* was composed of one or more species of *Tabanidae*, miraculously augmented in numbers, and preternaturally induced to penetrate into the houses, such a visitation would be a plague of no slight intensity, even supposing their blood-thirstiness and pertinacity, individually considered, to be of no higher standard than we are accustomed to see. It is not improbable that one of the *Hippoboscidae*, perhaps *H. equina*, Linn., is the *κνρόμια* of Elian (*N. A.* iv, 51), though Homer may have used the compound term to denote extreme impudence, implied by the shamelessness of the dog and the teasing impertinence of the common fly (*Musca*). As the *arob* are said to have filled the houses of the Egyptians, it seems not improbable that common flies (*Muscidae*) are more especially intended, and that the compound *κνρόμια* denotes the grievous nature of the plague, though we see no rea-

to the Roman *farrago* (Pliny, *Hist. Nat.*), consisting of barley or oats, mixed with vetches and beans, which were sown and reaped together."

**Foggini**, PIETRO FRANCESCO, an Italian archæologist, was born in 1713 at Florence, devoted himself to the Church, and was made doctor at Pisa. In 1741 he published *De primis Florentinorum Apostolis*, and an edition of Virgil (Florence, 4to). In 1742 Foggini accepted an invitation from Bottari, second librarian of the Vatican, to come to Rome, where Benedict XIV gave him a place in the pontifical academy of history, and made him sub-librarian at the Vatican. In 1775 he succeeded Bottari as librarian. He died at Rome May 31, 1783. He devoted great part of his life to the study of the MSS. of the Vatican; and published, besides the works already mentioned, Epiphanius, *De XII gemmis*, etc. (Rome, 1743, 4to):—Epiphanius Salomo, *Comment. in Cant.* (Rome, 1750, 4to):—*Appendix Historiæ Byzantiæ* (Rome, 1777).—Hoefer, *Nouv. Biog. Générale*, xviii, 35.

**Fo-hi**. See FUN-HE.

**Fold** (properly גִּדְרָה, *gederah'*, a place walled in, Numb. xxxii, 16, 24, 36; ἀλι, a court-yard, John x, 1, 16; also מִקְלָה, *miklah'*, a place shut up, Hab. iii, 17; Psa. l, 9; lxxviii, 70; whereas דֹּבֵר, *dober'*, Isa. v, 17; Mic. ii, 12; and נֶאֱכָה, *neveh'*, 2 Sam. vii, 8; 1 Chron. xvii, 7; Isa. lxxv, 10; Jer. xxiii, 3; Ezek. xxv, 5; xxxiv, 14, signify pasture, and ποιμνῆ, John x, 16, the flock itself), a small enclosure for flocks to rest together (Isa. xiii, 20). It appears that, before the shearing, the sheep were collected together into an uncovered enclosure (ἀλι), surrounded by a wall (John x, 11, 16). The object of this is that the wool may be rendered finer by the sweating and evaporation which necessarily result from the flock being thus crowded together. These are the sheepfolds mentioned in Numb. xxx, 16; xxv, 36; 2 Sam. vii, 8; Zeph. ii, 6, etc. No other kind than this are used in the East (Jahn, *Archæol.* § 46). See PASTURAGE. Such an enclosure, open above, was often made of hurdles, in which, during the summer months, the flocks are kept by night or at noon. They were usually divided into two parts for the different kinds of flocks, i. e. sheep and goats (Judg. v, 16). See FLOCK. The gentlemen forming the Scotch Mission of Inquiry to the Jews in 1839, when at Eshtaol, observed, "Many large flocks of sheep and goats were coming into the village, and we followed the footsteps of the flocks in order to see where they were lodged all night. We found the dwellings to be merely cottages of mud, with a door, and sometimes also a window, into a court-yard. In this yard the flocks were lying down, while the villagers were spreading their mats to rest within. Small mud walls formed frail partitions to keep separate the larger and smaller cattle, for oxen, horses, and camels were in some of these enclosures." In the East it is common for shepherds to make use of ruined edifices to shelter their flocks from the heat of the middle of the day and from the dangers of the night. Thus it was prophesied of the cities of Ammon, Aroer, and Judæa that they should be couching-places for flocks (Ezek. xxv, 5; Isa. xvii, 2; xxxii, 14). But Babylon was to be visited with a far greater desolation, and to become unfit even for such a purpose (Isa. xiii, 19). The peculiar expression in Psa. lxxviii, 13, "Though ye have lien among the pots," or, according to J. D. Michaelis, "drinking-troughs" or "water-troughs," would be better rendered, "Though ye have lien among the folds." See POT. To lie among the folds, says Gesenius, seems to be spoken proverbially of shepherds and husbandmen living in leisure and quiet. In John x, 16, the Jews and Gentiles are represented under the image of two different flocks enclosed in different folds. See SHEEP.

**Follen**, CHARLES THEODORE CHRISTIAN, LL.D., III.—Q q

a Unitarian minister, was born at Romrod, Hesse-Darmstadt, September 4, 1796. He was educated at the Gymnasium and University of Giessen, which last he entered in 1813. After the battle of Leipsic he entered the army as a volunteer against the domination of Napoleon. In 1815 he returned to the university, and received his degree of doctor of laws in 1817. In 1819 he lectured on the Pandects and the Roman law in Jena; but he had incurred the hatred of the government for his advocacy of freedom, and in 1820 he retired to Switzerland. In 1821 he was appointed lecturer at the University of Basle, but in 1824 the governments of Russia, Prussia, and Austria demanded his surrender as a political prisoner. He was advised to depart, and, after various adventures and escapes, reached New-York January 12, 1825. He was soon after appointed professor of German at Harvard, and in 1828 was made professor of Church History in the theological school at Cambridge. He engaged at an early period with all his heart in the American anti-slavery movement, a course which alienated some of his friends, and hindered his advancement. He finally became pastor of a Unitarian church in East Lexington, Mass. On the night of Jan. 13, 1840, he perished in the burning of the steamer Lexington in Long Island Sound. He was a thorough scholar, and a man of the purest principles, and of courageous devotion to them. His writings were published after his death by his widow, under the title, *The Works of Charles Follen, with a Memoir of his Life* (Bost. 1841, 5 vols. 12mo).—*Christian Examiner*, 1842, p. 33; Sprague, *Unitar. Pulpit*, p. 588.

**Folly**. See FOOT.

**Font** (baptismal), the vessel containing the water for baptism. It was for some time the custom to baptize in or near flowing streams of water. Then baptisteries were erected outside of churches. Properly speaking, the baptistery was the building in which baptism was performed; and the vessel in which it was performed was called in Greek κολυμβηθρα, in Latin *psicina*. At a later period the vessel for baptism was placed in the church, and called *fons*, font or fountain. Fonts finally came to be generally made as

Font, Swaton, Lincolnshire, 1310 (Chambers).

vases of stone, elevated three or four feet from the floor, supported by a stone standard, and usually placed before the altar. They were frequently lined with silver, lead, or brass, and were usually adorned with ornamental work in the same style as the church edifice, or with bas-reliefs of scriptural scenes. In form, the early fonts were sometimes round, and sometimes built in the shape of a cross or of a tombstone (Rom. vii). At first fonts were covered simply with a lid. These were later enlarged into high and highly-ornamented pinnacles or spires.—Bingham, *Orig. Eccles. bk.*

viii, chap. vii; Parker, *Glossary of Architecture*, s. v.; Martigny, *Dictionnaire des antiquités Chrétiennes*.

Font, St. Mildred's, Canterbury (Parker).

**Fonseca, PEDRO DA**, a Jesuit and metaphysician, was born at Cortizada, Portugal, 1528. He entered the order in 1548, and in a few years was made professor of philosophy at Coimbra, and afterwards professor of theology at Evora. He obtained the name of the "Portuguese Aristotle." He stood high in the favor of king Philip II and of pope Gregory XIII. He died Nov. 4, 1599. He was the first who publicly taught the doctrine relative to the divine prescience known as *scientia media*, and which was discussed long and furiously between the adherents of Molina (who was a pupil of Fonseca) and the Dominicans. See PRESCIENCE. Among his works are *Commentarii in Aristotelem* (4 vols., often reprinted):—*Institutiones Dialecticæ* (Lisbon, 1564):—*De concord. providentiæ et gratiæ Dei cum libero arbit. hom.* (Lisb. 1588).—Hoefler, *Nouv. Biog. Générale*, xviii, 81.

**Fonte Avellana**, ORDER OF, a monastic order of the Roman Catholic Church. The name is derived from the desert of Fonte Avellana, near Faenza, where the first monastery of the order was established in 1001 by Ludolf, subsequently bishop of Eugubio. The best known member of this order is the abbot Peter Damiani (q. v.), under whom it made considerable progress. Little is known of its subsequent history, except that it greatly degenerated. In 1570, cardinal Jules de la Rovère, who had been appointed by pope Pius V abbot *in commendam* of the abbey of Fonte Avellana, caused the monks to unite with the Camaldulenses.—Helyot; Migne, *Dict. des Ordres Religieux*, s. v. Font-Avellane. (A. J. S.)

**Fontein, PIETER**, was born in 1708. He enjoyed the instructions of the celebrated Tiberius Hemsterhuis and Albert Schultens. His taste for the literature of antiquity was developed under their able tuition. His first charge was a Baptist congregation in Rotterdam, to which he was called in 1732. Here he labored seven years. From this field of labor he was

transferred to a similar one in Amsterdam, where he remained till his death, which occurred in 1788 or 1789. The literary taste acquired in early life he continued to cultivate. He became an uncommon proficient in Greek and Roman literature. He edited the *Characteres Ethicæ* of Theophrastus according to a Florentine MS. He was on terms of friendly intercourse with the most eminent scholars of the age. His library, containing the best editions of the Greek and Roman classics, and enriched with the stores of patristic, theological, and philosophical literature, was bequeathed to the Baptist church in Amsterdam. By this bequest, which served for the foundation of the valuable library of the Baptists in that city, he conferred a great and lasting benefit on the cause of theological education. See Glasius, *Godgeleerd Nederland*, i Deel, blz. 470; also Blaupot ten Cate, *Geschiedenis der Doopsgezinden in Holland enz.* ii Deel, blz. 156 verv.; S. Muller, *Geschiedenis van het onderwijs in de theologie by de Nederl. Doopsgezinden*, blz. 70. (J. P. W.)

**Fontenay, PIERRE CLAUDE**, a Jesuit, was born at Paris in 1683. He became rector of the college at Orleans, but was recalled to Paris to continue Longueval's *Histoire de l'Eglise Gallicane*, of which he wrote vols. ix, x. He died at La Flèche, Oct. 15, 1742.—Migne, *Dict. de Biog. Chrétienne*, s. v.

**Fontévrault**, ORDER OF (*Ordo Frontis Ebraldii*), a monastic order of the Roman Catholic Church, founded at the close of the 11th century by Robert of Arbrissel [see ARBRISSEL], who in the forest of Craon united a number of hermits under the rule of St. Augustine. The number of members rapidly increased, and Arbrissel had to establish several convents for men and women. The latter were divided into three different establishments, namely, 1 (*Le Grand Montier*), for virgins and widows; 2 (*St. Lazarus*), for lepers and other sick people; 3 (*St. Magdalen*), for fallen women who wished to reform. The whole order

Monk of Fontévrault.

Monk of Fontévrault.

was devoted to the glorification of the Virgin Mary, and the men of the order were placed under the supreme jurisdiction of the abbot of Fontévrault, who became the general of the whole order. Here, a relative of the duke of Bretagne, was the first abbot; Petronella, baroness of Chemillé, her assistant. The order was confirmed by pope Paschal II (in 1106, and again in 1113). After the death of the founder, the number of convents gradually rose to about sixty, all of which, with the exception of a few in Spain and England, were in France. The history of the order presents no facts of importance; it soon degenerated to an even higher degree than the majority of the mediæval orders. Attempts to reform it were made by the abbesses Maria of Bretagne (1477), Renate of Bourbon

(1507), and Antoinette of Orleans (1571 to 1608), but they had no lasting results. The whole order perished during the French Revolution; the last abbess, Julie Sophie Charlotte de Pardaillan, died in Paris in 1799. No attempt has since been made to revive it.—Wetzer und Welte, *Kirchen-Lex.* iv, 109; Helyot (ed. Migne), *Ordres Religieux*, s. v.; Honoré Niquet, *Hist. de l'Ordre de Font.* (Angres, 1586). (A. J. S.)

**Food** (represented by several Heb. and Gr. words [especially some derivative of the verb  $\text{אָכַל}$ , *akal*, to eat], which are variously rendered in the A. V.). Compare VICTUALS.

**I. Materials.**—The original grant of the Creator made over to man the use of the vegetable world for food (Gen. i, 29), with the exception of the tree of the knowledge of good and evil (Gen. ii, 17), and, as some hold, also, the tree of life (iii, 22). So long as man continued in Paradise, he doubtless restricted his choice of food within the limits thus defined; but whether, as is commonly stated, we are to regard this as characteristic of the entire period between the creation of Adam and the grant of animal food to Noah after the flood (Gen. ix, iii), admits of doubt. It is doing no violence to the passage last cited to view it rather in the light of an ordinance intended to regulate a practice already in use, than as containing the first permission of that practice; and when we consider that man is, by his original constitution, omnivorous, that there are special adaptations in his frame, as made by God, for the use of animal food, that from the beginning he was acquainted with the use of fire, that from the beginning there was a distinction known to him between clean and unclean animals (Gen. vii, 2, 8), corresponding apparently to a distinction between animals good for food and animals not so, and that the pastoral was as early as the agricultural occupation among men, it seems more probable than otherwise that the use of animal food was not unknown to the antediluvians. Perhaps some fierce or cruel custom connected with the use of raw flesh, such as Bruce found in his day among the Abyssinians, and such as Moses glances at (Exod. xii, 9), may have prevailed among the more barbarous and ferocious of the antediluvians; and it may have been in order to check this that the communication recorded in Gen. ix, 2-5, was made to Noah. It is not, however, to be overlooked that, in the traditions of antiquity, the early age of the world was represented as one in which men did not use animal food (Diod. Sic. i, 43; ii, 38; Ovid, *Metam.* i, 101 sq.; xv, 96 sq.; *Fast.* iv., 395 sq.).

In the Patriarchal age the food of the ancestors of the Hebrews comprised the flesh of animals both tame and wild, as well as the cereals. We read of their using not only cakes of fine meal, but also milk and butter, and the flesh of the calf, the kid, and game taken by hunting (Gen. xviii, 6-8; xxvii, 3, 4). They used also leguminous food, and a preparation of lentiles seems to have been a customary and favorite dish with them (Gen. xxv, 34). They made use also of honey (either honey of bees or sirup of grapes), spices, nuts, and almonds (Gen. xliii, 11).

During their residence in Egypt the Israelites shared in the abundance of that land; there they "sat by the flesh-pots, and did eat bread to the full" (Exod. xvi, 3); and amid the privations of the wilderness they remembered with regret and murmuring "the fish which they did eat in Egypt freely (the abundance of fish in Egypt is attested by Diod. Sic. i, 34, 36; and Ælian, *De Nat. Anim.* x, 43), the cucumbers and the melons, and the leeks, and the onions, and the garlic" (Numb. xi, 5). These vegetable products have always formed an important part of the food of the people of Egypt; and the abundant use also of animal food by them is sufficiently attested by the monuments (Wilkinson, *Anc. Egypt.* ii, 367-374).

In their passage through the wilderness, the want

of the ordinary materials of food was miraculously supplied to the Israelites by the manna. As it was of importance that their flocks and herds should not be wholly consumed or even greatly reduced before their entering on the promised land, they seem to have been placed under restrictions in the use of animal food, though this was not forbidden (Lev. xvii, 3 sq.); and when their longing for this food broke out into rebellious murmurs, a supply was sent to them by means of large flocks of a species of partridge very much in use in the East (Exod. xvi, 11-13; Numb. xi, 31; comp. Diod. Sic. i, 60).

When they reached the promised land, "the land flowing with milk and honey," abundance of all kinds of food awaited the favored people. The rich pastures of Palestine enabled them to rear and maintain large flocks and herds; game of various kinds was abundant in the more mountainous and uninhabited districts; fish was largely supplied by the rivers and inland seas, and seems to have been used to a considerable extent (2 Chron. xxxiii, 14; Neh. iii, 3; Matt. vii, 10; xiv, 17; xv, 34; Luke xxiv, 42; John xxi, 6-14), so that the destruction of it was represented as a special judgment from God (Isa. i, 2; Hos. iv, 3; Zeph. i, 3). See FISH. In the Mosaic code express regulations are laid down as to the kinds of animals that may be used in food (Lev. xi; Deut. xiv). Those expressly permitted are, of *beasts*, the ox, the sheep, the goat, the hart, the roebuck, the fallow-deer, the wild goat, the pygarg, the wild ox, the chamois, and, in general, every beast that parteth the hoof and cleaveth the cleft into two claws [that is, where the hoof is completely parted, and each part is separately cased in bone], and cleweth the cud; of *fish*, all that have scales and fins; of *fowls*, all clean birds, that is, all except the carnivorous and piscivorous birds; of *insects*, the locust, the bald locust, the beetle, and the grasshopper. Whether the Hebrews attended to the rearing of gallinaceous fowls remains a matter of doubt. See COCK.

Besides animals declared to be unclean, the Israelites were forbidden to use as food anything which had been consecrated to idols (Exod. xxxiv, 15); animals which had died of disease or been torn by wild beasts (Exod. xxii, 31; Lev. xxii, 8; comp. Ezek. iv, 14), and certain parts of animals, viz. the blood (Lev. xxvii, 10; xix, 26; Deut. xii, 16-23), the fat covering the intestines, the kidneys, and the fat covering them, the fat of any part of the ox, or sheep, or goat, especially the fat tail of certain sheep (Exod. xxix, 13-22; Lev. iii, 4-9, 10; ix, 19). They were also forbidden to use any food or liquids occupying a vessel into which the dead body of any unclean beast had fallen, as well as all food and liquids which had stood uncovered in the apartment of a dead or dying person (Numb. xix, 15). The eating of a kid boiled in the milk or fat of its mother was also prohibited (Exod. xxiii, 19; xxxiv, 26; Deut. xiv, 21). These restrictions rested chiefly, doubtless, on religious and theocratic grounds [see FAT], but for some of them reasons of a sanitary kind may also have existed. It belonged to the essence of the theocratic system that the people should be constantly surrounded by what reminded them of their separation to Jehovah, and the need of keeping themselves free from all that would level or lower the distinction between them and the nations around them. For this reason specific restrictions were laid upon their diet, which were not attended to by other nations, nor were always insisted on in the case of strangers dwelling within their bounds (Deut. xiv, 21). This does not, however, preclude our admitting that reasons of a social or political kind may also have conspired to render these restrictions desirable. In warm climates the importance of avoiding contagion rendered the utmost caution necessary in handling whatever may have been exposed to the influence of a corpse; and it is well known that the use of adipose matter in

food requires, in such climates, to be restricted within narrow limits. The peculiar prohibition of a kid boiled in its mother's milk was ordained probably for the purpose of avoiding conformity to some idolatrous usage, or for the purpose generally of encouraging humane feelings on the part of the Israelites towards their domesticated animals (Spencer, *De Legg. Hebr.* *Rituall.* bk. ii, ch. viii; Michaelis, *Mos. Recht.* iv, 200). See CLEAN.

Subject to these restrictions, the Israelites were free to use for food all the produce of their fertile and favored land. "Thou shalt bestow thy money," said God to them, "for whatsoever thy soul lusteth after, for oxen, or for sheep, or for wine, or for strong drink, and thou shalt eat thereof before the Lord thy God, and thou shalt rejoice, thou and thy household" (Deut. xiv, 26). In the enumeration of blessings conferred by God on Israel, we find "honey out of the rock, and oil out of the flinty rock, butter of kine, and milk of sheep, with fat of lambs, and rams of the breed of Bashan, and goats, with the fat of kidneys of wheat," specified as among his free gifts to his people (Deut. xxxii, 13, 14). Though allowed this wide range, however, of animal food, the Hebrews do not seem in ordinary life to have availed themselves of it. The usual food of the people appears to have consisted of milk and its preparations, honey, bread, and vegetables of various sorts; and only at the royal table was animal food in daily use (1 Kings iv, 23; Neh. v, 18). The animals commonly used for food were *cabees* (Gen. xviii, 7; 1 Sam. xxviii, 24; Amos vi, 4): these were fattened for the purpose, and hence were called *fattlings*, or *fatted calves* (*μασχάς σιτηρός*, Luke xv, 23; *σιτιστάς*, Matt. xxii, 4); *lumbs*, 2 Sam. xii, 4; Amos vi, 4); *sheep* (1 Sam. xiv, 34; xxv, 18; 1 Kings iv, 23); *oxen* stall-fed, or from the pastures (1 Kings i, 9; iv, 23; 2 Chron. xviii, 2; Matt. xxii, 4); *fatted cattle* (*שׂוֹמֵרֵי*, a particular kind of the bovine genus peculiar to Bashan, supposed by some to be a species of buffalo or ure-ox, but not to be confounded with the fattening or fatted calf above mentioned, 2 Sam. vi, 13; 1 Kings i, 9; Amos v, 22; Ezek. xxxix, 18); *kids* (1 Sam. xvi, 20); and various kinds of game, such as the *ayil*, the *tsébi*, and the *gachmur* (1 Kings v, 3 [iv, 23, A. V.]). The articles brought by Abigail to David were bread, sheep, parched [roasted] corn, raisins, and figs (1 Sam. xxv, 18); when Ziba met David on his flight from Absalom he brought to him bread, raisins, and summer fruits (2 Sam. xvi, 1); and the present of Barzillai to the king consisted of wheat, barley, flour, roasted corn, beans, lentils, honey, butter, sheep, and cheese (2 Sam. xvii, 28). We may presume from this that these formed the principal articles of food among the Jews at this time. Besides raisins or grapes dried in the sun, they used grapes pressed into cakes (*שֵׁמֶרֶט*); they had also fig-cakes (*שֵׁמֶרֶט*). On special occasions they probably indulged in more costly viands; in times of famine they resorted even to very vile food; in seasons of affliction they abstained from all delicacies, and even sometimes from all food; and to prisoners the food allowed seems to have been only bread and water (1 Kings xxii, 27; Jer. xxxvii, 21).

Besides the vegetables above mentioned, the Jews were acquainted with the melon, the cucumber, the mallow, the leek, the onion, garlic, and bitter herbs. In Job vi, 6, mention is made of *שֵׁמֶרֶט*, which Gesenius would translate *purslain-stone*, or *purslain-broth*—something extremely insipid (*Thesaur.* p. 480). The reasons he gives for this are not without force, but cannot be held conclusive. The A. V. "white of an egg," follows the Rabbinical interpretation, which Rosenmüller, Ewald, etc., also approve; Lee (ad verb.) and Fürst prefer understanding it of the whey of curdled milk; Rénan translates it *le jus de la mauve*.

The *drinks* of the Hebrews were, besides water, which was their ordinary beverage, milk, wine, and

*שֵׁמֶרֶט*, which in the A. V. is rendered *strong drink*. To give the water a stronger relish, they probably sometimes dissolved a portion of fig-cake in it, according to the fashion of the Arabs at the present day (Niebuhr, *Arab.* p. 57). The wines used were of various sorts, and sometimes their effect was strengthened by mingling different kinds together, or by the mixture with them of drugs (Psa. lxxv, 9; Prov. ix, 23, 30; Isa. v, 22). A species of delicacy seems to have been furnished by "spiced wines," that is, wines flavored by aromatic herbs, or perhaps simply by the juice of the pomegranate (Cant. viii, 2). No mention is made in Scripture of the mixing of water with wine for the purpose of drinking it; the reference in Isa. i, 22 being to the adulteration of wine by fraudulent dealers; but the habit was so common in ancient times (comp. *Odys.* i, 110; ix, 208 sq.; Hippocrates, *De Morb.* iii, 30; Lucian, *Asin.* vii; Plin. *II. Nat.* xxiii, 22) that we can hardly doubt that it was known also among the Hebrews. See WINE. Vinegar, *שֵׁמֶרֶט*, was also used by them as a means of quenching thirst (Ruth ii, 14; Num. vi, 3); mixed with oil, this is still a favorite in the East, and mixed with water, it was drunk by the Roman soldiers and poor under the name of *posca* (Pliny, *II. Nat.* xix, 29; xxii, 58; Plantus, *Mil. Glor.* iii, 2, 23). See DRINK.

The Hebrews made use of condiments to heighten the flavor of their dishes, as well as of spices to increase the effect of their wines. Besides the general condiment salt, they used cumin, dill, mint, coriander, rue, mustard, and the seeds of an herb to which they gave the name of *שֵׁמֶרֶט*, "fitches." Sometimes their made dishes were so richly flavored that the nature of the meat used could not be discovered (Gen. xxvii, 9, 25). Besides myrrh, with which they flavored their wines, the Hebrews used various odoriferous products; but whether they used any of these with food is uncertain. See AROMATICS.

II. *Methods of Preparation.*—The early acquaintance of the race with the use of fire renders it probable that from the beginning men used some process of cooking in the preparation of their food, except in the case of such products as are more agreeable to the palate in a crude than in a concocted state. The cereals were sometimes eaten raw (Lev. xxiii, 11; Deut. xxiii, 25; 2 Kings iv, 42; Matt. xii, 1); but from an early period it was customary to roast the grains, and so prepare them for food (Lev. ii, 14; comp. Robinson, *Bib. Res.* ii, 394). This received the name of *שֵׁמֶרֶט* (more fully *שֵׁמֶרֶט* *שֵׁמֶרֶט* *שֵׁמֶרֶט*) and *שֵׁמֶרֶט*, A. V. "parched corn;" and was eaten either dry or formed into a sort of porridge, perhaps something after the manner of the *pilaw* in the East at the present day. This was not peculiar to the Hebrews; even as late as the time of Virgil roasting was a recognised method of preparing corn for use (*Georg.* i, 267), though this may have been only preparatory to bruising it (comp. Servius on *Æn.* i, 179; Pliny, *II. N.* xviii, 18, 23). For the preparation and kinds of bread in use among the Hebrews, see BREAD and MILL.

Vegetables were cooked by boiling, and seem to have been made into a pottage (*שֵׁמֶרֶט*, the Niph. part. of *בָּרַב*, to boil, Gen. xxv, 50, 34; 2 Kings iv, 38, 39), probably strengthened by the addition of some oily substance, such as butter or fat, or by having bones and gristles boiled down with them, as is still customary in the East (Shaw, *Travels*, p. 125, cited by Jahn, *Archæol.* I, ii, 190).

When animal food was to be used, the animal was killed in such a way as to allow all the blood to leave the carcase, in order scrupulously to observe the prohibition, Exod. xxii, 31. Among the modern Jews, this is accomplished by cutting the throat of the animal quite through, and then suspending the carcase so as to allow all the blood to run out; the entrails with

the fat are removed, the nerves and veins extracted, and strict search is made lest any drop of blood should be allowed to remain in any part (Buxtorf, *Syn. Jud.* ch. xxvii). The flesh, thus prepared for cooking, was commonly boiled in water (עֲבָדָה, Piel of עָבַד), probably also sometimes in milk, as is still the case among the Arabs. Before being put into the pot, the flesh, freed from the skin, appears to have been cut into small pieces, or perhaps this was done during the process of cooking (Mic. iii, 3; comp. Hitzig, ad loc.). The broth and the flesh were served up separately (Judg. vi, 15), and both were eaten with bread. Salt was used to season the food; spices were also occasionally introduced, and highly flavored dishes were sometimes prepared (Ezek. xxiv, 10; Gen. xxvii, 4; Prov. xxiii, 3). For boiling, the pot or caldron was used; and the fuel was commonly wood, especially thorns (Eccles. vii, 6; Psa. lviii, 9; Isa. xliv, 16; Ezek. xxiv, 10), sometimes the dried excrement of animals (Ezek. iv, 15), a species of fuel still much used in the East (Irby and Mangles's *Travels*, p. 172; Rae Wilson's *Travels*, ii, 156; Hue's *Travels*, passim). Food was also prepared by *roasting* (רָאָה). This was regarded as the more luxurious mode of preparation, and was resorted to chiefly on festive occasions. The paschal lamb was to be roasted whole (Exod. xii, 4, 6), but it does not appear that this was the usual method of roasting flesh; it is more probable that the ancient Hebrews, like the modern Arabs, roasted their meat in small portions by means of short spits of wood or metal placed near the fire, and turned as the process of cooking required (comp. *Odys.* iii, 461-2, etc.; *Il.* i, 465, etc.). Birds were roasted whole on such a spit. The Persians roast lambs and calves entire by placing them in an oven (Tavernier, i, 269; Chardin, iii, 88), and this may also have prevailed among the Hebrews. Among the poor, locusts were eaten roasted, as is still common among the Arabs, whose method of cooking them is as follows: the feet and wings having been plucked off, and the entrails taken out, the body is salted, and then roasted by means of a wooden spit, on which a row of bodies similarly prepared are strung. Fish were usually broiled (Luke xxiv, 42; John xxi, 9), but it would seem that they were sometimes cured, or at least brought into a state in which they could be used without farther cooking (Matt. xiv, 17, 19; xv, 34, 36). In either case they were eaten with bread.

In primitive times the mistress of the house presided over the cooking of the food, as the master of the house charged himself with the slaughtering of the animals required (Gen. xviii, 6, 8; Judg. vi, 19; comp. *Il.* xxiv, 622, and *Odys.* ii, 300). Among the Egyptians, servants who were professional cooks took charge of preparing the food (Wilkinson, *Anc. Egypt.* ii, 382 sq.); and in later times among the Hebrews similar functionaries were employed, both male and female (עֲבָדָה, 1 Sam. ix, 23, 24; עֲבָדָה, 1 Sam. viii, 13). The culinary utensils were עֲבָדָה, a deep pan (Numb. xi, 8; Judg. vi, 19; 1 Sam. ii, 14); עֲבָדָה, a basin or pan (Exod. xxx, 18; 1 Sam. ii, 14; עֲבָדָה, עֲבָדָה, סָפֶה, עֲבָדָה, an iron pan; עֲבָדָה, a frying-pan (Lev. ii, 5-7; vii, 9); עֲבָדָה, pans (1 Chron. ix, 31); עֲבָדָה, a fork or flesh-hook with which flesh was drawn from the pot (1 Sam. ii, 13, 14), and perhaps the flesh separated from the bones in the pot (Mich. iii, 3); עֲבָדָה, a word of doubtful significance, rendered by the Septuagint ὀπίσθε (Lev. xi, 34), by the Syr. *place of pots*, by Gesenius *range for pots*, by Fürst *hearth* for cooking, consisting of two rows of stones meeting at an angle, by Rosemüller a place in the hearth under which was fire, and on the surface of which were orifices, over which pots were placed, and by Knobel an earthenware stew-pan (Ravius, *De re cibaria vet. Heb.* Traj. ad Rhen. 1768; Pareau, *Antiq.*

*Hebr.* p. 388 sq.; Jahn, *Archäologie*, I, ii, 167 sq.; Wilkinson, *Anc. Egyptians*, ii, chap. 5-7).—Kitto, s. v. See *COOK*.

**Food, Spiritual**, "an expression found in two places in the 'Order for the Holy Communion' in the English Church service, to signify the sustenance which the soul receives from the sacrifice of the flesh and blood, that is, the offering up of the life of the Son of man ('for the blood,' says Moses, 'is the life') to atone for the sins of the world, and to redeem us from everlasting death. Some have maintained from those words of our Lord, 'This is my body,' that the literal, material flesh and blood of Christ are, in some sense, received in the communion; while others see clearly that the Church of England, at least, has taken special pains to guard against and exclude such a notion, both in the above passages, and by the language of the 88th Article of Religion. The opponents of the 'material' view contend also that literal flesh and blood 'cannot be *spiritually* received,' or 'refresh the soul.'"—Eelen, *Churchman's Dict.* s. v. See *TRANSUBSTANTIATION*.

**Fool** (represented by several Hebrew and Greek words, especially עֲבָדָה, *nabal*, ἄφρων). The "fool" of Scripture is not an idiot, but an absurd person; not one who does not reason at all, but one who reasons wrong; also any one whose conduct is not regulated by the dictates of reason and religion (Psa. xiv, 1). Foolishness, therefore, is not a negative condition, but a condition of wrong action in the intellectual or sentient being, or in both (2 Sam. xiii, 12, 13; Psa. xxxviii, 5). In the book of Proverbs, however, "foolishness" appears to be sometimes used for lack of understanding, although more generally for perverseness of will. The phrase "Thou fool" (Matt. v, 22) implies not only angry temper, by which such severe language is prompted, but a scornful, contemptuous feeling, utterly inconsistent with the love and meekness which characterize disciples of Christ, and of course exposing the individual who is under its influence to eternal punishment. See *WISDOM*.

**Fools, Feast of.** See *FEAST OF FOOLS*.

**Foot** (properly עֲבָדָה, *re'gel*, πῶς). Of the various senses in which the word "foot" is used in Scripture, the following are the most remarkable. Such phrases as the "slipping" of the foot, the "stumbling" of the foot, "from head to foot" (to express the entire body), and "footsteps" (to express tendencies, as when we say of one that he walks in another's footsteps), require no explanation, being common to most languages.

The extreme modesty of the Hebrew language, which has perhaps seldom been sufficiently appreciated, dictated the use of the word "feet" to express the parts and the acts which it is not allowed to name. Hence such phrases as the "hair of the feet," the "water of the feet," "between the feet," "to open the feet," "to cover the feet," all of which are sufficiently intelligible, except perhaps the last, which certainly does not mean "going to sleep," as some interpreters suggest, but "to dismiss the refuse of nature."

"To be under any one's feet" denotes the subordination of a subject to his sovereign, or of a servant to his master (Psa. viii, 6; comp. Heb. ii, 8; 1 Cor. xv, 26); and was doubtless derived from the symbolical action of conquerors, who set their feet upon the neck or body of the chiefs whom they had vanquished, in token of their triumph. This custom is expressly mentioned in Scripture (Josh. x, 23), and is figured on the monuments of Egypt, Persia, and Rome. See *TRUMPH*.

In like manner, "to be at any one's feet" is used for being at the service of any one, following him, or willingly receiving his instructions (Judg. iv, 10). The last passage, in which Paul is described as being brought up "at the feet of Gamaliel," will appear still clearer if we understand that, as the Jewish writers

allege, pupils actually did sit on the floor before, and therefore at the feet of, the doctors of the law, who themselves were raised on an elevated seat. See DISCIPLE.

"Lameness of feet" generally denotes affliction or calamity, as in Psa. xxxv, 15; xxxviii, 18; Jer. xx, 10; Mich. iv, 6, 7; Zech. iii, 9. See LAME.

"To set one's foot" in a place signifies to take possession of it, as in Deut. i, 26; xi, 34, and elsewhere.

"To water with the feet" (Deut. xi, 10) implies that the soil was watered with as much ease as a garden, in which the small channels for irrigation may be tamed, etc., with the foot. See GARDEN.

An elegant phrase, borrowed from the feet, occurs in Gal. ii, 14, where Paul says, "When I saw that they walked not uprightly," *οὐκ ὀρθοποδοῦντες*, literally, "not with a straight foot," or "did not foot it straightly."

Nakedness of feet expressed mourning (Ezek. xxiv, 17). This must mean appearing abroad with naked feet, for there is reason to think that the Jews never used their sandals or shoes within doors. The modern Orientals consider it disrespectful to enter a room without taking off the outer covering of their feet. It is with them equivalent to uncovering the head among Europeans. The practice of feet-washing implies a similar usage among the Hebrews. See ABLUTION; WASHING. Uncovering the feet was also a mark of adoration. Moses put off his sandals to approach the burning bush where the presence of God was manifested (Exod. iii, 5). Among the modern Orientals it would be regarded as the height of profanation to enter a place of worship with covered feet. The Egyptian priests officiated barefoot; and most commentators are of opinion that the Aaronite priests served with bare feet in the tabernacle, as, according to all the Jewish writers, they afterwards did in the Temple, and as the frequent washings of their feet enjoined by the law seem to imply. See SANDALS.

The passage, "How beautiful upon the mountains are the feet of him that bringeth glad tidings, that publisheth peace" (Isa. lii, 7), appears to signify that, although the feet of messengers and travellers are usually rendered disagreeable by the soil and dust of the way, yet the feet of these blessed messengers seemed, notwithstanding, even beautiful, on account of the glad tidings which they bore (see Wemyss, *Symbol. Dict.* s. v.).—Kitto, s. v.

**Foot**, JOSEPH IVES, D.D., a Presbyterian minister, and president of Washington College, Tenn., was born at Watertown, Conn., Nov. 17, 1796, and graduated at Union College in 1821. Having passed through the usual theological course at Andover, he was licensed in 1824, and ordained as an evangelist, when he went to South Carolina, and labored successfully for some months. Returning to New England, he preached for some time at Boston, and at a later period was called to the Congregational church at West Brookfield, Mass. From this charge he obtained a dismission in 1831 on account of ill health, and in 1833 accepted a call from Salina, N. Y., where he continued for two years, and then accepted a call to Cortlandt. Here he opposed with much ability the system of perfectionism then prevalent, on which he wrote an able article in the *Literary and Theological Review* (1834). In 1837 he removed to Westport, Conn., and while there he joined the Presbyterian Church, with which he remained connected during his life. In 1839 he accepted a call to the Presbyterian church of Knoxville, Tenn. He was connected with the Presbyteries of Bedford and Geneva, and with the Old-school Church, and while at Knoxville was elected to the presidency of Washington College. He was on his way to be inaugurated as president of the college when he was killed by a fall from his horse, April 20, 1840. He published *The prominent Trait in Teachers of false Religion* (1828);—*A historical Discourse* (1828);—*Ser-*

*mons on Intemperance* (1828);—*Three Sermons on Perfectionism* (1834). A *Memoir*, with a selection from his MS. sermons, was published by his brother (1841, 8vo).—Sprague, *Annals*, iv, 669.

**Foot, Kissing of the Pope's.** The kissing of the feet of rulers was an Oriental mode of testifying reverence or subjection. It was also done in the West to some, at least, of the Roman emperors: Dioclesian is said to have had gans fastened to his shoes, that the honor of kissing his feet might be more willingly paid. It was introduced as a sign of reverence for the pope of Rome at some date not precisely known. In defence of this practice, the Roman writers adduce an early usage of the sort in favor of all bishops; but it was kissing of the hand, not of the foot, that seems to have been the usage (Bingham, *Orig. Eccles.* bk. ii, ch. ix). The first example of an emperor kissing the pope's foot is that of Justin with the foot of pope John I, A.D. 525. It is now practised (1) after the election of a new pope, when all the cardinals kiss his foot; (2) on the election of a new cardinal, when he kisses the pope's foot, formally, in sign of homage and submission; (3) at public audiences of the pope, when persons presented kiss his foot. Protestants are not required to perform this homage when presented. A crucifix is fastened to the slipper, that the act of adoration may be interpreted as paid to Christ in the person of his so-called vicar.

**Footman**, a word employed in the A. V. in two senses. See RUNNER. 1. Generally, to distinguish those of the people or of the fighting-men who went on foot from those who were on animals or in chariots. The Hebrew word for this is רַגְלִי, *ragli*, from *regel*, a foot. The Sept. commonly expresses it by *πεζοι*, or occasionally *τάγματα*. It is a military term, designating the infantry of an army (1 Sam. iv, 10; xv, 4; 2 Sam. x, 6; Jer. xii, 5), or those simply who journeyed on foot, whether soldiers or not (Exod. xii, 37; Numb. xi, 21). In the latter case the word perhaps indicates the *male* portion of the company, those who walked while the females *rode*, like the Arabic *rajul*, a *man*. Sometimes it is joined with אָדָם, a *man* (Judg. xx, 2). See ARMY; RIDER.

2. The word occurs in a more special sense (in 1 Sam. xxii, 17) as the translation of a different term, *rats*, part. of רָצַח, to *run*. This passage affords the first mention of the existence of a body of swift runners in attendance on the king, though such a thing had been foretold by Samuel (1 Sam. viii, 11). This body appears to have been afterwards kept up, and to have been distinct from the body-guard—the six hundred and the thirty—who were originated by David (see 1 Kings xiv, 27, 28; 2 Chron. xii, 10, 11; 2 Kings xi, 4, 6, 11, 13, 19). In each of these cases the word is rendered "guard;" but the translators were evidently aware of its signification, for they have put the word "runners" in the margin in two instances (1 Kings xiv, 27; 2 Kings xi, 19). This, indeed, was the force of the term "footman" at the time the A. V. was made, as is plain not only from the references just quoted, but, among others, from the title of a well-known tract of Bunyan's, *The heavenly Footman, or a Description of the Man that gets to Heaven*, on 1 Cor. ix, 24 (the apostle Paul's figure of the race). The same Heb. word is also used elsewhere to denote the royal or praetorian guard (2 Sam. xv, 1; 1 Kings i, 5; 2 Kings x, 25). Whether they were the same as the *Peletites* is doubtful. The word likewise occurs (Job ix, 25) of any swift messenger, hence a weaver's *shuttle* (Job vii, 6), and also of the couriers of the Persian king (Esth. iii, 13, 15; viii, 14). Swift running was evidently a valued accomplishment of a perfect warrior—a *gibbor*, as the Hebrew word is—among the Israelites. There are constant allusions to this in the Bible, though obscured in the A. V. from the transla-

tors not recognising the technical sense of the word *gibbor*. Among others, see Psa. xix, 5; Job xvi, 14; Joel ii, 7, where "strong man," "giant," and "mighty man" are all *gibbor*. David was famed for his powers of arms; they are so mentioned as to seem characteristic of him (1 Sam. xvii, 22, 48, 51; xx, 6), and he makes them a special subject of thanksgiving to God (2 Sam. xxii, 30; Psa. xviii, 29). The cases of Cush and Ahimaa (2 Sam. xviii) will occur to every one. It is not impossible that the former—"the Ethiopian," as his name most likely is—had some peculiar mode of running. See CUSHI. Asahel also was "swift on his feet," and the Gadite heroes who came across to David in his difficulties were "swift as the roes upon the mountains;" but in neither of these last cases is the word rats employed. The word probably derives its modern sense from the custom of domestic servants running by the side of the carriage of their master.—Smith, s. v.; Kitto, s. v. See GUARD.

**Footsteps** (generally פְּעָמַי, *pa'am*, a tread; but spec. אֲכֵב', *akeb'*, Psa. lvi, 6; lxxvii, 19; lxxxix, 51; Cant. i, 8, the *heel*, as elsewhere rendered). On the meaning of this term in Psa. xvii, 5, 11, Mr. Roberts says, among the Hindus, "a man who has the people watching him, to find out a cause for accusation against him to the king, or to great men, says, Yes, they are around my legs and my feet; their eyes are always open; they are ever watching my *suaadu*, 'steps;' that is, they are looking for the impress or footsteps in the earth." For this purpose, the eyes of the enemies of David were "bowing down to the earth."

**Footstool** (spec. כִּסֵּא, *ke'esh*, something trodden upon; Sept. ἰσοπέδιον v. r. ἰσοπέδιον, Vulg. *scabellum*, 2 Chron. ix, 18). Where sitting is referred to in Scripture, it is frequently spoken of as a posture of more than ordinary state, and means sitting on a throne, for which a footstool was necessary, both in order that the person might ascend to it, and for supporting the legs when he was placed in it (2 Chron. ix, 18). The divine glory which resided symbolically in the holy place, between the cherubim above the ark of the covenant, is supposed to use the ark as a footstool (1 Chron. xxviii, 2; Psa. xcix, 5; cxxxii, 7). So the earth is called God's footstool by the same expressive figure which represents heaven as his throne (Psa. cx, 1; Isa. lxvi, 1; Matt. v, 35). We find, on the paintings in the tombs of Egypt, as well as on the Assyrian monuments, frequent representations of their kings sitting on a throne or chair of state, with a footstool. See THRONE. The common manner of sitting in the East is upon a mat or carpet spread upon the ground or floor, with the legs crossed. Many of the Turks, however, through European intercourse, attempt to sit upon chairs. See DIVAN.

**Foot-washing.** The custom of washing the feet held, in ancient times, a place among the duties of hospitality, being regarded as a mark of respect to the guest, and a token of humble and affectionate attention on the part of the entertainer. It had its origin in circumstances for the most part peculiar to the East. In general, in warm Oriental climes, cleanliness is of the highest consequence, particularly as a safeguard against the leprosy. The East knows nothing of the factitious distinctions which prevail among us between sanitary regulations and religious duties; but the one, as much as the other, are considered a part of that great system of obligations under which man lies towards God. What, therefore, the health demands, religion is at hand to sanction. Cleanliness is, in consequence, not next to godliness, but a part of godliness itself. As in this Oriental view may be found the origin and reason of much of what the Mosaic law lays down touching clean and unclean, so the practice of feet-washing in particular, which considerations of purity and personal propriety recommended,

hospitality adopted and religion sanctioned. In temperate climes bathing is far too much neglected; but in the East the heat of the atmosphere and the dryness of the soil would render the ablation of the body peculiarly desirable, and make feet-washing no less grateful than salutary to the weary traveller. The foot, too, was less protected than with us. In the earliest ages it probably had no covering, and the sandal worn in later times was little else than the sole of our shoe bound under the foot. Even this defence, however, was ordinarily laid aside on entering a house, in which the inmates were either barefoot or wore nothing but slippers. See SUEE.

The washing of the feet is among the most ancient, as well as the most obligatory, of the rites of Eastern hospitality. From Gen. xviii, 4; xix, 2, it appears to have existed as early as the days of the patriarch Abraham. In Gen. xxiv, 32, also, "Abraham's servant" is provided with water to wash his feet, and the men's feet that were with him. The same custom is mentioned in Judg. xix, 21. From 1 Sam. xxv, 41, it appears that the rite was sometimes performed by servants and sons, as their appropriate duty, regarded as of an humble character. Hence, in addition to its being a token of affectionate regard, it was a sign of humility. Vessels of no great value appear to have been ordinarily kept and appropriated to the purpose. These vessels would gain nothing in estimation from the lowly, if not mean office for which they were employed. Hence, probably, the explanation of Psa. lx, 8, "Moab is my wash-pot." Slaves, moreover, were commonly employed in washing the feet of guests. The passage, then, in effect, declares the Moabites to be the meanest of God's instruments. See WASH-POT.

The most remarkable instance of this custom is found in the 13th chapter of John's Gospel, where our Saviour is represented as washing the feet of his disciples, with whom he had taken supper. Minute particulars are given in the sacred narrative, which should be carefully studied, as presenting a true Oriental picture. From ver. 12 sq., it is clear that the act was of a symbolical nature, designed to teach, *à fortiori*, brotherly humility and good-will. If the master had performed for his scholars an act at once so lowly yet so needful, how much more were the disciples themselves bound to consider any Christian service whatever as a duty which each was to perform for the other. The principle involved in the particular act is, that love dignifies any service; that all high and proud thoughts are no less unchristian than selfish; and that the sole ground of honor in the Church of Christ is meek, gentle, and self-forgetting benevolence. It was specially customary in the days of our Lord to wash before eating (Matt. xv, 2; Luke xi, 38). This was also the practice with the ancient Greeks, as it may be seen in *Iliad*, x, 577. From Martial (*Epig.* iii, 50, 3, "Deposui soles"), we see it was usual to lay aside the shoes, lest they should soil the linen. The usage is still found among the Orientals (Niebuhr, i, 54; Shaw, p. 202). But Jesus did not pay a scrupulous regard to the practice, and hence drew blame upon himself from the Pharisees (Luke xi, 38). In this our Lord was probably influenced by the superstitious abuses and foolish misinterpretations connected with washing before meat. For the same reason he may purposely have postponed the act of washing his disciples' feet till after supper, lest, while he was teaching a new lesson of humility, he might add a sanction to current and baneful errors. See ABLETON. The union of affectionate attention and lowly service is found indicated by feet-washing in 1 Tim. v, 10, where, among the signs of the widows that were to be honored—supported, that is, at the expense of the Church—this is given, if any one "have washed the saints' feet."—Kitto, s. v. Washing. See WASHING OF HANDS AND FEET.

**FOOT-WASHING IN THE CHRISTIAN CHURCH.** The use of sandals among the Eastern nations in-

instead of shoes, as well as the heat of the climate, gave rise to frequent ablutions, and especially of the feet. It became a duty of hospitality, and a mark of respect towards strangers. Abraham offered water to the three angels (Gen. xviii, 4) to wash their feet; Lot did the same to the two angels who visited him (Gen. xix, 2); Abigail to the messengers of David (1 Sam. xxv, 41). The Pharisee Simon gave Jesus no water for his feet (Luke vii, 44), and Mary Magdalene therefore washed his feet with tears, and wiped them with the hairs of her head. At the last supper Christ washed the feet of his disciples (John xiii, 4). This was at once a symbol and an example: a symbol, as it was meant to teach them (1) that those only whose sins were washed away by him, the Lamb of God, could have part with him hereafter; and (2) that such as had once been thus purified in the blood of the Lamb "needeth not save to wash his feet, but is clean every whit" (John xiii, 10). The act thus performed by Christ at the institution of the Supper suggests to believers at every communion this lesson of humility. It is also an example of humility, patience, forbearance, and charity, and particularly of assistance in helping each other to purification from sin.

In the early post-apostolic times, the command "ye also ought to wash one another's feet" came to be observed not only after the spirit, but also after the letter. Augustine speaks (Ep. 118, *ad Januarium*) of this practice, as also of the doubts entertained in his times as to the proper day when the ceremony ought to be performed. The Synod of Toledo, 694 (ch. iii) stated that it should take place on the anniversary of the day when Christ performed it—the Thursday, 14th of Nisan. In the Greek Church, foot-washing came to be even considered as a sacrament. In the Roman Catholic Church, Bernard de Clairvaux strongly recommends it as *sacramentum remissionis peccatorum quotidianorum*. Yet it did not become a general, public practice in either Church. It was mostly observed at the installation of princes and bishops in the Middle Ages. In the Greek convents, however, and at the Russian court, it is yet observed with great solemnity (Leo Alat. *De dom. et heb. grec.* 21). In the papal court, in those of Vienna, Munich, Madrid, Lisbon, and in the cathedrals and convents of the Roman Catholic Church, the command is also literally carried out to this day, the pope, emperor, kings, etc., washing the feet of twelve persons, generally poor old men, who receive a small gratuity on the occasion. In Rome, the twelve representatives of the apostles are seated in the Clementine Chapel, dressed in tunics of white woollen cloth, and the pope, attired in the same plain manner, sprinkles a few drops on the right foot of each, then wipes and kisses it. At the beginning of the ceremony the antiphony *Mandatum novum do vobis* is sung, from whence the ceremony of the *Pedilavium* is also called *Mandatum*. After this a repast takes place, at which the pope, assisted by his cabinet, serve the twelve (thirteen) apostles, who, at the close, are permitted to take away the white tunics, the towels with which their feet have been wiped, and a small piece of money.

Luther opposed "this hypocritical foot-washing," in which the superior washes the feet of his inferior, who, the ceremony over, will have to act all the more humbly towards him, while Christ had made it an emblem of true humility and abnegation, and raised thereby the position of those whose feet he washed. "We have nothing to do," said he, "with foot-washing with water, otherwise it is not only the feet of the twelve, but those of everybody we should wash. People would be much more benefited if a general bath were at once ordered, and the whole body washed. If you wish to wash your neighbor's feet, see that your heart is really humble, and help every one in becoming better."

The Church of England at first carried out the letter of the command; but, instead of it, there are now assembled in Whitehall every year as many poor men and women as the sovereign has reigned years; to each of these are given clothes, food, and as many pieces of money as the sovereign counts years. The Anabaptists continued the practice of foot-washing, which, in consideration of the passages John xiii, 14; 1 Tim. v, 10, they considered as a sacrament instituted and recommended by Christ (see the *Confessio* of the United Baptists, or Mennonites, of 1660). The Lutheran Upper Consistory of Dresden condemned in 1718 twelve Lutheran citizens of Weida to public penance for having permitted duke Moritz Wilhelm to wash their feet. As the Moravians revived the old love-feasts, they also revived the practice, yet without strictly enforcing it. It used to be performed not only by the leaders towards their followers, but also by the latter among themselves, while they sang a hymn explanatory of the symbol, in which it was called "the lesser baptism." The Mennonites (q. v.) and the River Brethren (q. v.) still practise foot-washing. The Church of God (q. v.) regards foot-washing as a positive ordinance of perpetual standing in the Church, the same as baptism and the Lord's Supper.—Herzog, *Real-Encyclop.* iv, 630. (J. N. P.)

**Forbes, Rt. Hon. Duncan**, one of the most eminent lawyers of Scotland, was born at Banchrew or Culloden in 1685. He was educated at the University of Edinburgh, and afterwards spent some time at the universities in Leyden, Utrecht, and Paris. In 1717 he became solicitor-general, and in 1742 lord-president of the court of session. In the Rebellion of 1745 he espoused the Hanoverian cause, and it is said that the ingratitude of the government so chagrined him that he fell a victim to fever produced by it. President Forbes cultivated the study of Hebrew and Biblical criticism. He was a follower of the English philosopher and theological writer John Hutcheson. In his work, *Thoughts on Religion, natural and revealed* (Edinb. 1735-43, 8vo), translated into French by father Houbigant, he lays down the doctrine that a system of natural science as well as religion could be drawn from the books of the O. T. if interpreted according to the radical import or root of the language. Forbes published also *Reflections on the Sources of Incredulity with regard to Religion* (Edinb. 1750, 2 vols. 12mo, or 1 vol. 12mo):—*Letters to a Bishop concerning some important Discoveries in Philosophy and Theology* (Lond. 1735, 4to; also translated into French by father Houbigant). The entire works of Forbes, with a biographical sketch, were published by J. Bannatyne (Edinb. 1816, 8vo; 2 vols. 12mo). Bishop Warburton calls him the greatest man that ever Scotland produced, both as a judge, a patriot, and a Christian.—*Encyclop. Brit.* ix, 771; Allibone, *Dict. of Authors*, i, 611. (J. H. W.)

**Forbes, Eli, D.D.**, a Congregational minister, was born at Westborough, Mass., Oct. 1726; graduated at Harvard College, 1751; and in 1752 became pastor of the church at Brookfield, Mass. In 1762 he went on a mission among the Oneida Indians. In 1776 he was installed as pastor at Gloucester, having left his former parish on account of a false charge of Toryism. He died Dec. 15, 1804. He published *The Family Book* (1801, 12mo), and a number of occasional sermons.—Sprague, *Annals*, i, 493.

**Forbes, John** (of Corse), son of Patrick Forbes, was born May 2, 1593. After studying at Heidelberg and Sedan, he was appointed professor of divinity in King's College, Aberdeen, in 1619. In the great struggle in Scotland between Presbyterianism and prelacy, he favored Episcopacy, but sought to be a peacemaker, publishing *Trenicium Amatoribus Veritatis et Pacis in Ecclesia Scotiana* (Aberdeen, 1629). In 1638 he published *A peaceable Warning to the Subjects in Scotland*. Refusing to sign the Solemn League and Covenant, he was

deprived of his benefice in 1640. His case was one of peculiar hardship, for he had made over part of his own private property to be attached to the professorship which he held, and he lost this property on being dismissed from his office. In 1642 he went to Holland, married there, and remained three years. Returning to Scotland, he spent the remainder of his life on his estate at Corse, and died April 20, 1648. His reputation chiefly rests upon his great work *Instructiones Historico-Theologicæ de doctrinâ Christianâ et vario rerum statu, ortisque erroribus et controversiis* (Amst. 1645, fol.; Geneva, 1680, fol.; abridged by Arnold Montanus (Amst. 1663, 8vo). His collected works were published under the title *Joannis Forbesii à Corse Opera Omnia, inter quæ plurima posthuma*, with *vita* by Dr. Garden (Amst. 1702-3, 2 vols. fol.). His *Instructiones* is still a valuable work; its design was to show, in opposition to Bellarmine, the doctrinal agreement between the Reformers and the earlier fathers, and it formed a precursor of the modern works on the History of Doctrines. Bishop Burnet (Preface to *Life of Bedell*) says that Forbes of Corse was a man "of much more extensive learning than his father (Patrick Forbes), in which, perhaps, he was excelled by none of that age. Those who shall read his book of Historical and Theological Institutions will not dispute this title with him; for it is so excellent a work, that, if he had been left in quiet, in the retirement he had chosen, to apply himself to his studies, and could have finished it by a second volume, it would, perhaps, have been the most valuable treatise of divinity that has yet appeared in the world." Baur names Forbes and Petavius as the two great writers of the 17th century on History of Doctrines.—*Encycl. Britannica*, ix, 776; Nieéron, *Mémoires pour servir*, etc., t. xlii; Donaldson, *History of Christian Literature*, i, 66.

**Forbes, Patrick**, bishop of Aberdeen, was born of a noble family in Aberdeenshire in 1564, and became "laird of Corse" and baron of O'Neil. He was educated at Aberdeen and St. Andrew's. "For a good space," says bishop Keith, "he refused to enter into holy orders; but at last, when he was forty-eight years old, viz. anno 1612, he was prevailed upon—a very singular accident having intervened, which made him then yield, namely, the earnest obtestation of a religious minister in the neighborhood, who, in a fit of melancholy, had stabbed himself, but survived to lament his error." He became pastor of Keith, in Morayshire, where he remained until 1618, when he was elected bishop of Aberdeen, on the recommendation of the king. He died March 28, 1635. "He was wont to visit his diocese in a very singular retinue, scarce any person hearing of him until he came into the church on the Lord's day; and according as he perceived the respective ministers to behave themselves, he gave his instructions to them." He wrote *Commentaria in Apocalypsin, cum Appendice* (Amst. 1646, 4to); translated, *An exquisite Commentary on the Revelation* (London, 1613, 4to); a treatise entitled *Exercitationes de Verbo Dei*; and a *Dissertatio de Versionibus vernaculis*. He was a great benefactor to Aberdeen University, of which he was chancellor, and he revived the professorships of law, physic, and divinity.—Keith, *Historical Catal. of Scottish Bishops* (Edinb. 1824, 8vo); Burnet, *History of our own Times*; Hook, *Ecl. Biog.* v, 157.

**Forbes, William**, bishop of Edinburgh, was born at Aberdeen, 1585, and was educated at Marischal College. About the age of twenty he went abroad and studied at the German universities, especially Helmstädt and Heidelberg. He returned after five years, and was offered the chair of Hebrew at Oxford; but he declined it, and became minister first at Alford, next at Monimusk, and afterwards at Aberdeen. About 1617 he was chosen principal of Marischal College in that city, and about 1619 he accepted a pastorate in Edinburgh. When Charles I was in Scotland in 1633 he

heard Forbes preach, and said that he had found a man who deserved to have a see erected for him. His patent from the king, to be the first bishop of Edinburgh, bears date the 26th of January, 1634, and he died April 1 in the same year. He wrote *Considerationes modestæ et pacificæ controversiarum de justificatione, purgatorio, invocatione sanctorum*, which was published posthumously (Lond. 1658, 8vo; reprinted, with an English version, in the *Library of Anglo-Catholic Theology*, Oxford, 1850-56, 2 vols. 8vo). This work is a storehouse of learning on the subject, but does not maintain the Protestant doctrine of justification. It embodied a proposal for an accommodation between the Protestant Episcopal churches and the Church of Rome, the only result of which would have been to make episcopacy regarded with more suspicion in Scotland than it was. Some other polemical works of his which had raised high expectations were lost. Burnet, characterizing his eloquence, says that "he preached with a zeal and vehemence that made him forget all the measures of time—two or three hours was no extraordinary thing for him" (*English Cyclopædia*).—Hook, *Ecl. Biog.* v, 158; *Encyclopedia Britannica*, ix, 777.

**Forcellini**, EGIDIO, an Italian lexicographer, was born Aug. 26, 1688, at Fener, a village near Padua. As his family was poor, it was only towards manhood that he was able to begin the regular course of study in the seminary at Padua. His industry and success in studying Latin gained the confidence of Facciolati (q. v.), who associated him with his labors, especially in preparing the *Totius Latinitatis Lexicon, consilio et cura Jac. Facciolati, opera et stud. E. J. Forcellini Lucubratum* (Padua, 1771). The excellence of this great work is largely attributed to Forcellini. He died April 4, 1768. See FACCIOLATI.

**Forces** (spec. כֹּחַ, *chû'yl*, strength, especially in a military point of view; hence, also, *army, fortification*, etc.), in one phrase, "forces of the Gentiles" (Isa. lx, 5, 11), seems to be used in its widest sense (see Alexander, ad loc.) to denote (as the context implies) not only the subjugation of the heathen, but also the consecration of their wealth (Gen. xxxiv, 29, where the same Heb. word occurs). The כֹּחַ הַמַּלְאָכִים, or *god of strongholds*, of Dan. xi, 38, is probably Mars, or rather Jupiter (Olympius or Capitolinus), whom Antiochus (q. v.) specially honored. See DANIEL.

**Ford** (פֹּרְדִים, *maabar'*, and פֹּרְדִים, *mabarah'*, a pass), a shallow place in a stream where it may easily be crossed on foot or by wading (Gen. xxxii, 23; Josh. ii, 2; Judg. iii, 28; xii, 5, 6; Isa. xvi, 2). See RIVER. The Heb. word is also used both in the singular and in the plural with reference to the mountain pass at Michnah, between Seneh and Bozez (1 Sam. xiv, 4, and Isa. x, 29). Mention is repeatedly made of the fords of Jordan (Josh. ii, 7; Judg. iii, 28; xii, 5, 6; A. V. "passages"). These were evidently in ancient times few in number, and well known, though now the Jordan is fordable in hundreds of places (Smith's *Dict. of Classical Geogr.* s. v. *Palæstina*, p. 521). See JORDAN. Of these, that named Bethabara (q. v.) was probably the most noted. Mention is also made of the ford of the Jabbok (Gen. xxxii, 22), and the fords of Arnon (Isa. xvi, 2). See ARNON. The fords of the Euphrates (Jer. li, 32) were probably the bridges across that river built by Nitocris, as the Euphrates was not fordable at Babylon (Hitzig, *Ezæet. Heb.* ad loc.).—Kitto, s. v. See EUPHRATES.

**Ford**, JOSHUA EDWARDS, a Presbyterian minister, was born in Ogdensburg Aug. 3, 1825, graduated at Williams College in 1844, and studied theology at Union Theological Seminary, New York. In 1847 he entered the missionary work in Syria, under the auspices of the American Board. His first station was Aleppo. He was afterwards transferred to Beirut, and subsequently to Sidon. Invited by the Turkish Missions Aid Society, he spent some months in England

in 1861, advocating the claims of the Syrian Mission. In 1865 he returned to America on account of illness in his family, and labored earnestly in behalf of his mission; but his exertions enfeebled him, and he died of pneumonia at Geneseo, N. Y., April 3, 1866. While in the East he obtained a thorough knowledge of Arabic, and could use it in preaching. He rendered useful service in editing Arabic books for the press, and wrote a book in that language on "Fasting and Prayer." He also used the Turkish language.—Wilson, *Presbyterian Historical Almanac*, 1867, p. 289.

**Fordyce, David**, brother of James, was born in 1711 at Aberdeen. In 1742 he was appointed professor of moral philosophy in Marischal College. He perished by shipwreck in 1751. He wrote *Dialogues concerning Education*:—*Theodorus, a Dialogue on the Art of Preaching* (Lond. 1755, 3d ed. 12mo):—*Elements of Moral Philosophy* (Lond. 1769, 4th ed. 12mo).

**Fordyce, James, D.D.**, a Scotch divine, was born in 1720 at Aberdeen, was educated at Marischal College, and was successively minister at Brechin and Alloa, in Scotland, and at Monkwell Street, London. In 1782 he relinquished the pastoral office, and retired first to Hampshire and afterwards to Bath, where he died, Oct. 1, 1796. He wrote *Sermons to Young Women* (London, 9th ed. 1778, 2 vols. 12mo):—*Addresses to Young Men* (Lond. 1777, 2 vols. 12mo):—*Addresses to the Duty* (London, 1785, sm. 8vo); and several single sermons, which were very popular.—Jones, *Christian Biography*, s. v.

**Forehead** (מִצְחָה, *me'tsach*, from an obsolete root signif. to shine, Gesenius, *Thes. Heb.* p. 815; μέτωπον). The practice of veiling the face in public for women of the higher classes, especially married women, in the East, sufficiently stigmatizes with reproach the unveiled face of women of bad character (Gen. xxv, 65; Jer. iii, 3; Niebuhr, *Trav.* i, 132, 149, 150; Shaw, *Travels*, p. 228, 240; Hasselquist, *Travels*, p. 58; Buckingham, *Arab Tribes*, p. 312; Lane, *Mod. Eg.* i, 72, 77, 225-248; Burckhardt, *Travels*, i, 233). An especial force is thus given to the term "hard of forehead" as descriptive of audacity in general (Ezek. iii, 7, 8, 9; compare Juvenal, *Sat.* xiv, 242—"Ejectum atritâ de fronte ruborem"). See VEIL.

The custom among many Oriental nations both of coloring the face and forehead, and of impressing on

Oriental Marks in the Forehead.

the body marks indicative of devotion to some special deity or religious sect is mentioned by various writers (Burckhardt, *Notes on Bed.* i, 51; Niebuhr, *Trav.* ii, 57; Wilkinson, *Anc. Eg.* ii, 342; Lane, *Modern Eg.* i, 66). Sometimes it extends to serious inflictions. See CUTTINGS IN THE FLESH. It is doubtless alluded to in

Rev. (xiii, 16, 17; xiv, 9; xvii, 5; xx, 4), and in the opposite direction by Ezekiel (ix, 4, 5, 6), and in Rev. (vii, 3; ix, 4; xiv, 1; xxii, 4). The mark mentioned by Ezekiel with approval has been supposed by some to be the figure of the cross, said to be denoted by the word here used, "צ", in the ancient Shemitic language (Gesenius, *Thes.* p. 1495; Spencer, *De Leg. Hebr.* ii, 20; iii, 403, 413). See MARK (ON THE PERSON).

It may have been by way of contradiction to heathen practice that the high-priest wore on the front of his mitre the golden plate inscribed "Holiness to the Lord" (Exod. xxviii, 36; xxxix, 30; Spencer, *l. c.*). See MITRE.

The "jewels for the forehead" mentioned by Ezekiel (xvi, 12), and in the margin of the A. V., Gen. xxiv, 22, were in all probability nose-rings (Isa. iii, 21; Lane, *Mod. Egypt.* iii, 225, 226; Harmer, *Observ.* iv, 311, 312; Gesenius, *Thesaur.* p. 870). The Persian and also Egyptian women wear jewels and strings of coins across their foreheads (Olearius, *Travels*, p. 317; Lane, *Mod. Eg.* ii, 228).—Smith, s. v. See NOSE-JEWEL.

For the use of frontlets between the eyes, see FRONTLET, and for the symptoms of leprosy apparent in the forehead, LEPROSY. For baldness in the forehead, see BALD.

**Foreigner** (נָכְרִי, *nokri'*, Deut. xv, 3; Obađiah 11, a *stranger*, as elsewhere rendered; תּוֹשָׁב, *toshab'*, Exod. xii, 45, a *sojourner*, as usually rendered; πάροικος, lit. a *neighbor*, Eph. ii, 19, elsewhere "stranger" or "sojourner"), a resident in a country not native to him, i. e. in the Jewish sense a Gentile. See ALIEN. Such non-Israelites (גֵּרִים, Josephus ἀλλοτριόχωροι, *Ant.* iii, 12, 3) as resided among the Hebrews were by the Mosaic law not only commended in general to the sympathy and humanity of the citizens (Exod. xxii, 21; xxiii, 9; Lev. xix, 33, 34; Dent. x, 18 sq.; comp. Jer. vii, 6; Ezek. xxii, 7; Zech. vii, 10; Mal. iii, 5; see Josephus, *Apion*, ii, 28), but were also entitled to certain privileges belonging to the poor, namely, to participation in the festivals and decennial feasts (Dent. xiv, 28 sq.; xvi, 10 sq.; xxvi, 11 sq.; Tobit i, 7), to gleanings in the vineyards and fields (Lev. xix, 10; xxiii, 52; Dent. xxiv, 19 sq.), and to the harvest in the year of jubilee (Lev. xxv, 6); prescriptions which found a definite point of support in Oriental hospitality. Before the courts they had equal rights with the native-born residents (Exod. xii, 49; Lev. xxiv, 22; Numb. xv, 15 sq.; Dent. i, 16; xxiv, 17; xxvii, 19), and the cities of refuge were appointed for them likewise in case of unintentional homicide (Numb. xxxv, 15). On the other hand, they also were not allowed to perform anything which was an abomination according to the Hebrew law (Exod. xx, 10; Lev. xvii, 10; xviii, 26; xx, 2; xxiv, 16; Dent. v, 14; Ezek. xiv, 7); yet they were exempted from the prohibition of using the flesh of animals that died of themselves (Dent. xiv, 21; but there are also other distinctions between this passage and Lev. xvii, 15. See CARCASS). Foreign slaves must be circumcised, but were then entitled to eat the passover (Gen. xvii, 12 sq.; Exod. xii, 44). It was lawful to take interest from foreigners for loaned capital (Dent. xxiii, 20). See DEBT. Under certain restrictions, when they submitted to circumcision, they became naturalized, and received the prerogatives of Jewish citizenship; Edomites and Egyptians in the third generation (Dent. xxiii, 7 sq.; comp. Theodoret, *Quæst.* in *Deut.* 26), others after a longer time. Only Ammonites, Moabites, castrated persons, and the offspring of public harlots were altogether excluded from this privilege (Dent. xxiii, 1 sq.; comp. Neh. xiii, 1). Foreigners accordingly appear in the royal service (1 Sam. xxi, 7; xxii, 9; 2 Sam. xi, 3, 6, etc.). See GIT-TITE. Later fanaticism, however, sought to expel all foreigners from the country (Neh. xiii, 3; on the contrary, Ezek. xlvii, 22), or impose the hard condition

of circumcision (Josephus, *Life*, 23). See generally Michaelis, *Mos. Recht*, ii, 443 sq.; Jahn, I, ii, 346 sq. The legal treatment of foreigners was in the earlier ages the more humane, as originally at Rome (Adam, *Rom. Ant.* i, 145) and at Athens. See PROSELYTE.

**Foreiro**, FRANCIS (*Forerius Franciscus*), a Portuguese Dominican monk, was born at Lisbon in 1523, and, entering early into the Dominican order, was sent by John III to study theology in the University of Paris. On his return to Lisbon he was charged with the education of the young prince Antonio, and was appointed preacher to the king. Among the Portuguese at the Council of Trent he held the first place. He offered to preach before the council in any language. The council sent him on a mission to Pius IV, who made Foreiro confessor to his nephew, cardinal Charles Borromeo. He was employed to reform the Breviary and the Roman Missal, and to aid in the preparation of the "Catechism of the Council of Trent." On his return to Portugal he was chosen prior of the Dominican convent at Lisbon in 1568. He died January 10, 1587. His principal work is *Isaie Propheta vetus et nova ex Hebraico Versio, cum Commentario*, etc. (Venice, 1563, fol.), inserted in the fifth volume of the *Critici Sacri*.—Echard et Quétié, *Script. Ord. Præd.* ii, 261; Hook, *Eccles. Biogr.* v, 161; Hofer, *Nouv. Lüggr. Générale*, xviii, 170.

**Foreknowledge.** See PRESCIENCE.

**Fore-Ordination.** See PREDESTINATION.

**Forer**, LAURENT, a Jesuit, born in Switzerland, 1580, was professor of philosophy in many colleges of his order; then chancellor of the University of Dillingen, and finally rector of the Jesuits' College at Lucerne. He died in 1659, leaving 44 works, a list of which may be found in Sotwell, *Bibliographie de la Société de Jésus*. Among them is *Symbolum Catholicum, Lutheranum, Calvinianum cum Apostolico collatum* (Dillingen, 1622, 4to).—Migne, *Dict. de Biog. Chrétienne*, s. v.

**Forerunner** is the literal meaning of *πρόδρομος* (Heb. vi, 20), a *precursor*, one who not only goes before to a particular place, to lead or prepare the way, but who makes arrangements for those that follow. In this sense it is usually applied to John the Baptist, as the harbinger of Christ. But in the above text (the only one where it occurs in Scripture) it is spoken of Jesus, the high-priest of the new dispensation, as entering before his followers into the heavenly sanctuary, and making expiation of perpetual efficacy for sinners (comp. John xiv, 2).

**Foreship** (*πρόρα*, the  *prow*, Acts xxvii, 50, 41), the bow or stem of a vessel. See SHIP.

**Foreskin** (*פְּרִיָּה*, *orlah*), a native term for this special rite; Greek *ἀκροβυστία*; both used in their literal and metaphorical meaning), the prepuce or projecting fold of skin in the distinctive member of the male sex, which was removed in circumcision, so as to leave the *glans penis* artificially uncovered. This well-known symbolical rite was instituted by Jehovah for the consecration of all the male Israelites—originally descendants of Abraham (and in that case on the eighth day after birth, Gen. xxi, 4; Lev. xii, 3; Luke i, 59; ii, 21; see Philo, iii, 5; Josephus, *Ant.* i, 12, 2; yet compare Exod. iv, 25, with ii, 12, and the Mishna, *Shabb.* xix, 5, where in certain cases the ceremony is deferred till the ninth or twelfth day: the Sabbath, however, did not cause a postponement, John vii, 22 sq.; compare Wetstein, i, 887; but delicate children might be circumcised after weaning, Mishna, *l. c.*), and in later times "Proselytes of Righteousness" (Exod. xii, 48; comp. Judith xiv, 10; see Tacit. *Hist.* v, 5, 3), as a ratification of their title to the theocratic citizenship. (Whether circumcision among the Egyptians stood in connection with Phallus worship [Tuch, *Gen.* p. 34] is not determined, but its use among the Israelites is rather against such a supposition. Baur [*Tüb.*

*Zeitschr.* 1832, i, 104 sq.] refers it to the idea of separation from heathendom, which is consistent with the entire system of Mosaism [comp. the Mishna, *Nedar.* iii, 11.] House-born (heathen) slaves were also to undergo the operation (Gen. xvii, 12), as a sign of participation in the covenant with Jehovah. (But children born of a heathen father and an Israelitish mother must not be circumcised, according to *Yebam.* iv, 2; yet comp. Acts xvi, 3.) Every Israelite (Joseph. *Ant.* xii, 5, 4), generally the father of the house (Gen. xvii, 23; but, in cases of exigency, also women; see Buxtorf, *Synagog. Jud.* p. 90; comp. Exod. iv, 25; not heathens, however; yet see *Abodu Sara*, ed. Edzard, ii, 40 sq. In adults a physician was required, Joseph. *Ant.* xx, 2, 5. In case two sons by the same mother died of the operation, the [later] rabbins allowed the circumcision of the third son to be delayed till he was full grown; Maimonides, *III. Mith.* i, 18), should perform the rite, and they employed for the purpose a sharp knife (Quanat, *De cultris circumcisoris et sces-pitii Hebr.* Regiom. 1714; also in Ugolino *Thesaurus*, xxii), earlier an edged stone or stone knife (Exod. iv, 25; Josh. v, 2 sq.; comp. Herod. ii, 86; see Douglæi *Analect.* i, 59; Abicht, *De cultris saxis*, etc. Lips. 1712; also in Hasse *Thesaur.* i, 497 sq.; and Gedæi *Diss. de instrumentis circumcis.* Lips. 1698; also in the *Nov. thesaurus philol.* i, 263 sq.; and in Ugolino, xxii), as the Galli or priests of Cybele castrated themselves with a shell ("Samia testa," Pliny, xxxv, 46; comp. Catull. lxiii, 5; Martial, iii, 8; see Arnobius, *adv. Gent.* v, 16), under the idea that healing was thereby promoted. The Christians of Abyssinia also performed the operation with stone knives (Ludolf, *Hist. Aethiop.* iii, 1, 21). Modern Jews use for this purpose steel knives, and the operation is thus described by Otho (*Ler. Rabb.* p. 133): "The circumcizer applies a rod to the organ, and draws the prepuce forward over it as far as possible; then with a forceps he seizes a part of it, and cuts it off with a razor. He next seizes the prepuce with his two thumbs, and rolls it back till the whole *glans* is exposed, after which he sucks out the blood (Mishna, *Shabb.* xix, 2) till the blood comes from the remoter parts of the body, and finally he applies a plaster to the wound." (Comp. Thevenot, *Trar.* i, 58; Chelius, *Handb. d. Chirurg.* II, i, 50; Wolfers, in Henke, *Zeitschr. f. Staatsarzn.* 1825, i, 205 sq.; also in the *Encycl. Wörterb. d. medic. Wissenschaft.* v, 256 sq.) On Arab circumcision, see Arvieux, iii, 146. That so severe and painful an operation (comp. Targ. Jonath. on Gen. xxii, 1) could not well be performed on an infant less than eight days old is evident. The practice of *female* circumcision, or excision, referred to by several ancient and modern writers, as practiced by certain nations, may have consisted in removing the anterior flap of skin which in some actual specimens of Hottentots or Bushwomen has been found to cover the female genitals, apparently wholly distinct from the vaginal membrane (see the *Penay Cyclopadia*, s. v. Circumcision). As circumcision was a symbol of purification, the prepuce was a type of corruption; hence the phrase "foreskin of the heart" (Deut. x, 16; Jer. iv, 10), to designate a carnal or heathenish state (Rom. ii, 29; compare Philo, ii, 258). See URCIRCUMCISION. The part removed by circumcision thus naturally became one of the harshest terms of opprobrium (1 Sam. xvii, 26, 26; comp. Ludolf, *Comment. in Hist. Aeth.* p. 274), like *verpus* among the Romans (Martial, vii, 82, 6). It was sometimes brought as a trophy of slain Gentiles (1 Sam. xviii, 25; 2 Sam. iii, 14), like scalps by the North American savages. Paul, on the other hand, uses the ironical term "concision" (Phil. iii, 2) to stigmatize the extreme attachment of a Judaizing party to this ordinance.—Winer, 156. See CIRCUMCISION.

**FORESKINS, HILL OF**, a place near Gilgal, so called from the circumcision of the Israelites at that spot before entering Canaan (Josh. v, 3). See GIBEAH-HA-ARALOTH.

**Forest** is the rendering in the Auth. Vers. of three distinct Heb. words. See TOPOGRAPHICAL TERMS.

1. Usually and most properly יָבֵשׁ, *ya'ar*, or יָבֵשׁ, *ya'rah* (once rendered "wood," Deut. xix, 5), signifying a dense woods from its *redundancy* or *luxuriance*, such as is seen in the growth of forest-trees, and in use restricted (with the exception of 1 Sam. xiv, 26, and Cant. v, 1, in which it refers to honey) to an abundance of trees. It is the name given to all the great primeval forests of Syria, where the stately trees grew (Eccles. ii, 6; Isa. xlv, 14), and where the wild beasts had their homes (Jer. v, 6; Mic. v, 8). Hosea (ii, 12) appears to use it as equivalent to the Arabic *ya'ar*, a *rugged and desolate place*, like *midbar* or "wilderness." See WOOD.

2. חֹרֶשׁ, *cho'resh*, is apparently derived from a Chaldee root, חֹרֶשׁ, *to be entangled*, and would therefore signify a *thicket* of trees or bushes, such as might afford a safe hiding-place (comp. 1 Sam. xxiii, 15), and such as is now often seen in Palestine on the sites of ruined cities (comp. Isa. xvii, 9). It applies to woods of less extent, the word itself, according to others, involving the idea of what is cut down (from חֹרֶשׁ, Gesen. *Theo.* p. 530): it is only twice (1 Sam. xxiii, 15 sq.; 2 Chron. xxvii, 4) applied to woods properly so called; its sense, however, is illustrated in the other passages in which it occurs, viz. Isa. xvii, 9 (A. V. "bough"), where the comparison is to the solitary relic of an ancient forest, and Ezek. xxxi, 3, where it applies to trees or foliage sufficient to afford shelter (Vulg. *frondibus nemorosus*; A. V. "with a shadowing shroud"). The term occurs seven times in Scripture, but is only once rendered *forest*—"In the forests (Sept. *ἐν τοῖς ἔρμυσι*) he built castles and towers" (2 Chron. xxvii, 4). The locality here referred to appears to be the south of Judah, where the mountains were formerly, and are in places still, clothed with dwarf oaks and tangled shrubberies. See THICKET.

3. פַּרְדֵּס, *pardes*; a word of foreign origin, like the Greek *παράδεισος* and the Arabic *pardasim*, q. d. *park*, means an *enclosed garden* or *plantation* attached to a palace, intended either for ornament or for containing animals of the chase (Eccles. ii, 5; Cant. iv, 13; comp. Xenophon, *Cyrop.* i, 3, 12). It is found only three times in the Bible, and is once translated *forest*. In Neh. ii, 8, Asaph is called "the keeper of the king's forest" (Sept. *τοῦ παραδείσου*), where it appropriately expresses the care with which the forests of Palestine were preserved under the Persian rule, a regular warden being appointed, without whose sanction no tree could be felled. Elsewhere the word describes an orchard (Eccles. ii, 5; Cant. iv, 13). See ORCHARD.

Although Palestine has never, in historical times, been a woodland country, yet there can be no doubt that it contained much more wood formerly than it has at present. Tracts of woodland are mentioned by travellers in Palestine, but rarely what we should call a forest. There are still some remnants of ancient oak forests on the mountains of Bashan, Gilead, Hermon, and Galilee. One solitary grove of cedars exists on Lebanon, but fir-trees are there abundant. The other forests of Palestine (2 Kings ii, 23; 1 Sam. xiv, 25; vii, 2, etc.) have almost disappeared. Yet here and there, in every district of the country, north and south, east and west, one meets with a solitary oak or terebinth of huge dimensions, as at Hebron, and the valley of Elah, and Shiloh, and Dan. These are the last trees of the forests, and serve to indicate what the forests of Palestine once were. Hence it is probable that the highlands were once covered with a primeval forest, of which the celebrated oaks and terebinths (e. g. those of Abraham, Tabor, etc.) scattered here and there were the relics. The woods and forests mentioned in the Bible appear to have been situated where they are usually found in cultivated countries, in the

valleys and defiles that lead down from the high to the low lands, and in the adjacent plains. They were therefore of no great size, and correspond rather with the idea of the Latin *saltus* than with our *forest*. The following are those that occur in Scripture. See TREE.

(1.) The most extensive was the *forest (yaar, "wood") of Ephraim*, implying a region of Ephraim covered with forests where Mount Jearim (*Hill of Forests*) was situated (Josh. xv, 10); or in allusion to the name of the city Kirjath-jearim (1 Sam. vii, 1, 2). It clothed the slopes of the hills that bordered the plain of Jezreel, and the plain itself in the neighborhood of Bethshan (Josh. xvii, 15 sq.), extending, perhaps, at one time to Tabor, which is translated *ἐρμύς* by Theodotion (Hos. v, 1), and which is still well covered with forest-trees (Stanley, p. 350). It is, perhaps, the same with the *wood of Ephratah* (Psa. cxxxii, 6). See EPHRAIM.

(2.) There was a trans-Jordanic *forest (yaar, "wood") of Ephraim* (2 Sam. xviii, 6; Sept. *ἐρμύς*). It was here that the army of Absalom was defeated, and he himself slain. It lay near, probably a little to the west of, the town of Mahanaim, where David had his headquarters, and where he received the first tidings of the fate of his son (xvii, 26; xviii, 24). Why a forest east of the Jordan should bear the name *Ephraim* cannot now be determined; but one thing is certain—in the noble oaks which still clothe the hills of Gilead north of the Jabbok we see the remnants of "the wood of Ephraim," and the representative of that "great oak" in one of whose branches Absalom was strangely imprisoned (xviii, 9; see Porter's *Handbook for Syria and Palestine*, p. 311, 314). Winer places it on the west side of the Jordan; but a comparison of 2 Sam. xvii, 26; xviii, 3, 23, proves the reverse. The statement in xviii, 23, in particular, marks its position as on the highlands, at some little distance from the valley of the Jordan (comp. Joseph. *Ant.* vii, 10, 1, 2). See EPHRAIM, WOOD OF.

(3.) The *forest (yaar, Sept. πῶλις, A. V. "forest") of Hareth*, in the mountains of Judah, to which David withdrew to avoid the fury of Saul (1 Sam. xxii, 5), was somewhere on the border of the Philistine plain, in the southern part of Judah. See HARETH.

(4.) The *wood (choresh, Sept. ὄρος, A. V. "wood") in the wilderness of Ziph*, in which David concealed himself (1 Sam. xxiii, 15 sq.), lay south-east of Hebron. See ZIPH.

(5.) The *forest (yaar, Sept. ἐρμύς, A. V. "wood") of Bethel* (2 Kings ii, 23, 24) was situated in the ravine which descends to the plain of Jericho. See BETHEL.

(6.) The *forest (yaar, ἐρμύς, "wood")* through which the Israelites passed in their pursuit of the Philistines (1 Sam. xiv, 25) was probably near Ajalon (compare v, 31), in one of the valleys leading down to the plain of Philistia. See SAUL.

(7.) The *woods (choresh, ἐρμύς, "forest")* in which Jotham placed his forts (2 Chron. xxvii, 4) must have been similarly situated. See JOTHAM.

(8.) The plain of Sharon was partly covered with wood (Strab. xvii, 758), whence the Sept. gives *ἐρμύς* as an equivalent for that name in Isa. lxx, 10. It has still a fair amount of wood (Stanley, p. 260). See SHARON.

(9.) The *excellency or pride of the Jordan*, so called from its green and shady banks, clothed with willows, tamarisks, and cane, in which lions made their covert (Zech. xi, 3; Jer. xii, 5). See JORDAN.

(10.) The *forest (yaar) of cedars on Mount Lebanon* (2 Kings xix, 23; Hos. xiv, 5, 6), which must have been much more extensive formerly than at present; although, on the assumption that the "cedar" of Scripture is the *Pinus cedrus*, or so-called "cedar of Lebanon," its growth is by no means confined, among those mountains, to the famous clump of ancient trees which has alone engaged the attention of travellers. See CEDAR. The American missionaries and others, trav-

elling by unfrequented routes, have found woods of less ancient cedar-trees in other places. See **LEBANON**, 1.

"The house of the forest (*yaar*) of Lebanon" is several times mentioned. It appears to have been a part of the royal palace built by Solomon at Jerusalem, and used as an armory (1 Kings vii, 2 sq.; x, 17-21; 2 Chron. ix, 16-20). The house had "four rows of cedar pillars, with cedar beams upon the pillars, and it was covered with cedar above upon the beams." Hence, in all probability, its name (see Keil, ad loc.). See **SOLOMON**.

"The forest (*yaar*, *הַיַּרְדֵּן*) of Carmel" is a phrase used in 2 Kings xix, 23, and Isa. xxxvii, 24, in reference to the ravages committed by the army of Sennacherib on the land of Israel. The meaning of the clause, *הַיַּרְדֵּן הַיַּרְדֵּן* ("forest of his Carmel"), seems to be *its garden forest*; that is, the garden-like cedar forests of Lebanon, to which reference is made (see Keil on Kings, and Alexander on Isaiah, ad loc.).

(11.) "The forest (*yaar*) in Arabia" occurs in Isa. xxi, 13. The phrase is remarkable, because Arabia is a country singularly destitute of trees. In no part of it are there any traces of forests. (The Sept. translates the passage *ἐν τῷ ἔρημῳ ἑσπέρας*; and Lowth and others adopt it; but the Masoretic reading is preferable.) The meaning of the word *הַיַּרְדֵּן* in this place is probably the same as that of the Arabic *yaar*, a rugged region, whether wooded or not. See **ARABIA**.

(12.) In Zech. xi, 2 there is a singular expression: "Howl, O ye oaks of Bashan, for the forest of the vintage is come down." The Hebrew *הַיַּרְדֵּן הַיַּרְדֵּן* (Sept. *ὁ ἔρημος ὁ σήψοντος*) rather signifies "the fortified forest" (Vulg. *sultus munitus*), and it is probable that Jerusalem is thus figuratively alluded to, the houses of which are close together as the trees of a forest (compare Micah, iii, 12; see Henderson, *On the Minor Prophets*, ad loc.). It may, however, refer to the devastation of that region, for the greater portion of Peæra was, and still is, covered with forests of oak and terebinth (Isa. ii, 13; Ezek. xxvii, 6; comp. Buckingham's *Palestine*, p. 103 sq., 240 sq.; Stanley, p. 324). See **BASHAN**.

Forest is used symbolically to denote a city, kingdom, polity, or the like (Ezek. xiv, 26). Devoted kingdoms are also represented under the image of a forest, which God threatens to burn or cut down. (See Isa. x, 17, 18, 19, 34, where the briars and thorns denote the common people; "the glory of the forest" are the nobles and those of highest rank and importance. See also Isa. xxxii, 19; xxxvii, 24; Jer. xxi, 14; xxii, 7; xlv, 23; Zech. xi, 2). It was also an image of unfruitfulness as contrasted with a cultivated field or vineyard (Isa. xxix, 17; xxxii, 15; Jer. xxvi, 18; Hos. ii, 12). See WENYSS'S *Clavis Symbolica*, s. v.—KITTO, s. v.; SMITH, s. v. See **PALESTINE**.

**Fork** (*קֶשֶׁת*, *shelosh' killeshon'*, a trial of prongs), a three-pronged fork, i. e. pitch-fork with which hay, straw, and the like are gathered (occurs only 1 Sam. xiii, 21). The Targum (on Eccles. ii, 11) uses the same word to express a pointed instrument. See **AGRICULTURE**.

The Orientals do not use forks at meals as we do, but convey the food to their mouth with the fingers. See **EATING**.

**Forgiveness**, "the pardon of any offence committed against us. We are not apt to entertain any permanent or incurable ill will against the author of injuries to others, and why should we be irreconcilable when injuries have been done to ourselves? To love our enemies, or rather not to hate our enemies, is a duty which no guilt can annul, no injury efface. We are not required to love our enemies as our friends; but, when any injury has been done us, we are to endeavor to regard it with so much resentment as any

just and impartial person would feel on hearing it related, and no more. To revenge injuries is to retaliate evil for the sake of retaliation. We are all weak, frail, and sinful creatures. None of us passes through one day without feeling that he requires forgiveness from his God, and too often also from his fellow-creatures. Mercy is all our hope, forgiveness our constant prayer. In such a state, should we not pity and assist each other? Does not mutual weakness call for mutual forbearance? Weak, frail, and sinful as we are, we all hope, through the merits of Christ, to attain the happiness of heaven; and can creatures who, after a few short years, expect to be forever united in the presence of God, to be liberated from all unruly passions, and to live together forever in heaven, in peace, and joy, and everlasting love—can such creatures hate each other on earth? can they add to the sorrows of this state of trial, and spread more thorns in the path of life by acts of malice and revenge? can they risk their own eternal happiness by denying to each other that forgiveness without which they must not dare to hope that they shall be themselves forgiven? We know, from the express declaration of our Saviour, that if we forgive not men their trespasses, neither will our heavenly Father forgive us. Christ estimated virtues by their solid utility, and not by their fashion or popularity, and hence he prefers the duty of forgiveness to every other. He enjoins it more frequently, with more earnestness, and under a greater variety of forms; and he adds this weighty and peculiar circumstance, that the forgiveness of others is the sole condition on which we are to expect or even ask from God forgiveness for ourselves. This preference is justified by the superior importance of the virtue itself. The feuds and animosities which exist in families and among neighbors, which disturb the intercourse of human life, and collectively compose half its misery, have their foundation in the want of a forgiving temper, and can never cease except by the exercise of this virtue. Let us endeavor to forgive, that we may not be afraid to ask forgiveness. Let us take care so to pray for forgiveness, that our prayers may not justify and increase our condemnation. Let us remember the amazing condescension of the Son of God, in 'taking upon him the form of a servant,' and thence learn humility. Let us represent to our minds the terms of our salvation, in order to excite us to repentance. Let us adore the infinite love of our Redeemer, 'who laid down his life for his enemies,' and let this be the pattern of our charity" (Fellowes, *Body of Theology*, ii, 210-213; Paley, *Moral and Polit. Philosophy*, i, 269; Warner, *System of Divinity and Morality*, ii, 356).—Robinson, *Theological Dictionary*, s. v.; *American Presbyterian Review*, Oct. 1867, art. ii.

"Some confound things that are separate and different—the act of forgiving with the act of loving with approbation. Repentance and confession are indispensable, when one has intentionally injured us in any way, to restore him to our fellowship and approbation. But what is a necessary condition of this is not a necessary condition of forgiving. Blending these two things together, and thinking of them as if they were one and inseparable, has doubtless caused some to differ in opinion from others who clearly discern the proper distinctions. It is a mistaken idea that in the matter of forgiveness we are strictly to imitate God the Father, and not forgive those who trespass against us until they repent and ask our pardon. God is clothed with the responsibilities of moral government over his creatures, while we are not. If he had made it our duty to revenge our own wrongs, and administer just punishment to the doers of the wrong, then it would be right and wise to follow his example in that particular. But the case is far otherwise. The Lord not only relieves us of that responsibility, but has commanded us not to usurp his prerogatives: 'Avenge not yourselves.' No doubt there are certain cases in

civil and family governments in which the *outward acts* of forgiveness should be held in abeyance until forgiveness is duly sought. The offender in himself has no right to forgiveness until he seeks it in the true spirit of repentance. In the outward expressions of this, parents should often wait for the outward signs of penitence in their children. The same may be true sometimes in other relations, as between brothers and sisters, and other domestic and civil relations. Hence there is an *objective* and a *subjective* view to be taken of the duty of forgiveness—an act in the heart, and an appropriate outward and formal expression of it. The former should be performed at once, to prevent greater evil to ourselves, while the latter may wisely be delayed until the proper occasion for it arrives. One may say he forgives, when in reality he does not forgive from the heart; so we may forgive from the heart long before we proclaim it to the parties concerned” (*Zion’s Herald*, January 2, 1867).

FORGIVENESS OF SIN is that act of God’s free grace by which, in virtue of the merits of Christ’s atonement, appropriated by faith, he frees the sinner, who accepts Christ by such faith, from the guilt and penalty of his sins. “By the atonement of Christ, which is God’s own provision, his law is vindicated, and the penalty of sin is paid. To all who will believe in Christ with the heart, God offers a free, full, and present forgiveness (Acts v, 31; xiii, 38, 39; 1 John ii, 12). ‘Being justified freely by his grace, through the redemption that is in Christ Jesus,’ etc. (Rom. iii, 24, et seq.). By a careful consideration of this language, we see, 1. That every believer in Christ Jesus is *justified* or *pardoned*, for justification is called, in verse 25, ‘remission of sins.’ Yet it is not simply forgiveness: the terms *justification* and *justify*, when applied to a guilty person, do not import his being morally just, but just with respect to law and the lawgiver: that is, placed in the position of a person who has not broken the law, both in respect to exemption from punishment, and the favor and kindness of the judge. Justification is pardon administered consistently with the requirements of justice and law. 2. That such believers are forgiven *freely*, as a *free gift*, not of *right*, not *meritoriously* and of *desert*. It is to grace, and not to justice, that the appeal for pardon is made; and we could ourselves have done nothing which could have legally cancelled our sins. The whole scheme is of grace, the result of the pure love of God, who compassionated our misery, himself provided the means of our deliverance, by sending his only-begotten Son into the world, who voluntarily submitted to die on the cross, that he might reconcile us to God. The whole was completed without our intervention, and the faith which is the condition of our salvation is by grace” (Farrar, *Biblical Dictionary*, s. v.). See JUSTIFICATION.

The “forgiveness of sins” is one of the articles of the (so-called) Apostles’ Creed, as well as of the Nicene. According to the so-called sacramental theology (Acts ii, 38), “forgiveness of sins” is conveyed to the penitent by the act of the priest pronouncing the absolution, making the priest the sole ordinary channel through which remission is to be obtained. But sin against God can only be forgiven by God, on the condition he prescribes, of repentance, and of this no man can infallibly judge. See Pearson, *On the Creed*, art. ix; Eden, *Churchman’s Dictionary*, s. v. See ABSOLUTION; JUSTIFICATION.

Form (Lat. *forma*, by transpos. from μορφή) is defined by Aristotle as λόγος τῆς οὐσίας, the doctrine of the substance or essence of a thing. “A trumpet may be said to consist of two parts, the matter or brass of which it is made, and the form which the maker gives to it. The latter is essential, but not the former; since, although the matter were silver, it would still be a trumpet, but without the form it would not. Now,

although there can be no form without matter, yet as it is the form which makes the thing what it is, the word form came to signify essence or nature” (Fleming, s. v.). The Scholastics distinguished form *substantial* from form *accidental*. Substantial form they defined as *actus primarius una cum materia constituens unum per se*; accidental form as *actus secundarius constitutus a unit per accidens*. The unit of being composed of soul and body was defined to be of the former sort. Form, according to the ancient definition, is therefore necessary to matter; absolutely formless matter is inconceivable. Lord Bacon (*Nov. Organ.* ii, 17, says: “When we speak of forms, we understand nothing more than the laws and modes of action which regulate and constitute any simple nature, such as heat, light, weight, in all kinds of matter susceptible of them; so that the form of heat, or the form of light, and the law of heat, and the law of light, are the same thing.” Also (*Nov. Organ.* ii, 15), “The form of a thing is the very thing itself, and the thing no otherwise differs from the form than as the apparent differs from the existent, the outward from the inward, or that which is considered in relation to man from that which is considered in relation to the universe.”

“The sense attached at the present day to the words form and matter is somewhat different from, though closely related to, these. The form is what the mind impresses upon its perceptions of objects, which are the matter; form therefore means mode of viewing objects that are presented to the mind. When the attention is directed to any object, we do not see the object itself, but contemplate it in the light of our own prior conceptions. A rich man, for example, is regarded by the poor and ignorant under the form of a very fortunate person, able to purchase luxuries which are above their own reach; by the religious mind under the form of a person with more than ordinary temptations to contend with; by the political economist under that of an example of the unequal distribution of wealth; by the tradesman under that of one whose patronage is valuable. Now the object is really the same to all these observers; the same rich man has been represented under all these different forms. And the reason that the observers are able to find many in one is that they connect him severally with their own prior conceptions. The form, then, in this view, is mode of knowing, and the matter is the perception or object we have to know” (Thomson, *Outline of Laws of Thought*, p. 34). Sir W. Hamilton calls the theory of substantial forms “the theory of qualities viewed as entities conjoined with, and not as mere dispositions or modifications of matter” (Hamilton’s edition of Reid’s *Works*, p. 827).

Dr. McCosh remarks, on the distinction between form and matter, that “this phraseology was introduced by Aristotle, who represented everything as having in itself both matter (ἔλη) and form (εἶδος). It had a new signification given to it by Kant, who supposes that the mind supplies from its own furniture a form to impose on the matter presented from without. The form thus corresponds to the *à priori* element, and the matter to the *à posteriori*. But the view thus given of the relation in which the knowing mind stands to the known object is altogether a mistaken one. It supposes that the mind in cognition adds an element from its own resources, whereas it is simply so constituted as to know what is in the object. This doctrine needs only to be carried out consequentially to sap the foundations of all knowledge; for if the mind may contribute from its own stores one element, why not another? why not all the elements? In fact, Kant did, by this distinction, open the way to all those later speculations which represent the whole universe of being as an ideal construction. There can, I think, be no impropriety in speaking of the original principles of the mind as forms or rules, but they are forms merely, as are the rules of grammar,

which do not add anything to correct speaking and writing, but are merely the expression of the laws which they follow. As to the word 'matter,' it has either no meaning in such an application, or a meaning of a misleading character" (*Intuitions of the Mind*, N. Y. 1866, p. 308). Formal, in philosophy, is that which relates to the form, as opposed to material, or that which relates to the matter. So formal logic gives the theory of reasoning as grounded in the laws of thought, without reference to the subject-matter to which reasoning may be applied.—Fleming, *Vocabulary of Philosophy*, s. v.; Krug, *Handwörter. der philosoph. Wissenschaften*, ii, 56.

**Form of Concord.** See CONCORD, vol. ii, p. 453.

**Formatæ.** See LITERÆ FORMATÆ.

**Formōsus I.** Pope (891–896), was bishop of Porto, and was sent by Nicholas I in 866 as legate to Bulgaria (q. v.), and would have been made archbishop there but that the canons (at that time) forbade transfers from one see to another. In the time of pope John VIII he was condemned on a charge of conspiracy against Charles the Bald and the pope (Hefele, *Concilien Geschichte*, iv, 496), A.D. 876. He was deprived of his episcopacy, and of all rights except lay communion. Pope Martin V restored him to his see in 883. Formosus was elected pope Sept. 21, 891, and was the first instance in the West of a bishop transferred from one see to another. Soon after his election, legates sent by the emperor Leo and the Eastern bishops arrived in Rome to obtain a confirmation of the ordinations of Photius (q. v.), but Formosus would not grant the request, and the East and West were still farther alienated. In 893 he took sides politically with Charles the Simple against Odo. On the death of Guido, 891, Formosus invited Arnulf to Rome, and crowned him emperor, 895. Formosus died on Easter day, 896. Pope Stephen VI caused the dead body of Formosus to be taken up and brought into a synod at Rome, condemned as guilty of intrusion into the holy see, and treated with gross indignity. Stephen declared all the acts of Formosus null and void. His "character" was restored by pope John IX, A.D. 898.—Bower, *Lives of the Popes*, v, 71–73; Baronius, *Annales*, A.D. 891–896.

**Forms of Prayer** are set prayers, prepared to be used in worship, public and private. As to the propriety and utility of such forms there has been much dispute. The arguments are about as follows.

I. *From Scripture.*—(1.) On the one hand it is asserted against the use of forms that "there is not the slightest trace in all the New Testament of any established liturgical service of Christian worship. There are no forms of prayer prescribed for such worship—a thing which we conceive must be inevitable if such liturgical form had been the best form, the most accordant with the will of the Great Head over all things to the Church, and the most consonant with the mind of the Spirit, the most appropriate for the bestowment and exercise of his influences. In things of much less importance we have explicit directions; and it is hardly to be supposed, if a liturgy for public worship were most appropriate for the wants of men, and most agreeable to the will of God, that there should have been no directions, nor even intimations in regard to it. It is hardly to be supposed, when all things were set in order in the churches, that this main thing should have been neglected, or left at loose ends—so loose that not a single trace even of so much as a prescribed articular confession of faith or form of prayer can be found in the New Testament oracles" (Cheever). In the same spirit, Coleman (*Apostolical and Primitive Church*, ch. xi) undertakes to prove, 1, that the use of forms of prayer is opposed to the spirit of the Christian dispensation; 2, that it is opposed to the example of Christ and of his apostles; and, 3, that it is unauthorized by their instructions. (2.) On the

other hand, in favor of forms, it is declared that "the slightest acquaintance with Scripture is enough to convince cavillers that contrary to Scripture could not be that practice for which we can plead the precedent of Moses and Miriam, and the daughters of Israel, of Aaron and his sons when they blessed the people, of Deborah and Barak; when the practice was even more directly sanctioned by the Holy Ghost at the time he inspired David and the Psalmists; for what are the Psalms but an inspired form of prayer for the use of the Church under the Gospel, as well as under the law? The services of the synagogue, too, it is well known, were conducted according to a prescribed form. To those services our blessed Lord did himself conform; and severely as he reproved the Jews for their departure, in various particulars, from the principles of their fathers, against their practice in this particular never did he utter one word of censure; nay, he confirmed the practice when he himself gave to his disciples a form of prayer, and framed that prayer, too, on the model, and in some degree in the very words, of prayers then in use. Our Lord, moreover, when giving his directions to the rulers of his Church, at the same time that he conferred on them authority to bind and to loose, directed them to agree touching what they should ask for, which seems almost to convey an injunction to the rulers of every particular Church to provide their people with a form of prayer" (Hook). But "far more weight than all other arguments together has the one obvious and simple reason that our Lord's especial blessing and favorable reception of petitions is bestowed on those who, assembling in his name, shall 'agree' touching what they shall ask in his name. Now this surely implies the exclusive use of precomposed prayers in a congregation, since it plainly seems an impossibility for uninspired men to agree together in a prayer offered up by one of them if they do not know at least the substance of the prayer before they hear him utter the words. In their private devotions, let individuals address their 'Father who seeth in secret' in any expressions (that are but intelligible to themselves) which occur at the moment. But congregational prayer, common supplication, joint worship, is a very different thing. And accordingly our Lord supplies to his disciples no form of words for solitary devotion, but does teach them a form evidently designed for joint worship. The contrast is most remarkable: 'Thou, when thou prayest, enter into thy closet,' etc.; 'when ye pray, say, Our Father,' etc. Our Lord, by teaching this form (and which he delivered on two distinct occasions in nearly the same words—Matt. vi, 9, and Luke xi, 1, 2), gave the strongest possible sanction to the use of precomposed prayers for congregational worship" (Eden).

II. *From Antiquity and Usage.*—Extreme views are maintained as to the usage of the primitive Church in prayer. (1.) On the one hand, lord King says (*Constitution of the Primitive Church*), "There is not the least mention of fixed forms in any of the primitive writings, nor the least word or syllable tending thereto, that I can find, which is a most unaccountable silence if ever such there were, but rather some expressions intimating the contrary." One of the principal authorities which he adduces is Justin Martyr, who, describing the manner of the prayer before the celebration of the Lord's Supper, says that the bishop sent up prayers and praises to God *with his utmost ability* (ὅσην ἐνθάρατο). This he expounds, that he prayed with the best of his abilities, invention, expression, and judgment, exerting his own gifts and parts in suitable manner and apt expression. He also quotes Tertullian and Origen in vindication of his views, that written forms of prayer were never used in the Church. To the same effect Coleman (*Apost. Church*, ch. xi) maintains that forms are "opposed to the simplicity and freedom of primitive worship," and that their use, in fact, "was un-

known in the primitive Church." In proof of this position, he (with lord King) adduces Justin Martyr († 165) (translation by Semisch, i, 72), and Tertullian († 220) (*Apolog.* ch. xxxix), who uses the phrase *we pray without a monitor, because from the heart* (sine monitore, quia de pectore), and also the fact that the four earliest liturgies originated in the 4th century. (2.) On the other hand, it is argued that the Jewish synagogue had its liturgy, to which Christ and the apostles conformed; that John Baptist taught his disciples to pray, and that Christ gave a form to his followers in answer to their request; that if the four ancient liturgies can only be traced to the 4th century, there are numerous passages in the fathers that imply their use in the apostolic age, and that fragments of them as far back as Clemens (A.D. 194) and Dionysius of Alexandria (247) are found; that the passages from Justin and Tertullian, rightly interpreted, bear as strongly in favor of liturgies as against them; that the Apostolical Canons (q. v.) enjoin them; and that, from the 4th century downwards, both the Eastern and Western churches have uniformly used forms of prayer (Hook; Eden, s. v.). On the historical questions as to the early use of liturgies, see LITURGY.

III. *From the Tendencies and Results of their Use.*—(1.) *Against forms*, it is alleged that those adopted in one age are unsuitable to another; that the perpetual repetition of the same prayers makes them wearisome, and destroys their significance; that they must often be unsuited to the occasion, to the sermon, and to the circumstances of the congregation; and that their general tendency is, and always has been, to formalism and a mere outside worship, not of the heart, but of the lips.

(2.) *For the use of forms*, it is asserted that the forms in use are, like the Psalms, from which they are largely derived, adapted to the worship of the Church in all ages; that forms are not as wearisome to a devout mind as extempore prayers of the same length; that for special occasions special prayers can always be framed; and that their tendency has been proved, in the history of the Church, to be most salutary. It is further objected to extemporaneous prayers that (1) "it must be generally impossible that the whole congregation should join in a prayer they never had heard before, the instant it is uttered; and totally impossible many distinct congregations should all be uniformly employing the same extemporaneous prayer." (2) That free prayer gives too little scope to the congregation; nothing is left for them to do; they are, throughout, passive and receptive; they hear the minister pray rather than join in public prayer; at best, they follow the minister rather than worship in prayer. (3) That free prayer tends to degenerate into preaching or exhortation; that the preacher can hardly fail to aim at edifying his congregation instead of being simply their mouthpiece in the act of worship, and so his prayers become homiletical instead of devotional. (4) That unpremeditated prayers are apt to depend on the impulse of the moment in the preacher, his state of health, etc., and may therefore be either short and cold on the one hand, or long and diffusive on the other; and that it is apt, therefore, to be personal rather than representative, if the prayer is the natural outflow of the minister's heart, which, on the theory, it ought to be.

A judicious writer in the *Brit. and For. Evang. Rev.* (July, 1857), after stating that there are only three positions possible on this question—(1) the use of forms, with the exclusion of free prayer; (2) free prayer, excluding all forms; (3) the combination, in greater or lesser measure, of both—argues that the Reformers and fathers of Protestantism favored the third. "In practice they stood precisely midway between the two antagonist positions of modern times, and can be legitimately claimed as partisans by neither. They were the advocates neither of form nor of freedom, but of both. They at once sanctioned the use of liturgical

aids, and vindicated the right of personal freedom. Whether rightly or wrongly, whether as a remnant of the old bondage which they could not all at once throw off, or the dictate of that divine conservative wisdom which in most things so marvellously guided them in reforming, not new founding, the Church, having regard also, perhaps, in some measure, to the circumstances and necessities of their times, the fact, at least, is historically certain that with one consent they aimed rather at the combination and mutual co-operation of both elements than the exclusive predominance of either. While not confining their churches to any unbending ritual, they yet deemed it their duty to provide for them such fit and solemn forms of common prayer as should serve at once as a model and as an aid in the public worship of God. This was the principle alike of Knox and of Crammer, of Calvin equally with Luther and Melancthon. At Geneva, at Zurich, at Wittenberg, at St. Andrew's—wherever the great leaders of the Reformation were at liberty to carry out their views, the solemn service of the house of God proceeded according to a certain normal order, which was designed to regulate and assist, not to restrain, the free outpourings of the heart. England was an apparent, but only an apparent, exception to this rule. In her case the more rigid enforcement of an unvarying ritual was rather the result of urgent circumstances than of the personal convictions of her leading divines. The principle of comprehension on which her reformation was based rendered a certain restraint necessary in the interest, not of ritual uniformity, but of Protestant truth. The object of suspicion then was the Roman priest, not the evangelical pastor, and the design of ritual restriction was rather to curb the license of the one than to fetter the liberty of the other. Ave Marias must be silenced, even though at the sacrifice of free prayer; the communion service must be prescribed by imperative rubric, or it will be turned by many into a mass. But for this adventitious, and, in their view, probably temporary necessity, there is every reason to believe that the liturgical ordinances of the English reformers would have been much less fixed and stringent, and that in the matter of worship, as well as in other elements of her constitution, the Church which they founded would have been brought into much nearer conformity with the general model of other Reformed communions. Be this, however, as it may, the real and essential point of difference, even in practice, between Canterbury and Geneva was not the use, but the exclusive use of forms. The one confined, the other permitted and encouraged, the spontaneous utterances of devotion. The one supplied an aid, the other ordained a law. In truth, in the Scottish form at least, while much was provided, *nothing* was prescribed. Instead of the Anglican 'then shall the priest say,' its gentler and wiser language is 'the minister useth one of these two confessions,' or 'this prayer following, or such like.' The accustomed order, in short, was rather observed as a rule than obeyed as a law; worn as a dress than borne as a burden; followed with free and willing heart in the spirit rather than the letter—as a law of liberty, not a yoke of bondage" (p. 600 sq.). We cite also the *Princeton Review* as follows: "As to stated forms of prayer, their value must vary with circumstances. In no case ought the liberty of extemporaneous prayer to be taken from the minister in the pulpit. As well might preaching be confined by authority to prescribed forms of words. The discretion of the ministry may be trusted as freely in the one as the other. But if, in the solemn office of leading the united devotions of the assembly, the ministry might exercise a judgment better informed by approved examples set forth for that end, and if it might even have an election between extemporaneous prayer and a form appointed to be used at option, the standard of extemporary prayer itself would rise, and

the edification of our people in public worship would be enlarged. We must not make our liberty a cloak of licentiousness. There are few of our most able and eminent ministers who come as near the true standard of pulpit prayer as they do that of the sermon. When we hear it said of such a man as Robert Hall that his prayers were felt by his hearers to be strikingly unequal to his sermons, we seem to discern in a mind keenly sensitive to the proprieties of pulpit prayer an aversion to making prayer the work of genius, and at the same time some lack of zeal in cultivating the peculiar talent for its just and most useful performance. But among our brethren of the lower grades of ability and industry we not infrequently observe habits in this service from which many of our sensible and pious people would gladly take refuge in a book of prayers. When we sometimes hear the intimation that the Book of Common Prayer, could it be quietly introduced, would be an improvement upon the present forms of devotion in many of our pulpits, we know this preference not to be for written prayers in general, but as an alternative and a way of escape from peculiar and unnecessary faults in prayers with which the observers are often afflicted. We cannot assent to such a remark, but we have a deep impression of the needless imperfection of our present standard, and desire to speak that impression with emphasis. We are confident that our standard may be so raised that all would feel the transition from extemporaneous to written prayers as a descent and a defection. When we observe the special satisfaction of thousands of devout worshippers with what appear to us the indefinite and comparatively barren forms of the English liturgy, we see the great power of a few striking points of propriety in public prayer to engage the heart of true devotion" (January, 1847, p. 81, 82).

The conclusion arrived at by Richard Watson (*Institutes*, ii, 507) is just and temperate, viz. that there are advantages in each mode of worship, and that, when combined prudently, the public service of the sanctuary has its most perfect constitution. Much, however, in the practice of churches is to be regulated by due respect to differences of opinion, and even to prejudice, on a point upon which we are left at liberty by the Scriptures, and which must therefore be ranked among things prudential. Here, as in many other things, Christians must give place to each other, and do all things "in charity."

Among the modern Protestant churches, the Church of England and the Protestant Episcopal Church use forms of prayer to the exclusion (generally) of free prayer in public worship. The Methodist Episcopal Church uses liturgical forms for sacraments and other services, and free prayer in worship. The Presbyterian churches use free prayer (*Directory of Worship*, ch. v). The Lutheran and Reformed churches have liturgical forms for certain services, but generally use free prayer in worship. A movement towards more full liturgical services has been going on for some time in the German Reformed Church. See GERMAN REFORMED CHURCH, and LITURGY. A tendency in the same direction appears to have arisen in the Presbyterian Church in the United States (see Shields, *Liturgia Expurgata*, Philadel. 1864; see also Baird, *Eutaxia, or the Presbyterian Liturgies*, N. York, 1855, 18mo; reprinted in London as *A Chapter on Liturgies*, edited by Thomas Binney, 1856, 18mo). In the Established Church of Scotland, Dr. Robert Lee, of Edinburgh, was tried before the General Assembly in 1859 for using a book entitled *Prayers for Public Worship* in the public services of Old Grayfriars' Church, Edinburgh; and the Assembly enjoined Dr. Lee to discontinue the practice. But the tendency went on; and in 1867 appeared *Enchological, or Book of Prayers, being Forms of Worship issued by the Church-service Society* (Edinb. and Lond. 1867), under the auspices of Dr. Lee and Dr. Macleod. See, besides the works al-

ready mentioned, Bingham, *Orig. Eccl.* bk. xiii; Palmer, *Origines Liturgicæ*; Leighton, *Works*, ii, 422; Milton, *Prose Works* (Philadel. 1850), i, 96 sq. (against forms); Shields, *The Book of Comm. Prayer as amended by the Westminster Divines A. D. 1661, with a historical and liturgical Treatise* (Philadelphia, 1867, 12mo); Brownell, *Family Prayer-book* (Introduction); Butler, *Common Prayer Illustrated*, ch. i; *Princeton Review*, vii, 389 sq.; xviii, 487 sq.; xxvii, 445 sq.; *Mercersburgh Review*, Jan. 1868, art. vii; *Evangelical Quarterly Review*, Jan. 1869, p. 80.

**Formularies**, a general name for the articles of religion, forms of service, etc., adopted by any particular church. See CREEDS; CONFESSIONS; LITURGY.

**Formula Concordiæ**. See CONCORD, FORMULA OF.

**Formula Consensus Helvetica**. See HELVETIC CONFESSIONS.

**Fornication** (ἡδονή, *taznuth'*, πορνεία, illicit sexual intercourse, especially of a married woman). See ADULTERY. From the Scriptures we learn that long before the time of Moses morals had become very much corrupted, and not only the prostitution of females, but of boys, was very common among many nations, and even made a part of the divine worship, as may be inferred from the Hebrew words *kadesh*, a prostitute boy, and *kedeshah*, the feminine of it, which words properly and originally mean a person religiously set apart and consecrated to the flagitious vice in question (Deut. xxiii, 18; 1 Kings xiv, 24; Job xxxvi, 14; Gen. xxxviii, 21, 22; Numb. xxi, 1; Deut. xxiii, 18; Hos. iv, 14). How great the corruption of manners with reference to the marriage relation was among the Egyptians appears from Herodotus (ii, 111) as well as the Bible. The wife of one of the oldest kings was untrue to him. It was a long time before a woman could be found who was faithful to her husband; and when one was at last found, the king took her without hesitation for himself. With impudent shamelessness Potiphar's wife seeks to seduce Joseph (Gen. xxxix, 7). The evidence of the monuments is also not very favorable to the Egyptian women. Thus they are represented as addicted to excess in drinking wine, as even becoming so much intoxicated as to be unable to stand or walk alone, or "to carry their liquor discreetly" (Wilkinson's *Egypt*, ii, 167). To prevent those evils to which the Greek and Roman philosophers refused to oppose any decided resistance, Moses made the following regulations: 1. That among the Hebrews no prostitute, either male nor female, should be tolerated; and that if the daughter of a priest especially were guilty of fornication, she should be stoned and her body burnt (Lev. xxi, 9); because these things, as Moses observes in Lev. xix, 29; Deut. xxiii, 17, 18, were a great abomination in the sight of God. Further, in order that priests of avaricious minds should not, in imitation of other nations, make crimes of this kind a part of the divine worship, he enacted, 2. That the price of prostitution, though presented in return for a vow, should not be received at the sanctuary (Deut. xxiii, 18). This law, it seems, was sometimes violated in the times of the kings (2 Kings xxiii, 7). He also enacted, 3. That the man who had seduced a female should marry her, and in case the father would not consent, should pay the customary dowry, viz. thirty shekels; in case violence had been offered, fifty shekels (Exod. xxii, 16; Deut. xxii, 23-29). This law appears to have originated in an ancient custom alluded to in Gen. xxxiv, 1-12. Finally, to secure the great object, he enacted, 4. That any one who, when married, was not found to be a virgin, as she professed before marriage, should be stoned before her father's house (Deut. xxii, 20, 21). These laws, it must be admitted, were severe; but prostitutes of both sexes, notwithstanding their severity, were set apart in the time of the kings for the service of idols (Prov. ii, 16-19;

7, 3-6; vii, 5-27; 1 Kings xiv, 24; xv, 12; Amos ii, 7; vii, 17; Jer. iii, 2; v, 7; John viii, 3-11). Among the Greeks and Romans of the apostles' day licentiousness was fearfully prevalent. See HARLOT.

In Scripture this word occurs more frequently in its symbolical than in its ordinary sense. In the Prophets woman is often made the symbol of the church or nation of the Jews, which is regarded as affianced to Jehovah by the covenant on Mount Sinai. In Ezek. xvi there is a long description of that people under the symbol of a female child, growing up to the stature of a woman, and then wedded to Jehovah by entering into covenant with him. Therefore, when the Israelites acted contrary to that covenant by forsaking God and following idols, they were very properly represented by the symbol of a harlot or adulteress offering herself to all comers (Isa. i, 2; Jer. ii, 20; Ezek. xvi; Hos. i, 2; iii, 11). Thus fornication, or adultery (which is fornication in a married state), became, and is used as the symbol of idolatry itself (Jer. iii, 8, 9; Ezek. xvi, 26, 29; xxiii, 37). See Wemyss's *Clavis Symb.* s. v. Woman. See IDOLATRY.

**Forjulian Manuscript** (*Codex Forjuliensis*), an important copy of the early Latin version of the Gospels at Triuli, published in part by Blanchini (*Evangel. Quadruplex*, append.). Mark's Gospel is partly at Venice in a state of decay, and partly at Prague, the last having been edited by Dobrowsky in 1778.—Scribner, *Introd.* p. 265; Tregelles, in Horne's *Introd.* iv, 254. See LATIN VERSIONS.

**Forskal, Peter**, a Swedish naturalist, was born at Smaland in 1736, and was educated at Göttingen. He devoted his life to natural science, travelled extensively, and died on an Eastern tour at Djerim, in Yemen, July 11, 1763. His name is mentioned here on account of his *Descriptiones Animalium, orium, amphibi-orum*, etc., *que in itinere orientali observavit P. Forskäl*, published after his death (Copenh. 1775, 4to); *Flora Egyptiaco-Arabica sive descriptiones plantarum*, etc. (ed. C. Niebuhr (Copenhagen. 1775, 4to); and *Icones vrum naturalium*, etc. (Copenhagen, 1776, 4to), which are of value for the natural history of Scripture.—Hoefler, *Nouv. Log. Générale*, xviii, 198.

**Forster, Bartholomæus**, a German Roman Catholic theologian, was born Aug. 12, 1753. He was ordained a secular priest in 1776, and went then to Altdorf. Here his opposition to the celibacy of the clergy, etc., brought him into trouble. He finally became professor of rhetoric and Greek literature in the Gymnasium of Landshut in 1803. Among his writings are *Entlarvter Aberglauben bei Reliquien, Bildern*, etc. (München, 1803);—*Von d. Interesse d. römischen Curie an Ablässen u. Brüderschäften* (Mün. 1803).—Herzog, *Real-Encyclop.* iv, 436.

**Forster, Johann**, an eminent German theologian and scholar, was born at Augsburg in 1495. He became professor of Hebrew at Zwicken, and assisted Luther in his translation of the Bible. In 1535 he was made pastor of St. Moritz at Augsburg by the influence of Luther. His zeal for the Lutheran doctrines often brought him into conflict with his colleagues at the university. He even attacked Blarer and (Ecolampadius. A visiting committee, sent from Stuttgart in 1540, laid the matter before the duke, who decided against Forster. The latter retired to Nuremberg, from whence he proceeded to Ratisbon, and in 1543 accepted a call to Schleusingen. He finally succeeded Cruciger as professor of theology in the University of Wittenberg. In 1554 he assisted Melancthon in the Osiandrian controversies, and died at Wittenberg Dec. 8, 1556. He wrote a Hebrew Lexicon, *Dictionarium Hebraicum Novum*, etc. (Basel, 1557, fol.), founded purely on the Hebrew of the Bible, and throwing out Rabbinical sources of information. His letters are of considerable importance for the history of that time.—Herzog, *Real-Encyclop.* iv, 436. There

is an elaborate article on Forster in the *Zeitschrift f. d. hist. Theologie*, 1869, p. 210 sq.

**Forster, Nathaniel**, a learned English divine, was born at Stadscombe, Devonshire, Feb. 3, 1717; educated at Corpus Christi, of which he became fellow in 1729; obtained a prebendal stall in the cathedral of Bristol and the vicarage of Rochdale in 1754. In 1757 he became preacher at the Rolls, and died Oct. 20 in that year. He wrote *Reflections on the high Antiquity of Government, Arts, and Sciences in Egypt* (Oxf. 1743, 8vo):—*A Dissertation on Josephus's Account of Jesus Christ* (Oxf. 1749):—*Bibliu Hebraica sine punctis* (1750, 2 vols. 4to):—*Papery destructive of the Evidences of Christianity* (Oxf. 1746).—*Biog. Britannica*, s. v.

**Forster, William**, a member of the Society of Friends, was born at Tottenham, England, in 1794. He was carefully trained by his parents, who were excellent "Friends," and at nineteen began to exercise his gifts as a "minister." Most of his life was devoted to missionary journeys through the British Islands, the Continent of Europe, and the United States, on his third visit to which, "with an antislavery address to the president and governors," he died in Tennessee, in the sixty-ninth year of his age. In the preceding year, 1852, he visited the Vaudois of Piedmont, and printed a large number of books and tracts in Italian for circulation. Everywhere he scattered blessings by word and deed, "leaving his mark for good on everything he set his hand to." His son, William E. Forster, is (1869) a member of the British Parliament, and an eminent Liberal in politics.—Seebohm, *Memoirs of William Forster* (London, 1865, 2 vols.); *Christian Remembrancer*, January, 1866, art. iv.

**Fort**, the rendering in the A. V. of the following Heb. words: מִצְדָּה, *metsal'* (so called as a place of *lying in wait*), a *castle*, esp. on a hill, Ezek. xxxiii, 27 (elsewhere usually "stronghold"); or fem. מִצְדָּה, *metsulah'*, a similar kind of fastness, e. g. the *citadel* of Zion, 2 Sam. v, 9 (elsewhere "fortress," etc.). מַצְוֵה, *maoz'* (so called from its *strength*), a *stronghold*, fortified by nature and art, Dan. xi, 19 (elsewhere usually "strength," etc.). דּוּקְלָה, *duykel'* (so called from *looking out*), a *watch-tower*, especially a scaling-tower in a siege, 2 Kings xxv, 1; Jer. lii, 4; Ezek. iv, 2; xvii, 17; xxi, 22; xxvi, 8. מִצְרָה, *metsarah'* (so called as being *compact*), a *fortification*, e. g. in the siege of a city; generally for defence ("fenced city," q. v.), but also for assault, Isa. xxix, 3. מִגְדָּל, *o'phel* (q. v.), a *mount* (so called from its tumulus form), Isa. xxxii, 14 (elsewhere "tower," "stronghold"). מִגְדָּל, *misgal'* (so called from its *height*), a *refuge* (as often rendered; also "tower," "defence"), Isa. xxv, 13. See FORTIFICATION.

**Fortia d'Urban**, Marquis of, was born Feb. 18, 1756, and died at Paris Aug. 4, 1843. After completing his studies at the Military School in Paris, he entered the army in 1773, but resigned his commission in 1779 to attend to an important suit in Rome before the papal court of appeals (the Rota), pending the decision of which he devoted himself to the study of the fine arts, antiquities, and mathematics. He was a prolific author, and wrote on a variety of subjects, of which we mention *Principes et Questions de Morale Naturelle* (Paris, new ed., 1834, 2 vols. 12mo):—*Direction pour la Conscience d'un roi* (Paris, 1821, 12mo):—*Chronologie de la vie de Jesus-Christ* (Paris, 1827, 8vo, and 1830, 12mo):—*Note sur la Genie du Christianisme* (Par. 1830, 8vo):—*Essai sur l'origine de l'écriture*, etc. (Paris, 1832, 8vo):—*Sur les trois systemes d'écriture de Egyptiens* (Paris, 1833, 12mo):—*Essai sur l'immortalité de l'âme et sur la resurrection* (Paris, 1835, 12mo):—*Discours prononcés au Cercle de Morale Universelle* (Paris, 1835-9, 12mo):—*Mémoires pour servir à l'histoire de l'introduction du Christianisme dans les Gaules* (Par.

1838, 8vo). He was also a collaborator in the *Chefs-d'Œuvres des Pères de l'Église* (Paris, 15 vols, 8vo), and the *Annales de la Philosophie Chrétienne*.—Hofer, *Nouv. Biog. Générale*, xviii, 217–221. (J. W. M.)

**Fortification.** The Hebrews had several terms which include the idea of military walls, and which are variously rendered in the Auth. Vers., as “fort,” “fortress,” “fenced city,” “castle,” “strong-hold,” “mound,” “trench,” etc., all of which see in their places.

Inventions for the defence of men in social life are older than history. The walls, towers, and gates represented on Egyptian monuments, though dating back to a period of fifteen centuries before the Christian era, bear evidence of an advanced state of fortifications—of walls built of squared stones, or of squared timber

judiciously placed on the summit of scarped rocks, or within the circumference of one or two wet ditches, and furnished along the top with regular battlements to protect the defenders (see Wilkinson, i, 407 sq.). All these are of later invention than the accumulation of unhewn or rudely-chipped uncemented stones, piled on each other in the form of walls, in the so-called Cyclopean, Pelasgian, Etruscan, and Celtic styles, where there are no ditches, or towers, or other gateways than mere openings occasionally left between the enormous blocks employed in the work. As the first three styles occur in Etruria they show the progressive advance of military architecture, and may be considered as more primitive, though perhaps posterior to the era when the progress of Israel, under the guidance of Joshua, expelled several Canaanitish tribes, whose system of civilization, in common with that of the rest of Western Asia, bore an Egyptian type, and whose

Ancient Assyrians attacking a Fort.

Ancient Egyptians attacking a Fort.

towers and battlements were remarkably high, or, rather, were erected in very elevated situations. When, therefore, the Israelites entered Palestine, we may assume that the “fenced cities” they had to attack were, according to their degree of antiquity, fortified with more or less of art, but all with huge stones in the lower walls, like the Etruscan. Indeed, Asia Minor, Armenia, Syria, and even Jerusalem, still bear marks of this most ancient system, notwithstanding that this region, the connecting link between Asia and

Africa, between the trade of the East and the West, and between the religious feelings of the whole earth, has been the common battle-field of all the great nations of antiquity, and of modern times, where ruin and desolation, oftentimes repeated, have been spread over every habitable place. Stones from six to fifty feet in length, with suitable proportions, can still be detected in many walls of the cities of those regions, wherever quarries existed; from Nineveh, where, beneath the surface, there still remain ruins and walls of huge stones, sculptured with bas-reliefs, originally painted, to Babylon, and Bassorah, where bricks, sundried or baked, and stamped with letters, are yet found, as well as in all the plains of the rivers where that material alone could be easily procured. See ARCHITECTURE.

As among the Hebrews there was no system of construction strictly so called, but simply an application of the means of defence to the localities, no uniformity of adaptation existed, and therefore we refer to the foregoing as specimens of the numerous illustrations of this subject that occur on the Egyptian and Assyrian monuments, and to other explanations which are given under the several terms in other parts of this work. See also CITY; SIEGE; WAR, etc.

The wall, חֹמָה, *chomah*, was sometimes double or triple (2 Chron. xxxii, 5), successively girding a rocky elevation; and “building a city” originally meant the construction of the wall. See WALL. Before wall-towers, מִגְדָּלוֹת, *migdaloth*, were introduced, the gate of a city, originally single, formed a kind of citadel, and was the strongest part of all the defences: it was the armory of the community, and the council-house of the authorities. “Sitting in the gate” was, and still is, synonymous with the possession of power, and even now there is commonly in the fortified gate of a royal palace in the East, on the floor above the doorway, a council-room with a kind of balcony, whence the sovereign sometimes sees his people, and where he may sit in judgment. Hence the Turkish government is not unfrequently termed *the Porte*, and in this sense allusion to gates often occurs in the Scriptures. The tower, טֵרֵיִךְ, *teri'ach*, was another fortification of the earliest date, being often the citadel or last retreat when a city was taken; or, standing alone in some naturally strong position, was intended to protect a frontier, command a pass, or to be a place of refuge and deposit of treasure in the mountains, when the plain should be no longer defensible. This was the kind of citadel which defended passes, and in the mountains served for retreat in times of calamity, and for the security of the royal treasures; and it was on account of the confined space within, and the great elevation of the ramparts, that private houses frequently stood upon their summit, as was the case when the harlot Rahab received Joshua's spies in Jericho (Josh. ii, 1). Watch-towers, מִצְפָּה, *mizpah*, and טֵרֵיִךְ, *tu-*

*rah'*, used by shepherds all over Asia, and even now built on eminences above some city in the plain, in order to keep a look-out upon the distant country, were already in use, and occasionally converted into places of defence (2 Chron. xxvi, 10; xxvii, 4). See TOWER. The gateways were closed by ponderous folding-doors, שַׁא'ר, *shu'ar*, the valves or folds, דַּלְתָּיִם, *delutha'yim*, being secured by wooden bars: both the doors and bars were in after times plated with metal. See GATE. A ditch (שֶׁלַח, *cheyl*), where the nature of the locality required it, was dug in front of the rampart, and sometimes there was an inner wall, with a second ditch before it. See DITCH. As the experience of ages increased, huge "counter forts," double buttresses, or masses of solid stone and masonry (not bulwarks), were built in particular parts to sustain the outer wall, and afford space on the summit to place military engines (2 Chron. xxvi, 15).—Kitto, s. v. See FENCED CITY; MUNITION.

Modern Persian Fort.

**Fortress**, the rendering in the A. V. of the following Hebrew terms: מַצְוֵר, *matzor'* (from its *intrenchment*), *fortification*, Jer. x, 17 (elsewhere "bulwark," "fenced city," etc.). מִצְדָּה, *mitsudah'* (from its *security*), a *castle*, espec. poet., 2 Sam. xvii, 2; Psa. xviii, 2, 3; lxxi, 3; xci, 3; cxliv, 2 (elsewhere usually "stronghold"). מִבְּצָר, *mitsbar'* (as being *inaccessible*), a *fortified place*, Isa. xviii, 3; xxv, 12; xxxiv, 13; Hos. x, 14; Amos v, 9 (elsewhere "fenced city" [q. v.], "stronghold," etc.). מַצְוֵז, *maoz'* (from its *strength*), a *stronghold*, Jer. xvi, 19; Dan. xi, 7, 10 (elsewhere "strength," etc.). See FORTIFICATION.

**Fortunatianus**, bishop of Aquileia, was of African origin, and an active participant in the strifes which agitated the Church in the 4th century. At the Council of Milan, A. D. 355, he joined in the condemnation of Athanasius, but after 357 we hear no more of him. He wrote commentaries on the Gospels, characterized by Jerome as useful, though incorrect in style.—Hoefer, *Nouv. Biog. Générale*, xviii, 232; Ceillier, *Histoire des Auteurs Ecclésiastiques*, t. vi, p. 11. (J. W. M.)

**Fortuna'tus** (Græcized Φορτοσύνατος), a disciple of Corinth, of Roman birth or origin, as his name indicates, who visited Paul at Ephesus, and returned, along with Stephanus and Achaicus, in charge of that apostle's first Epistle to the Corinthian Church (1 Cor. xvi, 17), A. D. 54. Some have supposed that these three Corinthian brethren were "they which are of the house of Chloe" (οἱ Κλωῆ), alluded to in 1 Cor. i, 11; but the language of irony, in which the apostle must in that case be interpreted in ch. xvi as speaking of their presence, would become sarcasm too cutting for so tender a heart as Paul's to have uttered among his valedictions. "The household of Stephanus" is mentioned in chap. i, 16 as having been baptized by Paul himself: perhaps Fortunatus and Achaicus may have been members of that household. There is a Fortunatus mentioned at the end of Clement's first Epistle to the Corinthians, who was possibly the same person.—Kitto, s. v.; Smith, s. v.

**Fortunatus, Venantius, Honorius Clemen-**

**tianus**, bishop of Poitiers, and a Latin poet, was born about A. D. 530, near Treviso, in Italy. He studied grammar, rhetoric, literature, and law, and became so distinguished as an orator as to receive the surname of "Scholasticissimus." From Italy he came to France, where he acquired great reputation as a poet, and was received with favor at the court of Sigebert, king of Austrasia, in honor of whose marriage with Brunhilde (566) he wrote one of his poems. Having gone to Poitiers, he became preacher and confessor of the convent to which the former queen Radegunde and her sister had retired. Here he continued his philosophical and theological studies with great ardor, and became connected with Gregory of Tours (q. v.) and other dignitaries of the Church. He was appointed bishop of Poitiers in 599, but died soon after, probably about 609. He wrote eleven books of poetry on divers subjects; hymns, many of which have been used by the Church; epistles to different bishops, especially to Gregory of Tours; stories dedicated to his protectors, Radegunde and Agnes, which have given rise to an unfounded accusation of improper intimacy between them; the life of St. Martin; an explanation of the Lord's prayer, etc. He was the first to use rhyme with a certain degree of mastery, though with considerable license; he also mastered the trochaic tetrameter. His best known hymns are *Vexilla Regis prodeunt*, and *Pange Lingua Gloriosi*, which are incorporated into the Roman breviary. They may be found in Daniel, *Thesaurus Hymnologicus*, i, 160 sq., and are given, with Neale's translations, by Schaff, *History of the Christian Church*, iii, 596 sq., and in Schaff, *Christ in Song* (New York, 1869). A *Commentary on the Athanasian Creed* is attributed to him; Waterland vindicates his authorship of it (*Works*, Oxford, 1843, iii, 134 sq.), but Lucchi and other critics deny it. Muratori conjectured (without adequate ground) that Fortunatus was the author of the Athanasian Creed itself. His writings were collected by Brower, *Opera Omnia*; published also in *Bibl. Mar. Patrum* (1677). The best edition is that of Lucchi (Rome, 1786-7, 2 vols. 4to; reproduced in Migne, *Patrologia Latina*, vols. lxxii and lxxviii). A full account of the writings of Fortunatus is given in Ceillier, *Auteurs Sacrés* (Paris, 1862), xi, 402 sq. See also Hoefer, *Nouv. Biog. Générale*, xviii, 227-31.

**Fosbroolke**, THOMAS DUDLEY, a distinguished archæologist, was born in London May 27, 1770. He was educated at St. Paul's School, and elected scholar at Pembroke College, Oxford, in 1785. In 1794 he became curate of Horsley; in 1810, curate of Walford; in 1830, vicar of Walford. He died January 1, 1842. His archæological writings are very valuable. His works are *British Monachism: Manners and Customs of Monks and Nuns in England* (Lond. new ed. 1843, imp. 8vo);—*Encyclopædia of Antiquities, Classical and Medieval* (new ed. Lond. 1843, 2 vols. imp. 8vo);—*Arts, Manufactures, etc. of the Greeks and Romans* (London, 1833-5, 2 vols. fcp. 8vo). A memoir of his life is prefixed to the *British Monachism*.

**Fossors, Fossorii.** See COPATE.

**Foster, Benjamin, D. D.**, a Baptist preacher and author, was born at Danvers, Mass., June 12, 1750, and graduated at Yale College in 1774. Near the close of his college course, having been appointed to take part in a discussion of the subject of baptism on the Pedobaptist side, his investigations made him a convert to Baptist views. He pursued his studies in theology under the Rev. Dr. Stillman, of Boston, and was ordained pastor of a church in Leicester, Mass., in 1776. He was afterwards pastor successively at Newport, R. I., and at New York. During the prevalence of yellow fever in 1798 he declined to seek immunity from it by leaving his post of duty, and died from exposure to the pestilence. He was a diligent and zealous preacher, a devoted pastor, and respecta-

ble scholar. He was the author of, 1. *The Washing of Regeneration, or the Divine Right of Immersion*:—2. *Primitive Baptism defined*:—3. *A Dissertation on the Seventy Weeks of Daniel* (Newport, 1787). (L. E. S.)

**Foster, James, D.D.**, an eminent Nonconformist divine, was born at Exeter in 1697. He began preaching as an Independent in 1718. In 1724 he became a Baptist, succeeding the eminent Gale. His eloquence gained for him enthusiastic popularity. Pope, Savage, and Bolingbroke were among his eulogists. But, with all his personal virtues and popular talents, "he neither professed nor possessed much zeal for the essential doctrines of Christianity." He published *Sermons* (Lond. 1745, 4th ed. 8vo):—*Discourses on Natural Religion and the Social Virtues* (Lond. 1749); and an *Essay on Fundamentals*, especially the doctrine of the Trinity. His most important work, and that by which he is best known, is his *Defence of the Usefulness, Truth, and Excellency of the Christian Religion*, written against Tyndale (Lond. 1734, 3d ed. 8vo). He died in 1753. (L. E. S.)

**Foster, John**, the celebrated essayist, was born at Halifax, Yorkshire, Sept. 17, 1770. In early life he was set to the trade of a weaver. At the age of seventeen, having joined a Baptist church, he entered the Baptist College at Bristol. On the completion of his studies he began preaching at Newcastle-on-Tyne. Being somewhat unsettled in his doctrinal views, he sought a connection with the "General Baptists," and made an unsuccessful attempt to establish himself at Dublin. Returning to England, he labored successively at Chichester, Frome, and Downend. His moderate success as a preacher was in striking contrast with his unquestioned intellectual power and his literary reputation. While residing at Downend he produced the *Essays* which have won a permanent place in English literature. Becoming disabled for labor in the pulpit, he removed to Stapleton, near Bristol, and gave himself wholly to literary pursuits. For thirteen years he was a principal contributor to the *Eclectic Review*. In 1819 he published his essay *On the Evils of Popular Ignorance*, which he esteemed his best production, though it has never attained to the popularity of the essay *On Decision of Character*. His contributions to the *Eclectic Review* were published in 1840, in two volumes. A volume selected from these has been published in this country. He died in 1843. Since his death have appeared *Lectures delivered at Broadmead Chapel, Bristol* (2 vols.), a discourse on *Missions*, an essay *On the Importance of Religion*, written as an introduction to Doddridge's *Rise and Progress*, and an unfinished essay *On the Improvement of Time*. His *Life and Correspondence*, edited by J. E. Ryland (1846), is a work of great interest (republished in Boston). A letter written late in life, and then first published, disclosed the fact, before unsuspected, that he had renounced the doctrine of the eternity of future punishment. His writings are marked by strong, original, often sombre thought, stimulating to the best principles and purposes. (L. E. S.)

**Fothergill, Samuel**, an eminent and highly respected Quaker preacher, travelled and preached in many parts of England, Scotland, Ireland, and North America, and died in 1773. He wrote *Remarks on an Address to the People called Quakers*, etc. (1761, 8vo):—*Reply to E. Owen on Water Baptism* (1763, 8vo):—*Letters* (1816).—Allibone, *Dictionary of Authors*, s. v.; Rose, vii, 423. (J. W. M.)

**Foucher, Paul**, a learned French abbot, was born at Tours in 1704, and died at Paris in 1778. He studied theology at the Sorbonne, but showed more fondness for the ancient languages. His chief work, *Traité historique de la Religion des Perses*, inserted in the Memoirs of the Academy of Inscriptions (tom. xxv, xxvii, xxix, xxxi, xxxix; German translation by Kleuker,

Riga, 1781–3, 2 vols. 4to), combats the opinion of Hyde that the Persians had preserved natural religion and the worship of the true God. A supplement, after the appearance of Du Perron's *Zend Avesta*, retracts many of his previous opinions. His next most important work, *Récherches sur l'Origine et la Nature de la Religion des Grecs*, also inserted in the Memoirs of the Academy, considers the gods of the Greek and Roman pantheon as only deified men, and claims a historical basis for their myths.—Hoefer, *Nouv. Biog. Génér.* xviii, 284, 285. (J. W. M.)

**Foucher de Chartres.** See FULCHERIUS.

**Foulis, Henry**, was born about 1638, and died in 1685. He pursued his studies at Oxford, was ordained for the ministry, but devoted himself to history. We have from him, *History of the wicked Plots and Conspiracies of our pretended Saints*, etc. (Lond. 1662, and Oxford, 1674, fol.):—*History of the Romish Treasons and Usurpations*, etc. (Oxford, 1671, fol.); and, according to Watt, *Cubala, or the History of the Conventicle Uncased* (1664, 4to):—*Sermons*, etc.—Allibone, *Dict. of Authors*, s. v.; Wood, *Athen. Oxon.* (J. W. M.)

**Foulques de Neuilly.** See FULCO.

**Foundling Hospitals** are institutions for the reception and care of children, especially illegitimate ones, abandoned by their parents. They owe their origin, it is said, to the desire of preventing infanticide and the exposure of children. Among the ancient Greeks and Romans, infanticide and abortion not only prevailed to a fearful extent, but were tolerated, nay, in certain cases, even sanctioned by the laws and by the opinions of philosophers (see Plato, *De Repub.* v, 460, C.; Aristotle, *Polit.* vii, 16; Livy, *Hist.* xxvii, 37; Cicero, *De Leg.* iii, 8, al.). The exposure of children was a still more prevalent custom, commending itself, we may suppose, to the natural feelings of the parents as less cruel than infanticide, since it promised a chance, at least, of saving life. The foundling became the slave of the individual or community at whose expense it was cared for and educated. To facilitate the finding of exposed infants, places of public resort were chosen for the exposure, such as market-places, temples, road-crossings, wells, etc. In Athens the *gynostarges*, and in Rome the *columna lactaria*, were usually selected for this purpose. Frequently tokens (*crepundia*), as rings or other costly ornaments, or, in the case of poor parents, trinkets of small value, were deposited with the child, for the purpose of inducing some one to receive it, or as a means of identifying the child, should its parents afterwards wish to recover it. Gibbon, treating of the limitations of paternal authority in his chapter on Roman jurisprudence (*Hist.* iv, 344, N. Y. 1852), says: "The exposition of children was the prevailing and stubborn vice of antiquity; it was sometimes prescribed, often permitted, almost always practised with impunity by nations who never entertained the Roman ideas of paternal power; and the dramatic poets, who appeal to the human heart, represent with indifference a popular custom which was palliated by the motives of economy and compassion." As some relief to the dark shading of this picture, and yet a proof of its correctness, we may instance the praise which Strabo (lib. xvii) bestows on the Egyptians, and Ælian (*Varie Historie*, ii, 7) on the Bœotian Thebes, because their laws and customs forbade the killing or exposure of children; as also the statement of Tacitus (*De Mor. Germ.* 19), that the Germans reckoned infanticide a crime. It is said, however, that they exposed children before the introduction of Christianity among them.

Though the laws of Moses contained no express provisions on this subject, the Jews rightly interpreted their spirit as forbidding this unnatural conduct (see Tacitus, *Hist.* v, 5; Josephus, *Contra Apion*, ii, 24; Philo Judeus, *De Legib. Special.* ad præcept. 6 et 7).

The teachings of Christianity, by causing infanticide and child-exposure to be regarded as sins, gradually wrought a change in the laws and customs in regard to them, though the first Christian emperors did not venture to forbid exposure as a crime. Constantine, however, termed it a sort of murder, and, prompted perhaps by the humane Lactantius, sought in his decrees, A. D. 315, 322, 331, to prevent the murder, sale, giving in pawn or exposure of children, by making provision out of the public treasury for those whose parents were too poor to support them (*Codex Theodos.* lib. xi, tit. 27), and by depriving parents of the hope of recovering exposed children, or making good the expenses incurred by those who had received and maintained them (*Codex Theodos.* lib. v, tit. 7, *De Expositis*. l. i, p. 487, ed. Kitter). The cruel custom was, however, not entirely prohibited until the latter half of the 4th century, when, under Valentinian and his colleagues, such murders were brought "within the letter and spirit of the Cornelian law" (*Codex Justin.* lib. iv, tit. 52). A further advance of opinion in the right direction was indicated by a special law of Justinian, A. D. 529, which forbade the enslavement of foundlings (*Codex Justin.* lib. viii, tit. *De Infant. Expos.* l. iii).

Some suppose that foundling hospitals, or institutions of a similar character, were, at a very early period, established at or near the *columna lactaria* at Rome and the *gynasarges* at Athens, mentioned above as places of exposure. The Justinian Codes, by the term *brephotrophium* (*Βρεφοτροφίον*), mentioned in connection with, but as distinct from, other institutions (for the relief of strangers, the poor, orphans, etc.), appear to refer to hospitals for foundlings. An establishment of the kind is said to have been founded at Treves in the 6th or 7th century. The Capitularies of Charlemagne employ the Justinian term *brephotrophia* apparently with reference to foundling hospitals, though the Franks at that time regarded foundlings as the property of those who should receive and educate them. The earliest foundling hospital concerning which we have any authentic information was that founded at Milan, A. D. 787, by Datheus, a priest, because of the prevalence of infanticide. If the child had not been baptized, salt was strewed between its swaddling-clothes before bringing it to the hospital to denote that fact. The children were suckled by hired nurses, supplied with necessaries, taught some handicraft, and at seven years of age discharged as freeborn. In 1070 Oliver de la Trau founded at Montpellier the order of the *Hospitularii Sancti Spiritus*, one of whose vows was to provide for the maintenance and education of foundlings. Since that time hospitals for foundlings have been gradually established in most European, and Spanish, and Portuguese-American states, to the most important of which only we have space to refer. Attached to the hospital of the *Spirito Santo* in Rome is one for foundlings, with accommodations for 3000 children; the number annually received is about 800, some of whom are sent to the country to be nursed; the mortality in the hospital was (1859) 57 per cent., and still greater in the country. The *Spedale degli Innocenti* at Florence was founded in 1316; here special means are taken to identify each child by securely fastening a leaden badge, stamped with a certain number, around the neck. The use of tokens of some sort, attached to the person or clothing of the child, for the purpose of identification, is not uncommon in the history of other hospitals. There are many other foundling hospitals in Italy to provide for the numerous foundlings, for whom it is stated that Naples makes the best provision (1859). The *Hospice des Enfants Trouvés* at Paris was founded in 1610 by Vincent de Paul. In this, as well as many others in France, in order to secure secrecy in depositing the child, a turning-box (*tour*) is provided, in which the child is placed, and a bell rung for its re-

moval without the person who brought it being seen. A decree in 1811 ordered that such *lozes* should be provided for all the French foundling hospitals, but, owing to a conviction that the great increase in the number of foundlings since that time was due largely to the *tours*, they were retained in 1856 in only 65 of the 141 hospitals then existing in France. In 1856 the number of foundlings in France was estimated at 120,000 under 12 years of age, when the administrative control ceases; and 60,000 to 70,000 between the ages of 12 and 21. The proportion of foundlings to population was 1 to 353; to births, 1 to 39; the annual number, 25,000 to 30,000, of whom nine tenths were illegitimate. The average life of the foundlings was only 4 years; the mortality 52 per cent. the first year, and 78 per cent. up to 12 years; while the general average for the community was only 50 per cent. up to 21 years. The male foundlings constituted 15 per cent. of the convicts and prisoners, and the female one fifth of the prostitutes in that country. Foundling hospitals are numerous in Belgium, where the number of abandoned children was estimated in 1859 to be 1 to 18 births. In 1826 there were only two foundling hospitals in Holland; that of Amsterdam receives about 3000 children annually. There is a well-managed one in Vienna, founded in 1784 by Joseph II, and others in the chief cities of the Austrian empire, but the system of maintaining such institutions is said to be no longer regarded with favor in Germany. In Spain the number may be reckoned at 60 to 70, with some 13,000 foundlings, with larger proportional numbers for Portugal. The great hospitals of Moscow and St. Petersburg are said to be well managed under strict governmental supervision, to which annually great numbers of children are sent from various parts of the Russian empire, very many of which die on the way. The children are, it is said, carefully educated, those of superior promise specially so; and many of them become useful, the females as governesses, teachers, etc., and the males as engineers and mechanics. Recruits for the army and navy are also supplied from these hospitals. Foundling hospitals are numerous in Sweden, where the average of illegitimate births is said to be large, 1 to 11 in the country, and 1 to 2 in Stockholm. Norway has fewer, and also a less proportion of illegitimate children. The foundling hospital in London was established in 1739 through the efforts of captain Thomas Coram, but not opened fully until 1756, from which time to 1760, 4 years, 14,934 children were received into it, but only 4400 lived to be apprenticed, or 30 per cent. In view of this frightful mortality, and the abuses in the matter of admission, and the difficulty of correcting them or adequately providing against their recurrence, Parliament withdrew its grant of public funds, and the institution "ceased to be a receptacle for foundlings," and was made a hospital for poor illegitimate children whose mothers are known, and children of soldiers and sailors killed in the service of their country. One was also established in Dublin in 1730, in which the mortality is said to have been even greater than in London. The average yearly admissions from 1805-1825 were about 2000. A foundling hospital has been established in Canton, but had not, up to 1859, much influence in preventing infanticide. The most important ones in America are those in the city of Mexico and Rio Janeiro. There are no foundling hospitals in the United States where provision is made for foundlings in common with other objects of public or private charity, and the number of such children is comparatively small. Whether such institutions may or may not have proved beneficial under the conditions of ancient or mediæval society, we cannot at this day determine, but the trial of them as parts of the systems of the charitable and philanthropic agencies of modern times, either as controlled and supported in whole or part by the state, or as left to the care and direction of private benevolence, presents re-

sults, we think, contrary to the expectations of their founders; and the general tendency of opinion, especially in Protestant countries, is against their usefulness as means for the attainment of the desired ends. Granting that they may have some effect in diminishing the frequency of direct infanticide (which, however, their statistics do not prove), they certainly tend to increase the number of children abandoned by their parents, while the frightful mortality connected with them would seem to demonstrate that there can be no actual saving of human life through such establishments. We believe that vastly more children have prematurely died from causes inseparably connected with their transmission to and treatment in these hospitals than would have been destroyed outright by the parents from the same motives. Statistics seem clearly to show that they tend to foster licentiousness, increase the number of illegitimate births, and relax morals. In reviewing all the facts, the language of the author of the article Medical Jurisprudence, in the *Encyclop. Britannica*, xiv, 444, 8th ed.), seems hardly too strong: "Foundling hospitals, from the mortality in them, even under the best management, seem to be amongst the most pestilential institutions of mistaken benevolence."—*New Amer. Cyclop.* vii, 634-640; Beckmann, *History of Inventions*, ii, 434-449 (Bohn's ed.); Cassel's *Magazine*, i, 123-4; Knight, *Popular History of England*, vii, 118-19; Chambers, *Encyclopaedia*, s. v.; *Encyclop. Britannica*, s. v.; Guerry, *Statistique Morale de la France*; Benoiston de Châteaufort, *Considérations sur les Enfants-trouvés dans les principaux états de l'Europe.* (J. W. M.)

**Fountain**, the rendering in the A. V. of the following Hebrew terms: 1. Properly and usually  $\text{עַיִן}$ , *ayin* (lit. the eye), so called from *flowing* (Gesenius, *Thes. Heb.* p. 1017), a natural source of *living* water. See EN-. 2. Likewise  $\text{מַיְוֹן}$ , *mayon'* (from the same root), a well-watered place (Psa. lxxxiv, 6, "well"); also a single *spring* (as rendered in Psa. lxxxvii, 7; civ, 10) of running water (Lev. xi, 36; Josh. xv, 9; 1 Kings xviii, 5; 2 Chron. xxxii, 4; Psa. lxxxv, 15; cxiv, 8; Prov. v, 16; viii, 24; xxv, 26; Cant. iv, 12, 15; Isa. xli, 18; Hos. xiii, 15; Joel iii, 18); spoken of the tide or influx of the sea (Gen. vii, 11; viii, 2). Its force and meaning are unfortunately sometimes obscured by the rendering in the A. V., "well," as in Exod. xv, 27; in Elmer "were twelve wells of water;" that is, not artificial wells, but *natural fountains*, as still seen in wady Ghurundel (Bartlett's *Forty Days in the Desert*, p. 43). These two words, on the contrary, like the corresponding Greek  $\pi\eta\eta\eta$ , always denote a stream of "living" or constantly-running water, in opposition to standing or stagnant pools, whether it issues immediately from the ground or from the bottom of a well. See AIN. 3.  $\text{מַבְּבֹּא}$ , *mabbu'a* (so called from *gushing* or bubbling forth), a native rill (fig. of the vital flow, Eccl. xii, 6; elsewhere literally a "spring" in general, Isa. xxxv, 7; xlix, 10). 4.  $\text{מַקּוֹר}$ , *makor'* (so called from having been opened by *digging*), an artificial source of flowing water, used both literally and figuratively, but mostly in such phrases as "fountain of life" (Prov. xiii, 14), "fountain of wisdom" (xviii, 4), etc.; occasionally rendered "spring," "well," etc. 5. Improperly  $\text{בֹּר}$ , *bor*, or  $\text{בְּאֵר}$ , *ba'yr* (Jer. vi, 7), which designates only a *pit* or standing water. See WELL. The idea of a fountain is also implied in the phrase  $\text{מֹצֵא מַ'יִם}$ , *motsa' ma'yim*, or *going forth of waters* ("spring," 2 Kings ii, 21; Psa. cvii, 33, 35; Isa. xli, 18; lviii, 11; "course," 2 Chron. xxxii, 30); as likewise in  $\text{גֹּל}$ , *gal* (from its *rolling* down the water), or  $\text{גֻּלְלֵה}$ , *gullah'*, a *purling stream* or overflowing fountain ("spring," Cant. iv, 12; Josh. xv, 19; Judg. i, 15). See TOPOGRAPHICAL TERMS.

Among the attractive features presented by the

Land of Promise to the nation migrating from Egypt by way of the desert, none would be more striking than the natural gush of waters from the ground. Instead of watering his field or garden, as in Egypt, "with his foot" (Shaw, *Travels*, p. 408), the Hebrew cultivator was taught to look forward to a land "drinking water of the rain of heaven, a land of brooks of water, of fountains and depths springing from valleys and hills" (Deut. viii, 7; xi, 11). In the desert of Sinai, "the few living, perhaps perennial springs," by the fact of their rarity, assume an importance hardly to be understood in moister climates, and more than justify a poetical expression of national rejoicing over the discovery of one (Numb. xxi, 17). But the springs of Palestine, though short-lived, are remarkable for their abundance and beauty, especially those which fall into the Jordan and its lakes throughout its whole course (Stanley, *Palest.* p. 17, 122, 123, 295, 373, 509; Burckhardt, *Syria*, p. 344). The spring or fountain of living water, the "eye" of the landscape (see No. 1), is distinguished in all Oriental languages from the artificially sunk and enclosed well (Stanley, p. 509). Its importance is implied by the number of topographical names compounded with En or (Arab.) *Ain*: En-gedi, *Ain-july*, "spring of the gazelle," may serve as a striking instance (1 Sam. xxiii, 29; see Reland, p. 763; Robinson, i, 504; Stanley, App. § 50). Fountains are much more rare on the eastern side of the Jordan than on the western. There are a few among the mountains of Gilead; but in the great plateaus of Moab on the south, and Bashan on the north, they are almost unknown. This arises in part from the physical structure of the country, and in part from the dryness of the climate. Huge cisterns and tanks were constructed to supply the want of fountains. See CISTERN. Some of the fountains of Palestine are of great size. All the perennial rivers and streams in the country have their sources in fountains, and draw comparatively little strength from surface water. Such are the fountains of the Jordan at Dan and Banias; of the Abana at Fijeh and Zebedany; of the Leontes at Chalcis and Baalbek; of the Orontes at Ain and Lebweh; of the Adonis at Afka, etc. Palestine is a country of mountains and hills, and it abounds in fountains of lesser note. The murmur of their waters is heard in every dell, and the luxuriant foliage which surrounds them is seen on every plain. For a good classification of these natural springs, see Robinson's *Physical Geog. of Palestine*, p. 238 sq.; and for descriptions of many of them, see Tristram's *Land of Israel*, and Sepp's *Heilige Land*.

Advantage was taken of these fountains to supply some of the great cities of Palestine with water. Hence, in Oriental cities generally, public fountains are frequent (Poole, *Englishw. in Eg.* i, 180). Perhaps the most remarkable works of this kind are at Tyre, where

Fountain near Beyrut.

several copious springs were surrounded with massive walls, so as to raise the water to a sufficient height. Aqueducts, supported on arches, then conveyed it to the city (Porter, *Handb. for Syria and Pal.* p. 142, 555, 390). One of less extent conveyed an abundant supply to Damascus from the great fountain at Fijeh. Hence no Eastern city is so well supplied with water as Damascus (*Aqueduct Trav.* p. 291). At Beyrut there is an ancient aqueduct that brings water from a source at least twenty miles distant, and two thousand feet above the level of the sea (Thomson, *Land and Book*, i, 48). An aqueduct some ten miles in length brought water to Jerusalem from a fountain near Solomon's Pools by subterranean channels. In these may perhaps be found the "sealed fountain" of Cant. iv, 12 (Hasselquist, p. 145; Maundrell, *Early Trav.* p. 457). Traces of fountains at Jerusalem may probably be found in the names En-Rogel (2 Sam. xvii, 17), the "Dragon-well" or fountain, and the "gate of the fountain" (Neh. ii, 13, 14). But Jerusalem, though mainly dependent for its supply of water upon its rain-water cisterns, appears from recent inquiries to have possessed either more than one perennial spring, or one issuing by more than one outlet (see Robinson, i, 343, 345; Williams, *Holy City*, ii, 458, 468; comp. Ezek. xlvi, 1, 12). With this agrees the "fons perennis aque" of Tacitus (*Hist.* v, 12), and the *ὕδρων ἀνικελευπτος σύστασις* of Aristeus (Josephus, ii, 112, edit. Havercamp; compare Raumer, p. 298; Kitto, *Physical Geogr.* p. 412, 415). See JERUSALEM. In the towers built by Herod, Josephus says there were cisterns with *χαλκοσφγήματα* through which water was poured forth (*War*, v, 4, 4); these may have been statues or figures containing spouts for water after Roman models (Plin. *Epist.* v, 6; *Hist. Nat.* xxxvi, 15, 121). The fountain of Nazareth bears a traditional antiquity, to which it has probably good derivative, if not actual claim (Roberts, *Views in Palestine*, i, 21, 29, 33; Fisher, *Views in Syria*, i, 31; iii, 44). See NAZARETH.

Fountain at Nazareth.

The volcanic agency which has operated so powerfully in Palestine has from very early times given tokens of its working in the warm springs which are found near the Sea of Galilee and the Dead Sea. These have been famous from time immemorial for their medicinal properties (Pliny, *Hist. Nat.* v, 15; Lightfoot, *Opp.* ii, 224). They are confined to the volcanic valley of the Jordan, and all are strongly impregnated with sulphur. The temperature of that of Tiberias is 144° Fahr. (Porter, *Handbook for Syr. and Pal.* p. 311, 320, 423). One of the most celebrated of these was Callirrhœe, mentioned by Josephus as a place resorted to by Herod in his last illness (*War*, i, 33, 5; Kitto, *Phys. Geogr. of Pal.* p. 120, 121; Stanley, p. 285). His son Philip built the town, which he named Tiberias (the Hamath of Josh. xix, 35), at the sulphureous

hot springs on the south of the Sea of Galilee (Joseph. *Ant.* xviii, 2, 3; Hasselquist, *Travels*, App. p. 283; Kitto, p. 114; Burckhardt, *Syria*, p. 328, 330). Other hot springs are found at seven miles' distance from Tiberias, and at Omkeis or Amathe, near Gadara (Reland, p. 775; Burckhardt, p. 276, 277; Kitto, p. 116, 118). See CALLIRHŒE.

From the value of such supplies of water in arid countries, fountains figure much in the poetry of the East as the natural images of perennial blessings of various kinds. In the Scriptures fountains are made the symbols of refreshment to the weary, and also denote the perpetuity and inexhaustible nature of the spiritual comforts which God imparts to his people, whether by the influences of the Spirit, or through the ordinances of public worship. There are also various texts in which children, or an extended posterity, are, by a beautifully-apt image, described as a fountain, and the father or progenitor as the source or spring from which that fountain flows (Deut. xxxiii, 28; Psa. lxxviii, 26; Prov. v, 16, 18; xiii, 14, etc.). See WEMYSS, *Symbol. Dict.* s. v. — Kitto, s. v.; Smith, s. v. See WATER.

The FOUNTAIN-GATE (שַׁרְיָר הַחַ'אֲיִינִי, *sha'ar ha-'Ayin*; Sept. πύλη τοῦ Ἄιου or αἰνῶν, Vulg. *porta fontis*; A. V. "gate of the fountain") at Jerusalem was in the first or old wall, along the Valley of Hinnom, south of the Dung-gate, and adjoining the Pool of Siloam (from which it doubtless derived its name), at the mouth of the Tyropœon (Strong's *Harm. and Expos.* Append. p. 11). See JERUSALEM.

**Fouqueré, DOM ANTOINE-MICHEL**, a learned Benedictine of the Congregation of St. Maur, was born at Châteauroux in 1641, and died at Meaux Nov. 3, 1709. He was made teacher of rhetoric in the monastery of St. Pierre de Mauriac, where he acquired the reputation of being an excellent professor, especially of Greek. In 1678 he was appointed superior of his convent, and held the post for fifteen years, after which he retired to the abbey of St. Faron at Meaux, where he died. His works are, (1) a Latin translation of a work of Dionysius, patriarch of Constantinople, on points of controversy between the Calvinists and Roman Catholics, published, together with original text, under the title of *Dionysii patriarche Constantinopolitani super Calvinistarum erroribus ac reali imprimis presentia Responsio*; and with the preceding, (2) a Latin translation of the acts of the council held at Jerusalem A. D. 1672, under the title of *Synodus Bellesmética pro reali presentia anno 1672 celebrata, græce et lat.* (Paris, 1676, 8vo). (By the advice of François Combefis and A. Arnauld, these translations were revised and corrected, and a new edition published in 1678, the latter under the title of *Synodus Hierosolymitana pro reali presentia*). (3) Under the pseudonym of Tamaguis, *Celebris historia Monothelitarum atque Honorii controversia scrutiniis octo comprehensa* (Paris, 1678, 8vo), a work which excited a good deal of interest. — Hoefler, *Nouv. Biog. Générale*, xviii, 309-10. (J. W. M.)

**Fouquet, JEAN-FRANÇOIS**, a French Jesuit, was sent as a missionary to Central Asia in the early part of the 18th century. He made himself acquainted with the language, idioms, and the theogony of the Celestial Empire, and was struck with their points of resemblance not only to Christian doctrine, but especially to the prophecies contained in the holy Scriptures. According to him, the Chou-King (sacred book of Confucius) is only a paraphrase of Genesis, and the praises addressed to Wen-wang and to Tchou-Koung in the Chi-King are only hymns in honor of the Messiah. One can see how much this ingenious interpretation would aid in proselyting the Chinese, who thus had only to change the names of their deities to claim priority in holding the doctrines of revelation over Christians themselves. Strict theologians attacked his opinions and censured his means of conversion;

nevertheless, on his return to Rome in 1720, pope Clement XI made him bishop of Eleutheropolis. He was recommended by the Academy of Inscriptions as the only person capable of criticising Fournont's Chinese Grammar. His *Tabula Chronologica historię sinicę*, 1729 (on 3 sheets), contains a list of the Chinese monarchs, and the chief events of their reign, and a complete series of the *Nianhao*, or names of years (new edition by Seutter, Augsburg, 1746). He wrote also a letter to the duke of La Force, and inserted in tom. v of *Lettres édifiantes*, which furnishes curious details in regard to the Chinese army and the Lonzes.—Hoefler, *Nouv. Biog. Générale*, xviii, 332. (J. S. M.)

**Fourier, François Charles Marie**, a philosophical socialist, was born at Besançon April 7, 1772. His father designed him for trade, but he never took to it willingly. In 1796 he entered the French army, but in 1798 he left it and entered a mercantile house at Marseilles. His mind seems to have been turned about this time to social questions by the scarcity of food and the terrible sufferings of the poor. The relations of capital to labor, and similar social problems, occupied his mind intensely for several years, and in 1808 he issued his first book, entitled *Théorie des Quatre Mouvements et des Destinées Générales*. "It is the strangest, most mystical, and most startling of all his works, though merely given as a general announcement of his theory. Surprise and wonder were the only effects which it produced on those who read it, and the few public writers who reviewed it." In 1821 he removed to Paris, in order to publish his writings, and he lived there, with some interruptions, to his death, Oct. 10, 1837. His principal works are *Théorie des Quatre Mouvements et des Destinées Générales* (1808, 8vo);—*Traité de l'Association Domestique Agricole* (1822, 2 vols, 8vo);—*Le Nouveau Monde, Industriel et Social* (1829); et *un Livret d'annonce* (1830);—*Püges et Charlatanisme des deux Sectes St. Simon et Owen* (1831);—*La Fausse Industrie, morale, repugnante, mensongère, et l'Antidote, l'Industrie naturelle, combinée, attrayante*. His *Œuvres complètes* were published at Paris in 6 vols. (1840-46). The *Passions of the Human Soul*, translated by Morell, was published in London in 1851 (2 vols. 8vo). "His philosophy may be divided into science and praxis, or his psychological and ontological theory and its application in his societary system. The first comprises what he styles passionnal attraction, the last its application to society in industrial association. His psychology is confined to an analysis of the affections, from which he infers that the Newtonian principle of attraction is equally applicable to the social and mental worlds, and that society should be moulded in accordance with the diversity and intensity of individual attractions. Unity in diversity and harmony in contrast is what he professes to achieve in his new social system. This principle of passionnal attraction is regarded by Fourier as his grand discovery, which had been culpably neglected and overlooked by past philosophers" (Tennemann, *Hist. Philos.* § 435). Among the followers of Fourier are counted Considérant, Pempéry, Lemoyn, Hennequin, Jules Lechevalier, and Trausen. Several periodicals, mostly short-lived, have been established for the defence of Fourierism, as *Le Nouveau Monde*, *Le Phalanstère*, *La Phalange*, *La Démocratie Pacifique*. Several attempts to carry out the view of Fourier were made in France, the United States, and Brazil, but all failed. See Gamond, *Fourier and his System* (London, 1842, 8vo); Doherty, *False Association, with Memoir of Fourier* (London, 1841, 8vo); *Christian Examiner*, xxxv, 57; *Methodist Quarterly Rev.* v, 545. See COMMUNISM.

**Fourier, Pierre**, of Mataincourt, a Roman Catholic religious reformer, was born at Miré (Lorraine) Nov. 30, 1565, and died at Gray Dec. 9, 1640. He reformed the regular canons of the congregation of St.

Sauveur de Lorraine, and established the *religieuses* of the congregation of Notre Dame for the instruction of girls. He died in the odor of sanctity, and his name was placed on the list of the beatified at Rome Jan. 29, 1730. See lives of him by Bedel (Paris, 1645, 8vo) and Friant (Nancy, 1746, 12mo).—Hoefler, *Nouv. Biog. Générale*, xviii, 344-5. (J. W. M.)

**Fourmont, Etienne** (Stephen), a French Orientalist, known as Fourmont the elder, to distinguish him from his brother, the abbé Fourmont, was born at Herbelay, near Paris, June 23, 1683, and died Dec. 19, 1745. He was an earnest and indefatigable student, and being endowed with an unusually quick and retentive memory, stored his mind with a vast amount of information in regard to the classic and Oriental languages and their literature. On the death of the abbé Galland in 1715, Fourmont succeeded him as professor of Arabic in the College of France and as member of the Academy of Inscriptions, and subsequently became a member of the learned societies of Paris, Berlin, and London. Fréret describes him as being of a gentle and cheerful disposition, wholly absorbed in his labors, and possessed of little knowledge of men, but offensively vain of his knowledge. For a list of Fourmont's numerous writings, published or in manuscript, see his life by De Guignes et Des Hautes-Rayes (*Vie d'Etienne Fourmont et Catalogue de ses Ouvrages*) in the second edition of his *Critical Reflections on Ancient History, and Catalogue des Ouvrages de M. Fourmont* (Amst. 1731), which is said, however, to contain some works only projected and never completed. Besides his famous commentary on the Psalms and Hebrew poetry, we mention here only *Méditations Sinicæ, complectens artem legendi linguę Sinicę Characteres* (Paris, 1737, fol.), which is the preliminary portion of the following, published separately: *Lingę Sinarum mandarinicę hierarchicę grammaticę duplex, latinę et cum characteribus Sinesium* (Paris, 1742, fol.);—*Reflexions sur l'Origine, l'Histoire et la succession des anciens peuples, Chaldéens, Hébreux, Phéniciens, Egyptiens, Grecs jusqu'au temps de Cyrus* (Paris, 1735 and 1747, 2 vols. 4to).—Hoefler, *Nouv. Biog. Générale*, xviii, 354-365; Rose, *New General Biog. Dict.* vii, 427; Quérrard, *La France littéraire*. (J. W. M.)

**Fowl** is the rendering of the following Heb. words in the Bible: 1. Usually פֶּהָ (oph, a flier), πτερόν, any winged animal, a generic term for the feathered race, frequently with the addition of שָׁמַיִם, "of the heavens." 2. אָיִל (a'yil, so called from rushing on its prey; compare Jer. xii, 9, where it is spoken of a beast), a ravenous bird (Job xxviii, 7); as an emblem of a warlike king (Isa. xlvi, 11); collect. for birds of prey (Gen. xv, 11; Isa. xviii, 6; Ezek. xxxix, 4); like ὄρνειον, as a vulture (Rev. xviii, 2; xix, 17, 21); translated fowl in Gen. xv, 11; Job xxviii, 7; Isa. xviii, 6. 3. צִפּוֹרִים (sipporim, so called from its twittering; Chald. צִפּוֹר, Dan. iv, 9, 11, 18, 30), a small bird, spec. a sparrow (Psa. lxxxix, 4; cii, 8; Prov. xxvi, 2; xxvii, 8; Job xl, 29; Eccles. xii, 6, etc.), or similar small birds (Psa. ci, 1; civ, 17; cxxiv, 7; as caught by the fowler, Prov. vi, 5; vii, 23; Amos iii, 5, etc.; also collect., birds of any kind, Gen. xv, 10; Lev. xiv, 4-53; Deut. iv, 17; Psa. viii, 9; cxlviii, 10, etc.; and even a bird of prey, Ezek. xxxix, 4, occasionally rendered by swallow and sparrow. In Neh. v, 18, the word seems to have the special sense which "fowl" has with us, as it is enumerated among the viands provided for Nehemiah's table. 4. בָּרְבָרִים (barburim), "fatted fowls," 1 Kings iv, 23, as provided for the table of Solomon, where Kimchi understands capons, but Gesenius, with the Jerus. Targum, geese, so called from the pureness and whiteness of their plumage. The ancient Egyptians had spacious poultry-yards, set apart for keeping geese and other

wild-fowl, which they fattened for the table; and their poulterers bestowed especial care upon the geese (Wilkinson, i, 215; ii, 174, abridgm.). See FATTED FOWL.

kuche, *De gallis et gallinis ad aram Jehovah non fractis*, Rint. 1741). The Talmud mentions geese (גֵּזֵי, *Chol.* xii, 1; *Lekor.* vii, 4), a well-known article of luxury

Geese brought and numbered. *British Museum—from Thebes.*

Fig. 1. A scribe. 2. Men bringing eggs in baskets. 3. One of the holders of geese, written on a papyrus he holds in his hands. 4. Table, on which are baskets containing eggs and flowers. 5. The scribe reading the account before the steward or master of the estate, others seated in an attitude of respect; and 8, bowing as he brings up the geese with their young, 9. A large flock of geese brought by others, 10, 11, 12.

In the N. T. the word translated "fowls" is most frequently τὰ πτερωτά, which comprehends all kinds of birds (including *ravens*, Luke xii, 24); but in Rev. xix, 17-21, where the context shows that birds of prey are meant, the Greek is τὰ ὄρνεα. The same distinction is observed in the apocryphal writings: comp. Judith xi, 7; Ecclus. xvii, 4; xliii, 1, with 2 Macc. xv, 33. See COCK; SPARROW.

The following statements are from Winer, ii, 663. Clean birds (כְּלֵי-צִפּוֹר טְהוֹרִים, Deut. xiv, 11, 20), i. e. all not named in Lev. xi, 13-19; Deut. xiv, 12-18, were (as well as their eggs, כְּלֵי-צִפּוֹר טְהוֹרִים) used for food (Luke xi, 12), e. g. quails (q. v.), chickens, doves, also wild-fowl; hence bird-catching was very common (Psa. cxxiv, 7; Amos iii, 5; Hos. v, 1; vii, 12, etc.), for which purpose nets, traps, and stool-birds (Jer. v, 27; Ecclus. xi, 31 [37]) were used (see Gesen. *Thes.* p. 685). See FOWLER. In robbing a nest of its eggs or young, however, the mother-bird must be allowed to escape (Deut. xxii, 6 sq.; see Michaelis, *Synagoga. Comm.* ii, 89 sq.; *Mos. Recht*, iii, 181 sq.), a prescription founded not only on motives of humanity (comp. Lev. xxii, 28; yet see Heumann, *De legis dir. sensu*, Gött. 1748; also in his *Novi Sylloge Dissertation.* p. 282 sq.); although the Talmudists (Mishna, *Chollin*, xii, 2) refer this only to clean birds, and make many nice distinctions in the matter, with various penalties attached (*Maccoth*, iii, 4). Birds were not regularly offered in sacrifice, except in commutation for some costlier victim (Lev. i, 15-17; compare Mishna, *Kinnim*, v, 11). See DOVE. The bird was first brought to the altar, where the priest (with his nail) nipped off the head, or rather cracked (כָּרַק) the neck, so that it still hung to the bird (Lev. v, 8); he then squeezed out the blood (sufficient, at least, in quantity for sprinkling), and finally threw the body into the fire, but without the crop, which (with its contents and the offal) was separately (בְּרֵל) thrown into the ash-heap under the altar. Before the flesh was committed to the flames, however, a folding back or breaking of the wings (כָּרַק בְּרֵל) is prescribed, a symbol of which the meaning is not clear (see Dassov, *De ave ungue secta*, Viteb. 1697; Es-

with modern Jews. The Hebrews were accustomed to play with parlor-birds, especially children (Job xl, 29 [24]; Baruch iii, 17; comp. Catull. ii, 1 sq.; Plaut. *Capt.* v, 4, 5). Of that form of divination which drew omens from the appearance or flight of birds (Müller, *Etrusk.* ii, 187 sq.), an example occurs in the history of the Herodian family (Josephus, *Ant.* xix, 8, 2). See SOOTHSAFER. The fable of the phoenix (Pliny, x, 2; Ovid, *Met.* xv, 392 sq.; comp. Herod. ii, 73) is thought by some (also Ewald) to be alluded to in Job xxix, 18 (see Gesenius, *Thes. Heb.* p. 453 sq.). See generally Tenzel, in the *Thesaur. theol. philol.* i, 559 sq. Comp. BIRD.

**Fowler** (some form of the verb יָקַח, *yakach'*, to lay snares; thus rendered in Psa. xci, 3; cxxiv, 7; Prov. vi, 5; Jer. v, 26; Hos. ix, 8). The act of tak-

Ancient Egyptian fowling with the Throw-stick.

ing birds by means of nets, snares, decoys, etc., is frequently alluded to in Scripture, mostly in a figurative and moral way (Prov. vii, 23; Eccl. ix, 12; Ezek. xvii, 20, etc.). The Egyptian paintings and sculptures exhibit various scenes of hunting and fowling; there is scarcely any process now followed which was not known in very ancient times. The ancients had not only traps, nets, and springs, but also bird-line smeared upon the twigs; they used likewise stalking-horses, setting-dogs, bird-calls, etc. The Egyptian paintings exhibit birds shot with arrows while upon the wing by peasants, and in others they are shown as knocked down by amateur sportsmen with sticks thrown at them as they perched or flew in the thickets or marshes. Game of all kinds was a favorite food of the Egyptians, and the capture of birds was a lucrative occupation to some and an amusement to others. Persons engaged in this act are represented as accompanied by their families in the boat, and often by a favorite cat (q. v.). See Wilkinson, *Anc. Eg.* i, 234 sq. (abridgm.). The Egyptians were also well skilled in preserving and preparing for the table the game thus secured, as well as poultry reared by domestication (*ib.* ii, 183 sq.). See FATTED FOWL.

on or in the ground (Psa. cxl, 6; cxlii, 4). The form of this spring, or trap net, appears from two passages (Amos iii, 5, and Psa. lxxix, 23). It was in two parts, which, when set, were spread out upon the ground, and slightly fastened with a stick (trap-stick), so that, as soon as a bird or beast touched the stick, the parts flew up and inclosed the bird in the net, or caught the foot of the animal. See SNARE.

By a humane as well as wise regulation, Moses forbade any one finding a bird's nest to take also the dam with the eggs or young (Deut. xxii, 6, 7), lest the species should become exterminated (Kitto, *Pictorial Bible*, ad loc.). See BIRD.

**Fowler, Christopher**, an eminent Puritan divine, was born at Marlborough in 1611, and died in 1676. He was educated at Oxford, and took orders first in the English Church, but became a Presbyterian in 1641, and signaled his zeal by the earnestness of his preaching. He was made vicar of St. Mary's, Reading, but lost the post at the Restoration. Wood's prejudices doubtless influenced his view of Fowler, whom he calls "a conceited and fantastical Presbyterian." He wrote, 1. *Demonium Meridianum* (1655, pt. i, 4to; 1656, pt. ii, 4to);—2. *Anti-Christian Blas-*

Ancient Egyptian Fowlers catching Geese, and Poultryers.

Fig. 1. A clear space, for the clap-net, *A, A*, and the decoys, *c*. 2. Watching among the reeds, *d*, and reporting when the trap is ready to spring. 3. Passing along the word to 4, the men who pull the ropes. 5. Carrying away the captured game. 6. Brings it to the poultry-house, where 7 plucks and 8 draws the birds, and 8 salts and hangs them up for sale, or 7 pots them for future use. See FOWL.

Birds of various kinds abound, and no doubt abounded in ancient times, in Palestine. Stanley speaks of "countless birds of all kinds, aquatic fowls by the lake side, partridges and pigeons hovering, as on the Nile bank, over the rich plains of Gennesaret" (*Sinai and Palestine*, p. 427). The capture of these for the table or other uses would, we might expect, form the employment of many persons, and lead to the adoption of various methods to effect it. See PALESTINE.

We read of the "snare," פַּח, *pach* (Psa. xci, 3; xxiv, 7; Hos. ix, 8), and of the "net," רֶשֶׁת, *re'sheth* (Prov. i, 17; Hos. vii, 11); "of the fowler," רֹדֵף, *rodhaph* = *snarer*. In Hos. v, 1, both net and snare are mentioned together. The *mokesh*' (מֹכֶשֶׁת) is used synonymously with the *pach* in Amos iii, 5. This was employed for taking either beasts or birds. It was a trap set in the path (Prov. vii, 23; xxii, 5), or hidden

*phemies*, etc. (1655, 4to);—3. *Answer to Thomas Speed, a Quaker* (1656), in which Simon Ford assisted him:—4. *Sermons* (1675, 4to); and some occasional sermons.—Rose, *New Gen. Biog. Dict.* vii, 428; Allibone, *Dict. of Authors*, s. v. (J. W. M.)

**Fowler, Edward**, bishop of Gloucester, was born in 1632 at Westerleigh, in Gloucestershire, where his father was minister. He was educated at Corpus Christi College, but, removing to Cambridge, he took his master's degree as a member of Trinity College, and, returning to Oxford, was incorporated in the same degree July 5, 1656. About the same time he became chaplain to Arabella, countess dowager of Kent, who presented him to the rectory of Northill, in Bedfordshire. As he had been brought up among the Puritans, he at first objected to conformity with the Church of England, but became afterwards one of its greatest ornaments. In 1681 he was made vicar of

St. Giles's, Cripplegate, when he took his degree of D.D. He was an able defender of Protestantism, and appears as the second of the London clergy who refused to read James II's declaration for liberty of conscience in 1688. He was rewarded for his eminent services in the cause of religion, and in the promotion of the revolution, by being made in 1691 bishop of Gloucester. He died at Chelsea in 1714. He belonged to the moderate or latitudinarian school of divines. His writings are, *The Principles and Practice of Latitudinarians* (so called) *defended* (London, 1671, 8vo):—*The Design of Christianity* (Lond. 1676, 8vo; pub. in *Watson's Tracts*, vol. vi). This work was attacked by Bunyan (to whom Fowler replied in a tract entitled *Dirt wiped out*, 1672, 4to):—*Libertas Evangelica* (1680, 8vo); various tracts against Popery, two on the Trinity, and a number of sermons.—*Biographia Britannica*, s. v.; Hook, *Eccles. Biog.* v, 164; Orme, *Life of Baxter*, ii, 238.

**Fowler, Orin**, a Congregational minister, was born July 29, 1791, in Lebanon, Conn. He graduated at Yale 1815, entered the ministry Oct. 14, 1817, and in June, 1818, started as missionary to the Western States, through which he traveled a year, and was ordained pastor in Plainfield, Conn., March 1, 1820, where he remained eleven years, when he was dismissed, and July 7, 1831, became pastor in Fall River. He was elected to the Senate of Rhode Island in 1847, and in 1848 to the U. S. Senate, in which office he remained until his death, Sept. 3, 1852. Mr. Fowler published a *Disquisition on the Evils attending the Use of Tobacco* (1833):—*Lectures on the Mode and Subjects of Baptism* (1835):—*History of Fall River* (1841):—*Papers on the Boundary* (1847), a sermon, several speeches in Congress, etc.—*Sprague, Annals*, ii, 648.

**Fowles, James H.**, a minister of the Protestant Episcopal Church, was born at Nassau, N. P., in 1812, and died in 1854. He graduated at Yale College in 1831, and about 1843 was licensed to preach by the Presbytery of New York, but afterwards joined the Protestant Episcopal Church, and was ordained by bishop Bowen, of South Carolina, in which state he labored until 1845, when he succeeded Dr. S. H. Tyng as rector of the Church of the Epiphany, Philadelphia, where he remained until compelled by ill health to resign, only a few months before his death. He edited Good's *Better Covenant*, etc., and *The Convict Ship*, for which he wrote introductions; and was the author of *Protestant Episcopal Views of Baptism Explained and Defended* (Philadel. 1846, 18mo):—*Sermons* (30) *preached in the Church of the Epiphany, Philadelphia*, preceded by a biographical sketch (Phila. 1855, 8vo):—*Allibone, Dictionary of Authors*, s. v. (J. W. M.)

**Fox** is the rendering in the A. V. of שׁוּאֵל (*shual*), Sept. ἀλώπηξ, as in Matt. viii, 20; Luke ix, 58; xiii, 32; Judg. xv, 4; Neh. iv, 3; Psa. lxxiii, 10; Cant. ii, 15; Lam. v, 18; Ezek. xiii, 4), a name derived, according to Bochart (*Hieroz.* ii, 190), from the coughing or yelping of that animal, but, according to Gesenius (*Thes. Heb.* p. 1457), from its digging or burrowing under the ground. The latter remarks that *jackals* must be meant in Judg. xv, 4, since the fox is with great difficulty taken alive; and also in Psa. lxxiii, 11, inasmuch as foxes do not feed on dead bodies, which are a favorite repast for the jackal. There is also another word, צִימ' (*z'im'*, literally *howlers*), occurs only in Isa. xiii, 32; xxxix, 14; Jer. i, 39, where it is rendered "wild beasts of the islands"), which seems to refer to the jackal, or some other species of the fox family. Fox is again the translation of ἀλώπηξ in Matt. viii, 20; Luke ix, 5-8; xiii, 32; but here also the word in the original texts may apply generically to several species rather than to one only. See ANIMAL.

Fox is thus applied to two or more species of the *Canide*, though only strictly applicable in a systematic view to *Taaleb*, which is the Arabic name of a wild

canine, probably the Syrian fox, *Vulpes Thaleb* or *Taaleb* of modern zoologists, and the only genuine species indigenous in Palestine. This animal is of the

Syrian Fox.

size of an English cur fox, and similarly formed; but the ears are wider and longer, the fur in general ochry-rufous above, and whitish beneath: there is a faint black ring towards the tip of the tail, and the back of the ears are sooty, with bright fulvous edges. The species burrows, is silent and solitary, extends eastward into Southern Persia, and is said to be found in Natolia. The Syrian *Taaleb* is reputed to be very destructive in the vineyards, or, rather, a plunderer of ripe grapes; but he is certainly less so than the jackal, whose ravages are carried on in troops, and with less fear of man. Ehrenberg's two species of *Taaleb* (one of which he takes to be the *Anubis* of ancient Egypt, and Geoffroy's *Canis Niloticus*, the Abū Hossein of the Arabs) are nearly allied to, or varieties of the species, but residing in Egypt, and further to the south, where it seems they do not burrow. The Egyptian *Vulpes Niloticus*, and doubtless the common

Egyptian Dog-Fox.

fox (*V. vulgaris*), are Palestine species. There is also the so-called Turkish fox (*Cynulopex Turcicus*) of Asia Minor, not unknown to the south as far as the Orontes, and therefore likely to be an occasional visitant at least of the woods of Libanus. This animal is one of an osculant group, with the general character of vultures, but having the pupils of the eyes less contractile in a vertical direction, and a gland on the base of the tail marked by a dark spot. There is, besides, one of a third group, namely, *Thous anthus*, or *deeb* of the Arabs, occasionally held to be the wolf of Scripture, because it resembles the species in general appearance, though so far inferior in weight, size, and powers as not to be in the least dangerous, or likely to be the wolf of the Bible. The first two do not howl, and the third is solitary and howls seldom; but there is a fourth (*Canis Syriacus*, Ehrenb. *Mammal.* ii) which howls, is lower and smaller than a fox, has a long, ill-furnished tail, small ears, and a rufous-grey livery. This can hardly be the *Canis aureus*, or jackal of Palestine, and certainly not the χρίστος of Ælian. The German naturalists seem not to have considered it identical with the common jackal (*Sacalius aureus*),

which is sufficiently common along the coast, is eminently gregarious, offensive in smell; howls intolerably in complete concert with all others within hearing; burrows; is crepuscular and nocturnal, impudent, thievish; penetrates into outhouses; ravages poultry-yards more ruinously than the fox; feeds on game, lizards, locusts, insects, garbage, grapes; and leaves not even the graves of man himself undisturbed. It is probable that *Canis Syriacus* is but a chryseus, or wild dog, belonging to the group of Dholestes, well known in India, and, though closely allied to, distinct from the jackal. Russell heard of four species of *Canidae* at Aleppo, Emprich and Ehrenberg of four in Libanus, not identical with each other; nor are any of these clearly included in the thirteen species which the last-named writers recognise in Egypt. They still omit, or are not cognizant of, wild dogs [see DOG], and likewise other wild species in Arabia and Persia; all, including foxes, having migratory habits, and therefore not unlikely to visit Palestine. Some of these may have accompanied the movements of the great invasions of antiquity, or the caravans, and become acclimated; and, again, may have departed, or have been gradually extinguished by local circumstances, such as the destruction of the forests or of the inhabitants, and the consequent reduction of the means of subsistence; or, finally, they may have been extirpated since the introduction of gunpowder. Hasselquist (*Travels*, p. 184) says foxes are common in the stony country about Bethlechem, and near the Convent of St. John, where, about vintage time, they destroy all the vines unless they are strictly watched. Thomson started up and chased one when passing over that part of the plain where Timnath is believed to have been situated (*Land and Book*, ii, 340). That jackals and foxes were formerly very common in some parts of Palestine is evident from the names of places derived from these animals, as Hazer-Shual (Josh. xv, 28), Shaal-bim (Judg. i, 35). See JACKAL.

The fox is proverbially fond of grapes (*Aristoph. Equit.* 1076 sq.; Theocr. v, 112 sq.; Nicand. *Alexipharm.* 185; Phedr. iv, 2; Galen, *Alim. Facult.* iii, 2), and a very destructive visitor to vineyards (Cant. ii, 15). The proverbially cunning character of the fox is alluded to in Ezek. xiii, 4, where the prophets of Israel are said to be like foxes in the desert, and in Luke xiii, 22, where our Saviour calls Herod "that fox." The fox's habit of burrowing among ruins is referred to in Neh. iv, 3, and Lam. v, 18 (see also Matt. viii, 20). (On Psa. lxxiii, 11, see Pausan. iv, 18, 4.) The Rabbinical writers make frequent mention of the fox and his habits. In the Talmud it is said, "The fox does not die from being under the earth; he is used to it, and it does not hurt him." And again, "He has gained as much as a fox in a ploughed field," i. e. nothing. Another proverb relating to him is this:

"If the fox be at the rudder,  
Speak him fairly, 'My dear brother.'"

Foxes are figured in hunting-scenes on the Egyptian monuments (Wilkinson, *Anc. Egypt*, i, 224, abridgm.). See CHASE.

None of the usual explanations of the controverted passage in Judg. xv, 4, 5, relative to the foxes, jackals, or other canines which Samson employed to set fire to the corn of the Philistines is altogether satisfactory. First, taking Dr. Kennicott's proposed explanation of the case (*Remarks on Select Passages in the O. T.*, Oxf. 1787, p. 100), on the authority of seven Heb. MSS., by changing לַיְהוָה לַיְהוָה, thus reading *handfuls* (comp. the Sept. at 1 Kings xx, 10), i. e. "sheaves" instead of "foxes," and translating עֲנַף, "end" instead of "tail," the meaning then would be, that Samson merely connected three hundred shocks of corn, already reaped, by bands or ends, and thus burned the whole. We admit that this, at first view, appears a rational explanation (see Hopkins, *Plumb-line Papers*,

Auburn, 1862, p. 20 sq.); but it should be observed that three hundred shocks of corn would not make two stacks, and therefore the result would be quite inadequate, considered as a punishment or act of vengeance upon the Philistine population, then predominant over the greater part of Palestine; and if we take shocks to mean corn-stacks, then it may be asked how, and for what object, were three hundred corn-stacks brought together in one place from so large a surface of country. The task, in that hilly region, would have occupied all the cattle and vehicles for several months; and then the corn could not have been thrashed out without making the whole population travel repeatedly, in order finally to reload the grain and take it to their threshing-floors. Nor will the verb נִקְחָה ("caught") bear the rendering thus required, for it properly means to ensnare, to take captive, and is specially applied to the act of catching animals (e. g. Amos iii, 5). (See, also, what an anonymous French author has written under the title of *Révérends de Samson*, and his arguments refuted in a treatise, "De Vulpibus Simsonis," by Gebhard, in *Theol. Nov. Theol. Phil.* i, 553 sq.; and comp. Gasser, *Comment. ad loc.* [Hal. 1751]; Pfaff, *Von dem Fuchsen Simsons* [Tüb. 1753]; Schröder, *De vulpibus Simsonis* [Marb. 1713]; Täge, *De vulpibus Simsonis* [Griefsw. 1707].) The proposed reading of Kennicott has deservedly found little favor with commentators. Not to mention the authority of the important old versions which are opposed to this view, it is pretty certain that נִקְחָה cannot mean "sheaves." The word, which occurs only three times, denotes in Isa. xl, 12 "the hollow of the hand," and in 1 Kings xx, 10; Ezek. xiii, 19, "handfuls." Reverting, therefore, to the interpretation of foxes burning the harvest by means of firebrands attached to their tails, the case is borne out by Ovid (*Fast.* iv, 681)—

"Cur igitur missæ junctis ardentia telis  
Terga ferunt vulpes"—

in allusion to the fact that the Romans, at the feast in honor of Ceres, the goddess of corn, to whom they offered animals injurious to cornfields, were accustomed to turn into the circus foxes with torches so fastened to them as to burn them to death, in retaliation of the injuries done to the corn by foxes so furnished. Again, in the fable of Athonius, quoted by Merrick; but not, as is alleged, by the brick with a bas-relief representing a man driving two foxes with fire fastened to their tails, which was found twenty-eight feet below the present surface of London (*Leland, Collectanea*); because tiles of similar character and execution have been dug up in other parts of England, some representing the history of Susanna and the elders, and others the four Evangelists, and therefore all derived from Biblical, not pagan sources. Commentators, following the rendering of the Sept. (κίρκος, Vulg. *cauda*), have, with common consent, adopted the interpretation that two foxes were tied together by their tails with a firebrand between them. Now this does not appear to have been the practice of the Romans, nor does it occur in the fable of Athonius. Hence some have understood the text to mean that each fox had a separate brand; for it may be questioned whether two united would run in the same direction. They would be apt to pull counter to each other, and perhaps fight most fiercely; whereas there can be no doubt that every canine would run, with fire attached to its tail, not from choice, but necessity, through standing corn, if the field lay in the direction of the animal's burrow; for foxes and jackals, when chased, run direct to their holes, and sportsmen well know the necessity of stopping up those of the fox while the animal is abroad, or there is no chance of a chase. But this explanation requires that by the words rendered "tail to tail" we should understand the end of the firebrand attached to the extremity of the tail, i. e. one apiece; this would be using the word in a double sense in the same pas-

sage, an equivoque not in accordance with the direct style of the narrative. It is also probable that after a few fruitless efforts at trying to pursue each his own course, the animals would soon agree sufficiently to give the firebrand its fullest effect. Again, we know nothing as to the length of the cord which attached the animals, a consideration which is obviously of much importance in the question at issue, for, as jackals are gregarious, the couples would naturally run together if we allow a length of cord of two or three yards, especially when we reflect that the terrified animals would endeavor to escape as far as possible out of the reach of their captor, and make the best of their way out of his sight. Finally, as the operation of tying 150 brands to so many fierce and irascible animals could not be effected in one day by a single man, nor produce the result intended if done in one place, it seems more probable that the name of Samson, as the chief director of the act, is employed to represent the whole party who effected his intentions in different places at the same time, and thereby insured that general conflagration of the harvest which was the signal of open resistance on the part of Israel to the long-endured oppression of the Philistine people. (See Clarke's *Comment. ad loc.*; Kitto's *Daily Bible Illustrations*, ad loc.; Thomson, *Land and Book*, ii, 341).—Kitto, s. v.; Smith, s. v. See SAMSON.

**Fox, Edward**, one of the English Reformers, was born in Gloucestershire (date not known precisely). He was educated at Eton, and at King's College, Cambridge, of which he became provost in 1528. He held this post during his life. Wolsey sent him on an embassy to Rome, with Gardiner, to promote a bull from Clement VII authorizing the divorce of the king from Catharine of Aragon. "It was in conversation with Fox and Gardiner, in 1529, that Crammer suggested his method of settling the question of the king's divorce, by taking the opinion of the most learned men and universities in Christendom; and he it was who made it known to the king as Crammer's suggestion, when Gardiner would have taken the credit of it to himself. In the prosecution of this plan he was sent with Stephen Gardiner, in 1530, to obtain the determination of the University of Cambridge. The heads of the university, the vice-chancellor, and the afterwards notorious Bonner, were on the king's side, but the university was divided. It was honorable to the University of Cambridge that so strong a resistance was offered to the will of the king. The royal authority being at this time on the side of reform, the commissioners, Fox and Gardiner, the latter being afterwards the great opponent of the Reformation, at length, though with difficulty, carried their point, and it was determined that 'the king's marriage was contrary to the law of God.' In 1531 he became archdeacon of Leicester, and in 1533 archdeacon of Dorset. In 1535 he was appointed bishop of Hereford. Shortly after his consecration he was sent ambassador to the Protestant princes in Germany assembled at Smalkald, whom he exhorted to unite, in point of doctrine, with the Church of England. He spent the winter at Wittenberg, and held several conferences with some of the German divines, endeavoring to conclude a treaty with them upon many articles of religion; but nothing was effected." Bishop Burnet gives a particular account of this negotiation in his *History of the Reformation* (pt. iii). He returned to England in 1536, and died at London May 8, 1538. He published a book, *De vera differentia Regni Potestatis et Ecclesiasticæ, et qua sit ipsa veritas et virtus utriusque* (Lond. 1531 and 1538), which was translated into English by Henry Lord Stafford.—Burnet, *History of the Reformation*, vols. i, iii; Hook, *Eccles. Biography*, v, 165; Collier, *Eccles. History of England*, iv, 342 sq.

**Fox, George**, founder of the Society of Friends, was born at Drayton, Leicestershire, England, in July, 1624. His parents were pious members of the Church

of England, and brought him up carefully. "His mother, Mary Lago, was of the martyr stock, and had inherited their intense feelings and religious enthusiasm. To her he probably owed his education and many of the determining impulses of his life; as to his father, he was indebted for the incorruptible integrity and tenderly scrupulous regard for truth by which he was characterized. As a child, he was singularly quiet, docile, observant, and meditative. He sat among his elders silently, watching their frivolity, untruthfulness, gluttony, and intemperance, and inwardly resolving, 'If ever I come to be a man, surely I shall not do so, nor be so wanton.' Some of his relatives would have had the thoughtful lad trained for a clergyman, but others objecting, he was apprenticed to a person who, as the manner then was, combined a number of trades—shoemaking, wool-stapling, cattle-dealing, and so on. George proved a valuable assistant to him. The fear of God rested mightily upon him, and he was anxiously watchful in all things to maintain strict integrity. 'Verily' was a favorite word of his, and it became a common saying among those who knew him, 'If George says "Verily" there is no altering him'" (*Christian Times*). His early religious experience was very deep; and, after the termination of his apprenticeship, he felt himself impelled by a divine monition (1643) to leave his home and friends, seeking "light." For economy's sake, in these travels he wore a leathern doublet. In 1647, after, as he says, "forsaking the priests and the separate preachers also, and those esteemed the most experienced people," none of whom could "speak to his condition," he "heard a voice" calling him to Christ, and his "heart leaped for joy." This was in 1647, in which year he began the ministry, which lasted during his life. When he began his work the mind of England was in a state of ferment, and he found many willing auditors. His personal peculiarities of dress and manner attracted attention and persecution. "When the Lord sent me forth into the world, he forbid me to put off my hat to any, high or low, and I was required to 'thee' and 'thou' all men and women, without any respect to rich or poor, great or small; and as I travelled up and down, I was not to bid people 'good-morrow' or 'good-evening,' neither might I bow or scrape with my leg to any one; and this made the sects and professions to rage" (*Journ.* 1648). He taught (*Journ.* 1649, p. 26) that "it is not the Scriptures, but the Holy Spirit, by which opinions and religions are to be tried." Of course these novel and earnest views excited great opposition; Fox was imprisoned for some time as a "disturber of the peace." He continued, however, to travel up and down England, preaching, and exhorting, and leaving permanent traces behind him almost everywhere. His followers were first called "Quakers" at Derby, in 1650, by Justice Bennet, as Fox says, "because I bid them tremble at the word of the Lord." In 1655 he was brought before Cromwell, who pronounced favorably upon both his doctrines and character. Nevertheless, he was frequently imprisoned by country magistrates. "In 1669 he married the widow of Judge Fell. He then went to America, where he spent two years in propagating his views with much success. On his return to England in 1673, he was imprisoned for some time in Worcester Jail, under the charge of having 'held a meeting from all parts of the nation for terrifying the king's subjects.' On his release he visited Holland, and afterwards Hamburg, Holstein, and Dantzic, always endeavoring to persuade men to listen to the voice of Christ within them. He died in London, January 13, 1691" (Chambers, *Cyclopaedia*, s. v.).

The personal character of George Fox was, in many respects, a lofty one. In self-sacrifice, earnestness, and purity, he was a model. His intellectual powers were not of a very high order. His doctrine of the "inner light" was elaborated by Robert Barclay (q.

v.) with a clearness and method of which Fox was incapable. Fox carried this doctrine, and also his abhorrence of "a hireling ministry," to almost absurd extremes. "But, amid all his extremes and obscurities, the substance of George Fox's 'testimony' was a truth of which every generation is in danger of forgetfulness, and of which no generation ever so much needed to be reminded as this, namely, 'that the kingdom of God is not meat and drink—not forms and ceremonies—not creeds, however sound—not organizations, however efficient—but righteousness, and peace, and joy in the Holy Ghost'" (*Christian Times*). Sir James Mackintosh calls Fox's *Journal* "one of the most extraordinary and instructive narratives in the world, which no reader of competent judgment can peruse without revering the virtue of the writer, pardoning his self-delusion, and ceasing to smile at his peculiarities" (*Works*, London, 1851, p. 362). See *Collection of Christian Epistles written by George Fox* (London, 1698, 2 vols. fol.); *Journals of George Fox* (London, 1691; Leeds, 1836, 2 vols.); *Works of George Fox* (Philadelph. 8 vols.); Sewell, *History of the Quakers* (1795, 2 vols.); Neal, *History of the Puritans*, Harper's edition, ii, 118; Janney, *Life of George Fox, with Dissertations*, etc. (Philadelphia, 1853, 8vo); Marsh, *Life of George Fox* (London, 1847, 8vo); *Westminster Review*, xvii, 371.

**Fox, John**, author of the *Book of Martyrs*, was born at Boston, Lincolnshire, in 1517, was educated at Brazenose, Oxford, and was elected a fellow of Magdalen College in 1543. In his youth he showed a talent for poetry, and wrote several Latin comedies, the subjects taken from the Scriptures. One of them, *De Christo Triumphante*, printed in 1551, was translated into English by Richard Day, with the title *Christ Jesus Triumphant, wherein is described the glorious triumph and conquest of Christ over sin, death, and the law*, etc. (1579, 1607, 1672). He embraced the principles of the Reformation, and for that cause was expelled from his fellowship in 1545 (according to Wood, *Athen. Oxon.*, he resigned it), for having espoused the Reformation, and, till he was restored to it by Edward VI, he subsisted by acting as a tutor, first to the family of Sir Thomas Lucy, of Charlecote Park, and afterwards to the children of the earl of Surrey. In 1556 he was ordained deacon by Bishop Ridley. During the reign of Mary he sought an asylum at Basle. Returning on the accession of Elizabeth (1559), he was taken into the house of the duke of Norfolk, and Cecil obtained for him a prebend in the cathedral of Salisbury in 1563. He died in 1587. His great work is the *Acts and Monuments of the Church*, first published in 1563, usually known by the name of *Fox's Book of Martyrs*, the merits and demerits of which have been a source of violent dispute between Protestant and Catholic writers; but no faults, beyond unimportant mistakes, have been detected in it. To the credit of Fox it must be recorded, that he strenuously, though vainly, endeavored to prevail upon Elizabeth not to disgrace herself by carrying into effect the sentence which, in 1575, condemned two Baptists to the flames as heretics. The best edition of the *Martyrs* is *Acts and Monuments of Matters most special and memorable happening in the Church*, or *Acts and Monuments of Martyrs*, with additions, etc. (London, 1784, 9th ed. 3 vols. fol.); the latest are *Fox's Acts and Monuments*, new edition, with a Life of the Martyrologist, and Vindication of the Work, by the Rev. Geo. Townsend (Lond. 1843-49, 8 vols. 8vo), and a still better edition by Mendham and Pratt, 8 vols. 8vo (Lond. 1853 sq.). There is an American reprint in one large volume (New York, royal 8vo, p. 1082), revised by Rev. M. H. Seymour.

**Fox, Richard**, bishop of Winchester, and the founder of Corpus Christi College, Oxford, was born at Grantham, Lincolnshire, of humble parentage, and educated at Boston school and Magdalen College, Oxford. Through the friendship of Morton, bishop of

Ely, he was brought to the notice of the earl of Richmond, who, when he became king (Henry VII), made Fox a privy councillor, bishop of Exeter, employed him on several embassies, then transferred him to the see of Durham, and finally to that of Winchester. Fox evinced his appreciation of learning by founding Corpus Christi College, Oxford, with two lectures for Greek and Latin, and by establishing several free schools. He died in 1528, and was buried in Winchester Cathedral. He wrote *The Contemplacyon of Synners* (Lond. 1499, 4to):—*Letter to Cardinal Wolsey*.—Allibone, *Dictionary of Authors*, s. v.; Rose, *New Gen. Biog. Dict.* vii, 428; Wood, *Athenæ Ozonienses*; Chalmers, *Biog. Dict.* (J. W. M.)

**Fox, William Johnson**, an English Unitarian minister, and also a politician, was born at Uggleshall Farm, near Wrentham, Suffolk, in 1786, the son of a small farmer. In youth he gave promise of talent, and was dedicated to the Christian ministry, and studied at Homerton College, then under the direction of Dr. Pye Smith. He soon abandoned the orthodox Independents, and became first a Unitarian, and later "a deistical heresiarch, who preached more on politics than on religion." His chapel at Finsbury Square was filled by auditors attracted by his eloquence and his spirit of philanthropy. Politics at last became more attractive to him than preaching, and in 1847 he entered Parliament, in which he held a seat for Oldham until 1862, when failing health compelled him to resign. He died June 3, 1864. He was a man of literary tastes, and was a frequent contributor to the *Westminster Review* and to the *Retrospective Review*. His peculiar theological views are set forth in his *Religious Ideas* (Lond. 1849). He also published *Lectures on Morality* (1836, 8vo). These, with other writings of his, are collected in *Memorial Edition of the Works of W. J. Fox* (Lond. 1865, 2 vols. 8vo).

**Frachet, Gérard de**, a monkish ecclesiastical historian, was born at Châlus (Limousin), in France, about the beginning of the 13th century, and died at Limoges Oct. 4, 1271. He entered the Dominican order in 1225, and filled in succession the posts of prior of the convent of Limoges (1233-45), then of that of Marseilles, provincial of Provence (1251-9), and (1266) was chosen assistant (*definitour*) provincial by the chapter of Limoges. He wrote (according to Lacordaire), by the order of the chapter general which assembled at Paris in 1256, *Vite Fratrum ordinis Predicatorum* (Douay, 1619, and Valence, 1657):—*Chronicon ab initio Mundi*; and left, besides, some manuscripts.—Hoefr., *Nouv. Biog. Gén.* xviii, 421-2. (J. W. M.)

**Fragments of Wolfenbüttel.** See WOLFENBÜTTEL FRAGMENTS.

**Form** is the rendering in the A. V. of פְּרָמָה, *ye'f-tser*, *form* (usually spoken figuratively of *imagination*), e. g. the bodily *formation* (Psa. ciii, 14; "thing framed," Isa. xxix, 16); and מִבְּנֵי, *mibneh'*, *building*, e. g. of a city (Ezek. xl, 2).

**France**, a country of Europe, having an area of 209,428 square miles, and in 1866 a population of 38,192,094 inhabitants.

I. CHURCH HISTORY.—(1.) *From the first Establishment of Christianity until the 16th Century.*—France, or, as it was formerly called, Gaul, was among the first of the European countries in which Christian churches were founded. Roman Catholic writers tell us that the apostle Peter ordained bishops for Limoges, Toulouse, Bordeaux, Rheims, Arles, Sens, le Mans, Vienne, Chalons, Bourges, Clermont, and Saintes. This statement is not historical; but it is certain that Christianity was planted in many parts of Gaul at least as early as the 2d century. The first Christians in Gaul doubtless came from Asia Minor. We may assume as certain that the number of churches was already tolerably large at the time of Irenæus (q. v.).

who in 198 presided at three provincial synods, and seems to have established a school of catechists at Lyons. At the beginning of the 4th century there was no province in Gaul as to which we have not accounts of bishoprics, or at least of Christian churches. Of the nations which founded new kingdoms in Gaul in the 5th century, the Burgundians were already Christians when they left the southern districts of Germany, and settled between the rivers Saone and Rhone and the Alps, before the year 417. Among the Franks, king Clovis (q. v.) first embraced Christianity, together with more than 3000 soldiers, after the battle of Tolbiacum, in 496. In the mean time Christianity became so generally extended in all parts of the country, in the north as well as in the south, that Church provinces began to be formed everywhere, the capital of each political province generally becoming also the seat of the metropolitan. The Franks, embracing the Catholic faith while a considerable part of Europe was still under the rule of the Arians, began soon to be regarded as the chief Catholic nation of Europe. Through the establishment of the empire of Charlemagne, France seemed for a time to become only a part of the union of all the German nations, but soon after the division of the empire in 843 it recommenced its development as an independent state. King Lothaire I was obliged to humble himself before the pope, as the hostile princes of his own family stood ready to execute the papal threats, and the Frankish bishops did not object to have the spurious decretals [see PSEUDO-DECRETALS] used for the first time against Hincmar (q. v.) of Rheims, for they thought it better to obey a distant pope than a threatening metropolitan at home. But when, after the death of Lothaire I (869), Hadrian II attempted to interfere in the political and ecclesiastical controversies of France, Hincmar gave him to understand that in France a wide distinction was made between spiritual and secular power, and that the bishops of older times had had independent privileges. The emperor Charles the Bald compelled the French bishops to acknowledge Ansegius, archbishop of Sens, as the primate and papal vicar for Gaul and Germany; but, under the counsel of Hincmar, they persisted in obeying the holy father only as far as was consistent with the rights of all the metropolitans and with the laws of the Church. In general, the bishops of France, as well as the kings, resisted more energetically than any other nation the ever-growing claims of the popes, and their unceasing efforts to establish an absolute sway over all bishops, synods, and kings. The Gallican Church stands forth in Church History as the prominent defender of national and episcopal rights against papal usurpations. Urban II, at the Council of Clermont (1095), excommunicated king Philip for his adulterous connection with the countess Bertrade, and, aided by the sympathy of the people, compelled him to give up his paramour. Louis IX (q. v.), though so firmly attached to the doctrines and usages of his Church that, after his death, he was declared a saint, confirmed the rights of the nation by the Pragmatic Sanction in 1269, the great palladium of the Gallican Church. See GALLICANISM. In opposition to pope Boniface VIII, who declared every one a heretic who did not believe that the king in temporal as well as in spiritual matters was subject to the pope, the three estates of France, convened in a General Diet (1302), were unanimous in maintaining the independence of the French kingdom. The pope pronounced an interdict upon the whole of France, but popular opinion effectually protested against all attempts to blend the spiritual with the secular authority. In 1303 the king of France even succeeded in having a pope elected who took up his residence at Avignon (q. v.), and for more than a hundred years (until 1408) the papacy remained a tool in the hands of the French kings. The concordat which Martin V proposed to France was rejected in 1418 by the Par-

liament, which has ever since remained the steadfast advocate of Gallican liberties. The kings, however, were not equally steadfast in their opposition to the demands of the popes, and often made concessions in the hope, with the aid of the popes, of increasing their power at home. Thus the new Pragmatic Sanction, which the Council of Bourges (q. v.) established in 1438, was soon set aside by the succeeding kings. In all the great ecclesiastical movements of the Middle Ages France took a prominent part. Most of the efforts made either to overthrow the papacy for the purpose of restoring a purer form of Christianity [see WALDENSES; ALBIGENSES], or to reform the Church from within, either centred in France, or found there the most vigorous support.

(2.) *History of the Roman Catholic Church since the beginning of the 16th Century.*—At the beginning of the 16th century Francis I concluded a concordat, Aug. 18, 1516, in which he sacrificed many of the liberties of the Gallican Church. After the rise of the Reformation the Roman Church succeeded in securing her ascendancy by long-continued and cruel persecution (see below, *History of the French Reformed Church*). Henry IV, when contesting the throne of France, found the public sentiment so strongly in favor of the old Church that he thought it expedient, from political reasons, to change his faith. Henceforth the ascendancy of the Roman Church over Protestantism was secured, and the reformatory movements of the Jansenists (q. v.) and others were likewise suppressed, at the request of the popes, by the secular arm. The Golden Age of France, under Louis XIV, produced also in the Church some master minds, as Bossuet, Fénelon, Bourdaloue, and many others, who were ornaments of their Church, but were not able to stay the rising tide of an infidel philosophy. The episcopate, under the leadership of Bossuet, reaffirmed the liberties of the Gallican Church at the famous assembly held in 1682. This assembly, which consisted of eight archbishops, twenty-six bishops, and thirty-eight other clergymen, unanimously affirmed the principles of the *Regale* (the Pragmatic Sanction of 1438), announcing them in the form of four propositions, which were registered by the Parliament of Paris March 23, 1682. Though the popes often succeeded in enforcing obedience to their decrees, most of the great theologians of the 17th and 18th centuries adhered to Gallican doctrines, and the *Regale* continued in force until the revolution of 1789. Monasticism, in the same period, reached the climax of literary culture in some congregations of the French Benedictines and Oratorians. Nevertheless, the very foundations of the Roman Church were gradually undermined by the spread of French philosophy, and the success of the French Revolution seemed for a time to sweep away the entire Church of France. The National Assembly decreed (Nov. 27, 1790) that all ecclesiastical officers, under penalty of losing their offices, should take an oath for the civil constitution of the clergy, which Pius VI declared (April 13, 1791) inadmissible. Bishops were chosen in accordance with the new law, and consecrated without having the confirmation of the pope. In 1793 Christianity itself was declared to be abolished. Napoleon, though perhaps personally indifferent towards all churches, regarded the re-establishment of the Roman Church as the religion of the state as indispensable to the tranquillity of the country, and therefore concluded in 1801 a concordat [see CONCORDAT], the introduction of which was solemnized in 1802. Napoleon added to the concordat certain organic laws, which make the promulgation of papal decrees dependent on the authorization of the government, establish an appeal to the Council of State against the abuses of ecclesiastical power, and bind the theological seminaries to the four propositions of the Gallican clergy of 1682. Two years later Napoleon was crowned emperor by the pope. When, however, the States of the Church

were taken possession of by the French (1808), and when the pope declared every one who laid his hand upon the patrimony of St. Peter excommunicated, Napoleon had the pope arrested and brought to France. An attempt to render, by means of a synod convoked at Paris (1811), the French Church independent of Rome, failed. In 1813 Napoleon extorted, in a new concordat, some important concessions from the imprisoned pope; and when the pope revoked all he had done, Napoleon published the concordat as the law of the empire on the very next day (March 25). After the overthrow of Napoleon (1815), Louis XVIII recognised the Roman Church as the religion of the state, though granting religious toleration to every form of public worship. Powerful efforts were made to re-establish among the French the belief in the doctrines of the Roman Church, and the leaders in this contest—Lamennais (q. v.), de Maistre (q. v.), and the “priests of the Mission” (q. v.)—attached themselves more closely to the papal than to the Gallican school. Gallicanism, at least in its ancient form, began to die out. The Apostolic Congregation, though in opposition to the inclinations of the prudent king, obtained a concordat (1817) by which the concordat of 1801 was revoked, and that of 1516 substituted for it. So decided, however, was the opposition of public opinion that it was never laid before the Chamber of Deputies. Without the consent of the Chambers, the government of Louis XVIII, and still more that of Charles X, did as much for the Church as was in their power, although, to appease public excitement, a royal ordinance (June 16, 1828) had to close the schools of the Jesuits. The revolution of 1830 was connected with some outbreaks of popular indignation against the Church, which lost the prerogative of being the religion of the state. Yet Louis Philippe made as great concessions to the Church as the origin of his own authority would allow. Lamennais, Lacordaire, Montalembert, and others anticipated great results from a union between ultramontanism and democracy, but the condemnation of their organ, *L’Avenir*, by the pope, put a stop to their novel schemes, and drove Lamennais out of the Church. An attempt, made by the abbé Chatel in 1830, to found a new *French Catholic Church* in the spirit of an extravagant liberalism, and without any Christian basis, was an utter failure. A plan of national education, which placed (1833) the public schools under the superintendence of the university, was violently assailed by the Church, yet the government never ceased to seek a reconciliation, or at least a compromise, with the Church; and when Thiers called up in the Chamber of Deputies the laws still in existence against the Jesuits, the government executed them with the utmost possible mildness. To the Republican Revolution of 1848 the Church offered no opposition, and the priests did not hesitate to bless the tree of liberty and pray for the sovereign people. The Church received almost everything she had been in vain demanding during the reign of Louis Philippe. Nevertheless, the dread of the Red Republic made most of the clergy and of the leaders of the Catholic party partisans of Napoleon. Having become emperor, Napoleon III attached a majority of the bishops and of the ultramontane school to his interests by increasing the salaries of the bishops, raising their influence in the supreme educational and political boards of the state, and by permitting the bishops to revive the provincial councils which had been in desuetude for more than a hundred years. The ultramontane school, headed by the *Univiers*, readily approved of all the measures of the government by which the political liberties of the nation were curtailed, and many hoped that the emperor would realize their boldest dream—the restoration of a politico-ecclesiastical theocracy under the rule of the pope. Yet many leading men in the Church, especially among the laity, dissented from this view, and organized a moderate school, which not only op-

posed the political views of the government and of the ultramontanes, but also accused the latter of ultraism in their defence of ecclesiastical institutions and practices. Montalembert, Lacordaire, prince de Broglie, Falloux, Lenormant, and bishop Dupanloup of Orleans were the most distinguished men of the party, the *Correspondant* and the *Ami de la Religion* its most important organs. The controversy between the two parties grew not only very bitter and violent, but even led several times to a split between the bishops, whose sympathies were almost equally divided between the two parties. Several bishops took decided ground against the *Univiers*, and even in Paris it required the mediation of the pope to prevent its prohibition by archbishop Sibour. An entire change in the relation of Napoleon to the Church and the so-called Catholic party took place in consequence of the war in Italy (1857) and the attitude of Napoleon with regard to the temporal sovereignty of the pope. The war silenced all the eulogies of the emperor, and only a few solitary voices, like that of Lacordaire, dared to express sympathy with the cause of Italian independence. But after Napoleon had advised the pope to give up a portion of his states, both the parties, the ultramontane and the moderate, turned against the government. All the bishops except one condemned, more or less explicitly, the course pursued by the government, and every ecclesiastical journal in France took the same ground. The government used all means to keep down the agitation of the public mind on the subject, and to force the leading advocates of the ecclesiastical interests to submission. The *Univiers* and several Catholic papers in the provinces were suppressed, and almost every other organ of the party received an official warning; and the bishops were threatened, in the case of a continuance of the agitation, with the re-enforcing of the organic articles. It is generally admitted that the Roman Church in France has grown strong in comparison with its condition during the 18th and at the beginning of the 19th century. All the leading religious societies, confraternities, and associations of the Roman Church centre in France, which contributes for some religious purposes, as the foreign missions, more than the rest of the Roman Church together.

(3.) *The History of French Protestantism.*—The Reformation of the 16th century, soon after its rise in Germany and Switzerland, found many friends and patrons in France; but it met at once with a determined opposition on the part of the University of Paris, which declared against it in 1521. Among the earliest preachers of the Reformed faith were Bucer, Melancthon, Lefevre, and Farel; somewhat later, Calvin published his *Institutes of the Christian Religion*, with a dedication to king Francis I. In 1521 the first Protestant congregation was formed at Meaux, the bishop of which city, Briçonnet (q. v.), was one of the converts of Lefevre and Farel. The bishop subsequently yielded to persecution and recanted, but the congregation maintained itself. (For a fuller account of the beginnings of Protestantism in France, see REFORMATION.) Under the reign of Henry II (1547–59), the members of the French Reformed Church had increased so greatly in numbers and strength that it became difficult to treat them any longer as holders of a forbidden religion. The Protestants did not content themselves with seeking to secure toleration, but, regarding the Roman Church as doomed to destruction, and themselves as called by God to take its place, they often entered into plans for establishing Protestantism as the religion of the state. The adhesion to the Reformation of several members of the royal family, as the king of Navarre and his brother, the prince of Condé, and several grandees of the empire (among whom the three brothers Chatillon and the noble admiral Coligny distinguished themselves), early introduced into the Protestant Church a political element

which was strengthened by the cruel rigor with which the princes generally persecuted it. This element was developed the more strongly as the general spirit of those times was democratic, and as Calvin himself, the father of the Reformed Church, inclined to theocratic principles. "In 1555 the first avowed French Reformed church was established in Paris. All the chief towns followed this example. The first synod of the French Protestant Church assembled privately in Paris, May 25, 1559. Owing to the danger of the enterprise only thirteen churches sent deputies. Nevertheless, the foundations of an important superstructure were then and there laid. A complete system of ecclesiastical polity was speedily adopted, for the members of the synod had too vivid a sense of the dangers to which they were exposed to waste time in unprofitable discussions among themselves. The form of government thus established was thoroughly Presbyterian in its character. It seems to have corresponded very closely to that of the Church of Scotland. The Consistory may be viewed as representing the Kirk Session, the Colloquy the Presbytery, while the Provincial Synods of each are analogous; and the National Synod corresponds to the General Assembly. The Consistory was elected at first by the whole congregation over which it was to rule, but vacancies occurring afterwards were filled up by the Colloquy. The ministers were elected by the Colloquy. A minister, on being thus elected, was required to preach before the congregation on three consecutive Sabbaths; whereafter, if no objection was made, the congregation was considered as acquiescing in the appointment. If there was any objection, the matter was referred to the Provincial Synod, whose decision was final. These provincial synods have been generally sixteen in number. The National Synod has met but seldom, owing to the severe persecutions to which the Church has been exposed, and the increasing restrictions which have been imposed upon her. The *Confession of Faith* adopted at the first synod consisted of forty articles. Its doctrines were strictly Calvinistic. Though the Church was much harassed by persecution during the reign of Henry II, still it greatly increased; so much so that we are told that Beza, who died in 1605, could count 2150 churches in connection with the Protestant Church of France; and the churches were not small or insignificant in point of strength. In some there were 10,000 members. The church of Orleans had 7000 communicants, and the ministers in such churches were proportionally numerous: two ministers to a church was common, and that of Orleans had five. At this period there were 305 pastors in the one province of Normandy, and in Provence there were 60' (Eadie, s. v.). The cruel persecution to which the Calvinists were subjected after the death of Henry II, under the reign of Francis II, led them to organize the Conspiracy of Amboise, in which some discontented members of the Roman Catholic Church also took part, though the majority of the conspirators were Calvinists. Its aim was the overthrow of the proud duke of Guise and his brother, the cardinal of Lorraine, who were the uncles of the king, and the chief instigators of the persecution of the Protestants. The conspiracy was betrayed, and many of the participants lost their lives. Calvin and Beza had been notified of the enterprise, but discouraged it, though they did not feel themselves bound to betray it. The weak king of Navarre, and still more his brother, the prince of Condé, were implicated in the plot, and nothing but the death of the king saved their lives. The Calvinists henceforth received the name Huguenots, a name whose etymology is not quite certain. See HUGUENOTS. During the regency of Catharine de Medicis the Huguenots increased in number, and the court party, which feared that their extirpation was not possible without exposing France to the terrors of civil war, was inclined to grant them religious toleration.

The dukes of Guise saw the necessity of enlarging and consolidating the Catholic party. They prevailed on the aged and vainglorious constable of Montmorency to form with them a triumvirate, which was soon also joined by the king of Navarre, who was induced by false promises to abandon the cause of the Huguenots. The cardinal of Lorraine even feigned an inclination to the Confession of Augsburg, and, contrary to the wishes of his own party, brought about a religious conference with the Calvinists at Poissy (1561), at which Beza brilliantly defended the Reformation against the whole prelatic strength of the Roman Church. A committee, consisting of five members of each party, was appointed to conciliate the views of the two churches concerning the doctrine of the Lord's Supper. It succeeded in drawing up a formula which was accepted by the Calvinists, as well as by the queen-mother and the cardinal. But the Sorlonne declared it to be heretical, and it was soon generally abandoned. The celebrated edict of January, 1562, granted to the Huguenots provisionally the right to assemble for religious worship outside of the towns, until further provisions should be made by an oecumenical council. Beza and the Huguenots in general accepted this trifling concession with gratitude, but a number of Parliaments, especially that of Paris, raised against it the strongest remonstrances. The duke of Guise threatened to cut it with the edge of his sword, and commenced hostilities in the same year at Vassy, where a number of the Huguenots were massacred. A bloody civil war ensued, in which the Huguenots suffered heavy losses, and which was ended by the Peace of St. Germain (1570), in which the government gave to the Huguenots four fortified towns as security for the future. The Huguenots conceived new hopes; their chief defender, Henry of Navarre, was married to the king's sister; but when all their chief men were assembled at Paris to celebrate the nuptials, the queen-mother gave treacherously the sign for that general and bloody massacre known in history as the *Night of St. Bartholomew*, in which from 20,000 to 100,000 Protestants perished, and among them the great Coligny (q. v.). The Protestants again rose in despair, and received new concessions in the Edict of Poitiers (1577), but the Holy League, which had been organized by the duke of Guise and his brother, compelled the king to revoke everything, and to take a pledge not to rest until the last heretic should be extirpated from France. The assassination of the duke of Guise and his brother by order of the king, who wished to free himself from the influence of the League, stirred up anew the fanaticism of the Catholic population, and led to the expulsion, and, later, to the assassination of the king himself. The legitimate heir to the throne, Henry of Navarre, had been the head of the Protestants, yet, to overcome the hostility of the Roman Catholic party, he believed it necessary to join the Roman Church (1593). He gave, however, to his former coreligionists, by the Edict of Nantes (1598), which he declared irrevocable, freedom of faith and of public worship (with only a few restrictions), their rights as citizens, and great privileges as an organized political corporation. They were declared eligible for admission into the university, and for appointments in the public service, and received an annual grant of 1000 crowns. The remonstrances of several magistrates and provinces against this decree were in vain. Thus brighter days seemed to approach. During the twenty-six years which intervened between the massacre of St. Bartholomew and the publication of the Edict of Nantes only six National Synods had been held, and the only thing that had served to cheer up the drooping hearts of Protestants had been the publication of a new and improved edition of the Geneva version of the Bible. After the assassination of Henry IV (1610) the Protestants were again forced by persecution to take up arms in defence of their rights; but they were disarmed as

a political party by cardinal Richelieu, though, by an act of amnesty at Nismes (1629), he secured to them their former ecclesiastical privileges. About this time their number had been reduced to only about half of what it was before the massacre of St. Bartholomew. Louis XIV regarded it as his special mission to break the power of Protestantism in the state. The Protestants were deprived of a great many churches and schools; the utmost efforts were made to convert all who were accessible to fear, promises, or persuasion; children were taken from their parents; "booted missions of dragoons" were sent in every direction (after 1681), and at last the Edict of Nantes was formally repealed in 1685. See NANTES, EDICT OF. One mountain tribe [see CAMISARDS] in the *Cevennes* took up arms against the king, but its prophets and heroes either perished on the battle-field, or gained only the privilege of going into exile (1704). It is calculated that from 30,000 to 40,000 Protestants fled from France at this time. Nevertheless, two millions of the Reformed remained, with no congregations except in the wilderness, and in 1744 they again held their first National Synod. "In the closing years of the reign of Louis XIV, and during the regency of Philippe d'Orleans, the Protestants were more leniently dealt with. Though now enjoying external peace, the Church began to exhibit signs of internal declension. The chief causes producing this effect were the want of trained and educated men to fill the office of pastor, and the spirit of fanaticism which had sprung up among the members of the Church. These defects were remedied mainly by the exertions of Antoine Court, who has been styled the 'Restorer of the Protestantism of France.' He instituted prayer-meetings wherever he could, and also held synods or conferences of the ministers, along with a few intelligent laymen. By thus exciting a spirit of prayer and a love of order he much benefited the Church. But, while the Protestant Church was gradually recovering from its depressed condition, it was startled by the proclamation by Louis XV, on May 14, 1724, of the last great law against the Protestants. This law re-enforced the most severe measures of Louis XIV. It sought not so much to intimidate Protestants into a recantation, or to punish them if they refused, but rather sought to force them, willing or not, to receive the ordinances of the Roman Catholic Church. For instance, it made baptism by the parish curate compulsory in every case, and declared that no marriage was valid unless performed by a Roman priest. This attempt to force people into the Church of Rome only drove them further from it. Antoine Court (q. v.) was supported by multitudes. The Provincial Synods, which he had reinvigorated, multiplied; and, to meet the want of pastors, he opened a school of theology at Lausanne, which continued to supply the Protestant Church with pastors until the time of Napoleon. From 1730 to 1744 the Protestants enjoyed quiet. In the latter year a National Synod was held in Lower Languedoc. When the news of the holding of this synod reached Paris, it caused the king and his ministers to embark in a new crusade of horrors against the defenceless Protestants. This caused a new emigration. Calmer days followed the storm, and, after 1760, principles of toleration began to prevail. The school of Voltaire, while doing incalculable injury to the cause of religion and morality generally, did good service in spreading the principles of toleration and of religious liberty. The nation gradually became leavened with these principles. Louis XVI, though rather inclined to the opposite principles, was ultimately obliged to yield to the spirit of the age, and in November, 1788, he published an edict of toleration. The privileges granted by this edict to those who were not Roman Catholics were the following: 'The right of living in France, and of exercising a profession or trade in the kingdom, without being disturbed on account of religion; the permission to marry legally before the officers

of justice; the authority to record the births of their children before the local judge.' It also included a provision for the interment of those who could not be buried according to the Roman Catholic ritual" (Eadie, s. v.).

The Reformation of Luther found early adherents in France, some of whom suffered martyrdom for their faith [see REFORMATION in France], but the influence of Calvin soon prevailed. In 1648, Alsace, and a number of other districts and towns in which the Lutheran Church was either exclusively or partly established, were ceded to France by the Peace of Westphalia. Religious liberty was guaranteed to the Lutherans, and again confirmed by the Peace of Nymvegen in 1678. On the same terms France acquired, in 1681, Strasburg, and in 1796, from Wurtemberg, Mompelgard. The congregations of these districts gradually coalesced into the one evangelical Lutheran Church of France, showing the divergencies of its origin by the variety of liturgies, hymn-books, catechisms, etc. which are still in use. The free exercise of their worship has not, on the whole, been interfered with; yet many royal decrees have favored the Roman Church and proselytism, and the number of entire congregations which have been brought back to the Roman Church is said to be over sixty.

The National Assembly of 1789 gave to all religious denominations equal rights, yet the Revolution soon afterwards raged against the Protestant churches as much as against the Roman Catholic. Peace and order were first restored by the decree of 1802, in which Napoleon assigned to the clergymen of the French Reformed and the French Lutheran churches salaries from the public treasury, and gave them, of his own authority, a new constitution. The principal points of this constitution were as follows: The lowest ecclesiastical board for both denominations is the *Consistory*, which consists of the pastors of the consistorial district, and from six to twelve laymen. There is to be one Consistory for every 6000 souls, no matter whether they belong to one or to several congregations. The lay members are elected every other year from the number of those citizens who pay the highest taxes. The Consistory is presided over by the oldest pastor. In the Reformed Church five consistorial districts form one synodal district. The *Provincial Synod* consists of one pastor and one elder from every congregation. The president is elected. The synod cannot be convoked without the permission of the government; can discuss only subjects which have previously been brought to the knowledge of the minister of public worship, and in the presence of the prefect or an officer delegated by him; and can remain in session only six days. The Lutheran Church is divided into *Inspections*, the assemblies of which correspond to the Provincial Synods of the Reformed Church, with this difference, however, that the assemblies of the Lutheran Church elect for lifetime one inspector and two lay adjuncts, who have the right to visit the churches. Above these provincial synods stands in the Lutheran Church a kind of central synod, called the *General Consistory*. It consists of a lay president and two clerical inspectors, appointed by the government for life, and of one lay deputy from every inspection elected for life. This board is subject to the same restrictions as the Provincial Synods and the Assemblies of the Inspections. In the interval between the sessions, a committee, consisting of the president, the elder of the two inspectors, two lay members designated by the General Consistory, and a commissary appointed by the head of the state, acts as the supreme administrative board of the Church. This responsible committee is called the *Directory*. At first this new constitution was regarded with great favor by the Protestants, but its defects soon revealed themselves. The Reformed Church complained that the Provincial Synods were never convoked. The want of Presbyterian Councils

was so palpable that they were organized in spite of the silence of the law, in the Reformed Church, under the name of *Consistoires Sectionnaires*; in the Lutheran Church, under the name *Conseils Presbyteraux*. The larger Reformed congregations also appointed *deacons*, to have the care of the poor, and this example was imitated by the Lutheran congregation of Colmar. During the reign of Napoleon and that of the Bourbons, no improvement of the law could be expected, because the one was too absolute, and the other too hostile to Protestantism. Under Louis Philippe several attempts were made to reorganize the Church, but dissension between the government and the Church boards, and, in the Lutheran Church, between the Inspections and the General Consistory, frustrated all these efforts. After the Revolution of 1848, both churches availed themselves of the liberty granted to them, and held General Assemblies, which prepared drafts of new constitutions, and also expressed a desire for union between the two churches. Louis Napoleon returned to the principles of the former legislation, and by a decree of March 26, 1852, re-established the law of 1802, with a few alterations. According to these alterations, Presbyterial Councils, based on universal suffrage, are established in both churches; from them Consistories proceed, which elect their clerical president, who must, however, be approved by the government. The Reformed Church receives, moreover, from the government a *Conseil Central*, as supreme ecclesiastical board, the members of which are appointed by the government. But the Consistories have not yet admitted the authority of the *Conseil*, which, in fact, is only an organ for the government rather than for the churches. In the Lutheran Church the inspectors are in future to be appointed for life by the government, instead of being elected by the district assemblies. The supreme Church board is called the *Supreme Consistory*, and the government appoints its president and one member. All the inspectors are also members of this Supreme Consistory, with two lay deputies from each inspection district, and one deputy of the theological seminary. The election of these latter two classes is left to the Church. The Directory has the right of appointing all pastors, subject to the approval of the government. Soon after the publication of the decree of March 26, a new division and an increase of the consistories of the two churches, and of the Inspections of the Lutheran Church, took place. This reorganization of the two churches afforded to both this theoretical advantage, that each department was assigned to a Consistory, and that henceforth congregations could be formed without having to encounter obstacles on the part of Roman Catholic boards. On the other hand, it was pernicious to the interests of the dissenters, many of whose churches and schools were closed in the purely Roman Catholic districts. In consequence of the hostility of the bishops, and their influence in the provinces, the Protestants had frequently to suffer from articles 291, 292, and 294 of the Napoleonic Criminal Code, according to which all associations of twenty persons or more, without previous authorization of the government, are forbidden. This law has frequently been put in force against the religious meetings of the Protestants, both in the state and in the free churches, in places where there are no church edifices. Many of these grievances were redressed on the establishment of the Republic, when a minister of public worship declared those articles not to be applicable to religious meetings. They hope to find some relief from a recent law of March 19, 1859, which takes the authorization of new churches, chapels, and oratories out of the hands of the prefects, and transfers it to the State Council, which is less suspected of yielding to the influence of the bishops and the Roman Catholic party.

A great revival in the Protestant churches commenced about 1820. Those who, under the influence of this revival, sought to unite themselves by closer spiritual bonds than the state churches afforded them, were generally designated by the name *Methodists*, although they were not organized as a Methodist denomination. Many of the converts kept themselves aloof from the state churches, and began to lay the foundation of independent congregations. In the state Church a violent contest arose between the Evangelical and the Rationalistic parties. The "*Evangelical Association*," founded in 1833, was supported as a home missionary society by evangelical Christians both in and out of the state churches. A large number of religious societies sprung up, partly supported by only one of the great parties, but partly also by both. In 1848, Frederick Monod (q. v.), with several other clergymen of the Evangelical school, seceded from the Reformed State Church because the synod of the Church refused to demand from all ministers an adhesion to the fundamental articles of the evangelical faith. With the assistance of count de Gasparin and others, he succeeded in having all the dissident churches united into a *Union des églises évangéliques de France*," which held its first General Synod in 1849. The churches belonging to this union are entirely independent of the state, and their General Synods now meet biennially. In both the state churches some leading men and journals of the Rationalistic party have gone so far as to avow undisguised deistical views, and all attempts to force them out of the Church have failed. On the other hand, when a pastor of the Evangelical school showed an inclination towards Baptist views, the choice was left to him either to recant or to secede.

11. *Ecclesiastical Statistics of France.*—(1.) *The Roman Catholic Church.*—The Roman Catholic Church had, at the beginning of the year 1869, eighteen archbishoprics, viz. Aix, Alby, Algiers (established in 1867), Auch, Avignon, Besançon, Bordeaux, Bourges, Cambrai, Chambray, Lyons, Paris, Rheims, Rennes (established in 1859), Ronen, Sens, Toulouse, and Tours. A number of the archbishops are generally cardinals (in 1868, five), who, as such, are senators of the empire, and receive a higher salary. The number of bishoprics is 69 in France, 2 in Algeria, 3 in the colonies (Martinique, Guadeloupe, and Reunion); total, 74. Since the overthrow of Louis Philippe, the bishops have claimed the right to meet, without previous authorization from the government, in Provincial Synods, and many such synods have since been held. The archbishops and bishops are assisted in the administration of their dioceses by vicar-generals, whose number ranges from two to fifteen, and by two or three secretaries. The ecclesiastical courts have risen in importance since the re-establishment of the provincial and diocesan synods, and consist of a president, an *official*, a *vice-official*, a *promoteur*, one or several assessors, and one *greffier*. As the bishops are not elected, but nominated by the government, the chapters have less importance than in other countries. The canons of these chapters, all of whom are appointed by the bishops, form three classes, called *chanoines d'honneur*, *chanoines honoraires*, and *chanoines titulaires*. The third class contains the active resident members. The first class contains bishops of other dioceses; the second class (the most numerous), many pastors, vicars, professors of theological faculties, presidents of seminaries, colleges, and institutions, both Frenchmen and foreigners. Rural deaneries, other chapters, and the office of archdeacon were swept away by the Revolution, but a new chapter of St. Denys (Dionysius), prominent not so much by influence as by high position, has been founded, near the tomb of the imperial family, by Louis Napoleon. It has two classes of members: first, the bishops who have retired; and, secondly, ten canons, with ten honorary members, these latter including the imperial chaplains. The

lower clergy are divided into *curés, desservants, and vicaires*. There are about 3600 of the first, about 32,000 of the second, and more than 9000 of the third class. Besides, there are a number of *aumôniers* (chaplains) appointed for the lycæums, colleges, normal schools, hospitals, and jails; also for the army and the navy, each of which has its *aumônier en chef*. Thus the total number of the lower (secular) clergy exceeds 40,000. In the administration of the secular affairs of the parishes, some members of the laity take part as *marquilliers de paroisse* (treasurers), or members of the so-called *Fabrique* (church council).

In the Roman Church, the religious orders and communities of the clergy, and societies and confraternities among the laity, are very numerous. Among the monastic orders the Jesuits (q. v.) occupy a prominent position, both by the number of their establishments and by their influence. Some of their members (e. g. Ravignan and Félix) have shone as the greatest pulpit orators of modern France. The Benedictines (q. v.) have re-established a convent at Solemnes, and have resumed the literary labors of their order, but have not been able as yet to obtain many members. The Dominicans, though not very numerous, have gained prestige from the reputation of Lacordaire, who re-established the order in France. Nearly all the monastic orders of the Roman Church have now some establishments in France, and a number of new ones (e. g. the *Oblates, Marists*, and society of *Piepus*) have been founded. Many of the religious orders and communities devote themselves with great zeal to the work of foreign missions. At the head of them are the *Lazarists* (q. v.), whose principal establishment is in Paris. With them vies especially the *Seminary of Foreign Missions* at Paris, which was founded in 1663, abolished in 1792, and re-established in 1825. It is under the administration of a superior and six directors, and sends out every year large numbers of missionaries to Eastern Asia. The *Oblates, the Marists, the Piepus Society, the Jesuits, the Priests of Mercy, the Capuchins*, and many other orders and congregations, sustain missions in foreign lands. A new missionary seminary for the missions in Africa was established at Lyons in 1858. The communities of *women*, who nurse the sick and the aged poor, or devote themselves to teaching and to the reformation of prisoners and wretched females, are very numerous and prosperous. Many of these congregations and societies—as the *Sisters of Charity* (q. v.), the congregation of the *Good Shepherd* (q. v.), the *Little Sisters of the Poor*, etc.—increase with a rapidity which is almost without example in the entire history of the Roman Church. The religious societies among the *laity* also increase in strength and numbers every year. The most important among them are the *Society for the Propagation of the Faith*, the central missionary society of the Roman Church, to which now nearly all countries of the world contribute. It was founded in France in 1822, has its centres at Paris and Lyons, and its contributions amount to about 5,000,000 francs annually, more than one half of which is contributed by France. The society publishes a bimonthly, *Annals of the Propagation of Faith*, in various languages. The central children's missionary society of the Church, called the *Society of the Holy Childhood*, has its central organization in France. Its annual income amounts to about 1,000,000 francs. The *St. Vincent Society*, for visiting and assisting the poor, has established branch associations in more than 3000 localities, and expends for the assistance of the poor more than 3,000,000 francs annually. Primary education in France is almost entirely under the control of the bishops. Most of the schools are conducted by religious congregations, such as the Brothers of the Christian Schools, the Brothers of the Christian Doctrine, the Brothers of St. Joseph, Brothers of Mary, Brothers of the Society of Mary, Daughters of the Holy Spirit, and many others. The

seminaries, in which those who have the priesthood in view are educated from their early boyhood (*Grands et Petits Séminaires*), are now, as they always have been, under the sole control of the bishops. The relations of the Church to the State colleges were, until the Revolution of 1848, not to the satisfaction of the bishops, although every college had its chaplain. The controversy between Church and State on this point was terminated by the law of March 15, 1850, which grants to the Church the liberty to found free colleges. This permission has called into existence a very considerable number of Roman Catholic colleges and boarding-schools. Faculties of theology exist at Paris (the *Sorbonne*), at Lyons, Rouen, and Bordeaux, but, as the professors and deans are appointed by the minister of public worship, they do not enjoy the patronage of the bishops, and have but a limited number of students. Moreover, the course of studies at the three last-named is by no means superior to that of the *Grands Séminaires*. In order to promote the study of scientific theology, which, on the whole, is cultivated but little, the bishops have organized at Paris an *école ecclésiastique des hautes études*.

Nominally, the immense majority of the population of France is still connected with the Roman Catholic Church. The census of 1851 claimed out of the entire population (35,781,627) 34,931,032 as Roman Catholics. At the last French census the religious denominations were not taken into consideration. In 1866 the Roman Catholic population of the French dominions was estimated as follows: France, 36,000,000; French possessions in America, 314,000; Algeria, 190,000; other French possessions in Africa, 133,000; possessions in Asia, 200,000; possessions in Oceania, 30,000. A very large portion of these, however, are practically not only without any connection whatever with the Church, but even decided opponents of it. Among the daily journals published at Paris only a few are considered as Roman Catholic papers. The number of religious journals, in proportion both to the Roman population of France and to the religious press of other Roman Catholic countries, is small. The most important among the Roman Catholic papers are the *Monde* and the *Univers*, both dailies of Paris, and counted among the most important organs of the ultramontane party in the world.

The following table gives the list of ecclesiastical provinces, with number of dioceses, clergy, and religious communities in each, as reported in 1868:

Provinces.	Dioceses.	Curés.	Succursales, or Perpetual Curates.	Vicaires, or Curates.	Relig. Communities.
Aix.....	7	226	1373	362	163
Alby.....	5	185	1830	572	114

(2.) *Protestantism*.—Of the Protestant churches of France, two, the Reformed and the Lutheran, are recognised as state churches. The French government appropriates a certain sum of money every year for their support. The budget for 1861 gave, as the total sum of this appropriation, 1,462,236 francs—a little less than 300,000 dollars. It was divided as follows, namely: for the salaries of Reformed pastors, 890,400 francs; salaries of Lutheran pastors, 415,750 francs; in aid of

theological schools, 32,000 francs. The remainder was devoted to buildings and repairs, to the support of widows, and to incidental expenses. The salaries are allotted by law, according to the population of the communes, or districts. The pastors of Paris receive 8000 francs; pastors of communes with a population of over 30,000 souls have 2000 francs; from 30,000 down to 5000 souls, 1800 francs; below 5000 souls, 1500 francs. Thus a pastor in one of the state churches in the poorest village in France, or in a remote country parish, is insured a salary of 300 dollars a year. The communes are allowed to add to the stated salary where they are able and willing to do so. Some of the parishes, especially in the departments of the Doubs, Bas-Rhin, Haut-Rhin, and Vosges, have funded or real property, the proceeds of which are devoted either to the support of the pastor, or to repairs, church expenses, etc. Collections for parish purposes, or for the poor, are taken up at the church-doors every Sunday. In general, the parishes have parsonages; where they have not, the communes are bound by law to furnish a subsidy for rent, unless the funds of the parish afford sufficient income for the purpose. "A garden," to cite the language of the law, "is not *de rigueur*, but the communes are authorized to provide it" (*Napoleon's Decree of May 5, 1806*). The state also provides for two Protestant theological seminaries—one at Strasburg, for the Lutheran Church, and the other at Montauban, for the Reformed Church. None but French citizens can become pastors. No doctrinal decision or formulary, whether called a confession of faith or by any other title, can be published, or be made the basis of instruction, without authorization from the government, nor can any change of discipline be made without the same authorization. No one can be admitted to the ministry before twenty-five years of age. No parish can augment its number of ministers without the consent of the government. No religious service at which more than twenty persons shall assemble can be held except in an authorized place of worship. No preacher is allowed to inculcate individuals, directly or indirectly, in his sermons, or to attack the Roman Catholic religion, or any other authorized by the state. The highest Church judicatories are, in part, filled with nominees of the government, and no real autonomy of the churches is allowed. The professors in the theological schools, though nominated by the Church authorities, are appointed by the government.

*Reformed Church.*—The highest judicatory of the Reformed Church, as already stated, is the *Conseil Général* (Central Council) at Paris. The decree of 1852, which established this council, ordered that it should be composed, "for the first time, of eminent Protestants appointed by the government, together with the two oldest pastors in Paris." How vacancies are to be filled was not stated. Its president for 1868 was General Dantheville, of the Engineers; secretary, M. Sayous, sub-director of the non-Catholic cults in the Ministry of Worship. Besides them there were 11 other members. The Council is the organ of communication between the Reformed Church and the government of the state. Its functions are not clearly defined, and its working, on the whole, has not been satisfactory. The governing bodies of the Church, under the Central Council, are the Consistories, Synods, and Presbyterian Councils. The whole of France was in 1868 divided, for the Reformed Church, into 104 Consistorial Districts, intended to embrace at least 6000 souls each, though this result can only be approximately reached. The Consistory is composed of all the ministers of the Consistorial District, and of a body of laymen elected by the Presbyterian Councils of towns other than the chief town of the parish. The Presbyterian Council of the chief town belongs to the Consistory *ex-officio*. The president is elected by the Consistory, subject to the approbation of the government of the state. The functions of the Consistory are to see that church-worship

and discipline are regularly observed; to receive, judge of, and transmit to the government the acts of the Presbyterian Councils; and to superintend the schools of the district. It has no legislative power whatever, but superintends the general interests, both religious and financial, of the parishes under its jurisdiction. It nominates to the government pastors for vacant parishes. The *Presbyterial Council* is a body of laymen in each parish, not less than four in number, nor more than seven. They are elected by the parish every three years. The minister of the parish is president of the council. Its functions are to administer the property, order, and discipline of the parish, under the authority of the Consistory. The *Synods* are essentially ecclesiastical bodies, superintending the spiritual element, as the Consistories do the general administration of the Church. Five consistorial churches constitute a Synodal District, and each send a clerical and lay deputy to the Synod, which thus consists of ten members. Of these Provincial Synods there are twenty-one in France. No periodical sessions are allowed, nor can any session be called without the permission of the government, to whom the questions to be treated at the session must be stated beforehand. A preface, or sub-preface, must be present at the sessions, which cannot last more than six days. The result of all these restrictions may readily be imagined. The Provincial Synods either do not meet at all, or, if they do, their sessions have no import for the life and government of the Church. No *National Synod* is provided for, and none is held. Thus the Reformed Church of France lacks the most vital element of presbyterian connectional government—a General Assembly. The feebleness of the Church government is lamentably manifest in many points. The present contest about Rationalism brings this weakness out in the strongest light. The old French confession of faith is nominally the standard of doctrine, but a man may preach Unitarianism, Universalism, or even Pantheism, and there is no power to call him to an account before any ecclesiastical tribunal competent to try him and to depose him. The *Theological Seminary* of the Reformed Church is at Montauban, in the South of France (Tarn et Garonne). No one can be a minister in the Reformed Church of France without a certificate that he has studied at one of the theological schools (of France or Geneva), and the diploma of bachelor in theology. All the regulations of the theological schools must be approved by the government. According to Th. de Prat, *Annuaire Protestant*, 1868-1870 (Paris, 1868), the statistics of the Reformed Church in 1868 were as follows: Consistories, 104; parishes, 508, with 597 "*auxerres*;" temples or oratories, 403; schools, or "*salles d'asile*," 1385; official pastors, 606; auxiliary pastors, suffragans, and *aumoniers* (chaplains), 86. The population reported by the Consistories (eight Consistories which made no report being estimated) amounts to 630,000.

*Lutheran Church.*—The highest judicatories of the Lutheran Church are the Higher Consistory and the Directory. Under these are Inspections, Consistories, and Presbyterian Councils. The *Higher Consistory* consists of 27 members, all holding office for life. It is composed of a president and one layman nominated by the government; of 16 laymen chosen by the Inspections or Inspectoral Assemblies; of one professor from the theological seminary, chosen by the faculty; and of eight pastors, who are at the same time inspectors. It meets at least once a year, and at any other time when summoned by the government. Its duty is to watch over the constitution, discipline, and worship of the Church; to form a final court of appeal; to audit the account of lower judicatories. Its seat of government is Strasburg, but it is represented officially by the Consistory of Paris. The *Directory* consists of five members, also holding office for life; the president, appointed by the government (who is also pres-

ident of the Higher Consistory); one lay member and one clerical inspector appointed by government; and two deputies named by the Higher Consistory. Its functions are purely administrative, but that means a great deal in France. It nominates to the government all the pastors, and has full authority over the schools and the theological seminary, not only to name the professors, but to direct the course of instruction. The *Inspections* are territorial districts, under the government of Inspectors or Inspectoral Assemblies. Of those there are now eight in France, composed of one or more Consistories; the largest Inspection includes nine Consistories. The Inspectoral Assembly includes all the pastors embraced in the district, and an equal number of laymen chosen by the Consistories. They meet only at times fixed by the state. In each Inspection there is an ecclesiastical inspector appointed by the government, who convokes and presides over the Inspectoral Assemblies. These inspectors, under the authority of the Directory, visit each parish at least once in four years; ordain and install ministers; have supervision over the publication of books for schools, etc.; and, in fact, have general administrative supervision of the district. The *Consistories* of the Lutheran Church of France are forty-four in number. They are composed of both lay and clerical members, the laymen holding office for three years. All the pastors of the district, with the members of the Presbyterial Council of the chief city, and an equal number of laymen chosen by the more popular parishes, constitute the Consistory. The functions and jurisdiction of the Consistories are very much the same as those of the Consistories of the Reformed Church, which have already been described. One of the most important points of difference between them is, that in the Reformed Church the Consistories nominate the pastors, while in the Lutheran this function is discharged by the Directory, as above stated. The powers and duties of the *Presbyterial Councils* are similar to those of the Reformed Church. The theological seminary of the Lutheran Church is at Strasburg. The president of the Directory is *ex-officio* director of the seminary. There are six professors, whose salaries are paid by the state. The faculty of theology are also professors in the *Seminary* of Strasburg, which has, besides, five other professors in philosophy and philology. The school is well organized and conducted.

According to the *Annuaire Protestant*, the statistics of this Church in 1868 were as follows: 44 Consistories, 233 parishes, 202 annexes, 386 temples (96 were subject to the *simultaneum*, or joint use by the Reformed Church), 713 schools, 271 official pastors, 46 vicars, auxiliary pastors, and *armoniers*. According to the reports furnished by 42 Consistories, and estimates for the two other Consistories, the Lutheran population amounted to 305,000.

In Algeria, the United Protestant Church (Reformed and Lutheran) has 3 Consistories, 16 parishes (9 Reformed, 7 Lutheran), 66 annexes, 25 temples or oratories, 14 schools, 16 official pastors (7 Reformed, 9 Lutheran).

*Indépendant Churches.*—The largest body of independent (i. e. not state) Protestants in France is that which is organized under the name *Union des Eglises Evangéliques de France* (Union of Evangelical Churches of France). Five churches in Paris, with nine stations, are connected with the Union. The number of provincial churches is 49. There are 18 additional stations connected with the provincial churches. The total membership is 2735, an average of 60 to each church. The largest church is that of the Taitbout, in Paris, with 210 members. There are seven independent churches not in connection with the Union, and numerous small congregations served by pastors of the societies. In Algeria the Union has six stations. As yet the Union has no theological seminary. Its candidates for the ministry study at Geneva or Lausanne,

and aid is furnished by an education society to such students as need it. There is great vitality in this organization; it numbers Pressensé, Bersier, and de Gasparin among its leaders.

The Evangelical Society of France is a powerful auxiliary to the Union of Evangelical Churches. It reported for 1868 the following statistics: Expenditure, £5240; agents aided by its funds, nearly 50, of whom 11 are pastors, 8 evangelists, and 27 teachers.

The Independent Evangelical Church of Lyons (not included in the Union) had in 1868 six places of worship, with five pastors and eight evangelists. Number of members, 700, mostly converts from Roman Catholicism; children in Sunday-schools, 250; in day-schools, 300. The Church has eight libraries, an infirmary for the indigent, and a retreat for aged women.

The Baptists have had societies in France for more than twenty years. They are in relation with the American Baptist Missionary Union, from whose funds they derive a part of their support. Their number of members in 1868 was reported at about 300, mostly converts from Romanism; nine churches, ten pastors, and perhaps forty preaching-places.

Though there were Methodists in France before the beginning of the 19th century, they were not organized as a French denomination until 1852. Their Conference embraces also French Switzerland. The theological students attend the lectures of the theological faculty of the Free Church of the Canton of Vaud. At the seventeenth Conference, held in Paris in June, 1868, the following statistics were reported: districts, 3; circuits, 16; chapels and preaching-rooms, 184; ministers and probationers, 30; colporteurs and day-school-masters, 20; local preachers, 110; members, 1979; on trial, 146; day-schools, 11; Sunday-schools, 57; Sunday-school teachers, 277; scholars, 2588.

The *Annuaire Protestant* gives five Moravian and four "Anabaptist" churches. It has no statistics of the Darbyites, Irvingites, Hinshists, and other small sects, of which it says there are some churches in France.

The Jews have 10 high rabbis, with salaries of from 3500 to 7000 francs; 66 rabbis, with incomes ranging from 800 to 1500 francs; and 64 preceptors, with allowances of from 500 to 2000 francs. The Jewish population in 1866 was estimated at 159,000 in France, and 35,700 in Algeria.

See Herzog, *Real-Encyclopädie*, iv, 489 sq., 529 sq.; *Gallia Christiana in provinciis ecclesiasticis distributa opere et studio Dionysii Sammarthani* [St. Martine] (Paris, 1715-25, vol. i-iii; *Opere et studio monach. cong. S. Mauri*, 1728-70; vol. iv-xii; 1785, vol. xiii); Fiquet, *La France Pontificale* (*Gallia Christiana*) *Hist. chronologique et biographique des archevêques et évêques de tous les diocèses*, etc. (Paris, 1865, vol. i; 1866, vol. ii); Jager, *Histoire de l'Eglise Catholique en France depuis son origine jusqu'au Concordat de Pie VII* (Paris, 1863-66, vol. i-xiii); (Beza), *Histoire ecclésiastique des églises réformées du royaume de France*; De Félice, *Hist. des Protestants de France* (Paris, 1850); Vincent, *Vues sur le Protestantisme en France* (Nismes, 1829, 2 vols.); Bost, *Mémoires pour servir à l'histoire du reveil religieux des églises prot. de la Suisse et de la France* (Paris, 1854, 2 vols.); Mäder, *Die protestant. Kirche Frankreichs von 1787 bis 1846* (ed. by Gieseler, Leipzig, 1848, 2 vols.); Reuchlin, *Das Christenthum in Frankreich* (Hamburg, 1837); Puaux, *Hist. de la Réformation Française* (Paris, 1863-64, 6 vols., of popular caste and little scientific value); Soldan, *Gesch. des franz. Protestantismus bis zum Tod Carl's IX* (1853, 2 vols.); Polenz, *Gesch. des franz. Calvinismus* (Gotha, 5 vols.). A periodical specially devoted to the history of French Protestantism is published by Haag (*Bulletin de la Société de l'Histoire du Protestantisme Français*). A biographical dictionary of celebrated French Protestants was also published by Haag (*La France Protestante*, 8 vols.). For the statistics of France, see

Wiggers, *Kirchl. Statistik*, ii, 60-84; Neher, *Kirchl. Geographie und Statistik*, vol. i (Ratisbon, 1864); *La France Ecclesiastique* (annual, Paris) gives the statistics of the Roman Catholic Church; De Prat, *L'Annuaire Protestant*, 1868-70 (Paris, 1868); McClintock, in *The Methodist*, 1861, February, March, and April. **Francfort.** See FRANKFURT.

**Francis of Assisi**, founder of the order of Franciscans, was born in 1182 at Assisi, in Umbria, where his father, Peter Bernardone, was a rich merchant. The son was intended also for business; but, having a taste for military life, he took part in a contest between Assisi and Perugia, and was taken prisoner. After a year's captivity he was released. Soon after, an illness brought him near the gates of death. He determined to renounce the world. But, on recovering his health, he abandoned his religious life and plunged into gayety. Suddenly conscience-stricken, he vowed to live a life of poverty. The following incident illustrates the character of his religion at this time. "Worshipping in a country church consecrated to St. Damian, he seemed to hear a voice saying, 'Francis, go and prepare my house, which thou seest falling into ruins.' What was the man pledged to poverty to do? He quietly went home, stole a horse from his father's stable, then went to his father's warehouse, and stole from thence silks and embroideries, with which he laded the purloined horse, and sold both horse and goods at the neighboring town of Foligno. Romish casuists say that this action was justifiable by the simplicity of his heart. It is clear that his religious training had not instructed him in the ten commandments. He offered the money to the officiating priest at St. Damian, who cautiously refused to take it. Francis cast the money into the mire, but vowed that the building should be his home until the divine behest had been fulfilled. His father found him out, and, though Francis was twenty-five years old, gave him a sound whipping, and put him into prison in his own house. Francis was set at liberty by his mother during his father's absence from home. He returned to St. Damian's, and his father followed him thither, insisted that he should either return home, or renounce before the bishop all his share in his inheritance, and all manner of expectations from his family. The son accepted the latter condition with joy, gave his father whatever he had in his pockets, told him he was ready to undergo blows and chains for the love of Jesus Christ, and went with his father before the bishop of Assisi to make a legal renunciation of his inheritance in form." By the world, and, it would seem, by his father himself, he was regarded as a madman, but the bishop viewed the enthusiasm of the youth with allowance, and treated him with kindness. He soon after renewed his vow of poverty, imagining himself warned from heaven to do so. He begged for and labored at the restoration of several churches. At this time he pretended to the gifts of prophecy and miracles. He soon attracted followers, and, associating with himself Bernard of Quintavalle and Peter of Catania, on the 16th of August, 1209, laid the first foundation of the *Franciscan order*. The number of his adherents increased rapidly, and he drew up, in twenty chapters, a rule for his order. He carried his rule to Rome, there to obtain for it the sanction of pope Innocent III, who regarded Francis as a madman, but saw how well fitted for his purposes such a man and such an order might be. He ordained Francis a deacon in 1210, and gave his verbal approbation to the rule he had drawn up. Among his triumphs we must record his conversion of Clara, or St. Clare. See CLARE, ST. Born to rank and fortune, St. Clare had recourse from her early years to ascetic practices. She heard of Francis, was captivated by the lustre of his piety, and,

assisted by him, she eloped from her friends. "Although a saint, Francis was obviously deficient in the moral sense. They fled to the Portiuncula, a church which the Benedictines had now given to the Franciscans. He was in his thirtieth, she in her nineteenth year. She was welcomed by the monks and attended by her spiritual guide, and took sanctuary in the neighboring church of St. Paul until arrangements could be made for her reception in a convent. Francis, regardless of filial duty and parental authority, induced her two sisters, Agnes and Beatrice, notwithstanding the agony of her father, to follow her in her flight, and to partake of her seclusion. The church of St. Damian became the convent of the *Order of Poor Sisters* thus established. It was at first the design of Francis and his associates to study how they might die to the world, living in poverty and solitude. But, now that he had reached a summit of renown and influence, he imagined that he had a further commission. He consulted Silvester and Clara, who declared that it was revealed to them that the founder of their order should go forth to preach. And the Franciscans became a preaching order, though the founder was an illiterate man. He persevered in his devotion to poverty, though many of his followers soon showed an inclination to appropriate to themselves some of the comforts of life. He would not permit even his churches to be richly decorated; they were to be low and unadorned. He was continually devising new methods of afflicting and mortifying his body. If any part of his rough habit seemed too soft, he sewed it with packthread. Unless he was sick he rarely ate anything that was dressed with fire, and when he did he usually put water or ashes upon it. He fasted rigorously eight Lents in the year" (Hook, s. v.).

It is unnecessary to record the miracles he was said to have performed. In Roman Catholic phrase, he had a singular devotion to the Virgin Mary, whom he chose for the patroness of his order, and in whose honor he fasted on the feast of St. Peter and St. Paul to that of the Assumption. Roman writers tell us that he was endowed with an extraordinary gift of weeping; his eyes seemed two fountains of tears, which were almost continually falling from them, inasmuch that at length he almost lost his sight. "When the physician prescribed that, in order to drain off the humors by an issue, he should be burnt with a hot iron, Francis was very well pleased, because it was a painful operation and a wholesome remedy; when the surgeon was about to apply the searing iron, Francis spoke to the fire, saying, 'Brother fire, I beseech thee, burn me gently, that I may be able to endure thee;' he was seared very deep from the ear to the eyebrow, but showed no sign of pain!"

At length, finding Europe insufficient for his zeal, he resolved to preach to the Mohammedans. With this view he embarked, in the sixth year after his conversion, for Syria, but a tempest drove him upon the coast of Dalmatia, and he was forced to return to Ancona. In 1214 he set out for Morocco, to preach to the famous Mohammedan king Miramelin, and went on his way; but in Spain he was detained by a fit of sickness, and by various accidents, so that he could not go into Mauritania. But he wrought several pretended miracles in Spain, and founded there some convents, after which he returned through Languedoc into Italy. Ten years after the first institution of the order in 1219, Francis held near the Portiuncula the famous general chapter called the *Matts*, because it was assembled in booths in the fields. Five thousand friars met on the occasion. The growing ambition of the order showed itself in their praying Francis to obtain from the pope a license to preach everywhere, without the leave of the bishops of each diocese. Francis rebuked them, but employed the more ambitious spirits on foreign missions. He reserved for himself the mission to Syria and Egypt, but the affairs of his order

obliged him to defer his departure. Innocent III had approved of his order by word of mouth. Honorius III, who succeeded Innocent in 1219, had appointed cardinal Ugolino to the post of protector of the Minorite brethren, and approved of their missions. Francis set sail with Illuminatus of Reate and other companions from Ancona, and landed at Acre or Ptolemais in Palestine. The Christian army in the sixth crusade lay at that time before Damiatta. Francis was taken by the infidel scouts, and brought before the sultan, who treated him as a madman, and sent him back to the Christian camp. He returned by Palestine into Italy, where he had the affliction to find that Elias, whom he had left vicar-general of his order, had introduced several novelties and mitigations, and wore himself a habit of finer stuff than the rest, with a longer capuche or hood, and longer sleeves. Francis called such innovators bastard children of his order, and deposed Elias from his office. Resigning the generalship that year (1220), he caused Peter of Cortona to be chosen minister general, and after his death, in 1221, Elias to be restored. Francis continued always to direct the government of his order personally while he lived. Having revised his rule and presented it to Honorius III, it was confirmed by a bull dated the 29th of November, 1223. In 1215, Count Orlando of Cortona had bestowed on Francis a secluded and agreeable residence in Mount Alberno, a part of the Apennines, and built a church there for the friars. To this solitude Francis was accustomed to retire. Shortly before his death, according to his monkish chroniclers, he had a vision of Christ under the form of a seraph. "The vision disappearing, left in his soul a seraphic ardor, and marked his body with a figure conformed to that of the crucified, as if his body, like wax, had received the impression of a seal; for soon the marks of the nails began to appear in his hands and feet, such as he had seen in the image of the God-man crucified. See STIGMATA. His hands and feet were pierced with nails in the middle: *the heads of the nails, round and black, were on the palms of the hands and fore part of the feet. The points of the nails, which were a little long, and which appeared on the other side, were bent backwards on the wound which they made. He also had on his right side a red wound, as if he had been pierced with a lance, which often shed sweet blood on his tunic.*" Francis is said to have concealed this singular favor of heaven ever after by covering his hands with his habit, and by wearing shoes and stockings—a modesty which prevented others from seeing, and therefore from bearing witness to the marks, for whose existence we have no evidence. The bishop of Olmutz denounced the miracle as irrational. A papal bull in 1255 vindicated the claims of the miracle. "The Dominicans represented the whole affair as an imposture, the invention of the new order of Franciscans to raise their credit, but it is now generally believed in the Romish Church." Worn out at last, Francis retired to Assisi. In a year he began to act as an itinerant preacher throughout Umbria, and it was "during this time that a woman of Bagnarea brought an infant to him that it might be healed. Francis laid his hands on the child and it recovered; that child grew to be a man, and that man Bonaventura (q. v.), who proved his gratitude by becoming the biographer of Francis, carefully recording all the wonderful circumstances of his life, and working them up into a beautiful fiction." In the latter part of his life he "attributed no value to self-mortification, in itself considered, but regarded it solely as a means for overcoming sensual desires and for promoting purity of heart. Love appeared to him to be the soul of all. Once, when one of the monks, who had carried his fasting to excess, was deprived by it of his sleep, and Francis perceived it, he brought him bread with his own hands, and exhorted him to eat; and as the monk still shrunk from touching it, he set him the example, and ate first. On the next morn-

ing, when he assembled his monks, he told them what he had done, and added, 'Take not the eating, but the love, my brethren, for your example.' Later in life, he did not shrink from preaching before the pope and the cardinals. 'His words,' says Bonaventura, 'penetrated, like glowing fire, to the inmost depths of the heart.' Once, when he was to preach before the Roman court, for which occasion he had committed to memory a carefully written discourse, he felt all of a sudden as if he had forgotten the whole, so that he had not a word to say. But after he had openly avowed what had occurred to him, and invoked the grace of the Holy Spirit, he found utterance for words full of power, which produced a wonderful effect on all present. Again, as the ascetic bent admits of being easily converted into a contempt of nature, so we cannot but regard as the more remarkable that love, pushed even to enthusiasm, with which Francis embraced all nature as the creation of God; that sympathy and feeling of relationship with all nature, by virtue of its common derivation from God as Creator, which seems to bear more nearly the impress of the Hindoo than of the Christian religion, leading him to address not only the brutes, but even inanimate creatures, as brothers and sisters. He had a compassion for brute animals, especially such as are employed in the sacred Scriptures as symbols of Christ. This bent of fanatical sympathy with nature furnished perhaps a point of entrance for the pantheistic element which in later times found admission with a party among the Franciscans" (Neander, *Church History*, Torrey's transl. iv, 273 sq.). Francis died in 1226, and was canonized by Gregory IX in 1230. His order soon rose to great power and splendor. See FRANCISCANS. His writings (epistles, sermons, ascetic treatises, discourses, poems, etc.), with his life by Bonaventura, were published by La Haye, general of the Minorites (Par. 1641, fol.). His life will also be found in Wadding, *Annales Minorum*, vol. i (Rome, 1731); Voigt, *Leben von Franz von Assisi* (Tübing. 1840); Clavin de Malan, *Vie de St. François* (Par. 1811, 8vo); and in Böhringer, *Kirche Christi in Biographien*, vol. ii, pt. ii, p. 489; Hase, *Franz von Assisi, ein Heiligenbild* (Lips. 1856).—Hase, *Ch. History*, p. 265; Mosheim, *Ch. Hist.* cent. xiii, pt. ii, ch. ii, n. 49; Jortin, *Remarks on Eccles. History*, vol. v; Hook, *Eccles. Biography*, v, 206.

**Francis of Borgia**, a Jesuit and saint of the Roman Catholic Church, was a Spanish nobleman, born in Valencia in 1510. After a careful education he became a courtier of the reign of Charles V, but was turned to a religious life by the solemn circumstances attending the funeral of the empress Isabella, after which he became a disciple of Ignatius Loyola, and was appointed by him to preach the Gospel in Spain and Portugal. On the death of Lainez in 1565, he was elected general of the order of Jesuits. He is the author of many ascetic writings, and contributed much to the perfection of the organization of the Jesuits. He would have been made pope on the death of Pius V, had not the state of his health prevented it. Francis of Borgia died at Rome in 1572, and was canonized by Clement IX in 1671. See *Vie de S. François de Borgia*, by Verjus, after Ribadancira (1672, 4to); Crétineau-Joly, *Histoire de La Comp. de Jesus* (vols. i, ii). The writings of Francis were translated into Latin by the Jesuit Deza (Brux. 1675, fol.).—Hoefler, *Nouv. Biog. Gén.* xviii, 487.

**Francis of Paula**, founder of the order of *Minims*, was born at Paula, in Calabria, in 1416. He was brought up in a Franciscan convent at St. Mark, where he distinguished himself by rigid asceticism. In order to exceed St. Francis himself in austerity of life, he retired to a cell on the desert part of the coast, where he soon obtained followers, built a monastery in 1436, and thence commenced a new order, called *Hermits of St. Francis*. Sixtus IV confirmed the statutes, and

named Francis superior general, 1474. He enjoined on his disciples a total abstinence from wine, flesh, and fish; besides which, they were always to go barefoot, and never to sleep on a bed. Alexander VI changed the name of the order to *Minims*, as better expressing the humility professed by the new monks. Francis died at Plessis-les-Tours, in France, April 2, 1507, and was canonized by Leo X. Francis was in high favor with Louis XI, Charles VIII, and Louis XII of France, and established many houses of his order in that kingdom, where they are called *Dons Hommes*.—Hoefler, *Nouv. Biog. Générale*, xviii, 489; Hilarian de Coste, *Le Portrait en petit de St. François de Paul* (Paris, 1655).

**Francis of Sales** (Saint) was born near Annecy, Aug. 21, 1567, and was carefully educated at the colleges of La Roche and Annecy. He went to Paris in 1578, and studied with great success at a Jesuit college; afterwards he studied law at Padua. But in 1590, much to the regret of his parents, he devoted himself to the Church, and in 1593 was ordained priest. For some years he was employed in "converting" the Protestants in Savoy, and in 1599 he got the duke of Savoy to expel the Protestant ministers from several districts. He promised Beza a cardinal's hat if he would turn Roman Catholic. In return for this service he was made coadjutor-bishop of Geneva; and on the death of the bishop of Geneva Francis succeeded him, and redoubled his zeal for the reform of the diocese and the monasteries. He instituted, in connection with Madam de Chantal, the Order of the Visitation at Annecy in 1610. He died at Lyons, Nov. 28, 1622, and was canonized in 1665. The Roman writers report the number of converts to Popery through his means as 72,000. His writings are published in a complete edition under the title *Œuvres de St. François de Sales* (Paris, 1823, 6 vols. 8vo; another edition, Paris, 1834, 16 vols.). The abbé Migne has published a new edition, 7 vols. royal 8vo (2861 sq.). His *Traité de l'amour de Dieu* (On the Love of God), and his *Philothea, or Introduction à la vie dévote*, are greatly admired, have passed through scores of editions in French, and are translated into most of the European languages. There are many lives of him; the latest are Hamon, *Vie de St. François de Sales* (Paris, 1854, 2 vols. 8vo), and Pérennès, *Hist. de St. François de Sales* (Paris, 1864, 2 vols.).

**Francis Xavier.** See XAVIER.

\* **Francis, Converse, D.D.**, a Unitarian minister, was born in West Cambridge, Mass., in 1796, and was educated at Harvard, where he passed A.B. in 1815. After completing his theological course at the divinity school in Cambridge, he became (1819) pastor of the Unitarian church in Watertown, Mass., where he remained until 1842, when he was made Parkman professor of pulpit eloquence and pastoral care at Cambridge. He filled this post acceptably until his death, April 7, 1863. He published *The Life of John Eliot, Apostle to the Indians* (1836), in Sparks's Collection of American Biography; several memoirs in the Collections of the Massachusetts Historical Society, and a number of occasional discourses. He was also a frequent contributor to periodicals.—Appleton, *Annual Cyclopaedia*, 1863, p. 202.

**Francis I**, king of France, son of Charles of Orleans, count of Angoulême, and Louisa of Savoy, was born at Cognac Sept. 12, 1494, and died at Rambouillet March 31, 1547. He came to the throne on the death of his father-in-law, Louis XII, Jan. 1, 1515. He made a concordat with pope Leo X which sacrificed the independence of the Gallican Church, and was resisted by the Parliament of France until its registry was compelled by the arbitrary measures of Francis. In 1519 he was a candidate for the imperial throne of Germany, made vacant by the death of Maximilian II, but was beaten by Charles V, and thereafter gave

expression to his disappointed ambition in efforts to humble his successful rival, which led to almost incessant wars between them, and wasted the lives and treasures of his subjects without adding to his fame or possessions. Francis sought to secure the support of Henry VIII of England, and a personal interview was held between these monarchs on a plain near Calais, called, from the magnificence displayed, the "Field of the Cloth of Gold;" but the crafty Wolsey managed to nullify the results of the meeting. The contests which followed were generally unfortunate for Francis, who in 1525 led an army into Italy, and was defeated and made prisoner at the battle of Pavia. He was only released on signing a treaty dishonorable to himself and his country, which he secretly protested against, and when once more at home openly repudiated. A powerful combination, called the Holy League, was formed to curb the ambition and power of Charles, but failed, chiefly from lack of energy and discretion on the part of Francis, whose mind was too much under the control of favorites and mistresses. With alternations of success and failure, of truce and war, these conflicts continued during the life of Francis, who sought aid of the Turks, the pope, the English, and the German Protestants, and abandoned the one or the other ally as the vacillations of feeling, the promptings of policy, or the influence of favorites determined. It is said that he finally died from the effects of a disease which an injured husband found means of communicating to him. Francis was a patron of artists and literary men, and his name is justly associated with the *renaissance* of literature and art; but he was despotic, devoted to pleasure, and grossly licentious—now inclining to religious toleration, now witnessing himself the torch applied to light the fires of the stake; in 1531 an ally of the Protestant "*league of Smalcald*," in 1545 permitting a most atrocious persecution of the peaceful Vaudois, his life presents a picture wherein the virtues of the brave chevalier are overlapped and almost hid by vices that darkened the lustre of his early fame, and left their traces in the corrupt morals of successive reigns.—Wright, *History of France* (London, 3 vols. 4to), i, 626-676; Sismondi, *Histoire des Français* (Bruxelles, 1849, 18 vols. 8vo; see Index in vol. xviii); Ranke, *History of the Papacy* (1851, 2 vols. 8vo); Hoefler, *Nouv. Biog. Générale*, xviii, 510-530. (J. W. M.)

**Franciscans**, the name of several monastic orders which follow the rule of Francis of Assisi (q. v.). Francis himself founded three orders: an order of friars, called Minorites (*Fratres Minores*), an order of nuns [see CLARISSES], and an order of Tertiaries (q. v.). These orders split into a large number of divisions, some of which even assumed other names, and became entirely independent of the original Franciscans. See MIXIMS; CAPUCIANS.

1. *Franciscan Friars.*—This order was founded in 1210; in that year, at least, Francis gave the rule which united his followers into a monastic community. As, however, their life in common commenced before that period, some historians assume the year 1208 or 1206 as the year of foundation. The origin of the Franciscans marks a turning-point in the history of monasticism, for they were the first and most prominent representa-

St. Francis.

tives of the mendicant (q. v.) orders. Francis with some difficulty, obtained the papal approbation of his order [see FRANCIS OF ASSISI] in 1210, and in 1215 he received also the sanction of the Council of Lateran. The growth of the order was astonishingly rapid. At the first General Chapter, held in 1219, more than 5000 friars assembled, and it was resolved to send out preachers of repentance to Germany, France, Spain, England, Hungary, and Greece. In 1223 the rule of the order was written down, and at the same time the order received extensive privileges from Honorius III. Francis resigned the burden of the generalship in 1220. His first successors, Peter of Corbona, and Elias, assumed, however, only the title of ministers general, regarding Francis, notwithstanding his resignation, as the chief superior. Elias introduced various changes; the monks assumed a less coarse garb, built beautiful churches and convents, and commenced to cultivate science. Francis had severely censured these mitigations, but after his resignation they soon began to prevail. The advocates of the primitive rigor, at their head Anthony (q. v.) of Padua, succeeded, however, in enlisting the sympathy of pope Gregory IX, by whom Elias was deposed. But a few years later (1236) Elias was re-elected general, and returned to his old principles of mitigation. The rigorous party, and especially their leader, Cæsarinus (q. v.) of Spire (hence their name, *Cæsariines*), were subjected to a cruel persecution, by which Cæsarinus even lost his life (1239). This, however, caused the second deposition of Elias, and the first two of his successors favored the strict party. But Crescentius of Jesi, elected in 1244, followed the footsteps of Elias, and the Cæsariines were again persecuted until Bonaventura (q. v.) was elected general in 1256. He gradually restored the strict discipline, and raised the order to a degree of prosperity which it had never enjoyed before. The ascendancy of the strict party lasted until the generalship of Matheo di Aquas Spartas, who again sided with the other party, which henceforth remained predominant until the whole order permanently split into two parties. The advocates of the primitive rigor sought to form themselves into independent congregations, such as the Celestines, the Minorites of Narbonne, and the Spirituals [see DISCALCEATI, 13], but they suffered from their opponents an almost uninterrupted persecution. The Celestines (established in 1294) were condemned by the Inquisition as heretics in 1307, the Minorites of Narbonne and the Spirituals in 1318. The Minorite Clarenines, founded in 1302 by the ex-Celestine Angelo di Cordona, obtained toleration as an independent congregation, and existed as such until 1517, when they united with the Observants. Two other congregations, the Minorites of the Congregation of Philip of Majorca, and the Minorites of John of Valeos and Gentile of Spoleto, were of very short duration. In 1368 Paoletto di Foligno founded a new congregation, which followed the unaltered rule of Francis, spread rapidly, was approved by the popes, and thus caused the order of Franciscan friars to split into two main branches, the Conventuals, who followed the mitigated rule, and the Observants, who adhered to the primitive strict rule. The efforts of the Conventuals to suppress their opponents failed, for the latter were confirmed by the Council of Constance in 1415, received the permission to hold General Chapters, and obtained possession of the church of Portiuncula, the celebrated birthplace of the order. From both the Observants and Conventuals other congregations branched off. The consequent confusions in the order induced pope Julius II to command by a bull all congregations to unite either with the Observants or Conventuals. The former received also, in 1517, from Leo X, the right to elect the general of the whole order, while the Conventuals could only elect a minister general, whose election had to be ratified by the general. The following independent congregations joined the

Conventual Franciscan.

Observant Franciscan.

Observants in consequence of the measures of Julius II and Leo X: the Minorites of Peter of Villacrezes, founded in 1390 upon Mount Celis; the Minorite Coletans, founded by the Clarisse Colette of Corbie, in Savoy; the Minorite Amadeists, founded by the Spaniard Amadeo in 1457. Some congregations became extinct before the sixteenth century; thus the Minorites of Philip of Berbegal (Minorites of the Little Cowl, della Capucciella) existed only from 1426-1434, the Minorites Caperolans from 1475 to 1481, the Minorites of Anthony of Castel St. Jean, who were suppressed soon after their foundation in 1475. The Minorites of Mathias of Tivoli, founded in 1495, were united with the Conventuals. The Minorites of Juan de la Puebla, founded in Spain in 1489, joined in 1566, when they counted fourteen convents, the Observants, but continued to remain a separate province with a number of peculiarities. The Minorites of John of Guadeloupe (a disciple of Juan de la Puebla), also called Discalceate Minorites of the Cowl, or Minorites of the Holy Gospel, were founded in Spain in 1494, and united with the Observants in 1517; but they assumed the name Reformed Observants, and formed two separate provinces, which gradually increased to twelve (in Spain, Portugal, Italy, and America). They still have a procurator general at Rome. An Italian Congregation of the Strict Observance (*Riformati*) was founded in 1525, and still exists; a French Congregation, called *Recollets*, by the Duke of Nevers in 1592. The most rigorous among the congregations of Reformed Observants was that founded by Peter of Aleantara in 1540. It spread especially in Italy and Spain, was joined by the Paschasites, or Reformed Minorites of St. Paschasius, and then formed into a province, which was afterwards divided into several. This branch of the Reformed Observants had also in Rome a procurator general. At present it has only a small number of convents. In 1852 some Observants of Westphalia received papal permission to erect convents of this congregation in Germany, but they soon fell out with the bishops, and then also with the pope, and at the request of the bishops the incipient organization was suppressed by the Prussian government. The Franciscan friars have always been, and still are, very numerous. In the eighteenth century they counted more than 180,000 members, in 9000 convents. The Conventuals, by far the less numerous, had in 1789 about 30 provinces, with about 15,000 monks.

As a literary order, the Franciscans have chiefly been eminent in the theological sciences. The great school of the Scotists takes its name from John Duns Scotus [see SCOTUS], a Franciscan friar, and it has been the pride of this order to maintain his distinctive doctrines both in philosophy and in theology against

the rival school of the Thomists, to which the Dominican order gave its allegiance. See THOMISTS. In the Nominalistic controversy the Thomists were for the most part Conceptualists; the Franciscans adhered to the rigid Realism. See NOMINALISM. In the Free-will question the Franciscans strenuously resisted the Thomist doctrine of 'predetermining decrees.' Indeed, all the greatest names of the early Scotch school are the Franciscans, St. Bonaventure, Alexander de Hales, and Ockham. The single name of Roger Bacon, the marvel of mediæval letters, the divine, the philosopher, the linguist, the experimentalist, the practical mechanic, would in itself have sufficed to make the reputation of his order, had his contemporaries not failed to appreciate his merit. Two centuries later the great cardinal Ximenes was a member of this order. The popes Nicholas IV, Alexander V, Sixtus IV, the still more celebrated Sixtus V, and the well-known Ganganelli, Clement XIV, also belonged to the institute of St. Francis. In history this order is less distinguished; but its own annalist, Luke Wadding, an Irish Franciscan, bears a deservedly high reputation as a historian. In lighter literature, and particularly poetry, we have already named the founder himself as a sacred poet. Jacopone da Todi, a Franciscan, is one of the most characteristic of the mediæval hymn-writers; and in later times the celebrated Lope de Vega closed his eventful career as a member of the third order of St. Francis. We may add that in the revival of art the Franciscan order bore an active, and it must be confessed, a liberal and enlightened part" (Chambers, *Cyclopædia*, s. v.).

No order of monks, save the Benedictines, has had so many members as that of the Franciscans. About fifty years after its foundation it reckoned no fewer than 33 'provinces,' the aggregate number of convents in which exceeded 8000, while the members fell little, if at all, short of 200,000. Some idea, indeed, of the extraordinary extension of this remarkable institute may be formed from the startling fact that, in the dreadful plague of the Black Death in the following century, no fewer than 121,000 Franciscans are said to have fallen victims to their zeal for the care of the sick, and for the spiritual ministration to the dying! The Reformation destroyed a large number of its convents; but, on the other hand, it spread so rapidly that at the beginning of the 18th century it still numbered 115,000 monks in 7000 monasteries, and 28,000 nuns in 1000 convents.

"The supreme government of the Franciscan order, which is commonly said to be the especial embodiment of the democratic element in the Roman Catholic Church, is vested in an elective general, who resides at Rome. The subordinate superiors are, first, the 'provincial,' who presides over all the brethren in a province; and, secondly, the 'guardian,' who is the head of a single convent or community. These officers are elected only for two years. The provincial alone has power to admit candidates, who are subjected to a probation of two years [see NOVITIATE], after which they are, if approved, permitted to take the vows of the order. Those of the members who are advanced to holy orders undergo a preparatory course of study, during which they are called 'scholars;' and if eventually promoted to the priesthood they are styled 'fathers' of the order, the title of the other members being 'brother' or 'lay brother'" (Chambers, *Cyclopædia*).

2. *Statistics*.—At present the number of Franciscans is much smaller than it was in former times. It exists in Italy, France, Austria, Belgium, England, Ireland, Holland, Switzerland, Prussia, Bavaria, Poland (54 convents in 1843), Russia, Turkey, Ionian Isles, Greece, Mexico (60 convents in 1843), in most of the states of Central and South America, China, India, Egypt, Tripoli, Tunis, Morocco, in Australia, and Polynesia. In the United States of

America there are Observants in the dioceses of New York, Buffalo, Philadelphia, Alton, Cincinnati, and Louisville. The principal convent of the Regular Observants is Ara Cœli; that of the Reformed, St. Francisco a Ripa—both at Rome. The Conventuals have convents in Italy, Austria (45 convents and 455 members in 1843), Bavaria, Switzerland, Poland, and the United States of America (in Philadelphia). Their principal convent is at Rome (the Twelve Apostles). The superiors now residing in Rome are a general of the Observants, a minister general of the Conventuals, a procurator general of the Reformed Franciscans, a procurator general of the Alcantarines, a general of the Capuchins, and a general of the Tertiaries. Together, all these branches of Franciscans had in 1862 about 3600 houses and 50,000 members.

See Herzog, *Real-Encyclopædie*, iv, 466; Wetzer u. Welte, *Kirchen-Lexikon*, iv, 126; Henrion-Fehr, *Gesch. der Mönchsorden*, vol. i.; Helyot, *Ordres Religieux*, s. v.; Wadding, *Annals Minorum* (Rome, 1731-41, vol. i-xvii, reaching to 1540; continued by De Luca to the year 1553); Dom. de Gubernatis, *Orbis Seraphicus, s. historia de tribus ordin. a S. Francisco institutis* (Rom. 1682); Ozanam, *Les Poètes Franciscains en Italie au 13<sup>e</sup> siècle* (Paris, 1852); P. Karl von heil. Aloys, *Jahrbuch der Kirche* (Ratisbon, 1862), gives an alphabetical list of all the convents. (A. J. S.)

**Francisco de Vittoria**, a Spanish theologian, was born at Vittoria, and died at Salamanca August 14, 1549. He completed his studies at Paris, entered the order of St. Dominic, and returned to his native country to teach. His *Theologicae Praelectiones* (of which there have been several editions; last one, Antwerp, 1604, 2 vols. 8vo) embrace divers treatises. He published also *Confessionario*, etc. (Salamanca, 1562, 12mo);—*Instrucción y Refugio del Anima* (Salamanca, 1552, 8vo); and left in MS. *Comentaria in universam Summam Theologicæ Sancti Thomæ et in lib. Sententiarum*.—Hofer, *Nouv. Liv. Gén.* xviii, 540. (J. W. M.)

**Francke, August Hermann**, an eminently pious divine and philanthropist of Germany, was born at Lubec March 23, 1663, and studied theology and philosophy at the universities of Erfurt, Kiel, and Leipsic; and Hebrew, with great success, at Hamburg. In 1685, in connection with Paul Anton, he established at Leipsic the *Collegium Philobiblicum*, for the study of the Bible with practical exegesis. It met with great success, but made him many enemies. In 1687 he went to Lüneburg to study exegesis with Sandhagen, and here he imbibed a deep spiritual experience. The aims of his whole life from this time were purely Christian; all his labors and studies were consecrated to the glory of God. In 1688 he taught school in Hamburg, and laid the basis of his subsequent mastery of the art of teaching. After visiting Spencer, from whom he derived comfort and strength in the Christian life, he returned to Leipsic in 1689, where he gave exegetical lectures on St. Paul's epistles. Crowds attended them, and a new impulse was given to the study of the Bible. His instructions developed also a new religious spirit among the students. Opposition was soon awakened, and he and his friends were stigmatized as *pietists*. In 1690 his lectures were arrested by the faculty. He then "accepted an invitation to preach at Erfurt, where his sermons attracted such numbers (among them many Roman Catholics) that the elector of Mentz, to whose jurisdiction Erfurt then belonged, ordered him to leave the city within twenty-four hours. On this he went to Halle (1692) as professor in the new university, at first of the Oriental languages, and afterwards of theology. At the same time he became pastor of Glaucha, a suburb of Halle, the inhabitants of which he found sunk in the deepest ignorance and wretchedness, and for whose benefit he immediately began to devise schemes of usefulness. He first instructed destitute children in his own house, and gave

them alms; he then took into his house some orphans, the number of whom rapidly increased. In this charitable work he was aided by some benevolent citizens of Halle, and his charitable institutions increased from year to year. In 1698 was laid the first stone of the buildings which now form two rows eight hundred feet long. Sums of money poured in to him from all quarters; and frequently, when reduced to the utmost embarrassment in meeting the expense, the providence of God, in which he implicitly trusted, appeared for his relief. A chemist, whom he visited on his death-bed, left him the recipe for compounding several medicines, which afterwards yielded an annual income of from twenty thousand to thirty thousand dollars, by which he was enabled to prosecute his benevolent undertakings without any assistance from government?

The following account of the several institutions founded by Francke is taken from an excellent article by professor Stoever, in the *Evangelical Quarterly Review*, April, 1868:

1. *The Orphan House* engaged Francke's most assiduous attention. The main edifice, six stories high and 159 feet wide, was the largest in the city, colossal in proportions, handsomely finished, and imposing in appearance. Connected with this were other buildings, adapted to the various wants of the children, and intended to accommodate upwards of 1000 orphans. This was erected without capital, without soliciting the funds for the purchase of the material, or for the payment of the workmen. The Lord, from day to day, in answer to prayer, supplied everything that was required. In 1704 it was educating 125 orphans; at a subsequent period, as many as 500. 2. *The Normal Seminary*, designed for the education of teachers. Poor young men received gratuitous instruction and boarding, and, as an equivalent, rendered services in the Orphan House. In 1704 there were seventy-five students in this department. The course of instruction extended to five years. For its maintenance no contributions were ever asked. 3. *The Divinity School* grew out of the necessity of assisting in their studies indigent students in theology. From the very first Francke had employed the services of these young men studying in the university as his co-laborers in the Orphan House and the schools for the poor. Many were thus prepared for the ministry. They received special instruction from Francke and other professors in the university, and funds came in freely for their support. In this institution many of the earlier American Lutheran ministers were trained. 4. *The Seven Schools*, partly designed for the children of citizens who were able to pay tuition, and partly for those in the humble walks of life. In 1704, the pupils in these schools, independently of the orphan children, amounted to 800, the teachers to 70. 5. *The Royal Pedagogium*, an institution designed for the sons of noblemen and men of wealth. Its benefits were subsequently extended to others. The school at first consisted of only twelve pupils, but in 1704 numbered seventy scholars and seventeen teachers. Instruction was here communicated in the ancient and modern languages, the sciences, and in literature. 6. *The Collegium Orientale*, designed to advance the critical study of the Scriptures in the Oriental languages in 1704, consisted of thirteen individuals, but accessions to the number were made from time to time. 7. *The Institution to provide free Board for poor Students*. This was a most excellent feature in Francke's operations. Without any special resources, he furnished, at first, gratuitous boarding to twelve young men; the number gradually increased, until nearly one hundred regularly sat down to their meals in the great hall of the Orphan House. 8. *The Book-store and Publishing Department*, small in the beginning, expanded till it became one of the most extensive enterprises of the kind in Germany. Not only were school-books issued, but standard religious books, and also works in the Hebrew and Ori-

ental languages. The fonts in the Greek, Hebrew, Syriac, and Arabic characters, in the course of time, were the most complete in the country. The presses were also extensively used for printing the Scriptures. In the early history of the American Lutheran Church, the Bible, through this instrumentality, was furnished to hundreds who were destitute of the Word of Life. This department always sustained itself, as the greater part of the labor was performed by the older boys in the school, all of whom were trained to industrious habits. 9. *The Chemical Laboratory and Apothecary Department*. Occasional cases of sickness, at the beginning, rendered it necessary to make provision for such exigencies. This department soon became very much enlarged. A dispensary, with separate rooms for putting up medicines connected with it, was extensively used by the people of Halle. 10. *Other Eleemosynary Departments*. In these are included various benevolent agencies, viz. *The Infirmary; A Home for indigent Widows; An Institution for the care of the Poor in Glaucha; A Home for itinerant Beggars*. In 1714, 1775 scholars and 108 teachers were connected with the different schools under Francke's superintendence. At the present time there are nearly 4000, and a corps of 200 teachers.

The whole establishment forms one of the noblest monuments of Christian faith, benevolence, and zeal; and the philological and exegetical labors of Francke are gratefully acknowledged by Biblical scholars of the present day, whose views of the doctrines of revelation widely differ from his. In his *Collegia Biblica*, at Halle, there was a return from human forms and systems to the sacred Scriptures, as the pure and only source of faith, and the substitution of practical religion for scholastic subtleties and unfruitful speculations. Thus Scripture interpretation again became, as among the first Reformers, the basis of theological study. His labors as a lecturer were as industrious and thorough as if he had no other occupation; the philanthropist never trespassed on the student in his well-balanced life.

After a life full of labor, faith, zeal, and usefulness, Francke died at Halle June 8, 1727. Among his writings are *Manductio ad Lectionem Scripturæ Sacræ* (Halle, 1693, 1704; Lond. 1706; also, translated, with life of Francke by Jacques, Lond. 1813, 8vo);—*Observationes Biblicæ* (Halle, 1695, 8vo);—*Prælectiones Heremeticæ* (Halle, 1717, 8vo);—*Methodus Studiæ Theologici* (Halle, 1723, 8vo); besides many practical works, among which we have, in English, his *Nicomemus, a Treatise against the Fear of Man* (Lond. 1709, 12mo);—*Footsteps of Divine Providence* (London, 1787, 8vo). For the life of Francke, and accounts of the philanthropic institutions founded by him, see biographies by Guericke (*A. H. Francke, eine Denkschrift*, Halle, 1827), Leo (Zwickau, 1818), Koch (Breslau, 1854), Niemeyer (*Uebersicht von Francke's Leben*, etc., Halle, 1778); *Life of Francke* (Christ. Family Library, Lond. 12mo); *Princeton Rev.* 1830, p. 408; Stoever, in *Evang. Qu. Review*, 1863; Kramer, *Beiträge z. Gesch. Francke's* (Halle, 1861), from MSS. recently found in the Orphan House, containing, among other matter, an account by Francke of "the Beginning and Progress of his Conversion;" a chronological summary of the principal events in Francke's life, also written by himself, and the correspondence between Francke and Spenser; Hurst, *History of Rationalism*, ch. iii. See also PRITISM.

**Francke, Theophil August**, son of August Hermann Francke, was born at Halle March 21, 1696, and died Sept. 2, 1769. In 1720 he was made pastor of the House of Correction in Halle, in 1723 adjunct to the faculty of theology, and in 1727 succeeded his father as diocesan inspector and a director in the Orphan House and pedagogium, and subsequently became archdeacon and consistorial councillor to the king of Prussia. He was the editor of several works,

and wrote introductions to Niekamp's *Missions-Geschichte* and the *Canstein Bibel*, and published a continuation of the memoirs of Danish missionaries in the East Indies.—Hoefer, *Nouv. Biog. Générale*, xviii, 572. (J. W. M.)

**Francken, Ægidius**, was probably born at Dort, where his father, Rev. Henricus Francken, was settled from 1662 to 1704. The son was called in 1704 to take charge of a church at Rijsoort. Having labored here nine years, he accepted a call to Maassluis, where he exercised his ministry till removed by death in 1743. He was warmly attached to the Voetian party in the Reformed Church. He was a zealous advocate of their views, and was highly esteemed by the party. He insisted much on experimental and practical religion. He excelled in analyzing the workings of the human heart, and in exposing to view its hidden recesses. His writings, though not wholly free from mysticism and asceticism, were productive of great good. His work on ascetic theology, entitled *Heilige Godgeleerdheid*, published in 1719, was frequently reprinted; this was also the case with his *Kern der Godgeleerdheid*. His *Witte Keursteen of tien Lereedene* appeared in 1724. Several other volumes on practical religion were published by him. Their titles are sufficiently quaint, and remind us of Rutherford's mode of expression. His brother Peter was settled at Geertruidenberg from 1695 to 1728. See Glasius, *Godgeleerd Nederland*, blz. 471 en verv. (Te 's Hertogenbosch, 1851); *Geschiedenis der Nederlandsche Hervormde Kerk door Ypeij en Dermont*, 111 Deel, blz. 306 en verv. (Te Breda, 1824); *Geschiedenis van de Predikant in de Protestantische Kerk van Nederland door J. Hartog. Predikant bij de Doopsgezinde Gemeente te Zaanland* (Amsterdam, 1865). (J. P. W.)

**Francken, Christian**, a German divine, sur-named the weathercock from the instability of his religious opinions, was born at Gardeleben in 1549, and died about the close of that century. He was first a Lutheran, then became a Jesuit, afterwards returned to the Lutheran faith, then became a Socinian, and finally a Roman Catholic again. The most important of his writings is *Colloquium Jesuicum*, etc. (Leipzig, 1579 and 1580), a severe satire on the Jesuits.—Hoefer, *Nouv. Biog. Générale*, xviii, 466-7; Rose, *New Biog. Dict.* vii, 439. (J. W. M.)

**Franco**. See BONIFACE VII.

**François, Laurent**, a French abbé, was born Nov. 2, 1698, at Arinthod (Franche-Comté), and died at Paris Feb. 24, 1782. He was for some time a chevalier of St. Lazarus, but, quitting that society, went to Paris, and engaged in teaching. He there composed several books, defending Christianity against the attacks of the philosophers, which attracted the attention of Voltaire, who sought to cast ridicule upon their author, but only succeeded in giving him a more prominent position in the list of apologists. His principal works are, *Les Preuves de la Religion de Jésus-Christ, contre les spinosistes et déistes* (Par. 1751, 4 vols. 12mo):—*Défense de la Religion Chrétienne contre les difficultés des incrédules* (Paris, 1755, 2 vols. 12mo):—*Examen du Catechisme de l'honnête homme*, etc. (Brussels and Paris, 1764, 12mo):—*Réponse aux difficultés proposées contre la religion Chrétienne par J.-J. Rousseau*, etc. (Paris, 1765, 12mo):—*Examen des faits qui servent de fondement à la religion Chrétienne*, etc. (Paris, 1767, 3 vols. 12mo):—*Observations sur la "Philosophie de l'Histoire" et sur le "Dictionnaire philosophique," avec des réponses à plusieurs difficultés* (Paris, 1770, 2 vols. 8vo).—Hoefer, *Nouv. Biog. Générale*, xviii, 547; Rose, *New General Biog. Dict.* vii, 440. (J. W. M.)

**François de Toulouse**, a French theologian and preacher, lived in the latter half of the 17th century, and was notably zealous in striving to bring the Protestants of the Cevennes back to the Roman faith. He belonged to the order of Capuchin monks, of which

he became provincial. Of his writings, we name *Le Parfait Missionnaire* (Paris, 1662, 2 vols. 4to):—*Le Missionnaire Apostolique* (Paris, 1664, 8 vols. 8vo):—*Sermons sur les Fêtes des Saints* (Paris, 1673, 2 vols. 8vo); *Sermons sur les fêtes et les mystères de Jésus-Christ et de la Sainte Vierge* (Paris, 1678, 8vo).—Hoefer, *Nouv. Biographie Générale*, xviii, 543-4. (J. W. M.)

**Francus, or Frank, SEBASTIAN**, a so-called enthusiast of the times of the Reformation, was born about 1500 at Donauwerth. He was first a Roman priest, then a Lutheran minister, afterwards soap manufacturer and printer, always a thinker and writer. He anticipated a class of modern divines in certain views: e. g. extolling the spirit of Scripture in distinction from the letter; viewing religion in a thoroughly subjective way; holding that one believes only on the united testimony of one's heart and conscience. Well read in ancient and mystical philosophy, he imbibed from it a sort of pictistic pantheism. He held that whenever man passively submits to God, then God becomes incarnate in him. The divines at Smalcald (1540) requested Melancthon to write against him, and signed a severe declaration about his writings "as the devil's favorite and special blasphemer." He was driven out of Strasburg and Ulm, and died at Basle 1543. An account of him may be found in Wald, *De Vita Franci* (Erlangen, 1793); Ch. K. am Ende, *Nachlese zu F.'s Leben u. Schriften* (Nurem. 1796). See also Herzog, *Real-Encyclop.* iv, 450; Erikmum, *Gesch. d. protest. Sekten im Zeitalter der Reformation*; C. A. Hase, *Seb. Franck von Wörd, der Schwärmergeist* (Leip. 1869); Hase, *Ch. History*, § 373; Bayle, *Dictionary*, s. v.

**Frank, JACOB** (*Kieniew Lelowicz*), founder of the Jewish sect of the *Frankists*, was born in Poland in 1712. While a young man he travelled through the Crimea and neighboring parts of Turkey, where he received the surname of Frank, given by the Turks to Europeans, and which he retained. Having returned to Poland in 1750, he acquired great reputation as a Kabbalist, and settled in Podolia, where he was soon surrounded by adepts, among whom were several rabbis. His most zealous followers were among the Jewish communities of Landskron, Busk, Osiran, Opotschnia, and Kribtschin. He preached a new doctrine, the fundamental principles of which he had borrowed from that of *Sabbathai-Seri*, and which he explained in a book which his disciples looked upon as directly inspired from God. The rabbis of Podolia, jealous of his influence, caused him all sorts of annoyances, and had him arrested, but he was liberated through the influence of the Roman Catholic clergy, and authorized by the king to profess freely his tenets. His followers then, under the name of *Zoharites* (from their sacred book *Zohar*) and *Anti-Talmudists*, oppressed their former adversaries in turn, and even obtained an order from the cardinal of Kamienitz to have all the copies of the Talmud in his diocese burned. They soon, however, lost their influence, the papal nuncio at Warsaw declaring against them. Some fled to Moldavia, where they were badly treated, and most of the others, including Frank, professedly embraced Christianity: but, as he continued to make proselytes, he was imprisoned in the fort of Zzenstochow until the invasion of Poland by the Russians in 1773. His sect had increased in the mean time, and he made large collections in Poland and Bohemia. In 1778 he went to Vienna, and then went to Brunn, in Moravia, where he lived in princely style on the means furnished him by his followers. Driven again from Vienna, where he had returned, he settled at Offenbach, in Hesse, where he died of apoplexy (notwithstanding his disciples believed him immortal) Dec. 10, 1791. The sect exists yet, and has its head-quarters in Warsaw, but the mystery which surrounds it has not yet been dissipated. Their profession of faith has

been published at Lemberg in rabbinical Hebrew and in Polish.—Hofer, *Novv. Biog. Gcn.* xviii, 565; see Czacki, *Dissertation sur les Juifs*; Peter Beer, *Histoire des Juifs*; Fort, *Histoire des Juifs*; Franck, *La Cabale*; Leon Hollaenderski, *Les Israélites de Pologne*; Salomon Maimon, *Des sectes religieuses des Juifs polonois*; Carmoly, *Etat des Israélites en Pologne*; Gätz, *Frank u. d. Frankisten* (Breslau, 1868); *Jahrbucher f. deutsche Theologie* (1868), p. 555; *Jüdische Zeitschrift* (Geiger's), vi, 1, 49.

**Frankenberg, JOHANN HEINRICH**, count of Frankenberg, a cardinal of the Roman Cath. Church, was born at Glogau September 18, 1726. He studied first at Breslau, and afterwards in the German-Hungarian College at Rome. After his return to Germany he became successively coadjutor of the archbishop of Görtz in 1749, archbishop of Mehelun in 1759, soon after member of the Belgian Council of State, and cardinal in 1778. He defended the liberties of the Church and of the episcopal seminaries against the innovations of the emperor, Joseph II, but, being accused of having taken part in some disturbances which occurred in Brabant in 1789, the emperor deposed him. Accused afterwards of having opposed the measures taken by the French against the churches of his diocese, he was condemned to deportation, and taken to Brussels. He lived for a while at Emmerich, then in the village of Ahaus, in Westphalia, and finally removed to Breda, in Holland, where he died, June 11, 1804. See A. Theiner, *Der Cardinal von Frankenberg* (Freiburg, 1850); Pie'er, *Universal-Lexikon*, s. v.

**Frankfurt, Concordat of.** See CONCORDAT.

**Frankfurt, Council of (CONCILIUM FRANCO-FORDIENSE)**, a synod of great importance in Church history, held at Frankfurt-on-the-Main, A.D. 794. Some Roman writers deny the authenticity of the acts of the Council of Frankfurt (e. g. Barruel, *Du Rom. Pope*, Paris, 1803, ii, 402), but Baronius (*Annales*, A.D. 791) admits it, and Labbe publishes the canons enacted at it (*Council*, vii, 1057). Mansi publishes but two of the canons (*Council*, xii, 999), referring to *Capit. Reg. Franc.* (ed. Baluz, i, 263) for the rest. Dupin holds that it was considered in France to be a general council, and that three hundred bishops attended it (*Eccles. Hist.*, cent. viii). They came from Germany, Gaul, Spain, Italy, and England, and there were two delegates from the pope.

The occasion of the council was as follows. After the close of the second Council of Nicaea, A.D. 787, the pope sent a copy of its acts to Charlemagne, seeking the approval of the French bishops, which they declined on the ground that the worship of images, sanctioned at Nicaea, was unauthorized in the Church, and unlawful. The *Libri Carolini* (see CAROLINE BOOKS) were composed under the name of Charlemagne, and by his order, to refute the canons of Nicaea. "Nothing can be stronger than the opposition which they offer to every act of or appearance of worship as paid to images, even to bowing the head and burning lights before them. Romanists pretend that the Gallican bishops, as well as the author of these books, were deceived by a false translation of the acts of the second Council of Nicaea, which, they say, led them to fancy that the council had inculcated the paying divine honor and worship to images, and that it was this false notion which induced them to condemn the council; but this is evidently untrue, since it is an historical fact that authentic copies of the acts of the council were sent into France by the pope, as also that Charlemagne received another copy direct from Constantinople" (Palmer, *On the Church*, pt. iv, ch. x, § 4). Roger de Hoveden has the following: "In the year 792, Charles, king of the Franks, sent into Britain" [to Offa, king of the Mercians] "a synodal book, sent to him from Constantinople, in which, alas! were

found many things inconvenient, and contrary to the true faith, especially in this, that it was established by unanimous consent of almost all the doctors and bishops of the East, no less than three hundred, that images ought to be worshipped" [imagines adorari debere], "which the Church of God doth altogether abominate" [execratur]. "Against which Albinus" [Alcuinus] "wrote an epistle, fortified with the authority of the holy Scriptures." Matthew of Westminster, anno 793, gives a similar account.

Finally, Charlemagne called the Council of Frankfurt for A.D. 794, to consider this question, and also that of the Adoptianist heresy (q. v.). Fifty-six canons were passed at the council, of which the following are the most important: Canon 1. Condemning Felix and Elipandus, the propagators of the Adoptian heresy. 2. Condemning the second Council of Nicaea, and all worship of images. "Allata est in medium questio de nova Grecorum Synodo, quam de adorandis imaginibus Constantinopoli fecerunt, in qua scriptum habebatur ut qui imaginibus sanctorum, ita ut deificæ Trinitati, servitium aut adorationem non impenderent, anathema judicarentur. Qui supra sanctissimi patres nostri omnimodis adorationem et servitium renuentes contempserunt atque consentientes condemnaverunt." 6. Ordering that bishops shall see justice done to the clergy of their diocese; if the clergy are not satisfied with their judgment, they may appeal to the metropolitan in synod. 11. Ordering all monks to abstain from business and all secular employments. 16. Forbidding to take money for the ordination of monks.—See, besides the authorities already cited, Gieseler, *Church History*, period iii, § 12; Landon, *Manual of Councils*, s. v.; Inett, *History of the English Church*, pt. i, chap. xiii; Hefele, *Conciliengeschichte*, iii, 635 sq.; Harduin, *Council*, iv, 394; Schröckh, *Kirchengeschichte*, xx, 508; and the article IMAGE WORSHIP.

**Frankfurter, MOSES BEN-SIMEON**, a distinguished printer and Hebraist, lived at Amsterdam between 1700 and 1762. His reputation as a scholar chiefly rests on the "Great Rabbinic Bible" (called קה"ת הגדולה, the *Congregation of Moses*, Amsterdam, 1724-1727, 4 vols. fol.), which he edited, and to which he gave the greatest part of his life and fortune. This work constitutes in itself a library of Biblical literature and exegesis, and is indispensable to every critical expositor of the O. T. Besides giving the text in Hebrew and Chaldee by Onkelos, it contains the Massora, the commentaries by Rashi, Aben-Ezra, Kimchi, Levi b. Gershon, Jacob b. Asher, Samuel b. Laniado, Ibn Jachob, Duran, Saadia, Chaskuni, Seporno, a number of other rabbis, and by the editor, Frankfurter. Not less noteworthy are his *Index Rerum*, the different Introductions written either by himself or by distinguished rabbis; his Index to all the chapters and sections of the O. T., giving the commencement of the verses; a treatise on the design of the law by Obadiah Seporno; the Great Massora; the various readings of the Eastern and Western Codd.; a treatise upon the Accents; and last, but not least, the differences in text between Ben-Naphthali and Ben-Asher, to the latter of whom so great prominence is given by Maimonides, who, in his treatise upon the sacred Scriptures, regards Ben-Asher's revision as the most correct, and adopts it himself as a model. It is from this revision of the text that the Hebrew Bibles of the present day are printed. Frankfurter wrote also glosses on the different portions of the Bible, entitled מנחה קטנה (*a small offering*); מנחה גדולה (*the great offering*); מנחה הערב (*the evening offering*).—Kitto, *Cyclopaedia of Heb. Lit.*, ii, 57; Etheridge, *Intro. to Heb. Liter.*, 301; Fürst, *Biblioth. Jud.*, i, 295. See RABBINICAL BIBLES. (J. H. W.)

**Frankincense** (לְבָנֹתִים, *lbanah*); whence *Nizenc*, an odoriferous resin, so called from its whiteness (Plin. xii, 14, 32); mostly imported from Arabia (Isa.

Ex. 6; Jer. vi, 20; see also Strabo, 16; Virgil, *Georg.* ii, 117), yet growing also in Palestine (Cant. iv, 14; and perhaps some odoriferous kind of *plant* is here referred to); and used for perfume (Cant. iii, 6), but more especially in sacrifices for fumigation (Lev. ii, 2, 16; v, 11; Isa. xliii, 23; Isai, 3; Luke i, 9); and it also was one of the ingredients in the perfume which was to be prepared for the sanctuary (Exod. xxx, 34). Its use as an accompaniment of the meat-offering (Lev. ii, 1, 16; vi, 15; xxiv, 7; Numb. v, 15) arose from its fragrant odor when burnt, in which respect the incense was a symbol of the divine name, and its diffusion an emblem of the publishing abroad of that name (Mal. i, 11; comp. Cant. i, 3); and from this, as prayer is a calling on God's name, the incense came to be an emblem of prayer (Psa. cxli, 2; Luke i, 10; Rev. v, 8; viii, 3). In this symbolical representation the frankincense especially set forth holiness as characteristic of the divine attributes, so that the burning of it was a celebration of the holiness of Jehovah (Bähr, *Symbolik d. Mos. Cultus*, i, 466; ii, 329, etc.). In this respect its name (=whiteness) likewise became significant. Frankincense was also used in the religious services of the heathen (Herod. i, 183; Ovid, *Trist.* v, 5, 11; *Metam.* vi, 164; Arnob, *adv. Gentes*, vi, 3; vii, 26, etc.). On the altars of Mylitta and the Paphian Venus only incense was burnt (Münter, *Relig. der Babylonier*, p. 55; *Der tempel d. himmel. Göttin zu Paphos*, p. 20; Homer, *Od.* viii, 263; see Damm, s. v. *ῥύϊνς*; Tacitus, *Hist.* ii, 3). The substance itself seems to have been similar to that now known as such, a vegetable resin, brittle, glittering, and of a bitter taste, obtained by successive incisions in the bark of a tree called the *arbor thuris*, the fruit of which yields the purest and whitest kind (תְּרִיבִי, *λίβανος ἰαφαρής*, or *καθαρός*); while the produce of the after incisions is spotted with yellow, and, as it becomes old, loses its whiteness altogether. The Indian olibanum, or frankincense, is imported in chests and casks from Bombay as a regular article of sale. It is chiefly used in the rites of the Greek and Roman churches; and its only medical application at present is as a perfume in sick rooms. The olibanum, or frankincense used by the Jews in the Temple services, is not to be confounded with the frankincense of commerce, which is a spontaneous exudation of the *Pinus abies*, or Norway spruce fir, and resembles in its nature and uses the Burgundy pitch which is obtained from the same tree. See INCENSE.

The ancients possessed no authentic information respecting the plant from which this resin is procured (Strabo, xvi, 778, 782; Diod. Sic. ii, 49; Pliny, vi, 26, 32; Arrian, *Periopl.* p. 158; Ptolemy, vi, 7, 24; Herod. iii, 97, 107; Arrian, *Alex.* vii, 20; Virg. *Æn.* i, 416; *Georg.* i, 57, etc.), and modern writers are nearly as much confused in their accounts of it. Even Pliny and Theophrastus, who had never seen it, give merely contradictory statements concerning it. It is described by the latter as attaining the height of about five elle, having many branches, leaves like the pear-tree, and bark like the laurel; but at the same time he mentions another description, according to which it resembles the *mastic-tree*, its leaves being of a reddish color (*Hist. Plant.* ix, 4). According to Diodorus (v, 41), it is a small tree, resembling the Egyptian baythorn, with gold-yellow leaves like those of the *wood*. The difficulty was rather increased than otherwise in the time of Pliny by the importation of some shoots of the tree itself, which seemed to belong to the *terebinthus* (xii, 31). García de Horta represents it as low, with a leaf like that of the *mastic*: he distinguishes two kinds: the finer, growing on the mountains; the other, dark and of an inferior quality, growing on the plains. Chardin says that the frankincense-tree on the mountains of Caramania resembles a large pear-tree. The Arabian botanist Abulfadl says it is a vigorous shrub,

growing only in Yemen and on the hills, and in respect to its leaves and fruit resembling myrtle; a description which has been thought (Sprengel, *Hist. rei bot.* i, 12, 257) to apply very well to the *Amgris katab* (Forsk. *Flor.* p. 80), or (*Gesch. d. Botan.* i, 16) to the *Amgris kafal* (Forsk. p. 19), or even to the *Juniperus thurifera* (Martius, *Pharmakogn.* p. 384). Niebuhr, in his *Descript. of Arabia*, ii, 556, says, "We could learn nothing of the tree from which the incense distils, and Forskal does not mention it. I know that it is to be found in a part of Hadramaut [comp. Wellstedt, i, 196; ii, 333], where it is called *oliban*. But the Arabians hold their own incense in no estimation, and make use of that only which comes from India. Probably Arabian incense was so called by the ancients because the Arabs traded in it, and conveyed it from India to the ports of Egypt and Syria." The Hebrews imported their frankincense from Saba (Isa. lx, 6; Jer. vi, 20); but it is remarkable that at present the Arabian libanum, or olibanum, is of a very inferior kind, and that the finest frankincense imported into Turkey comes through Arabia from the islands of the Indian Archipelago. The Arabian plant may possibly have degenerated, or it may be that the finest kind was always procured from India, as it certainly was in the time of Dioscorides. Burckhardt, in his *Travels in Nubia*, p. 262, observes: "The *liban* is a species of gum, collected by the Bedouin Arabs, who inhabit the deserts between Korlofan and Shilluk, on the road to Sennaar. It is said to exude from the stem of a tree, in the same manner as gum arabic. It is sold in small thin cakes, is of a dull gray color, very brittle, and has a strong smell. The country people use it as a perfume, but it is dear. It is much in demand for the inhalants of Taka, and all the tribes between the Nile and the Red Sea. It is exported to Sonakin; the Cairo merchants receive it from Jidda. At Cairo it is considered as the frankincense, and is called incense. There are two sorts, one of which is much coarser than the other. It is also imported into Jidda from Sonabel, on the eastern coast of Africa, beyond Cape Gardafui." Colonel James Bird likewise observes: "There are two kinds of frankincense, or *loban*, one of which is the produce of Hadramaut, and is collected by the Bedouin Arabs, the other is brought by the Sumalis from Africa. The former, which is met with in small globular lumps, has a tinge of green in its color; but the other, which is more like common resin in appearance, is of a bright yellow appearance. What the Sumalis import and name *loban mati* is less fragrant than the Arabian kind; it is therefore preferred for chewing, but the last is more used for fumigation. Both kinds are exported by the Hindû merchants to India, along with gum, myrrh, and small portions of honey collected in the country near Aden." The Arabs, says Rosenmüller (*Alterthumsk.* iv, 153), call the most excellent species of frankincense *cmdhur*; and that this is an Indian production appears from Colebrooke's observation (*Asiatic Researches*, ix, 377), that in Hindû writings on medicaments an odorous gum is called *kmubara*, which, according to the Indian grammarians, is a Sanscrit word. They unanimously state it to be the produce of a tree called *sallaki*, and in the vulgar language *sabzi*. When the bark is pierced there exudes a gum of a whitish or yellowish color, externally powdery from friction, but internally pellucid, very brittle, with a balsamic or resinous smell, and a somewhat acrid taste; it burns with a clear blaze and an agreeable odor. The tree grows in the Indian mountains, and is one of considerable size, somewhat resembling the sumach, and belonging to the same natural family, *terebinthaceæ*, or turpentine-bearing trees (see Ainslie, *Mat. Ind.* i, 265). It is known to botanists by the name of *Boswellia serrata* or *thurifera* (Roxburgh, *Flora Indica*, iii, 388); it has pinnated leaves, the folioles of which are pubescent, ovate acuminate and serrate, and very small flowers disposed in

simple axillary racemes. By incisions in the bark a very odorous gum is obtained, which the spice-merchants of London recognised as *olibanum* or frankincense, although it had been sent to England as an entirely different species of perfume (see Oken, *Lehrb. d. Botan.* II, ii, 687 sq.; Geiger, *Pharmac. Botan.* ii, 1204 sq.). The *Boswellia serrata* grows to a height of forty

*Boswellia Serrata*, with enlarged view of the flower and capsule.

feet, and is found in Amboyna and the mountainous districts of India. Another species, the *B. papyrifera*, occurs on the east coast of Africa, in Abyssinia, about 1000 feet above the sea-level, on bare limestone rocks, to which the base of the stem is attached by a thick mass of vegetable substance, sending roots to a prodigious depth in the rocky crevices (Hogg's *Veg. Kingdom*, p. 249). Its resin, the olibanum of Africa and Arabia, usually occurs in commerce in brownish masses, and in yellow-tinted drops or "tears," not so large as the Indian variety. The last is still burnt in Hindû temples under the names of "rhûnda" and "lûban"—the latter evidently identical with the Hebrew *lebônah*; and it is exported from Bombay in considerable quantities for the use of Greek and Roman Catholic churches. From Cant. iv, 14 it has been inferred that the frankincense-tree grew in Palestine (compare Athen. iii, 101), and especially on Mount Lebanon. The connection between the names, however, goes for nothing (Lebanah, Lebanon); the word may be used for aromatic plants generally (Gesén. *Lex. s. v.*); and the rhetorical flourishes of Florus (Epit. iii, 6, "thuris silvas") and Ausonius (*Monosyl.* p. 110) are of little avail against the fact that the tree is not at present found in Palestine. (See Celsii *Hierob.* i, 231; Bod. a Stapel, *comment. in Theophr.* p. 976 sq.; Gesenius, *Heb. Thesaur.* p. 741; *Penny Cyclop.* s. v. Olibanum and *Boswellia Thurifera*.) See AROMATICS.

**Franks, Conversion of.** See CHLODWIG; FRANCE.

**Franz, or Franzius, WOLFGANG**, a Lutheran theologian, was born at Plauen, 1564. He became professor of history, and afterwards of theology, at Wittenberg, where he died Oct. 26, 1628. Among his voluminous writings are *Animalium historia Sacra* (best ed. Frankfurt, 1712, 4 vols. 4to);—*Tractatus theologici de interpretatione s. s.* (Wittenb. 2d edit. 1708, 4to);—*Schola sacrificiorum patriarchalium sacra*, asserting the orthodox doctrine of the atonement against the Socinians (Wittenb. 1654, 4to, and often).

**Fra Paolo.** See SARPI.

**Fraser, Alexander**, minister of Kirkhill, Scotland.—T R

land, wrote *Key to Prophecies not yet accomplished* (Edinburgh, 1795, 8vo), described by Orme (*Bibl. Bib.*) as "a work of some merit," containing "rules for the arrangement of the unfulfilled prophecies, observations on their dates, and a general view of the events foretold in them;" also *Commentary on Isaiah* (1800, 8vo).—Allibone, *Dictionary of Authors*, s. v. (J. W. M.)

**Fraser, James**, a minister of the Church of Scotland, born about 1700, and died 1769, was the author of *The Scripture Doctrine of Sanctification* (Edinburgh, 1774, 12mo), of which several editions have appeared, the last an abridgment (London, Tract Society, 1849, 18mo). This work was edited by Dr. Erskine, and is highly praised by Orme (*Bibl. Bib.*).—Allibone, *Dictionary of Authors*, s. v. (J. W. M.)

**Frasen, CLAUDE**, a Franciscan monk, was born in Picardy in 1620. He was doctor of the Sorbonne, theological professor at Paris, and superior of the Franciscan convent there. He wrote *Dissertationes Biblicæ* (Paris, 1682, 2 vols. 4to);—*Cours de Philosophie* (Paris, 1668, 2 vols. 4to);—*Cours de Théologie* (Paris, 1672, 4 vols. fol.); reprinted, with additions by the author, in Latin, as *Scotus Academicus seu universa doctoris subtilis theologica dogmata* (Venice, 12 vols. 4to). He died in Paris, Feb. 26, 1711.

**Frater**, the Latin word for brother. See BROTHER.

**Fraternity** (*confraternitas, sodalitas*), the name of associations in the Roman Catholic Church which pursue special religious and ecclesiastical purposes, observe corresponding statutes and religious exercises, and are endowed with indulgences, and sometimes with other privileges. Among the purposes to which fraternities are devoted are the nursing of the sick, support of the poor, the practice of a special devotion to some part of the Roman Catholic worship, the veneration of a particular saint, etc. In the earlier times of the Christian Church, as all Roman Catholic writers admit, there is no trace of fraternities. The first reference to them is found in an order of bishop Odo, of Paris (died 1208), providing for the annual meeting of a Marianic fraternity. In the 12th century the fraternity of Bridge Brethren (q. v.) arose at Avignon. Among the oldest associations of this class belongs also the fraternity of the Gonfalonieri, who were confirmed by pope Clement IV. In the 17th and 18th centuries the "Marianic Congregations" spread widely, especially in Southern Germany, and in connection with the order of Jesuits. Among the other most noted associations were that of the Scapulary (q. v.), Rosary (q. v.), and Corpus Christi. The popes Clement VIII, Paul V, Benedict XIII, and Benedict XIV issued several constitutions and decrees concerning fraternities. All the fraternities of the Church are subject to the jurisdiction of the bishop and his right of visitation. No fraternity can be erected in a diocese without the consent of the bishop, who has the right of examining, sanctioning, and, whenever he chooses, altering their statutes. Among the fraternities of modern origin, none has extended so widely as the "Fraternity of the most Holy and Immaculate Heart of Mary for the Conversion of Sinners," which was founded in 1837 by the abbé Dufrique Desgenettes in Paris. Among the many religious societies which have been of late established by the High-Church school in the Anglican Church are many which assume the name "Brotherhood" or "Confraternity." The "Kalendar for the English Church" for the year 1869 mentions all societies of this kind then in existence in England, among them the "Guild of St. Alban the Martyr," all the branches of which call themselves brotherhood or sisterhood; the "Confraternity of the most Holy Trinity;" the "Confraternity of the Blessed Sacrament of the Body and Blood of Christ;" the "Brotherhood of St. Luke the Physician and Evangelist."—*Allgemeine Real-Encyclop.* iii, 134 (s. v. *Brw*

*derschryften*); *Kalendar for the English Church for 1869* (London, 1869, p. 198-211). (A. J. S.)

**Fratres**, plural of *frater*. See BROTHERS.

**Fratricelli, Fraticelli, or Fratelli**, a low Latin or Italian diminutive, denoting *fratres minores*, little brothers. The term has been applied to so many different sects that its use in writers of the Middle Age is confusing. It was first applied to a sect of Franciscans which arose in Italy about the year 1294. It was used as a term of derision, as the greater number of them were apostate monks; and for this reason it was sometimes given to other sects, as the Catharists, Waldenses, etc. When this name was applied to the more rigid of the Franciscans, it was deemed honorable. As there were many divisions among the Franciscans (q. v.), pope Cælestin V authorized *Pet. de Macerata* and *Pet. de Sempronio* to form a new order, who were called *Pauperes eremiti Dom. Cælestini*, and who obtained permission to live in solitude, as hermits, and to observe the rule of St. Francis in all its rigor. Many of the more ascetic and extravagant monks joined them, who, living according to their own fancies, and making all perfection consist in poverty, and opposed by the regular Franciscans, were condemned by Boniface VIII (1302), and the inquisitors were ordered by John XXII (1318) to proceed against them as heretics, which commission they executed with the utmost barbarity. After this, many of them adopted the views of Peter John Oliva de Serignan, published in his commentary. See OLIVA. They held the Roman Church to be Babylon; that the rule of St. Francis was observed by Jesus Christ and his apostles. They foretold the reformation of the Church, and the restoration of the true Gospel of Christ. They affirmed that St. Francis was the angel mentioned in Rev. xiv, 6; that the Gospel was to be abrogated in 1260, and to give place to a new Gospel, a book published under the name of the abbot Joachim; that the ministers of this reformation were to be barefooted friars. They were repeatedly condemned; and from authentic records it appears that no fewer than two thousand persons were burnt by the Inquisition from 1318 to the time of Innocent VI. These severities were repeated by pope Nicholas V and his successors; nevertheless, they maintained themselves down to the 15th century.—*Herzog, Real-Encyklop.* iv, 562; Mosheim, *Ch. Hist.* cont. xiii, pt. ii. chap. ii, § 39, notes 86, 87; Hase, *Ch. Hist.* § 265; Limborch, *History of the Inquisition*. See EVERLASTING GOSPEL; FRANCISCANS.

**Frauds, Pious**, “artifices and falsehoods made use of in propagating what is believed to be useful to the cause of religion.” They are the offspring of sincerity and insincerity; of religious zeal combined with a defective morality; of conscientiousness in respect of the end, and unscrupulous dishonesty as to the means; without the one of these ingredients, there could be no fraud; without the other, it could in no sense be termed a pious fraud. These frauds have been more particularly practised in the Church of Rome. But Protestants, in their abhorrence of the frauds that have been so often employed in support of that corrupt system, are prone to forget, or at least not sufficiently to consider, that it is not the corruptness of the system that makes the frauds detestable, and that their separation from the Church of Rome does not place them in a situation which exempts them from all danger of falling into corruptions; among the rest, into the justification of pious frauds, substantially similar to those with which that Church is so justly reproached. See Whately, *Errors of Romanism*.—Eden, *Church Dictionary*, s. v. See CASISTRITY; PROBABILISM.

**Frayssinous, DENIS, COUNT OF**, an eminent prelate of the Gallican Church, bishop of Hermopolis, peer of France, commander of the order of the Holy Ghost, etc., was born May 9, 1765, at Currières, in Gascony. His father designed him for the law, but he preferred

the Church, and in 1788 he attached himself to the community of Laon, directed by the priests of St. Sulpice, in Paris. The society was broken up by the Revolution, but after the adoption of Napoleon's concordat in 1801 it was reunited, and Frayssinous became lecturer on dogmatic theology. In 1803 he commenced a series of “catechetical conferences” in St. Sulpice, which had great success. Napoleon threatened to break up these conferences unless Frayssinous would make certain political recommendations to his hearers; but he would not consent, nor was he further disturbed. These meetings were suspended by the Church authorities from 1809 to 1814, then continued till 1822; and his lectures at them were printed under the title *Défense du Christianisme* (Paris, 1823, 3 vols. 8vo), containing a résumé of previous books on the evidences, with additional scientific arguments. It was translated into English, *Defense of Christianity, in a Series of Lectures*, etc. (London, 1836, 2 vols. 8vo). After the restoration (1814) he became very popular at court, and was made first almoner of Louis XVIII. He refused to accept the bishopric of Nismes, but in 1822 was made bishop of Hermopolis *in partibus infidelium*. In the same year he was made grand master of the University and a member of the Academy, and one of his first acts was to put an end to Guizot's lectures on history “as of dangerous tendency.” In 1824 he became peer of France and minister of public instruction and worship. He was also minister of worship under Charles X, but soon retired; and gave his advice, in retirement, against the famous *Ordonnances* which led to the Revolution of 1830. He followed the fortunes of Charles X, who died in his arms at Goritz. Frayssinous died at St. Genièz Dec. 12, 1841. His life was written by Henrion (2 vols. 8vo). Besides the work mentioned above, he wrote *Les Vrais Principes de l'Eglise Gallicane sur la puissance ecclésiastique, la papauté*, etc. (1817, 8vo), a work said by the Ultramontanists to “look towards Jansenism, or something worse.” According to it, the pope is infallible only when in harmony with the voice of the entire Church.—Hofer, *Nouv. Biog. Générale*, xviii, 619.

**Frédégise or Fridugise**, a mediæval monkish writer, was of English origin, and flourished in the 9th century. He was a pupil of Alcuin, who took him to France, where he obtained employment at the court of Charlemagne. He succeeded Alcuin in the abbey of St. Martin, and had also conferred on him those of St. Bertin and Cormery, and was chancellor to Louis le Débonnaire. His *Epistola de Nihilō et tenebris* (preserved in the *Miscellanea* of Baluze, tom. i) is divided into two parts, and the author attempts to show in the first part that the nihilum is something real, and in the second that the tenebre are a corporeal substance. His work against Agobard is lost, but the description of Cormery in the poems of Alcuin is generally attributed to him.—Hofer, *Nouv. Biog. Générale*, xviii, 626. (J. W. M.)

**Frederiks, WILLEM**, was an enlightened Roman Catholic priest, who contributed much to prepare the way for the Reformation in Holland. In earlier life he enjoyed the friendship of John Wessel and R. Agricola, and in later years that of Erasmus. He was a man of learning, and also skilled in medicine. He was pastor of St. Martin's church in Groningen. He also frequently served the city in a political capacity. He acquired great influence, and was highly esteemed. Erasmus regarded him not only as an enlightened man, but as a model priest. He belonged to a circle in which the spirit of Wessel continued to live. Associated with such men as Eyerard Jarghes, Herman Abring, Nikolaas Lesdorp, Johannes Timmermans, and Gerard Pistoris, he diffused liberal ideas more in harmony with the views of the Reformers than with those of the Roman hierarchy. The Dominicans attempted to counteract these liberal views

by offering to defend certain theses. A debate ensued in 1523. In the progress of it it became apparent that this circle of friends had deeply imbibed the spirit and sentiments of the illustrious Wessel. The liberty which they enjoyed in the expression of their views was greatly due to the extraordinary influence of Frederiks. He laid Groningen under still further obligations to him by bequeathing to the St. Martin's church his library, volumes of which are still found on the shelves of the University Library of that place. He died in 1525. He left a son, who was a civilian, and who rendered himself very useful by his hospitality and readiness to assist those who were persecuted for their faith. See Glasius, *Godgeleerd Nederland*, blz. 472 en verv.; Ypeij and Dermont, *Geschiedenis der Nederlandse Hervormde Kerk*, 1 Deel, blz. 66 (Breda, 1819). (J. P. W.)

**Free Church of Scotland.** See SCOTLAND, FREE CHURCH OF.

**Free Congregations** (*Freie Gemeinden*), an organization of advanced German Rationalists and opponents of Christianity who have formally seceded from the state churches. They arose out of the society of Protestant Friends (*Protestantische Freunde*), or, as they were called by their opponents, Friends of Light (*Lichtfreunde*). The first impulse to the organization of Protestant Friends was given by pastor Uhlich, who, on June 29, 1841, presided at Gnadau in the Prussian province of Saxony, at a meeting of 16 theologians and school-teachers. A second meeting, held at Halle on the 20th of September, 1841, was attended by 56 Friends of Prussia, Saxony, and Anhalt, and agreed upon nine fundamental articles. The third meeting, held in Leipsic in 1842, counted about 200 participants, ministers and laymen; the seventh, held in Coethen in 1844, about 150 ministers and 500 laymen. In 1845 the Prussian government deposed two of the leaders of the movement, Uhlich and Dr. Rupp, from their positions as ministers of the State Church. Both at once established Free Congregations, Uhlich at Magdeburg and Rupp at Königsberg. The former, within a few months, numbered 7000 members. Other congregations were soon after established in Halle (by Wislicenus), in Nordhausen (by E. Balzer), in Marburg (by prof. Bayrhofer). In 1847, the first Conference of Free Congregations took place at Nordhausen, to which also the German Catholics (q. v.) were invited. The revolution of 1848 gave to the Free Congregations greater liberty, and consequently a considerable increase of members. At the second Conference, held at Halberstadt in 1849, the way was prepared for a union with the German Catholics; and by the third Conference, held in May, 1850 (it was opened at Leipsic, but, when some members were ordered out of the city, adjourned to Coethen), the union was consummated. At this Conference the Apostles' Creed was formally rejected, and the creed of the new organization summarized in the formula "I believe in God and his eternal kingdom as it has been introduced into the world by Jesus Christ." With regard to baptism, the Lord's Supper, and all forms of divine worship, full liberty was given to individual congregations. After the overthrow of the free political constitutions established in Germany in 1848, the Free Congregations were in most German states again subjected to very oppressive laws. In Saxony they were altogether suppressed. In Bavaria, the baptisms performed by their ministers were declared invalid. At the same time, dissensions broke out among the congregations themselves. Some leaders, like Dr. Rupp, desired to retain the name Christian, and to be regarded as Christians; but the majority wished to drop the name Christian, and even declared against the belief in a personal God. In 1868 the Union of Free Congregations numbered in Germany 121 congregations, with 25,000 members; and six periodicals advocated

their views. Among the Germans of the United States, the Union (*Bund*) of Free Congregations embraces five congregations, viz. Philadelphia (since 1852); St. Louis (1850); Sauk Co., Wis. (three branches); Dane Co., Wis.; Hoboken (1865). A periodical is published in Philadelphia. The Union acts hand in hand with the "Alliance of Freethinkers" (a German society in New York), and a number of "Free Men's Associations" in different parts of the country. Similar Free Societies exist in France, Italy, Belgium, and Holland. —See Zschiesche, *Die protestant. Freunde* (Altenburg, 1846); Haym, *Krisis unserer relig. Bewegung* (1847); Nippold, *Handbuch der neuesten Kirchengesch.* (2d edit. Elberfeld, 1868); Schem, *American Eccles. Almanac for 1868* (N. Y. 1868). (A. J. S.)

**Freedom** (פְּרוּדוֹת, *chuphshah'*, *manumission*, Lev. xix, 20; entirely different from πολιτεια, *citizenship*, Acts xxii, 28; "commonwealth," i. e. *polity*, Eph. ii, 12). Strangers resident in Palestine had the fullest protection of the law, equally with the native Hebrews (Lev. xxiv, 22; Numb. xv, 15; Deut. i, 16; xxiv, 17); the law of usury was the only exception (Deut. xxiii, 20). The advantage the Hebrew had over the Gentile was strictly spiritual, in his being a member of the ecclesiastical as well as the civil community of Jehovah. But even to this spiritual privilege Gentiles were admitted under certain restrictions (Deut. xxiii, 1-9; 1 Sam. xxi, 7; 2 Sam. xi, 13). The Ammonites and Moabites were excluded from the citizenship of the theocracy, and the persons mentioned in Deut. xxiii, 1-6. See FOREIGNER. The Mosaic code points out the several cases in which the servants of the Hebrews were to receive their freedom (Exod. xxi, 2-4, 7, 8; Lev. xxv, 39-41, 47-55; Deut. xv, 12-17). See SLAVE. There were various modes whereby the freedom of Rome could be attained by foreigners, such as by merit or favor, by money (Acts xxii, 28), or by family. The *ingenuus* or freeman came directly by birth to freedom and to citizenship. The *libertinus* or freedman was a manumitted slave, and his children were denominated *libertini*, i. e. freedmen or freedmen's sons. See LIBERTINE. Among the Greeks and Romans the freedmen had not equal rights with the freemen or those of free birth. The Roman citizen could not be legally scourged; neither could he be bound, or be examined by question or torture, to extort a confession from him. If, in any of the provinces, he deemed himself and his cause to be treated by the president with dishonor and injustice, he could, by appeal, remove it to Rome to the determination of the emperor (Acts xvi, 37-39; xxi, 39; xxii, 25; xxv, 11, 12). Christians are represented as inheriting the rights of spiritual citizenship by being members of the commonwealth or community of Jehovah (Eph. ii, 12; Phil. iii, 20). See CITIZENSHIP. The Christian slave is the Lord's freedman, and a partaker of all the privileges of the children of God; and the Christian freeman is the servant of Christ (1 Cor. vi, 22; Rom. vi, 20-22). Paul acknowledges that freedom is worthy of being eagerly embraced; but the freedom which he esteemed most important in its consequences was that which is given through our Lord Jesus Christ (1 Cor. vii, 21-23). The Jews, under the Mosaic law, are represented as in a state of servitude, and Christians as in a state of freedom (John viii, 31-36; Gal. iv, 22-31). See SLAVERY.

**Free (or FREE-WILL) offering** (נְדָבָה, *nedabah'*, i. e. *voluntary*, as often), spoken of a spontaneous gift (Exod. xxxv, 29; Ezra i, 4; comp. 7), but chiefly of a *voluntary sacrifice* (Lev. xxii, 23; Ezra iii, 5; Ezek. xlv, 12; plur. 2 Chron. xxxi, 14; Lev. xxiii, 38; Amos iv, 5; fig. Psal. cxix, 108), as opposed to one in consequence of a vow (נֶזֶק), or in expiation of some offence. See THANK-OFFERING.

**Freeke**, WILLIAM, an English Socinian, born in 1663, wrote a book in the form of questions and an-

swers, entitled *A Dialogue on the Deity*, and a *Confutation of the Doctrine of the Trinity*, which was publicly burned; and the author was fined £500 and compelled to make a recantation in Westminster Hall.—Allibone, *Dict. of Authors*, s. v.; Rose, *New Biog. Dict.* vii, 448—9. (J. W. M.)

**Freeman** (*ἀπλευξίρα*, one manumitted, a freedman, 1 Cor. vii, 22; so Josephus, *Ant.* vii, 11, 2; Æschines, lix, 25; Xenophon, *Athen.* i, 10), FREEWOMAN (*ἐλευξίρα*, a free-born female, Gal. iv, 22, 23, 30; elsewhere simply "free"). See FREEDOM.

**Freeman, JAMES**, the first pastor of a Unitarian church in New England, was born in Charlestown, April 22, 1759, and graduated at Harvard in 1777. His theological studies were carried on with difficulty during the war. In 1782 he was invited to officiate as reader in King's Chapel for six months, and in 1783 he was chosen pastor of the church, stipulating, however, for permission to omit the Athanasian Creed from the service. He soon began to feel doubts as to the doctrine of the Trinity, and finally preached a series of sermons to his people renouncing the doctrine. The church resolved (in 1785) to alter their liturgy and retain their pastor. Thus the first Episcopal church in New England became the first Unitarian church in America. Application was made to Bishop Provost in 1787 to ordain Mr. Freeman; but the bishop, of course, refused, and the pastor was ordained by his own people. He was a man of fine social qualities, and of excellent intellectual powers, and was very successful as pastor and preacher. He died November 14, 1835. Besides contributions to periodical literature and to the Collections of the Massachusetts Historical Society, he published *Sermons and Addresses* (Boston, 1832).—Ware, *Unitarian Biography*, i, 143, sq.; Sprague, *Annals*, viii, 162.

**Free Religious Association**, the name of an association established in Boston, United States, in May, 1867. The Constitution adopted at the first meeting declared the objects of the association to be to promote the interests of pure religion, to encourage the scientific study of theology, and to increase fellowship in the spirit; and to this end all persons interested in these objects are cordially invited to its membership. Each member of the association is left individually responsible for his own opinions alone, and affects in no degree his relations to other associations. Any person desiring to co-operate with the association will be considered a member, with full right to speak in its meetings, but is required to contribute a small annual fee as a preliminary to the privilege of voting on questions of business. The association is to hold an annual meeting at Boston, one month's notice of the meeting being previously given. A permanent organization was effected of officers and committees. At the first meeting speeches were made by Unitarians, Universalists, Spiritualists, Progressive Friends, Progressive Jews, and others connected with no particular religious denomination. At the second meeting, held in 1868, a Baptist clergyman, who had been censured for close communion practice, and an Episcopalian clergyman, who had been tried for an exchange of pulpit with a non-Episcopal clergyman, were among the speakers. (A. J. S.)

**Free Spirit, Brethren of the.** See BRETHREN OF THE FREE SPIRIT.

**Free-thinkers**, "a name adopted by sceptics to express the liberty which they claim and exercise, to think (or doubt) as they please upon all subjects, especially those connected with religion. The term originated in the 18th century, though 'free-thinking' had earlier appeared in England. In 1718, a weekly paper, entitled *The Free-thinker*, was published; and in France and Germany a corresponding spirit extensively prevailed."—Eden, *Churchman's Dict.* s. v. See INFIDELITY.

**Free will.** See WILL.

**Free-will Baptists.** See BAPTISTS.

**Frelinghuysen**, the name of a family eminent in the history of the American Church.

1. **FRELINGHUYSEN, THEODORUS JACOBUS**, first minister of the Reformed Protestant Dutch Church in Somerset County, N. J. He was born at Lingen, in East Friesland (now in Hanover, Prussia), about 1691, was educated there, and was ordained in 1717. By the personal influence of Sico Tjadde, one of the ministers of the classis of Amsterdam, Holland, he was induced to come to America, where he arrived in January, 1720, and became pastor of the Dutch people in the vicinity of the present city of New Brunswick, upon the banks of the Raritan and its tributaries. Encountering all the difficulties of a newly-settled country and a sparse population, whose religious spirit was very formal and relaxed, his faithful and fearless ministry gave great offence to many, and aroused a spirit of persecuting opposition. But, with apostolic zeal, he declared, "I would rather die a thousand deaths than not preach the truth." A great revival of religion resulted from his evangelical labors. The highest testimony to his success has been left on record by such men as Rev. Gilbert Tennent, George Whitefield, and President Edwards; and by Rev. Dr. A. Messler, in his *Historical Review of the R. D. Church of Raritan*; also in his paper entitled "The Hollanders in New Jersey," read before the New Jersey Historical Society, September, 1850—a valuable document. A characteristic volume of his sermons, translated from the Dutch language by Rev. William Demarest, was issued in 1856 (12mo, pp. 422) by the Board of Publication of the R. P. D. Church, New York. His biographer says "his labors continued for more than a quarter of a century; and although he was often attacked in the civil courts, before the colonial authorities, and by complaint to the Classis of Amsterdam, he never succumbed. He was always sustained by the ecclesiastical authorities. All his children were believers. His five sons were ordained to the ministry, and his two daughters were married to ministers." His ministry closed about 1747 (see *Memoir of Hon. Theo. Frelinghuysen*, by Rev. T. W. Chambers, D.D., N. Y., Harpers, 1863). (W. J. R. T.)

2. **FRELINGHUYSEN, REV. THEODORE**, eldest son of the above-named, came to this country in 1745 an ordained minister, and was settled over the Reformed Dutch Church in Albany, N. Y. He is represented to have been an ardent, frank, and popular man; earnest, eloquent, tender, and warm-hearted as a preacher; of spotless life, and of eminent piety—"the apostolic and much-beloved Freylinghuysen," as the name was formerly written. After a ministry of fifteen years in Albany, he returned to Holland in 1760, partly because of ministerial discouragements from the excessive worldliness of the city, partly to visit his native land, and, according to some accounts, to procure funds for founding a literary and theological institution. But he never returned, having been lost at sea on the voyage. It is remarkable that his two brothers, Jacobus and Ferdinandus, both of whom had been educated and ordained as ministers in Holland, also died at sea in 1753, of small-pox; and that the youngest brother, Henricus, pastor of the churches in Wawarsing and Rochester, Ulster County, N. Y., died of the same disease soon after his settlement in 1756. (W. J. R. T.)

3. **FRELINGHUYSEN, JOHN**, second son of T. J. Frelinghuysen, was educated and ordained in Holland, and succeeded his father as pastor at Raritan, N. J., in 1750. He "was a man of greater suavity than his father, but was equally firm in upholding the claims of spiritual Christianity. He was distinguished for his gifts in the pulpit, for his assiduity in the religious training of the young, and for his zealous endeavors to raise up

worthy candidates for the sacred office." He died, greatly lamented, in 1754, in the twenty-eighth year of his age. His wife, who afterwards married the Rev. Dr. Jacobus Rutea Hardenbergh, and who survived her first husband more than fifty years, is represented to have been "as eminent in her day for intelligent piety as any of the female saints of the Old Testament or of the New" (see Chambers, *Memoir of Hon. Theo. Frelinghuysen*, Harpers, 1863). (W. J. R. T.)

4. FRELINGHUYSEN, THEODORE, an eminent Christian lawyer, statesman, orator, and educator of youth, was great-grandson of the Rev. Theodorus Jacobus Frelinghuysen, and the son of major-general Frederick Frelinghuysen, of the Revolutionary army, member of the Provincial Congress of New Jersey and of the Continental Congress, and senator of the United States from his native state (New Jersey). He was born at Millstone, Somerset County, N. J., March 28, 1787, educated in schools at New Brunswick and at Basking Ridge, and graduated at Nassau Hall, Princeton, in 1804, with the highest honors of the institution. After studying law in the offices of his brother John at Millstone and of the Hon. Richard Stockton at Princeton, he was admitted to the bar in 1808, at the age of twenty-one. His eminent qualities as a lawyer led to his appointment in 1817 as attorney general of the state, which office he held until, in 1829, he was elected to the Senate of the United States. At the end of his term in the Senate he resumed the profession of the law, but soon accepted the chancellorship of the University of the City of New York. From 1839 to 1850 he occupied this high place, and then became president of Rutgers College at New Brunswick, N. J., where he died, April 12, 1861, after a protracted illness. During his residence in New York he was a candidate for the vice-presidency of the United States, on the same ticket with Henry Clay for president, in 1844. Mr. Frelinghuysen's civil, forensic, and political eminence was eclipsed by the lustre of his Christian and philanthropic career. His piety was humble, devout, genial, simple, and most carefully cultivated. His religious life was felt with unusual power at the bar, in the Senate, in society, and in the Church. He was a Sunday-school teacher almost until his death. His efforts for the salvation of public men—presidents, governors, senators, judges, and others—were most remarkable and blessed. Especially was he in the place of father, pastor, and adviser to the young men over whom he presided in the university and college. He was one of the foremost Temperance advocates and laborers in his generation. His eloquent tongue was ever ready to plead for every good Christian or humane cause. The American Sunday-school Union, the American Colonization Society, and other benevolent enterprises, often shared in these efforts. At one time, and for years together, he was the president of those three greatest of our Christian voluntary associations—the American Bible Society, the American Tract Society, and the American Board of Commissioners for Foreign Missions. Necessarily he was a Christian patriot of the first order. His eloquent speech in the United States Senate on the Indian Bill, and his course on the Sunday-mail Question, told with electric force upon the whole country. And when the civil war broke out in 1861, he was among the first, the most decided, pronounced, and enthusiastic of all the eminent defenders of the Union. The completeness of his elevated character and record is remarkable, and his name will ever be illustrious for its goodness and greatness. A memoir of his life and services by Rev. T. W. Chambers, D.D., was issued by Harper and Brothers, N. Y., 1863, 12mo. (W. J. R. T.)

**French, WILLIAM.** D.D., a distinguished divine and mathematician, was educated at Caius College, Cambridge, and became second wrangler in 1811. He

soon after became fellow and tutor of Pembroke College, was made M.A. in 1814, master of Jesus College in 1820, and D.D. in 1821. He was successively appointed vice-chancellor in 1821 and 1834, rector of Moor-Monkton, Yorkshire, in 1827, and canon of Ely in 1832. He died in 1849. He published *A new translation of the Book of Psalms from the original Hebrew* (new ed. Lond. 1842, 8vo):—*A new translation of the Proverbs of Solomon from the original Hebrew*, with Notes by W. French and G. Skinner (Lond. 1831, 8vo).—Darling, *Cyclop. Bibliog.* s. v.

**French Roman Catholic Church.** See FRANCE, and GALLICAN CHURCH.

**French Prophets**, the name given in England to a sect formed by the Camisards, who came over to England about 1706, and who brought with them the "gift of prophecy," and soon made converts in England. The great subject of their predictions was the speedy establishment of Messiah's kingdom. "Their message was (and they were to proclaim it as heralds to every nation under heaven), that the grand jubilee, 'the acceptable year of the Lord,' the accomplishment of those numerous scriptures concerning the *new heavens* and the *new earth*, the *kingdom of the Messiah*, the *marriage of the Lamb*, the *first resurrection*, or the *new Jerusalem descending from above*, was now even at the door; that this great operation was to be effected by spiritual arms only, proceeding from the mouths of those who should by inspiration, or the mighty gift of the Spirit, be sent forth in great numbers to labor in the vineyard; that this mission of God's servants should be witnessed to by signs and wonders from heaven, by a deluge of judgments on the wicked universally throughout the world, as famine, pestilence, earthquakes, wars, etc.; that the exterminating angels should root out the tares, and there shall remain upon earth only good corn; and the works of men being thrown down, there shall be but one Lord, one faith, one heart, and one voice among mankind. And they declared that all the great things they had spoken of would be manifest over the whole earth within the term of *three years*. These prophets also pretended to the gift of languages, of miracles, of *discerning*, etc.; discerning the secrets of the heart; the power of conferring the same spirit on others by the laying on of hands, and the gift of healing. To prove they were really inspired by the Holy Ghost, they alleged the complete joy and satisfaction they experienced, the spirit of prayer which was poured forth upon them, and the answer of their prayers by the Most High. These pretensions, however, laid the foundation of their detection and complete overthrow. They went so far as to pretend to raise the dead, and fixed upon one of their own number for the experiment, who was to rise on a particular day. But Dr. Emes did not rise" (Adams, *View of all Religions*). They obtained, for some time, considerable success in Great Britain, having their admiring followers not only in London, but also in the chief provincial towns. They were even joined by some parties of influence, such as Sir Richard Bulkeley, Lady Jane Forbes, John Lacey, Esq., and others. Mr. Lacey, who was originally a member of Dr. Calamy's congregation, entered, we are told, "into all their absurdities, except that of a community of goods, to which he strongly objected, having an income of £2000 per annum." The influence of the prophets speedily declined; but their proceedings left a stigma for a time upon the reputation of the Huguenot refugees settled in Britain. See Hughson, *A Copious Account of the French and English Prophets*, etc. (London, 1814). A curious tract, entitled *A Brand*

snatched from the Burning, by Samuel Keimer, who was one of the sect, and afterwards became a Quaker and came to America, professes to give an account of the French prophets "by one of themselves." The claims of the French prophets resemble, in some respects, those of the modern Irvingites (see *English Review*, ix, 22 sq.).

**French Versions of the Holy Scriptures.**—I. We may gather from the conciliar edicts prohibiting the use of translations of the sacred books in the vulgar tongue that such existed as early as the beginning of the 13th century (*Acta Concil. Tolos.* c. 14, ap. Mansi, xxiii, 197; comp. those also of the Synod of Tarragona in 1234, and Beziers in 1246), and even as early as 1199, Pope Innocent III had heard that "evangelia, epistolas Pauli, moralia Job, et plures alios libros in Gallico sermone," were in use among the Albigenses (*Epist.* ed. Baluze, i, 432); but we are very much in the dark as to the character of these translations, or the source whence they emanated. Writers on the Waldensian Church assert the existence of translations in the Romance dialect possessed by that church anterior to the 12th century (*Monastier, History of the Vaudois*, p. 73; Henderson, *The Vaudois*, p. 248; Gilly, *The Roman Version of the Gospel of St. John*, etc., Lond. 1848); but the evidence on which this is advanced does not stand the test of a thorough scrutiny. In the *Nobla Leyezon*, which contains the religious belief of that church, there are several citations of Scripture, but there is no evidence that these are made from any extant version; and, at any rate, this work cannot be placed earlier than the end of the 12th or beginning of the 13th century (Hallam, *Hist. of Literature*, i, 26). Walter de Mapes says that, during the pontificate of Alexander III (1159-1181), he was present at a synod at Romè where certain Waldensians presented to the pope a book written in the Gallic tongue, "in quo textus et glossa Psalterii plurimorumque legis utriusque librorum continebatur" (*De Nugis Curial.* p. 64, Camden Society ed.; Usher, *De Chr. Eccles. Success.* in *Opp.* ed. Elrington, ii, 244); but it is doubtful whether any part of this was in the vernacular except the gloss, which in a translation would be of little use. That Peter Valdo himself possessed a vernacular translation of the Scriptures has been asserted; but, when examined, this tradition resolves itself into the fact that he requested a grammarian, Stephanus de Ansa, to supply him with a translation of the Gospels and other books of the Bible, "et auctoritates sanctorum;" but whether it was a "textus cum glossa," or "sententias per titulos congregatas," the witnesses leave uncertain. From what Reimer says (ap. Usher, *l. c.*), "Cum esset [Valdus] aliquantulum literatus, Novi Testamenti textum docuit eos vulgariter," the presumption is that no vernacular version existed, but that Valdo in preaching translated for his hearers, i. e., probably gave them the glosses which Stephanus had collected for him. Trithemius, however, expressly says, "Libros sacre scripturæ maxime Novi Testamenti sibi in linguam Gallicam fecit transferri" (*Ann. Hirsaugiens.* ann. 1160, i, 442). The MSS. of the Waldensian versions preserved at Zürich, Grenoble, Dublin, and Paris are not of an earlier date than the 16th century, nor can the version they present claim any high antiquity. That vernacular versions of the N. T., and portions of the Old, existed among the so-called Sectaries of the south of France from an early period does not admit of doubt, but we are not in circumstances to say anything definite concerning them. Dr. Gilly (p. xxii) has called attention to the curious fact that an English ecclesiastic in 1345 disposed by will of a copy of the Romance Bible, "Bibulum (Bibulum?) in Romanam linguam translataum" (*Publications of Surtees Soc.* for 1836, ii, 10). In the library of the Academie des Arts at Lyons there is a Codex containing the N. T. in Romance, to which is appended the liturgy of the Cathari, indicating its origin among

them (Gieseler, *Church Hist.* iii, 409). In the north of France also we have some clear traces of vernacular copies of the Scriptures. A translation of the four books of Kings in the dialect of the north of France (*langue d'Oïl*) has been published (Paris, 1841, 4to) by M. Leroux de Lincy, who attributes it to the 12th century. M. Reuss has examined and described in the *Revue de Strasbourg* (iv, 1 sq.), a Codex preserved in the library of that city, which contains in the same dialect, somewhat varied, the Pentateuch, Joshua, and Judges, with the *Glossa ordinaria et interlinearis* [see Gloss], and the rest of the historical books of the O. T., with the Psalter without the gloss. As respects the translation said to have been executed, cir. 1250, for Louis IX, that of Du Vignier (cir. 1340), that of De Sy (1350), and that of Vaudetar (1372), we can say nothing more than that tradition asserts that such did once exist.

Of translations of parts of Scripture, chiefly the Psalms, into the more modern French, a large number exist in MS., of which a copious list is given by Le Long in his *Bibliotheca Sacra*. About the year 1380 a translation was undertaken by command of Charles V of France, by Raoul de Prailles, of which more than one copy exists. Le Long gives a description of a Codex containing it, with some extracts, by way of specimen, of the language; and there is another MS. of it in the British Museum, of which a full description is given in the *Bibliotheca Lansdowniana*, p. 284 sq. The version in these codices does not go beyond Proverbs.

II. Emerging from these obscurer regions of inquiry, we come to those versions which have been printed, and of which it is possible to give a certain account.

1. That of Guiars des Moulins, an ecclesiastic of Picardy. Taking as his basis the *Historia Scholastica* of Peter Comestor, a digest of the Bible History with glosses, he freely translated this; adding a sketch of the history of Job, the Proverbs, and probably the other books ascribed to Solomon; substituting for Comestor's history of the Maccabees a translation of this from the Vulgate, and in general conforming the whole more closely to the text of the Vulgate than Comestor had done. The Psalms, Prophets, and Epistles were not in the work as at first issued, and it is uncertain whether the Acts were not also omitted: all these, however, were added in later copies. Many MSS. of this work exist, the most important of which is at Jena. An edition of this Bible, as completed by different hands, was issued from the press by order of Charles VIII, about the year 1487, edited by the king's confessor, J. de Reley, and printed by Verard, Paris, 2 vols. fol. Twelve editions of this, some at Paris and some at Lyons, appeared between 1487 and 1545. This is called *La Grande Bible*, to distinguish it from a work entitled *La Bible pour les simples gens*, which is a summary of the history of the O. T., and of which several undated editions have been examined. Previous to the edition of 1847, an edition of the N. T., of the same translation as that found in the completed works of Guiars, but not by Guiars himself, was printed at Lyons by Barth. Buyer, fol., and edited by two Augustinian monks, Julien Macho and Peter Farget: it is undated, but is referred to the year 1478, and justly claims to be the *Éditio Princeps* of the French Scriptures.

2. In the year 1523 appeared at Paris, from the press of Simon de Colines, an anonymous translation of the N. T., which was often reprinted, and to which, in 1525, was added the Psalter, and in 1528 the rest of the O. T. (together 7 vols. 8vo), the last portion being issued at Antwerp, in consequence of attempts on the part of the French clergy to prevent its appearance. Tradition ascribes this version to Jacques le Fevre d'Étapes, who had before this distinguished himself by a Latin translation of Paul's epistles, and by exegetical works on the Gospels and Epistles; and there is no

reason to question the justice of the ascription. This version is made from the Vulgate, with slight variations in the N. T., where the author follows the Greek. The complete work appeared in one vol. fol., at Antwerp, in 1530, and again from the same types in 1532. It was placed in the papal *Index* in 1516; but in 1550 it was reissued at Louvain in fol., edited by two priests, Nicolas de Leuze, and Franz van Larben, who corrected the style, and struck out all that savored of what they deemed heresy. Of this corrected version many editions have been issued.

3. The first French Protestant version was prepared by Pierre Robert Olivetan, a relation of Calvin, and was printed at Serrieres, near Neufchatel, in Switzerland, in 1535, fol. Of this edition very few copies remain. It was reprinted at Geneva in 1540, at Lyons in 1541, and, with a few emendations from the pen of Calvin, again at Geneva in 1545. In 1551 a thoroughly revised edition, with the addition of some of the apocryphal books by Beza, and a new translation of the Psalms by Budé, was issued at Geneva. It has often been reprinted since. An edition for the use of the Vaudois, and for which they subscribed 1500 golden crowns, was printed at Neufchatel in 1556. This translation was made for the O. T. from the Latin version of Santes Pagninus, and for the N. T. after the versions of Lefevre and Erasmus. In its first form it was very imperfect, and even after the revival of Calvin, and the emendations of subsequent editors, it remained behind the requirements of an authorized version.

4. To remedy the defects of Olivetan's version, and to produce one more suited to the wants of the age, the Venerable Company of Pastors at Geneva undertook a thorough revival of the work, with the special aid of Beza, Goulart, Fay, etc., and under the editorial care of Cornelius Bertram. This appeared in 1588. In this revision, יהוה יהוה, which in all the other Protestant versions is rendered by a word equivalent to *Lord*, is throughout translated *L'Eternel*. Revised editions have been issued by the Venerable Company in 1693, 1712, 1726, 1805, and of the N. T. in 1833; the last two very much modernized in style. This claims to be the most elegant of the French versions, but it is far from being an adequate rendering of the original.

5. The Bible of Diodati, Gen. 1614; of Desmarets, Amst. 1669; of Martin, Utr. (N. T.) 1696, (Bible) 1707, 2 vols. fol.; of Roques, Basle, 1744; Osterwald, Amst. 1724; Neufch. 1744, are revisions of Olivetan's text, undertaken by individuals. Of these, Osterwald's is the most thorough, and may be viewed as occupying the place in the French Protestant Church of an authorized version, though Martin's is the one most esteemed by the more orthodox of its members, while that of Desmarets is sought by those who attach much value to fine paper and printing. A carefully revised edition of Osterwald's Bible, with parallels by the Rev. W. Mackenzie, has been issued by the French Bible Society, Paris, 1861.

6. Of avowedly new translations from the original by individuals may be mentioned that of Seb. Chastillon (Castalio), 2 vols. fol., Basle, 1555, in which the translator aimed to impart classical elegance to the style, but which was universally regarded as neither conveying the just sense of the original, nor being in accordance with French idiom; that of Le Clerc, 2 vols. 4to, Amst. 1703, in the interests of Arminianism; that of Le Cene, published after his death in 2 vols. fol., Amst. 1741, deeply marked by Socinian leanings; and that of Beausobre and L'Enfant, 2 vols. 4to, Amst. 1718. This last is by much the best, and has been repeatedly reprinted. See BEAUSOBRE.

7. Of Roman Catholic versions of the Bible, the first is that of René Benoist, a member of the theological faculty at Paris, which appeared in 1566. It was condemned by Pope Gregory XIII in 1575, and involved the author in much trouble because of its supposed

Protestant leanings. It is, in fact, only a slightly altered transcript of the Geneva Bible. A revised edition, conformed to the Vulgate, was proposed and issued by the divines at Louvain. Four translations of the N. T. had appeared before this, viz. that of Claude Deville, 1613; that of Jacques Corbin, an advocate of Paris, 1643; and that of Michel de Marolles, abbé of Villeloin, 1649; and in 1666 that of Denys Amelotte, a priest of the oratory, whose hatred of the Jansenists and desire to damage their version, then in the press, prompted him to a work for which he was wholly unfit, and the blunders of which drew down on him the unsparring criticism of Richard Simon, a priest of his own order. Marolles had begun a translation of the O. T., but it was suppressed after the printing had proceeded as far as Lev. xxiii. A translation of the N. T. by the theologians of Louvain appeared in 1686; of this only a few copies exist. All these are made from the Vulgate. So also is the famous Jansenist translation begun by Antoine Lemaître, and finished by his brother Isaac Louis Lemaître de Sacy, aided by Antoine Arnauld, P. Nicole, etc. The N. T. was first published in 2 vols. 8vo in 1667, and subsequently the O. T., nominally at Mons, but really at Amsterdam. It is variously styled the version of Mons, the version of Port Royal, but now commonly the version of De Sacy. Many editions of it have appeared, with and without notes; the best is that of Fossé and Beauvrou, Par. 1682, 3 vols. 8vo; a beautifully illustrated edition was issued at Paris in 1789-1804, in 12 vols. 8vo. It was with an edition of this version, altered so as to be more conformed to the Vulgate, that Quesnel published his *Reflections*, 1671-80. The translation of Calmet, in his *Commentaire Littéral et Critique*, Paris, 1724, may be also viewed as a revised edition of the Mons Bible. Antoine Godeau, bishop of Grasse, published a translation made from the Vulgate, in 2 vols. 8vo, Paris, 1668. It holds a middle place between a literal version and a paraphrase. The translation of Nic. Le Gros was published anonymously at Cologne in 1739, and afterwards with his name in several editions. Of the N. T., a translation, from the pen of Richard Simon, appeared anonymously in 1702 at Trevoux. This version was charged by Bossuet with Socinian leanings, and was condemned by Cardinal de Noailles. Of the translation by Huré, 1702, and that by the Jesuits Bouhours, Tellier, and Bernier, between 1697 and 1703, it may suffice to make mention.

8. In our own day several versions of the Psalms have appeared in France. A translation of the whole Bible from the Vulgate, by Eugene Geronde, in 23 vols. 8vo, appeared at Paris between 1820 and 1824. This has frequently been reprinted, and has excited much attention, some of the journals vehemently commending it, while by others it has been no less severely criticised. The latest appearance in this department is the translation of the Gospels by La Mennais, 1846, the style of which is admirable, but the notes appended to it are in the interest of Socialism. But the most important work of this kind is undoubtedly the translation from the Hebrew of the O. T. by S. Cahen, *La Bible: Traduction Nouvelle avec l'Hebreu en regard*, etc. Par. 1832-39, 18 vols. 8vo. (Le Long, *Bibliotheca Sacra*; Simon, *Hist. Crit. du N. Test.* liv. ii; Brunet, *Manuel du Libraire*; Horne, *Introduction*, vol. ii, pt. 2; Reuss, *Gesch. des V. T.* sec. 466, etc.; and in Herzog's *Real-Encyclop.* s. v. *Romanische Bibelübers.*; Darling, *Encycl. Bibliogr.* ii, 99 sq.)—Kitto, *Cyclop.* s. v.

Fréret, NICOLAS, a celebrated French scholar, was born at Paris February 15, 1688, and died in the same city March 8, 1749. He at first studied law, but abandoned it for literature, especially for investigations into the languages, history, and religious systems of ancient and Oriental peoples. At the age of twenty-five he was admitted to the Academy of Inscriptions, and gave as his inaugural a discourse on the origin of the Franks, which, though favorably received by the Academy, and

vindicated in great part by the subsequent progress of historical research, was strongly opposed by the abbé Vertot, and led to Fréret's being sent for a short time to the Bastille. On his release he produced a long series of papers for the Academy of Inscriptions, which gave him great reputation for learning and research. In treating mythology, he rejected the theory which traces back religious fables to historical facts [see ETIEMERUS], assigned to the historical element a secondary place, and thought that the Greeks had borrowed most of their divinities from the Egyptians and Phœnicians. He extended his investigations also to the religions of the Celts, the Germans, the Hindus, the Chinese, the Persians, and the Romans, and was one of the first in France to prosecute the study of Chinese. Of his writings we name only those which belong more especially to the subjects embraced in this work, viz.: *Essai sur la Chronologie de l'Écriture Sainte* (Histoire de l'Acad. tom. xxiii);—*Observations sur les fêtes religieuses de l'année persane, et en particulier sur celle de Mithra, tant chez les Persans que chez les Romains* (Mem. de l'Acad. t. xvi);—*Réflexions générales sur la Nature de la religion des Grecs, et sur l'idée qu'on doit se former de leur Mythologie* (Hist. de l'Acad. tom. xxiii);—*Recherches sur le Culte de Bacchus parmi les Grecs* (Mem. de l'Acad. t. xiii);—*La Nature du Culte rendu en Grèce aux héros, et particulièrement à Esculape* (Hist. de l'Acad. t. xxi);—*Hist. des Cyclopes, des Dactyles, des Telchines, des Curètes et Corybantes, et des Cabires* (Hist. de l'Acad. t. xxiii et xxvii);—*Les Fondemens historiques de la fable de Bellérophon et la manière de l'expliquer* (Hist. de l'Acad. t. vii; Mem. t. vii);—*Observations sur les recueils de prédictions écrites qui portaient le nom de Musée, de Bacis et de la Sibylle* (Mem. de l'Acad. t. xxiii);—*Observations sur les oracles rendus par les âmes des morts* (Mem. t. xxiii);—*Observations sur la religion des Gaulois et sur celle des Germains* (Mem. de l'Acad. t. xxiv);—*Étymologie du mot Druide* (Hist. de l'Acad. t. xvii);—*La Nature et les dogmes des plus connus de la religion gauloise* (Hist. de l'Acad. t. xviii);—*L'Usage des sacrifices humains établi chez les différentes nations et particulièrement chez les Gaulois* (Hist. de l'Acad. t. xviii);—*Recherches sur le dieu Hercule Endovelicus et sur quelques autres antiquités ibériques* (Hist. de l'Acad. t. iii);—*Les Assassins de Perse* (Mem. t. xvii). Leclerc de Septelunes published a collection of Fréret's works under the title *Œuvres complètes, nouv. édit. considérablement augmentée de plusieurs ouvrages inédits* (Paris, 1796-99, 20 vols, 12mo), but, despite its title, by no means a complete edition.—Hofer, *Nouv. Biog. Génér.* xviii, 807-818; Rose, *New Biog. Dict.* vii, 451. (J. W. M.)

**Fresco Painting**, a method of painting with mineral and earthy colors dissolved in water, upon freshly-plastered walls. As only so much can be painted in one day as can be executed while the plaster is wet, and as the colors become lighter on drying, fresco painting is very difficult of execution. As the wall dries, all the color that is applied is carried to the surface, and there forms a coating to the wall. But little retouching can be done. Fresco painting was carried to great perfection by the ancients. It was revived, by the Italian painters especially, during the Middle Ages. It again fell into disuse from the seventeenth till the present century, when it has been revived by Cornelius, Overbeck, and others. With the exception, perhaps, of mosaic painting (q. v.), fresco painting is better adapted than any other style to the production of monumental works of art. For full effectiveness, it requires the natural light, and hence cannot be used with success in churches or other buildings which are lighted with windows of stained glass.—Kugler and Schnaase, *Gesch. der Malerei.* (G. F. C.)

**Fresenius**, JOHANN PHILIP, a German Lutheran clergyman, was born Oct. 22, 1705. After finishing his theological studies at the University of Stras-

burg in 1725, he became tutor of the young Rhinegrave of Salm-Grumbach. In 1727 he succeeded his father as pastor of Oberwieschen, and in 1734 became second "Burgprediger" at Giessen. In the following year he also began to give exegetical and ascetic lectures at the university of that city. From 1736 to 1742 he was Hofliconcus (aulic deacon) at Darmstadt; from 1742 to 1743 again preacher and professor at Giessen. In 1743 he accepted a call from the magistracy of Frankfort on the Main, where he remained until his death, which occurred July 4, 1761. In 1749 he received from the University of Göttingen the title of doctor of divinity. Fresenius enjoyed great reputation as a powerful preacher and experienced spiritual guide. From early youth he displayed a great zeal in the defence of Lutheran orthodoxy and of Lutheran prerogatives, and thus became involved in numerous controversies. In 1731 he wrote a work (*Antivestimentarius*) against a scurrilous pamphlet (*Friss Vogel oder Stüb*) against Lutheranism by the Jesuit Weislinger, and produced thereby so great an excitement among Roman Catholics that a plan was made to kidnap him, with the aid of an Austrian army then stationed on the Rhine. He had to flee for safety to Darmstadt. In that city he caused the establishment of an institute for proselytes, and became its director and inspector. In Frankfort he opposed the effort of the Reformed congregations to obtain the public exercise of their religion and the permission for building churches. He was, in particular, a determined and even violent opponent of count Zinzendorf and the Moravians. Zinzendorf regarded him as the most energetic opponent, and called him an "incarnate devil" (*eingefleischten Teufel*). Some of his works are still in common use in the German Lutheran Church. Thus the *Heilsame Betrachtungen ueber die Sonn- und Festtags-evangelien*, which first appeared in 1750, were published in a new edition in 1845 (2d ed. 1854) by Johann Friedrich von Meyer (q. v.), and of his *Epistelpredigten*, first published in 1754, a new edition was issued in 1858 by Ledderhose. His controversial writings against the Moravians number 24 volumes (*Streitschriften gegen die Herrnhüter*, Frankf. 1748-60).—Steitz in Herzog, *Real-Encycl.* xix, 501. (A. J. S.)

**Fresne, Du.** See DU CANGE.

**Frey, Jean Louis**, a Swiss theologian and philologist, was born at Basle in 1682, and died in the same place in 1759. He is said to have been familiar with Hebrew at ten years of age. He was a pupil of Jean Buxtorf, under whom he studied Hebrew, Chaldee, Syriac, and Arabic. In 1703 he became a minister, and then travelled through Europe to increase his knowledge. In 1711 he was made professor of history and theology at Berne, and subsequently of Biblical exegesis, which chair he filled till his death. He was distinguished for the extent and variety of his knowledge. He left a considerable sum of money, and his own library of more than 8000 volumes, for the benefit of the library and students of the college at Basle. Together with other works, we have from him *Disputatio in qua Mohammedis de Jesu-Christo sententia expenditur* (Basle, 1703);—*De Officio Doctoris Christiani dissertationes* iv (1711-1715). He edited a corrected and enlarged edition of Suicer's *Thesaurus Ecclesiasticus* (Amsterdam, 1728, 2 vols. fol.), an edition of J. Grynæus's *Opuscula*, etc., and wrote many of the notes for the edition of the *Patres Apostolici*, published in Basle in 1742.—Hofer, *Nouv. Biogr. Générale*, xviii, 841-2. (J. W. M.)

**Frey, Joseph Samuel Christian Frederick**, was born in Germany of Jewish parents. At the age of twenty-five he became a Christian, and in 1816 came to the United States. He was then and for some years a Presbyterian minister, and subsequently became a Baptist. But he never ceased to be a Jew in feeling, and was an enthusiastic votary of Rabbinical studies,

which influenced him as a Biblical interpreter. He labored chiefly for the conversion of the Jews, was agent of "The American Society for Ameliorating the Condition of the Jews" and edited a periodical called *The Jewish Intelligencer*. He died at Pontiac, Michigan, in 1850, in the 79th year of his age. He was the author of a "Narrative" of his life:—"Joseph and Benjamin," a work on the differences between Jews and Christians:—*Judah and Israel; or the Restoration of Christianity* (1837, 12mo):—*Lectures on Scripture Types* (1841, 12mo). He also published an edition of the Hebrew Bible, a Hebrew Lexicon, Grammar, and Reader, and *The Hebrew Student's Pocket Companion*. See Sprague, *Annals*, vi, 757. (L. E. S.)

**Freya**, the goddess of the moon and love in the Scandinavian mythology, was the daughter of Niord and sister of Freyr, and is regarded by some as originally the same with Frigga (q. v.), to whom, among the goddesses, she ranks next in power and honor. She is described as beautiful, virtuous, and gentle, and ever ready to hear the prayers of men; as fond of music, flowers, fairies, and the spring, and the source of inspiration of the love-songs of the scalds. In the myths, which represent her, like Isis, as seeking her absent spouse (Odin), and as ranking next to Frigga, the earth-goddess, we may have symbolized the relation of the moon to the earth and the sun, and find an explanation of those resemblances which have led to the confounding her with Frigga. "She is always described as attended by two of her maids" (see pl. 13, fig. 4, *Mythology and Religious Rites*, in *Icon. Encyclop.*). The name of Friday, the sixth day of the week, is derived from her.—*Iconographic Encyclopædia*, iv, 279-80 (N. Y. 1851); Thorpe, *Northern Mythology*. (J. W. M.)

**Freylinghausen**, JOHANN ANASTASIUS, an eminent German Pietist theologian, was born at Gaudersheim Dec. 2, 1670. He studied theology at Jena in 1689, and at Halle in 1692. In the latter place he gained the friendship of Aug. H. Francke, whose vicar he became in 1695 at Glaucha, a suburb of Halle. In 1715 he became Francke's son-in-law, his adjunct in the church of St. Ulrich, and was afterwards made director of the Waisenhaus (orphan house). He died Feb. 12, 1739. His principal works are, *Grundlegung der Theologie* (Halle, 1703, often reprinted):—*Predigten ü. d. Sonn u. Festtagespfeilsten* (Halle, 1728):—*Busspredigten* (1734):—he also published *Geistliches Gesangbuch*, etc. (Halle, 1704-1714, 2 vols.; latest edit. 1741). Forty of these hymns are of his own composition, and some of the best of them are translated in Miss Winkworth's *Lyra Germanica*. See A. H. Niemeyer, *Lebensbeschreibung* (Halle, 1786); J. L. Schulze, *Dankmal d. Liebe u. Hochachtung für F.* (Halle, 1784); L. Pasig, *Biographische Skizze F's* (A. Knapp's Christoterpe, 1852, p. 211); Herzog, *Real-Encykl.* iv, 591; Doering, *Gelehrt. Theol. Deutschlands*, i, 491. (J. N. P.)

**Freyr**, in the Scandinavian mythology, one of the dynasty of the Vanir, or second class of gods, and son of Niord, was, together with his father and sister Freya, given as a hostage to the Asir, or first class of gods, who adopted them, and bestowed on Freyr for a dwelling the celestial castle of *Alfheim*. He was the god of the sun and fruitfulness, to whom men prayed for favoring seasons and peace, and was regarded as well disposed to men. He was a patron of marriage, and the patron god of Sweden and Iceland. His chief temple was at Upsala, and sacrifices of men and animals were made to him. His festival was at the winter solstice, and his procession the signal for the ceasing of strife. The myths relate that Freyr, once mounting *Illidskialf*, the lofty seat of Odin, whence everything on earth was visible, beheld in the high north, where dwelt the giants, the wondrously beautiful Gerda, the brightness of whose naked arms filled both air and sea with light, and was so smitten with love for her that he could neither eat, drink, or sleep. His parents, by means

of his faithful servant Skyrnir, found out the cause of his malady, and, after much trouble, succeeded in obtaining Gerda for his wife. Freyr is represented (*Icon. Encyclop. Mythology and Religious Rites*, pl. 13, fig. 3) with a halo around his head, and holding in his right hand ears of wheat, and in his left an urn whence water flows, with the boar Gullinbursti at his feet, and sometimes (*Ibid.* pl. 11, fig. 6) as standing at the left of Odin, with a branch of something in his right and a drinking-horn in his left hand.—*Iconographic Encyclopædia*, iv, 279 (N. Y. 1851); Thorpe, *Northern Mythology*. (J. W. M.)

**Friar** (Lat. *frater*, Fr. *frère*, brother), a term common to monks of all kinds, founded on the supposition that there is a brotherhood between the persons of the same monastery. It is especially applied to members of the four mendicant orders, viz. 1. *Franciscans*, *Minorites*, or *Gray Friars*; 2. *Augustines*; 3. *Dominicans*, or *Black Friars*; 4. *Carmelites*, or *White Friars*. In a more restricted sense, the word means a monk who is not a priest: those in orders are generally denominated *further*.

**Frick, Albert**, a German theologian, was born at Ulm Sept. 13, 1714, and died May 30, 1776. He studied at Leipsic, and was appointed assessor (judge) to the faculty of theology. In 1743 he became minister at Jungingen, but, returning to Ulm in 1744, filled the post of librarian and professor of morals. In 1751 he went to Münster as preacher, and in 1768 was named head librarian. Among his writings are *Historia traditionum ex monumentis Ecclesie Christiane* (Ulm, 1740):—*De Natura et Constitutione Theologie Catechetice* (Ulm, 1761-64, 4to).—Hoefler, *Nouv. Biog. Générale*, xviii, 871. (J. W. M.)

**Frick, Elias**, a German theologian, was born at Ulm Nov. 2, 1673, and died Feb. 7, 1751. He studied at the gymnasium of his native city and at the universities of Leipsic and Jena, and in 1704 was pastor at Boehringen, in 1708 pastor at Bermaringen, in 1712 preacher in Ulm, in 1729 professor of morals in the gymnasium of Ulm, and also, in 1739, head librarian. We have from him *De Studio pacis et benevolentie omnium erga omnes* (1704):—*Diss. i et ii de cura veterum circa hereses* (Ulm, 1704 and 1736), followed by his treatise *De Catechisatione veteris et recentioris Ecclesie*:—*Hell-leuchtende Wahrheit der Lehre vom heiligen Abendmahl*, etc. (Ulm, 1725).—Hoefler, *Nouv. Biog. Gén.* xviii, 871.

**Frick, Johann**, a German theologian, brother of the preceding, was born at Ulm Dec. 30, 1670, and died March 2, 1739. After studying at the gymnasium of his native city he went to the University of Leipsic, where he applied himself especially to theology, and at an early date took part in editing the *Acta Eruditorum*. In 1698 he was named archdeacon of Ilmenau, but, owing to bad health, could not perform the duties. After his recovery he was appointed pastor at Pfuhl. In 1701 he went to Münster as preacher, and in 1712 was called to the chair of theology there. His principal works are, *Grund der Wahrheit von dem grossen Hauptunterschiede der evangelischen und roemisch-catholischen Religion* (1707):—*Britannia rectius de Lutheranis docta*, etc. (Ulm, 1709, 4to):—*In-clementia Clementis examinata*, etc. (Ulm, 1714):—*Die bulla Unigenitus, oder Clementis XI Constitution*, etc. (1714):—*Dissertatio solennis de culpa schismatis protestantibus immerito imputata*, etc. (Ulm, 1717, 4to):—*Zozimus in Clemente XI redivivens* (Ulm, 1719, 4to):—*Ἡσπὶ τοῦ λόγου, sire de Verbo aeterno Dei Filio, ad promissum Evangelii Joannis* (Ulm, 1725, 4to):—*De Cura Ecclesiarum veteris circa Canonem S. Scripture et ad conservandum eodum puritatem* (Ulm, 1728, 4to).—Hoefler, *Nouv. Biog. Générale*, xviii, 869-70; Ersch u. Gruber, *Allgemeine Encyclopædie*, s. v. (J. W. M.)

**Friday** is a day of fasting in the Greek and Latin churches in memory of the crucifixion of Christ. It

is a fast-day in the Church of England, unless Christmas-day happens to fall on a Friday.

**Fridegode** was a monk of Dover in the 10th century, who was chosen by his patron, Odo, archbishop of Canterbury, to write in heroic verse a life of St. Wilfrid, when, in 956, the relics of that saint were brought from Northumbria to Canterbury. Eadmer (*Vita Oswaldi*, in Wharton's *Angliæ Sacra*) says that Fridegode was Oswald's teacher, and was thought to excel the men of his time in secular and divine learning (*Ang. Sac.* ii, 193). His life of Wilfrid is merely a poetic version of that by Eddius Stephanus, and so abounds in Greek words that, according to William of Malmesbury (*De Gest. Pont.* p. 200), it needed a sibil to interpret it. Mabillon has published it in the *Acta Sanctorum*, etc.; a part from an imperfect MS. at Corvei in *Sac. iii, pars prima*, p. 171-196, and the remainder from a MS. in England in *Sac. iv, pars prima*, p. 722-726. Several other works not now extant have been attributed to Fridegode.—Wright, *Biog. Brit. Lit.* (Anglo-Saxon Period, p. 433-4). (J. W. M.)

**Fridolin, St.** The history of Fridolin, written in the 10th century by Valtherus (Walter), a monk of Säkingen, cannot, according to Rettberg, be considered as a really historical source, yet is received by learned Roman Catholics as an authority. The best edition is contained in Mone's *Quellensammlung d. bündischen Landesgeschichte*. All our knowledge of him is derived from this biography. The exact time of his life even is unknown, but he is generally considered as a contemporary of Chlodwig I († 511). According to this biography he was a Celt, but left the British islands to escape the reputation he had gained by his preaching. In Poitiers he brought back the people and the clergy to the veneration of their St. Hilary, whose relics he brought to light, and to whom he erected a church. He is also said to have been the first apostle of Germany. While seeking an island in the Rhine which had been shown him in a vision by Hilary, he came to Char, or, according to others, to Glarus, where he brought a dead man back to life; in consequence, he is considered as the patron of the canton, and is still represented on its coat of arms. He finally found the island he sought between Schaffhausen and Basel, and founded there a church to St. Hilary and the nunnery of Säkingen, where, after the Rhine had, at his request, moved to another bed (!), he died, on the 6th of November, on which day he is commemorated. According to Rettberg, this biography is a legend invented for the purpose of establishing the right of the convent to the whole island; and his travels were imagined to give the divers churches erected to St. Hilary in different places a renowned founder.—Herzog, *Real-Encyklop.* iv, 595.

**Friedländer, David**, a Jewish scholar, was born at Königsberg (Prussia) Dec. 6, 1749. The Reform movement at Berlin, under the leadership of Mendelssohn (q. v.), attracted him to the Prussian metropolis, and brought him into relations with Mendelssohn. He devoted himself to educational and other reforms among the Jews, and at one time went so far as to propose a union of the Jewish Church with the Christian. In a *Schuttschreiben* addressed to the Protestant clergyman Teller, he asked "how it might be possible for a conscientious Jew to enter into Christian fellowship without making a hypocritical confession." The unfavorable reply which he received to this inquiry, and the disapprobation with which it was met from many Jews, caused him to abandon the project. Friedländer was a constant contributor to the *Berlinische Monatsschrift*, and to the *Sammler* (a Jewish periodical at Königsberg, supported mainly by disciples of Kant). Besides a number of works of inferior merit, he translated the liturgies, and contributed to Mendelssohn's great Bible work (תורה). *Das Buch Koheleth*, im Original mit d. hebräisch. Commentar

Mendelssohn's u. d. Uebers. David Friedländer's (Berlin, 1772). He died at Berlin, Dec. 26, 1834.—Jost, *Gesch. d. Judenthums u. s. Sitten*, iii, 316; *Biographie Universelle*, lxxiv, 513; Kitto, *Cyclop. of Bib. Lit.* ii; Etheridge, *Intro. to Bib. Lit.* 477. (J. H. W.)

**Friend** "is taken for one whom we love and esteem above others, to whom we impart our minds more familiarly than to others, and that from a confidence of his integrity and good will towards us; thus Jonathan and David were mutually friends. Solomon, in his book of Proverbs, gives the qualities of a true friend. 'A friend loveth at all times;' not only in prosperity, but also in adversity; and, 'There is a friend that sticketh closer than a brother.' He is more hearty in the performance of all friendly offices; he reproves and rebukes when he sees anything amiss. 'Faithful are the wounds of a friend.' His sharpest reproofs proceed from an upright and truly loving and faithful soul. He is known by his good and faithful counsel, as well as by his seasonable rebukes. 'Ointment and perfume rejoice the heart, so does the sweetness of a man's friend by hearty counsel;' by such counsel as comes from his very heart and soul, and is the language of his inward and most serious thoughts. The company and conversation of a friend is refreshing and reviving to a person who, when alone, is sad, dull, and inactive. 'Iron sharpeneth iron, so a man sharpeneth the countenance of his friend.' The title, 'the friend of God,' is principally given to Abraham: 'Art not thou our God, who gavest this land to the seed of Abraham, thy friend, forever?' And in Isaiah xli, 8, 'But thou Israel art the seed of Abraham, my friend.' 'And the Scripture was fulfilled, which saith, Abraham believed God, and it was imputed to him for righteousness; and he was called the friend of God' (James ii, 23). This title was given him, not only because God frequently appeared to him, conversed familiarly with him, and revealed his secrets to him, 'Shall I hide from Abraham that thing which I do?' (Gen. xviii, 17), but also because he entered into a covenant of perpetual friendship both with him and his seed. Our Saviour calls his apostles 'friends': 'But I have called you friends;' and he adds the reason of it, 'For all things that I have heard of my Father I have made known unto you' (John xv, 15). As men use to communicate their counsels and their whole minds to their friends, especially in things which are of any concern, or may be of any advantage for them to know and understand, so I have revealed to you whatever is necessary for your instruction, office, comfort, and salvation. And this title is not peculiar to the apostles only, but in common with them to all true believers. The friend of the bridegroom is the bride-man, he who does the honors of the wedding, and leads his friend's spouse to the nuptial chamber. John the Baptist, with respect to Christ and his Church, was the friend of the bridegroom; by his preaching he prepared the people of the Jews for Christ (John iii, 29). Friend is a word of ordinary salutation, whether to a friend or foe; he is called friend who had not on a wedding garment (Matt. xxii, 12). And our Saviour calls Judas the traitor friend. Some are of opinion that this title is given to the guest by an irony, or antiphrasis, meaning the contrary to what the word importeth; or that he is called so because he appeared to others to be Christ's friend, or was so in his own esteem and account, though falsely, being a hypocrite. However, this being spoken in the person of him who made the feast, it is generally taken for a usual compellation, and that Christ, following the like courteous custom of appellation and friendly greeting, did so salute Judas, which yet left a sting behind it in his conscience, who knew himself to be the reverse of what he was called. The name of friend is likewise given to a neighbor. 'Which of you shall have a friend, and shall go to him at midnight, and say, Friend, lend me three loaves?' (Luke xi, 5).—Watson, *Dictionary*, s. v.

**Friendly Islands**, "as distinguished from the Fiji Islands (q. v.), generally reckoned a part of them, are otherwise styled the **TONGA GROUP**. They stretch in S. lat. from  $18^{\circ}$  to  $23^{\circ}$ , and in W. long. from  $172^{\circ}$  to  $176^{\circ}$ , and consist of about 82 greater and 150 smaller islands, about 30 of which are inhabited. The great majority are of coral formation, but some are volcanic in their origin, and in Tofua there is an active volcano. The principal member of the archipelago is *Tongatapu*, or *Sacred Tonga*, which contains about 7500 inhabitants, out of a total population of about 25,000" (Chambers, s. v.). In 1817 the missionaries estimated the population at 50,000. Next to Tongatapu, the most important islands are Vavau, with about 5000 inhabitants, and the Habai group, with about 4000. "The Friendly Islands were discovered by Tasman in 1643, but received their collective name from Cook. Both these navigators found the soil closely and highly cultivated, and the people apparently unprovided with arms. The climate is salubrious, but humid; earthquakes and hurricanes are frequent, but the former are not destructive" (Chambers, s. v.). The first attempt to introduce Christianity was made in 1797, when captain Wilson, of the *Duff*, left ten mechanics at Hihifo, or Tongatapu, in the capacity of missionaries. This attempt met with no success. The chief under whose protection they resided was murdered by his own brother, and the island involved in a civil war. Three of the missionaries were murdered by the natives; the others were robbed of all their goods, and in 1800, being utterly destitute, and having but little prospect of usefulness among the natives, accepted from the captain of an English ship a passage to New South Wales. For twenty years after this no missionaries visited the islands. In August, 1822, the Rev. Walter Lawry, of the Wesleyan Missionary Society, arrived at Tongatapu, but he left again the next year for New South Wales. In 1825 the Rev. Messrs. John Thomas and John Hutchinson were appointed to Tongatapu. They arrived in June, 1826, at Hihifo. In 1827 they were re-enforced by the arrival of Rev. Nathaniel Turner, Rev. William Cross, and Mr. Weiss. They found at Nukualofa, one of the chief towns of the island, two native preachers from Tahiti, who had been some time employed in that locality, preaching to the people in the Tahitian language. They had erected a chapel, and 240 persons attended their teaching. In 1830 Mr. Thomas proceeded to Lifuka, the chief of the Habai Islands. On his arrival he found that the king, Taufaaahu, had renounced idolatry. Schools were soon opened both for males and females, which were well attended, chiefly by adults, and taught principally by the natives themselves. After being some months in the island, Mr. Thomas baptized king Taufaaahu, whose conversion was followed by that of a large portion of the people. Among others was Tamaha, a female chief of the highest rank, who had been regarded as a deity, and was one of the pillars of popular superstition. In the island of Vavau, king Finau also yielded to the exhortations of the missionaries and of king Taufaaahu, and with him about a thousand of his people renounced idolatry. In 1831 three new missionaries arrived, one of whom was a printer. A printing-press was now established, at which were printed large editions of several school-books, select passages of Scripture, hymn-books, catechisms, and other useful books. Thus education made great progress, and numerous native helpers assisted the missionaries in preaching the Gospel in the various islands. In 1834 a powerful religious revival occurred, beginning in Vavau, and soon extending to the Habai and Tonga islands. It was followed by a remarkable reformation of manners. Polygamy was now abandoned, marriage became general, and greater decency and modesty prevailed in dressing. Among the most zealous of the converts was king Taufaaahu, who at his baptism was called

king George, while his queen was named Charlotte. He erected for the missionaries a very large chapel in Habai, and, being a local preacher, preached himself an appropriate sermon on the occasion. In 1839, king George, in a large assembly of the chiefs and people, promulgated a *code of laws*, and appointed judges to hear and decide all cases of complaint which might arise among them. In June, 1840, the heathen chiefs of Tonga, where Christianity had made much less progress than in Habai and Vavau, broke out in rebellion. Captain Croker, of the British ship *Favorite*, who happened to arrive just at this time, united the force under his command to that of king George, but he and two of his officers were killed, and the first lieutenant and nineteen men dangerously wounded. The mission in Tongatapu was broken up for a time, but it was resumed at the restoration of peace. In 1844 king George for a short time became a backslider in heart, but soon penitently acknowledged his fall, and ever since remained a devoted Christian. In 1845 he succeeded to the sovereignty of all the islands. In 1852 a new rebellion broke out in Tonga. It was instigated by a few chiefs who still adhered to heathenism; but the Roman Catholic missionaries made common cause with them, and one of them went in search of a man-of-war to chastise king George. The latter, however, succeeded in suppressing the revolt. In November, 1852, a French man-of-war arrived, the commander of which, captain Bolland, had been commissioned by the French governor of Tahiti to inquire into certain complaints lodged against king George by the captain of a French whaler, and by the Roman Catholic priests residing in Tonga. The king obeyed the summons of the captain, went on board the man-of-war, and had a five-hours' conversation with the captain, who declared himself satisfied with the reports made by the king, and in the name of the French government recognised him as the king of the Friendly Islands, only stipulating that the king should protect the French residents and tolerate the Roman Catholic Church. These conditions were accepted by the king. In 1868 paganism in the Friendly Islands was almost extinct. Great numbers of the islanders can speak English, and, in addition, have learned writing, arithmetic, and geography, while the females have been taught to sew. The missions are still under the care of the Wesleyan Missionary Society, which in 1868 had in the islands 5 circuits, 178 chapels, 2 other preaching-places, 19 missionaries and assistant missionaries, 1686 subordinate paid and unpaid agents, 8615 members, 795 on trial for membership, 6617 scholars in schools, and 23,484 attendants on public worship. See Newcomb, *Cyclopaedia of Missions*, p. 714; Walter Lawry, *Missions in Tonga and Feejee*; *Wesleyan Almanac* for 1869. (A. J. S.)

**Friends, SOCIETY OF.** This body of Christians now subsists in two main divisions, generally known to the public as the Orthodox and the Hicksite; but these designations are not used by the bodies themselves. The former body is designated below as No. 1, and the article is written by William J. Allinson, editor of *The Friends' Review*; the latter body is designated as No. 2, and the article is written by Samuel M. Janney, of Lincoln, Loudon County, Va.

**FRIENDS (No. 1).** The organization of the Friends as a distinct society or church was not the result of any deliberate design to form a sect, but must be regarded as a providential ordering, and as a necessity growing from the degeneracy, corruptions, and worldliness which permeated the churches in the early part of the 17th century. They did not profess to establish a new religion, or claim to have discovered any new truth. Their object was the revival of primitive Christianity, which had been maintained through the centuries of the Christian æra by successive testimony-bearers, many of whom had sealed the truth with their

blood, and been counted unto the Lord for a generation. Especially they were led to call the attention of the people to the Holy Spirit as the living and infallible guide, as a precious and glorious reality, essential to the Christian life, and sufficient to lead into true holiness. They never held the doctrine of the Spirit as a mere theory, or ignored the great truth that this unspeakable gift proceeded from the adorable Giver, and was consequent upon the death and vicarious sacrifice of him who for our sakes laid down his life upon Calvary. They always regarded the close connection of cause and effect as described in our Lord's words: "I tell you the truth; it is expedient for you that I go away; for if I go not away, the Comforter will not come unto you; but if I depart I will send him unto you" (John xvi, 7). This truth George Fox began to teach and preach, not as an invention of his own, but as a priceless jewel thrown aside and hidden under the rubbish of dogmas and forms. The Divine Spirit asserted himself almost simultaneously in the hearts of many contemporaries, who were ready to respond to the preaching of Fox: "It is the very truth." Had the clergy and other professors of that day opened their hearts to the spirituality of the Christian religion, and yielded themselves to the Spirit's guidance, the Church would have been reformed, and Fox would have been satisfied. The religious awakening of this period was well described by the pen of Milton: "Thou hast sent out the spirit of prayer upon thy servants over all the land to this effect, and stirred up their vows as the sound of many waters about thy throne. Every one can say that now certainly thou hast visited this land, and hast not forgotten the uttermost corners of the earth, in a time when men thought that thou wast gone up from us to the farthest end of the heavens, and hadst left to do marvellously among the sons of these last ages." Christ the object of faith, the Spirit the transforming power, was the doctrine of the first Friends, as it has ever been that of their true successors. The divinity of our Lord was not called in question by the teachers of that day, whilst the guidance of His Spirit, the light of Christ in the conscience, was denied or ignored; and hence the prominence given to the latter truth, and the comparative silence respecting the other, in the controversial writings of the early Friends. George Fox, the founder of the Society of Friends, was born in 1624, and in 1647, after much deep experience of the blessedness of the Comforter, "even the Spirit of Truth which proceedeth from the Father," he went forth through England, on foot and at his own charges, freely preaching to the people the unsearchable riches which Christ had purchased for them, and was ready to give liberally to all who would ask for it, coming unto God by him. To the spiritual standard thus raised many flocked—ministers of various churches, sin-sick members of their flocks who had wandered unsatisfied upon "barren mountains and desolate hills," magistrates, rich men and poor, and "honorable women not a few." Eight years from the date last given, ministers of the new society preached the Gospel in various parts of Europe, in Asia, and Africa, and bore, with heroic endurance, persecutions, imprisonment, and the tortures of the Inquisition in Rome, Malta, Austria, Hungary, etc. An authentic history of their sufferings was collected by Joseph Besse, and published, London, 1753, in two large folios. The systematic interference by the state in matters of religion and conscience, which was the policy of England through all the political overturnings, caused shameless oppressions and wrongs to be perpetrated upon this peaceable and God-fearing people, three thousand four hundred of them at one time being incarcerated in filthy and unwholesome prisons, where many of them died martyrs to the truth. No one seemed to think of purchasing exemption from persecution by yielding, even in appearance, a point of principle.

"No—nursed in storm and peril long,  
The weakest of their band was strong;"

and, whilst men and women were perishing in jails, even the little boys and girls would meet together at the places appointed, and in the beauty and sweetness of early piety worship the God of their fathers in spirit and in truth. But not even childhood was sacred from religious intolerance and official interference. These babes in Christ (as truly they might be called) were disturbed at their worship, savagely threatened, and sometimes cruelly beaten.

The early history of Friends is closely connected with that of George Fox, and necessarily included in the various biographies of that remarkable man. He commenced his career as a seeker after the truth, and meeting, in Europe and America, with many whose yearnings were similar, they were called *Seekers*. The epithet of Quakers was given in derision, because they often trembled under an awful sense of the infinite purity and majesty of God, and this name, rather submitted to than accepted by them, has become general as a designation. "To this man will I look," said the Holy Spirit by Isaiah, "even to him that is poor and of a contrite spirit, and *trembleth at my word.*" To tremble, then, at the presence of the God of the whole earth, and especially when speaking in his name, is not to be regarded as any reproach; but their name, as a body, is "*The Religious Society of Friends.*" The spread of the society in North America was rapid, especially after the founding of Pennsylvania in 1680 by William Penn, whose career as a wise legislator is prominent in history, and who, as a Christian philanthropist, a statesman, a writer, and a minister of the Gospel of Christ, established a reputation which even the vindictive attacks of Macaulay could not undermine. As early as 1672 George Fox found an established settlement of Friends in Perquimans County, N. C., which proved the germ of an independent diocese, or Yearly Meeting, whose members from that time have been exemplary upholders, at the cost of persecution and much loss of substance, of the principles of civil and religious liberty, steadily testifying against slavery and war, and maintaining the freeness of the Gospel. During the War of the Rebellion their heroic firmness in refusing to bear arms was proof against cruel tyranny, so that some of these simple testimony-bearers, who "loved not their lives unto the death," by meek yet brave endurance of tortures and privations have made their names historic. It is noteworthy that in North Carolina, within a very few years (during and since the Rebellion), about seven hundred persons joined the society from conviction. The membership of that Yearly Meeting, although many times thinned by emigration to free states, is now about three thousand souls. The persecution of Friends in New England was so sanguinary that

"Old Newbury, had her fields a tongue,  
And Salem's streets, could tell their story  
Of fainting woman dragged along,  
Gashed by the whip accursed, and gory;"

and four Friends actually suffered martyrdom—a Quaker woman of remarkable refinement and piety, and three men of equal worth, being hanged on Boston Common. The number of victims was likely to be increased, when proceedings were checked by a royal mandamus.

The membership of the society becoming very widely extended, a formal organization by a system of Church government became necessary, and George Fox evinced much sagacity, mental soundness, and spiritual guidance in successful efforts to establish rules for the government of the Church, and meetings for discipline in a harmonious chain of subordination, the highest and final authority being a Yearly Meeting. The Yearly Meetings are, in a sense, diocesan, having each a defined territorial jurisdiction, and independent of each other in their government and law-

making powers, whilst by a sort of common law there are principles of discipline sacred to all, and membership in any meeting involves a connection with the society wherever existing, and may be transferred by certificate when the person claiming such credential is not liable to Church censure.

The transaction of the business of these meetings is regarded as the Lord's work; and as he declared "where two or three are gathered in my name, there am I in the midst of them," they regard his immediate presence with his Church as the foundation of its authority. Hence, in these meetings, and in those especially for worship, it is held to be necessary for all minds to be turned to him who is present by his Spirit, and whose anointing teacheth all things, and alone can enable his people to serve him according to the counsel of his will.

In the ministry of the Word, no Friend who is true to the principles of the society will speak without feeling a direct call and movement of the Holy Spirit for the service. Under this influence, the Gospel ministry is regarded as very precious, and a blessing to be guarded and cherished. Elders are appointed, who are believed to be prudent persons, gifted with a discerning spirit, and it is their duty to counsel, foster, and aid the ministers, and either to encourage or restrain the vocal offerings of those who attempt to speak in this capacity, according as they are or are not believed to be called of God to the work.

No system of theological training is known or could be permitted among the Friends. They are favorable to education, and provide for its free extension to the children of poor members; but they regard it as the exclusive province of the Holy Spirit to select his own ministers, and to instruct them what they shall say. It is, however, considered the duty of all, and especially of those who stand as ambassadors for Christ, to be diligent and prayerful in the perusal of the Holy Scriptures, through which the man of God, led as he will assuredly be by the Spirit which gave them forth, will be "thoroughly furnished unto all good works." So great is the stress which Friends place upon the perusal of the Scriptures, and upon the bringing up of their children and others under their care in this practice, that it is made a matter of semi-annual investigation in all their meetings, and so long ago as 1754 London Yearly Meeting enacted a rule of discipline that the families of poor Friends should be provided with Bibles—a gratuitous Scripture distribution which was in advance of any Bible Society.

The privilege and duty of prayer, both secretly and vocally, under a reverent and filial sense of the character of the engagement, are regarded as of the very highest importance. It is believed that "men ought always to pray," but a jealousy is felt lest any should in a light and flippant way rush into this exercise. He who knoweth what we have need of before we ask him, will, if reverently waited upon, extend his kingly sceptre and put into the heart the prayer of faith; and before any one shall pray vocally in their meetings, as mouthpiece for the people, it is requisite that a direct movement of the Holy Spirit should prompt the offering, lest the words of rebuke be applicable: "Ye ask and receive not, because ye ask amiss." The following clause in the London Discipline expresses the creed of the society respecting this part of the service of Almighty God:

"As prayer and thanksgiving are an important part of worship, may they be offered in spirit and in truth, with a right understanding seasoned with grace. When engaged herein, let ministers avoid many words and repetitions, and be cautious of too often repeating the high and holy name of God or his attributes; neither let prayer be in a formal or customary way, nor without a reverent sense of divine influence."

The meetings of the society are characterized by practical recognition of the presidency and headship

of Christ in the Church, and a conviction that every movement of the body should be dictated by its Head.

The Society of Friends is not at issue with other orthodox churches on the general points of Christian doctrine. Avoiding the use of the word Trinity, they reverently believe in the Holy Three: the Father, the Lord Jesus Christ, the only-begotten of the Father, by whom are all things, who is the mediator between God and man, and in the Holy Spirit, who proceedeth from the Father and Son—ONE GOD, blessed forever. They accept in its fullness the testimony of holy Scripture with regard to the nature and offices of Christ, as the promised Messiah, the Word made flesh, the atonement for sin, the Saviour and Redeemer of the world. They have no reliance upon any other name, no hope of salvation that is not based upon his meritorious death on the cross. The charge that they deny Christ to be God William Penn denounced as "most untrue and uncharitable," saying, "We truly and expressly own him to be so, according to the Scripture." As fully do they admit his humanity, and that he was truly man, "sin only excepted." They so fully believe in the Holy Spirit of Christ, that without the inward revelation thereof they feel that they can do nothing to God's glory, or to further the salvation of their own souls. Without the influence thereof they know not how to approach the Father through the Son, nor what to pray for as they ought. Their whole code of belief calls for the entire surrender of the natural will to the guidance of the pure, unerring Spirit, "through whose renewed assistance," says one of their writers, "they are enabled to bring forth fruits unto holiness, and to stand perfect in their present rank." As it was the design of Christ, in going to the Father, to send as a comforter his Spirit to his disciples, so it is with his Spirit that he baptized and doth baptize them, it being impossible, in the estimation of the Friends, that an outward ablution should wash from the spirit of man the stains of sin. Hence they attach importance only to "the baptism which now saveth," and which John the Baptist predicted should be administered by Christ. And it is by his Spirit, also, that his followers are enabled to partake of the true supper of the Lord: "Behold, I stand at the door and knock: if any man hear my voice and open unto me, I will come in and sup with him, and he shall sup with me." Thus they hold that the coming of the Lord Jesus Christ in the flesh was the grand epoch and central fact of time, and that types, and shadows, and all ceremonial observances, which had their place before as shadows of good things to come, now that they have been fulfilled in him, are only shadows of those shadows. The type properly precedes the reality, and truly this was worthy of being foreshadowed; "but," says Paul (1 Cor. xiii, 10), "when that which is perfect is come, then that which is in part shall be done away."

Their view respecting the resurrection may be briefly stated in the language of one of the society's documents: "The Society of Friends believes that there will be a resurrection both of the righteous and the wicked; the one to eternal life and blessedness, and the other to everlasting misery and torment, agreeably to Matt. xxv, 31-46; John v, 25-30; 1 Cor. xv, 12-58. That God will judge the world by that man whom he hath ordained, even Christ Jesus the Lord, who will render unto every man according to his works; to them who by patient continuing in well-doing during this life seek for glory and honor, immortality and eternal life; but unto the contentious and disobedient, who obey not the truth, but obey unrighteousness, indignation and wrath, tribulation and anguish upon every soul of man that sinneth, for God is no respecter of persons" (Thomas Evans).

They have ever regarded war as inconsistent with Christianity. For this they refer to the teachings of Christ and his apostles, the example of the early Christians, and to the witness for truth in their own con-

sciences, tested and confirmed by the sacred writings. They find that all the emotions which are exercised in wars and fightings are traced to evil lusts, and are inconsistent with that love which is the substance of the first, the second, and the new commandment, which "worketh no ill to his neighbor," and on which "hang all the law and the prophets."

They consider oaths to be inadmissible, as being positively forbidden by our Lord in language not to be mistaken, and this testimony was made the occasion of inflicting severe penalties upon the first Friends. When their persecutors failed to convict them upon false charges, it was customary to administer the test-oaths to them, on refusing to take which they were thrown into prison. They decline to employ the complimentary and false language of the world, and to apply to the months and days the names given in honor of pagan gods, preferring the numerical nomenclature adopted in the Scriptures. In dress they aim at plainness and simplicity, avoiding the tyranny of an ever-changing fashion. As a natural result, a degree of uniformity of dress prevails among them, bearing much resemblance to the style in vogue at the rise of the society. This approach to uniformity, which at first was unintentional, came to be cherished as a hedge of defence against worldly and ensnaring associations, and a means by which they recognised each other. The principle at stake is not in the fashion of a garb, but in simplicity and the avoidance of changes of fashion. Were the customary patterns all abandoned to-day, and the principle of simplicity still consistently adhered to, the kaleidoscope of fashion would make frequent changes in the people around them, and Friends would soon be left as peculiar in their appearance as at present.

Whilst Friends, as good citizens, have cheerfully paid all legal assessments for the support of public schools and of the poor, and have contributed abundantly to the various charities and general claims of benevolence, they have always been characterized by their scrupulous care in relieving their own poor, so that none of their members come upon the public for maintenance or for gratuitous education.

A dangerous tendency to "hold the truth in parts" led a portion of the society, in the early part of the present century, into the error of insisting too singly upon the precious doctrine of Christ within the hope of glory, and of denying, or at best holding lightly, a belief in his true divinity whilst incarnate, and in the atoning, cleansing, saving efficacy of his blood which was shed for us. Thus Socinianism gained a footing in the society, to the grief of those who held the ancient faith, and in 1827 an extensive and much-to-be-regretted secession occurred, in which doctrinal and personal considerations were mingled; and, in the excitement of the division, it is believed that many failed to comprehend the true issues, and that not a few who were essentially one in faith were discovered for life as regards church fellowship. Thus two entirely distinct societies now exist, each claiming exclusive right to the same name, and causing confusion among other professors as to their identity. In this secession portions of six out of ten Yearly Meetings then existing joined with the body popularly designated by the name of their leader (though they have never acknowledged the title). In Great Britain and Ireland, and in two of the American Yearly Meetings then existing, no schism occurred.

There are twelve independent Yearly Meetings of the Religious Society of Friends. The oldest of these is that of London, the records of which are preserved from the year 1672. This body is regarded by the others with respectful affection as the mother of Yearly Meetings, and its General Epistle of Christian Counsel, which is issued annually, is gladly received, republished, and circulated by nearly all the co-ordinate bodies. The number of members in England is 13,815,

whilst there is an attendance of its meetings by non-members of 3658. There are settlements of Friends in France, Germany, Norway, and in several parts of Australasia, which all make annual reports to London Yearly Meeting, and acknowledge subordination to it. Friends in England are a highly influential body in proportion to their number. There is a Yearly Meeting in Ireland, one in Canada, and nine in the United States, viz., the Yearly Meetings of New England, New York, Philadelphia, Baltimore, North Carolina, Ohio, Indiana, Western Indiana, and Iowa. The increase of membership in the Western States has been rapid of late years, and settlements of Friends are starting up in Kansas, Missouri, etc. The membership of the society may be rated at 80,000.

In all these Yearly Meetings, First-day Schools are conducted with zeal and efficiency, exerting a wide evangelical influence. In a number of the Yearly Meetings these are under the direct care of the society, and made the subjects of annual statistical reports. Thus, in Indiana Yearly Meeting, there are 115 such schools, with 710 teachers, and 6953 pupils, of whom 2307 are over twenty-one years of age. In the Yearly Meeting of Western Indiana there are 63 First-day Schools, with 6170 pupils, and 411 teachers. North Carolina Yearly Meeting has taken the lead in the establishment of a *Normal* First-day School, the benefit of which has been very decided.

There are in England and Ireland several educational institutions of merit under care of the society. In this country Friends have three colleges, viz., *Haverford College*, Pennsylvania; *Earlham College*, Richmond, Ind.; and *Waltier College*, Salem, Iowa. There are also large boarding-schools under the care of different Yearly Meetings, the most noted of which are those of *West Town*, Pa., *Providence*, R. I., *Union Springs*, N. Y., and *New Garden*, N. C. (W. J. A.)

FRIENDS (No. 2).—I. *History*.—The origin of the Religious Society of Friends dates from about the middle of the 17th century. George Fox, the chief instrument in the divine hand by whom it was gathered, was born in Leicestershire, England, in the year 1624. His parents were pious members of the National Church, and from his childhood he was religiously inclined. When about nineteen years old he was led by a sense of duty to seek retirement from the world, and he spent much time in reading the holy Scriptures, with meditation and prayer. In the year 1647 he began to appear as a preacher of the Gospel, and he found many prepared to receive his message of love, calling them away from a reliance upon all rites and ceremonies to the word of divine grace, or Spirit of Christ, as the efficient cause of salvation. Converts in large numbers were soon gathered, who met together for divine worship, waiting upon God in silence, or engaging in preaching, prayer, or praise, as they believed themselves prompted by the Spirit of Christ, their ever-present teacher. The persecutions endured by the early Friends, both in Europe and America, were exceedingly severe, and were chiefly on account of their absenting themselves from the Established Church, refusing to pay tithes, openly attending their own religious meetings when prohibited by law, and declining to take oaths of any kind, or to engage in military service. "Between the years 1650 and 1689, about fourteen thousand of this people suffered by fine and imprisonment, of which number more than three hundred died in jail, not to mention cruel mockings, buffetings, scourgings, and afflictions innumerable."

It has been estimated that, at the death of George Fox in the year 1690, the number of Friends in Europe and America was about 75,000, and that 10,000 of these inhabited the British colonies. They afterwards declined in the mother country, and greatly increased in America, where they became most numerous in Pennsylvania, New Jersey, Rhode Island, and North Carolina.

In the year 1827 a schism took place in Philadelphia Yearly Meeting, which afterwards extended to most of the other Yearly Meetings in America. The space allotted for this article will not suffice to give an intelligible account of it (see Janney's *Hist. of Friends*, vol. iv. The part relating to the separation has been republished in a small volume by T. Ellwood Zell, Philadelphia). At the time of the separation, those who took the name of Orthodox Friends were in the Western States the more numerous; but in the Atlantic sea-board States they were less numerous than those who are by some called Hicksites, but who persistently refuse to acknowledge any other name than that of Friends or Quakers. It is of this branch only that we now treat.

*II. Doctrines.*—We hold the doctrines of the early Friends, as expounded in the writings of Fox, Penn, Pennington, and Barclay. A committee which represents Philadelphia Yearly Meeting has recently so far approved of a "Summary of Christian Doctrines," from which the following abstract is taken, as to order its purchase for distribution:

*The Scriptures.*—The Religious Society of Friends, from its rise to the present day, has always maintained its belief in the authenticity and divine authority of the holy Scriptures, referring to them for proof of its principles, and acknowledging them to be the only fit outward test of Christian doctrines. We do not call them the Word of God, because this appellation is applied by the writers of the Scriptures to that Eternal Power by which the worlds were made; for "In the beginning was the Word, and the Word was with God, and the Word was God."

We assign to the Scriptures all the authority they claim for themselves, which is chiefly expressed in the following texts: " whatsoever things were written aforetime were written for our learning, that we, through patience and comfort of the Scriptures, might have hope" (Rom. xv, 4). "The holy Scriptures are able to make wise unto salvation, through faith which is in Christ Jesus" (2 Tim. iii, 15-17). "All Scripture given by inspiration of God is profitable for doctrine, for reproof, for correction, for instruction in righteousness, that the man of God may be perfect, thoroughly furnished unto all good works" (Barclay's *Apology*, prop. iii, § 5).

In the advices issued by our several Yearly Meetings, the Scriptures are very frequently and earnestly recommended to the attention of our members. In the year 1851, Philadelphia Yearly Meeting, after referring to "those sublime truths which are recorded in the holy Scriptures," thus continues: "In these invaluable writings we find the only authentic record of the early history of our race, the purest strains of devotional poetry, and the sublime discourses of the Son of God. Their frequent perusal was therefore especially urged upon our younger members, who were encouraged to seek for the guidance of divine grace, by which alone we realize in our experience the saving truths they contain."

In the year 1863, the following minute of Baltimore Yearly Meeting was sent down to its subordinate meetings, viz.: "We have been reminded that this Yearly Meeting has at various times issued advices to its members inciting them to the frequent reading of the holy Scriptures, the authenticity of which has always been acknowledged by the Society of Friends. We believe it is not the part of true wisdom to dwell upon defects, whether real or imaginary, in the sacred records, but rather to use them as they were intended, 'for reproof, for correction, for instruction in righteousness,' remembering that it is only through the operation of the Spirit of Truth upon our hearts that they can be made availing to us in the promotion of our salvation."

The following extract is taken from the Rules of Discipline of the Yearly Meeting of Friends held in

Philadelphia: "If any in membership with us shall blaspheme, or speak profanely of Almighty God, Christ Jesus, or the Holy Spirit, he or she ought early to be tenderly treated with for their instruction, and the conviction of their understanding, that they may experience repentance and forgiveness; but should any, notwithstanding this brotherly labor, persist in their error, or deny the divinity of our Lord and Saviour Jesus Christ, the immediate revelation of the Holy Spirit, or the authenticity of the Scriptures; as it is manifest they are not one in faith with us, the monthly meeting where the party belongs, having extended due care for the help and benefit of the individual without effect, ought to declare the same, and issue their testimony accordingly."

*Immediate Revelation.*—The highest privilege granted to man is that of entering into communion with the Author of his being. "Ye are the temples of the living God," writes the apostle Paul; "as God hath said, I will dwell in them, and walk in them, and I will be their God, and they shall be my people" (2 Cor. vi, 16). "The anointing which ye have received of him," says the beloved disciple, "abideth in you, and ye need not that any man teach you; but as the same anointing teacheth you of all things, and is truth, and is no lie, and even as it hath taught you, ye shall abide in him" (1 John ii, 27).

In the ordering of divine Providence, instrumental means are often employed to convey religious truth, such as the reading of the Scriptures, the preaching of the Gospel, and the vicissitudes of life; but in all cases the good effected is from the immediate operations of divine grace upon the heart or conscience. In fact, there can be no saving knowledge of Christ but from immediate revelation. "No man can come to me," said Jesus, "except the Father which hath sent me draw him." This drawing of the Father is the operation of his Spirit, for "the manifestation of the Spirit is given to every man to profit withal" (1 Cor. xii, 7). To the wicked he comes as a reprover for sin, a "spirit of judgment and a spirit of burning," but to the prayerful and obedient as a comforter in righteousness.

*The Original and Present State of Man.*—It is a scriptural doctrine that neither righteousness nor unrighteousness can be transmitted by inheritance, but every man shall be judged according to his deeds. The language of the prophet Ezekiel is very clear on this point. "As I live, saith the Lord God, ye shall not have occasion any more to use this proverb in Israel." . . . "The fathers have eaten sour grapes, and the children's teeth are set on edge." . . . "Behold, all souls are mine; as the soul of the father, so also the soul of the son is mine: the soul that sinneth, it shall die." . . . "The son shall not bear the iniquity of the father, neither shall the father bear the iniquity of the son: the righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him" (Ezek. xviii, 2-25).

Man was created in the image of God; he was pure, benevolent, and blissful, and he enjoyed the privilege of communion with God, that is, to partake of "the tree of life which is in the midst of the paradise of God" (Rev. ii, 7). But, although he was made a free agent, he was not to be so independent of God as to know of himself good or evil without divine direction. And when he presumed to set up his own will, and to be governed by it in opposition to the divine will, he assumed the place of God, and having thus turned away from the Holy Spirit, he ceased to partake of "the tree of life," and consequently died a spiritual death. It was then he experienced the fulfilment of the divine prediction, "In the day thou eatest thereof thou shalt surely die;" for "to be carnally minded is death, but to be spiritually minded is life and peace."

Animal propensities may be transmitted from parents to children, but the Scriptures do not teach that we inherit any *guilt* from Adam, or from any of our

ancestors; nor do we feel any compunction for their sins. The language of our Saviour clearly implies that little children are innocent, for "of such," he says, "is the kingdom of heaven."

*The Divine Being.*—The unity, omnipresence, omnipotence, and omniscience of God, the only fountain of wisdom and goodness, are fully set forth in the Scriptures of both the Old and the New Testament. He declares by the mouth of his prophet, "Thus saith the Lord, the Holy One of Israel, his Maker." . . . "I, even I, am the Lord, and besides me there is no Saviour." . . . "Thus saith the Lord, your Redeemer, the Holy One of Israel" (Isa. xliii, 11, 14). These declarations are reiterated and confirmed in the New Testament. "Jesus answered, The first of all the commandments is, 'Hear, O Israel, the Lord our God is one Lord,'" etc. (Mark xii, 29).

That spiritual influence or medium by which the Most High communicates his will to man is called his Word, and the same term is applied to his creative power, by which all things were made. The unity of the Eternal Word, or Logos, with God, may be illustrated by the light which emanates from the sun; for "God is light," and of Christ it is said, "In him was life, and the life was the light of men." The connection between the great luminary of the solar system and the light proceeding from him is so perfect that we apply the term Sun to them both. So, in relation to the Eternal Word, which was in the beginning with God, and was God, it is a manifestation of his wisdom and power, being called in the Old Testament "The angel of his presence" (Isa. lxiii, 9), "The Redeemer of his people;" and in the New Testament, "The Son of God, by whom also he made the worlds" (Heb. i, 2). The term Christ was also applied by the apostles to the Spirit of God as manifested in men. For instance, Paul writes of the children of Israel under Moses, "They did all eat the same spiritual meat, and they did all drink the same spiritual drink; for they drank of that spiritual rock that followed them, and that rock was Christ" (1 Cor. x, 4). Peter says that the prophets "propheesied of the grace that should come unto you, searching what, or what manner of time the *Spirit of Christ* which was in them did signify, when it testified beforehand of the sufferings of Christ and the glory that should follow" (1 Pet. i, 11).

The most full and glorious manifestation of the divine Word, or Logos, was in Jesus Christ, the immaculate Son of God, who was miraculously conceived and born of a virgin. In him the manhood or son of man was entirely subject to the divinity. The Word took flesh, or was manifested in the flesh. "He took not on him the nature of angels, but he took on him the seed of Abraham." . . . "Of whom, as concerning the flesh, Christ came, who is over all, God, blessed forever." Being "in all points tempted like as we are, yet without sin," he was an example to all succeeding generations, "a man approved of God by miracles, wonders, and signs which God did by him." The intimate union between Christ and his Church is illustrated in the epistles of Peter and Paul by two similitudes: that of a body having many members, of which Jesus Christ is the head; and that of a temple, of which he is the chief corner-stone. The holy manhood of Christ, that is, the soul of him in whom the Holy Spirit dwelt without measure, is now, and always will be, the head, or chief member of that spiritual body which is made up of the faithful servants of God of all ages and nations.

"There is one God, and one Mediator between God and men, the man Christ Jesus" (1 Tim. ii, 5). As Moses was a mediator to ordain the legal dispensation, so Jesus Christ was and is the Mediator of the new covenant; first, to proclaim and exemplify it in the day of his outward advent; and, secondly, through all time, in the ministration of his Spirit.

"The Spirit itself maketh intercession for us with

groanings which cannot be uttered. And he that searcheth the hearts knoweth what is the mind of the Spirit, because he maketh intercession for the saints according to the will of God" (Rom. viii, 26).

When the apostles went forth preaching Christ and his spiritual kingdom, they attributed to his name or power their wonderful success. Acts ii, 52, 33; iv, 10, 11, 12: "This is the stone," said Peter to the rulers, "which was set at naught of you builders, which is become the head of the corner. Neither is there salvation in any other; for there is none other name under heaven given among men whereby we must be saved."

*Salvation by Christ.*—The great work of the Messiah for the salvation of men is beautifully portrayed in the passage which he read from Isaiah in the synagogue at Nazareth. "The Spirit of the Lord is upon me, because he hath anointed me to preach the Gospel to the poor; he hath sent me to heal the broken-hearted, to preach deliverance to the captives, and recovering of sight to the blind, to set at liberty them that are bruised, to preach the acceptable year of the Lord" (Luke iv, 18, 19). He came to establish a spiritual kingdom of truth and love in the hearts of mankind, and thereby to put an end to the kingdom of evil. A work of reformation was then begun which has not ceased to this day, though often obstructed and retarded. Then was laid the foundation on which succeeding generations have built, and no moral reform of any value or permanency can take place unless it be founded on Christian principles.

Another prophecy of Isaiah is referred to by the evangelist Matthew as having been fulfilled by the miracles of Christ. He says, "When the even was come they brought unto him many that were possessed with devils, and he cast out the spirits with his word, and healed all that were sick; that it might be fulfilled which was spoken by Esaias the prophet, saying, Himself took our infirmities and bare our sicknesses" (Matt. viii, 16). As in the outward relation he took away the infirmities of the people and healed their sicknesses, so in the inward and spiritual relation he heals the maladies of the soul, and raises it from death in sin to a life of righteousness.

The great object of the Messiah's advent is thus declared by himself: "To this end was I born, and for this cause came I into the world, that I should bear witness unto the truth. Every one that is of the truth heareth my voice" (John xviii, 37). He could not bear witness to the truth among that corrupt and perverse people without suffering for it. He foresaw that they would put him to death, and he went forward calmly doing his Father's will, leading a life of self-sacrifice, wounded for the transgressions of the people, baptized spiritually in suffering for them, and finally enduring on the cross the agonies of a lingering death, thus sealing his testimony with his blood. His obedience in drinking the cup of suffering was acceptable to God, for "he hath loved us and hath given himself for us, an offering and a sacrifice to God, for a sweet-smelling savor" (Eph. v, 2).

It was to reconcile man to God by removing the enmity from (man's) his heart that Jesus Christ lived, and taught, and suffered, and for this purpose the Spirit of Christ is still manifested as a Redeemer from the bondage of corruption. Hence the apostle says, "God was in Christ reconciling the world unto himself, not imputing their trespasses unto them, and hath committed unto us the word of reconciliation." . . . "We pray you, in Christ's stead, be ye reconciled to God" (2 Cor. v, 19, 20). It is in man that the change must be wrought and the reconciliation effected, for there can be no change in Deity.

"If, when we were enemies," says Paul, "we were reconciled to God by the death of his Son, much more, being reconciled, we shall be saved by his life" (Rom. v, 10); for "in him was life, and the life was the light

of men" (John i, 4). It is the life of God, or spirit of truth revealed in the soul, which purifies and saves from sin. This life is sometimes spoken of as the blood; for, according to the Mosaic law, "the blood is the life." And when Jesus told the people, "Except ye eat the flesh of the Son of man, and drink his blood, ye have no life in you," he alluded to the life and power of God which dwelt in him, and spake through him. In explanation of this, he said to his disciples, "It is the Spirit that quickeneth; the flesh profiteth nothing; the words that I speak unto you, they are spirit and they are life."

It is obvious that the sinner cannot come into a state of concord with God until the sinful nature is removed, and that nothing can remove it but the baptism of the Holy Spirit. The dealings of the Most High with the children of men are beautifully exemplified in the parable of the prodigal son, who had wandered far from his father's house, and spent his substance in riotous living. When he came to himself, and determined to go back, confessing his sins, and offering to become as one of the hired servants, his father did not stand off and order him to be punished, neither did he lay his punishment upon the other son who had been faithful; but his compassion was awakened by his penitence and the sufferings he had brought upon himself, and "while he was yet a great way off he ran and fell on his neck, and kissed him." The conduct of the parent, as represented in this parable, answers exactly to the divine character, and corresponds entirely with the character of Jesus Christ, who was filled with the divine perfections. But the doctrine that God cannot, or will not forgive sins without a compensation or satisfaction, and that man, not being able to make this satisfaction, it was made by Jesus Christ, who was appointed or given up to be killed for this purpose, is so inconsistent with the divine character, that it cannot be reconciled with the teachings of the Son of God. It appears to deprive the Deity of that infinite love which is his most endearing attribute; and if a human parent were to act upon the same principle towards his children, we could not justify his conduct.

When the *sinful nature* in man is slain by the power of God being raised into dominion *in us*, then is divine justice satisfied, for there is nothing vindictive in the character of the Deity. He does not afflict his creatures for any other purpose than their own reformation or purification, and, when that purpose is accomplished, he is ready to pardon his repenting children. The only sure ground of acceptance is the new birth; for, when Christ's kingdom is established within us, then his righteousness becomes ours; not by imputation, but by our becoming really "partakers of the divine nature" (2 Pet. i, 4). "Not by works of righteousness which we have done, but according to his mercy he saved us, by the washing of regeneration and renewing of the Holy Ghost, which he shed on us abundantly, through Jesus Christ our Saviour" (Titus iii, 5).

*Baptism and the Lord's Supper.*—Friends believe that the "washing of regeneration and renewing of the Holy Ghost" is the only baptism essential to salvation. "There is one Lord, one faith, one baptism, one God and Father of all, who is above all, through all, and in you all" (Eph. iv, 5, 6). The baptism of Christ is inward and spiritual, as may be shown by the following texts: Matt. iii, 11, 12; Acts i, 5; xviii, 25, 26; 1 Cor. xii, 13; vi, 11; Col. ii, 20, 23; 1 Pet. iii, 21.

We have no grounds to believe that "the passover" which Jesus ate with his disciples was intended to be perpetuated in the Christian Church; nor does it appear that he instituted a new ceremony on that occasion. He conformed to the Mosaic law, which was not abrogated until his crucifixion, when he blotted out the handwriting of ordinances, and "took it out of the way, nailing it to his cross" (Col. ii, 14). "Behold, I stand at the door and knock," says Christ; "if any

man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me" (Rev. iii, 20). This is the Lord's Supper, in which the new wine of the kingdom and the bread of life are distributed to sustain the soul.

III. *Worship, Discipline, etc.*—The author of Christianity has prescribed no set form of worship, enjoining only that it must be in spirit and in truth. Friends have adopted silence as the basis of public worship, believing that it is free from the objections that exist against all prescribed forms; that it gives to each worshipper an opportunity for self-examination and secret prayer, with the benefit that results from the sympathy of other minds present; and that it affords the best preparation for the exercise of spiritual gifts in preaching, prayer, or praise.

The Christian ministry can be rightly exercised by those only who have received a call and qualification from the Head of the Church, and the prophecy of Joel, quoted by Peter, is fulfilled under the Gospel: "It shall come to pass in the last days, saith God, I will pour out of my Spirit upon all flesh, and your sons and your daughters shall prophesy." As it was in the primitive Church, so it is now in the Society of Friends, women as well as men are permitted to preach the Gospel. No salary or pecuniary compensation is allowed to ministers, but those who travel in the service of the Gospel may partake of the needful hospitality or assistance of their friends.

*Testimonies.*—The testimonies of Friends against war, slavery, oaths, lotteries, and the use, as a beverage, of intoxicating drinks, as also against vain fashions, corrupting amusements, and flattering titles, are founded on Christian principles, and have been found salutary in practice.

*Discipline.*—The system of Church government existing in this society is in accordance with the doctrine, "One is your Master, even Christ, and all ye are brethren." There is no distinction like that of clergy and laity, but all the members of *both sexes* have a right to participate in the deliberations and decisions of the body. In meetings for discipline the men and women meet in separate apartments, and are co-ordinate branches of the body, each transacting the business pertaining to its own sex; but, in some cases, when desired, they act in concert, by the appointment of joint committees of men and women. The co-operation of women in the administration of discipline has been found salutary in many respects, but especially in promoting among them self-reliance and dignity of character.

IV. *Statistics.*—We have six Yearly Meetings, connected by epistolary correspondence, but independent of each other in regard to discipline. The aggregate membership of these is about 35,000.

Large numbers of persons not members, but who affiliate with us in religious profession, regularly attend our meetings for divine worship.

We have, in the cities of New York, Philadelphia, Baltimore, and Richmond, Indiana, extensive and well-sustained schools, adapted to a high standard of useful and practical education. There are also numerous schools of varied character throughout the Yearly Meetings.

Swarthmore College, situated about eight miles south-west from Philadelphia, on the line of the Westchester Railroad, is designed for three hundred pupils of both sexes. Here our children, and those intrusted to our charge, may receive the advantages of a thorough collegiate education, under the guarded care of members of our religious society. (S. M. J.)

FRIENDS, PROGRESSIVE. A religious society organized in 1853, in Chester County, Pa., as a result, in part, of a division in Kennett Monthly Meeting of Friends ("Hicksite"). The division was caused by differences of opinion upon questions of reform and

progress; the official members of the Society of Friends generally discouraging activity in temperance, anti-slavery, and other similar organizations, while a large proportion—in many localities a majority—of the laity were warmly in favor of co-operating with them. After years of contention, the two parties in Kennett Monthly Meeting fell asunder, and finally, in 1853, an association was organized under the name of "Pennsylvania Yearly Meeting of Progressive Friends." The new society opened its doors to all who recognised the equal brotherhood of the human family, without regard to sex, color, or condition, and who acknowledged the duty of defining and illustrating their faith in God, not by assent to a creed, but by lives of personal purity, and works of beneficence and charity. It disavowed any intention or expectation of binding its members together by agreement as to theological opinions, and declared that it would seek its bond of union in "identity of object, oneness of spirit in respect to the practical duties of life, the communion of soul with soul in a common love of the beautiful and true, and a common aspiration after moral excellence." It disclaimed all disciplinary authority, whether over individual members or local associations; it set forth no forms or ceremonies, and made no provision for the ministry as an order distinguished from the laity; it set its face against every form of ecclesiasticism, and denounced as the acme of superstitious imposture the claim of churches to hold an organic relation to God and to speak by his authority, maintaining that such bodies are purely human, the repositories of no power save that rightly conferred upon them by the individuals of whom they are composed. Besides the Yearly Meeting, which includes persons living in places widely distant from each other, there is a local association, which meets for worship at Longwood, near Hamorton, on every First day, and, during a large portion of every year, maintains a First-day School for children. This local body has never employed a religious teacher, though there is nothing in the principles of the organization to forbid such a step whenever its members may think it necessary or expedient. Uniformity of practice in this respect is neither expected nor desired, it being held that the arrangements for meetings should be in every case adapted to the peculiar needs and tastes of the communities in which they are held. The division in the Society of Friends was not confined to Kennett Monthly Meeting, but extended to every Yearly Meeting in the body. As early as 1849, that division led to the organization, at Green Plain, Ohio, of a society exactly similar to that of the Progressive Friends, but under a different name. This society is now extinct. At Junius, near Waterloo, N. Y., in the same year, a society of "Congregational Friends" was formed. This society afterwards took the name of "Progressive Friends," and, at a later day, that of "Friends of Human Progress," by which it is still known. In Salem, Columbiana County, Ohio, in 1852, a society called "Progressive Friends" was organized, which had but a brief existence. In North Collins, Erie County, N. Y., there is a society bearing the name of "Friends of Human Progress," which, in its principles, is very similar to the "Progressive Friends." (O. J.)

**Friends of God.** In the 14th century a spirit of mysticism pervaded nearly all Western Germany, from the Low Countries to the very borders of Italy. It brought under its influence all ranks and classes, and led ultimately to the formation of an extensive but unorganized brotherhood, the so-called Friends of God. Among their chief seats were the cities of Strasburg, Cologne, Basel, Constance, Nuremberg, and Nordlingen. Their distinguishing doctrines were self-renunciation, the complete giving up of self to the will of God, the continuous activity of the Spirit of God in all believers, the possibility of intimate union between God and man, the worthlessness of all religion based

upon fear or the hope of reward, and the essential equality of the laity and clergy, though, for the sake of order and discipline, the organization of the Church was held to be necessary. They often appealed to the declaration of Christ (John xv, 15), "Henceforth I call you not servants, for the servant knoweth not what his lord doeth; but I have called you friends; for all things that I have heard of my Father I have made known unto you;" and from this probably arose their name, which was not intended to designate an exclusive party or sect, but simply to denote a certain stage of spiritual life, the stage of disinterested love to God. From this association went forth monks and ecclesiastics who cherished a lively interest in the spiritual guidance of the laity, preached in the German language (the vernacular of the people), and labored not only to educate the people to perform their duties as required by the Church laws, and to all manner of good works, but also "to lead them forward to a deeper experience of Christianity, to a truly divine life according to their own understanding of it." From their number also went forth "those priests who, scorning to be troubled by the common scruples during the time of the papal interdict, and amid the ravages of the Black Death, bestowed the consolations of religion on the forsaken people" (Neander, *Church History*, vol. v). Many of their leaders were in close connection with convents, especially those of Eugenthal and Maria Medingen, near Nuremberg; and it is said that Agnes, the widow of king Andrew of Hungary, and various knights and burghers, were in close connection with this association. But foremost among their leaders was the Dominican monk Tauler (q. v.), of Strasburg, who spent his life in preaching and teaching with wonderful success in the country extending from his native city to Cologne, and whose influence is to this day active among his countrymen by means of his admirable sermons, which are still widely read. Much of his religious fervor and light he himself attributed to the instruction of his friend, Nicholas of Basel (q. v.), a layman, whom Schmidt, in his work below cited, mentions as the greatest of the leaders of the Friends of God. He has often been called a Waldensian, but Schmidt denies this, and says that the only sympathy which any of the Friends of God had with the Waldensians was anti-sacerdotalism. On the strength of documents which Schmidt has lately discovered, the Friends of God are said to have been "mystics to the height of mysticism: each believer was in direct union with God, with the Trinity, not the Holy Ghost alone." He says also, "they were faithful to the whole mediæval imaginative creed: transubstantiation, worship of the Virgin and saints, and Purgatory. Their union with the Deity was not that of pantheism, or of passionate love; it was rather through the fantasy. They had wonders, visions, special revelations, prophecies. Their peculiar heresy was the denial of all special prerogative to the clergy except the celebration of the sacraments; the layman had equal sanctity, equal communion with the Deity, saw visions, uttered prophecies. . . . Neither were they Bible Christians; they honored and loved the Bible, but sought and obtained revelation beyond it. They rejected one clause of the Lord's prayer. Temptations were marks of God's favor not to be deprecated. But, though suffering was a sign of divine love, it was not self-inflicted suffering. They disclaimed asceticism, self-maceration, self-torture. All things to the beloved were of God; all therefore indifferent" (Milman, *Latin Christianity*, viii, 399). The Friends of God are frequently charged with pantheism, but Neander undertakes to defend them against this charge, admitting, however, that those of them who knew not how to "guard against the danger of falling into the unfathomable abyss of God unrevealed, instead of holding fast to the God revealed in Christ, plunged into

the gulf of pantheistic self-deification." And that this gave rise to "the wild, fanatic, pantheistic mysticism, which was for getting beyond Christ, beyond all positive revelation, all humanization of the divine, as we see it exemplified particularly among a portion of the so-called Beghards (q. v.) . . . and the so-called Brothers and Sisters of the Free Spirit (q. v.). Among those of the Friends of God who by unwise speculation, and by an intoxication of self-forgetting love discarding all calm reflection, "were unconsciously betrayed into effusions and expressions upon which that wild, fanatical pantheism afterwards seized and fastened itself," is reckoned Master Eckhart (q. v.), from whose writings and sermons twenty-six propositions connected with a pantheistic mode of thinking, or verging upon such a mode of thinking, had been drawn, were formally condemned. But he promptly retracted all those propositions which were found to be heretical or scandalous, "and in general submitted himself to be corrected by the pope and the Church." These "pantheistic and quietistic views" were earnestly opposed by Ruysbroek (q. v.) and by Tauler. The former especially secured himself against the danger of pantheism by the prominence he gives to the will, "which he describes as the main-spring on which all development of the higher life depends." Another of the leaders of the Friends of God was the Dominican monk Heinrich Suso (q. v.), of Suabia, who, like Tauler, gave "prominence to the mediation of Christ as necessary to the attaining to true communion with God, and was thus distinguished from those pantheistic mystics who, notwithstanding mediation, were for sinking directly into the depths of the divine essence." Many of the leaders of the Friends of God were put to death by order of the Inquisition on the charge of being Beghards. Among these were Nicholas of Basel and two of his associates, Martin of Reichenau, and a Benedictine and follower of Martin. Milman (*Latin Christianity*, p. 408) says that the influence of the doctrines taught by the Friends of God, especially of Tauler and his followers, were "seen in the earnest demand for reformation by the councils; the sullen estrangement, notwithstanding the reunion to the sacerdotal yoke, during the Hussite wars; the disdainful neutrality when reformation by the councils seemed hopeless;" and that it is especially "seen in the remarkable book *German Theology*, attributed by Luther to Tauler himself, but doubtless of a later period."—Neander, *Church History*, v, 380; Herzog, *Real-Encyclopädie*, x, 159; Schmidt, *Gottesfreunde im vier Jahrhundert* (Jena, 1855); Pfeiffer, *Deutsche Mystiker des 14 und 15 Jahrh.*; Milman, *Latin Christianity*, viii, 309; Kurtz, *Church Hist.*, i, 484; Bennet, in *Methodist Quart. Rev.* Jan. 1869, p. 45 sq.; *Theologia Germanica*, edit. by Dr. Pfeiffer and transl. by Susanna Winkworth. (J. H. W.)

**Friends of Light.** See FREE CONGREGATIONS.

**Fries, Jacob Friederich**, an eminent German, philosopher, was born at Barby August 23, 1773. He was at first private tutor in Switzerland, became professor of philosophy in 1804, then successively professor of mathematics at Heidelberg in 1805, and of theoretical philosophy at Jena in 1816. In 1819 he was deposed for political reasons, but restored in 1824 as professor of natural philosophy and mathematics, and died there August 10th, 1843. The personal religious life of Fries was not a happy one. His father was a Moravian, but died when the son was only five years old. The school education to which he was subjected seems to have estranged him from Christianity when quite young. While yet a young man, he wrote: "The lectures of Garve on imagination and superstition have changed my religious sentiments. All the religious system in which I was bred has been overthrown; but this causes me no uneasiness. It was easy for me to throw the atonement overboard; I have never had any dread of God; the thought of the

Holy One has always been to me a thought of peace." In 1799, when his mother died, he wrote: "The belief in a reunion I leave to others; I am not phantast enough to hold it." Yet in 1806 he wrote to a Moravian brother: "My peace cannot compare with yours; the deserted Penates will probably punish me for a long time yet." A sketch of his life has recently appeared, by E. L. D. Henke, *J. F. Fries aus seinem handschriftlichen Nachlasse dargestellt* (Leipzig, 1867, 8vo).

The professed aim of Fries in philosophy was to give a firmer basis to Kant's system than that philosopher himself had laid down. "He found two faults with Kant: 1st. The vicious logical arrangement of his doctrine, by which he makes the value of his categories to depend on transcendental proofs, and that of his ideas on moral proofs, instead of rising, without any proof, to the immediate knowledge of reason. On this point Fries approaches the views of Jacobi. 2d. The confounding of psychological ideas with philosophy, properly so called, and not properly distinguishing the aids that psychology furnish to metaphysics from metaphysics themselves. He regarded the life and independence of Kant's practical philosophy as the most beautiful part of his system. Fries maintains that he has remedied the errors of Kant, and that he has placed the *doctrine of faith*, which is the focus of all philosophical conviction, on a solid basis. And he asserts that he has effected this by means of researches carried on in the spirit of Kant himself. Fries, as well as Kant, makes the limits of science his starting-point; hence he arrives at pure faith of reason in that which is eternal, a faith that is strengthened by presentiment (*Ahnung*). Knowledge, or science, is only concerned with sensuous phenomena; the true essence of things is the object of faith; we are led by feeling to anticipate, even amidst appearances, the value of belief, which is the offspring of the limitation itself of knowledge. Here again, in placing feeling and presentiment (*Ahnung*) above science, Fries approaches the doctrine of Jacobi. His labors in connection with philosophical anthropology, which he regards as the fundamental science of all philosophy, are of great interest. They contain particular theories on spiritual life, and particularly on the three fundamental faculties of the mind—cognition, feeling (*Gemüth*), the faculty of being interested), and the faculty of action, which is supposed to precede the two former. Afterwards follow theories on the three degrees of development—*sense, habit, understanding* (as the power of self-command and self-formation); on the degrees of thought, qualitative and quantitative abstractions of the imagination, mathematical intuition, attention, the difference between the understanding and the reason, etc. His *anthropological logic* contains also some excellent views on the subject of reasoning, method, and system. He regards practical philosophy as the theory of the value and end of human life and of the world, or the theory of human wisdom. It is there that you find the last goal of all philosophical research; it is divided into a moral theory and a religious theory (theory of the final goal of the universe). The former may be also subdivided into general ethics, or theory of the value and end of human actions, theory of virtue, and theory of the state" (Tenenmann, *Manual Hist. Philos.*, revised by Morell, § 422).

Fries "called his system 'Philosophical Anthropology,' since he made all further philosophical knowledge dependent on man's self-knowledge. He distinguished three grades of *Erkenntniß*; we know (*wissen*) the phenomena of our subjective thinking; this is the realm of philosophy. We believe (*glauben*) that there are appearances—*Erscheinungen*—out of the mind that all is not a mere subjective creation. We have a feeling, a presentiment (*ahnen*), that there is a reality, a substance behind these appearances; here Fries places all that pertains to God, the existence of the soul and

immortality. De Wette had much conversation with Fries, first at Jena, then at Heidelberg, and to him he essentially owed his transition from the dry Kantian rationalism to the method which may be most simply named the *ideal-belehing*. After listening to this system, De Wette says that he gathered up, as by magic, his previously scattered knowledge and convictions into a well-ordered and beautiful whole. The philosophy of Fries seemed to commend itself in this, that it preserved the formal, logical reflection of Kant, without sharing in the metaphysical insipidity, yea, emptiness of the contents of that philosophy" (Edwards, in *Bibliotheca Sacra*, 1850, p. 780).

His principal writings are: *Reinhold, Fichte u. Schelling* (Lpz. 1803);—*Philosophische Rechtslehre* (Jena, 1804);—*System der Philosophie* (Lpz. 1804);—*Wissen, Glauben und Ahnung* (Lpz. 1805);—*Neue Kritik der Vernunft* (Heidelberg, 1807, 3 vols.; 2d edit. 1830);—*System d. Logik* (Lpz. 1811; 3d edit. 1837);—*Populäre Vorles. über d. Sterikunde* (Lpz. 1813; 2d edit. 1833);—*Ueber d. Gefährdung d. Wohlstandes u. Charakters d. Deutschen durch d. Juden* (Lpz. 1816);—*Vom Deutschen Bunde*, etc. (Lpz. 1817);—*Handbuch der praktischen Philosophie* (Lpz. 1817-32, 2 vols.);—*Handbuch d. psychischen Anthropologie* (Jena, 1820; 2d edit. 1837-39, 2 vols.);—*Die mathematische Naturphilosophie* (Jena, 1822);—*Julius u. Eragoras* (a philosophical novel) (Jena, 1822);—*Die Lehre d. Liebe, d. Glaubens, u. d. Hoffnung* (Jena, 1823);—*System d. Metaphysik* (Jena, 1824);—*Polemische Schriften* (Halle, 1824);—*Die Gesch. der Philosophie*, etc. (Halle, 1837-40, 2 vols.). In connection with Schmid and Schröter, he published the *Oppositionsschrift f. Theologie u. Philosophie*.—Hoefler, *Nouv. Biog. Génér.* xviii, 876 sq.; Herzog, *Real-Encyclopädie*, vii, 355 sq.; Morell, *Modern Philosophy*, pt. ii, ch. vii.

**Fries, Justus Henry**, a minister of the German Reformed Church, was born in Westphalia, Germany, April 24, 1777, and came to America in 1803. He could not pay his passage, and hence became a "Redemptioner," and served a farmer in York County, Pa., three years. Being free, he studied theology with Rev. Daniel Wagner, in Frederick, Md. He was licensed in 1810, and not long afterwards ordained. For two years he served eight congregations in York County, Pa., and in 1812 he removed to Buffalo Valley, in Union County, Pa., where he continued the remainder of his life, doing a pioneer work, his labors extending over several counties. He died October 9, 1839. He was noted for his extraordinary memory, his eccentricities of character, his great love of American institutions, his fondness for politics, his active life in the ministry, and his great success in laying the foundation of numerous now flourishing German Reformed congregations in the beautiful valleys of the Susquehanna. He preached only in German. (II. H.)

**Friese, or Fries, or Frisius, MARTIN**, a Jutland theologian, was born at Riepen in 1688, and studied theology at the University of Copenhagen under Wandalin, Masius, and the ex-rabbi Steenbuch. In 1712 he was appointed instructor in philosophy, and in 1717 preacher and confessor to the household of a nobleman. In 1719 he was called to the university at Kiel as third professor of theology. Here he lectured especially upon Exegesis of the New Testament, and wrote several polemical works. After a visit to the libraries at Nuremberg and Wolfenbüttel, he was, on his return in 1725, promoted to the second professorship, and at nearly the same time was elected *Prokanzler*, which position he held up to the time of his death, August 15, 1750. His principal works are: *Dissertationes iii de erroribus pictorum contra historiam sacram* (Copen. 1703-5, 4to);—*Schediasma de carminibus τῶν ἱεραρχῶν τῶν κοίνοτον ad Matt. x, 14* (Copen. 1706, 4to);—*Dissertatio de concupiscentia exhortationis Irenæi, ad mōnem inter Evangelicos et reformatos procurandam holic factæ* (Kiel, 1722 and 1733);—*Fundamenta Theologie thicæ, selec-*

*tionibus dictis probantibus eorumque, ubi opus est, eregesi et observationibus præcipuis instructa* (Hamb. 1724);—*Demonstratio eregetica de nominalis valde notatu dignis modis quibus I. T. in Noxum adlegatur, partiterque de graeca 70 interpretum versione*, etc. (Hamb. 1730, 4to);—*Dissert. de usu et abusu Graecorum in prinitis scriptorum in illustrandis N. T. vocabulis et dicendi modis* (Kiel, 1733).—Hoefler, *Nouv. Biog. Génér.* xviii, 879. (J. W. M.)

**Friesland, Frisians.**—Friesland, in the wider sense of the word, was formerly the name of the whole north-western coast of Germany and the coast of Holland, embracing the country from the mouth of the Weser to the central mouth of the Rhine. It was divided by what is now called the Zuyder Zee into West Friesland and East Friesland. The latter was subsequently again divided into two parts, the country between the Zuyder Zee and the Ems, now forming the Dutch provinces of Friesland and Groningen, and the country between the Ems and the Weser, constituting the modern East Friesland, which was until 1744 a separate principality, was then united with Prussia, fell in 1815 to Hanover, with the whole of which it was in 1866 again annexed to Prussia. A branch of the Frisians, the North Frisians, inhabited the western coast of Schleswig and the islands of Heligoland, Föhr and Sylt.

The first Christian missionary among the Frisians was bishop Amandus, who entered the country in the train of the conquering Franks. He met with but little success, but established two convents at Ghent, Blandinum and Gandanum. In 636, Dagobert, king of the Franks, built the first Christian church of Friesland at Utrecht, at that time called Wiltenburg; and St. Eligius (q. v.), bishop of Noyon, made great efforts to gain a footing for Christianity among the people, but he had likewise but little success. About 675, Adgill I, who ruled over that part of Friesland which was not conquered by the Franks, gave permission to the English bishop Wilfrid to preach. The defeat of his successor Radbod by Pepin of Heristal extended the territory of the Franks up to the Yssel and the Fly, and thus opened a wider field to the Christian missionary. The English monk Wilbrod was consecrated by pope Sergius I archbishop of the Frisians, and took up his residence at Wiltenburg. After the death of Pepin in 714, Radbod made an attempt to shake off the yoke of the Franks, and to expel Christianity from his territory, but he was again defeated by Charles Martel in 717, and had to become a Christian himself. He died, however, a pagan in 719. Poppo, the guardian of Radbod's minor son, Adgill II, was apparently friendly to Christianity, which found now a very zealous missionary in Winfred (St. Boniface, q. v.), but when a favorable opportunity seemed to offer he risked a new war against the Franks, in which, in 734, he lost his life. Adgill II, who received the title of king, but was a vassal of the Franks, openly professed Christianity, but the resistance of the people to the new doctrine continued. Adgill II was succeeded by his two sons: first Gundobald, and, later, Radbod II, the latter of whom was a violent opponent of Christianity, and was expelled from the country by Charlemagne, who embodied the whole of Friesland with his empire. Christianity at this time was firmly established in the southern part of Friesland. The successor of Wilbrod as bishop of Utrecht, Gregory, established in his episcopal city a theological school, in which many missionaries for Friesland and North-western Germany were educated. Among his assistants, Lebuin and Willehad are mentioned. The latter was subsequently appointed by Charlemagne bishop of Bremen, and in that position he zealously worked for the conversion of the Frisians. With him labored for seven years S. Liudger (q. v.), a native of Friesland, and pupil of the school of Utrecht, when the rising of the Saxons under Wittekind was followed by a general revolt of the Frisians. The defeat of

this revolt terminated the resistance of the Frisians to the Franks and Christianity. Friesland was now regarded as a Christian country, but remnants of paganism maintained themselves until late in the Middle Ages.

At the time of the Reformation, West Friesland was a part of the Netherlands. Into East Friesland, which was ruled by a count, and a part of the German empire, the Reformation was introduced by count Edzard I, who, as early as 1519, became acquainted with the writings of Luther, and favored the Reformation, without, however, using any coercive measures against those who preferred to remain in the Church of Rome. Among those who successfully labored in behalf of the Reformation was master Jörgen von der Düre (*Magister Apertuus*), who had been educated at Zwolle by the Brethren of the Common Life. After the death of Edzard, in February, 1528, his son Enno began to despoil the churches, suppress the convents, and introduce the Reformation by force. In 1529, Bugenhagen, at the request of count Enno, sent two Lutheran preachers from Bremen to organize the new administration of the churches. But already a number of the Protestant ministers and laity had come under the influences of the Anabaptists and Reformed (Zwinglian) views. Count Enno expelled Carlstadt, and ordered all the Anabaptists out of the country; but the clergy, in 1530, could not be prevailed upon to adopt the whole of the Lutheran Church discipline which was laid before them. Several other attempts to introduce Lutheranism by force failed, and the Reformed system of Zwinglius maintained the ascendancy. In 1543, the widow of Enno, countess Anna, who, during the minority of her son, acted as regent, called a distinguished Reformed theologian, Johann a Lasco [see LASCO], to Friesland. He was appointed superintendent general, and under his administration the Reformed Church of Friesland attained a high degree of prosperity and reputation. As a refuge of many Protestant exiles from France, the Netherlands, and Great Britain, it received the name "Refuge of the oppressed and exiled Church of God."—Herzog, *Real-Encycl.* iv. 607; Onno Klopp, *Geschichte Ostfrieslands* (Hanover, 1854-56, 2 vols.). (A. J. S.)

**Frieze**, in classical architecture, the middle division of an entablature, lying between the architrave and the cornice. In the Tuscan order it is plain. In the Doric it is divided by three raised flutes, called triglyphs, into spaces called metopes, which are usually filled with sculpture. In the Ionic it is sometimes ornamented with sculpture; sometimes the metopes swell out in the middle. In the Corinthian and Composite it is ornamented in various ways, but usually either with flowers or figures. Any horizontal band that is occupied with sculpture is called a frieze by some writers.—Parker, *Glossary of Architecture*, s. v.

**Frigga**, the wife of Odin, and supreme goddess of the race of the Asir (or Ases), the celestial gods of the Scandinavian mythology, was a daughter of the giant Fjörgym, presided over marriages and in the assemblies of the goddesses, which were always held in her palace, was present of, but never revealed, the fate of men, knew the language of plants and animals, and through her great wisdom aided Odin by her counsels. Her abode was said to be "the magnificent mansion of Fensalir (the marshy halls), which denotes the deep, moist earth," and from her relation to Odin, the sun in this mythology, she may be regarded as typifying the earth, which, drawing from him the generative principles of light and warmth, gives growth and fruitfulness

to living things. She is closely related to, and frequently confounded with Freya (q. v.), and is generally represented (see pl. 12, fig. 1, *Mythology and Religious Rites in Icon. Encyclop.*) seated in a golden chariot drawn by two white cats, her tresses and veil floating in the wind, with two attendants, with veils and tresses likewise floating, flying near her.—*English Cyclopædia*, s. v.; *Icon. Encyclop.* iv. 277-8 (N. Y. 1851); Thorpe, *Northern Mythology*. (J. W. M.)

**Fringe** (פְּרִיָּה, *gedil*, twisted thread, i. e. a *tassel*, Deut. xxii, 12; a "wreath" or *festoon* for a column, 1 Kings vii, 17; צִיִּטִּיחַ, *tsitsikh*, a flower-like projection, i. e., a *tassel*, Numb. xv, 38, 39; the "fore-lock," Ezek. viii, 3), an ornament worn by the Israelites upon the edges, and especially at the corners of their robes, as an affectation of piety (comp. Matt. xxiii, 5). These terms must have denoted pedicles in the shape of bobs or flowing threads. Fringed garments, elaborately wrought, were very common among both the ancient Egyptians and Babylonians. See EMBROIDERY. Such fringes, however, as appear upon the tunics and outer

Ancient Assyrian Fringed Garments: 1. From the Egyptian Paintings; 2. From the Ninevite Monuments.

robes of figures delineated on the Assyrian and Egyptian monuments probably did not entirely correspond with those in use among the Jews, although it may be presumed that there was a general resemblance between those worn for general purposes, i. e. as *ornamental* appendages. Moreover, it may be doubted whether fringes of that description were intended by the Jewish legislator, since they were in such common use that they could form no proper mark of distinction between an Israelite and a Gentile; and, besides, they seem appropriate to state-dresses rather than to ordi-

Varieties of ancient Assyrian Tassels and Fringe.

nary attire, while it is plainly the latter which is contemplated in the prescription of Moses, and this especially with a religious reference. See PHYLACTERY.

The Mosaic law respecting these ornaments is contained in Numb. xv, 38-41; Deut. xxii, 12, where the children of Israel are enjoined to append fringes or tassels (פְּתִילִים, פְּתִילִים), consisting of several threads, to the four corners (אַרְבַּע קַנְפֵי) of their outer garment (בְּגָד, בְּגָדֵי), to put one distinguishing thread (פְּתִילֵי) not "ribbon," as the A. V.) of deep blue in each of these fringes, and constantly to look at them, in order to be put in mind thereby of God's commandments to keep them. What number of threads each of these symbolical fringes is to have besides the said blue one, of what material, or how they are to be made, the injunction does not say. Like most of the Mosaic laws, it leaves the particulars to be determined by the executive powers according to the peculiar circumstances of the time. The following account of them is chiefly from Kitto's *Cyclop.* s. v.

Guided by the fact that they are symbolical, tradition, in determining the manner in which these fringes are to be made, endeavored to act in harmony with their spiritual import, and hence fixed that each of these four fringes or tassels for the four corners of the garment should consist of eight threads of white wool, the emblem of purity and holiness (Isa. i, 18); that one of these threads is to be wound round the others, first *seven* times, and then a double knot to be made: then *eight* times, and a double knot (15=ה"ה); then *eleven* times (=ל"א), and a double knot; and finally *thirteen* times (=י"ג), and a double knot, so as to obtain, from the collective number of times which this thread is wound round, the words יהוה אחד (Jehovah is one), constituting the creed which was the distinguishing mark of the Hebrew nation, and which was inscribed on their banners, whilst the five knots represent the five books of the law. As the law, however, is said to contain 613 commandments [see SCHOOL], and as the design of these fringes is to remind the Jews of all these commandments, tradition has so arranged it that the word ציצית, which is numerically 600, with the 8 threads and 5 knots, should exactly comprise this number, and thus constitute a perfect symbol of the law.

Original Form of the Jewish fringed Mantle.

Originally, as we have seen, this fringed or tasseled garment was the outer one. It was more like a large oblong piece of cloth, with a hole in the centre through which the head was put, thus dividing it into two halves, one covering the front, and the other the back of the body, like a tunic.

But when the Hebrews began to mix with other nations, and especially when they were dispersed and became a by-word and a lissing, this ancient badge of distinction which God conferred upon them became the signal of persecution, inas-much as it indicated that the wearer of it was a Jew, on whom Christians thought they ought to avenge the blood of Christ. Hence the Israelites found it necessary to discard the fringed garment as an outer dress, and to wear it in a smaller size, and a somewhat altered form, as an under garment, in order to conceal it from their persecutors. This under fringed garment is called אַרְבַּע קַנְפֵי, the *four-cornered dress*, or simply ציצית, *fringes* or *tassels*, and is worn by every orthodox Jew to the present day.

Yet, though the Jews have been compelled to relinquish the large outer fringed garment as a permanent article of apparel, they still continue to wear it in a somewhat modified form at their morning prayers, and call it טַלִּית, *talith'*, i. e. *cover* or

Modified Form of the Jewish fringed Garment.

*wrapper*. This *talith*, or fringed wrapper, is generally made of a white woollen material: the wool must be spun by Jews for this ex-

Modern Jewish mode of wearing the Talith.

press purpose. It has three or more blue stripes running in parallel lines across the whole garment, at the right and left side. In some cases, however, the *talith* is also made of silk. Every married Jew must wear it at morning prayer; a single man can do what he likes. When putting it on, the following prayer is offered: "Blessed art thou, O Lord, King of the universe, who hast sanctified us with thy commandments, and enjoined us to array ourselves with fringes." The

Jews attach the utmost importance to the fringed garment. Thus it is related in the Talmud that "R. Joseph asked R. Joseph b. Rabba, which commandment has your father admonished you to observe more than any other? He replied, The law about the fringes. Once when my father, on descending a ladder, stepped on one of the threads and tore it off, he would not move from the place till it was repaired" (*Sabbath*, 118, b). Some of the Rabbins go so far as to say that the law respecting the fringes is as important as all the other laws put together (see Rashi on Numb. xv, 41). It was for this reason that the woman with the issue of blood (Matt. ix, 20), and the inhabitants of Gennesaret (Matt. xiv, 36), were so anxious to touch a fringe of our Saviour's garment (σπάρτιον τοῦ Ἰησοῦ). This superstitious reverence for the external symbol, with little care for the things it symbolized, led the Pharisees to enlarge their fringes, believing that the larger they made the tassels, the letter they did God service (comp. the Rabbinical sayings, "Whoso diligently keeps this law of fringes is made worthy, and shall see the face of the majesty of God"—Baal Haturim on Numb. xv; "When a man is clothed with the fringe, and goes out therewith to the door of his habitation, he is safe and God rejoiceth, and the angel [of death] departeth from thence, and the man shall be delivered from all hurt," etc.—R. Menachem on do.); and this it was that our Saviour rebuked (Matt. xxiii, 5). See Maimonides, i, 100, etc.: *Orach Chayim*, § 7; the Hebrew Prayer-book, called סִפְתָּרֵי הַתְּפִלָּה (Vien. 1859), p. 21, a, etc. See HEM.

**FRINT**, JACOB, a Roman Catholic bishop of Austria, was born in 1766 at Bömisch-Kamnitz, in Austria. He was for several years professor of theology at the University of Vienna, and caused the establishment of a higher theological institution for secular priests, of which he himself became the first director. He was appointed in 1827 bishop of St. Poelten, and died in 1831. He is the author of numerous theological works, as *Handbuch der Religionswissenschaft* (Vienna, 1806-14, 6 vols.):—*Das alte und das neue Christenthum, od. Krit. Beleuchtung der Stunden der Andacht* (Vienna, 1822-24, 4 numbers):—*Geist des Christenthums* (Vienna, 1808, 2 vols.). From 1813 to 1826 he was the editor of a journal for scientific theology, which was continued by Plötz and Seback. (A. J. S.)

**Frisbie, LEVI**, professor in Harvard College, was born at Ipswich, Mass., in 1784. He entered Harvard College in 1798, and during most of the time till his graduation in 1792, he supported himself by labor as a clerk or in teaching. He commenced the study of law, but was compelled to desist by an affection of the eyes, which hindered his progress through life. In 1805 he was made Latin tutor at Harvard, and in 1811 professor of Latin, which post he held until 1817, when he was transferred to the chair of moral philosophy, for which he had peculiar qualifications. His lectures on ethics, government, etc., were considered very able; they were chiefly delivered extempore; but some of them have been published (see below). He died July 9, 1822. He was a contributor to the *North American Review*, and to other periodicals; and a "Collection of the Writings of Professor Frisbie," edited by Andrews Norton, appeared in 1823, containing portions of his *Lectures*, as well as of his periodical contributions.—Ware, *Unitari in Biography*, ii, 231 sq.; Allibone, *Dictionary of Authors*, s. v.

**Frischmuth, JOHANN**, a German theologian and Orientalist, was born at Wertheim in 1619, and died at Jena in 1687, in which city he was professor of Hebrew. He was also acquainted with Arabic. Besides other works, he wrote 60 dissertations on philological, Biblical, and theological subjects, of which the most important are, *De Pontificum Hebraeorum vestitu sacro:—De Sacrificiis:—De Pontificatu Mosis contra Nihilismum:—De Græca LXX Interpret. versione:—De Meditatione Mortis et Memoria clarissimorum quorundam in re sacra et literaria Virorum.*—Hofer, *Nouv. Biog. Générale*, xviii, 889. (J. W. M.)

**Frisians.** See FRIESLAND.

**Frith or Fryth, JOHN**, an English reformer and martyr, was born at Seven Oaks, in Kent, where his father kept an inn, and was educated at King's College, Cambridge, where he so greatly distinguished himself that, when Wolsey formed his new college at Oxford, he was appointed one of its first members. About 1525 he became acquainted with Tyndale, and by him was won over to the principles of the Reformation. With others, he found it necessary to retire to the Continent in 1528. On his return to England in 1530 he was put into the stocks at Reading as a vagabond, but was taken out of them by the school-master of the town, to whom he made his case known in so elegant Latin as to prove himself a scholar. From Reading he went to London, and there engaged in controversy with Sir Thomas More, publishing a tract on Purgatory against Sir Thomas. His zeal led to his apprehension. While in the Tower he was examined, by the king's command, before archbishop Cranmer; Brandon, duke of Suffolk; Boleyn, earl of Wiltshire; Stokesley, bishop of London; Gardner, bishop of Winchester, and the chancellor Audley. The prisoner maintained that the dogma of transubstantiation was not *de file*; at the same time, he did not condemn those who held the doctrine of a corporeal presence; he only reprobated the prevalent notions respecting propitiatory masses and the worshipping of the sacramental elements. He denied also the doctrine of purgatory. At length he was brought before an episcopal commission at St. Paul's, where many efforts were made to induce him to recant, but in vain. At last the bishop of London pronounced sentence upon him as an obstinate heretic, and he was delivered to the secular power. A writ was issued for his execution, and he was burnt at Smithfield on the 4th of July, 1533, "maintaining his fortitude to the last, and charitably extending his forgiveness to a bigoted popish priest, who endeavored to persuade the people that they ought no more to pray for him than for a dog." Frith was an excellent scholar. He wrote *Treatise of Purgatory:—Antithesis between Christ and the Pope:—Mirror, or Glass to know thyself, written in the Tower, 1532:—Articles* (for which he died) writ-

ten in *Newgate Prison*, June 23, 1533:—*Answer to Sir Thomas More's Dialogues concerning Heresies:—Answer to John Fisher, bishop of Rochester*, etc., all of which treatises were reprinted at London (1573, fol.), with the works of Tyndale and Barnes. They may be found also in Russell, *Works of the Reformers*, vol. iii (Lond. 1828, 3 vols. 8vo). See Hook, *Eccl. Biog.*, v, 235; Burnet, *Hist. of the English Reformation*, i, 263-277.

**Frithstool or Freedstool**, literally the seat of peace; a seat or chair, usually made of stone, placed near the altar in some churches, and intended as the last and most sacred resort for those that claimed the privilege of the sanctuary. The violation of the *Freedstool* was attended by the most severe punishment. "According to Spelman, that at Beverley had this inscription: 'Hæc sedes lapidea freedstol' dicitur i. e. pacis cathedra, ad quam reus fugiendo pervenies omnimodam habet securitatem.'" Frithstools still exist in the church at Hexham and Beverley Minster, both in the north aisle of the chancel: the former of these has the seat hollowed out in a semicircular form, and is slightly ornamented with patterns of

Deverley Minster (Parker). Norman character; that at Beverley is very rude and plain."—Parker, *Glossary of Architecture*, s. v.

**Fritigild**, a queen of the Marcomans in the 4th century. She was converted to Christianity, and applied to Ambrose for further religious instruction. He sent her a catechism composed expressly for the purpose. Through her influence the Marcomans were converted as a people, and remained at peace with Rome during the incessant wars of the time.

**Fritz, SAMUEL**, a German Jesuit and missionary, was born in 1650, and died in 1730. He was sent as missionary to South America, and established mission settlements between the Napo and Rio Negro, into which nearly 40,000 natives were gathered. The Portuguese from Brazil attacked and broke up these settlements, carrying many of the Indians to Para. Fritz, after vainly striving to obtain redress, retired to the village of Xeberos in Peru, where he died. His map of the Amazon, though superseded by the fuller and exacter works of more recent explorers, procured for him for a long time a just renown as a geographer.—Hofer, *Nouv. Biog. Générale*, xviii, 895-7. (J. W. M.)

**Fritzsché**, the name of a German family distinguished for learning. **I. CHRISTIAN FRIEDRICH**, a theologian, was born at Nauendorf Aug. 17, 1776. He studied at the Orphan School of Halle, and afterwards theology at Leipzig. He became successively pastor of Steinbach in 1799, superintendent at Dobrilugk in 1809, professor of theology at Halle in 1830, and was in 1833 appointed censor for theological works. Besides a number of occasional articles, pamphlets, etc., collected in the *Fritzschorum Opuscula Academica* (Lpz. 1838), published by himself and two of his sons, he wrote *Vorlesungen u. d. Abendmahl*, etc.:—*De Anamartesia Jesu Christi* (Halle, 1835-37):—*De Revelationis Notione biblica* (Lpz. 1828).—Pierer, *Universal-Lexikon*, vi, 754.

**2. KARL FRIEDRICH AUGUST**, eldest son of Christian Fritzsché, also a distinguished theologian, was born at Steinbach December 16, 1801. After receiving his first instruction from his father he continued his studies at the University of Leipzig, where he became professor extraordinary of theology in 1825. The year following he went to Rostock as ordinary professor, and in 1841 to Giessen, where he died Dec. 6, 1846. Besides some important exegetical essays published in the *Fritzschorum Opuscula Academica*, he

wrote *De nonnullis secunde Pauli ad Corinthios Epistola Locis* (Lpz. 1824):—*Commentar z. Matthæus* (Lpz. 1826):—*Commentar z. Marcus* (Lpz. 1830):—*De Conformatione Nori Testamenti critica, quam C. Luchmannus edidit* (Giessen, 1841):—*Pauli ad Romanos Epistola, c. comment. perpet.* (Halle, 1836-43, 3 vols. 8vo). As a commentator, his philological acuteness is perhaps extreme.—*Pierer, Universal-Lexikon*, vi, 754; *Christian Rev.* ix, 469; *Herzog, Real-Encycl.* xix, 510.

**Fritzlar** (probably from Frideo lare = *domus pacis*) is a city of Prussia, situated on the shores of the Eder, and one of the oldest seats of the Church in Central Germany. Here Boniface founded in 732 a church dedicated to St. Peter, and a small convent, with a school chiefly intended for the accommodation of clerical students. He first directed it himself, but afterwards gave up the charge to his countryman Wigbert, who thus became the first regular abbot of the institution († 747). The second abbot was Tatian; the third, Wigbert II. The school soon gained a great reputation. Sturm, abbot of Fulda, and Megingoz, bishop of Würzburg, were among its first scholars. The institution remained for centuries at the head of both clerical and secular education. Under Charlemagne, Fritzlar was in 774 burned down by the heathen Saxons, and the church alone escaped. As it stands at present, it is in the Roman style of the 12th century. Fritzlar was for a time a bishopric (in 786), but was soon joined to that of Mayence. See S. Schminke, *De antiquitat. Fritslariens. diss.* (Marburg, 1715, 4to).—*Herzog, Real-Encyclop.* iv, 612. (J. N. P.)

**Fritzlar**, HERMANN OF. See HERMANN.

**Frog** (פְּרִיָּוִט, *tsephorde'a*, a *marsh-leaper* [*Gesenius, Thes. Heb.* p. 1181]. βάρπαχος; *Exod.* viii, 2 et sq.; *Psa.* lxxviii, 45; *ev.* 80; *Rev.* xvi, 13), the animal selected by God as an instrument for humbling the pride of Pharaoh (*Exod.* viii, 2-14; *Psa.* lxxviii, 45; *ev.* 30; *Wisd.* xix, 10). Frogs came in prodigious numbers from the canals, the rivers, and the marshes; they filled the houses, and even entered the ovens and kneading-troughs; when, at the command of Moses, the frogs died, the people gathered them in heaps, and "the land stank" from the corruption of the bodies. There can be no doubt that the whole transaction was miraculous; frogs, it is true, if allowed to increase, can easily be imagined to occur in such multitudes as marked the second plague of Egypt—indeed, similar plagues are on record as having occurred in various places, as at Pœonia and Dardania, where frogs suddenly appeared in such numbers as to cause the inhabitants to leave that region (see Eustathius on *Hom. Il.* i, and other quotations cited by Bochart, *Hieroz.* iii, 575); but that the transaction was miraculous appears from the following considerations: 1. The numbers were unprecedented, and suddenly produced, and they were found in extraordinary places. 2. The time of the occurrence was in spring, when ordinarily the old frogs would be engaged in spawning, and the younger ones would be in their tadpole state, or, at any rate, not sufficiently developed to enable them to go far from the water. 3. The frogs would not naturally have died, in such prodigious numbers as is recorded, in a single day. Amongst the Egyptians the frog was considered a symbol of an imperfect man, and was supposed to be generated from the slime of the river—*ἐκ τῆς τοῦ ποταμοῦ ἰλύος* (see *Horapollon*, i, 26). A frog sitting upon a lotus (*Nelumbium*) was also regarded by the ancient Egyptians as symbolical of the return of the Nile to its bed after the inundations. Hence the Egyptian word *Ihrur*, which was used to denote the Nile descending, was also, with the slight change of the first letter into an aspirate, *Chur*, the name of a frog (*Jablonski, Panth. Egypt.* iv, § 9).

The mention of this reptile in the O. T. is confined to the passage in *Exod.* viii, 2-7, etc., in which the

plague of frogs is described, and to the two allusions to that event in *Psa.* lxxviii, 45; *ev.* 30. The term also occurs in *Wisd.* xix, 10, in reference to the same event. In the N. T. the word occurs once only in *Rev.* xvi, 13, "three unclean spirits like frogs." There is no question as to the animal meant. Although the common frog is so well known that no description is needed to satisfy the reader, it may be necessary to mention that the only species recorded as existing in Palestine is the green (*Rana esculenta*), and that Dr. Richardson alone refers the species of Egypt to the rarer speckled gray frog (*Rana punctata*). The only known species of frog which occurs at present in Egypt is the *Rana esculenta*, of which two varieties are described, differing from Spallanzani's species in some slight peculiarities (*Descript. de l'Égypte, Hist. Natur.* i, 181, fol. ed.). The *Rana esculenta*, the well-known edible frog of the Continent, has a wide geographical range, being found in many parts of Asia, Africa, and Europe. How the *R. punctata* (*Pelodytes*) came to be

*Rana Punctata.*

described as an Egyptian species it is difficult to say, but it is almost certain that this species is not found in Egypt, and it is almost as certain that none but the *R. esculenta* does occur in that country (Günther, "On the Geographical Distribution of Batrachia," *Annals N. II.* 1859). It is not at all unlikely, however, that an unusual species was selected on this extraordinary occasion, in order to deepen the impression of the visitation. A species of tree-frog (*Hyla*) occurs in Egypt, but with this genus we have nothing to do. (See Haselquist, *Trav.* p. 68, 254; Seetzen, *Reise*, iii, 245, 350, 364, 490.) But, considering the immense extent of the Nile from south to north, and the amazing abundance of these animals which it contains in the state of spawn, tadpole, and complete frog, it is likely that different species, if they do not occur in the same locality, are at least to be met with in different latitudes. Storks and other waders, together with a multitude of various enemies, somewhat restrain their increase, which nevertheless, at the spawning season, is so enormous that a bowl can scarcely be dipped into the water without immediately containing a number of tadpoles. The speckled species is found westward even to the north of France, but is not common in Europe. It is of ash color with green spots, the feet being marked with

transverse bands, and is said to change its color when alarmed. It is lively, but no strong swimmer, the webs on the hinder toes extending only half their length: hence, perhaps, it is more a terrestrial animal than the common green frog, and, like the brown species, is given to roam on land in moist weather. (See *Penny Cyclopædia*, s. v.).

Although it is very hazardous, in transactions of an absolutely miraculous nature, to attempt to point out the instruments that may have served to work out the purposes of the Almighty, we may conjecture that, in the plague of frogs, a species, the one perhaps we have just mentioned, was selected for its ability on land, and that, although the fact is not expressly mentioned, the awful visitation was rendered still more ominous by the presence of dark and rainy weather—an atmospheric condition never of long duration on the coast of Egypt, and gradually more and more rare up the course of the river. Travellers have witnessed, during a storm of rain, frogs crowding into their cabin, in the low lands of Guiana, till they were packed up in the corners of the apartment, and continually falling back in their attempts to ascend above their fellows; and the door could not be opened without others entering more rapidly than those within could be expelled (see Roberts, *Oriental Illustrations*, in loc.). Now, as the temples, palaces, and cities of Egypt stood, in general, on the edge of the ever-dry desert, and always above the level of the highest inundations, to be there visited by a continuation of immense number of frogs was assuredly a most distressing calamity; and as this phenomenon, in its ordinary occurrence within the tropics, is always accompanied by the storms of the monsoon or of the setting in of the rainy season, the dismay it must have caused may be judged of when we reflect that the plague occurred where rain seldom or never falls, where none of the houses are fitted to lead off the water, and that the animals appeared in localities where they had never before been found, and where, at all other times, the scorching sun would have destroyed them in a few minutes. Nor was the selection of the frog as an instrument of God's displeasure without portentous meaning in the minds of the idolatrous Egyptians, who considered that animal a type of Pthah, their creative power (Wilkinson, *Anc. Eg.* iv, 351 sq.), as well as an indication of man in embryo. The magicians, indeed, appeared to make frogs come up out of the waters (Exod. viii, 7), but we must not understand that to them was given also the power of producing the animals. The effect which they claimed as their own was a simple result of the continuation of the prodigy effected by Moses and Aaron; for that they had no real power is evident not only from their inability to stop the present plague, the control which even Pharaoh discovered to be solely in the hands of Moses, but also the utter failure of their enchantments in that of lice, where their artifices were incompetent to impose upon the king and his people. (See Kitto's *Daily Bible Illustra.* in loc.)—Kitto, s. v.; Smith, s. v. See PLAGUES (OF EGYPT).

**Froissard de Broissia**, CHARLES, a French Jesuit missionary, died Oct. 10, 1704, near Pekin, in China, where he was laboring in the missionary work of his order. In the bitter controversy between the Dominicans and Jesuits, (1) whether the Chinese terms *Tien* and *Chang-ti* meant the material heavens or the God of heaven, and (2) whether the ceremonial honors paid to ancestors and to Confucius are religious acts or only civil and political customs, he took an active part, and, in agreement with his colleagues, resolved these questions in the way most favorable to secure apparent success. The Jesuits, adopting the view that these terms meant the God of heaven, and that these ceremonies were simply commendable customs, not repugnant to the Catholic faith, employed *Tien* and *Chang-ti* to designate God in the Christian sense, and, following the doctrine of Escobar (q. v.), that intention gives character

to the deed, allowed their converts to continue their ceremonial practices, provided they received baptism, took the name of Christians, and recognised the supremacy of their missionary teachers. The number of nominal conversions was, as might be expected, great. The dispute, which excited ridicule of Christianity among the educated Chinese, was referred, on the one hand, to the Chinese emperor Kiang-li, who decided in favor of the Jesuits, and, on the other, to pope Clement XI, who decided in favor of the Dominicans as the orthodox view. Froissard left only some fragments of translations of important Chinese works.—Hoefler, *Nouv. Biog. Génér.* xviii, 920–21. (J. W. M.)

**Fromage**, PIERRE, a French Jesuit missionary and Orientalist, was born at Laon May 12, 1678, and died in Syria Dec. 10 or 23, 1740. He went on his mission-work first to Egypt, where he remained some years, and then to Syria, where he passed the remainder of his life, mostly at Aleppo. He became superior of his order, and, in despite of great difficulties, established at the monastery of St. John the Baptist, near Antura, a printing-press, and published, mostly in the Arabic language, a great number of translations and imitations of religious and theological works. Fromage was present and made an opening discourse at the great synod of the Maronites, held Oct. 15, 1736, near Tripoli, in Syria.—Hoefler, *Nouv. Biog. Génér.* xviii, 931–2; Rose, *New Gen. Biog. Dictionary*, vii, 456. (J. W. M.)

**Froment**. See FROMMENT.

**Fromment**, ANTOINE, one of the French and Swiss Reformers, was born near Grenoble in 1510. Of his early life little is known. A disciple of Farel, he passed with him into Switzerland, and labored especially in Neuchâtel and Vaud. When Farel was obliged to leave Geneva in 1532 [see FAREL], he sent for Fromment, who reached Geneva November 3, and found his task a fearful one. He began his work as a school-master, promising to teach "reading and writing in a month" to all comers, and to charge nothing in case of failure. Many flocked to the school, and were taught not only reading and writing, but also the principles of the Reformation. On New-Years' day, 1533, Fromment preached in the fish-market against Romanism; a crowd of Roman Catholics broke up the meeting, and Fromment was obliged to leave Geneva. He returned in 1534. A Dominican named Furbitz, preaching in the cathedral in favor of transubstantiation, challenged the Protestants to answer his arguments. Fromment, who was in the audience, at once began to speak. A tumult arose, and again Fromment was compelled to depart from the city. He went to Berne, accompanied by one of the burgesses of Geneva, and obtained the protection of the Bernese government, under which both Fromment and Farel returned to Geneva. From 1537 to 1552 Fromment was pastor of the quarter of St. Gervais. In 1552 he was deposed from the ministry on account of certain misconduct on the part of his wife, the rigid discipline of Geneva not allowing the husband of such a wife to remain a pastor. He became a notary, and in 1559 was made one of the council of Two Hundred. His own life becoming disorderly, he was banished in 1562, and was only allowed to return in 1572. He died in 1585. He wrote a history of the reform in Geneva, which has recently been edited by Gustave Revilliod, under the title *Les Actes et les Gestes merveilleux de la cité de Genève, suietz du temps de la Réformation*, etc. (Genève, 1854)—Ruchat, *Réformation en Suisse*, t. iii; Haaz, *La France Protestante*, s. v.; Polenz, *Französ. Calvinismus*, i, 314 sq.; Hoefler, *Nouv. Biog. Génér.* xviii, 936; *London Quarterly Review*, Oct. 1857, 190 sq.

**Fromond** (*Fromondus*), a theologian of Liege, was born at Hacourt in 1587. He taught philosophy and theology at Louvain, and was, in 1633, appointed dean of the chapter of St. Peter, in that city. He appears

to have possessed some scientific knowledge, besides a pretty extensive acquaintance with theology and philology. Des Cartes was one of his friends. Fromond, however, defended Ptolemy's system (of the immobility of the earth and the motion of the sun) against Philippe Lænsberg. He was an intimate friend of Jansenius, and was one of the two theologians to whom the latter confided, when dying, his renowned *Augustinus*. He died at Louvain in 1653. The best work of Fromond is a *Commentaire des Actes des Apôtres* (Paris, 1670, 2 vols. fol.). He wrote also *Anti-Aristarchus, sive de orbe Terre immobili, adversus Philippum Lænsbergium* (Antw. 1631, 4to);—*Vesta, sive Anti-Aristarchi vindex, contra Jacobum Lænsbergium et Copernicanos* (Antw. 1633, 4to);—*Brevi Anatomia Hominis* (Louvain, 1641, 4to).—Hoefer, *Nouv. Biog. Génér.* xviii, 918.

**Front or Facade.** In ancient descriptions of churches, the front of the church is spoken of as the east or altar end. In modern writings, when churches are "oriented" or located with reference to the points of the compass, the principal front or façade is the west end, the end away from the altar. (G. F. C.)

**Frontier** (פְּרִיָּת, *katsch'*, end, as often rendered, comp. Jer. li, 31; Isa. lvi, 11), the extremity or border of a country (Ezek. xxv, 9).

**Frontlet** (only in the plur. פְּרִיָּתִים, *totaphoth'*, prob. *fillets*, from an obsolete root פָּרַט, to bind about [Gesenius, *Thes. Heb.* p. 518]; Sept. ἀσκληυρά [v. r. ἀσκληυρόν, apparently pointing פְּרִיָּתִים, i. e. *immovable*; Vulg. vaguely *appendium quid, movensur, and collocat*) occurs only in three passages (Exod. xiii, 16; Deut. vi, 8; xi, 18), and each time in the form of a proverbial similitude, "as frontlets between your eyes," and also coupled with another similar expression, "as a sign (or token) upon your hand" (comp. Exod. xiii, 9, "as a memorial between your eyes"), in connection with a command to observe the Mosaic law. In Exodus the expression is used more immediately with reference to the ordinance respecting the consecration of the first-born and the Passover solemnity; but in the two passages of Deuteronomy it relates to the precepts and statutes of the old covenant generally. The meaning in charging the Israelites to "bind them for a sign upon their land, and have them as frontlets between their eyes," evidently is, that they should keep them as distinctly in view, and as carefully attended to them, as if they had them legibly written on a tablet between their eyes, and bound in open characters upon their hands; so that, wherever they looked, and whatever they did, they could not fail to have the statutes of the Lord before them. That no actual written memorial was intended to be enjoined upon the Israelites is clear from the nature of the case, since no writing to be worn either between the eyes or upon the hand could by possibility have served the purpose of legibly expressing all the statutes and ordinances of the law. It is clear, also, from the alternative phrases with which those in question are associated, such as, "That the Lord's law may be in thy mouth" (Exod. xiii, 9); "That these words shall be in thine heart"; "That ye shall lay up these my words in your heart and in your soul" (Deut. vi, 6; xi, 18), as well as from the parallel sayings of a later day (Prov. vi, 21; comp. iii, 3; iv, 21). But the Jews, some time after their return from Babylon (it is not known exactly when), gave the direction about having the precepts of the law as frontlets a literal turn, and had portions of it written out and worn as badges upon their person. These are called by the modern Jews *tephillim'*, תְּפִלִּיִּם (a word signifying *prayers*, but not found in the Bible; Buxtorf, *Lex. Talm.* col. 1743). These were strips of parchment, on which were written four passages of Scripture (Exod. xiii, 2-10, 11-17; Deut. vi, 4-9, 13-22) in an ink prepared for the purpose. They

were then rolled up in a case of black calfskin, which was attached to a stiffer piece of leather, having a thong one finger broad, and one and a half cubits long. Those worn on the forehead were written on four strips of parchment (which might not be of any hide except cow's hide—Nork, *Braunm. und Rabb.* p. 211; comp. Hesych. s. v. Σκυριακή ἐπιτομία), and put into four little cells within a square case,

Form of the Jewish "Frontlet," according to Calmet.

on which the letter פ was written; the three points of the פ being "an emblem of the heavenly Fathers, Jehovah our Lord Jehovah" (*Zohar*, fol. 54, col. 2). The square had two thongs (פְּרִיָּתִים), on which Hebrew letters were inscribed; these were passed round the head, and after making a knot in the shape of פ, passed over the breast. This was called "the *tephillah* on the head," and was worn in the centre of the forehead (Leo of Modena, *Ceremonies of the Jews*, i, 11, n. 4; Calmet, s. v. *Phylactery*; Otho, *Lex. Rabbin.* p. 656). The Karaites, on the contrary, explained Deut. vi, 8; Exod. xiii, 9, etc., as a figurative command to remember the law (Reiland, *Ant. p.* 132), as in similar passages (Prov. iii, 8; vi, 21; vii, 3; Cant. viii, 6, etc.), and appealing to the fact that in Exod. xiii, 9 the word is not פְּרִיָּתִים, but פְּרִיָּתִים "a memorial" (Gerhardus on Deut. vi, 8; Edzardus on *Lev. choth.* i, 209; Heidanus, *De Orig. Erroris*, viii, B. 6; Schöttgen, *Hor. Hebr.* i, 199; Rosenmüller, ad loc.; Heugstenberg, *Pent.* i, 458). Considering, too, the nature of the passages inscribed on the phylacteries (by no means the most important in the Pentateuch—for the fathers are mistaken in saying that the Decalogue was used in this way, Jer. l. c.; Chrysost. l. c.; Theophyl. ad Matt. xxiii, 5), and the fact that we have no trace whatever of their use before the exile (during which time the Jews probably learnt the practice of wearing them from the Babylonians), they were justified in claiming that the object of the precepts (Deut. vi, 8; Exod. xii, 9) was to impress on the minds of the people the necessity of remembering the law. But the figurative language in which this duty was urged upon the Jews was mistaken by the Talmudists for a literal command. An additional argument against the literal interpretation of the direction is the dangerous abuse to which it was immediately liable. Indeed, such an observance would defeat the supposed intention of it, by substituting an outward ceremony for an inward remembrance. Accordingly, these badges were turned into instruments of religious vanity and display, and abused for selfish purposes by those who sought, by a great profession of legal ritualism, to hide their deficiency of inward principle. They even came eventually to be employed as charms or amulets, having a divine virtue in them to preserve the wearer from sin or from dæmoniacal agency; hence such sayings as these concerning them in the Talmudical writings: "Whosoever has *tephillim* upon his head . . . is fortified against sin;" "They are a bandage for cutting off," i. e. from various kinds of danger or hostility (Spencer, iv, e. 5). Jerome (on Matt. xxiii, 5) speaks of them generally as worn by the Jews for guardianship and safety (*ob custodiam et munimentum*); "not considering that they were to be borne in the heart, not on the body."—Smith, s. v.; Fairbairn, s. v. See PHYLACTERY.

On the analogous practice alluded to in Rev. xiii, 16; xiv, 1, see FOREHEAD.

**Fronton le Duc, or Fronto Ducaeus.** See DUC, FRONTON DE.

**Froriep, Justus Friedrich,** a learned Oriental-

ist, was born at Lubeck June 1, 1745, and was educated at Leipzig, where he passed B.D. in 1767. In 1771 he was made professor of Oriental literature at Erfurt, and in 1792 superintendent at Bückeburg. He died at Wetzlar Jan. 26, 1800. Among his numerous writings are, *De utilitate lingue Arabicæ* (Lips. 1767, 4to);—*Arabische Bibliothek*, 8vo;—*Bibliothek d. theolog. Wissenschaften* (Lenigo, 1771-86, 2 vols. 8vo).—*Doering, Gelehrten Theologen Deutschlands*, s. v.

**Frossard, Benjamin Sigismond**, a Protestant theologian, was born at Nyon, Canton Vaud, Switzerland, in 1754, and died at Montauban, France, Jan. 3, 1830. He finished his education at Geneva, and was a pastor in Lyons until the siege of that city in 1793. On the establishment of departmental schools (*écoles centrales*) in France, under the decree of Oct. 25, 1795, Frossard was made professor of morals in that of Clermont-Ferrand. In 1802 he was engaged in the compilation of the organic rules for the reformed worship, and in 1809 was charged with the organization of a faculty of theology at Montauban, of which he became dean. This demerly he lost in 1815, but retained the chair of morals and eloquence. We have from him *La Cause des Esclaves nègres et des habitants de la Guinée*, etc. (Paris, 1788, 2 vols. 8vo); a French translation of Hugh Blair's *Sermons* (Lyons, 1782, 3 vols. 8vo); and of Willerforce's *Practical View*, etc., under the title *Le Christianisme des Gens du Monde, mis en opposition avec le véritable Christianisme* (Montauban, 1821, 2 vols. 8vo).—Haag, *La France Protestante*; Hoefler, *Nouv. Biogr. Générale*, xviii, 949-50. (J. W. M.)

**Frost** (prop. כֶּפֶר, *kephor'*, so called from covering the ground, "hoar-frost," Exod. xvi, 14; Job xxxviii, 29; Psa. cxlvii, 16; also כֶּרֶחַח, *ke' rach*, from its smoothness, ice, as rendered Job vi, 16; xxxviii, 29; "frost," Job xxxvii, 10; hence *cold*, "frost," Gen. xxxi, 40; Jer. xxxvi, 30; and "crystal," from its resemblance to ice, Ezek. i, 22), frozen dew. It appears in a still night, when there is no storm or tempest, and descends upon the earth as silently as if it were produced by mere breathing (Job xxxvii, 10). Throughout western Asia, very severe and frosty nights are often succeeded by days warmer than most western summers afford (Gen. xxi, 40; see Jer. xxxvi, 30). Dr. Robinson says (*Researches*, ii, 97), in Jerusalem "the ground never freezes; but Mr. Whiting had seen the pool back of his house (Hezekiah's) covered with thin ice for one or two days." Dr. Barclay states (*City of the Great King*, p. 50) that "frost at the present day is entirely unknown in the lower portion of the valley of the Jordan [the Ghor]; but slight frosts are sometimes felt on the sea-coast, and near Lebanon." See PALESTINE.

The word חֲנַמַל, *chanamal'*, found only in Psa. lxxviii, 47, where (in accordance with the Sept., Vulg., Chald., Arabic, Syr., and most interpreters) it is rendered "frost," signifies (according to Michaelis) a species of ant, as destructive to trees (?) as the hail (Aben-Ezra) in the parallel member. (See Gesenius, *Thes. Heb.* p. 499; Bochart, *Hieroz.* iii, 255, edit. Lips.) Perhaps, if an animal at all be meant, it may be a designation of the *caterpillar* (so some of the Rabbins), an insect nowhere else peculiarly distinctly referred to in the Scriptures, but peculiarly destructive to the foliage of trees. See LOCUST.

**Froude, Richard Hurrell**, M.A., was born in Devonshire in 1803, entered Eton College in 1816, and Oriel College, Oxford, 1821. In 1826 he became fellow and tutor of Oriel, where he remained till 1830. He took priests' orders in 1829, and for the last four years of his life he resided alternately in the south of Europe and in the West Indies. He was a man of fine genius, but of ill-regulated temper and will. He shared in the so-called Oxford movement under Newman and Pusey, and was himself, before he died, a

thorough but unhappy ascetic. Every day, according to his own account, he became "a less and less loyal son of the Reformation." His *Remains* (Lond. 1838, 4 vols. 8vo) contain his *Journal*, *Sermons*, *Essays on Rationalism*, on *Erastianism*, on *Becket*, *Henry II*, etc.—*Edinburgh Review*, lxxvii, 525 sq.

**Fructuosus, Sr.**, archbishop of Braga, sprung from the blood royal of the Goths, devoted his property chiefly to the founding of monasteries. He was abbot of his own monastery of Complutum; was ordained bishop of Dama, and in 656 archbishop of Braga. He died A.D. 665. He is commemorated in the Roman Catholic Church on the 16th of April. He wrote a *Rule* for his monks at Complutum, and a *Supplement*. They are published in Holstenius, *Cod. Regul.* part ii, p. 133 (Paris, 1663); also with his *Epistole*, in Migne, *Patrol. Lat.* lxxxvii, 1087 sq.; comp. Mabillon, *Ord. St. Benedict*, i, 437.—Clarke, *Succ. Sac. Lit.* ii, 408.

**Fruit** (properly פֵּרִי, *peri'*, καρπός), an extensive term, denoting produce in general, whether vegetable or animal, and also used in a figurative sense (see Gesenius's *Heb. Lex.* and Robinson's *Greek Lex.*). The Hebrews had three generic terms designating three great classes of the fruits of the land, closely corresponding to what may be expressed in English as, 1. *Corn-fruit*, or field produce; 2. *Vintage-fruit*; 3. *Orchard-fruit*. The term פֵּרִי, *ka' yit*, "summer-fruits," appears to denote those less important species of fruit which were adapted only to immediate consumption, or could not easily or conveniently be conserved for winter use (Jer. xl, 10, 12). The three terms spoken of as being so frequently associated in the Scriptures, and expressive of a most comprehensive triad of blessings, are the following:

1. דָּגָן, *dagan'*, "fruit of the field," or agricultural produce. Under this term the Hebrews classed almost every object of *field-culture* [see AGRICULTURE]. Jahn says, "The word is of general signification, and comprehends in itself different kinds of grain and pulse, such as wheat, millet, spelt, wall-barley, barley, beans, lentils, meadow-cumin, pepper-wort, flax, cotton, various species of the cucumber, and perhaps rice" (*Bib. Archaeol.* § 58). There is now no doubt among scholars that *dagan* comprehends the largest and most valuable species of vegetable produce, and therefore it will be allowed that the rendering of the word in the common version by "corn," and sometimes by "wheat," instead of "every species of corn" or field produce, tends to limit our conceptions of the divine bounty, as well as to impair the beauty of the passages where it occurs. See CORN.

2. תֵּירוֹשׁ, *tiroshe'*, "the fruit of the vine" in its natural or its solid state, comprehending grapes, moist or dried, and the fruit in general, whether in the early cluster or the mature and ripened condition (Isa. lxxv, 8, which is rendered by βότρυς, *grape*, in the Sept., refers to the young grape; while Judg. ix, 13, where "the vine said, Shall I leave my *tiroshe* [fruit], which cheereth God and man?" as evidently refers to the ripened produce which was placed on the altar as a first-fruit offering in grateful acknowledgment of the divine goodness). "Sometimes," says Jahn, "the grapes were dried in the sun, and preserved in masses, which were called מְנִיבִים, *menibim'*, אֲשִׁישִׁים, *ashishim'*, and מְצֻמְמִים, *tsimmukim'* (1 Sam. xxv, 18; 2 Sam. xvi, 1; 1 Chron. xii, 40; Hos. iii, 1)" (*Bib. Archaeol.* § 69). It is also distinctly referred to as the *yielder* of wine, and therefore was not wine itself, but the raw material from which it was expressed or prepared, as is evident from its distinctive contrast with wine in Amos vi, 15, last clause. See WINE.

3. גִּישְׁתָּר, *gishthar'*, "orchard-fruits," especially winter or keeping-fruits, as dates, figs, olives, pomegranates, citrons, nuts, etc. As we distinguish *dagan* from

חֵטְא (wheat), and *tiros* from טִירוֹס and יָרֵן, so must we *yitshar* from יִתְשָׁר (oil), which are unfortunately confounded together in the common version. *Shemen*, beyond question, is the proper word for *oil*, not *yitshar*; hence, being a specific thing, we find it in connection with a great variety of specific purposes, as sacrificial and holy uses, edibles, traffic, vessels, and used in illustration of taste, smoothness, plumpness, insinuation, condition, fertility, and luxury. *Yitshar*, as to the mode of its use, presents a complete contrast to *shemen*. It is not, even in a single passage, employed either by way of comparison or in illustration of any particular quality common to it with other specific articles. In one passage only is it joined with יָזֵית, *zayith*, "olive," the oil of which it has erroneously been supposed to signify, and even here (2 Kings xviii, 32) it retains as an adjective the generic sense of the noun, "preserving-fruit." It should be read, "a land of preserving-olives (*zeyth-yitshar*) and dates (*debash*)." Cato has a similar expression, *oleum conditivum*, "preserving-olive tree" (*De Re Rust.* vi). It may be observed that the Latin terms *maum* and *pomum* had an extended meaning very analogous to the Hebrew *yitshar*. Thus Varro asks, "Is not Italy so planted with fruit-trees as to seem one entire *pomarium*?" i. e., orchard (*De Re Rust.* i, 2). See OLIVE; OIL.

Thus the triad of terms we have been considering would comprehend every vegetable substance of necessity and luxury commonly consumed by the Hebrews of which first-fruits were presented or tithes paid, and this view of their meaning will also explain why the injunctions concerning offerings and tithes were sufficiently expressed by these terms alone (Numb. xviii, 12; Deut. xiv, 23). See ORCHARD.

On the terms rendered in our version "fruitful field," "fruitful place," etc., see CARMEL.

The term "fruit" is also used of *persons* (2 Kings xix, 30; Jer. xii, 2), and of *offspring, children* (Psa. cxxi, 10; Hos. ix, 16; Exod. cxxi, 22), so in the phrases "fruit of the womb" (Gen. xxx, 2; Deut. vii, 13; Isa. xlii, 18; Luke i, 42), "fruit of the loins" (Acts ii, 30), "fruit of the body" (Psa. cxxxii, 13; Mic. vi, 7), and also for the *progeny* of beasts (Deut. xxviii, 51; Isa. xiv, 29). This word is also used metaphorically in a variety of forms, the figure being often preserved: "They shall eat the fruit of their doings," i. e., experience the consequences (Isa. iii, 10; Prov. i, 31; Jer. vi, 19; xvii, 10); "with the fruit of thy works (of God) is the earth satisfied," i. e., is watered with rain, which is the fruit of the clouds (Psa. civ, 13); "fruit of the hands," i. e., gain, profits (Prov. xxxi, 16); "fruit of a proud heart," i. e., boasting (Isa. x, 12); "fruit of the mouth," i. e., what a man says, or his words (Prov. xii, 14; xviii, 10); "fruit of the righteous," i. e., counsel and example (Prov. xi, 30); "to pay over the fruits," i. e., produce as rent (Matt. cxi, 41); "fruit of the vine," i. e., wine (Matt. xxvi, 29; Mark xiv, 25; Luke xxii, 18); "fruits meet for repentance," i. e., conduct becoming a profession of penitence (Matt. iii, 8); "fruit of the lips," i. e., what the lips utter (Heb. xiii, 15; Hos. xiv, 3); "fruits of righteousness," i. e., holy actions springing from a renewed heart (Phil. i, 11). "Fruit," in Romans xv, 28, is the contribution produced by benevolence and zeal. "Fruit unto God," and "fruit unto death," i. e., to live worthy of God or of death (Rom. vii, 4, 5). The "fruits of the Spirit" are enumerated in Gal. v, 22, 23; Eph. v, 9; James iii, 17, 18. Fruitfulness in the divine life stands opposed to an empty, barren, and unproductive profession of religion (John xv, 2-8; Col. i, 10; 2 Pet. i, 5-8; Matt. vii, 16-20). See GARDEN.

FRUIT, "the product of the earth, as trees, plants, etc. 1. 'Blessed shall be the fruit of thy ground and cattle.' The fruit of the body signifies children: 'Blessed shall be the fruit of thy body.' By fruit is

sometimes meant reward: 'They shall eat of the fruit of their own ways' (Prov. i, 31); they shall receive the reward of their bad conduct, and punishment answerable to their sins. The fruit of the lips is the sacrifice of praise or thanksgiving (Heb. xiii, 15). The fruit of the righteous—that is, the counsel, example, instruction, and reproof of the righteous—is a tree of life, is a means of much good, both temporal and eternal, and that not only to himself, but to others also (Prov. xi, 30). Solomon says, in Prov. xii, 14, 'A man shall be satisfied with good by the fruit of his mouth; that is, he shall receive abundant blessings from God as the reward of that good he has done by his pious and profitable discourses. 'Fruits meet for repentance' (Matt. iii, 8) is such a conduct as befits the profession of penitence.

"2. The fruits of the Spirit are those gracious habits which the Holy Spirit of God produces in those in whom he dwelleth and worketh, with those acts which flow from them, as naturally as the tree produces its fruit. The apostle enumerates these fruits in Galatians v, 22, 23. The same apostle, in Eph. v, 9, comprehends the fruits of the sanctifying Spirit in these three things, namely, goodness, righteousness, and truth. The fruits of righteousness are such good works and holy actions as spring from a gracious frame of heart: 'Being filled with the fruits of righteousness,' Phil. i, 11. Fruit is taken for a charitable contribution, which is the fruit or effect of faith and love: 'When I have sealed unto them this fruit,' Rom. xv, 28; when I have safely delivered this contribution. When fruit is spoken of good men, then it is to be understood of the fruits or works of holiness and righteousness; but when of evil men, then are meant the fruits of sin, immorality, and wickedness. This is our Saviour's doctrine, Matt. vii, 16-18.—Watson, *Theological Dictionary*, s. v.

FRUIT-TREE (פְּרִי עֵץ, *ets-peri'*, Gen. i, 11, etc.).

From the frequent mention of fruit in the Scriptures, we may infer that fruit-bearing trees of various sorts abounded in Palestine. Among the number are specially noticed the vine, olive, pomegranate, fig, sycamore, palm, pear, almond, quince, citron, orange, mulberry, carob, pistacia, and walnut. Other trees and plants also abounded, which yielded their produce in the form of odorous resins and oils, as the balsam, galbanum, frankincense, ladanum, balm, myrrh, spike-nard, storax gum, and tragacanth gum. See PALESTINE. The ancient Egyptians bestowed great care upon fruit-trees, which are frequently delineated upon the monuments (Wilkinson, i, 36, 55, 57, abridgment). The Mosaic law contains the following prescriptions respecting fruit-trees:

1. The fruit of newly-planted trees was not to be plucked for the first four years (Lev. xix, 23 sq.). The economical effect of this provision was observed by Philo (*Opp.* ii, 402). Michaelis remarks (*Laws of Moses*, art. 221), "Every gardener will teach us not to let fruit-trees bear in their earliest years, but to pluck off the blossoms; and for this reason, that they will thus thrive the better, and bear more abundantly afterwards. The very expression, 'to regard them as uncircumcised,' suggests the propriety of *pinching* them off." Another object of this law may have been to exclude from use crude, immature, and therefore unwholesome fruits. When fruits are in season the Orientals consume great quantities of them. Chardin says the Persians and Turks are not only fond of almonds, plums, and melons in a mature state, but they are remarkable for eating them before they are ripe. But there was also a higher moral object in the Mosaic regulation. Trees were not regarded as full-grown until the fifth year, and all products were deemed immature (*ἀτελής*) and unfit for use until consecrated to Jehovah (Josephus, *Ant.* iv, 8, 19). See FORESKIN. The Talmud gives minute rules and many puerile dis-

functions on the subject (*Orah*, i, 10). See FIRST-FRUIT.

2. In besieging fortified places fruit-trees were not to be cut down for fuel (q. v.) nor for military purposes (Deut. xx, 19; compare Josephus, *Ant.* iv, 8, 42; Philo, *Opp.* ii, 400). See SIEGE. This humane prohibition, however, was not always observed (2 Kings iii, 25). See TREE.

**Frumentius, Sr.**, called the apostle of Christianity in Ethiopia, was born in Tyre towards the beginning of the 4th century. He was brought up by his uncle Meropius, whom he accompanied (with his relative Edesius) on a voyage of scientific discovery. They landed on the coast of Abyssinia or Ethiopia to procure water, but the natives murdered all on board except the two boys, whom they found sitting under a tree and reading. Edesius became cup-bearer and Frumentius private secretary to the prince. After the death of the prince, Frumentius was appointed tutor to the young prince Ezizanus, and obtained great influence in state affairs. He succeeded in founding a church, and in 326 went to Alexandria, where Athanasius (recently made bishop of Alexandria) consecrated him bishop of Axum (Auzuma), the chief city of the Abyssinians, and an important mart of trade. His labors were rewarded by extraordinary success. He is supposed to have translated the Bible into Ethiopian. Theophilus of Arabia visited Abyssinia, and "repaid to the principal town, Auzuma (Axum). Theophilus being an Arian, and Frumentius, the friend of Athanasius, professing in all probability the doctrines of the Council of Nice, it is possible a dispute may have arisen in their announcement here of their respective doctrines, which would necessarily be attended with unfavorable effects on the nascent church; but perhaps, too, Frumentius, who had not received a theological education, did not enter so deeply into theological questions. Still the emperor Constantius considered it necessary to persecute the disciples of the hated Athanasius even in these remote regions. After Athanasius had been banished from Alexandria, in the year 356, Constantius required the princes of the Abyssinian people to send Frumentius to Alexandria, in order that the Arian bishop Georgius, who had been set up in place of Athanasius, might inquire into his orthodoxy, and into the regularity of his ordination" (Neander, *Church Hist.* ii, 120). The princes refused, and Frumentius continued at work until his death, the date of which is uncertain (perhaps A.D. 360). He is celebrated as a saint by the Latins on October 27, by the Greeks on November 30, and by the Abyssinians on December 18.—Socrates, *Hist. Eccl.* i, 19; Theodoret, i, 22; Ludolf, *Hist. Ethiop.* iii, 7; Butler, *Lives of Saints*, Oct. 27.

**Fruytier, JACOBUS**, a Dutch divine, was born June 5, 1659, at Middelburg. He was descended from Jan Fruytier, a courtier of William, prince of Orange, and a zealous advocate of the Reformation. Jacobus was educated at Utrecht. His first settlement was at Aardenburg, where he remained seven years. In 1688 he accepted a call to Dirksland, in 1691 removed to Vlissingen (Flushing), and in 1695 to Middelburg. In 1700 he was called to Rotterdam. Here he was installed April 25, 1700, and labored zealously in the ministry till his death, May 23, 1731. He was one of the favorite preachers in that city. Fruytier was a zealous Voetian, and became deeply involved in the controversy which at that time raged in the Reformed Church between the Coccejans and Voetians. His first efforts were those of a pacificator. The violent attack on the Coccejans made by Pierre de Joucourt, minister of the Walloon church at the Hague, was ably answered by Braunius, Van Til, and D'Outreïn. Fruytier was so much pleased with the replies of the two latter that he wrote an article expressive of his gratitude, and designed to effect a reconciliation. The

effort was premature and fruitless. D'Outreïn replied, showing that things were not yet ripe for such a result, and, moreover, that Fruytier himself was not prepared to make sufficient concessions to the opposing party. Fruytier replied, but to this rejoinder D'Outreïn made no public response. This is thought to have had an exasperating effect on Fruytier, who is said to have been a man of choleric temperament. In 1713 he issued a work that involved him in serious difficulties. Its title is, *Sion's worstelingen, of historische Zamenkomsten over de verscheidene en zeer bittere wederwaardigheden van Christus Kerke* (Zion's Struggles, or historical Conferences respecting the various and very grievous Adversities of Christ's Church). The work was specially directed against the Cartesian Coccejans, and such as were regarded as rationalistic, but it assailed also the Biblical Coccejans and Coccejus himself. Three speakers are introduced—*Truth, Piety, and Nathanael*. The Coccejans are represented as open or secret enemies to the truth. The charges brought against them by *Truth* are briefly the following: such a misinterpretation of the Scriptures as was intolerable to those who cordially loved the truth; such an undermining, on the part of others, of the principal mysteries of Christianity that there seemed to be a design to reinstate heathenism, or enthrone the blasphemies of Socinus; the vital truths of the Bible were misunderstood by some, not believed by others, and openly ridiculed by still another class in their writings, while they were excessively pleased with imaginary discoveries of truth; and, finally, all these things were palliated and defended by others. The following are the charges made by *Piety*: an attempt to introduce a heathenish morality as a substitute for spiritual religion; as a consequence of this, that worldly and natural men began to ridicule religion and to entertain atheistic views; and, finally, the power of religion was no longer visible in the lives of many who professed to love the truth, but who, under the pretext of Christian liberty, had become conformed to the world. *Nathanael* is introduced as an unsuccessful apologist for the Coccejans. The gravity of the charges and the acrimonious spirit pervading the work gave just offence, and the Classis of Schieland refused their approbation. Notwithstanding this, it was sent forth to the world with the stamp of Church authority affixed to its title-page. This rendered the Classis indignant. Cited before them, he put the blame upon the publisher. His apology was deemed insufficient, but he continued inflexible. The case was carried before the Synod of South Holland in 1717, and that body, after laboring with him and finding him intractable, voted to deprive him of his seat in the same until he should repent and submit. After persisting for seven years in his refusal, he finally, in the year 1724, confessed his fault and testified his sorrow. He was immediately restored. It is conceded that Fruytier may have been actuated by zeal for what he regarded as truth in the publication of this work; but his piety, which is admitted to have been deep and fervent, was not free from the admixture of fanaticism, nor was his devoted attachment to the truth, as he viewed it, free from bigotry. A new edition of *Sion's Worstelingen* has just (1869) been issued at Utrecht. His controversy with Lampe on the eternal generation of the Son, and the procession of the Holy Spirit from the Father and the Son, may be reserved for the article on Lampe. His ministry was long and laborious, and he seems to have been influenced by a sincere desire to be useful, and to promote vital godliness. He is still represented and honored by a respectable posterity. See Ypeij and Dermot, *Geschiedenis der Nederlandsche Hervormde Kerk*, iii Deel, blz. 181, 182, 187-191, 202-204; en Aanteekeningen (Breda, 1824); Glasius, *Godeleerd Nederland*, i Deel, blz. 475 en verv. (J. P. W.)

**Fry, ELIZABETH**, an eminent female philanthropist,

was the daughter of John Gurney, a rich banker near Norwich, and a member of the Society of Friends. She was born May 21, 1780, at Bramerton. "The benevolence of her disposition displayed itself by her habit, while yet a girl, of visiting the poor on her father's property, and forming a school for the education of their children. Under the teaching of William Savery, an American Friend, she was brought to the knowledge and love of the truth. Her character from that day was entirely changed, and she became a genuine and consistent Christian. In 1800 she was married to Joseph Fry, Esq., of London, and consequently settled in the metropolis. There she resumed her early habit of visiting the poor; and although she became the mother of a large family, who were most tenderly loved and assiduously trained, she yet found leisure, by a rigid economy of time and arrangement of domestic duties, to render her beneficent offices to her poor and suffering fellow-creatures. In 1810 she became a preacher among the Friends. Every day was she found visiting charity-schools, in the houses and lanes of the poor, and in the wards of sick hospitals, till at length, by a providential train of circumstances, she was led to extend her benevolent attentions to the inmates of a prison and a lunatic asylum (1813). The accents of Christian love found entrance into the hearts of those wretched outcasts, and she became the honored instrument of remodeling the discipline and improving the state of our national prisons. At the commencement of her career there was no classification of any sort, no separation between male and female prisoners; all criminals, parents and children, men and women, those who were comparatively innocent with the inveterately depraved, were indiscriminately huddled together, and in these circumstances many left the prison far more familiar with crime than when they entered it. It required no small resolution and faith to enter such a den of iniquity as a British jail at that period was, but Mrs. Fry attempted it and was successful. Her dignity, and at the same time her feminine gentleness, subdued their ferocity and won their attention. She told them that vice was the cause of all their misery; that if they would return to virtuous habits they might again be happy, and she proposed rules for their observance, of which they unanimously expressed their approval. Repeating her visit after a brief interval, and finding them equally tractable and submissive, she proceeded with her contemplated measures. She appointed a teacher to those children who had been committed for petty offences, and many of whom were under seven years of age. Even their profligate mothers took an interest in this infant school. Mrs. Fry next devised some employment for the women, by teaching them to sew, and supplying them with work. For the accomplishment of this arduous undertaking she formed a ladies' committee (1817), some of whom made it a sacred duty to attend in the prison daily, so that there was not a moment when the females were not under the superintendence of some proper and efficient guide. A matron was at length appointed to live in the prison, and take the oversight of the female prisoners. But the ladies' committee still continued their attendance, one giving instruction in needlework, another in knitting, while a third read some good religious book, and spoke to them about the guilt and the wages of sin, the duty and superior happiness of a sober, chaste, and religious life. In a few weeks the most astonishing moral revolution was effected within the walls of the prison; not only the language of blasphemy, obscenity, and fiendish discord entirely disappeared, but women of the most abandoned characters were reclaimed to established habits of sobriety, industry, and piety. The public interest was most excited by the intelligence. Visitors of the highest official station and noble rank visited the schools, and the most undoubted testimonies were borne to the excellent principles and effi-

cient working of these benevolent schemes. Mrs. Fry, while she continued her inspection of the prisons, extended her benevolent regards to other classes, such as making provision for female convicts both during their voyage out and at their allotted stations. She also visited all the principal jails in Scotland and Ireland, France, Holland, Denmark, and Prussia, and her last scheme of philanthropy was begun with a view to benefit British seamen, particularly to alleviate the miserable state of the coast guard; forming libraries and adopting means for circulating books and tracts in men-of-war ships. These anxious and multifarious labors made serious inroads on the health of this excellent lady. After trying the waters of Bath in the spring of 1845, she returned home no way improved, and gradually sank till she expired at Ramsgate, October 11. Her death was lamented throughout Europe as a loss to humanity. She was, as she has often been called, 'the female Howard,' and, like her prototype, her benevolent exertions were the fruit of a lively and established faith in the Gospel of Christ."—Rich, *Cyclopaedia of Biography; Memoirs of Elizabeth Fry*, by her daughters (London, 1848, 2 vols.; New York, 1850, 2 vols. 8vo); Corder, *Life of Mrs. Fry* (London, 1853); *Methodist Quart. Review*, April, 1851, art. iii; *North Brit. Rev.* ix, 136; *Princeton Review*, xx, 31.

**Frye, JOSEPH**, a Methodist Episcopal minister of the Baltimore Conference, was born in Winchester, Frederick Co., Va., in 1786, of Lutheran parents; was converted under Methodist preaching, and began to exhort while young, and entered the itinerancy in 1809. He retired from the ministry in 1836, and died in Baltimore May, 1845. Mr. Frye had remarkable powers as a preacher. Hundreds were converted through his preaching. The Rev. Alfred Griffith relates that on one occasion General Jackson (then President of the United States) heard Mr. Frye preach. "The tears ran down the President's face like a river; and, indeed, in this respect, he only showed himself like almost everybody around him. When the service was closed, he moved up towards the altar with his usual air of dignity and earnestness, and requested an introduction to the preacher. Mr. Frye stepped down to receive the hand of the illustrious chief magistrate; but the general, instead of merely giving him his hand, threw his arms around his neck, and, in no measured terms of gratitude and admiration, thanked him for his excellent discourse" (Sprague, *Annals*, vii, 472).—*Minutes of Conferences*, iv, 8.

**Frying-pan** (פָּרִיחַ, *marché' sluth*, prop. a boiler), a pot for boiling meat, etc. (Lev. ii, 7; vi, 9). See POT. Jarchi says it was a deep vessel, so that the oil could not become ignited upon the fire. The Rabbins distinguish it from the פָּרִיחַ, *machabath'*, iron "pan," flat plate, or slice (Lev. ii, 5; Ezek. iv, 3), and say that the former was concave and deep, though both were used for the same purpose. The Bedouins, and some other Arab tribes, use a shallow earthen vessel, somewhat resembling a frying-pan, and which is employed both for frying and baking one sort of bread. See BAKE. There is also used in Western Asia some modification of this pan, resembling the Eastern oven, which Jerome describes as a round vessel of copper, blackened on the outside by the surrounding fire which heats it. This baking-pan is also common enough in England and elsewhere, where the villagers bake large loaves of bread under inverted round iron pots, with embers and slow burning fuel heaped upon them. Something like a deep concave pan may be seen in the paintings of the tombs of Egypt, in their representations of the various processes of cookery [see COOK], which no doubt bears a resemblance to the one used by the Hebrews on this occasion. See PAN.

**Fryth, JONN.** See FRIITH.

**Fuel** (פָּרִיחַ, *oklah'*, and פָּרִיחַ, *maako' leth*, both

general terms for anything *consumed*, whether by eating or combustion). From the extreme scarcity of wood in many places, the Orientals are accustomed to use almost every kind of combustible matter for fuel; even the withered stalks of herbs and flowers (Matt. vi, 28, 30), thorns (Psa. lviii, 9; Eccl. vii, 6), and animal excrements are thus used (Ezek. iv, 12-15; xv, 4, 6; xxi, 32; Isa. ix, 5, 19). Prof. Hackett speaks of seeing the inhabitants of Lebanon picking up dried *grass*, roots and all, for fuel, and says that it even becomes an article of traffic (*Illust. of Script.* p. 131). The inhabitants of Baku, a port of the Caspian, are supplied with scarcely any other fuel than that obtained from the naphtha and petroleum with which the neighboring country is highly impregnated. The Arabs in Egypt draw no inconsiderable portion of their fuel, with which they cook their victuals, from the exhaustless mummy-pits so often described by travellers. Wood or charcoal is still, as it was anciently, chiefly employed in the towns of Egypt and Syria. The roots of the *rothem*, a species of the broom-plant (called in the English Bible "juniper"), which abounds in the deserts, are regarded by the Arabs as yielding the best charcoal (Job xxx, 4; Psa. cxx, 5). Although the coal of the ancients was that obtained from charring wood (but fossil coal from Liguria and Elis was occasionally used by smiths, Theophrastus, *Frag.* ii, 61, edit. Schneider), yet the inhabitants of Palestine now to some extent use anthracite coal, which crops out in some parts of Lebanon (Kitto, *Phys. Hist.* p. 67). See COAL. Wood, however, is their chief article of fuel, especially at Jerusalem, and it is largely brought from the region of Hebron (Tobler, *Denkblätter aus Jerusalem*, p. 180). See WOOD. As chimneys are but little known in the East, apartments are warmed in cold weather by means of pans, chafing-dishes, or braziers of various kinds, and either of metal or earthen-ware, which are set in the middle of the room after the fire of wood which it contains has been allowed to burn for some time in the open air, till the flame and smoke have passed away. Charcoal is also extensively employed for the same purpose (Jer. xxxvi, 22). Grates are not known even where chimneys are found, but the fuel is burnt on the hearth, or against the back of the chimney. In cottages, a fire of wood or animal dung is frequently burnt upon the floor, either in the middle of the room or against one of the side walls, with an opening above for the escape of the smoke. It is also common to have a fire in a pit sunk in the floor, and covered with a mat or carpet, so as not to be distinguished from any other portion of the floor. In all cases where wood is scarce, animal dung is used for fuel in the East. Cow-dung is considered much preferable to any other, but all animal dung is considered valuable (Ezek. iv, 15). When collected it is made into thin cakes, which are stuck against the sunny side of the houses, giving them a curious and rather unsightly appearance. When it is quite dry and falls off, it is stored away in heaps for future use. It is much used for baking, being considered preferable to any other fuel for that purpose. See FIRE.

**Fugitive** is the rendering in the A. V. of the following Heb. terms: פָּזַז, *na* (*weaving*), a *rover* (Gen. iv, 12, 14; elsewhere "wander," etc.); פָּלִיט, *palit'* (one that has *escaped*, as often rendered), a *refugee* (Judg. xii, 4); נֹפֶלֶת, *nophel'* (*falling*), as usually rendered, i. e. away to the enemy), a *deserter* (2 Kings xxv, 11); מִבְּרַח, *mibrach'* (lit. *a breaking away*, i. e. flight), *fugitives* (only in the plur. and Ezek. xvii, 21); בֶּרֶךְ אַח, *ber'ach* (from the same root as the last, prop. a *bolt*, as often rendered, hence a *prince*; but here perhaps simply a *breaker away*), a *fugitive* (Isa. xv, 5).

**Fuh-he**, sometimes spelled *Fohh*, is not unfrequently confounded with Fo, the Chinese Buddha, from whom, however, he was separated by centuries, and with whose

religious teachings those of Fuh-he had nothing in common. Fuh-he is the reputed founder of Chinese civilization, having "established social order, instituted marriage, and taught the use of writing" among that people. He is alleged to have been born in the province of Shenzy, and to have reigned B. C. 2952. It is not probable, however, that matters of this kind concerning him can be determined with any tolerable accuracy. According to Chinese tradition, the first man who was created was Pwanko, or Animated Chaos, who was "succeeded by three sovereigns, styled Heaven Emperor, Earth Emperor, and Man Emperor, or Heaven, Earth, and Man, the three powers of nature, and the triplication of the Great Extreme, or Supreme Unit." This first creation was destroyed by a deluge. When this had subsided, the first man who reappeared was Fuh-he. He issued with his wife and six children from the "sacred circle." "Fuh-he," says the Chinese text, "is the first [who appears] at each opening and spreading out" [of the universe]. Thus Fuh-he is but the reappearing of Pwanko, and, as he escaped from the deluge, he has many of the characteristics of Noah.

*His Writings.*—The Chinese were originally worshippers of the heavenly bodies. Fuh-he reduced their religious notions to a philosophical system. He was the author of the most ancient of the Chinese canonical books, called *Yih-King*, "The Book of Changes," an "expanded form of ancient and recondite speculations on the nature of the universe in general, the harmonious action of the elements, and the periodic changes of creation." It is based on some eight peculiar diagrams called *Kwa*. In the hands of the commentators this "cosmological essay" became a "standard treatise on ethical philosophy." The following summary of the *Yih-King*, or *Y King*, is given by Faber, *Origin of Pagan Idolatry*, i, 246: "The Book of Y received its name from the mystery of which it treats, the mystery being hieroglyphically represented by a figure resembling the Greek Y or Roman Y. It teaches that the heaven and the earth had a beginning, and therefore the human race; that of the heaven and earth all material things were formed, then male and female, then husband and wife. The Great Term (as they call it) is the Great Unity and the Great Y. Y has neither body nor figure, and all that has body and figure was made by that which has neither body nor figure. The Great Term, or the Great Unity, comprehends Three, and the One is Three, and the Three One. Tao is life. The first has produced the second, and the two have produced the third, and the three have produced all things. He whom the spirit perceiveth, and whom the eye cannot see, is called Y."—Morrisson, *Chinese Disc.* vol. i, pt. i, p. 92, 93; Du Halde, *Description de l'Empire de la Chine*; *Journal of Asiatic Society* (1856), xvi, 403, 404; Faber, *Origin of Pagan Idolatry*, i, 246; Hardwick, *Christ and other Masters*, ii, 17, 18; Legge, *Life and Teachings of Confucius* (Philadelphia); Gützlaff, *Chinese History*, i, 119. (J. T. G.)

**Fulbert**, bishop of Chartres, one of the most eminent and learned prelates of the 11th century. The place of his birth is unknown. He was probably born about A. D. 950, in Italy, but educated in France. About A. D. 990 he commenced a school at Chartres, where he continued his instructions for some time, and with such renown that his fame for learning spread to the most distant parts of the kingdom. Many of the best scholars of those times were Fulbert's pupils, and he contributed largely to the revival of literature. Berengar of Tours was one of his pupils, and king Robert was his patron and friend. His pupils always spoke of him with affection and veneration. He was not "satisfied with imparting to his scholars all possible knowledge, but he regarded it of the greatest moment to take care for the welfare of their souls. One of Berengar's fellow-students at that time, named Adelmann, in a letter written at a later period, of which letter we shall have occasion to speak on a future page,

reminded him of those hearty conversations which they had at eventide, while walking solitarily with their preceptor in the garden, how he spoke to them of their heavenly country, and how sometimes, unmanned by his feelings, interrupting his words with tears, he adjured them by those tears to strive with all earnestness to reach that heavenly home, and for the sake of this to beware, above all things, of that which might lead them from the way of truth handed down from the fathers" (Neander, *Church Hist.*, Torrey's transl., iii, 502, where Adelmann's letter is cited). A.D. 1007 he was ordained bishop of Chartres, and died in 1029. It is said that he was the first who introduced the celebration of the festival of the Virgin's Nativity in France: it is certain that he was a zealous upholder of her honor, since he built the church of Chartres to her praise. His writings consist of 134 *Epistole*:—*Tractatus contra Judæos*:—*Sermones*:—*Carnæna*, etc. According to bishop Cosin, his doctrine on the Eucharist was altogether conformable to that of the primitive Church; but his first epistle (the fifth in Migne) to Adeodatus teaches transubstantiation. Yet his language on the Eucharist is sufficiently indefinite to have probably led his pupil Berengar (q. v.) to his more scriptural and spiritual views of that sacrament. His works were edited by Masson (Paris, 1585), by Villiers ("in bad faith," Mosheim, Par. 1608, 8vo), and in the *Bib. Mar. Patr.* xviii, 1. They are given in most complete form in Migne, *Patrol. Latina*, t. 141, where also several biographies of Fulbert are collected. See Oudin, *Script. Eccl.* ii, 519; Ceillier, *Auteurs Sacrés* (Paris, 1865), xiii, 78; Dupin, *Eccl. Writers*, ix, 1 sq.; Mosheim, *Church Hist.* cent. xi, pt. ii, ch. ii, § 31, n. C5; Neander, *Ch. Hist.* iii, 470, 502; Clarke, *Succession of Sacred Literature*.

**Fulcherius, CARNOLENSIS** (*Foucher de Chartres*), a mediæval French priest and historian, was born at Chartres in 1059, and died in 1127 at Jerusalem, whither he had gone on the first Crusade (1096) as chaplain to Baldwin, whom he followed in all his expeditions. His *Histoire de Jerusalem*, continued to the year of his death, embraces the greater part of the events of the Crusade from the council at Clermont (1095), and is especially important as being a record of such facts only as himself or other eye-witnesses could verify. It was published by Bongars in *Recueil des Historiens de la Croisade*, and in a fuller and corrected form by Duchesne in *Historiens de France* (vol. iv), and in the *Historiens des Croisades* published by the Academy of Inscriptions and Belles-Lettres.—Hoefcr, *Nouv. Biog. Générale*, xviii, 282-3; *Histoire Littéraire de la France*, t. xi. (J. W. M.)

**Fulco** (FOULQUES, FULK) OF NEULLY, one of the most popular preachers of the Middle Ages, was born in the second half of the 12th century. "He was one of the ordinary, ignorant, worldly-minded ecclesiastics, the priest and parson of a country town not far from Paris. Afterwards he experienced a change; and as he had before neglected his flock, and injured them by his bad example, so now he sought to build them up by his teaching and example." Feeling his lack of education for the ministry, "he went on week-days to Paris, and attended the lectures of Peter Cantor, a theologian distinguished for his peculiar scriptural bent and his tendency to practical reform; and of the knowledge here acquired he availed himself by elaborating it into sermons, which he preached on Sundays to his flock. These sermons were not so much distinguished for profoundness of thought as for their adaptation to the common understanding and to the occasions of practical life. At first neighboring clergymen invited him to preach before their congregations. Next he was called to Paris, and he preached not only in churches, but also in the public places. Professors, students, people of all ranks and classes, flocked to hear him. In a coarse cowl, girt about

with a thong of leather, he itinerated as a preacher of repentance through France, and fearlessly denounced the reigning vices of learned and unlearned, high and low. His words often wrought such deep compunction that people scourged themselves, threw themselves on the ground before him, confessed their sins before all, and declared themselves ready to do anything he might direct in order to reform their lives, and to redress the wrongs which they had done. Usurers restored back the interest they had taken; those who, in times of scarcity, had stored up large quantities of grain to sell again at a greatly advanced price, threw open their granaries. In such times he frequently exclaimed, 'Give food to him who is perishing with hunger, or else thou perishest thyself.' He announced to the corn-dealers that before the coming harvest they would be forced to sell cheap their stored-up grain, and cheap it soon became in consequence of his own announcement. Multitudes of abandoned women, who lived on the wages of sin, were converted by him. For some he obtained husbands; for others he founded a nunnery. He exposed the impure morals of the clergy; and the latter, seeing the finger of every man pointed against them, were obliged to separate from their concubines. A curse that fell from his lips spread alarm like a thunderbolt. People whom he so addressed were seen to fall like epileptics, foaming at the mouth and distorted with convulsions. Such appearances promoted the faith in the supernatural power of his words. Sick persons were brought to him from all quarters, who expected to be healed by his touch—by his blessing; and wonderful stories were told of the miracles thus wrought. . . . The personal influence of this man, who stood prominent neither by his talents nor his official station, gave birth to a new life of the clergy, a greater zeal in discharging the duties of the predicatorial office and of the cure of souls, both in France and in England. Young men who, in the study of dialectic theology at the University of Paris, had forgotten the obligation to care for the salvation of souls, were touched by the discourses of this unlearned itinerant, and trained by his instrumentality into zealous preachers. He formed and left behind him a peculiar school; he sent his disciples over to England, and his example had a stimulating effect even on such as had never come into personal contact with him. 'Many,' says Jacob of Vitry, 'inflamed with the fire of love, and incited by his example, began to teach and to preach, and to lead not a few to repentance, and to snatch the souls of sinners from destruction'" (Neander, *Church Hist.*, Torrey's transl., iv, 209). When Innocent III proclaimed the fourth Crusade, A.D. 1198, Fulco devoted himself wholly to preaching in its favor, and among all the "orators who blew the sacred trumpet" he was the most successful. "Richard of England was satiated with the glory and misfortunes of his first adventure, and he presumed to deride the exhortations of Fulco, who was not abashed in the presence of kings. 'You advise me,' said Plantagenet, 'to dismiss my three daughters, pride, avarice, and incontinence. I bequeath them to the most deserving: my pride to the Knights Templars, my avarice to the monks of Cîteaux, and my incontinence to the prelates.'" But the preacher was heard and obeyed by the great vassals" (Gibbon, *Decline and Fall*, Harper's edition, vi, 60). Fulco did not live to see the results of the Crusade; he died at Neully A.D. 1201.—Villehardouin, *Hist. de la Conquête de Constantinople* (transl. by T. Smith, London, 1829, 8vo); Hoefcr, *Nouv. Biog. Génér.* xviii, 308; Milman, *Latin Christianity*, bk. ix, ch. vii; Gieseler, *Ch. Hist.*, per. iii, § 80; Huter, *Geschichte Pabst Innocent's III* (Hamburg, 1834), vol. i; Herzog, *Real-Encyklop.* xix, 516.

**Fulda**, MONASTERY of, a celebrated convent, established in 744 by Boniface, and one of his pupils named Sturm. The latter, a young man of good fam-

ily, having decided on becoming a hermit, was sent by Boniface to search out a spot in the forest of Buchonia, secure from the inroads of the Saxons. Sturm set out with two companions, and finally selected a plot of land on the banks of the Fulda, which was given them by duke Karlmann. In January, 744, Sturm and seven companions took possession, and immediately commenced improving and building. The convent was organized on the plan of Monte Cassino, after the rule of St. Benedict, and Sturm became its first abbot. In Nov. 4, 751, pope Zachariah exempted it from episcopal jurisdiction. The convent prospered rapidly, its inmates numbering 400 before Sturm's death in 779. Its prosperity still increased under Sturm's successor, Bangulf. Both Pepin the Short and Charlemagne were very liberal towards this convent, which in its turn did great good in disseminating the knowledge of agriculture as well as literature throughout the surrounding country. Its celebrated theological school was particularly prosperous under Rabanus Maurus, who afterwards became abbot of Fulda. There were twelve seniors or sub-instructors, and the scholars were instructed in grammar, rhetoric, dialectics, theology, and the German language. Nor were either fine or mechanical arts overlooked, for the convent produced both clever artists and talented artisans. Under the abbot Werner (968 to 982), Fulda became the first among the abbeys of Germany and France. Otto I named its abbots arch-chancellors of the empire. In 1331 the duke John of Ziegenhein led the citizens of Fulda to assault the convent, but the assailants were overpowered and their leaders put to death. The Reformation at first made an impression in the convent, but abbot Balthasar succeeded in 1573 in checking the progress of evangelical doctrines within its walls. In 1631 Fulda was subjected to Sweden, and an attempt was made to introduce Protestantism into the district, but, after the defeat of Nördlingen, the Roman Catholic abbots resumed their sway. In 1809, Fulda, which six years before had become a principality of the prince of Orange, was by Napoleon I annexed to the grand-duchy of Frankfurt, but Prussia finally joined it in 1815 to the electorate of Hesse-Cassel, of which it remained a part until the incorporation of that country, in 1866, with Prussia. See Brower, *Antiq. Full.* lib. iv (Antwerp, 16); Dronke, *Traditiones et Antiquitates Fuldenses* (Fulda, 1844); Niedner, *Zeitschrift f. hist. Theol.* (1846); Herzog, *Real-Encyclop.* iv, 624; McLearn, *Christian Missions in the Middle Ages*, p. 214.

**Fulda Manuscript** (*Codex Fuldensis*), one of the best copies of the early Latin version, containing the whole N. T., written by order of Victor, bishop of Capua, A.D. 546, and now in the Abbey of Fulda, in Hesse-Cassel. The Gospels are arranged in a kind of harmony. It was described by Schaunat (*Vindemiæ Literariæ Collectio*, 1723, p. 218), collated by Lachmann and Buttmann in 1839 for the Latin portion of the N. T., and has been edited by Ern. Ranke (Marb. 1867, 8vo)—Scrivener, *Introd.* p. 264; Tregelles, in *Horne's Introd.* iv, 254. See LATIN VERSIONS.

**Fulfil** (usually  $\text{N}\tilde{\text{Z}}\tilde{\text{Z}}$ , *mille*,  $\pi\lambda\eta\rho\omega\omega$ , to fill up), generally used with reference to the accomplishment of prophecy. It is used in the O. T. with respect to various kinds of prophecies, such as are imminent (e. g. the death of Jeroboam's child, 1 Kings xiv, 17), or distant (e. g. that referring to the rebuilding of Jericho, 1 Kings xvi, 34); those that are accomplished in a near as well as in a remote event [see DOUBLE SENSE], those that relate to some similar typical occurrence, class, or character [see TYPE], proverbial expressions [see PROVERB], and especially predictions relating to the Messiah. Several distinguished scholars consider that some texts in the N. T. containing references to the O. T., and introduced by the formulas, "All this was done that it might be fulfilled which was spoken of

the Lord by the prophet (Matt. i, 22; ii, 15); "For thus it is written by the prophet" (Matt. ii, 5); "Then was fulfilled that which was spoken" (Matt. ii, 17), may be mere allegations, without its being intended to declare that the literal fulfilment took place on the occasion described. Even if those passages could not be applied to certain events, otherwise than by accommodation or illustration, the phrases which introduce them will easily bend to that explanation; for it may be shown, by examples from the Rabbins and from the earliest Syriac writers, that in the East similar modes of speech have always been in use. See ACCOMMODATION. It is to be observed, however, concerning the formulas "that it might be fulfilled," "then was fulfilled," etc., when used with reference to the fulfilment of prophecy in the New Testament, the events are not to be understood as happening merely for the purpose of making good the predictions, but rather that in or by this event was fulfilled the prophecy. The ambiguity in the understanding of the first of these formulas arises from what are technically called the *telic* and the *ebatic* uses of the Greek particle *iva*. It is also to be noted that the individuals or nations actually engaged in fulfilling prophecy often had no such intention, or even any knowledge that they were doing so. See Stuart, in *Biblical Repos.* 1835, p. 86; Woods, *Lectures on Inspiration*, p. 26; Pye Smith, *Principles of Prophetic Interpretation*, p. 51, and others. Some, however (e. g. Davidson, *Sacred Hermeneutics*, p. 471 sq.), contend that the phrase *iva*  $\pi\lambda\eta\rho\omega\sigma\tilde{\text{Z}}$ , "that it might be fulfilled," and similar expressions in both the Heb. and Gr. Scriptures, always designate an intentional and definite fulfilment of an express prediction (*Meth. Quar. Rev.* April, 1867, p. 194). See PROPHECY.

**Fulgentius, St., Fabius Claudius Gordianus**, bishop of Ruspe, called "the Augustine of the 6th century," was born at Telepta (Leptis), in the province of Byzacena, North Africa, A.D. 468. His father dying in his childhood, the care of his education fell on his mother, who had him carefully instructed in the Greek language. It is said that when a boy he could repeat the whole of Homer. In early manhood he was made procurator of his native place, but, disgusted with the world, he threw up his office and devoted himself to the monastic life, against his mother's will. He first entered a monastery at Byzacena, but in the disorder of the times he was compelled to abandon it, and retired to Sicca, where he was severely treated by the Arians. Afterwards he resolved to go into Egypt, but was dissuaded by Eulalius, bishop of Syracuse, because the monks of the East had separated from the Catholic Church. He went from Sicily to Rome about A.D. 500, and then returned to Africa and founded a new monastery. The see of Ruspe becoming vacant, he was ordained bishop, much against his will, in the year 504. "Though become a bishop, he did not change either his habit or manner of living, but used the same austerities and abstinence as before. He defended his faith at once boldly and respectfully against his Arian sovereign. He speaks thus to the king in an apologetic treatise which the monarch himself had called for (*Lib. iii ad Trasimundum*): 'If I freely defend my faith, as far as God enables me, no reproach of obstinacy should be made against me, since I am neither forgetful of my own insignificance nor of the king's dignity; and I know well that I am to fear God and honor the king, according to Rom. xiii, 7; 1 Pet. ii, 17. He certainly pays you true honor who answers your questions as the true faith requires.' After praising the king in that he, the monarch of a yet uncivilized people, showed so much zeal for the knowledge of scriptural truth, he says: 'You know well that he who seeks to know the truth strives for far higher good than he who seeks to extend the limits of a temporal kingdom.' He was banished twice to Sardinia. 'There he was the spiritual guide of many other exiles, who united themselves to

him. From hence he imparted counsel, comfort, and confirmation in the faith to his forsaken Christian friends in Africa, and to those from other countries who sought his advice in spiritual things and in perplexities of the heart" (Neander, *Light in Dark Places*, N. Y. 1853, 31 sq.). After the death of Thrasimund, he and all the other expelled bishops were recalled by Hilderic, son of Thrasimund (A. D. 523). Fulgentius thenceforward enjoyed the quiet possession of his see till A. D. 533, when he died, "full of honor, and renowned for piety, learning, and every Christian virtue." He is commemorated in the Church of Rome as a saint on the 1st of January. His writings are mostly controversial, against Arianism and Pelagianism. The most important are, against Arianism: *Libri vii ad Thrasimundum*;—*De Trinitate Liber*;—*Contra Sermonem Fasiidiosi Ariani*; against Pelagianism: *Libri Tres ad Monemum*;—*De Veritate Predestinationis et gratia Dei*;—*Liber de Predestinatione et Gratia*. Fulgentius was led to write against Pelagianism by the writings of Faustus of Rhegium (q. v.), which were laid before him for his judgment. He explained "the system of Augustine with logical consistency, but in doing this he carefully avoided the harsh points of the Predestination view of the matter. He severely censured those who talked of a predestination to sin. He spoke, indeed, of a two-fold predestination (predestination duplex), but by this he understood either the election to eternal happiness of those who were good by the grace of God, or the predestination of those who were sinners by their own choice to deserved punishment" (Neander, *Ch. Hist.* ii, 650. See also Hagenbach, *History of Doctrines*, § 114). Editions of his writings: Basel, 1556, 1566, 1587; Antwerp, 1574; Cologne, 1618; Lyons, 1633, 1652, 1671; best, that of Paris, 1684, 4to; reprinted at Venice, 1742, fol., and in Migne, *Patrologia Latina*, t. lxxv. See Herzog, *Real-Encyclop.* iv, 627; Wetzer u. Welte, *Kirchen-Lex.* iv, 249; Coellier, *Auteurs Sacrés* (Paris, 1682), xi, 1 sq.; Dupin, *Eccles. Writers*, v, 13 sq.; Fleury, *Hist. Eccles.* v. b. xxx, xxxi.

**Fulgentius, Ferrandus**, a friend and pupil of Fulgentius of Ruspe, who with him partook of exile in Sardinia. On his return to Carthage he became a deacon, A. D. 523. He died A. D. 551. He was one of the first to declare against the condemnation of the Three Chapters. He also took part in the controversy at that time agitating the Church whether it was orthodox to say, "One person of the Trinity has suffered." Fulgentius defended this expression, but recommended to add "in the flesh which he assumed." Of his writings, we have a *Breviatio Canonum* (An Abridgement of the Ecclesiastical Canons), containing 232 canons of the councils of Ancyra, Laodicea, Nice, Antioch, Gangra, and Sardica, the canons of which last council, it is most probable, he took from Dionysius Exiguus. It was published by the Jesuit Chifflet at Dijon (1649, 4to). He left also a number of *Epistles*, which, with the *Canons*, may be found in *Bib. Max. Patr.* ix, 475, and in Migne, *Patrol. Latina*, vols. lxxv, lxxvii, lxxviii. A work against the Arians and other heretics was first published by A. Mai (*Coll. novæ*, t. iii).—Herzog, *Real-Encyclop.* iv, 626; Wetzer u. Welte, *Kirchen-Lex.* iv, 250; Cave, *Hist. Liter.*; Clarke, *Succession of Sac. Lit.*

**Fulke, WILLIAM, D. D.**, a famous Puritan divine, was born in London, and went in 1555 to St. John's College, Cambridge, of which he became fellow in 1564. He spent six years at Clifford's Inn, studying law, but preferred letters, and especially theology. "He took orders, but, being suspected of Puritanism, as he was the intimate friend of Cartwright, then professor of divinity, he was expelled from college. The earl of Leicester presented him in 1571 to the living of Warley, in Essex, and two years after to Kedington, in Suffolk. He afterwards took his degree of D. D. at Cambridge, and, as chaplain, accompanied the earl of Lincoln when he went as ambassador to France,

and on his return he was made master of Pembroke Hall, and Margaret professor. He died in 1589. "In force of argument and criticism he was one of the ablest divines of his time, and one of the principal opponents of the Roman Church" (Darling). His writings, which were very numerous, both in Latin and English, were directed chiefly against Popery. The most important of them are the *Ichemes Translation of the New Testament, and the authorized English Version, with the Arguments of Books, Chapters, and Annotations of the Rhemists, and Dr. Fu'ke's Confutation of all such Arguments, Glosses, and Annotations* (first edition, 1580; often reprinted; last. ed. by Hartshorne, Cambridge, 1843, 8vo; New York, 1834, 8vo);—*Defence of the sincere and true Translation of the Scriptures, against Gregory Martin* (new edit. by Parker Society, Camb. 1843, 8vo);—*Answers to Stapleton, Martiell, and Sanders* (on the controversy with Rome, reprinted by the Parker Society, Cambridge, 1848, 8vo).

**Fullenius, BERNARDUS**, was born in 1602. He pursued his collegiate course at the University of Franeker. He devoted himself specially to the study of the Hebrew and mathematics. His proficiency in both studies was great. When only twenty-seven he was appointed to fill the chair made vacant by the death of the distinguished Orientalist, Sixtinus Amama. He accepted the appointment, and in 1630 he entered upon the discharge of its duties. For seven years he filled the office with fidelity and acceptance. The professorship of mathematics was then tendered to him, and the celebrated Coceus appointed him his successor in the department of Oriental literature. He was one of the committee appointed by the Synod of Dort to revise the new translation of the New Testament. An edition of *J. Drusii Commentaria ad librum Coseleth Salomonis et Jobi* was brought out under his editorial supervision, and with prefaces prepared by him. See Glasius, *Godgeleerd Nederland*, i Deel, blz. 479; G. Brandt, *Histoire der Reformatie*, etc., iii Deel, blz. 53 (Rotterdam, 1704). (J. P. W.)

**Fuller** (פולר, *kobes'*, from פולר, to tread [comp. Gesenius, *Monum. Phœn.* p. 181]; γράσις). The art of the fuller is beyond doubt of great antiquity, and seems to have reached at an early period a comparative degree of perfection. Very scanty materials, however, exist for tracing its progress, or for ascertaining exactly, in any particular age or country (see Pliny, vii, 57), what substances were employed in the art, and what methods were resorted to for the purpose of making them effectual. At the transfiguration our Saviour's robes are said to have been white, "so as no fuller on earth could whiten them" (Mark ix, 3). Elsewhere we read of "fullers' soap" (Mal. iii, 2), and of "the fullers' field" (2 Kings xviii, 17). Of the processes followed in the art of cleaning cloth and the various kinds of stuff among the Jews we have no direct knowledge. In an early part of the operation they seem to have trod the cloths with their feet (Gesenius, *Thes.* p. 1261), as the Hebrew *Ain-Rogel*, or En-rogel, literally Foot-fountain, has been rendered, on Rabbinical authority, "Fullers' fountain," on the ground that the fullers trod the cloths there with their feet (comp. Höst, *Marokko*, p. 116). They were also rubbed with the knuckles, as in modern washing (Synes. *Ep.* 44; compare Euseb. *Hist. Eccl.* ii, 1, 2). A subsequent operation was probably that of rubbing the cloth on an inclined plane, in a mode which is figured in the Egyptian paintings (Wilkinson, ii, 106, abridgm.), and still preserved in the East. It seems from the above notices that the trade of the fullers, as causing offensive smells, and also as requiring space for drying clothes, was carried on at Jerusalem outside the city (comp. Martial, vi, 93; Plaut. *Asin.* v, 2, 57). A fullers' town (officina fullonis) is mentioned in the Talmudical writers (Midrash, *Kohel*, xci, 2) by the name of פולרית, "house of maceration." So far as it is

Ancient Egyptian Fullers, 1, 2: *a, b*, Inclined tables; *c, d*, The water running off into the trough below; *d*, A stone used for rubbing the cloth; *f*, Jars of soap.

mentioned in Scripture, fulling appears to have consisted chiefly in cleansing garments and whitening them (compare Ælian, *Var. Hist.* v, 5). The use of white garments, and also the feeling respecting their use for festal and religious purposes, may be gathered from various passages: Eccl. ix, 8; Dan. vii, 9; Isa. lxiv, 6; Zech. iii, 3, 5; 2 Sam. vi, 14; 1 Chron. xv, 27; Mark ix, 3; Rev. iv, 4; vi, 11; vii, 9; compare Mishna, *Taanith*, iv, 8; see also Statius, *Silv.* i, 2, 237; Ovid, *Fast.* i, 79; Claudian, *De Laud. Stil.* iii, 289. This branch of the trade was perhaps exercised by other persons than those who carded the wool and smoothed the cloth when woven (Mishna, *Baba Kama*, i, x, 10). In applying the marks used to distinguish cloths sent to be cleansed, fullers were desired to be careful to avoid the mixtures forbidden by the law (Lev. xix, 19; Deut. xxii, 11; Mishna, *Massek. Kilaim*, ix, 10). Colored cloth was likewise fulled (Mishna, *Shabb.* xix, 1). See Schöttgen, *Triauna et fullonia antiquitates* (2d ed. Lips. 1763).—Smith, s. v.; Kitto, s. v. See HANDICRAFT.

FULLER'S SOAP (בְּרִיתֵי מִקְבָּשִׁים, *borith' mekabbe-shim'*, *alkali's* of those treading cloth, i. e. *washers' pot-ash*; Sept. *ποια πλυνόντων*), some alkaline or saponaceous substance mixed with the water in the tubs used for stamping or beating cloth. Two substances of the nature are mentioned in Scripture: נִיָּהַר, *ne'-ther*, nitre (γίτρων, *nitrum*, Prov. xxv, 20; Jer. ii, 22), and בְּרִיתֵי, *borith'*, soap (*ποια, herba fullonia, herba borith*, Mal. iii, 2). Nitre is found in Egypt and in Syria, and vegetable alkali was also obtained from the ashes of certain plants, probably *Salsola kali* (Gesenius, *Thesaur. Heb.* p. 246; Pliny, xxxi, 10, 46; Hasselquist, p. 275; Burekhardt, *Syria*, p. 214). The juice also of some saponaceous plant, perhaps *Gypsophila struthium*, or *Saponaria officinalis*, was sometimes mixed with the water for the like purpose, and may thus be regarded as representing the soap of Scripture. Other substances also are mentioned as being employed in cleansing, which, together with alkali, seem to identify the Jewish with the Roman process (Pliny, xxxv, 57), as urine and chalk (*creta cimolia*), and bean-water, i. e. bean-meal mixed with water (Mishna, *Shabb.* ix, 5; *Niddah*, ix, 6). Urine, both of men and of animals, was regularly collected at Rome for cleansing cloths (Plin. xxxviii, 26, 48; Athen. xi, p. 484; Mart. ix, 93; Plautus, *Asin.* v, 2, 57); and it seems not improbable that its use in the fullers' trade at Jerusalem may have suggested the coarse taunt of Rabshakeh during his interview with the deputies of Hezekiah in the highway of the fullers' field (2 Kings xviii, 27); but Schöttgen thinks it doubtful whether the Jews made use of it in fulling (*Antiq. full.* § 9). The process of whitening garments was performed by rubbing into them chalk or earth of some kind (אֶשְׁמֵלֶת). *Creta cimolia* (cimolite) was probably the earth most frequently used ("cretae fulloniae," Pliny, xvii, 4; compare Theophr. *Charact.* 11). The whitest sort of earth for this purpose is a white pot-

ters' clay or marl (Hoffmann, *Hanab. d. Minerae*, II, ii, 230 sq.), with which the poor at Rome rubbed their clothes on festival days to make them appear brighter (Pliny, xxxi, 10, § 118; xxxv, 17). Sulphur, which was used at Rome for discharging positive color (Plin. xxxv, 57), was abundant in some parts of Palestine, but there is no evidence to show that it was used in the fullers' trade. The powerful cleansing properties of *borith* or soap are employed by the prophet Malachi as a figure under which to represent the prospective results of Messiah's appearance (Mal. iii, 2). See Beckmann, *Hist. of Inv.* ii, 92, 106, edit. Bohn; Saalschütz, i, 3, 14, 32; ii, 14, 6; Smith, *Dict. of Classical Antiq.* s. v. Fullo.—Smith, s. v. See SOAP.

FULLER'S FIELD (שְׂדֵה קוֹבֵס, *sedeh' kobes'*; Sept. ἀγρός τοῦ γυαθῆως, or κναθῆως; Vulg. *ager fullonis*), a spot near Jerusalem (2 Kings xviii, 17; Isa. xxxvi, 2; vii, 3) so close to the walls that a person speaking from there could be heard on them (2 Kings xviii, 17, 26). It is only incidentally mentioned in these passages, as giving its name to a "highway" (הַרְחֵק = an embanked road, Gesen. *Thes.* p. 957 b), "in" (אֵין) or "on" (עַל, A. V. "in") which highway was the "conduit of the upper pool." The "end" (קֵצֵה) of the conduit, whatever that was, appears to have been close to the road (Isa. vii, 3). In considering the nature of this spot, it should be borne in mind that *sedeh*, "field," is a term almost invariably confined to cultivated arable land, as opposed to unreclaimed ground. See TOPOGRAPHICAL TERMS. One resort of the fullers of Jerusalem would seem to have been below the city on the south-east side. See EX-ROGEL. But Rabshakeh and his "great host" can hardly have approached in that direction. They must have come from the north—the only accessible side for any body of people—as is certainly indicated by the route traced in Isa. x, 28-32 (see GIBBEAN); and the fuller's field, from this circumstance, has been located by some (Hitzig, *zu Jesa.* vii, 3; Williams, *Holy City*, ii, 472) on the table-land on the northern side of the city, near the Damascus gate. See FULLER'S MONUMENT (below). The "pool" and the "conduit" would be sufficient reasons for the presence of the fullers, and their location would therefore determine that of the "field" in question. See CONDUIT. On the other hand, Rabshakeh and his companions may have left the army and advanced along the east side of Mount Moriah to En-rogel, to a convenient place under the temple walls for speaking. There can be little doubt, however, that the "upper pool" is the cistern now called Birket el-Mamilla, at the head of the Valley of Hinnom, a short distance west of the Yafa gate (Porter, *Handbook for S. and P.* p. 99, 136). Hezekiah conveyed the waters from it by a subterranean aqueduct to the west side of the city of David (2 Chron. xxxii, 30). The natural course of this aqueduct was along the ancient road to the western gate beside the castle, and this was the road by which the Assyrian ambassadors would doubtless approach the city, coming as they did from Lachish. The position of the fuller's field is thus indicated. It lay on the side of the highway west of the city. See FULLER'S GATE (below). The fullers' occupation required an abundant supply of water, and an open space for drying the clothes. We may therefore conclude that their "field" was beside, or at least not far distant from, the upper pool.—Smith, s. v.; Kitto, s. v. See GIION.

FULLER'S GATE (*porta fullonis*), one of the mediæval gates on the western side of Jerusalem (Adamnanus, i, 1), thought by Dr. Robinson (*Researches*, i, 475) to be the *Porta Judicaria* of Brocardus (ch. viii, fin.), in the wall of those days, somewhere over against

the Church of the Holy Sepulchre, leading to Sillo (Neby Samwil) and Gibeon, and also the *Serb* of Arabian writers (Edrisi, about A.D. 1150, ed Jaubert, i, 314; "History of Jerus." in the *Fundgr. des Orients*, ii, 129). It seems to have derived its name from leading to the FULLER'S FIELD (Isa. vii, 3).

**FULLER'S MONUMENT** (*μνημα τοῦ γραφέως*), a conspicuous object mentioned by Josephus in his account of the course of the third or outer wall of Jerusalem (*War*, v, 4, 2), as situated near "the tower of the corner," where the wall bent, after passing the sepulchres of the kings, to the valley of the Kidron; evidently, therefore, at the north-east angle of the ancient city (Strong's *Harm. and Expos. of the Gospel*, Append. p. 23). It does not follow, as Dr. Barclay supposes (*City of the Great King*, p. 25), that the monument in question was situated in the FULLER'S FIELD. See JERUSALEM.

**Fuller, Andrew**, perhaps the most eminent and influential of Baptist theologians, was born in 1754, at Wicken, Cambridgeshire, England. His opportunities for education were scanty, and his subsequent attainments as a theologian resulted from the activity of a mind naturally vigorous working earnestly on no very ample materials. He was baptized in 1770, began preaching in 1774, and in 1775 became pastor of a church in Soham. His doctrinal system at this time was unsettled. The prevailing type of opinion then prevalent among the Baptists was an exorbitant Calvinism, verging to an Antinomian and fatalistic extreme. It was deemed necessary to a consistent orthodoxy for a preacher to avoid offering freely to all men the invitation of the Gospel. Dr. Gill (q. v.) was the standard of doctrinal soundness. Fuller states that Gill and Bunyan were authors to whom he was much indebted. He gradually found that they did not agree, and still more was he impressed with the practical difference between the accepted teaching and the New Testament. In 1776 he became acquainted with Messrs. Ryland and Sutcliffe, names to be afterwards honorably associated with his in the foreign missionary work. The works of the New England theologians, particularly Edwards and Bellamy, confirmed him in the views to which his mind had been tending. The change in the spirit of his preaching awakened violent opposition. His congregation, however, increased, and the effects of his doctrine confirmed his faith in it. In 1782 he removed to Kettering, which was the scene of his labors to the close of life. Here, in 1784, he gave deliberate expression to his views in the treatise, *The Gospel worthy of all Acceptation*. In the same year he concerted with his friend Sutcliffe a meeting for united prayer for the revival of religion and the conversion of the world—the origin of the "Monthly Concert." Out of these counsels grew the missionary movement under the leadership of Carey (q. v.), in which, as secretary of the Baptist Missionary Society, Mr. Fuller bore a laborious and responsible part. In 1793 appeared his celebrated treatise, *The Calvinistic and Socinian Systems compared*. Princeton College in 1795, and Yale in 1805, conferred upon him the degree of D.D., which he modestly declined. He died in 1815. His other works are, 3. *The Gospel its own Witness* (1800);—4. *Dialogues, Essays, and Letters*;—5. *Exposition of Genesis*;—6. *The Great Question answered* (1806);—7. *Strictures on Sandemanianism* (1809);—8. *Sermons on various Subjects*;—9. *Exposition of the Revelation*;—10. *Letters on Communion* (1815). His writings are marked by solid force of reasoning, plainness and simplicity of statement, and an ingenuous candor. In reference to his unaffected style, he has been called "the Franklin of theology." Without the opportunity to become a critical student of the Scriptures, he is a better Biblical theologian than many whose scholarship he could not aspire to. For his theological position, see the article CALVINISM.—*Works*,

with Life prefixed, 5 vols. London, 1831; also 1853, imp. 8vo; more complete edition, edited by Belcher, 3 vols. Philadel. (L. E. S.)

**Fuller, Thomas**, divine, historian, genius, and wit, was a son of the Rev. T. Fuller, minister of Aldwinkle, in Northamptonshire, at which place he was born in June, 1608. He was educated at Queen's College, Cambridge, and removed to Sidney College, of which he became fellow in 1631. In 1632 he was appointed minister of St. Bennet's parish, Cambridge, and acquired great popularity as a pulpit orator. He obtained, in the same year, the prebend of Salisbury, and afterwards the rectory of Broad Windsor, of both of which he was deprived during the Civil War, in consequence of his activity on the side of the monarch. Between 1640 and 1656 he published nearly the whole of his works. In 1648 he obtained the living of Waltham, in Essex, which in 1658 he quitted for that of Cranford, in Middlesex. At the Restoration he recovered the prebend of Salisbury, was made D.D. and king's chaplain, and was looking forward to a mitre, when his prospects were closed by death, August 15, 1661. Fuller possessed a remarkably tenacious memory. He had also a large share of wit and quaint humor, which he sometimes allowed to run riot in his writings. Among his chief works are, *A History of the Holy War* (Camb. 1640, 2d edit. fol.);—*The Church History of Britain* (new edit. edited by Nichols, Lond. 1837, 3 vols. 8vo);—*The History of the University of Cambridge* (new edit. Lond. 1840, 8vo);—*The History of the Worthies of England* (new ed. by Nuttall, Lond. 1840, 3 vols. 8vo);—*Pisgah Sight of Palestine, a History of the Old and New Test.* (Lond. 1662, fol.). Cole ridge says that "Fuller was incomparably the most sensible, the least prejudiced great man of an age that boasted a galaxy of great men. He is a very voluminous writer, and yet, in all his numerous volumes on so many different subjects, it is scarcely too much to say that you will hardly find a page in which some one sentence out of every three does not deserve to be quoted for itself as a motto or as a maxim." See Russell, *Memorials of the Life and Works of Fuller* (Lond. 1844, sm. 8vo); Rogers, *Fuller's Life and Writings* (Edinb. Rev. LXXIV, 328).

**Fullerton, HUGH STEWART**, a Presbyterian minister, was born near Greencastle, Penn., Feb. 6, 1805. Not long after, his parents removed to Orange Co., N. Y., and in 1815 to Fayette Co., Ohio. He studied one year at the Ohio University, and was licensed to preach in 1830. In 1832 he accepted a call to the church at Chillicothe, where he labored four years, and then resigned from ill health. In 1837 he removed to Salem, Ohio, where he remained until his death, Aug. 15, 1862.—Wilson, *Presbyterian Hist. Almanac*, 1864.

**Fulness**, a term variously used in Scripture. (1.) "The fulness of time" is the time when the Messiah appeared, which was appointed by God, promised to the fathers, foretold by the prophets, expected by the Jews themselves, and earnestly longed for by all the faithful: "When the fulness of the time was come, God sent his Son," Gal. iv, 4. (2.) The fulness of Christ is the superabundance of grace with which he was filled: "Of his fulness have all we received," John i, 16. And whereas men are said to be filled with the Holy Ghost, as John the Baptist, Luke i, 15; and Stephen, Acts vi, 5; this differs from the fulness of Christ in these three respects: (a.) Grace in others is by participation, as the moon bath her light from the sun, rivers their waters from the fountain; but in Christ all that perfection and influence which we include in that term is originally, naturally, and of himself. (b.) The Spirit is in Christ infinitely and above measure, John iii, 34; but in the saints by measure according to the gift of God, Eph. iv, 16. (c.) The saints cannot communicate their graces to others, whereas the gifts of the Spirit are in Christ as a head

and fountain, to impart them to his members. "We have received of his fulness," John i, 16. (3.) It is said that "the fulness of the Godhead dwells in Christ bodily," Col. ii, 9; that is, the whole nature and attributes of God are in Christ, and that really, essentially, or substantially; and also personally, by nearest union; as the soul dwells in the body, so that the same person who is man is God also. (4.) The Church is called the fulness of Christ, Eph. i, 23. It is the Church which makes him a complete and perfect head; for, though he has a natural and personal fulness as God, yet as Mediator he is not full and complete without his mystical body (as a king is not complete without his subjects), but receives an outward, relative, and mystical fulness from his members (Watson, *Dictionary*, s. v.). (5.) It is probable that the expression *fulness of the Godhead*, as applied to Christ (Col. i, 19; ii, 9), contains an allusion to the theories of some speculators, who taught that there were "certain distinct beings" (æons as they called them), "who were successive emanations from the Supreme Being himself," to whom they gave the title of "the Fulness." They pretended that one of these had assumed human nature in Jesus Christ. It was probably in designed contradiction to this that the apostle asserts the indwelling in Jesus "of all the fulness of the Godhead" (Eden).

**Fulvia** (the name of a noble Roman family, Græcized *Φουλβία*), a lady of Rome who had embraced Judaism, but having been defrauded of a sum of money by a Jewish impostor, complained through her husband Saturninus to the emperor Tiberius, who thereupon proscribed the Jews from the city (Josephus, *Ant.* xviii, 3, 5). No contemporary historian notices this expulsion, and it seems to have been but of temporary and partial force, different from the later and more formal edict of Acts xviii, 2. See CLAUDIUS.

**Functus** (*Funeccius*), JOHANN, a celebrated Lutheran divine, was born at Werden, near Nuremberg, Feb. 1, 1518, and was beheaded at Königsberg, Oct. 28, 1566. He married the daughter of Osiander (q. v.), and adopted the opinions of his father-in-law on justification (q. v.), and, after the death of Osiander, 1552, he came to be the leader of the mediation party, but in 1556 he assented to the Augsburg Confession and to Melancthon's *Loci Communes*. He was declared to be orthodox in 1561 by the divines of Leipsic and Wittenberg. He was made chaplain to Albert, duke of Prussia, but, having given him advice deemed disadvantageous to Poland, was, with his friends Snellius and Horstius, condemned and executed in 1566. He wrote a *Chronology* from Adam to A. D. 1560 (continued by an anonymous hand to 1578) in folio; Latin biographies of Vert Dietrich, and Andrew Osiander, his father-in-law; and Commentaries in German on Daniel and the Revelations, published by Sachsen (Frankfort, 1596, 4to), with wood-engravings by Spies.—Hofer, *Nouv. Biogr. Génér.* xix, 58; Gieseler, *Ch. History*, per. 4, § 39. (J. W. M.)

**Functionaries**, "persons who are appointed to discharge any office. Thus the clergy are 'functionaries' of the particular church of which they are members, to fulfil an 'office and administration in the same,' in that capacity deriving their station and power from Christ, by virtue of the sanction given by him to Christian communities. Thus the authority of those officers comes direct from the society so constituted, in whose name and behalf they act as its representatives, just to that extent to which it has empowered and directed them to act. In conformity with these views, each person about to be ordained as priest in the Church of England is asked whether he thinks he is 'truly called,' both 'according to the will of Christ and the order of this Church of England.'"—Eden, *Churchman's Dict.* s. v.

**Fundamentals**. A distinction has been drawn, both in the Roman Catholic and Protestant Churches,

between *fundamental* and *non-fundamental* articles of faith.

1. Roman theologians understand by *articuli fundamentales* those doctrines which every Christian is obliged to know, to believe, and to profess, on pain of damnation; and by *articuli non-fundamentales* such doctrines as a man may be involuntarily ignorant of, without losing the name of Christian and the hope of salvation, it being taken for granted that he would believe them if made known to him by the Church. Substantially the Roman doctrine is that whatever the Church teaches is *fundamental*.

II. In the Lutheran Church the distinction between *fundamental* and *non-fundamental* doctrines was introduced by Hunnius, and after him was further developed by Quenstedt. See Hunnius, *De fundamentalibus dissensu doctrinæ Lutherianæ et Calvinianæ* (1626). According to this distinction, fundamental doctrines are those which are essential to the faith unto salvation, viz. the doctrine of Christ the Mediator, of the Word of God as the seed of truth, etc. The later theology has abandoned this distinction, so far as its scientific use is concerned. Practically, however, all Christians agree in considering certain doctrines as essential to the Christian system, and others as comparatively non-essential. See Bergier, *Dict. de Théologie*, s. v. *Fundamentaux*; Pelt, *Theolog. Encyclop.* art. 66; Dodd, *On Parables*, i, 14; Chillingworth, *Religion of Protestants*, pt. i, ch. iii; Hammond, *Works*, vol. i; Stillington, *Works*, iv, 56 sq.; Turretin, *De Articulis Fundamentalibus*, 1719. Waterland treats the subject largely in his *Discourse on Fundamentals* (*Works*, Oxf. 1853, 6 vols., vol. v, p. 73 sq.). He remarks that when we apply "the epithet *fundamental* either to religion in general or to Christianity in particular, we are supposed to mean something essential to religion or Christianity, so necessary to its being, or, at least, to its well-being, that it could not subsist, or maintain itself, without it." He holds that Scripture indicates this distinction of things more or less weighty: e. g. Paul, with regard to certain Judaizers, exhorted his converts to bear with them (1 Cor. ix, 19–23), while to others he would not give place by subjection, no, not for an hour (Gal. ii, 5, 21). That the primitive Church recognised the distinction he thinks has been fully shown by Spanheim, iii, 1059; Hoornbeck, *Socin. Confut.* i, 9, 210, etc. Bingham remarks that as to fundamental articles of faith, the Church had them always collected or summed up out of Scripture in her creeds, the profession of which was ever esteemed both necessary on the one hand, and sufficient on the other, in order to the admission of members into the Church by baptism; and, consequently, both necessary and sufficient to keep men in the unity of the Church, so far as concerns the unity of faith generally required of all Christians, to make them one body and one Church of believers (*Orig. Eccles.* bk. xvi, ch. i). The difficulty of the subject, according to Waterland, lies not so much in deciding what is fundamental to the *Christian system* as such, as in deciding whether these things are to be held essential in the belief of *particular persons* in order to their salvation. The former are as fixed as Christianity itself; the latter will always vary with the capacities and opportunities of the persons themselves. So the terms of communion may be one thing, the terms of salvation another. Herein Roman Catholic theology differs from Protestant, as it makes the terms of communion identical with the terms of salvation. Jonathan Edwards cites Stapfer to the same purport: "On account of the various degrees of men's capacities, and the various circumstances of the times in which they lived, one man may know truths which another cannot know. Whence it follows that the very same articles are not fundamental to all men; but, accordingly as revelation hath been more or less complete, according to the several dispensations under which men have lived, their various natural abilities, and their various

modes of circumstances of living, different articles are, and have been, fundamental to different men. This is very plain from the different degrees of knowledge before and since the coming of Christ, for before his coming many truths were hid which are now set in the most clear light; and the instance of the apostles abundantly shows the truth of what I have now advanced, who, although they were already in a state of grace, and their salvation was secured, yet for some time were ignorant of the necessity of the suffering and death of Christ, and of the true nature of his kingdom; whereas he who now does not acknowledge, or perhaps denies, the necessity of Christ's death, is by all means to be considered as in a fundamental error. Therefore, as a man hath received of God greater or less natural abilities, so let the number of articles to which he shall give his assent be greater or smaller; and as revelation hath been made, or information hath been given, to a man more clearly or obscurely, in the same proportion is more or less required of him. Therefore, in our own case, we ought to be cautious of even the smallest errors, and to aim at the highest degree of knowledge in divine truths. In the case of others we ought to judge concerning them with the greatest prudence, mildness, and benevolence. Hence we see that a certain precise number of articles which shall be necessary and fundamental to every man cannot be determined" (Edwards, *Works*, N. Y. ed., 4 vols., vol. iii, p. 545).

After Cromwell came into power in England in 1653, a committee of divines was appointed by Parliament to draw up a catalogue of "fundamentals" to be presented to the House. "Archbishop Usher was nominated, but he declining, Mr. Baxter was appointed in his room; the rest who acted were Dr. Owen, Dr. Goodwin, Dr. Cheynel, Mr. Marshal, Mr. Reyner, Mr. Nye, Mr. Sydrach Simpson, Mr. Vines, Mr. Manton, Mr. Jacob. Mr. Baxter desired to offer the Apostles' Creed, the Lord's Prayer, and the Ten Commandments alone, as containing the fundamentals of religion; but it was objected that this would include Socinians and papists. Mr. Baxter replied that it was so much fitter for a centre of unity or concord, because it was impossible, in his opinion, to devise a form of words which heretics would not subscribe, when they had perverted them to their own sense. These arguments not prevailing, the following articles were presented to the House, under the title of 'The Principles of Faith, presented by Mr. Thomas Goodwin, Mr. Nye, Mr. Sydrach Simpson, and other Ministers, to the Committee of Parliament for Religion, by way of Explanation to the Proposals for propagating the Gospel.' 1. That the Holy Scripture is that rule of knowing God and living unto him, which whose does not believe cannot be saved. 2. That there is a God, who is the creator, governor, and judge of the world, which is to be received by faith, and every other way of the knowledge of him is insufficient. 3. That this God, who is the creator, is eternally distinct from all creatures in his being and blessedness. 4. That this God is one in three persons or subsistences. 5. That Jesus Christ is the only mediator between God and man, without the knowledge of whom there is no salvation. 6. That this Jesus Christ is the true God. 7. That this Jesus Christ is also true man. 8. That this Jesus Christ is God and man in one person. 9. That this Jesus Christ is our Redeemer, who, by paying a ransom and bearing our sins, has made satisfaction for them. 10. That this same Lord Jesus Christ is he that was crucified at Jerusalem, and rose again, and ascended into heaven. 11. That this same Jesus

Christ being the only God and man in one person, remains forever a distinct person from all saints and angels, notwithstanding their union and communion with him. 12. That all men by nature are dead in sins and trespasses; and no man can be saved unless he be born again, repent, and believe. 13. That we are justified and saved by grace and faith in Jesus Christ, and not by works. 14. That to continue in any known sin, upon what pretence or principle soever, is damnable. 15. That God is to be worshipped according to his own will; and whosoever shall forsake and despise all the duties of his worship, cannot be saved. 16. That the dead shall rise; and that there is a day of judgment, wherein all shall appear, some to go into everlasting life, and some into everlasting condemnation. Mr. Baxter (*Life*, p. 205) says Dr. Owen worded these articles; that Dr. Goodwin, Mr. Nye, and Mr. Simpson were his assistants; that Dr. Cheynel was scribe; and that Mr. Marshal, a sober, worthy man, did something; but that the rest were little better than passive. It appears by these articles that these divines intended to exclude not only Deists, Socinians, and papists, but Arians, Antinomians, Quakers, and others" (Neal, *History of the Puritans*, Harpers' ed., i, 131).

**Funeral.** Burying was (as generally, Cicero, *Leg. ii*, 22; Pliny, vii, 55) the oldest, as in all antiquity the customary, and among the Israelites the only mode of disposing of corpses (Gen. xxiii, 19; xxv, 9; xxxv, 8, 19; Judg. ii, 9; viii, 32; 1 Sam. xxv, 1, etc.; John xi, 17; Matt. xxvii, 60, etc.). So likewise among the Egyptians, Babylonians, and Persians (Lucian, *Suet.* 21; Curtius, iii, 12, 11 and 13), of which people ruins of necropolises and tombs still remain. Of *burning* (which among the Greeks was a well-known custom—although in no age altogether prevalent, see Becker, *Charicles*, ii, 181 sq.), the first trace occurs in 1 Sam. xxxi, 12, and even there as an extraordinary case (ver. 10). The practice has also been inferred from Amos vi, 10, where the term מֵשֶׁרֶפֹּה, *meserepho*, "he that burneth him" (i. e. the nearest relative, who kindled the pyre; compare Gen. xxv, 9; xxxv, 29; Judg. xvi, 31), occurs; but De Rossi, with several MSS., reads (so Hitzig, ad loc., although Rosenmüller, ad loc., otherwise explains) מֵשֶׁרֶפֶה, alluding to the different custom of burning—not the *body* itself, but—sweet spices at the funeral, as in Chron. xvi, 14; xxi, 19; Jer. xxxiv, 5 (comp. Deut. xii, 31), as confirmed by Josephus (*War*, i, 33, 9; see Geier, *De luctu*, vi, 2 sq.; Kirchnann, *De funerib.* p. 248 sq.; Douglæi *Analect.* i, 196 sq.). After the exile the burning of dead bodies was still less an Israelitish custom, and the Talmud classes it with heathenish practices; hence even Tacitus (*Hist.* v, 5, 4) mentions burial as an altogether Jewish usage. The same conclusion is confirmed by the fact that combustion of the person is affixed by the Mosaic law (Lev. xx, 14; xxi, 9) as a special penalty for certain crimes (see Michaelis [who,

Ancient Egyptian Funeral Rites: 1. The mummy in its shrine; 2. A priest presenting an oblation before it; 3, 4, 5. Female relatives present, and exhibiting their homage and grief.

however, reaches a false result], *De combustione et humatione mortuorum ap. Hebraeos*, in *His Syntagma comm.* i, 225 sq.). See GRAVE. To leave the dead unburied was to the Hebrews a most dreadful thought (1 Kings xiii, 22; xiv, 11; xvi, 4; xxi, 24; Jer. vii, 33; viii, 2; ix, 22; xiv, 16; xvi, 4; xxv, 33; Ezek. xxix, 5; Psa. lxxix, 3), and was regarded by the ancients universally as one of the grossest insults (Sophocles, *Ajax*, 1156; Herodian, viii, 5, 24; iii, 12, 25; Plutarch, *Virt. mul.* p. 226, ed. Tauchn.; Isocr. *Panath.* p. 638; see Musgrave, *al Soph. Antiq.* 25); hence to inter the remains of the departed was a special work of affection (Tobit i, 21; ii, 8), and was an imperative duty of sons toward their parents (Gen. xxv, 9; xxxv, 29; 1 Macc. ii, 70; Tobit vi, 15; Matt. viii, 21; compare Demosth. *Aristog.* p. 496; Val. Max. v, 4, ext. 3; see Kype, *Observ.* i, 46), and next devolved upon relatives and friends (Tobit xiv, 16). If the corpse remained unburned, it became a prey to the roving, hungry dogs and ravenous birds (1 Kings xiv, 11; xvi, 4; xxi, 24; Jer. vii, 33; 2 Sam. xxi, 10 [2 Kings ix, 35 sq.]; compare Homer, *Il.* xxii, 41 sq.; Eurip. *Iheral.* 1050). Nevertheless, that was not often the fate of the dead among the Israelites, except in consequence of the atrocities of war, since Deut. xxi, 23 (Josephus, *War*, vi, 72) was held to entitle even criminals to interment (Josephus, *War*, iv, 5, 2; comp. Matt. xxvii, 58; yet it was otherwise in Egypt, Gen. xl, 19). According to the Talmud (Lightfoot, *Hor. Heb.* p. 499) there were two especial burial-places at Jerusalem for executed persons.—Winer, i, 147. See TOMB.

What form or ceremonies of obsequies was observed by the ancient Hebrews is almost altogether unknown, except that in the earlier and simpler age the act of interment was performed by the relations (sons, brothers) with their own hands (Gen. xxv, 9; xxxv, 29; Judg. xvi, 31; the later passages, 1 Macc. ii, 70; Tobit xiv, 16, only indicate the attendance of the kindred at the rites; so also Matt. viii, 22). In later times the Jews left this to others, and in Amos v, 16 it is spoken of as something shocking that kinsmen should be obliged to carry the corpse to the grave (this pious care, however, was due from friends, e. g. from pupils towards their teacher, 1 Kings xiii, 30; Mark vi, 29). Closing the eyes and giving the last kiss (Thilo, *Apocr.* i, 44) are mentioned (Gen. xlvii, 4; 1, 1; Tobit xiv, 15) as natural expressions of farewell (the Talmud has a prescription concerning them, *Shabb.* xxiii, 5) from early antiquity (Homer, *Il.* xi, 452; *Odys.* xi, 425 sq.; xxiv, 296; Eurip. *Iher.* 428; Virg. *Æn.* ix, 487; Ovid, *Trist.* ii, 3, 43; iv, 3, 43 sq.; Val. Max. ii, 6, 8; Pliny, xi, 55; Euseb. *Hist. Eccl.* vii, 22). Immediately after decease (the sooner the better) the body was washed (Acts ix, 37), then wrapped in a large cloth (*αντίωρ*, Matt. xxvii, 59; Mark xv, 46; Luke xxiii, 53), or all its limbs wound with bands (*ὀβόλια, κτωία*, see John xi, 44; compare Chifflet, *De linteis sepulchrali Christi*, Antw. 1624, 1688), between the folds of which, in the case of a person of distinction, aromatics were laid or sprinkled (John xix, 39 sq.; compare John xii, 7; the custom of anointing the corpse with spiced unguents was very prevalent anciently, Pliny, xiii, 1; Homer, *Odys.* xxiv, 45; *Iliad*, xviii, 350; xxiv, 582; Lucian, *Luct.* 11). See Douglai *Annal.* ii, 64 sq. At public funerals of princes sumptuous shrouds were usual, and

there was a prodigal expense of odors (Josephus, *Ant.* xv, 3, 4; xvii, 8, 3; *War*, i, 33, 9). The speedy burial customary with the later Jews (Acts v, 6, 10; as a rule on the same day, before sundown) had its origin in the Levitical defilement (Numb. xix, 11 sq.); in earlier times it did not prevail (Gen. xxiii, 2 sq.; comp. Chardin, vi, 185). The removal (*ἐκφέρειν*) to the grave was done in a coffin (*σορός*, Luke vii, 14; *λάραξ*, Josephus, *Ant.* xv, 3, 2), which probably was usually open (? Luke vii, 14; comp. Schulz, *Leitung*, iv, 182; but see Josephus, *Ant.* xv, 1, 2); and on a bier (מִצְבֵּי,

Mohammædan Bier, for the Body of a Female or Boy (Lane).

2 Sam. iii, 31; *κλίση*, Josephus, *Lift*, 62; *Ant.* xvii, 8, 3; of costly materials in the case of royal personages, even adorned with precious stones, Josephus, *Ant.* xiii, 16, 1; xvii, 8, 3; *War*, i, 33, 9), borne by men (Luke vii, 14; Acts v, 6, 10), with a retinue of the relatives and friends (2 Sam. iii, 31; Luke vii, 12; the Talmud speaks of funeral processions with horns (*Parah*, xii, 9; on royal funeral processions, see Josephus, *Ant.* xiii, 16, 1; xvii, 8, 3; *War*, i, 33, 9) in a long train (Job xxi, 33), and with loud weeping and wailing (2 Sam. iii, 32; compare Baruch vi, 31). Even in the house of grief, before the funeral, lamentation was kept up with accompaniment of mourning pipes (Matt. ix, 23; Mark v, 38; compare Jer. ix, 17; 2 Chron. xxxv, 25; Ovid, *Fast.* vi, 660; see Hilliger, *De tibicin. in funere adhib.* Viteb. 1717; Kirchner, *Fun. Roman.* ii, 5). Female mourners, especially (Jer. ix, 17), were hired for the purpose (Mishna, *Moed Katon*, iii, 8), who prolonged the lamentation several days (Wellsted, i, 150; Prokesch, *Erinner.* i, 93, 102, 130). After the burial a funeral meal was given (2 Sam. iii, 35; Jer. xvi, 5, 7; Hos. ix, 4; Ezek. xxiv, 17, 24; Tobit iv, 18; Epist. Jer. 30; compare Homer, *Il.* xxiii, 28; xxiv, 802; Lucian, *Luct.* 24; see Geier, *De luctu Ebr.* ch. vi; Hebenstreit, in the *Miscell. Lips.* ii, 720 sq.; vi, 83 sq.; Garmann, in Iken's *Thesaur.* i, 1028 sq.). and among the later Jews, in families of distinction, invitations were extended to the honorable as well as to the people, so that these entertainments eventually became scenes

Ancient Egyptian Funeral Procession (Caillaud).

of luxurious display (Josephus, *War*, ii, 1, 1). Warriors were buried with their arms (Ezek. xxxii, 27; 1 Macc. xiii, 29; comp. Homer, *Odyss.* xi, 74; xii, 13; Virgil, *Æn.* vi, 233; Diod. Sic. xviii, 26; Curtius, x, 1, 31; see Tavernier, i, 284), and persons of rank or royalty with jewels and valuables (Josephus, *Ant.* xv, 3, 4; xvi, 7, 1). In later times, when the belief in the resurrection became generally distinct, a funeral sacrifice was made (2 Macc. xii, 43). See generally Weber, *Observat. sacr. circa funera populor. orient.* (Argent. 1767); Montbron, *Essai sur la littérature des Hébreux* (Par. 1819), III, i, 1 sq., 253 sq.; also Meursius, *De funere lib. sing.*, in his *Opp.* v.—Winer, ii, 15. For the funeral customs of the ancient Egyptians, see Wilkinson, chap. x (abridgm.); for those of the modern Egyptians, see Lane, chap. xxviii. See BURLIAL.

Modern Egyptian Funeral Procession (Lane).

Monographs on funerals in general have been written by Fuderici (Jen. 1755), Ingler [in Germ.] (Lüneb. 1757), Pomeg (L. B. 1659); on burial in general, by Heidegger (Heidelb. 1670), Nettelbladt (Rost. 1728), Lugh (Holm. 1672); on ancient modes of burial, by Gyraldus (Helms. 1676), Quenstedt (Viteb. 1660), Strauch (Viteb. 1660), Cellarius (Helms. 1682), Florinus (Aboe, 1695); among the Greeks, by Norberg (*Opusc.* ii, 507-526); on the right and duty of sepulture, by Brückner (Jena, 1708), Böhmer (Halle, 1717), Burchard (Lips. 1700), Hofmann (Viteb. 1726), Horer (Viteb. 1661), Sahme (Regiom. 1710), Saurmann (Brem. 1737), Schlegel (Lips. 1679); in time of war, by Preibis (Viteb. 1685); in temples, by Allegranza (Medio. 1773), Platner (Lips. 1788), Winkler (Lips. 1784), Woken (Viteb. 1752), Lampe (Argent. 1776), Gundling (*Obs. select.* i, 137 sq.); on sepulchres, by Eckhard (Jena, 1726); on cenotaphs, by Bidermann (Frib. 1755); and cemeteries, by Bachon (Gott. 1725), Berger (Rost. 1689), Böhmer (Hal. 1716, 1726), Fuhrmann [in Germ.] (Hal. 1801), Spondanus (Par. 1638); and their sanctity, by Lederer (Viteb. 1661), Lichtwehr (Viteb. 1747), Niespen (L. B. 1723), Plaz (Lips. 1725), Schöpfer (Bremen, 1747), Junius (Lips. 1744); on the Catacombs, by Cyprian (Helms. 1699); Fehmel (Lips. 1710-13); on mourning, by Eminga (Gryph. 1751); Nicolai (Marb. 1739), Geier (Lips. 1666), Kirchmann (Hamb. 1605, Lübec, 1625), Sopranus (Lond. 1643); on funeral dresses, by Mayer (Hamb. 1706); on the expense of funerals, by Philipp (Lips. 1684); on placing money in the mouth of the corpse, by Seyffert (Lips. 1709); on lamps at the grave, by Ferrari (Patavium, 1764), Schürzleisch (Viteb. 1710), Willech (Alt. 1715); and flowers, by Flügge (Hafn. 1704); on funeral feasts, by Jenichen [in German] (Lpz. 1747), Schmidt (Lips. 1693), Tropfanger (Viteb. 1710); on funeral incense, by Brönel (Jen. 1687); on funeral orations, by Böhmer (Helms. 1713, 1715), Mayer (Lips. 1670), Rosenberg (Budiss. 1689), Senf (Lips. 1689), Wildvogel (Jen. 1701), Witte (1691); and as a Roman custom, by Fortlage (Osnabr. 1789); on monuments, by Behnauer [in German] (Frib. 1755), Herfordt (Hafn. 1722), Hoitinger (Heidelb. 1659); on cuttings for the dead, by Michaelis (F. ad V. 1734); on Christian burial, by Behnauer (Budiss. 1732), Gretsa (Ingolstadt, 1611), Joch (Jen. 1726), Kiesling (Viteb. 1736), Franzen (Lips. 1713), Larrow

quans (*Advers. sacr.* L. B. 1688, p. 187 sq.), Panvinus (Lond. 1572, Rom. 1581, Lips. 1717), Rosenberg (Budiss. 1690), Samellius (Taurin. 1678), Schürzleisch (*Controv.* p. 34); on the burial of the patriarchs, by Carpzov (*Dissert.* p. 1670 sq.), Semler (Halle, 1706), Zeibich (Viteb. 1742); on Asa's funeral, by Müller (Viteb. 1716); on the burial of animals, by Dasson (Viteb. 1697), Lange (Altorf, 1705), Castaeus [at Jer. xxii, 19] (Lips. 1716). See GRAVE; CEMETERY; DEAD, etc.

**Funeral Discourses**, (1) addresses delivered either at the house of mourning or the grave; (2) funeral sermons or panegyrics. 1. We see, in Acts viii, 2, that certain ceremonies were observed in the early Church on the occasion of funerals. The apostolical constitutions prescribe certain services in cases of Christian burial (bk. viii, cap. 41, 42, *Celebretur dies tertius in psalmis, lectionibus et precibus, ob eum, qui tertia die resurrexit; item dies nonus*, etc.). But these services did not all take place at the time of the funeral, since it is known that bodies were not kept for three days in the East before burial. Of addresses delivered at funerals there is no mention made until after Basil, the two Gregories, and Chrysostom had introduced Greek rhetoric into the Christian Church. The funeral addresses of that age are mostly panegyrics delivered on the deaths of distinguished persons, such as martyrs, bishops, princes, etc. In the Middle Ages, funeral services were chiefly masses and prayers for the dead. The Reformation, while abolishing masses for the dead, instituted in its stead the practice of proclaiming the Word of God by the side of the open grave. The objects of this practice were stated, as early as 1536, in the *Church Discipline* of Würtemberg, to be (1) public recognition of the Christian's hope of resurrection; (2) a public testimony of Christian affection; (3) an earnest *memento mori*. Since the introduction of Rationalism, addresses at the grave have lost much of their general religious character in Germany, and have become, to a certain extent, panegyrics of the deceased. In other Protestant countries usages vary: sometimes there is simply a liturgical service at the house or at the grave; sometimes simply the reading of the Scriptures and prayer; sometimes an address of consolation or warning is added. This latter is generally the usage of the churches which do not make use of forms of prayer.

II. *Funeral Sermons*.—These are generally delivered from the pulpit. The funeral sermon differs from the simple funeral address, inasmuch as instead of being, as the former originally was, a mere exhortation, or, as it afterwards became, a personal panegyric, it is a regular sermon, preached from a text, which, however adapted to the circumstances, reminds the officiating minister, as does also the place from whence it is delivered, that he addresses a congregation, not a mere circle of family or friendship, and that his whole discourse should consequently be more objective than personal. The funeral sermon proper, as contrasted with orations and panegyrics, may be considered as having originated with Protestantism, in the place of the Roman Catholic ceremonial, which was necessarily rejected with the doctrine of purgatory (see Klieforth, *liturgische Abhandlungen* (vol. i, p. 275 sq.). The earliest Protestant discipline made the principal part of the funeral ceremony the Word of God, either as a simple lesson, or as a regular sermon (see *Hallsche Kirchenordnung*, A. D. 1526; Richter, i, 47). "At the following church-service after the burial of the party he shall be remembered and his death announced; his friends shall be comforted by the Word of God, and others reminded to hold themselves in readiness, with strong faith and hope, to obey God's call at any time and in any way." The reformator *ecclesiarum Hussie*, 1526 (ib. p. 61), says: "*Laudandum autem, si in funere habeatur aut sincera predicatio verbi Dei, aut saltem juxta ipsum brevis admonitio.*" In those days liturgy and homiletics were

not so distinct from each other as they have become since. In some places texts were prescribed for funeral sermons, and even sermons were given as models for similar productions. Luther himself gives two such in his *Hauspostille*. The sermon was gradually made more like the panegyric. Hunnius says, in the preface of his twenty-seven funeral sermons: "Men are no longer simply buried with the customary Christian ceremonies, but by request of the survivors there are sermons preached on the Word of God, and testimony rendered of the life and especially of the end of the dead, in what faith and hope they ended their life." Added to these, comparison with similar persons, reference to other members of the family, etc., furnished much material for discourses as acceptable to the hearer as to the preacher. From the middle of the 16th century to the beginning of the 18th, funeral sermons were either mere eulogies, or utterly objective and speculative discourses. A. H. Francke gave in 1700 a funeral sermon of 40 pages fol., with a long appendix. In the Roman Church some of the most brilliant sermons of the 16th and 17th centuries were funeral discourses; e. g. the *oraisons funèbres* of Bossuet and other French orators. In modern Protestant churches (England and America) funeral sermons are generally preached only on the death of some person distinguished for piety or position. Still, in some parts of the United States they are in more frequent use; sometimes they are even preached with regard to the decease of children. See Herzog, *Real-Encyclop.* s. v. Grabreden. See BURIAL; HOMILETICS.

**Furlong** (*στάδιον* or *στάδιον*, a *stadium*), a Greek measure of distance, equal to 606 feet 9 inches (Luke xxiv, 13; John vi, 19; xi, 18; [1 Cor. ix, 24, "race,"] i. e. a course or lists for running); Rev. xiv. 20; xx, 16). See Smith's *Dict. of Class. Antiq.* s. v. Stadium. See MEASURE; STADE.

**Furman, RICHARD**, a leading Baptist minister in the Southern States, was born at Æsopus, N. Y., in 1755. While he was a child, his father removed to South Carolina. His education was carefully attended to by his father, who instructed him in English studies and in mathematics, and particularly in the Scriptures. He began at the early age of eighteen to preach in destitute places, and soon gained a wide influence. Many churches were formed by his agency. During the Revolutionary War he was an ardent supporter of the cause of Independence, and his eloquence and patriotism attracted the attention of Patrick Henry and other leading statesmen. In 1787 he became pastor of a church in Charleston. He sat in the Convention for ratifying the Constitution of the United States. He received the degree of D. D. from Brown University in 1800. He was elected in 1814 the first president of the Baptist General Convention for missionary purposes. He died in 1825. He was a solemn and impressive preacher, an able presiding officer in deliberative assemblies, and in every relation an object of reverence and affection. He published, 1. *Rewards of Grace, a Sermon on the Death of Rev. Oliver Hart* (1796);—2. *An Oration at the Charleston Hospital* (1796);—3. *Sermon Commemorative of General Washington* (1800);—4. *A Sermon on the Death of the Rev. Edmund Botsford*.—Sprague, *Annals*, vi, 161. (L. E. S.)

**Furnace** is the rendering in the Engl. Vers. of the following words. See BURNING.

1. אֶתֶּן, *attun'* (a Chald. term, of uncertain, prob. foreign derivation; Sept. *κάμνος*), a large furnace, with a wide opening at the top to cast in the materials (Dan. iii, 22, 23), and a door at the ground by which the metal might be extracted (ver. 26). It was probably built like the Roman kiln for baking pottery-ware (Smith, *Dict. of Class. Antiq.* s. v. Fornax). The Persians were in the habit of using the furnace as a means of inflicting capital punishment (Dan. iii; comp. Jer.

Ancient Roman Potter's Furnace.

xxix, 22; 2 Macc. vii, 5; Hos. vii, 7; see Hoffmann, *De flamma furni Babylonici*, Jen. 1668). A parallel case is mentioned by Charlin (*Voyage en Perse*, iv, 276), two ovens having been kept ready heated for a whole month to throw in any bakers who took advantage of the dearth. See PUNISHMENT.

2. כִּבְשָׁן, *kibshan'* (so called from *subduing* the stone or ore), a smelting or calcining furnace (Gen. xix, 28), perhaps also a brick-kiln (Exod. ix, 8, 10; xix, 18); but especially a lime-kiln, the use of which was evidently well known to the Hebrews (Isa. xxxiii, 12; Amos ii, 1). See BRICK; LIME.

3. כּוּר, *kur* (so called from its *boiling up*), a refining furnace (Prov. xvii, 3; xxvii, 21; Ezek. xxii, 18 sq.), metaphorically applied to a state of trial (Deut. iv, 20; 1 Kings viii, 51; Isa. xlvi, 10; Jer. xi, 4). The form of it was probably similar to the one used in Egypt (Wilkinson, *Anc. Eg.* ii, 137, abridgm.). The jeweller appears to have had a little portable furnace and blow-pipe, which he carried about with him, as is still the case in India. See METALLURGY.

Ancient Egyptian blowing the fire for melting gold, with blow-pipe (c), forceps (b), and firepot having cheeks to confine and reflect the flame.

4. אֶלֶל, *all'* (perhaps so called from *working over*, Sept. *δοκιμασις*, Vulg. *probatum*), according to some, a *workshop*; others a *crucible* (only in Ps. xii, 6, where it probably denotes a *mould* in the sand for casting). See FINING-POT.

5. תַּנּוּר, *tannur'* (of uncertain etymology), an *oven* (as usually rendered) for baking bread ("furnace," Gen. xv, 17; Isa. xxxi, 9; Neh. iii, 11; xii, 38), perhaps sometimes in a more general sense (Gen. xv, 17; Isa. xxxi, 9). The *tannur* is still in use by the Arabs under the same name, being a large round pot of earthen or other materials, two or three feet high, narrowing towards the top; this being first heated by a fire made within, the dough or paste is spread upon the sides to bake, thus forming thin cakes (see Jahn, *Bibl. Archaeol.* § 140). Of the Gr. *καίβανος*, by which the Sept. render this word, Jerome says, on Lam. v, 10, "The *clibanus*, an extended round vessel of brass for

baking bread, the fire being applied internally." See OVEN.

6. *Kámuoc*, a general term for *furnace*, *kiln*, or *oven* (Matt. xiii, 42, 50; Rev. i, 15; ix, 2); especially the potter's furnace (Eccles. xxvii, 5; xxxviii, 30), which resembled a chimney in shape, and was about five or six feet high, having a cylindrical frame, in which the fire was kindled at the bottom, and the narrow funnel produced a strong draught, that raised the flame above the top (Wilkinson,

Ancient Egyptian Potter's Furnace.

*Ancient Egypt*, ii, 108, abridgment); also a blacksmith's furnace (Eccles. xxxviii, 28). The same also describes the calcining furnace (Xenophon, *1ectig.* iv, 49). It is metaphorically used in the N. T. in this sense (Rev. i, 15; ix, 2), and in Matt. xiii, 42 with an especial reference to Dan. iii, 6. See POTTER.

The TOWER OF THE FURNACES (מִגְדַּל הַתַּנּוּרִים, *Migdal' hat-Tannurim'*; Sept. *πύργος τῶν θανουρούριπ* v. r. *θανουρίπ*, Vulg. *turris furnorum*), i. e. of the *Ovens* (Neh. iii, 11; xiii, 38), was one of the towers on the second or middle wall of Jerusalem, at its N.W. angle, adjoining the "corner gate," and near the intersection of the present line of the Via Dolorosa with the Street of St. Stephen (Strong's *Harm. and Expos.* Append. p. 17). It may have derived its name from "the Bakers' Street" (Jer. xxxvii, 21) or "bazaar," which probably lay in that vicinity (Josephus, *War*, v, 8, 1, init.), as similar shops still do (Barclay, *City of the Great King*, p. 434). See JERUSALEM.

**Furneaux**, PHILIP, D.D., an English Nonconformist minister, was born at Totness in 1726, and died in 1783. He was first an assistant to a dissenting congregation in Southwark, then lecturer at Salters' Hall, and in 1753 succeeded Moses Lowman (q. v.) at Clapham, in Surrey, where he remained twenty-three years. For the last six years of his life he was totally deranged. He published *Sermons* (1758-69), and *Letters to Justice Blackstone on his Exposition of the Act of Toleration* (1793, 8vo), which, it is said, induced that learned commentator to change some of his positions in the subsequent editions of his work.—Rose, *New Gen. Biog. Dict.* vii, 462; Allibone, *Dictionary of Authors*, s. v. (J. W. M.)

**Furniture** is the rendering in the Auth. Vers. in one passage of *kar*, a camel's litter or canopied saddle, in which females are accustomed to travel in the East, Gen. xxxi, 34, elsewhere a *lamb*, etc.; also in a few passages of *keli'*, a general term for *vessels*, utensils, or implements of any sort. The manufacture of all kinds of furniture is represented on the Egyptian monuments with great minuteness. The recent excavations among the Assyrian mounds have also disclosed a high degree of refinement among the people of that age. See Wilkinson's *Anc. Egypt.*, Rosellini's *Illustra.*, and Layard and Botta's works on ancient Nineveh and Babylon; also the various articles of household furniture in their alphabetical order. See CARPENTER.

It appears that the furniture of Oriental dwellings, in the earliest ages, was generally very simple; that of the poorer classes consisted of but few articles, and those such only as were absolutely necessary. See HOUSE. The interior of the more common and useful apartments was furnished with sets of large nails with square heads, like dice, and bent at the head, so as to

make them cramp-irons; a specimen of these may be seen in the British Museum. In modern Palestine the plan is to fix nails or pins of wood in the walls, while they are still soft, in order to suspend such domestic articles as are required; since, consisting altogether of clay, they are too frail to admit of the operation of the hammer. To this custom there is an allusion in Ezra ix, 8, and Isa. xxii, 23. On these nails were hung their kitchen utensils or other articles. Instead of chairs, they sat on mats or skins; and the same articles, on which they laid a mattress, served them instead of bedsteads, while their upper garment was used for a covering. See CHAIR. Sovereigns had chairs of state, or thrones with footstools (Exod. xxii, 26, 27; Dent. xxiv, 12). The opulent had (as those in the East still have) fine carpets, couches, or divans and sofas, on which they sat, lay, and slept (2 Sam. xvii, 28; 2 Kings iv, 10). They have also a great variety of pillows and bolsters, with which they support themselves when they wish to take their ease, and there is an allusion to these in Ezek. xiii, 18. In later times these couches were splendid, and the frames inlaid with ivory (Amos vi, 4), which is plentiful in the East; they were also richly carved and perfumed (Prov. vii, 16, 17). See BED. On these sofas, in the latter ages of the Jewish state, for before the time of Moses it appears to have been the custom to sit at table (Gen. xliii, 33), they universally reclined when taking their meals (Amos vi, 4; Luke vii, 36-38). See ACCUBATION. Anciently splendid hangings were used in the palaces of the Eastern monarchs, embroidered with needle-work, and ample draperies were suspended over the openings in the sides of the apartments, for the twofold purpose of affording air, and of shielding them from the sun. Of this description were the costly hangings of the Persian sovereigns mentioned in Esth. i, 6, which passage is confirmed by the statements of Quintus Curtius relating to their superb palace at Persepolis. See EMBROIDERY. In the more ancient periods other articles of necessary furniture were both few and simple. Among these were a hand-mill, a kneading-trough, and an oven. See BREAD. Besides kneading-troughs and ovens they must have had various kinds of earthen-ware vessels, especially pots to hold water for their several ablutions. In later times baskets formed an indispensable article of furniture to the Jews. See BASKET. Large sacks are still, as they anciently were (Gen. xlv, 1-3; John ix, 11), employed for carrying provision and baggage of every description. The domestic utensils of the Orientals in the present day are nearly always of brass; those of the ancient Egyptians were chiefly of bronze or iron. Bowls, cups, and drinking-vessels of gold and silver were used in the courts of princes and great men (Gen. xlv, 2, 5; 1 Kings x, 21). Some elegant specimens of these are given in the paintings of the tombs of Egypt. See BOWL. Bottles were made of skins, which are chiefly of a red color (Exod. xxv, 5). See BOTTLE. Apartments were lighted by means of lamps, which were fed with olive-oil, and were commonly placed upon elevated stands (Matt. v, 15). Those of the wise and foolish virgins (Matt. xxv, 1-10) were of a different sort; they were a kind of torch or flambeau, made of iron or earthen-ware, wrapped about with old linen, moistened from time to time with oil, and were suitable for being carried out of doors. See LAMP.

**Furrow** (מְדִירָה, *g'dud'*, an *incision*, e. g. in the soil, Psa. lxxv, 10; מְדִירָה, *maanah'*, a *tilling* with the plough, Psa. cxxix, 3; מְדִירָה, *te'lem*, Job xxxi, 38; xxxix, 10; Hos. x, 4; xii, 11, a *ridge*, as rendered Psa. lxxv, 10; מְדִירָה, *arugah'*, Ezek. xvii, 8, 10, a *bed* in a garden, as rendered Cant. v, 13; vi, 2), an opening in the ground made by a plough or other instrument (Psa. lxxv, 10; Hos. x, 4, 16). Roberts, on Job xxxi, 38, "If my land cry against me, or that the fur-

rows likewise thereof complain," observes that similar proverbs are common among the Hindūs. See AGRICULTURE.

In Hos. x, 10, the text has עֵינֵי הַחֲרֹן, i. e. עֵינֵי הַחֲרֹן, their [two] eyes, which the A. Vers. seems to have pointed עֵינֵי הַחֲרֹן; and even thus it will hardly bear their rendering, "these [two] furrows" (as if from חָרַף, to till, the same root as in the second Heb. word above); but the margin, with all the versions (Davidson's Hebrew Text, p. 125), has עֲוֹנוֹתֵינוּ, their [two] iniquities, referring to the golden calves at Dan and Bethel (Henderson, Comment. ad loc.). See CALF, GOLDEN.

**Furseus**, a missionary and abbot in the British Isles, and the founder of the convent of Lagny, near Paris, was born in Ireland, where he founded also a convent, to which he gave very strict rules. He then went to West Anglia, and erected the abbey of Knobbersburg, which he afterwards resigned to his brother Poillan, in order to withdraw into solitude. During the persecution of the Christians by Penda, king of the Mercians, he fled to France, where, under the protection of Chlodwig II, he founded the convent of Lagny. He is supposed to have died in 650-654. He had acquired particular consideration by his visions, in which he pretended to see and hear angels; they are related in Bollandus, in *vita S. Fursei ad 16 Jun.* See Mabillon, *Acta SS. Ord. S. B. I. ad a. 650; Annal. Mabill. I. catal. general.* p. 731; Beda, *Hist. gent. Angl. eccl.* ii, 19-23; Herzog, *Real-Encyclop.* iv, 629.

**Fury** (חֲרֹן, *chema'*, or יְרֵא, *charon'*, both signifying intense anger) is attributed to God like anger, metaphorically, or speaking after the manner of men; that is, God's providential actions are such as would be performed by a man in a state of anger; so that when he is said to pour out his fury on a person or on a people, it is a figurative expression for dispensing afflictive judgments (Lev. xxvi, 28; Job xx, 23; Isa.

lxiii, 3; Jer. iv, 4; Ezek. v, 13; Dan. ix, 16; Zech. viii, 2, etc.). See ANTIPOPOMORPHISM.

**Future Life.** See ETERNAL LIFE; IMMORTALITY; INTERMEDIATE STATE.

**Future Punishment.** See PUNISHMENT.

**Fyne**, PASSCHIER DE, was born Jan. 31, 1588, at Leyden. He was inducted into the ministerial office somewhat irregularly. His first charge was that of Jaarsveld. He was zealously attached to the cause of the Remonstrants. In consequence of his refusal to subscribe the Canons of the Synod of Dort, he was suspended from the ministry. This did not deter him from avowing his intention to exercise his gift as the opportunity should be afforded him. Refusing to subscribe the act, which imposed silence upon him, he was sentenced to be banished. Notwithstanding this sentence, he still persisted in preaching from place to place, and was successful in evading his persecutors. After enduring many hardships and privations in his itinerant ministry, he was in 1638 settled over a church in Haarlem. Here he was at first molested, but was subsequently permitted to exercise his ministry without further annoyance. He labored here till his death, which took place in 1661. He was a man of natural shrewdness, of great intrepidity, and full of zeal as a minister of the Gospel. The asperity of his language towards his opponents finds an apology in the treatment he received at their hands. His account of the *Rijnsburgeren* is regarded as valuable, being the testimony of one personally acquainted with the facts. It is entitled *Kort en waerachtig verhael van het eerste begin en opkomen van de nieuwe secte der profeten of Rijnsburgeren.* See Brandt's *Historie der Reformatie*, etc., iii en iv Deelen, op verscheidene plaatsen; *De Remonstrantsche Broederschap*, etc., door J. Tulenman, *Phil. Theor. Mag. Lit. Hum. Dr., Predikant te Rotterdam*, 1847; Glasius, *Godgeleerd Nederland*, blz. 479 en verv. (J. P. W.)

G.

**Gaab**, JOHANN FRIEDRICH, a German theologian, was born at Göppingen, in Württemberg, Oct. 10, 1761. In 1792 he became professor extraordinarius, in 1798 professor ordinarius of philosophy at Tübingen; in 1814, librarian of the university; in 1822, general superintendent, in which office he remained till his death, March 2, 1832. He was a voluminous writer, chiefly in Biblical literature. Among his works are *Observationes ad historiam Judaicam* (Tüb. 1787, 8vo);—*Beiträge z. Erklärung des 1, 2, 3 büchen Mosis* (Tüb. 1776, 8vo);—*Das Buch Hiob* (Tüb. 1809, 8vo);—*Erklärung schwerer Stellen Jeremias* (Tüb. 1824, 8vo);—*Handbuch zum philolog. Verstehen der Apocryph. Schriften des A. T.* (1818-19, 5 parts);—*Dogmengeschichte der ält. griech. Kirche* (Jena, 1790, 8vo);—*Programma de Judio Immortali* (Tüb. 1815).—Migne, *Biog. Chrétienne*, s. v.

**Ga'al** (Heb. גַּאֵל, *loathing*; Sept. Γαῖλ, Josephus Γαῖλις), son of Ebed (Judg. ix, 26 sq.). He went to Shechem with his brothers when the inhabitants became discontented with Abimelech, and so engaged their confidence that they placed him at their head. He does not seem to have been a native of Shechem, nor specially interested in the revolution, but rather one of a class of *condottieri*, who at such a period of anarchy would be willing to sell their services to the highest bidder (compare Josephus, *Ant. v.* 7, 3 and 4). At the festival at which the Shechemites offered the first-fruits of their vintage in the temple of Baal, Gaal, by apparently drunken bravadoes, roused the valor of the people, and strove yet more to kindle their wrath against the absent Abimelech. It would seem as if the natives had been in some way intimately connected with, or descended from, the original inhabitants,

for Gaal endeavored to awaken their attachment to the ancient family of Hamor, the father of Shechem, which ruled the place in the time of Abraham (Gen. xxxiv, 2, 6), and which seems to have been at this time represented by Gaal and his brothers. This appeal to ante-Israelitish traditions (Judg. ix, 28), together with the re-establishment of idolatry at Shechem, shows that the movement in which he took part was a reactionary one, and proceeded upon the principle of a combination of the aborigines with the idolatrous Israelites against the iconoclastic family of Gideon as represented by Abimelech. Although deprived of Shechem, the family appears to have maintained itself in some power in the neighborhood, which induced the Shechemites to look to Gaal when they became tired of Abimelech. Whether he succeeded in awakening among them a kind feeling towards the descendants of the ancient masters of the place does not appear; but eventually they went out under his command, and assisted doubtless by his men, to intercept and give battle to Abimelech when he appeared before the town. He, however, fled before Abimelech, and his retreat into Shechem being cut off by Zebul, the commandant of that place, he went to his home, and we hear of him no more. The account of this attempt is interesting, chiefly from the slight glimpse it affords of the position, at this period, of what had been one of the reigning families of the land before its invasion by the Israelites. B.C. 1319.—Kitto, s. v.; Smith, s. v. See ABIMELECH.

**Ga'ash** (Heb. גַּאֵשׁ, *a shaking or earthquake*; Sept. Γαᾶς or Γαᾶς), a "hill" (rather *mount*, גַּר) among the mountains of Ephraim, near Timnath-se-

rah, on the north side of which Joshua was buried (Josh. xxiv, 30; Sept. Γααῶν; Judg. ii, 9). Hence "the brooks of Gaash," i. e. the valleys or water-courses (גַּאשׁוֹת, *wašyot*, Sept. Ναχαλί or Ναχαλίη) around the mountain, which were the native place of Hiddai or Hurai, one of David's warriors (2 Sam. xxiii, 30; 1 Chron. xi, 32). Eusebius and Jerome merely state that Joshua's tomb was still a remarkable monument near Timnah in their day (*Onomast.* s. v. Γαῶς, Gaas). See JOSHUA. If Timmath (q. v.) be the modern Tibneh, then Mt. Gaash is probably the hill full of sepulchral caverns now facing it on the south. See EPHRAIM, Mt.

**Ga'ba**, a less correct mode of Anglicizing (Josh. xviii, 24; Ezr ii, 26; Neh. vii, 30) the name GĒBA (q. v.).

**Gaba** (evidently a form of the Heb. גַּבָּתָא, i. e. *hill*; see GIBĒATH), a town mentioned by Josephus, and always in connection with Ptolemais: it was destroyed by the insurgent Jews in the time of Florus (*War*, ii, xviii, 1, *Γάβα* v. r. *Γάμαλα* and *Γάβαλα*); it adjoined Mt. Carmel, and was called "the city of horsemen" (πόλις ἵππέων), because those horsemen that were dismissed by Herod dwelt there (*War*, iii, 3, 1, *Γαβὰ* v. r. *Γάμαλα*, *Γάβαλα*, *Γάβλα*, *Γαβλαά*); but it was different from the *Gibeā* (Γαβὰ) that lay about 20 stadia from Ptolemais (*Life*, 23), as this was apparently the Gibeah of Benjamin. Reland, who notices several ancient allusions to places of a similar name (*Palest.* p. 269), thinks that the town in question was the modern *Haifa*, on the shore near Carmel (q. d. גַּיְפָא), the *Sycamianus* of later writers (see Robinson, *Researches*, iii, 194, note), a conclusion in which Schwarz coincides (*Palest.* p. 69, note). See GABALA.

**Gab'aël** (Γαβαίλ) v. r. Γαμαίλ; Vulg. *Gabelus*), the name of two persons in the Apocrypha.

1. An ancestor of Tobit (Tobit i, 1).

2. A poor Jew (Tobit i, 17, Vulg.) of "Rages in Media," to whom Tobias lent (Vulg. *sub chirographo dedit*) ten talents of silver, which Gaba afterwards faithfully restored to Tobias in the time of Tobit's distress (Tobit i, 14; iv, 1, 20; v, 6; ix, x, 2).—Smith, s. v. See GABRIAS.

**Gabāla** (Γαβάλα), a place located by Ptolemy in Phœnicia (Reland, *Palest.* p. 458), and the seat of one of the Palestinian bishops (*ibid.* p. 220). Schwarz (*Palest.* p. 170) refers to Josephus's mention of a Galilean village by this name built by Herod (*Ant.* xv, 8, 5, where, however, the text has Γαβα v. r. Γάβαλα and Γάμαλα, evidently the GABA [q. v.] of other passages), and to the Talmudical notices of a *Gebul* (גַּבּוּל, *border*); finding both in "the village *Jebul*, three Eng. miles N.E. of Beth-Shean," doubtless the ruins by that name marked on Van de Velde's *Map* five miles N. of Beisan. See GAMALA.

Coin of Gabala.

**Gabāra** (τὰ Γάβαρα), a place several times mentioned by Josephus as one of the principal cities of Galilee (*Life*, § 25, 61; comp. 10), thought by Reland (*Palest.* p. 771) to be also the *Gubaroth* (Γαβαριούθ) of Josephus (*Life*, § 45, 47), and to have sometimes been supplanted by *Gadara* (q. v.) in that historian's text (*War*, iii, 7, 1). It was situated twenty stadia from Sogane (Josephus, *Life*, § 51), and was discovered by Schulz in the ruins still called *Kubarech*, in the specified locality (Ritter, *Erdk.* xvi, 769). They are situated on the northern brow of the table-land looking

down upon the plain of Rameh, and consist of the remains of a large ancient building, with four cisterns, still unbroken, adjoining, and hewn stones strewn around over the space of an acre or more (Robinson, *Liter. Bib. Res.* p. 86 sq.).

**Gab'atha** (Γαβαθά), one of the eunuchs of king Xerxes, the exposure of whose plots by Mardochæus led to their execution (Esth. xii, 1, Apoc.); evidently the BIGTHAN (q. v.) of the Heb. text (Esth. ii, 21).

**Gabātha** (Γαβαθά), a village (κώμη) mentioned only by Eusebius and Jerome (*Onomast.* s. v. Γαβαθών, Gabathon) as lying on the eastern part of the great plain Daroma (Esdrælon), near Diocæsarea; a position corresponding with that of the modern village *Jebata*, north of the Kishon (Ritter, *Erdk.* xvi, 748), seen but not visited by Robinson (*Researches*, iii, 201). Euseb. and Jerome elsewhere (*ib.* s. v. Γαβαάς, Gabath) mention a place of the same name as being twelve miles from Eletheropolis, and containing the tomb of the prophet Habakkuk (a statement which Reland, *Palest.* p. 772, reconciles with their location of the same prophet's tomb at Keilah); but this seems to have been the Benjamite Gibeah (q. v.). For the *Gabatha* (Γαβαθά) of Josephus (*Ant.* xiii, 1, 4; comp. Reland, *Palest.* p. 772), see the NABĒBATHA (Ναββαθά) of the Apocrypha (1 Macc. iv, 37).

**Gab'bai** (Heb. *Gabbay'*, גַּבְבָּי, *tax-gatherer*; Sept. Γηβεί v. r. Γηβέ), a chief of the tribe of Benjamin, who settled in Jerusalem after the captivity (Neh. xi, 8). B. C. ante 536.

**Gab'batha** (Γαββαθά, in some MSS. Γαβαθά) occurs John xix, 13, where the evangelist states that Pontius Pilate, alarmed at last in his attempts to save Jesus by the artful insinuation of the Jews, "If thou let this man go thou art not Cæsar's friend," went into the prætorium again, and brought Jesus out to them, and sat down once more upon the βῆμα or tribunal, in a place called *Λιθόστρωτον*, but in the Heb. *Gabatha*. The Greek word, signifying literally *stone-paved*, is an adjective, and is generally used as such by the Greek writers; but they also sometimes use it substantively for a stone pavement, when *ἐξαφός* may be understood. In the Sept. it answers to גַּבּוּל (2 Chron. vii, 3; Esth. i, 6). Jerome reads, "Sedit pro tribunali in loco qui dicitur Lithostrotos." The Greek word, as well as the Latin, is frequently used to denote a pavement formed of ornamental stones of various colors, commonly called a *tesselated* or *mosaic pavement*. The partiality of the Romans for this kind of pavement is well known. It is stated by Pliny (*Hist. Nat.* xxxvi, 61) that, after the time of Sylla, the Romans decorated their houses with such pavements. They also introduced them into the provinces. Suetonius relates (*Cæsar*, 46) that Julius Cæsar, in his military expeditions, took with him the materials of tessellated pavements, ready prepared, that wherever he encamped they might be laid down in the prætorium (Casaubon, *ad Sueton.* p. 38, etc., edition 1605). From these facts it has been inferred by many eminent writers that the *τόπος λιθόστρωτος*, or place where Pilate's tribunal was set on this occasion, was covered by a tessellated pavement, which, as a piece of Roman magnificence, was appended to the prætorium at Jerusalem. The emphatic manner in which John speaks of it agrees with this conjecture. It further appears from his narrative that it was *outside* the prætorium; for Pilate is said to have "come out" to the Jews, who, for ceremonial reasons, did not go into it, on this as well as on other occasions (John xviii, 28, 29, 38; xix, 4, 13). Besides, the Roman governors, although they tried causes, and conferred with their council (Acts xxv, 12) *within* the prætorium, always pronounced sentence in the open air. May not, then, this tessellated pavement, on which the tribunal was now placed, have been inlaid on some part of the terrace,

etc., running along one side of the prætorium, and overlooking the area where the Jews were assembled, or upon a landing-place of the stairs, immediately before the grand entrance?

It has been conjectured that the pavement in question was no other than the one referred to in 2 Chron. vii, 3, and by Josephus (*War*, vi, 1, 8), as in the *outer court of the Temple*; but though it appears that Pilate sometimes sat upon his tribunal in different places, as, for instance, in the open market-place (*War*, ii, 9, 3), yet the supposition that he would on this occasion, when the Jews were pressing for a speedy judgment, and when he was overcome with alarm, *adjourn* the whole assembly, consisting of rulers of every grade, as well as the populace, to *any* other place, is very unlikely; and the supposition that such place was any part of the Temple is encumbered with additional difficulties. It is suggested by Lightfoot (*Exerc. on John*, ad loc.) that the word is derived from גַּבְדָּה, a *surface*, in which case Gabbatha would be a mere translation of Ἀπόστροφον. There was a room in the Temple in which the Sanhedrim sat, and which was called Gazith (גַּזִּיִּת) because it was paved with smooth and square flags; and Lightfoot conjectures that Pilate may on this occasion have delivered his judgment in that room. But this is not consistent with the practice of John, who in other instances gives the Hebrew name as that properly belonging to the place, not as a mere translation of a Greek one (compare John xix, 17). Besides, Pilate evidently spoke from the bema—the regular seat of justice—and this, in an important place like Jerusalem, would be in a fixed spot. Nor in any case could the prætorium, a Roman residence with the idolatrous emblems, have been within the Temple. Yet it may be said that the names גַּבְדָּה and Ἀπολλών, which John introduces in a similar way (Rev. ix, 11), are synonymous; and if the word Gabbatha be derived, as is usual, from גַּבְדָּה, “to be high or elevated,” it may refer chiefly to the *terrace*, or uppermost landing of the stairs, etc., which might have been inlaid with a tessellated pavement. Schleusner understands an elevated mosaic pavement, on which the βῆμα was placed, before the prætorium. The most natural inference from John’s statement is that the word Gabbatha is “Hebrew;” but it has been contended that the writers of the New Testament used this word by way of accommodation to denote the language (*Syriac*, or *Syro-Chaldee*, it is said) which was commonly spoken in Judea in their time, and that when John says Ἐβραϊστί, he means in the Syro-Chaldaic; but into the extensive controversy respecting the vernacular language of the Jews at Jerusalem in the time of our Saviour, this is not the place to enter. It may suffice for the present purpose to remark that the ancient Syriac version, instead of *Gabbatha*, reads *Gepphtha*. See Iken, *De Αποστροφῶν* (Bremæ, 1725); Lightfoot’s *Works*, ii, 614, 615 (London, 1684); Hamesford, *Bibl. Geogr.* ii, 129; Seelen, *Medit. Exeg.* i, 613.—Kittó, s. v.; Smith, s. v. See PAVEMENT.

**Gab’des** (Γαββῆς, Vulg. *Gabea*), a man whose descendants (or rather a place whose natives) returned from the captivity (1 Esdr. v, 20); evidently the GEBÆ (q. v.) of the Heb. text (Ezra ii, 26).

**Gabè** (Γαβῆ), a considerable place (πολιχνη, *oppidum*) mentioned by Eusebius and Jerome (*Onomast.* s. v. Γαβαθών, Gabbathon) as lying 16 R. miles from Casarea, in the edge of the plain of Esdraelon; thought by Robinson to be the modern *Jeba* (i. e. *Gibeah*), a large village on the slope of the range of hills N. of Nablús, containing an ancient town (*Researches*, iii, 151). It can hardly have been of sufficient importance to be commemorated by the coins found with the inscription “of the Gabinians” (Γαβηνών, Reland, *Palastr.* p. 769).

**Gabinus** (Græcized Γαβίνος), AULUS, of un-

known parentage, from a noted but plebeian family of Rome; one of Pompey’s generals, who was sent into Judea against Alexander (q. v.) and Antigonus (q. v.) with proconsular authority, B. C. cir. 64 (Josephus, *Ant.* xiv, 2, 3, 4). He was profligate in his youth (Cicero, *pro Sext.* 8, 9, etc.), and was made tribune of the people in B. C. 66, prætor in B. C. 61, and consul in B. C. 59; in all which offices he was active in political intrigues and party measures. On arriving in Syria, he made important changes there (Josephus, *Ant.* xiv, 10; *War*, i, 6). He restored Hircæus at Jerusalem, confirmed him in the high-priesthood, and settled governors and judges in the provinces, so that Judea from a monarchy became an aristocracy. He established courts of justice at Jerusalem, Gadara (or at Dora), Anatha, Jericho, and Sepphoris, that the people, finding judges in all parts of the country, might not be obliged to go far from their habitations. On returning to Rome, Gabinius was prosecuted by the Syrians and exiled, B. C. 54. He was recalled by Julius Cæsar, B. C. 49, and fell in the civil war between the triumvirs (Appian, *Illyr.* 12 and 27; *Bell. Civ.* ii, 59; Dion Cass. xlii, 11, 12). Rachenstein has written a monograph entitled *Ueber A. Gabinius* (Aarau, 1826). See Smith, *Dict. of Class. Biog.* s. v.

**Gabirol.** See GEBIROL.

**Gabish.** See PEARL.

**Gabler, Georg Andreas**, son of Johann Philipp, was born in Altdorf in 1786. He was for several years (from 1807) tutor in the family of Schiller at Weimar, became in 1811 teacher of the gymnasium of Ansbach, in 1817 professor, and in 1821 rector of the gymnasium in Bayreuth, in 1824 professor of classical literature at the lyceum in the same city, and, after the death of Hegel, professor of philosophy at the University of Berlin. He died in 1853 at Teplitz. He wrote *Lehrbuch der philosoph. Propädeutik* (Erlangen, 1827, 1 vol.).—*De veræ philosophiæ erga religionem Christianam pietate* (trying to establish the harmony between the Christian religion and the Hegelian philosophy, Berlin, 1836); *Beiträge zur richtigen Beurtheilung d. Hegelschen Philosophie* (Berlin, 1843). (A. J. S.)

**Gabler, Johann Philipp**, a German theologian, was born June 4, 1753, at Frankfort on the Maine. He studied at the gymnasium of his native city for ten years; then at the University of Jena from 1772 to 1778, under Griesbach and Eichhorn, from whom he received his theological and literary bias. In 1785 he was made professor of theology at Altdorf, and in 1801 he was called to Jena as second to Griesbach, whose place he filled after Griesbach’s death in 1812. Here he achieved great distinction, both as teacher and writer, and he was five times chosen prorector of the university. In theology he was an extreme Rationalist. He died Feb. 17, 1827. He wrote *Entwurf einer Hermeneutik des N. T.* (Altdorf, 1788).—*Hist.-krit. Einleitung ins N. T.* (Altdorf, 1789). He is known chiefly by his edition of Eichhorn’s *Urgeschichte* (Altdorf, 1790–93, 2 vols.), and the appendix he wrote to it (*Versuch über d. Mosaische Schöpfungsgeschichte*, Altdorf, 1795). From 1791 to 1800 he edited the *Neuestes theologisches Journal* (begun by Ammon, Hänlein, and Paulus); from 1800 to 1804 the *Journal f. theol. Literatur*; 1805 to 1811, the *Journal f. auserlesene theol. Literatur*. A collection of his essays was published by his sons in 1831 (Ulm, 2 vols.).—*Saintes, Hist. of Rationalism*, bk. i, ch. xi; Herzog, *Real-Encyclop.* iv, 632; W. Schröter, *Erinnerungen an J. P. Gabler* (Jena, 1827).

**Gab’riās** (Γαβρίαζ v. r. Γαβραῖ, i. e. גַּבְרִיאֵל, *hero of Jehovah*), according to the present text of the Sept. the brother of Gabael, to whom Tobit intrusted (παρὶ-ἔρω) ten talents of silver (Tob. i, 14), though in another place (Tob. iv, 20, τῶ τοῦ Γαβρία; compare Fritzsche, *Exeg. Handb.* ad loc.) he is described as his father. The readings throughout are very uncertain,

and in the versions the names are strangely confused. It is an obvious correction to suppose that Γαβριήλ *τῷ ἀελέφῳ τῷ Γαβρίᾳ* should be read in i, 14, as is in fact suggested by *Cod. F. A.*, Γαβριήλ . . . τῷ ἀε. τῷ Γαβρί. The misunderstanding of τῷ ἀελέφῳ (comp. Tob. i, 10, 16, etc.) naturally occasioned the omission of the article. The old Latin has *Gabelo fratri meo jilio Gabuhel*; and so also iv, 20.—Smith, s. v.

**Ga'br'iel** (Heb. *Gabriel*, גַּבְרִיֵּאל, *champion of God*; Sept. and N. T. Γαβριήλ), a word which is not in itself distinctive, but merely a description of the angelic office, used as a proper name or title to designate the heavenly messenger who was sent to Daniel to explain the vision of the ram and the he-goat (Dan. vii), and to communicate the prediction of the Seventy Weeks (Dan. ix, 21–27). Under the new dispensation he was employed to announce the birth of John the Baptist to his father Zechariah (Luke i, 11), and that of the Messiah to the Virgin Mary (Luke i, 26). See **ANNUNCIATION**. (It is also added in the Targums as a gloss on some other passages of the O. T.) In the ordinary traditions, Jewish and Christian, Gabriel is spoken of as one of the archangels (q. v.). In Scripture he is set forth only as the representative of the angelic nature, not in its dignity or power of contending against evil [see **MICHAEL**], but in its ministrations of comfort and sympathy to man. His prominent character, therefore, is that of a "fellow-servant" of the saints on earth; and there is a corresponding simplicity, and absence of all terror and mystery, in his communications to men; his own words, "I am Gabriel, that stand in the presence of God" (Luke i, 19), are rather in favor of the notion of his superior dignity. See **ANGEL**.

In the Book of Enoch, "the four great archangels, Michael, Raphael, Gabriel, and Uriel," are described as reporting the corrupt state of mankind to the Creator, and receiving their several commissions. To Gabriel he says, "Go, Gabriel, against the giants, the spurious ones, the sons of fornication, and destroy the sons of the watchers from among the sons of men" (*Greek Fragment of the Book of Enoch*, preserved by Syncellus in Scaliger's notes on the *Chronicon* of Eusebius, Amstel. 1658, p. 404). In the Rabbinical writings Gabriel is represented as standing in front of the divine throne, near the standard of the tribe of Judah (Buxtorf, *Lex. Talmud.* col. 46). The Rabbins also say that he is the Prince of Fire, and appointed to preside over the ripening of fruit; that he was the only one of the angels who understood Chaldee and Syriac, and taught Joseph the seventy languages spoken at the dispersion of Babel; that he and Michael destroyed the host of Sennacherib, and set fire to the Temple at Jerusalem (Eisenmenger's *Entd. Judenthums*, ii, 365, 379, 380, 383).

By the Mohammedans Gabriel is regarded with profound veneration. To him, it is affirmed, a copy of the whole Koran was committed, which he imparted in successive portions to Mohammed. He is styled in the Koran the Spirit of Truth and the Holy Spirit. In his hands will be placed the scales in which the actions of men will be weighed at the last day (D'Herbelot, *Bibliothèque Orientale*, s. v. Gebrail).—Kitto, s. v.; Smith, s. v.

**Gabriel de Chinon**, a French Roman Catholic missionary, was born towards the beginning of the 17th century. He became a Capuchin, and was sent as missionary to Persia about 1640. He settled at Isbahan, and learned most of the Oriental languages, which enabled him to make a great number of proselytes. The favor he enjoyed at the court of Shah Abbas II excited the envy of the Armenian priests, who caused him great annoyance. Gabriel withdrew about 1660 to Tabriz (Tauris or Tebrzez, the capital of the province of Azerbijan, in North Persia), where he founded a convent of Capuchins, and established missions in Kurdistan and at Tillsi. About 1670 he went

on a mission to Malabar, where he died (at Tellichery) June 27, 1670. He wrote observations on the countries he had resided in, which were afterwards published by Moréri, with a life of Gabriel, under the title *Relations nouvelles du Levant, ou traité de la religion, du gouvernement, et des coutumes des Perses, des Arméniens et des Gaures* (Lyon, 1671, 12mo). They contain some curious details on Persian customs and manners, but the greater part of the work is taken up with details concerning religious questions, Gabriel's order, and himself. See Nicéron, *Mémoires pour servir à l'histoire des hommes illustres*, xxvii, 311; Hoefler, *Nouv. Biog. Générale*, xix, 109.

**Gabriel Sionita**, a learned Maronite, was born at Edden, on Mount Libanus, 1574. He came to Rome when seven years old, and studied at the Maronite College there. He was made professor of Oriental languages at Rome. In 1614 he accompanied the French ambassador (at Rome) to Paris, and was made professor of Arabic at the College de France. In 1620 he became doctor of theology. In 1630 he began to work on Le Jay's Polyglot Bible, for which he furnished the Syriac and Arabic versions. He died at Paris in 1648. Of his writings, we name *Liber Psalmorum ex Arab. in Lat. translatus* (Rome, 1614, 4to); —*Grammatica Arabica Maronitarum, in libros v. divisâ* (Paris, 1616, 4to).—Hoefler, *Nouv. Biog. Gén.* xix, 106.

**Gabriel, St., Congregation of**, the name of two monastic congregations in the Roman Catholic Church. 1. The first Congregation of St. Gabriel was established at Bologna by Cesar Bianchetti, a senator of Bologna, who was born May 8, 1585, and after the death of his wife in 1638, devoted himself with great zeal to giving religious instruction to the youth and the ignorant. In order to obtain aid in his work he established a congregation of lay gentlemen, who, without living in common, pledged themselves to promote the cause of Christian instruction, and assembled on certain days for devotional exercises and for deliberation on their work. Subsequently a second congregation was organized of such laymen as preferred to live in common, and to devote their whole lives to the cause. The latter were called *Converventi*, the former *Confluenti*. The founder died in 1655. The congregation does not appear to have spread beyond Bologna. Members can be received from the eighteenth to the fiftieth year of age. The novitiate lasts three years, after which the novices may be received into the congregation by a two-thirds vote. They have to wait three years more before they have the right to vote. The officers are elected annually. See Delprat, *Vita del Venerab. Servo di Dio Cesare Bianchetti* (Bologna, 1704). Helyot, *Dictionnaire des Ordres Religieux*, s. v. 2. Another "Congregation of the Brothers of St. Gabriel" has been established in the present century by abbé Deshayes in France. The object of the congregation is to instruct the children, especially those of the country, in the Christian doctrine. Abbé Deshayes at first acted in concert with abbé Jean Marie Robert de Lamennais (q. v.), but subsequently they separated, Lamennais organizing the congregation of the "Brothers of the Christian Instruction" (q. v.). The congregation of which Deshayes

Brother of St. Gabriel.

of the "Brothers of the Christian Instruction" (q. v.). The congregation of which Deshayes

remained the superior assumed in 1835 the name of "Congregation of Brothers of St. Gabriel," after the patron saint of the founder. Abbé Deshayes died in 1841. In 1858 the congregations had 73 establishments and about 400 members. Every fifth year the congregation elects a superior general, who may be re-elected after the expiration of his term. The head establishment of the congregation is at St. Laurent de Sèvre. See Migne, *Dict. des Ordres Relig.* vol. iv, s. v. (A. J. S.)

**Gabrielites.** See ANABAPTISTS.

**Gaches, RAYMOND,** a French Protestant divine, was born at Castres towards 1615. In 1649 he was appointed pastor of his native city, where he soon became distinguished as a preacher. In 1654 he was called to Paris to supply the Protestant church of Charonton. He died at Paris in December, 1668. During his sojourn at Castres he contributed to the formation of an academy, which did not last long, but counted among its members many distinguished men. He published a number of separate sermons, sixteen of which have been collected under the title *Seize Sermons sur différents sujets* (Geneva, 1660, 8vo). See Haug, *La France Protestante*, s. v.; Hofer, *Nouv. Biog. Génér.* xix, 120; Vinet, *Hist. de la Prédication* (Paris, 1860, 8vo, § 7, p. 286-302).

**Gad** (Heb. *גַּד*, *fortune*, Gen. xxx, 11, although another signification is alluded to in Gen. xlix, 19; Sept. and N. T. Γάδ), the name of two men, and of the descendants of one of them; also of a heathen deity and of a plant. See also BAAL-GAD; MIGDAL-GAD.

1. (Josephus Γάδας.) Jacob's seventh son, the first-born of Zilpah, Leah's maid, and whole-brother to Asher (Gen. xxx, 11-13; xli, 16, 18), born autumn B.C. 1915. The following account is largely from the article in Smith's *Dict. of the Bible*. See JACOB.

1. As to the *name*, there are several interpretations: (a.) The passage in which the bestowal of the name of Gad is preserved—like the others, an exclamation on his birth—is more than usually obscure: "And Leah said, 'In fortune' (*be-gad*, גַּדְתִּי), and she called his name Gad" (Gen. xxx, 11). Such is supposed to be the meaning of the old text of the passage (the *Kethib*); so it stood at the time of the Sept., which renders the key-word by *ἐν τύχῃ*, in which it is followed by Jerome in the *Vulg. feliciter*. In his *Quæst. in Genesim*, Jerome has *in fortuna*. Josephus (*Ant. i*, 19, 8) gives it still a different turn—*τυχεῖος* = *fortunate*. But in the marginal emendations of the Masoretes (the *Keri*) the word is given גַּד אֵל, "Gad has come." This construction is adopted by the ancient versions of Onkelos, Aquila (ἡλθεν ἡ ζώσισ), and Symmachus (ἡλθεν Γάδ). (b.) In the blessing of Jacob, however, we find the name played upon in a different manner: "Gad" is here taken as meaning a piratical band or troop (the term constantly used for which is *g. dud'*, גַּדְתִּי), and the allusion—the turns of which it is impossible adequately to convey in English—would seem to be to the irregular life of predatory warfare which should be pursued by the tribe after their settlement on the borders of the Promised Land. "Gad, a plundering troop (*gedud'*) shall plunder him (*ye-gud-en'nu*), but he will plunder (*ya-gud'*) [at the] heel" (Gen. xlix, 19). Jerome (*De Benedict. Jacobi*) interprets this of the revenge taken by the warriors of the tribe on their return from the conquest of Western Palestine for the incursions of the desert tribes during their absence. (c.) The force here lent to the name has been by some partially transferred to the narrative of Gen. xxx, e. g. the Samaritan version, the Veneto-Greek, and our own A. V. (uniting this with the preceding)—"a troop (of children) cometh." But it must not be overlooked that the word *gedud'*—by which it is here sought to interpret the *gad* of Gen. xxx, 11—possessed its own special signification of turbulence and fierceness, which makes it hardly applica-

ble to children in the sense of a number or crowd, the image suggested by the A. V. Exactly as the turns of Jacob's language apply to the characteristics of the tribe, it does not appear that there is any connection between his allusions and those in the exclamation of Leah. The key to the latter is probably lost. To suppose that Leah was invoking some ancient divinity, the god Fortune, who is conjectured to be once alluded to—and once only—in the latter part of the book of Isaiah, under the title of *Gad* (Isa. lxxv, 11; A. V. "that troop;" Gesenius, "dem Glück!"), is surely a poor explanation. See below, 3.

2. Of the childhood and life of the individual Gad nothing is preserved. At the time of the descent into Egypt seven sons are ascribed to him, remarkable from the fact that a majority of their names have plural terminations, as if those of families rather than persons (Gen. xli, 16). The list, with a slight variation, is again given on the occasion of the census in the wilderness of Sinai (Numb. xxvi, 15-18). See ARON; EZBON; OZNI.

TRIBE OF GAD.—The position of Gad during the march to the Promised Land was on the south side of the tabernacle (Numb. ii, 14). The leader of the tribe at the time of the start from Sinai was Eliasaph, son of Reuel or Denel (ii, 14; x, 20). Gad is regularly named in the various enumerations of the tribes through the wanderings—at the dispatching of the spies (xiii, 15), the numbering in the plains of Moab (xxvi, 3, 15)—but the only inference we can draw is an indication of a commencing alliance with the tribe which was subsequently to be his next neighbor. He has left the more closely-related tribe of Asher to take up his position next to Reuben. These two tribes also preserve a near equality in their numbers, not suffering from the fluctuations which were endured by the others. At the first census Gad had 45,650, and Reuben 46,500; at the last Gad had 40,500, and Reuben 43,330. This alliance was doubtless induced by the similarity of their pursuits. Of all the sons of Jacob, these two tribes alone returned to the land which their forefathers had left five hundred years before with their occupations unchanged. "The trade of thy slaves hath been about cattle from our youth even till now"—"we are shepherds, both we and our fathers" (Gen. xli, 34; xlii, 4)—such was the account which the patriarchs gave of themselves to Pharaoh. The civilization and the persecutions of Egypt had worked a change in the habits of most of the tribes, but Reuben and Gad remained faithful to the pastoral pursuits of Abraham, Isaac, and Jacob; and at the halt on the east of Jordan we find them coming forward to Moses with the representation that they "have cattle"—"a great multitude of cattle," and the land where they now are is a "place for cattle." What should they do in the close precincts of the country west of Jordan with all their flocks and herds? Wherefore let this land, they pray, be given them for a possession, and let them not be brought over Jordan (Numb. xxxii, 1-5). They did not, however, attempt to evade taking their proper share of the difficulties of subduing the land of Canaan, and after that task had been effected, and the apportionment amongst the nine and a half tribes completed "at the doorway of the tabernacle of the congregation in Shiloh, before Jehovah," they were dismissed by Joshua "to their tents," to their "wives, their little ones, and their cattle," which they had left behind them in Gilead. To their *tents* they went—to the dangers and delights of the free Bedouin life in which they had elected to remain, and in which—a few partial glimpses excepted—the later history allows them to remain hidden from view.

The country allotted to Gad appears, speaking roughly, to have lain chiefly about the centre of the land east of Jordan. The south of that district—from the Arnon (wady Mojeb), about half way down the Dead Sea, to Heshbon, nearly due east of Jerusalem—

was occupied by Reuben, and at or about Heshbon the possessions of Gad commenced. They embraced half Gilead, as the oldest record specially states (Deut. iii, 12), or half the land of the children of Ammon (Josh. xiii, 25), probably the mountainous district which is intersected by the torrent Jabbock—if the wady Zúrka be the Jabbock—including as its most northern town the ancient sanctuary of Mahanaim. On the east the furthest landmark given is “Aroer, that faces Rabbah,” the present Amman (Josh. xiii, 25). The Arabian desert thus appears to have been the eastern boundary. West was the Jordan (Josh. xiii, 27). The northern boundary is somewhat more difficult to define. Gad possessed the whole Jordan valley as far as the Sea of Galilee (xiii, 27), but among the mountains eastward the territory extended no farther north than the river Jabbock. The border seems to have run diagonally from that point across the mountains by Mahanaim to the southern extremity of the Sea of Galilee (Josh. xii, 1-6; xiii, 26, 30, 31; Deut. iii, 12, 13; see Porter’s *Damascus*, ii, 252). The territory thus consisted of two comparatively separate and independent parts, (1) the high land on the general level of the

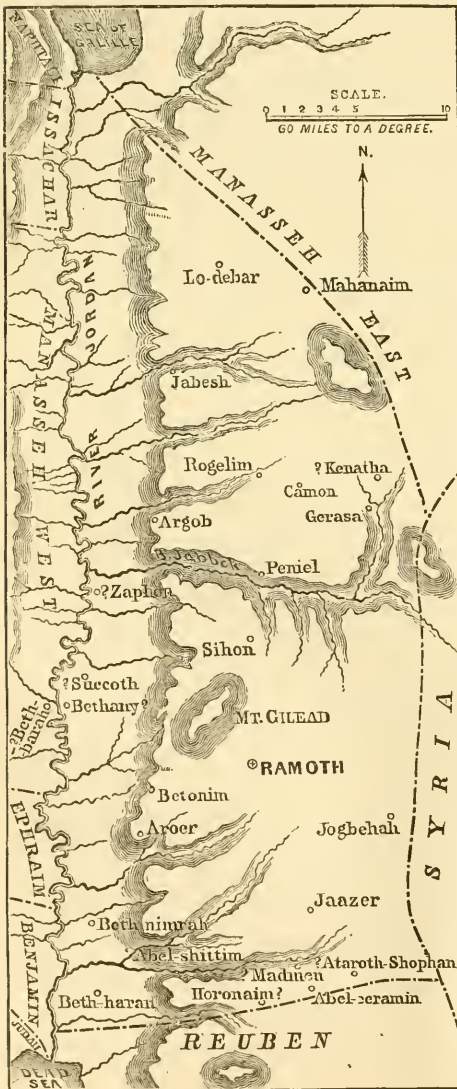

country east of Jordan, and (2) the sunk valley of the Jordan itself; the former diminishing at the Jabbock, the latter occupying the whole of the great valley on the east side of the river, and extending up to the very Sea of Cinnereth or Gennesaret itself.

Of the structure and character of the land which thus belonged to the tribe—“the land of Gad and Gilead”—we have only vague information. From the western part of Palestine its aspect is that of a wall of purple mountain, with a singularly horizontal outline; here and there the surface is scamed by the ravines, through which the torrents find their way to the Jordan, but this does not much affect the vertical wall-like look of the range. But on a nearer approach in the Jordan valley, the horizontal outline becomes broken, and when the summits are attained a new scene is said to burst on the view. “A wide table-land appears, tossed about in wild confusion of undulating downs, clothed with rich grass throughout; in the southern parts trees are thinly scattered here and there, aged trees covered with lichen, as if the relics of a primeval forest long since cleared away; the northern parts still abound in magnificent woods of sycamore, beech, terebinth, ilex, and enormous fig-trees. These downs are broken by three deep defiles, through which the three rivers of the Yarmúk, the Jabbock, and the Arnon fall into the valley of the Jordan and the Dead Sea. On the east they melt away into the vast red plain, which by a gradual descent joins the level of the plain of the Haurán, and of the Assyrian desert” (Stanley, *Palestine*, p. 320). It is a very picturesque country—not the “flat, open downs of smooth and even turf” of the country round Heshbon (Irby, p. 142), the sheep-walks of Reuben and of the Moabites, but “most beautifully varied with hanging woods, mostly of the vallonía oak, laurestinus, cedar, arbutus, arbutus andrachne, etc. At times the country had all the appearance of a noble park” (*ib.* p. 147), “graceful hills, rich vales, luxuriant herbage” (Porter, *Handb.* p. 310). See GILEAD.

Such was the territory allotted to the Gadites; but there is no doubt that they soon extended themselves beyond these limits. The official records of the reign of Jotham of Judah (1 Chron. v, 11, 16) show them to have been at that time established over the whole of Gilead, and in possession of Bashan as far as Salcah—the modern Sukhad, a town at the eastern extremity of the noble plain of the Haurán—and very far both to the north and the east of the border given them originally, while the Manassites were pushed still further northwards to Mount Hermon (1 Chron. v, 23). They soon became identified with Gilead, that name so memorable in the earliest history of the nation; and in many of the earlier records it supersedes the name of Gad, as we have already remarked it did that of Bashan. In the song of Deborah, “Gilead” is said to have “abode beyond Jordan” (Judg. v, 17). Jephthah appears to have been a Gadite, a native of Mizpeh (Judg. xi, 34; compare 31, and Josh. xiii, 26), and yet he is always designated “the Gileadite;” and so also with Barzillai of Mahanaim (2 Sam. xvii, 27; Ezra ii, 61; comp. Josh. xiii, 26).

The following is a list of all the Biblical localities in this tribe, with their probable identifications:

Abel-ceramin.	Town.	[Merj-Ekkeh]?
Abel-shittim.	do.	[On Wady Surj]?
Argob.	District.	<i>Rajib.</i>
Aroer.	Town.	<i>Atrah.</i>
Atroth-shophan.	do.	[E. of Merj-Ekkeh]?
Bethbarah (Beth- any).	Ford.	{ [Opposite Betá-barah (in Manassch)]?
Beth-aram, or Beth-haran }	Town.	<i>Zeit-Iharan.</i>
Beth-nimrah.	do.	<i>Nimrin.</i>
Betonim.	do.	<i>Batneh.</i>
Carmon.	do.	[ <i>Reimán</i> ]?
Debir.	do.	See LO-DEBAR.
Galeed.	Stone-heap.	See GILEAD.
Gerasa [Gergesa].	Town.	<i>Jerash.</i>
Gilead.	Mount.	<i>Jebel Osha.</i>

Map of the Tribe of Gad.

Holon, or Horonaim.	Town.	[ <i>Nir</i> ?]
Jaazer.	do.	<i>Seir</i> .
Jabbok.	River.	<i>Wady Zurka</i> .
Jabesh.	Town.	<i>Ed-Dier</i> , on Wady Jabes?
Jazer.	do.	See <i>GAZER</i> .
Jegar-sahadutha.	Stone-heap.	[ <i>El-Jebelbeh</i> ?]
Jogbehah.	Town.	[ <i>El-Jebelbeh</i> ?]
Lo-lebar.	do.	[ <i>Duheret el-Temar</i> ?]
Madma.	do.	<i>Mthueh</i> .
Mahanaim.	do.	See <i>RAMOTH</i> .
Mizpeh.	do.	See <i>BEZTH-NIMRAH</i> .
Nimrah, or Nimrim.	do.	[N. of Wady Zurka.]
Peniel, or Pennel.	do.	
Ramath-mizpeh, or Ramoth-Gil- eal.	do.	<i>Es-Salt</i> .
Rogelim.	do.	[ <i>Ajlun</i> ?]
Shihon.	do.	<i>Shihon</i> .
Sneoth.	do.	[At the Bridge S. of Wady Ajlun?]
Zaphon.	do.	[S. of Wady Zurka.]

The character of the tribe is throughout strongly marked—fierce and warlike—"strong men of might, men of war for the battle, that could handle shield and buckler, their faces the faces of lions, and like roes upon the mountains for swiftness." Such is the graphic description given of those eleven heroes of Gad—"the least of them more than equal to a hundred, and the greatest to a thousand"—who joined their fortunes to David at the time of his greatest discredit and embarrassment (1 Chron. xii, 8), undeterred by the natural difficulties of "flood and field" which stood in their way. Surrounded as they were by Ammonites, Midianites, Hagarites, "Children of the East," and all the other countless tribes, animated by a common hostility to the strangers whose coming had dispossessed them of their fairest districts, the warlike propensities of the tribe must have had many opportunities of exercise. One of its greatest engagements is related in 1 Chron. v, 19-22. Here their opponents were the wandering Ishmaelitic tribes of Jetur, Nephtish, and Nodab (comp. Gen. xxv, 15), nomad people, possessed of an enormous wealth in camels, sheep, and asses, to this day the characteristic possessions of their Bedouin successors. This immense booty came into the hands of the conquerors, who seem to have entered with it on the former mode of life of their victims: probably pushed their way further into the Eastern wilderness in the "steads" of these Hagarites. Another of these encounters is contained in the history of Jephthah, but this latter story develops elements of a different nature and a higher order than the mere fierceness necessary to repel the attacks of the plunderers of the desert. In the behavior of Jephthah throughout that affecting history there are traces of a spirit which we may almost call chivaleresque; the high tone taken with the elders of Gilead, the noble but fruitless expostulation with the king of Ammon before the attack, the hasty vow, the overwhelming grief, and yet the persistent devotion of purpose, surely in all these there are marks of a great nobility of disposition, which must have been more or less characteristic of the Gadites in general. If to this we add the loyalty, the generosity, and the delicacy of Barzillai (2 Sam. xix, 32-39), we obtain a very high idea of the tribe at whose head were such men as these. Nor must we, while enumerating the worthies of Gad, forget that in all probability Elijah the Tishbite, "who was of the inhabitants of Gilead," was one of them.

But, while exhibiting these high personal qualities, Gad appears to have been wanting in the powers necessary to enable him to take any active or leading part in the confederacy of the nation. The warriors, who rendered such assistance to David, might, when Ishbosheth set up his court at Mahanaim as king of Israel, have done much towards affirming his rights. Had Abner made choice of Shechem or Shiloh instead of Mahanaim—the quick, explosive Ephraim instead of the unready Gad—who can doubt that the troubles of David's reign would have been immensely increased, perhaps the establishment of the northern kingdom antedated by nearly a century? David's

presence at the same city during his flight from Absalom produced no effect on the tribe, and they are not mentioned as having taken any part in the quarrels between Ephraim and Judah.

Cut off as Gad was by position and circumstances from its brethren on the west of Jordan, it still retained some connection with them. We may infer that it was considered as belonging to the northern kingdom—"Know ye not," says Ahab in Samaria, "know ye not that Ramoth in Gilead is ours, and we be still, and take it not out of the hand of the king of Syria?" (1 Kings xxii, 3). The territory of Gad was the battlefield on which the long and fierce struggles of Syria and Israel were fought out, and, as an agricultural pastoral country, it must have suffered severely in consequence (2 Kings xx, 33).

Gad was carried into captivity by Tiglath Pileser (1 Chron. v, 26), and in the time of Jeremiah the cities of the tribe seem to have been inhabited by the Ammonites. "Hath Israel no sons? hath he no heir? why doth Malcham (i. e. Moloeh) inherit Gad, and his people dwell in his cities?" (xlix, 1). See *Reiland, Palæst.* p. 162 sq.; *Burckhardt, Trav. in Syria*, p. 345 sq.

2. (Josephus *Γάδος*, *Ant.* vii, 13, 4.) "The seer" (גָּדוֹן), or "the king's seer," i. e. David's—such appears to have been his official title (1 Chron. xxix, 29; 2 Chron. xxix, 25; 2 Sam. xxiv, 11; 1 Chron. xxi, 9)—was a "prophet" (נָבִיא), who appears to have joined David when in "the hold," and at whose advice he quitted it for the forest of Hareth (1 Sam. xxii, 5), B.C. 1061. Whether he remained with David during his wanderings is not to be ascertained; we do not again encounter him till late in the life of the king, when he reappears in connection with the punishment inflicted for the numbering of the people (2 Sam. xxiv, 11-19; 1 Chron. xxi, 9-19), B.C. cir. 1016. But he was evidently attached to the royal establishment at Jerusalem, for he wrote a book (see *CHRONICLES, BOOK OF*) of the Acts of David (1 Chron. xxix, 29), and also assisted in settling the arrangements for the musical service of the "house of God," by which his name was handed down to times long after his own (2 Chron. xxix, 25). In the abruptness of his introduction Gad has been compared with Elijah (Jerome, *Qu. Hebr.* on 1 Sam. xxii, 5), with whom he may have been of the same tribe, if his name can be taken as denoting his parentage, but this is unsupported by any evidence. Nor is there any apparent ground for Ewald's suggestion (*Gesch.* iii, 116) that he was of the school of Samuel. If this could be made out, it would afford a natural reason for his joining David.—Smith, s. v. See *DAVID*.

3. The name *GAD* (with the art. גָּדוֹן; Sept. *δαίμωνιον* v. r. *δαίμων*, or, according to the reading of Jerome and of some MSS., *τύχη*) is mentioned in Isa. lxy, 11 (A. V. "troop"). The word, by a combination with the Arabic, may be legitimately taken to denote *fortune* (see Pococke, *Spec. Hist. Arab.* p. 140). So Gesenius, Hitzig, and Ewald have taken *Gad* in their respective versions of Isaiah, rendering the clause, "who spread a table to fortune." This view, which is the general one, makes fortune in this passage to be an object of idolatrous worship. There is great disagreement, however, as to the power of nature which this name was intended to denote, and, from the scanty data, there is little else than mere opinion on the subject. The majority, among whom are some of the chief rabbinical commentators (see Buxtorf, *Lex. Tal'm.* col. 1034), as well as Gesenius, Münter, and Ewald, consider Gad to be the form under which the planet *Jupiter* was worshipped as the greater star of good fortune (see especially Gesenius, *Comm. über den Jesaja*, ad loc.). Others, among whom is Vitringa, suppose Gad to have represented the *Sun*, while Huetius regards it as a representative of the *Moon*, and Movers, the latest writer of any eminence on Syro-Arabian idolatry, takes it to

have been the planet *Venus* (*Die Phœnicier*, i, 650). See BEL. On the other hand, if *Gad* be derived from גָּד in the sense of *press*, to *crowd*, it may mean a *troop*, a *heap* (to which sense there is an allusion in Gen. xlix, 19); and Hoheisel, as cited in Rosenmüller's *Scholia*, ad loc., as well as Deyling, in his *Obsevat. Miscell.* p. 673, have each attempted a mode by which the passage might be explained if *Gad* and *Meni* were taken in the sense of *troop* and *number* (see further Dav. Mill's diss. ad loc. in his *Diss. Selectæ*, p. 81-132). —Kitto, s. v. See MENI.

Some have supposed that a trace of the Syrian worship of *Gad* is to be found in the exclamation of Leah, when Zilpah bare a son (Gen. xxx, 11), גָּד גָּד, *ba-gad*, or, as the *Keri* has it, גָּד נָגַד, "Gad, or good fortune cometh." The Targum of Pseudo-Jonathan and the Jerusalem Targum both give "a lucky planet cometh," but it is most probable that this is an interpretation which grew out of the astrological beliefs of a later time, and we can infer nothing from it with respect to the idolatry of the inhabitants of Padan Aram in the age of Jacob. That this later belief in a deity Fortune existed, there are many things to prove. Buxtorf (*Lex. Talm.* s. v.) says that anciently it was a custom for each man to have in his house a splendid couch, which was not used, but was set apart for "the prince of the house," that is, for the star or constellation Fortune, to render it more propitious. This couch was called the couch of *Gada*, or good-luck (Talm. Babil. *Sanhed.* f. 20 a; *Nedarim*, f. 56 a). Again, in *Bereshith Rabba*, § 65, the words גָּד גָּד נָגַד, in Gen. xxvii, 31, are explained as an invocation to *Gada* or Fortune. Rabbi Moses the Priest, quoted by Aben-Ezra (on Gen. xxx, 11), says "that גָּד גָּד (Isa. lxx, 11) signifies the star of luck, which points to everything that is good, for thus is the language of *Kedar* (Arabic); but he says that גָּד נָגַד (Gen. xxx, 11) is not used in the same sense." Illustrations of the ancient custom of placing a banqueting table in honor of idols will be found in the table spread for the sun among the Ethiopians (Herod. iii, 17, 18), and in the feast made by the Babylonians for their god Bel, which is described in the apocryphal history of Bel and the Dragon (comp. also Herod. i, 181, etc.). The table in the temple of Belus is described by Diodorus Siculus (ii, 9) as being of beaten gold, 40 feet long, 15 wide, and weighing 500 talents. On it were placed two drinking-cups (*καρχήσα*) weighing 30 talents, two censers of 300 talents each, and three golden goblets, that of Jupiter or Bel weighing 1200 Babylonian talents. The couch and table of the god in the temple of Zeus Tryphilius at Patara, in the island of Panchæa, are mentioned by Diodorus (v, 46; comp. also Virgil, *Æn.* ii, 763). In addition to the opinions which have been referred to above, may be quoted that of Stephen le Moyne (*Var. Sacror.* p. 363), who says that *Gad* is the goat of Mendes, worshipped by the Egyptians as an emblem of the sun; and of Le Clerc (*Comm. in Isa.*) and Lakemacher (*Obs. Phil.* iv, 18, etc.), who identify *Gad* with Heate. Macrobius (*Sat.* i, 19) tells us that in the later Egyptian mythology *Tύχη* was worshipped as one of the four deities who presided over birth, and was represented by the moon. This will perhaps throw some light upon the rendering of the Sept. as given by Jerome. Traces of the worship of *Gad* remain in the proper names Baal *Gad* and Gildeneme (Plant. *Pan.* v, 3), the latter of which Gesenius (*Mon. Phœn.* p. 407) renders גָּד נָגַד, "favoring fortune" (comp. Wirth, *De Gad et Meni Judæorum hodiernorum diis*, Altorf, 1725). —Smith, s. v. See BAAL.

4. For the plant *gad*, see CORIANDER.

**Gadāra** (τὰ Γάδαρα in Josephus, prob. from גָּד, a wall [see GEDERAH]: only in N. T. in the Gentile Γαδάρῳ), a strong city (Josephus, *Ant.* xiii, 13, 3), situated near the river Hieromax (Pliny, *H. N.* v, 16),

east of the Sea of Galilee, over against Scythopolis and Tiberias (Eusebius, *Onomasticon*, s. v.), and 16 Roman miles distant from each of those places (*Itin. Anton.* ed. Wess. p. 196, 198; *Tab. Pent.*), or 60 stadia from the latter (Joseph. *Life*, § 65). It stood on the top of a hill, at the foot of which, upon the banks of the Hieromax, three miles distant, were warm springs and baths called Amatha (*Onom.* s. v. Ætham and Gadara; *Itin. Ant. Martyr.*). Josephus calls it the capital of Peræa (*War.* iv, 3), and Polybius says it was one of the most strongly fortified cities in the country (v, 71, 3). A large district was attached to it, called by Josephus *Gadaritis* (Γαδάρῳ, *War.* iii, 10, 10); Strabo also informs us that the warm healing springs were "in the territory of Gadara" (ἐν τῇ Γαδάρῳ, *Geog.* xvi). They were termed *Thermæ Heliae*, and were reckoned inferior only to those of Baia (Euseb. *Onomast.*). According to Epiphanius (*adv. Hæres.* i, 131), a yearly festival was held at these baths (Reland, p. 775). The caverns in the rocks are also mentioned by Epiphanius (*l. c.*) in terms which seem to show that they were in his day used for dwellings as well as for tombs. Gadara itself is not mentioned in the Bible, but it is evidently identical with the "country of the Gadarenes" (χώρα καὶ περιχώρος τῶν Γαδάρῳν, Mark v, 1; Luke viii, 26, 37).

Gadara seems to have been founded and chiefly inhabited by Gentiles, for Josephus says of it, in conjunction with Gaza and Hippos, "they were Grecian cities" (*Ant.* xvii, 11, 4). The first historical notice of Gadara is its capture, along with Pella and other cities, by Antiochus the Great, in the year B. C. 218 (Joseph. *Ant.* xii, 3, 3). About twenty years afterwards it was taken from the Syrians by Alex. Jannæus, after a siege of ten months (*Ant.* xiii, 13, 3; *War.* i, 4, 2). The Jews retained possession of it for some time; but the place having been destroyed during their civil wars, it was rebuilt by Pompey to gratify his freedman Demetrius, who was a Gadarene (*War.* i, 7, 7). When Gabinius, the proconsul of Syria, changed the government of Judæa by dividing the country into five districts, and placing each under the authority of a council, Gadara was made the capital of one of these districts (*War.* i, 8, 5). The territory of Gadara, with the adjoining one of Hippos, was added by Augustus to the kingdom of Herod the Great (*Ant.* xv, 7, 3); from which, on the death of the latter, it was surrendered, and joined to the province of Syria (Joseph. *War.* ii, 6, 3). According to the present text of the Jewish historian, Gadara was captured by Vespasian on the first outbreak of the war with the Jews, all its inhabitants massacred, and the town itself, with the surrounding villages, reduced to ashes (Joseph. *War.* iii, 7, 1); but there is good reason to believe (see Robinson, *Later Bib. Res.* p. 87, note) that the place there referred to is GABARA (q. v.). However that may have been, Gadara was at this time one of the most important cities east of the Jordan (Joseph. *War.* iv, 8, 3). Stephen of Byzantium (p. 254) reckoned it a part of Cœle-Syria, and Pliny (*Hist. Nat.* v, 16) a part of the Decapolis (comp. William of Tyre, xvii, 13). At a later period it was the seat of an episcopal see in Palæstina Secunda, whose bishops are named in the councils of Nice and Ephesus (Reland, *Palæst.* p. 176, 215, 223, 226). It is also mentioned in the Talmud (Reland, p. 775; Ritter, *Erdk.* xvii, 318). For coins, see Eckhel (*Doctr.* Num. iii, 348). It fell to ruins soon after the Mohammedan conquest, and has now been deserted for centuries,

Coin of Gadara.

with the exception of a few families of shepherds, who occasionally find a home in its rock-hewn tombs.

Most modern authorities (Raumer, in his *Palästina*, Burckhardt, Seetzen) find Gadara in the present village of *Um-Keis*. Buckingham, however, identifies this with Gamala (*Trav. in Palest.* ii, 252 sq.); though it may be added that his facts, if not his reasonings, lead to a conclusion in favor of the general opinion. On a partially isolated hill at the north-western extremity of the mountains of Gilead, about sixteen miles from Tiberias, lie the extensive and remarkable ruins of *Um-Keis*. Three miles northward, at the foot of the hill, is the deep bed of the Sheriat el Mandhür, the ancient Hieromax; and here are still the warm springs of Amatha (see Irby and Mangles, p. 298; Lindsay, ii, 97, 98). On the west is the Jordan valley; and on the south is wady el 'Arab, running parallel to the Mandhür. *Um-Keis* occupies the crest of the ridge between the two later wadys; and as this crest declines in elevation towards the east as well as the west, the situation is strong and commanding. The city formed nearly a square. The upper part of it stood on a level spot, and appears to have been walled all round, the acclivities of the hill being on all sides exceedingly steep. The eastern gate of entrance has its portals still remaining. The prevalent orders of architecture are the Ionic and the Corinthian. The whole space occupied by the ruins is about two miles in circumference, and there are traces of fortifications all round, though now almost completely prostrate. These ruins bear testimony to the splendor of ancient Gadara. On the northern side of the hill is a theatre, and not far from it are the remains of one of the city gates. At the latter a street commences—the *via recta* of Gadara—which ran through the city in a straight line, having a colonnade on each side. The columns are all prostrate. On the west side of the hill is another larger theatre in better preservation. The principal part of the city lay to the west of these two theatres, on a level piece of ground. Now not a house, not a column, not a wall remains standing; yet the old pavement of the main street is nearly perfect, and here and there the traces of the chariot-wheels are visible on the stones, reminding one of the thoroughfares of Pompeii. Buckingham speaks of several grottoes, which formed the necropolis of the city, on the eastern brow of the hill. The first two examined by him were plain chambers hewn down so as to present a perpendicular front. The third tomb had a stone door, as perfect as on the day of its being first hung. The last was an excavated chamber, seven feet in height, twelve paces long, and ten broad; within it was a smaller room. Other tombs were discovered by Buckingham as he ascended the hill. He entered one in which were ten sepulchres, ranged along the inner wall of the chamber in a line, being pierced inward for their greatest length, and divided by a thin partition left in the rock, in each of which was cut a small niche for a lamp. Still more tombs were found, some containing sarcophagi, some without them; all, however, displaying more or less of architectural ornament. One of the ancient tombs was, when our traveller saw it, used as a carpenter's shop, the occupier of it being employed in constructing a rude plough. A perfect sarcophagus remained within, which was used by the family as a provision-chest. See Burckhardt, *Syria*, p. 270 sq.; Porter, in *Journal of Sac. Lit.* vi, 281 sq.; Hackett, *Illustr. of Script.* p. 190; Traill's *Josephus*, i, 145.

Gadara derives its greatest interest from having been the scene of our Lord's miracle in healing the dæmoniacs (Matt. viii, 28-34; Mark v, 1-21; Luke viii, 26-40). "They wore no clothes, neither abode in any house, but in the tombs." Christ came across the lake from Capernaum, and landed at the south-eastern corner, where the steep, lofty bank of the eastern plateau breaks down into the plain of the Jordan. The dæmoniacs met him a short distance from the

shore; on the side of the adjoining declivity the "great herd of swine" were feeding; when the dæmons went among them the whole herd rushed down that "steep place" into the lake and perished; the keepers ran up to the city and told the news, and the excited population came down in haste, and "besought Jesus that he would depart out of their coasts." The whole circumstances of the narrative are thus strikingly illustrated by the features of the country. Another thing is worthy of notice. The most interesting remains of Gadara are its *tombs*, which dot the cliffs for a considerable distance round the city, chiefly on the north-east declivity, but many beautifully-sculptured sarcophagi are scattered over the surrounding heights. They are excavated in the limestone rock, and consist of chambers of various dimensions, some more than 20 feet square, with recesses in the sides for bodies. The doors are slabs of stone, a few being ornamented with panels; some of them still remain in their places (Porter, *Damascus*, ii, 54). The present inhabitants of *Um-Keis* are all troglodytes, "dwelling in tombs," like the poor maniacs of old, and occasionally they are almost as dangerous to the unprotected traveller.—In the above account, in the Gospel of Matt. (viii, 28), we have the word *Gergesenes* (Γεργεσηνῶν, instead of Γαδάρηνῶν), which seems to be the same as the Hebrew גֵּרְגֵּסַיִם (Sept. Γεργεσαῖος) in Gen. xv, 21, and Deut. vii, 1—the name of an old Canaanitish tribe [see GERGASSITES], which Jerome (*in Comm.* ad Gen. xv) locates on the shore of the Sea of Tiberias. Origen also says (*Opp.* iv, 140) that a city called *Gergesa* anciently stood on the eastern side of the lake. Even were this true, still the other Gospels would be strictly accurate. Gadara was a large city, and its district would include *Gergesa*. But it must be remembered that the most ancient MSS. give the word Γερασηνῶν, while others have Γαδάρηνῶν—the former reading is adopted by Griesbach and Lachmann, while Schoiz prefers the latter; and either one or other of these seems preferable to Γεργεσηνῶν.—Smith, s. v.; Kitto, s. v. See GERASA.

**Gadarene** (Γαδάρηνός), an inhabitant of GADARA (q. v.), occurring only in the account of the dæmoniacs cured by Christ (Mark v, 1; Luke viii, 26, 37), and perhaps to be read in the third Evangelist (Matt. viii, 28) instead of GERGSENE (q. v.).

**Gaddah**. See HAZAR-GADDAH.

**Gad'di** (Heb. *Gaddi'*, גַּדִּי, *fortunate*; Sept. Γαδδῖ), son of Susi, of the tribe of Manasseh, sent by Moses as the representative of that tribe among the twelve "spies," on their exploring tour through Canaan (Numb. xiii, 11). B.C. 1657.

**Gad'diel** (Heb. *Gaddiel'*, גַּדְיֵל, *fortune* [i. e. *sent*] of God; Sept. Γαδδῖήλ v. r. Γουδῖήλ), son of Sodi, of the tribe of Zebulun. He represented that tribe among the twelve "spies" sent by Moses to explore Canaan (Numb. xiii, 10). B.C. 1657.

**Gader**. See BETU-GADER.

**Gad'ite** (Heb. *Gadi'*, גַּדִּי, a *Gadite*; Sept. Γαδί v. r. Γαδῖ and Γαδῖ), the father of the usurper Menahem, who slew Shallum, king of Israel (2 Kings xv, 14, 17). B.C. ante 769.

**Gad'ite** (Heb. *Gadi'*, גַּדִּי, mostly collect. and with the art.; Sept. Γαδί, Γαδί, *v. r.* Γαδί, etc.), the descendants of GAD (q. v.), the son of Jacob (Numb. xxxiv, 14; Deut. iii, 12, 16; iv, 43; xxix, 8; Josh. i, 12; xii, 6; xiii, 8; xxii, 1; 2 Sam. xxiii, 36; 2 Kings x, 33; 1 Chron. v, 18, 26; xii, 8, 37; xxvi, 32).

**Gadsden**, CHRISTOPHER, D.D., Protestant Episcopal bishop of South Carolina, was born in Charleston Nov. 25, 1785. His early training was partly Episcopal and partly Congregational. In 1804 he passed A.B. of Yale College, where he formed a lasting friendship with John C. Calhoun. He was ordained deacon

in 1807, and priest in 1810. In 1808 he took charge of St. John's, Berkley, and soon after became assistant minister of St. Philip's, Charleston, of which he became rector in 1814, and in connection with which he spent the residue of his life. In 1810 he founded the Protestant Episcopal Society in South Carolina, which has proved an important auxiliary to clerical education and missionary effort. In 1814 he became rector of St. Philip's, Charleston, and the following year was made D.D. by the College of S. C. He was elected bishop in 1840, and in the earnest discharge of his duties gave particular attention to the spiritual interests of the colored people. He was distinguished for thorough learning and deep piety. He died in Charleston June 24, 1852. He published *The Prayer-book as it is*; three chapters to his clergy, entitled *The Times morally considered*, *The Times ecclesiastically considered*, and *The Times theologically considered*; and some Sermons.—*Sprague, Annals*, v, 510.

**Gaetanus.** See CAJETAN.

**Gafarel, Jacques**, a French mystic, was born at Mannes, in Provence, in 1601, and studied at Valence. He showed special aptitude for Oriental and cabalistic studies, and was made librarian at Paris to cardinal Richelieu. In 1625 he published *Abditæ divinæ Cabalæ Mysteria* (4to); and got into trouble by *Curiositez innuoyez sur la sculpture talismanique des Persans* (Paris, 1629-30, also 1631, 1637, and in Latin, *Curiositates Innuoytæ* [Hamburg, 1706, 8vo]), which was condemned by the Sorbonne. In 1632 he went to Rome, and became intimate with Leo Allatius. He travelled in Italy, Greece, and Asia; and on his return to Paris received several valuable Church preferments. He devoted himself to reclaiming Protestants, but was himself charged with preaching against purgatory. Bayle hints that he did this by order, in order to seduce Protestants. He died in 1681. Among his writings, other than those mentioned, are *Dies Domini, sive de fine mundi*, etc. (Paris, 1629, 12mo):—*Index Codicum cabalisticorum quibus usus est Joannes Mirambolanus* (Paris, 1651):—*Histoire universelle du monde souterrain* (1666, fol.).—Bayle, *Dictionary*, s. v.; Hoefler, *Nouv. Biog. Générale*, xix, 146.

**Gage, Thomas**, an English divine, noted especially for his conversion from Roman Catholicism, was born in Haling, in Surrey, about 1597. He entered into the Dominican order in Spain, after which he was sent as a missionary to the Philippine Islands; but instead of going thither, he went to Mexico, and then to Guatemala, where he spent ten years in missionary labors among the Indians. He returned to England in 1637, after an absence of twenty-four years, during which he had forgotten his native language. On examining into his domestic affairs, he found himself unnoticed in his father's will, forgotten by some of his relations, and with difficulty acknowledged by others. While abroad he had imbibed doubts of Romanism, and now he resolved to take another journey to Italy, to "try what better satisfaction he could find for his conscience at Rome in that religion." At Loretto his conversion from Popery was completed by his observation of the false miracles attributed to the picture of the Virgin there, and on his return home he preached a recantation sermon at St. Paul's, by order of the bishop of London. He continued above a year in London, but soon received from the parliamentary party the living of Deal, in Kent. His accounts of the West Indies and Spanish America gave rise to the expedition of admiral Penn against Jamaica in 1655. Page accompanied the fleet, and died of dysentery at Jamaica (1655). He published his *Recantation Sermon* (1642); a piece entitled *A Duel fought between a Jesuit and a Dominican* (4to); and *Survey of the West Indies* (1648, and again in 1655, fol.). This work was greatly admired, and was soon translated into most European languages. See Hook, *Eccles. Biogr.* v, 243; Eclard,

*Script. Ord. Predicatorum*, vol. ii; Hoefler, *Nouv. Biog. Générale*, xix, 151.

**Gage, William**, a Presbyterian minister, was born in Salem, Mass., Nov. 16, 1797. He graduated at Amherst College in 1828, then entered Andover Theological Seminary, where he graduated in 1831. He was licensed to preach the same year, and was settled in 1832 pastor over the churches of Concord and Pisgah, Ohio, where he remained until his death. He early espoused the anti-slavery views for which the presbytery of Chillicothe has been so long distinguished. Upon one occasion his house was pelted with eggs and stones, and he himself was threatened with tar and feathers if he would not desist from preaching and praying on the subject. He kept on in his course, however. He died July 9, 1863.—Wilson, *Presbyterian Almanac*, vi, 150.

**Gagelin, François Isidore**, a French missionary and martyr, was born at Mont-Pereux (Doubs), May 5, 1799, and educated at Besançon, and at the seminary of Foreign Missions at Paris. Having been appointed subdeacon, he embarked at Bordeaux in Dec., 1820, for Cochin China, and in 1822 was consecrated priest by Bishop Labarthe. The Christian religion had been tolerated in Cochin China since April 22, 1774, but the example of Tonquin, where it was strictly prohibited, was not without influence. In 1820 Miim-Mehn ascended the throne, and soon gave evidences of his dislike towards the new religion, yet did not begin persecuting the Christians until 1826. At that time the bonzes and mandarins addressed a petition to the emperor, asking for the expulsion of the missionaries. The Jesuits, becoming alarmed, fled; but Gagelin, less fortunate than his colleagues, was arrested and brought back to Hue-Fo. He was, however, permitted to continue his missionary efforts, and in 1828 was allowed to settle in the province of Dong Nai; but a strife between the different sects led to a general edict against the Christians, Jan. 6, 1833. Gagelin was again taken to Hue, and hung, Oct. 11, 1835.—François Pèrennes, *Vie de l'abbé Gagelin* (Besançon, 1836, 12mo); Hoefler, *Nouv. Biog. Générale*, xix, 154 sq. (J. N. P.)

**Gagnier, Jean**, a French divine and Orientalist, was born in Paris about 1670. He was bred a Roman Catholic, entered into holy orders, and became a canon in the abbey of St. Genevieve, but became a Protestant and settled in England. He was patronized by archbishop Sharp and other eminent persons, and received the degree of M.A. at Cambridge and Oxford. He obtained the Arabic professorship at Oxford in 1715, and died in 1740. He published an edition of Ben Gorion's "History of the Jews," in Hebrew, with a Latin translation and notes (Oxf. 1706, 4to):—*L'indicie Kirchriane* (Oxf. 1718, fol.):—*L'église Romaine contrairement d'idolatrie* (La Haye, 1706, 8vo):—*Vie de Mahomet, traduite et compilée de l'Alcoran* (Amst. 1732, 2 vols.).—Hoefler, *Nouv. Biog. Génér.* xix, 166.

**Ga'ham** (Heb. *Gach'am*, גַּחַם, "in pause" *Ga'cham*, גַּחַם; perhaps, *having flaming eyes*; otherwise, *swarthy*; Sept. Γαῆμ v. r. Ταῆμ), one of the sons of Nabor by his concubine Reumah (Gen. xxii, 24), B.C. cir. 2200.

**Ga'har** (Heb. *Gach'ar*, גַּחַר, "in pause" *Ga'char*, גַּחַר; a *lurking-place*; Sept. Γαῆρ), one of the chief Nethinim whose descendants returned with Zerubbabel from the captivity to Jerusalem (Ezra ii, 47; Neh. vii, 49), B.C. ante 536.

**Gaianitæ.** A Monophysite sect of the 6th century, which derived its name from Gaianus, bishop of Alexandria, who denied that Jesus Christ, after the hypostatical union, was subject to any of the infirmities of human nature. See EUTYCHANISM.

**Gailer of Kaisersburg.** See GEILER.

**Gaillard, Jacques**, a French Protestant theo-

gian, was born at Montauban towards 1620. He became professor of philosophy in the Protestant academy of that city, but in 1659, certain disorders arising in the schools, he was expelled from Montauban, and resolved to quit the country. He went to Holland, and in 1662 became pastor of the Walloon church of Bois-le-Duc. He was subsequently director of the College of Leyden, and afterwards professor of theology in the university. He wrote *Genealogia Christi, cum enodatione difficultatum que occurrunt in evangelis Matthæi et Lucæ* (Leyden, 1683, 8vo);—*Melchisedecus Christus, unus rex justitie et rex pacis, seu exercitationes xii de Melchisedeco* (Leyd. 1686, 8vo). See E. Benoit, *Hist. de l'Édit de Nantes* (iii, p. 320-322; Bayle, *Nouv. de Li République des Lettres* (1684); Haag, *La France Protestante*, s. v.

**Gaisford**, THOMAS, D.D., an English divine and eminent classical scholar, was born in Wiltshire, Dec. 22, 1779. He was educated at Winchester school, where he was noted for his proficiency in Greek. He entered Christ Church, Oxford, in 1797, and was elected a student in 1800 by the unanimous suffrage of the chapter. He proceeded B.A. June 3, 1801, and M.A. April 11, 1801. He acted for several years as tutor in his college. His edition of the *Enchiridion of Iulianus*, published in 1810, established his reputation as an accurate and profound scholar. In 1811 he was made regius professor of Greek, and, after a number of valuable preferments, in 1831 he was made dean of Christ Church, which office he filled most ably till his death, June 2, 1855. So high was his reputation as a classical scholar that he was elected a member of the Institute of France and of the Royal Academy of Munich. In private life he "did justly, loved mercy, and walked humbly before God." The list of his classical publications is too great to be published here; among them were editions, in whole or in part, of Euripides, Plato, Aristotle, Herodotus, Sophocles. In theological literature he edited, besides other works, the following: *Cherubosci Dictata in Theodosii Canonibus, necnon Epimerismi in Psalmos* (3 vols. 1842);—*Eusebii Eclogæ Prophetice* (1842);—*Eusebii Præparatio Evangelicæ* (1843);—*Pearsoni Adversaria Hæsiatica* (2 vols. 1844);—*Etymologicum Anonymum* (fol. 1848);—*Vetus Testamentum ex Versione LXX Interp.* (3 vols. 12mo, 1848);—*Stobæi Eclogæ Physicæ et Ethicæ* (2 vols. 1850);—*Eusebii contra Hieroclem et Marcellum* (1852);—*Eusebii Demonstratio Evangelicæ* (2 vols. 8vo, 1852);—*Theodoretii Historia Ecclesiastica* (1854).—Hardwick, *Annual Biogr.* (Lond. 1850, 12mo).

**Gaius** (Γάιος, for Lat. *Caius*, a common Roman name), the name of three or four men in the N. T.

1. A Macedonian, and fellow-traveller of Paul, who was seized by the populace at Ephesus (Acts xix, 29), A.D. 54.

2. A man of Derbe (an epithet which some have very unnaturally transferred to Timothy) who accompanied Paul in his last journey to Jerusalem (Acts xx, 4), A.D. 55.

3. An inhabitant of Corinth with whom Paul lodged, and in whose house the Christians were accustomed to assemble (Rom. xvi, 23; 1 Cor. i, 14), A.D. 55. He was perhaps the same with one of the preceding.

4. A Christian (probably of Asia Minor) to whom John addressed his third epistle (3 John 1), A.D. cir. 92. See JOHN, EPISTLES OF. There is no good reason for regarding him as identical with either of the foregoing (Wolf, *Curæ*, ad loc.).

**Gaius**, DR. See CAIUS.

**Gal**, SAINT. See GALL.

**Gal'aad** (Γαλαάδ, 1 Macc. v, 9, 55; Jud. i, 8; xv, 5) and THE COUNTRY OF GALAAD (ἡ Γαλααδίτις, *Galaditis*, 1 Macc. v, 17, 20, 25, 27, 36, 45; xiii, 22), a Græcized form of the word GILEAD (q. v.).

**Gal'al** (Heb. *Galal'*, גַּלְגַּל, perhaps *weighty*; Sept. Γωλίλ, Γαλιλ, Γαλαάλ), the name of two Levites after the exile.

1. A descendant of Jeduthun, and father of Shemai-ah or Shammai (1 Chron. ix, 16; Neh. xi, 17), B.C. ant. 536.

2. One of those who dwelt in the villages of the Netophathites and served at Jerusalem (1 Chron. ix, 15), A.D. 536.

**Galanos**, DEMETRIOS, a Greek scholar, was born in Athens in 1760. He studied at Missolonghi, and subsequently at Patmos, where he remained six years perfecting himself in Greek learning. At the end of this time he was sent for by his uncle, Gregory, bishop of Cæsarea, who desired him to enter the priesthood. But Demetrios was resolved to devote himself to letters, and went to Calcutta as tutor in the family of a wealthy Greek in 1786. "After remaining six years in Calcutta, pursuing the study of the English, and also of the Sanscrit, Persian, and other Oriental languages, in addition to his duties as an instructor, he resolved to devote himself henceforth wholly to philosophy. Investing the property which he had acquired while there in a commercial establishment, he removed to Benares. Here he assumed the dress of a Brahmin, and lived in this way for forty years, respected alike by the native population and by European residents. He undertook the task of translating the most important portions of the Brahmical literature relating to philosophy into Greek. When he was seventy years old he began to think of returning to his native land, but he died with this wish unfulfilled, May 3, 1833. He bequeathed to the University of Otho, at Athens, all his library, consisting of Sanscrit books and MS. translations from them into Greek. Six or eight volumes of these translations have been published by the librarian of the university, and are found in the collection of modern Greek literature in the library of Harvard University. In this selection are included translations of the Vhagavata Purana, the Gita, the Dourga, and a portion, or, rather, an epitome of the Mahabharata, the most extensive and the most celebrated of all the works of Indian literature."—*Watchman and Reflector*, Nov. 7, 1861.

**Galante**, ABRAHAM ben-Mordecai, a Cabalist and Jewish commentator of the 16th century. He was a disciple of the new-school Cabalist, Moses Cordovero, and is best known by his mystical commentary on the Lamentations (קִינֵי תִּירְיָה קִינֵי בְּרָכָה), published, with additions, by Ibn-Shoëb under the title קִינֵי בְּרָכָה (Venice, 1589; 2d ed. Prague, 1621). Galante wrote also a commentary on the Sohar (or Zohar) (q. v.), entitled קִינֵי הַקָּדוֹשׁ, extending over the Pentateuch, but of which only the first part, on Genesis, was printed under the title קִינֵי הַקָּדוֹשׁ (Venice, 1655). The MS. of the unpublished parts of this work remain unedited in the Oppenheim Library. Jost (p. 237) says that the name of Galante's father was originally Mordecai *Angelo*, but that he, on account of his beauty, was called Galante, or, rather, Galant'uomo, in Rome, where he lived. When his sons, Abraham and Moses, afterwards emigrated to Palestine, they retained the new name of their father.—Jost, *Gesch. d. Juden-thums u. s. Sekten*, iii, 150; Etheridge, *Introd. to Hebr. Lit.* p. 360, 418; Fürst, *Bibl. Jud.* i, 313. (J. II. W.)

**Galante**, MOSES ben-Mordecai, brother of Abraham (see above), was president of the celebrated Jewish college for rabbins at Safed. His קִינֵי הַקָּדוֹשׁ, *Index to Sohar (Zohar)* (Venice, 1666; 2d ed. Frankf. a. M. 1681), explains all the passages of the O. T. occurring in the Zohar (q. v.). This book exhibits the manner in which the Messianic passages of the Old Test. are treated in the Talmud and Cabbala. We have also from him a commentary on Eccle-

siastes (קָהֵלֵי רַגְלֵי, Saged, 1578), which is illustrated throughout with extracts from the Sohar. The time of his death is a matter of much dispute. Robinson (*Biblical Researches in Palestine*, ii, 430) and Fürst give it 1618; Steinschneider (*Catal. lit. hebr. in Biblioth. Bodliana*) places it much earlier, but Jost says that he was sixty-eight years old at the time of his death (1689), which would be impossible, as Abraham Galante is said to have died about 1600.—Kitto, *Encyclop. of Bib. Lit.* ii, 52; Jost, *Gesch. d. Judenthums u. s. Sektén*, iii, 237; Fürst, *Bibl. Jud.* i, 313. (J. H. W.)

**Galat'ia** (Γαλατία, also [Acts xvi, 6; xviii, 23] ἡ Γαλατικὴ χώρα), an important central district of Asia Minor (q. v.).

Galatia is literally the "Gallia" of the East. Roman writers call its inhabitants *Galli*, just as Greek writers call the inhabitants of ancient France *Γάλαται* (see Pritchard, *Nat. Hist. of Man*, iii, 95). From the intermixture of Gauls and Greeks (Pausan. i, 4), Galatia was also called *Gallo-Grecia* (Γαλλογρακία, Strabo, xii, 5), and its inhabitants Gallo-Graeci. But even in Jerome's time they had not lost their native language (*Prolog. ad Comment. in Ep. ad Gal.*; De Wette's *Lehrbuch*, p. 231). In 2 Tim. iv, 10, some commentators suppose Western Gaul to be meant, and several MSS. have *Γαλιαν* instead of *Γαλατιαν*. In 1 Macc. viii, 2, where Judas Maccabeus is hearing the story of the prowess of the Romans in conquering the *Γάλαται*, it is possible to interpret the passage either of the Eastern or Western Gauls; for the subjugation of Spain by the Romans, and the defeat of Antiochus, king of Asia, are mentioned in the same context. Again, *Γάλαται* is the same word with *Κέλται*; and the Galatians were in their origin a stream of that great Celtic torrent (apparently Kymry, and not Gael) which poured into Macedonia about B.C. 280 (Strabo, iv, 187; xii, 566; Livy, xxxviii, 16; Flor. ii, 11; Justin, xxv, 2; Appian, *Syr.* xxxii, 42). Some of these invaders moved on into Thrace, and appeared on the shores of the Hellespont and Bosphorus, when Nicomedes I, king of Bithynia, being then engaged in a civil war, invited them across into Asia Minor to assist him against his brother, Zybectas (Mennon, *op. Phot. Cod.* 224, p. 374), B.C. cir. 270. Having accomplished this object, they were unwilling to retrace their steps; and, strengthened by the accession of fresh hordes from Europe, they overran Bithynia and the neighboring countries, and supported themselves by predatory excursions, or by imposts exacted from the native chiefs. Antiochus I, king of Syria, took his title of Soter in consequence of his victory over them. After the lapse of forty years, Attalus I, king of Pergamus, succeeded in checking their nomadic habits, and confined them to a fixed territory within the general geographical limits, to which the name of Galatia was permanently given. The Galatians still found vent for their restlessness and love of war by hiring themselves out as mercenary soldiers. This is doubtless the explanation of 2 Macc. viii, 20, which refers to some struggle of the Seleucid princes in which both Jews and Galatians were engaged. In Josephus (*War*, i, 20, 3) we find some of the latter, who had been in Cleopatra's body-guard, acting in the same character for Herod the Great. Meanwhile the wars had been taking place which brought all the countries round the east of the Mediterranean within the range of the Roman power. The Galatians fought on the side of Antiochus at Magnesia. In the Mithridatic war they fought on both sides. Of the three principal tribes (Strabo, xiii, 429), the Troemi (Τρόεμοι) settled in the eastern part of Galatia, near the banks of the Halys; the Teetosages (Τεκτόσαγες) in the country round Ancyra; and the Tolistobogii (Τολισταβόγιοι) in the south-western parts near Pessinus. They retained their independence till the year B.C. 189, when they were brought under the power of Rome by the pro-

consul Cn. Manlius (Livy, xxxviii; Polyb. xxii, 24), though still governed by their own princes. Their government was originally republican (Pliny, v, 42), but at length regal (Strabo, xii, 390), Deiotarus being their first king (Cicero, *pro Deiot.* 13), and the last Amyntas (Dio Cass. xlix, 32), at whose death, in the year B.C. 25, Galatia became a province under the empire (see Ritter, *Erdkunde*, xviii, 597-610).

Coin of Galatia, with the Head of the Roman Emperor.

The Roman province of Galatia may be roughly described as the central region of the peninsula of Asia Minor, with the provinces of Asia on the west, Cappadocia on the east, Pamphylia and Cilicia on the south, and Bithynia and Pontus on the north (Strabo, xii, 566; Pliny, v, 42; Ammian. Marcell. xxv, 10). It would be difficult to define the exact limits. In fact, they were frequently changing. (See Smith's *Diet. of Class. Geogr.* s. v.) Under the successors of Augustus, the boundaries of Galatia were so much enlarged that it reached from the shores of the Euxine to the Pisidian Taurus. In the time of Constantine a new division was made, which reduced it to its ancient limits; and by Theodosius I, or Valens, it was separated into *Galatia Prima*, the northern part, occupied by the Troemi and Teetosages, and *Galatia Secunda*, or *Salutaris*: Ancyra was the capital of the former, and Pessinus of the latter. Thus at one time there is no doubt that this province contained Pisidia and Lycæonia, and therefore those towns of Antioch, Iconium, Lystra, and Derbe, which are conspicuous in the narrative of Paul's travels. But the characteristic part of Galatia lay northward from those districts. On the mountainous (Flor. ii, 12), but fruitful (Strabo, xii, 567) table-land between the Sangarius and the Halys, the Galatians were still settled in their three tribes, the Teetosages, the Tolistobogii, and the Troemi, the first of which is identical in name with a tribe familiar to us in the history of Gaul, as distributed over the Cevennes near Toulouse (Cæsar, *Bell. Gall.* iv, 24; comp. Jablonsky, *De Lingua Lycaonica*, p. 23 sq.). The three capitals were respectively Tavium, Pessinus, and Ancyra. The last of these (the modern Angora) was the centre of the roads of the district, and may be regarded as the metropolis of the Galatians. These Eastern Gauls preserved much of their ancient character, and something of their ancient language. At least Jerome says that in his day the same language might be heard at Ancyra as at Trèves; and he is a good witness, for he himself had been at Trèves. The prevailing speech, however, of the district was Greek (Livy, xxxvii, 8; xxxviii, 12; Flor. ii, 11; see Spanheim, *ad Callim. Del.* 184). Hence the Galatians were called Gallogreci (Manlius in Livy, xxxviii, 17). The inscriptions found at Ancyra are Greek, and Paul wrote his epistle in Greek. (See *Penny Cyclopadia*, s. v. Celtæ, Galatia; Mannert's *Geographie der Griechen und Römer*, vi, 3, ch. 4; Merleker's *Lehrbuch der Historisch-comparativen Geographie*, iv, 1, p. 284.)

It is difficult, at first sight, to determine in what sense the word Galatia is used by the writers of the N. T., or whether always in the same sense. In the Acts of the Apostles the journeys of Paul through the district are mentioned in very general terms. We are simply told (Acts xvi, 6) that on his second missionary circuit he went with Silas and Timothy "through Phrygia and the region of Galatia" (ὡὰ τὴν Φρυγιαν καὶ τὴν

Γαλατικὴν χώραν). From the Epistle, indeed, we have this supplementary information, that an attack of sickness (*δι' ἀσθένειαν τῆς σαρκός*, Gal. iv, 13) detained him among the Galatians, and gave him the opportunity of preaching the Gospel to them, and also that he was received by them with extraordinary fervor (ib. 14, 15); but this does not inform us of the route which he took. So on the third circuit he is described (Acts xviii, 23) as "going over all the country of Galatia and Phrygia in order" (*διερχόμενος καθέξῃς τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*). We know from the first Epistle to the Corinthians that on this journey Paul was occupied with the collection for the poor Christians of Judæa, and that he gave instructions in Galatia on the subject (*ὡςπερ ἐπέταξα ταῖς ἐκκλησίαις τῆς Γαλατίας*, 1 Cor. xvi, 1); but here again we are in doubt as to the places which he had visited. We observe that the "churches" of Galatia are mentioned here in the plural, as in the opening of the Epistle to the Galatians themselves (Gal. i, 2). From this we should be inclined to infer that he visited several parts of the district, instead of residing a long time in one place, so as to form a great central church, as at Ephesus and Corinth. This is in harmony with the phrase *ἡ Γαλατικὴ χώρα*, used in both instances. Since Phrygia is mentioned first in one case, and second in the other, we should suppose that the order of the journey was different on the two occasions. Phrygia also being not the name of a Roman province, but simply an ethnographical term, it is natural to conclude that Galatia is used here by Luke in the same general way. In confirmation of his view, it is worth while to notice that in Acts ii, 9, 10, where the enumeration is ethnographical rather than political, Phrygia is mentioned, and not Galatia, while the exact contrary is the case in 1 Pet. i, 1, 2, where each geographical term is the name of a province (see Conybeare and Howson, *Life and Epistles of St. Paul*, i, 243).

The Epistle to the Galatians was probably written very soon after Paul's second visit to them. Its abruptness and severity, and the sadness of its tone, are caused by their sudden perversion from the doctrine which the apostle had taught them, and which at first they had received so willingly. It is no fancy if we see in this fickleness a specimen of that "impetuous, mobile, impressible spirit" which Thierry marks as characteristic of the Gaulish race (*Hist. des Gaulois*, Intro. iv, v). From Josephus (*Ant.* xvi, 6, 2) we know that many Jews were settled in Galatia, but Gal. iv, 8 would lead us to suppose that Paul's converts were mostly Gentiles. The view advocated by Böttger (*Schauplatz der Wirkbarkeit des Apostels Paulus*, p. 28-30, and the third of his *Beiträge*, p. 1-5) is that the Galatia of the Epistle is entirely limited to the district between Derbe and Colossæ, i. e. the extreme southern frontier of the Roman province. On this view the visit alluded to by the apostle took place on his first missionary circuit, and the *ἀσθένεια* of Gal. iv, 13 is identified with the effects of the stoning at Lystra (Acts xiv, 19). Geographically this is not impossible, though it seems unlikely that regions called Pisidia and Lycaonia in one place should be called Galatia in another. Böttger's geography, however, is connected with a theory concerning the date of the Epistle (see Rückert, in his *Mog. 12., für Euseb., i*, 98 sq.), and for the determination of this point we must refer to the article on the GALATIANS, THE EPISTLE TO THE. (See Schmidt, *De Galatiis* [Hfeld. 1748, 1784]; Mynster, *Kleine theol. Schrift.* p. 60 sq.; Cellarii *Notit.* ii, 173 sq.; Forbiger, *Alle Geogr.* ii, 361 sq.; Hofmann, *De Galatia Antiqua* [Lips. 1726]; Wernsdorf, *De republ. Galatar.* [Norimb. 1743]; Hamilton, *Asia Minor*, i, 379).—Smith, s. v.; Kitto, s. v.

**GAL'atian** (Γαλατία), the patral designation (1 Macc. viii, 2; 2 Macc. viii, 20; Gal. iii, 1) of an inhabitant of GALATIA (q. v.).

**GALATIANS, EPISTLE TO THE**, the fourth in or-

der of the Pauline epistles of the N. T., entitled simply, according to the best MSS. (see Tischendorf, *N. T. ad loc.*), *πρὸς Γαλάτας*. (See the *Mercersburg Review*, Jan. 1861.)

I. *Authorship.*—With regard to the genuineness and authenticity of this epistle, no writer of any credit or respectability has expressed any doubts. Its Pauline origin is attested not only by the superscription which it bears (i, 1), if this be genuine, but also by frequent allusions in the course of it to the great apostle of the Gentiles (comp. i, 13-23; ii, 1-14). It is corroborated also by the style, tone, and contents of the epistle, which are perfectly in keeping with those of the apostle's other writings. The testimony of the early Church on this subject is most decided and unanimous (see Lardner, *Works*, vol. ii). Besides express references to the epistle (Irenæus, *Her.* iii, 7, 2; v, 21, 1; Tertullian, *De Præscr.* ch. 60, *al.*), we have one or two direct citations found as early as the time of the apostolic fathers (Polyc. *ad Phil.* ch. 3), and several apparent allusions (see Davidson, *Introd.* ii, 318 sq.). The attempt of Bruno Bauer (*Kritik der Paulin. Briefe*, Berlin, 1850) to demonstrate that this epistle is a compilation of later times, out of those to the Romans and to the Corinthians, has been treated by Meyer with a contempt and a severity (*Torrede*, p. vii; *Eindeut.* p. 8) which, it does not seem too much to say, are completely deserved.

II. *Occasion, etc.*—The parties to whom this characteristic letter was addressed are described in the epistle itself as "the churches of Galatia" (i, 2; comp. iii, 1) in Asia Minor, otherwise called Gallogræcia (Strabo, xii, 566)—a province that bore in its name its well-founded claim to a Gallic or Celtic origin (Pausanias, i, 4), and that now, after an establishment, first by predatory conquest, and subsequently by recognition but limitation at the hands of neighboring rulers (Strabo, *l. c.*; Pausanias, iv, 5), could date an occupancy, though not an independence, extending to more than three hundred years; the first subjection of Galatia to the Romans having taken place in B. C. 189 (Livy, xxxviii, 16 sq.), and its formal reduction (with territorial additions) to a regular Roman province in A. D. 26. See GALATIA. Into this district the Gospel was first introduced by Paul himself (Acts xvi, 6; Gal. i, 8; iv, 13, 19). Churches were then also probably formed, for on revisiting this district some time after his first visit it is mentioned that he "strengthened the disciples" (Acts xviii, 23). These churches seem to have been composed principally of converts directly from heathenism (ch. iv, 8), but partly, also, of Jewish converts, both pure Jews and proselytes. Unhappily, the latter, not thoroughly emancipated from early opinions and prepossessions, or probably influenced by Judaizing teachers who had visited these churches, had been seized with a zealous desire to incorporate the rites and ceremonies of Judaism (especially circumcision, ch. v, 2, 11, 12; vi, 12 sq.) with the spiritual truths and simple ordinances of Christianity. (See Cruse, *De statu Galatarum*, etc., Hafn. 1722.) So active had this party been in disseminating their views on this head through the churches of Galatia, that the majority at least of the members had been seduced to adopt them (i, 6; iii, 1, etc.). To this result it is probable that the previous religious conceptions of the Galatians contributed; for, accustomed to the worship of Cybele, which they had learned from their neighbors the Phrygians, and to theosophic doctrines with which that worship was associated, they would be the more readily induced to believe that the fulness of Christianity could alone be developed through the symbolical adumbrations of an elaborate ceremonial (Neander, *Apostolisches Zeitalter*, 2d edit. p. 400). It would seem that on his last visit to this region, Paul found the leaven of Judaism beginning to work in the churches of Galatia, and that he then warned them against it in language of the most decided character (comp. i,

9; v, 3). From some passages in this epistle (e. g. i, 11-24; ii, 1-21) it would appear also that insinuations had been disseminated among the Galatian churches to the effect that Paul was not a divinely-commissioned apostle, but only a messenger of the church at Jerusalem; that Peter and he were at variance upon the subject of the relation of the Jewish rites to Christianity; and that Paul himself was not at all times so strenuously opposed to those rites as he had chosen to be among the Galatians. Of this state of things intelligence having been conveyed to the apostle, he wrote this epistle for the purpose of vindicating his own pretensions and conduct, of counteracting the influence of these false views, and of recalling the Galatians to the simplicity of the Gospel which they had received. The importance of the case was probably the reason why the apostle put himself to the great labor of writing this epistle with his own hand (vi, 11).

III. *Time and Place of Writing.*—On the date of this epistle great diversity of opinion prevails. (See Fischer, *De tempore quo ep. ad G. scripta fuerit*, Longos, 1808; Keil, *De tempore*, etc., in his *Opus. acad.* p. 351 sq.; also *Ueb. d. Zeit.* etc., in Tschirner's *Analekten*, iii, 2, 55 sq.; Niemeyer, *De tempore*, etc., Gött. 1827; Ulrich, *Ueb. d. Abfassungzeit*, etc., in the *Theol. Stud. u. Krit.* 1836, p. 448 sq.) Marcion held this to be the earliest of Paul's letters (Epiphanius, *adv. Hæres.* xlii, 9); and Tertullian is generally supposed to favor the same opinion, from his speaking of Paul's zeal against Judaism displayed in this epistle as characteristic of his being yet a neophyte (*adv. Marc.* i, 20); though to us it does not appear that in this passage Tertullian is referring at all to the *writing* of this epistle, but only to Paul's personal intercourse with Peter and other of the apostles mentioned by him in the epistle (ii, 9-14). Michaelis also has given his suffrage in favor of a date earlier than that of the apostle's second visit to Galatia, and very shortly after that of his first. Koppe's view (*Nor. Test.* vi, 7) is the same, though he supposes the apostle to have preached in Galatia *before* the visit mentioned by Luke in Acts xvi, 6, and which is usually reckoned his first visit to that district. Others, again, such as Mill (*Proleg. in Nor. Test.* p. 4), Calovius (*Biblia Illust.* iv, 529), and, more recently, Schrader (*Der Ap. Paulus*, i, 226), place the date of this epistle at a late period of the apostle's life: the last, indeed, advocates the date assigned in the Greek MSS., and in the Syriac and Arabic versions, which announce that it was "written from Rome" during the apostle's imprisonment there. But this subscription is of very little critical authority, and seems in every way improbable; it was not unlikely suggested by a mistaken reference of the expressions in ch. vi, 17 to the sufferings of imprisonment. See Alford, *Prolegomena*, p. 459. Lightfoot (*Journal of Sacred and Class. Philol.* Jan. 1857) urges the probability of its having been written at about the same time as the Epistle to the Romans, and finds it very unlikely that two epistles so nearly allied in subject and line of argument should have been separated in order of composition by the two epistles to the Corinthians. He would therefore assign Corinth as the place where the epistle was written, and the three months that the apostle staid there (Acts xx, 2, 3) as the exact period. But when the language of the epistle to the Galatians is compared with that to the Romans, the similarity between the two is such as rather to suggest that the latter is a development at a later period, and in a more systematic form, of thoughts more hastily thrown out to meet a pressing emergency in the former. The majority of interpreters, however, concur in a medium view between these extremes, and fix the date of this epistle at some time shortly after the apostle's second visit to Galatia. From the apostle's abrupt exclamation in chap. i, 6, "I marvel that ye are *so soon* removed from him that called you," etc., it seems just to infer that he wrote this epistle not very long after he had left

Galatia. It is true, as has been urged (see especially Conybeare and Howson's *Life and Epistles of St. Paul*, ii, 132), that *ὄχι το ταχέως* in this verse may mean "so quickly" as well as "so soon;" but the abruptness of the apostle's statement appears to us rather to favor the latter rendering; for, as a complaint of the *quickness* of their change respected the *manner* in which it had been made, and as the apostle could be aware of that only by report, and as it was a matter on which there might be a difference of opinion between him and them, it would seem necessary that the *grounds* of such a charge should be stated; whereas if the complaint merely related to the shortness of time during which, after the apostle had been among them, they had remained steadfast in the faith, a mere allusion to it was sufficient, as it was a matter not admitting of any diversity of opinion. We should consider, also, the obvious fervor and freshness of interest that seems to breathe through the whole epistle as an evidence that he had but lately left them.

The question, however, still remains, which of the two visits of Paul to Galatia mentioned in the Acts was it after which this epistle was written? In reply to this, Michaelis and some others maintain that it was the *first*; but in coming to this conclusion they appear to have unaccountably overlooked the apostle's phraseology (iv, 13), where he speaks of circumstances connected with his preaching the Gospel among the Galatians, *τὸ πρότερον*, the *former time*, an expression which clearly indicates that at the period this epistle was written, Paul had been at least *twice* in Galatia. On these grounds it is probable that the apostle wrote and dispatched this epistle not long after he had left Galatia for the second time, and perhaps whilst he was residing at Ephesus (comp. Acts xviii, 23; xix, 1 sq.), i. e. A. D. 51. The apostle would in that city have been easily able to receive tidings of his Galatian converts; the dangers of Judaism, against which he personally warned them, would have been fresh in his thoughts; and when he found that these warnings were proving unavailing, and that even his apostolic authority was becoming undermined by a fresh arrival of Judaizing teachers, it is then that he would have written, as it were on the spur of the moment, in those terms of earnest and almost impassioned warning that so noticeably mark this epistle. The reasons which Michaelis urges for an earlier date are of no weight. He appeals, in the first place, to chap. i, 2, and asks whether Paul would have used the vague expression, "all the brethren," without naming them, had it not been that the parties in question were those by whom he had been accompanied on his first visit to Galatia, viz. Silas and Timothy, and, "perhaps, some others." The answer to this obviously is that, had Paul referred in this expression to these individuals, who were known to the Galatians, he was much more likely, on that very account, to have named them than otherwise; and besides, the expression "all the brethren that are with me" is much more naturally understood of a considerable number of persons, such as the elders of the church at Ephesus, than of *two* persons, and "perhaps some others." Again, he urges the fact that, about the time of Paul's first visit to Galatia, Asia Minor was full of zealots for the law, and that consequently it is easier to account for the seduction of the Galatians at this period than at a later. But the passage to which Michaelis refers in support of this assertion (Acts xv, 1) simply informs us that certain Judaizing teachers visited Antioch, and gives us no information whatever as to the time when such zealots entered Asia Minor. In fine, he lays great stress on the circumstance that Paul, in recapitulating the history of his own life in the first and second chapters, brings the narrative down only to the period of the conference at Jerusalem, the reason of which is to be found, he thinks, in the fact that this epistle was written so soon after that event that nothing of moment had sub-

sequently occurred in the apostle's history. But, even admitting that the period referred to in this second chapter was that of the conference mentioned Acts xv (though this is much doubted by many writers of note), the reason assigned by Michaelis for Paul's carrying the narrative of his life no further than this cannot be admitted; for it overlooks the design of the apostle in furnishing that narrative, which was certainly not to deliver himself of a piece of mere autobiographical detail, but to show from certain leading incidents in his early apostolic life how from the first he had claimed and exercised an independent apostolic authority, and how his rights in this respect had been admitted by the pillars of the Church, Peter, James, and John. For this purpose it was not necessary that the narrative should be brought down to a lower date than the period when Paul went forth as the apostle of the Gentiles, formally recognised as such by the other apostles of Christ.

Some of the advocates of a date earlier than A.D. 50 suppose that the persons addressed under the name of Galatians were not the inhabitants of Galatia proper, but of Lystra and Derbe (Acts xiv, 6), since among the seven districts into which Asia Minor was divided by the Romans the name of Lycaonia does not occur; the latter therefore, with its cities of Derbe and Lystra, must have been included in the province of Galatia, as indeed Pliny (*Hist. Nat.* v, 27) makes it a part thereof. (See Schmidt, *De Galatis*, etc., Hefeld, 1748.) It is urged, in addition, that, while copious details are given in Acts xv respecting the founding of the Lycaonian churches, the first mention of Galatia (Acts xvi, 6) is merely to the effect that Paul passed through that country. On these grounds Paulus, Ulrich (*Stud. und Krit.* 1836), Böttger, and others hold that under the term *περιχωρον*, "the region round about" (Acts xiv, 6), Galatia must be included; and therefore they put back the composition of the epistle to a date anterior to the apostolic council (Acts xv). It is certain, however, that Luke did not follow the Roman division into provinces (which, moreover, was frequently changed), because he specially mentions Lycaonia, which was no province, and distinguishes it from Galatia. As to the latter point, no valid inferences can be drawn from the comparative silence of the inspired history upon the details of Paul's labors in particular places, provided his presence there is clearly recorded, although in brief terms. There seems, therefore, no reason to depart from the common opinion that the apostle's first visit is recorded in Acts xvi, 6; and consequently the epistle must have been written subsequently to the council (Acts xv). With this, too, the references in the epistle itself best agree. The visit to Jerusalem alluded to in chap. ii, 1-10, is, on the best grounds, supposed to be identical with that of Acts xv (A.D. 47); and the apostle speaks of it as a thing of the past. See PAUL.

IV. *Contents*.—The epistle consists of three parts. In the first part (i, ii), which is apologetic, Paul vindicates his own apostolic authority and independence as a directly-commissioned ambassador of Christ to men, and especially to the Gentile portion of the race. After an address and salutation, in which his direct appointment by heaven is distinctly asserted (i, 1), and a brief doxology (i, 5), the apostle expresses his astonishment at the speedy lapse of his converts, and reminds them how he had forewarned them that even if an angel preached to them another gospel he was to be anathema (i, 6-10). The gospel he preached was not of men, as his former course of life (i, 11-14), and as his actual history subsequent to his conversion (i, 15-24), convincingly proved. When he went up to Jerusalem it was not to be instructed by the apostles, but on a special mission, which resulted in his being formally accredited by them (ii, 1-10); nay, more, when Peter dissembled in his communion with Gentiles, he rebuked him, and demonstrated the danger of such in-

consistency (ii, 11-21). In the second part (iii, iv), which is polemical, having been led to refer to his zeal for the great doctrine of salvation by the grace of God through faith in Christ, the apostle now enters at large upon the illustration and defence of this cardinal truth of Christianity. He appeals to the former experience of the Galatians, and urges specially the doctrine of justification, as evinced by the gift of the Spirit (iii, 1-5), the case of Abraham (iii, 6-9), the fact of the law involving a curse, from which Christ has freed us (iii, 10-14), and, lastly, the prior validity of the promise (iii, 15-18), and that preparatory character of the law (iii, 19-24) which ceased when faith in Christ and baptism into him had fully come (iii, 25-29). All this the apostle illustrates by a comparison of the monage of an heir with that of bondage under the law: they were now sons and inheritors (iv, 1-7); why, then, were they now turning back to bondage (iv, 8-11)? They once treated the apostle very differently (iv, 12-16); now they pay court to others, and awaken feelings of serious mistrust (iv, 17-20); and yet, with all their approval of the law, they show that they do not understand its deeper and more allegorical meanings (iv, 21-31). In the third part (v, vi), which is hortatory and admonitory, the Galatians are exhorted to stand fast in their freedom, and beware that they make not void their union with Christ (v, 1-6): their perverters, at any rate, shall be punished (v, 7-12). The real fulfilment of the law is love (v, 13-15): the works of the Spirit are what no law condemns, the works of the flesh are what exclude from the kingdom of God (v, 16-26). The apostle further exhorts the spiritual to be forbearing (vi, 1-5), the taught to be liberal to their teachers, and to remember that as they sowed so would they reap (vi, 6-10). Then, after a noticeable recapitulation, and a contrast between his own conduct and that of the false teachers (vi, 11-16), and an affecting entreaty that they would trouble him no more (vi, 17), the apostle concludes with his usual benediction (vi, 18).—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

V. *Commentaries*.—The following are special exegetical helps on the whole of this epistle, the most important being designated by an asterisk [\*] prefixed: Victorinus, *Commentarii* (in Mai, *Script. Vet.* III, ii, 1); Jerome, *Commentarii* (in *Opp.* vii, 367; *Opp. Suppos.* xi, 979); Augustine, *Expositio* (in *Opp.* iv, 1248); Chrysostom, *Commentarius* (in *Opp.* x, 779); also Erasmus *Opp.* viii, 267, tr. in *Lib. of Fathers*, Oxf. 1840, vol. vi, 8vo); Cramer, *Catena* (vol. vi); Claudius Taur., *Commentarius* (in *Bibl. Max. Patr.* xiv, 139); Aquinas, *Expositio* (in *Opp.* vii); \*Luther, *Commentarius* (Lips. 1519, 4to, and often since; also in *Opp.* iii, 1, etc.; tr. London, 1807, 1835, 8vo); also his fuller *Commentarius* (Vitemb. and Haag. 1535, 8vo, and later; both works also in Germ. often); Bugenhagen, *Annotationes* (Basil. 1525, 8vo); Megander, *Commentarius* (Tigur. 1533, 8vo); Seripandus, *Commentaria* (in his work on Romans, Lugd. 1541, 8vo; also separately, Antw. 1565, 8vo, and later); Calvin, *Commentarius et Sermones* (both in *Opp.*; the former tr. Edinb. 1854, 8vo; the latter, Lond. 1574, 4to); Meyer, *Adnotationes* (Berne, 1546, Hanov. 1602, 8vo); Sarcer, *Adnotationes* (Frankfort, 1542, 8vo); Salmeron, *Disputationes* (in *Opp.* xv); Major, *Enarratio* (Vitemb. 1560, 8vo; also in German, ib. cod.); Musculus, *Commentarius* (Basil. 1561, 1569, fol.); Cogelnerus, *Solutiones* (Vitemb. 1564, 8vo); Chytræus, *Enarratio* (Franc. 1569, 8vo); Heshusius, *Commentarius* (Helmst. 1579, 8vo); Wigand, *Adnotationes* (Vitemb. 1580; Lips. 1596, 8vo); Grynæus, *Analysis* (Basil. 1583, 4to); Cornerus, *Commentarius* [after Luther] (Heidell. 1583, 8vo); Prime, *Expositio* (Oxford, 1587, 8vo); Heilbrunner, *Commentarius* (Lanng. 1591, 8vo); Perkins, *Commentary* (in *Works*, ii, 153; Camb. 1601, Lond. 1603; in Latin, Genev. 1611, 2 vols. fol.); Rollock, *Analysis* (London, 1602, Geneva, 1603, 8vo); Hoe, *Commentarius* (Lips. 1605, 4to); Winckelmann, *Commentarius* (Giess. 1608, 8vo); Weirich, *Expositio*

(Lips. 1610, 4to); Betuleus, *Paraphrasis* (Halle, 1612, 1617, 8vo); Battus, *Commentar. trii* (Gryphisen. 1613, 4to); Lysler, *Analysis* (Lips. 1616, 4to); Pareus, *Commentarius* (Heidelb. 1621, 4to; also in *Opp.* iii); Crell, *Commentarius* (Raconigi, 1628, 8vo; also in *Opp.* i, 373); Coutzen, *Commentarius* (Col. and Mog. 1631, folio); Himmel, *Commentarius* (Jena, 1641, 4to); Lithmann, *Συζητικὴ* (Upsal. 1641, 4to); Weimann, *Exercitationes* (Altorf. 1647, 4to); Terser, *Analysis* (Upsal. 1649, 4to); Linsington, *Commentary* (Lond. 1650, fol.); Coceius, *Commentarius* (Opp. v.); also *Explicatio* (ib. xii, 199); Feurborn, *Expositio* (Giess. 1653, 1669, 4to); Chemnitz, *Colligium* (Jen. 1656, 1663, 4to); \*Kunadus, *Disputationes* (Vitemb. 1658, 4to); Ferguson, *Expositio* (Edinb. 1657, Lond. 1841, 8vo); Lagus, *Commentatio* (Gryph. 1664, 4to); \*Stolberg, *Lectiones* (Vitemb. 1667, 4to); Kronmayer, *Commentarius* (Lips. 1670, 4to); Momms, *Meditationes* (Hag. 1678, 8vo); Van der Waeyen, *Verklaaring* (Lebard. 1682, 8vo; also in Latin, Franeker, 1681, 4to); \*Steengraacht, *Videgging* (Ench. 1688, 4to); \*Schmid, *Commentatio* (Kilon. 1690, Hamb. 1696, 1704, 4to); Leydeker, in *op. ad Gal.* (Tr. ad Rh. 1694, 8vo); \*Akersloot, *an de Gal.* (Leyd. 1695, 4to; in German, Brem. 1699, 4to); \*Spener, *Erklärung* (F. a. M. 1677, 1714, 4to); Aurivilius, *Animadversiones* (Halle, 1702, 4to); Locke, *Paraphrase* (Lond. 1705, 1733, 4to); Weisius, *Commentarius* (Helms. 1705, 4to); Mayer, *Dissertationes* (Gryph. 1709, 8vo); Van Dyck, *Anmerkungen* (Amst. 1710, 8vo); Boston, *Paraphrase* (in *Works*, vi, 240); Hazevoet, *Verklaaring* (Leyd. 1720, 4to); Vitringa, *De br. an d. Gal.* (Franq. 1728, 4to); \*Plevier, *Verklaaring* (Leyden, 1738, 4to); Rambach, *Erklärung* (Giess. 1739, 4to); Murray, *Erklärung* (Lips. 1739, 8vo); Wessel, *Commentarius* (L. Bat. 1750, 4to); Hoffmann, *Introductio* (Lips. 1750, 4to); \*Struensee, *Erklärung* (Flensb. 1764, 4to); Baumgarten, *Auslegung* (Hal. 1767, 4to); Michaelis, *Anmerk.* (2d ed. **Gal'banum** (הַבְּנָנִי, *chelbenah'*, according to Fürst, *Hebr. Handb.* s. v., from בְּנָנִי, *fat*, i. e. resin, gum; Sept. and Vulg. merely Græcize and Latinize, χαλβάριον, *galbanum*) is mentioned in Exod. xxx, 34 as one of the substances from which the incense for the sanctuary was to be prepared: "Take unto thee sweet spices, stacte, and onycha, and *galbanum*." The Hebrew word is so very similar to the Greek χαλβάριον, which occurs as early as the time of Hippocrates, that they may be presumed to have a common origin. The substance is more particularly described by Dioscorides (iii, 8; comp. i, 71), who gives μετώπιον as an additional name, and states that it is an exudation produced by a ferula in Syria. So Pliny (xii, 25): "Moreover, we have from Syria out of the same mountain, Amanus, another kind of gum, called galbanum, issuing out of an herb-like fennelgeat, which some call by the name of the said resin, others *stagonotis*. The best galbanum, and which is most set by, is grisly and clear, withal resembling hameniacum." On the other hand, he describes the *metopion* as the product of a tree near the oracle of Ammon (xii, 49). Theophrastus had long previously (*Hist. Pl.* ix, 7) said that galbanum flows from a Panax of Syria. In both cases it is satisfactory to find a plant of the same natural family of Umbelliferae pointed out as yielding this drug, because the plant has not yet been clearly ascertained. The Arabs, however, seem to have been acquainted with it, as they give its names. Thus "galbanum" in Persian works has *barzu* assigned to it as the Arabic, *bireja* as the Hindostani, with *khulyan* and *metopion* as the Greek names (evident corruptions of χαλβάριον and μετώπιον, arising from errors in the reading of the diacritical points): *Künch* and *nuffl* are stated to be the names of the plant, which is described as being jointed, thorny, and fragrant (Royle, *Illustr. Himal. Bot.* p. 23). Lobel made an attempt to ascertain the plant by sowing some seeds which he found attached to the gum of commerce (*Obs.* p. 431). The plant which was thus obtained is the *Ferula ferulago* (see Kühn, *On Dioscor.* ii, 532) of Linnaeus (*System.* vi, 130 sq.), a native of North Africa, Crete, and Asia Minor (see Jacquin, *Hort. Vindob.* iii, pl. 36). It has been objected, however, that it does not yield galbanum in any of these situations; but the same objection might be made, though erroneously, to the mastich-tree, as not yielding mastich, because it does not do so except in a soil and climate suitable to it. Other plants, as the *Bubon galbanum* and *gummiferum*, have in consequence been selected, but with less claim, as they are natives of the Cape of Good Hope. The late professor Don, having found some seeds of an umbelliferous plant sticking to the galbanum of commerce, has named the plant, though yet unknown, *Galbanum officinale*. These seeds, however, may or may not have belonged to the galbanum plant (see Fropier, *Notizen*, xxix, 12). Dr. Lindley has suggested another plant, which he has named *Opa'ia galbanifera*, and which grows in Khorassan, in Durrad, whence specimens were sent to England by Sir John McNeill, as yielding an inferior sort of ammoniac. This plant has been adopted by the Dublin College in their Pharmacopœia as that which yields the galbanum (Pereira, *Mat. Med.* ii, pt. ii, p. 188). M. Bushe, in his Persian travels (quoted in Royle, *Mat. Medica.* p. 471, 472), identified the plant producing galbanum with one which he found on the Demawend mountains. It

was called by the natives *Khassuch*, and bore a very close resemblance to the *Ferula erubescens*, but belonged neither to the genus *Galbanum* nor to *Opoidea*. It is believed that the Persian galbanum and that brought from the Levant are the produce of different plants. See AROMATICS.

Galbanum is in the present day imported into Europe both from the Levant and from India. That from the latter country is exported from Bombay, having first been imported thither, probably from the Persian Gulf. It is therefore probable that it may be produced in the countries at the head of that gulf, that is, in the northern parts of Arabia, or in Persia (portions of which, as is well known, were included in the Syria of the ancients); perhaps in Kurdistan, which nearly corresponds with ancient Assyria. Galbanum, then, is either a natural exudation, or obtained by incisions from some umbelliferous plant. It occurs in commerce in the form either of tears or masses, commonly called *lump galbanum*. The latter is of the consistency of wax, tenacious, of a brownish or brownish-yellow color, with white spots in the interior, which are the agglutinated tears. Its odor is strong and balsamic, but disagreeable, and its taste warm and bitter. It is composed of 66 per cent. of resin and 6 of volatile oil, with gum, etc., and impurities. It was formerly held in high esteem as a stimulant and antispasmodic medicine, and is still employed as such, and for external application to discuss indolent tumors. The ancients believed that when burnt the smoke of it was efficacious in driving away serpents and gnats (Pliny, xii, 56; xix, 58; xxiv, 13; Virgil, *Georg.* iii, 415; Calpurn, v, 90; Lucan, ix, 916). Galbanum was also employed in adulterating the opobalsamum, or gum of the balsam plant (Pliny, xii, 54). It is still more to our purpose that we learn from Dioscorides that, in preparing a fragrant ointment, galbanum was mixed with other aromatic substances (compare Pliny, xiii, 2). The effect of such mixture must depend upon the proportion in which it or any other strong-smelling substance is intermixed, more than upon what is its peculiar odor when in a concentrated state. We need not, therefore, inquire into the reasons which have been assigned to account for galbanum being intermixed with stacte and onycha as sweet spices (see KALISCH, ad loc.). We see that the same practice existed among the Greeks and Egyptians (Virgil, *Georgics*, iv, 264; Colum. ix, 15, etc.). See *Penny Cyclopaedia*, s. v.; Celsius, *Herob.* i, 267 sq.; Michaelis, *Suppl.* iii, 753 sq.; Miller, *Herophyl.* i, 450.—KITTO, s. v.; Smith, s. v. See ANOINTING OIL.

**Gale, John**, a Baptist divine and learned controversialist, was born at London in 1680. He studied at the University of Leyden, and at the age of nineteen graduated M.A. and doctor of philosophy. He studied also at Amsterdam under Limborch, and was intimate with Le Clerc. The University of Leyden in 1703 offered him the degree of doctor of divinity if he would assent to the articles of the Synod of Dort. He became, in 1718, minister of the chapel in St. Paul's Alley, Barbican. But his ministry was of short duration. He died in 1721, at the age of 41. In 1711 he published his *Reflections on Wall's Defence of Infant Baptism*, and in 1719 held a dispute with the author. He was also the author of *Sermons on several Occasions* (2d ed. 1726, 4 vols.). He was an able preacher, highly appreciated by the respectable congregation to which he ministered, and brought to the discussion of matters in controversy large, exact, and well-digested learning, with no small dialectical skill. (L. E. S.)

**Gale, Theophilus**, a learned nonconformist divine, was born in 1628, at King's Teignton, in Devonshire. He entered Magdalen College, Oxford, in 1647, and became fellow in 1650. In 1652 he passed A.M., and soon became an eminent tutor and a distinguished preacher in the university. In 1657 he was invited to Winchester, and became a stated preacher there, in

which station he continued for several years. Having imbibed the principles of the nonconformists, on the re-establishment of episcopacy, at the restoration of Charles the Second, he refused to comply with the Act of Uniformity which passed in 1661. Deprived of his fellowship at Oxford, he was taken into the family of Philip, lord Wharton, in the capacity of tutor to his two sons. He was a diligent and multivarious student. In 1669 he published the first part of *The Court of the Gentiles*; or, a *Discourse touching the Original of human Literature, both Philology and Philosophy, from the Scriptures and Jewish Church* (Oxford and London 5 vols. 4to). It was received with great applause, and was reprinted in 1672-1682. "In the first part of this learned work, Mr. Gale endeavors to prove that all languages have their origin and rise from the Hebrew. To this he adds a deduction, importing that the pagan theology, physic, politics, poetry, history, rhetoric, are deduced from sacred names, persons, rites, and records; and showing, withal, how the Jewish traditions came to be corrupted and mistaken by pagans. In the second part he tries to prove that philosophy also has its origin from the Jewish Church. In the third part, the vanity of pagan philosophy is demonstrated from its causes, parts, properties, and effects; namely, pagan idolatry, Judaic apostasy, Gnostic infusions, errors among the Greek fathers, especially Origenism, Arianism, Pelagianism, and the whole system of popery, or anti-Christianism, distributed into three parts, mystic, scholastic, and canonic theology. In the fourth part he treats of reformed philosophy, wherein Plato's moral or metaphysic, or prime philosophy, is reduced to a useful form or method. He divides this, which is larger than any of the former parts, into three books, discoursing in the first of moral philosophy; in the second, of metaphysics; and in the third, of divine predetermination." In 1677 he was chosen to succeed Mr. Rowe as pastor. He died at Newington, 1678. Besides *The Court of the Gentiles*, he published in Latin an abridgment of it for the use of students, under the title of *Philosophia Generalis*, etc. (Lond. 1676, 8vo):—*Theophily*; or, a *Discourse of the Saints Amartyrieh God in Christ* (Lond. 1671, 8vo):—*The true Idea of Jansenism, both historic and dogmatic* (1669, 8vo):—*The Anatomy of Infidelity* (1672, 8vo):—*A Discourse on the coming of Christ* (1673, 8vo):—*Idea Theologicæ*, etc. (12mo):—*and The Life and Death of Thomas Treguisse* (1671, 8vo).—JONES, *Christ. Biog.*; Shedd, *Hist. of Doct.* i. 205.

**Gale, Thomas, D.D.**, a learned English divine and antiquarian, was born in 1636 at Scruton, in Yorkshire. He became fellow of Trinity, and was elected regius professor of Greek in 1666; was made prebendary of St. Paul's in 1676, and dean of York in 1697. He died April 8, 1702. He published *Opusculum Mythologicæ*, etc., Gr. and Lat. (Camb. 1671, 8vo):—*Historiæ Poeticæ antiqui Scriptores, Græce et Latine*:—*Herodoti Hælicarnassensis Historiarum*, lib. ix:—*Historiæ Britannicæ, Saxonicæ, Anglo-Danicæ Scriptores æt. ex ætate. codl. MS.* (Oxon. 1691, fol.). This work contains nearly all the original writers of English history.

**Ga'leëd** (Heb. *Gale'd*, גַּלְעָד, the heap of the wit-

Druidical Cairn and Kist-Vacens.

*ness*; Sept. *βουρὸς μάρτυς* et *βουρὸς μαρτυρεῖ*; Vulg. *Acerus testimonii* and *Galaud*), the name given by Jacob to the pile of stones [see GILGAL] erected by him and Laban to attest their league of friendship [see GILEAD], but called by Laban (Gen. xxxi, 47, 48) by the synonymous Syriac title of JEGAR-SAHADUTHA (q. v.). Traces of a similar custom appear in the consecrated mounds of the Druids and of the North-American aborigines of the Western States. See ALTAR; STONE.

**Galen** or **Galenus**, MATTHEUS VAN, D.D., was born about the year 1528, at West-Kapelle, on the island of Walcheren. As his parents were not in such circumstances as would enable them to give their son a liberal education, the expenses of his preparatory course at Ghent were borne by two benevolent gentlemen of his native place. From Ghent he went to Louvain, where he studied philosophy and theology. After taking his bachelor's degree, he gave instructions in this institution in sacred eloquence. Being licensed, he was, on the recommendation of the notorious Ruard Tapper, called to the professorship of theology in the recently founded university of Dillingen. This position he held from 1559 to 1563. Its duties were discharged in such a way as to secure for him a high reputation. From Dillingen he was called to occupy the chair of theology at Douay. Here, in 1564, he received his degree of D.D. With zeal and fidelity he labored at this post till his death, which occurred in 1573. He was a man of eminent learning, possessing for the time in which he lived an unusual familiarity with the Latin, Greek, and Hebrew languages. He was a member of the Council of Trent and of the Synod of Cambrai. He numbered among his friends some of the principal men of his time. Though a man of great learning, he is said to have been deficient in critical acumen. He wrote various works in Latin on practical and polemic theology. The substance of his lectures on pulpit eloquence was given to the public under the title of *Paralipomena*. He also wrote a *Commentarius in Epistolam D. Pauli ad Hebræos e Syro Sermonem in Latæum conversam* (Duaci, 1578; Lovan. 1599). An *Explicatio in Esaiam* is still preserved in manuscript in the University library at Leyden. His greatest merit consists in the service rendered to Church history by original contributions in this department, and by the publication of mediæval writings and documents. His works in this direction are *Vita S. Wilibrordi, Frisionum apostoli*:—*Oratio in vitam S. Georgii martyris*:—*Areopagitica seu opuscula quædam nusquam hæcenus excusa dicitur Chlodovici et Hilduicini de rebis gestis ac scriptis B. Macarii Jonici Dionysii Areopagite* (Colon. 1563; Paris, 1565):—*Alcuius Rhetorica ad Carolum Magnum* (Duaci, 1563; Colon. 1563):—*De originibus monasticis seu de prima Christianæ Monasticæ origine commentarius* (Dilling. 1564). See B. Glasius, *Godgeleerd Neerland*, D. i, blz. 485 en verv.; also J. N. Paquot, *Mémoires pour servir à l'histoire littéraire des dix-sept provinces des Pays-Bas, de la principauté de Liège et de quelques contrées voisines* (Louvain, 1763-1770, 18 vols. 8vo), iii, p. 301 suiv. (J. P. W.)

**Galenists**, a branch split off, in 1664, from the Waterlandians, who were Mennonites, or Anabaptists. The founder of the Galenists was called Galen Abraham Haan; he was a doctor of physic, and pastor of a Mennonite congregation at Amsterdam. He is celebrated as a man of great penetration and eloquence, and is supposed to have inclined to Socinian views. Assuming that the Christian system laid much more stress on practice than on faith, he was disposed to receive into the Mennonite Church all who acknowledged the divine origin of the books of the Old and New Testaments and led holy and virtuous lives. Such, in his judgment, were true Christians, and had an undoubted right to all the privileges that belong to that character.—Mosheim, *Ch. Hist.* cent. xvii, sec. ii, pt. ii, ch. v, § 7. See APOSTOOL; MENNONITES.

**Galenus**, HANS. See GALENISTS.

**Galerius**, VALERIUS MAXIMIANUS, Roman emperor, son of a shepherd, was born near Sardica, in Dacia, entered the imperial army, and served in the wars of Aurelius and Probus. Dioclesian (A. D. 292) conferred on him, along with Constantius Chlorus, the title of Cæsar, and gave him his daughter Valeria to wife. On the abdication of Dioclesian (A. D. 305), he and Constantius became *augusti*, or joint rulers of the Roman empire. On the death of Constantius at York (A. D. 306), the troops in Britain and Gaul immediately declared their allegiance to his son, Constantine (afterwards Constantine the Great), much to the chagrin of Galerius, who expected the entire sovereignty of Rome to fall into his hands. He died A. D. 311. Galerius hated the Christians bitterly, and is believed to have been the real author of Dioclesian's persecutions. See DIOCLESIAN. "Brought to reflection by a terrible disease, he put an end to the slaughter shortly before his death by a remarkable edict of toleration, which he issued from Nicomedia in 311, in connection with Constantine and Licinius. In that document he declared that the purpose of reclaiming the Christians from their wilful innovation and the multitude of their sects to the laws and discipline of the Roman state was not accomplished, and that he would now grant them permission to hold their religious assemblies, provided they disturbed not the order of the state. To this he added, in conclusion, the remarkable instruction that the Christians, 'after this manifestation of grace, should pray to their God for the welfare of the emperors, of the state, and of themselves, that the state might prosper in every respect, and that they might live quietly in their homes.' This edict brought the period of persecution in the Roman empire to a close."—Schaff, *History of the Christian Church*, vol. i, § 57.

**Galfrid**, **Galfridus**. See GEOFFREY OF MONMOUTH.

**Gal'gala** (Γάλγала; Vulg. *Galgala*), the ordinary equivalent in the Sept. for GILGAL. In the A. V. it is named only in 1 Macc. ix, 2, as designating the direction of the road taken by the army of Demetrius, when they attacked Masaloth in Arbela—"the way to Galgala" (ὁδὸν τὴν εἰς Γάλγала). The army, as we learn from the statements of Josephus (*Ant.* xii, 11, 1), was on its way from Antioch, and there is no reason to doubt that by Arbela is meant the place of that name in Galilee now surviving as Irbid. Its ultimate destination was Jerusalem (1 Macc. ix, 3), and Galgala may therefore be either the upper Gilgal, near Bethel (Robinson, *Researches*, iii, 8), as Ewald thinks (*Isr. Gesch.* III, ii, 370, n.), or the lower one near Jericho, as the route through the centre of the country, or (as is preferable) that through the Ghor, is chosen. Josephus omits the name in his version of the passage. It is a gratuitous supposition of Ewald's that the Galilee which Josephus introduces is a corruption of Galgala—a view, however, which is favored by the reading in the margin of the above text, and which is adopted by Michaelis.—Smith, s. v. See GILGAL 3.

**Galicho** or **Galiko**, ELISHA BEN-GABRIEL, a Jewish commentator, was born about the middle of the 16th century (1552?). He was president of the Rabbinic college at Safed, over which Moses Galante (q. v.) at one time presided, and, like all the Safed men, was eminently cabalistic. He wrote a commentary on Ecclesiastes (בְּאֵיךְ עַל קִהָּלֵי, Venice, 1578), which he divided into 27 sections, according to the number of letters in the Hebrew alphabet, including the finale. Ginsburg, in his *Historical and Critical Commentary on Ecclesiastes* (Lond. 1861, p. 67, etc.), gives an analysis and specimen of this work. The most cabalistic work of Galicho's is his commentary on the book of Esther (בְּאֵיךְ עַל אֶסְתֵּר, Venice, 1583). He wrote also a commentary on the "Song of Songs" (פִּירוּשׁ עַל שִׁיר)

גליליים, Venice, 1587), which has the Hebrew text and points, and in which he displays a genius for allegorical exposition.—Ftheridge, *Introd. to Hebr. Lit.* p. 415; Kitto, *Cyclop. of Bibl. Lit.* ii, 55; Fürst, *Bib. Jud.* i, 314. (J. H. W.)

**Galilæ'an** (Γαλιλαῖος), a native or inhabitant (John iv, 45, "of Galilee," Matt. xxvi, 69; Acts i, 11; v, 37) of GALILEE (q. v.); applied to the disciples of Christ as a term of contempt (Luke xxii, 59; Acts ii, 7). They were easily recognised as such, for the Galileans spoke a dialect of the vernacular Syriac different from that of Judæa, and which was of course accounted rude and impure, as all provincial dialects are considered to be, in comparison with that of the metropolis. It was this which occasioned the detection of Peter as one of Christ's disciples (Mark xiv, 70). The Galilæan dialect (as we learn from Buxtorf, *Lex. Talm.* col. 434; Lightfoot, *Cent. chorogr.* in Matt. proem. c. 86, 87; and others) was of a broad and rustic tone, which affected the pronunciation not only of letters, but of words. It partook much of the Samaritan and Syriac idiom; but, in the instance of Peter, it must have been the tone which betrayed him, the words being seemingly too few for that effect. (See A. Pfeiffer, *Dissert. de lingua Galilæor.*; also in his *de Talmude Judæor.* p. 137 sq.) The Galilæans are mentioned by Josephus (*Ant.* xvii, 10, 2; *War.* ii, 10, 6; iii, 3, 2) as a turbulent and rebellious people, ready on all occasions to rise against the Roman authority. This character of them explains what is said in Luke xiii, 1 with regard to "the Galilæans whose blood Pilate had mingled with their sacrifices." Josephus, indeed, does not mention any Galilæans slain in the Temple by Pilate; but the character which he gives that people sufficiently corroborates the statement. The tumults to which he alludes were, as we know, chiefly raised at the great festivals, when sacrifices were slain in great abundance; and on all such occasions the Galilæans were much more active than the men of Judæa and Jerusalem, as is proved by the history of Archelaus (*Joseph. Ant.* xvii, 9, 10); which case, indeed, furnishes an answer to those who deny that the Galilæans attended the feasts with the rest of the Jews. The seditious character of the Galilæans also explains why Pilate, when sitting in judgment upon Jesus, caught at the word Galilee when used by the chief priests, and asked if he were a Galilæan (Luke xxiii, 6). To be known to belong to that country was of itself sufficient to prejudice Pilate against him, and to give some countenance to the charges, unsupported by impartial evidence, which were preferred against him, and which Pilate himself had, just before, virtually declared to be false. See Otho, *Lex. Rab.* p. 254 sq.—Kitto, s. v.

**GALILÆANS**, one of the names of reproach given to the early Christians. It was the ordinary phrase of Julian the apostate, when he spoke of Christ or Christians. He was accustomed to call Christ "the Galilæan God." Not only did he use this epithet himself, but made a law, requiring that no one should call the Christians by any other name, thinking thereby to abolish the name of Christians. He died fighting against them; and as he caught the blood in his hand which flowed from a wound in his side, he dashed it towards heaven, saying these memorable words: *Ἔ-cisti, O Galilæe!* "Thou hast conquered, O Galilæan!"—Bingham, *Orig. Eccles.* bk. i, ch. ii, § 2.

**Gal'ilee** (Γαλιλαία, often in the N. T. and Apocrypha, as well as Josephus), the rendering also in a few passages (Josh. xx, 7; xxi, 32; 1 Kings ix, 11; 1 Chron. vi, 76; Isa. ix, 1) of the Heb. גליל, *gallil'* (fem. גלילית, *g'ililath'*, 2 Kings xv, 29), which prop. signifies a *circle* (e. g. a ring, Esth. i, 6; Cant. v, 14), or circuit of country, i. e. one of the little circular plains among the hills of northern Palestine, such as is now seen near Kedesh. See **TOPOGRAPHICAL TERMS**. As

a special locality, it is first mentioned by Joshua, who describes Kedesh as "in Galilee in Mount Naphtali" (xx, 7). Its limited extent is indicated in 2 Kings xv, 29, where the historian, detailing the conquests of Tiglath-pileser, states that "he took Ijon, and Abel-Beth-Maachah, and Janoh, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali." Galilee, therefore, did not extend beyond the bounds of Naphtali; and a comparison with other passages shows that it embraced only the northern section of that tribe, or at least that the name was at first confined to that district (Josh. xx, 7; xxi, 32; Josephus, *Ant.* v, 1, 18). The region thus lay on the summit of a broad mountain ridge. Here were situated the towns which Solomon offered to Hiram as payment for his services in procuring timber and stones for the Temple. Hiram, however, whose great want was grain for his island city, and who doubtless expected a portion of some of the rich plains of central Palestine, could not conceal his disappointment when he saw the mountain towns and their rugged environs, and declined them as useless (1 Kings ix, 11, and 2 Chron. viii, 2). See **CADUL**. At this period, Galilee, though within the allotted territory of Naphtali, does not appear to have been occupied by the Israelites. It was only after Hiram had declined the towns that Solomon rebuilt and colonized them (2 Chron. l. c.). Hazor, the great stronghold and capital of the northern Canaanites, lay within or near Galilee; and, though Joshua had captured and burned it (Josh. xi), yet during the rule of the judges it was possessed by a king, Jabin, whose general, Sisera, dwelt in the neighboring Harosheth of the Gentiles (Judg. iv). The presence of these powerful and warlike tribes, and the natural strength of the country, sufficiently account for the continued occupation of the old Gentile inhabitants. David subdued, but did not expel them. Solomon, as has been seen, took some of their towns; but they remained among these rugged mountains in such numbers that in the time of Isaiah the district was definitely known by the name of "Galilee of the Gentiles" (גליל גוים, *g'ilil g'oyim*, Isa. ix, 1: in Matt. iv, 15, Γαλιλαία τῶν ἔθνων; in 1 Macc. v, 15, Γαλιλαία ἀλλοθύλων). It is probable that the strangers increased in number, and became during the captivity the great body of the inhabitants; extending themselves also over the surrounding country, they gave to their new territories the old name, until at length Galilee became one of the largest provinces of Palestine. In the time of the Maccabees, Galilee contained only a few Jews living in the midst of a large heathen population (1 Macc. v, 20-23); Strabo states that in his day it was chiefly inhabited by Syrians, Phœnicians, and Arabs (xvi, p. 760); and Josephus says Greeks also dwelt in its cities (*Life*, 12). The name also occurs in Tobit i, 2; Judith xi, 8, etc.

In the time of our Lord, all Palestine was divided into three provinces, Judæa, Samaria, and Galilee (Acts ix, 31; Luke xvii, 11; Josephus, *War.* iii, 3). The latter included the whole northern section of the country, comprising the ancient territories of Issachar, Zebulun, Asher, and Naphtali. Josephus defines its boundaries, and gives a tolerably full description of its scenery, products, and population. He says the soil is rich and well cultivated; fruit and forest trees of all kinds abound; numerous large cities and populous villages, amounting in all to no less than two hundred and forty, thickly stud the whole face of the country; the inhabitants are industrious and warlike, being trained to arms from their infancy (*War.* iii, 3, 3; *Life*, 45). On the west it was bounded by the territory of Ptolemais, which probably included the whole plain of Akka to the foot of Carmel. The southern border ran along the base of Carmel and of the hills of Samaria to Mount Gilboa, and then descended the valley of Jezreel to Scythopolis to the Jordan. (The

Talmud, *Gittin*, vii, 7, gives a place called כְּפַר יְרִיחוֹ (as the southern limit.) The River Jordan, the Sea of Galilee, and the Upper Jordan to the fountain at Dan, formed the eastern border (Reiland, *Palest.* p. 181); and the northern ran from Dan westward across the mountain ridge till it touched the territory of the Phœnicians (Josephus, *War*, iii, 3, 1; compare Luke viii, 26). See PALESTINE.

Galilee was divided into two sections (Cyrill, *c. Jul.* ii), "Lower" (*ἡ κατώ*) and "Upper" (*ἡ ἄνω Γαλιλαία*, Josephus, *War*, ii, 20, 6; *Ant.* v, 1, 22). The Talmud has a threefold division, with reference to the Sabbatical year (*Shebi'ith*, ix, 2; "Upper Galilee [הַגְּלִילִי הַיָּבֵשׁ] embraces all above Capharnanias, and does not produce sycamores; Lower [הַגְּלִילִי הַיָּם], all below C., and bears sycamores; the valley is the territory of Tiberias" [the Ghor]). A single glance at the country shows that the division was natural. Lower Galilee included the great plain of Esdraelon, with its offshoots, which run down to the Jordan and the Lake of Tiberias; and the whole of the hill-country adjoining it on the north to the foot of the mountain range. The words of Josephus are clear and important (*War*, iii, 3, 1): "It extends from Tiberias to Zabulon, adjacent to which, on the sea-coast, is Ptolemais. In breadth it stretches from a village called Xaloth, lying in the Great Plain, to Bersabe." "The village of Xaloth" is evidently the Chesulloth of Josh. xix, 12, now called Iksâl, and situated at the base of Mount Tabor, on the northern border of the Great Plain (Porter, *Handbook*, p. 350). But a comparison of Josephus, *Ant.* xx, 6, 4, with *War*, iii, 2, 4, proves that Lower Galilee extended as far as the village of Ginea, the modern Jenin, on the extreme southern side of the plain. The site of the northern border town, Bersabe, is not known; but we learn incidentally that both Arbela and Jotopata were in Lower Galilee (Josephus, *Life*, 37; *War*, ii, 20, 6); and as the former was situated near the north-west angle of the Lake of Tiberias, and the latter about eight miles north of Nazareth (Porter, *Handbook*, p. 432, 377), we conclude that Lower Galilee included the whole region extending from the plain of Akka, on the west, to the shores of the lake on the east. It was thus one of the richest and most beautiful sections of Palestine. The plain of Esdraelon presents an unbroken surface of fertile soil—soil so good that to enjoy it the tribe of Issachar condescended to a semi-nomadic state, and "became a servant to tribute" (Deut. xxxiii, 18; Gen. xlix, 14, 15). With the exception of a few rocky summits around Nazareth the hills are all wooded, and sink down in graceful slopes to broad winding vales of the richest green. The outlines are varied, the colors soft, and the whole landscape is characterized by that picturesque luxuriance which one sees in parts of Tuscany. The blessings promised by Jacob and Moses to Zebulun and Asher seem to be here inscribed on the features of the country. Zebulun, nestling amid these hills, "offers sacrifices of righteousness" of the abundant flocks nourished by their rich pastures; he rejoices "in his goings out" along the fertile plain of Esdraelon; "he sucks of the abundance of the seas"—his possessions skirting the Bay of Haifa at the base of Carmel; and he "sucks of treasures hid in the sand," possibly in allusion to the glass, which was first made from the sands of the River Belus (Deut. xxxiii, 18, 19; Pliny, v, 19; Tacitus, *Hist.* v). Asher, dwelling amid the hills on the north-west of Zebulun, on the borders of Phœnicia, "dips his feet in oil," the produce of luxuriant olive groves, such as still distinguish this region; "his bread," the produce of the plain of Phœnicia, and the fertile upland valleys "is fat;" "he yields royal dainties"—oil and wine from his olives and vineyards, and milk and butter from his pastures (Gen. xlix, 20; Deut. xxxiii, 24, 25). The chief towns of Lower Galilee were Tiberias, Tarichea, at the southern end of

the Sea of Galilee, and Sepphoris (Josephus, *Life*, 9, 25, 29, 37). The latter played an important part in the last great Jewish war (Josephus, *Life*, 45; *War*, ii, 18, 11). It is now called Scfarieh, and is situated about three miles north of Nazareth (Porter, *Handbook*, p. 378). There were, besides, two strong fortresses, Jotopata, now called Jéfât, and Mount Tabor (Josephus, *War*, iii, 7, 3 sq.; iv, 1, 6). The towns most celebrated in N.-T. history are Nazareth, Cana, and Tiberias (Luke i, 26; John ii, 1; vi, 1).

Upper Galilee, according to Josephus, extended from Bersabe on the south to the village of Baca, on the borders of the territory of Tyre, and from Meloth on the west to Thella, a city near the Jordan (*War*, iii, 3, 1). None of these places are now known, but there is no difficulty in ascertaining the position and approximate extent of the province. It embraced the whole mountain range lying between the upper Jordan and Phœnicia. Its southern border ran along the foot of the Safed range from the north-west angle of the Sea of Galilee to the plain of Akka. To this region the name "Galilee of the Gentiles" is given in the O. and N. T. (Isa. ix, 1; Matt. iv, 15). So Eusebius states (*Onom.* s. v. Γαλιλαία). The town of Capernaum, on the north shore of the lake, was in Upper Galilee (*Onom.* s. v. Capharnaum), and this fact is important, as showing how far the province extended southward, and as proving that it, as well as Lower Galilee, touched the lake. The mountain range of Upper Galilee is a southern prolongation of Lebanon, from which it is separated by the deep ravine of the Leoutes. See LEBANON. The summit of the range is table-land, part of which is beautifully wooded with dwarf oak, intermixed with tangled shrubberies of hawthorn and albutus. The whole is varied by fertile upland plains, green forest glades, and wild picturesque glens breaking down to the east and west. The population is still numerous and industrious, consisting chiefly of Metâwileh, a sect of Mohammedans. Safed is the principal town, and contains about 4000 souls, one third of whom are Jews. It is one of the four holy Jewish cities of Palestine, and has for three centuries or more been celebrated for the sacredness of its tombs and the learning of its rabbins. Safed seems to be the centre of an extensive volcanic district. Shocks of earthquake are felt every few years. One occurred in 1837 which killed about 5000 persons (Porter, *Handbook*, p. 438). On the table-land of Upper Galilee lie the ruins of Kedesh-Naphtali (Josh. xx, 7), and Giseala (now el-Fish), a city fortified by Josephus, and celebrated as the last place in Galilee that held out against the Romans (*War*, ii, 22, 6; iv, 1, 1; 2, 1-5).

Galilee was the scene of the greater part of our Lord's private life and public acts (see Wichmannshausen, *De Galilæa*, Viteb. 1711; Buddeus, *De Galilæa rebus gestis Christi clara*, Jen. 1718 [*Miscell. Sacr.* iii, 1156 sq.]; Less, *De Gal. Serrat. mirac. theatro*, Gott. 1775 [*Opp.* 1781, ii, 309 sq.]). His early years were spent at Nazareth, and when he entered on his great work he made Capernaum his home (Matt. iv, 13; ix, 1). It is a remarkable fact that the first three Gospels are chiefly taken up with our Lord's ministrations in this province, while the Gospel of John dwells more upon those in Judæa (see Miller, *De ordine rerum Christi in Galilæa gestarum*, Hal. 1770). The nature of our Lord's parables and illustrations was greatly influenced by the peculiar features and products of the country. The vineyard, the fig-tree, the shepherd, and the desert in the parable of the Good Samaritan, were all appropriate in Judæa; while the corn-fields (Mark iv, 28), the fisheries (Matt. xiii, 47), the merchants (Matt. xiii, 45), and the flowers (Matt. vi, 28), are no less appropriate in Galilee. The apostles were all either Galileans by birth or residence (Acts i, 11), and as such they were despised, as their master had been, by the proud Jews (John i, 46; vii, 52; Acts ii, 7). It appears, also, that the pronunciation of those

Jews who resided in Galilee had become peculiar, probably from their contact with their Gentile neighbors (Matt. xxvi, 73; Mark xiv, 70; see Lightfoot, *Opp.* ii, 77). On the death of Herod the Great the province of Galilee was given by Caesar to his son Antipas (Joseph. *War.* ii, 6, 3). After the destruction of Jerusalem Galilee became the chief seat of Jewish schools of learning, and the residence of their most celebrated rabbins. The National Council or Sanhedrim was taken for a time to Jabneh in Philistia, but was soon removed to Sepphoris, and afterwards to Tiberias (Lightfoot, *Opp.* ii, p. 141). The *Mishna* was here compiled by Rabbi Judah Hakkodesh (cir. A.D. 109-220), and a few years afterwards the *Gemara* was added (Buxtorf, *Tiberias*, p. 19). Remains of splendid synagogues still exist in many of the old towns and villages, showing that from the 2d to the 7th century the Jews were as prosperous as they were numerous (Porter, *Handbook*, p. 427, 440).—Smith, s. v.; Kitto, s. v. See GALILEAN.

GALILEE, SEA OF (ἡ Θάλασσα τῆς Γαλιλαίας, Matt. iv, 18; xv, 29; Mark i, 16; vii, 31; John vi, 1), called also the *Sea of Tiberias* (John vi, 1; xxi, 1; hence its modern name *Bahr el-Tubariyeh*), the *Lake (Aiyun) of Gennesaret* (Luke v, 1), or emphatically the *Sea* (ἡ Θάλασσα simply, Matt. iv, 15); in the O. T.

mer says, "The Jordan discharges itself into a lake, by many writers known as *Gennesera*, 16 miles long and 6 wide, which is skirted by the pleasant towns Julius and Hippo on the east, of Tarichea on the south (a name which is by many persons given to the lake itself), and of Tiberias on the west" (v, 15). Josephus refers to other features. "The Lake of *Gennesareth* derives its appellation from the adjacent district. It is 40 furlongs (five Roman miles) broad, by 140 (17½ miles) long. Its waters are sweet, and extremely pleasant to drink, as they flow in a clearer stream than the muddy collections of marshes, and they can be drawn free from impurities, being throughout confined by abrupt and sandy shores. They are of a medium temperature, milder than those of the river or the fountain, yet uniformly colder than might be expected from the expanse of the lake. . . . The kinds of fish found here differ from those elsewhere met with" (*War.* iii, 10, 7). Both these are so near the truth that they could scarcely have been mere estimates. Its extreme length is 12½ geographical miles, and its breadth 6; equal to about 16 by 7½ Roman miles. It is of an oval shape, or rather the form of an egg, with the large end to the north. The Sea of Galilee has none of those picturesque or sublime features for which the lakes of Italy and Switzerland are justly celebrated; it has not even the stern grandeur of the Dead Sea. The shores are singularly uniform. There are no bold cliffs jutting far out into deep water; there are no winding bays running away inland. The bed of the sea is like a huge basin. Along its eastern and western sides the banks rise steep, bare, and rugged, to the height of nearly 2000 feet; and their tops, especially those on the east, are as level as a wall. At the north and south ends, where the Jordan enters and passes out, there are wide openings, through which views are gained up and down the valley. Yet nature has not left this scene altogether destitute of ornament. The scenery is not quite so dreary, nor are the hues of the landscape so dead and sombre as Dr. Traill would have us imagine (Traill's *Josephus*, ii, p. cvi). True, when the sun is high and the sky cloudless, and when the pilgrim looks down from the top of the mountains, there is a dreariness in the landscape, and a uniformity of cold gray color, which wearies the eye; but let him go down to the shore and wait till the sun declines, and he will be enchanted with the deep ethereal blue of the smooth water, and the tints, "rose-colored, pearl-gray, and purple, blended together," and thrown in soft shades over the sides of the encircling hills. The pale blue cone of Hermon, with its glittering crown of snow, forms a glorious background (Van de Velle, ii, 388; Robinson, ii, 380 sq.; Stanley, *Palestine*, p. 362; Porter, *Handbook*, p. 418). Round the whole shore, with only one or two short interruptions, there is a broad strand of white pebbles, mixed with little shells. The Jordan enters at the extreme northern end of the lake, and leaves again at the southern. In fact, the bed of the lake is just a lower section of the great Jordan valley. The utter loneliness and absolute

Shores of the Sea of Galilee.

rarely alluded to (Numb. xxxiv, 11; Josh. xii, 3; xiii, 27) as the *Sea of Cinnereth* or *Cinneroth* (q. v.). It is the second of the three lakes into which the Jordan flows (Tacitus, *Hist.* v, 6). This sheet of water is particularly described by Pliny and Josephus. The for-

stillness of the scene are exceedingly impressive. It seems as if all nature had gone to rest, languishing under that scorching heat. How different it was in the days of our Lord! Then all was life and bustle along the shores; the cities and villages that thickly studded

them resounded with the hum of a busy population, while from hill-side and cornfield come the cheerful cry of shepherd and ploughman. The lake, too, was dotted with dark fishing-boats, and spangled with white sails. Now, a mournful and solitary silence reigns alike over sea and shore. The cities are in ruins. Capernaum, Chorazin, the two (?) Bethsaias, Hippo, Gamala, and Tarichee, are completely deserted. Tiberias and Magdala are the only inhabited spots; and for several miles inland in every direction the country looks waste and desolate. The inhabitants—merchants, fishermen, and peasants—are nearly all gone. The few that remain in the shattered houses of Tiberias, and the mud hovels of Magdala, and the black tents of the wandering Bedouin, seem worn and wasted by poverty and sickness. In 1858 the Sea of Galilee could just boast of one small boat, and it was so rotten and leaky as not to be seaworthy. The fish, however, are as abundant as ever; for though only little hand-nets are used, a considerable sum is paid to the government for the privilege of fishing (Burckhardt, *Travels in Syria*, p. 332; Robinson, ii, 386). It was observed by Hasselquist that some of the same species of fish are found in the Sea of Galilee as in the Nile (*Travels*, p. 158): the same fact had been noted by Josephus (*War*, iii, 10, 8). The kinds referred to are *Cyprinus Benni*, *Silurus*, *Mormyrus*, etc. (See Wilson's *Lands of the Bible*, ii, 113; Robinson, ii, 386). Two modes are now employed to catch the fish. One is a hand-net, with which a man, usually naked (John xxi, 7), stalks along the shore, and, watching his opportunity, throws it round the game with a jerk. The other mode is still more curious. Bread-crumbs are mixed up with bichlorid of mercury, and sown over the water; the fish swallow the poison and die. The dead bodies float, are picked up, and taken to the market of Tiberias! (Porter, *Hand-book*, p. 432.) The water of the lake is sweet, cool, and transparent; and as the beach is everywhere pebbly, it has a beautiful sparkling look. This fact is somewhat strange, when we consider that it is exposed to the powerful rays of the sun, that many warm and brackish springs flow into it, and that it is supplied by the Jordan which rushes into its northern end, a turbid, ruddy torrent.

The most remarkable fact in the physical geography of the Sea of Galilee is its great depression. The results of barometrical observations have varied between 845 feet and 666 feet, but according to the trigonometrical survey of Lieut. Symonds, R.E., in 1841, its depression is only 328 feet. In this Van de Velde thinks there must have been some mistake, and he adheres to the figures of Lieut. Lynch, which give 653 feet, as probably the most accurate (*Memoir*, p. 168, 181). This has a marked effect on the temperature, climate, and natural products. The heat is intense during the summer months. The harvest on the shore is nearly a month earlier than on the neighboring high lands of Galilee and Bashan. Frost is unknown, and snow very rarely falls. The trees, plants, and vegetables are those usually found in Egypt; such as the palm, the lote-tree (*Zizyphus lotus*), the indigo plant, etc. (Robinson, ii, 388; Josephus, *War*, iii, 10, 7 and 8). The surrounding hills are sometimes described as bare and barren, sometimes as green and fertile. In April the tops of the hills are gray and rocky, and destitute of vegetation. Lower down, the grass, which during the winter rains had flourished, is there withering in the sun (Matt. xiii, 6); but in the valleys and ravines, wherever any of the many fountains and streams gushed forth, there is verdure and cultivation (Matt. xiii, 8). Though the whole basin of the lake, and indeed the Jordan valley, is of volcanic origin, as evidenced by the thermal springs and the frequent earthquakes, yet the main formation of the surrounding wall of mountains is limestone. A large number of black stones and boulders of basaltic tufa are scattered along the slopes and upland plains, and dikes of basalt here

and there burst through the limestone strata in the neighborhood of Tiberias and along the northern shore. Although the surface of the lake is usually very placid, yet travellers (Thomson, *Land and Book*, ii, 32; Hackett, *Illustra. of Scripture*, p. 319) testify to the sudden fury of storms bursting down into this sunken basin through the ravined shore as in the days of our Saviour (Luke viii, 23; see Michaelis, *De tempstate*, etc., Hal. 1739; also *De sensu spirituali tempestatis*, etc., ib. cod.; Duthovius, *Divinus Chr. ex miraculo hoc demonstrata*, in the *Bibl. Brem.* i, 60-85; ii, 484-7).—Kitto, s. v. See GENNESARETH; SEA.

Galilee, a porch or chapel, usually at the west end of a church, where the monks collected on returning from processions, and where females were permitted to visit their relatives among the monks; also a portion of the church, usually a step lower than the rest of the church, deemed less sacred than the remainder of the edifice, and beyond which women were not permitted to pass. Three of them remain in England, at Durham, Lincoln, and Ely cathedrals. The galilee at Durham has five aisles and three altars, and the consistory court is held in it; that of Lincoln is at the south-west corner of the south transept, and is cruciform in shape; while that of Ely differs little from an entrance porch. (G. F. C.)

Galileo Galilei, one of the most celebrated Italian writers on natural sciences, mathematics, and astronomy, was born February 18, 1564. He at first studied medicine, but soon devoted himself wholly to natural and mathematical science. In 1589 he was appointed professor of mathematics at the University of Pisa. In 1592 he was called by the republic of Venetia to the University of Padua. From 1604 Galileo devoted himself chiefly to astronomy, and soon became as celebrated by his astronomical discoveries as he had formerly been by those in mathematics and mechanics. It was especially the introduction of the telescope in 1609 which gave a powerful impulse to his genius. He was the first to notice the mountains of the moon, the satellites of Jupiter, the ring of Saturn, and the spots on the sun; and from the motion of the latter he derived an argument in favor of the motion of the sun. Galileo published his discoveries in his *Sidereus nuncius* (1610). Soon the grand-duke of Tuscany called him as first professor of mathematics to Pisa, without obliging him to lecture, in order to give him an opportunity to devote himself wholly to scientific researches. But his reputation awakened against him a great deal of hatred and envy, and finally he was denounced to the Inquisition for defending and developing the Copernican system. The Inquisition found the views of Copernicus and Galileo irreconcilable with the letter of the Scripture. Galileo went himself to Rome to defend himself, but without effect. His astronomical views were examined by the theological qualifiers, and declared to be absurd, false in philosophy, and contrary to the Holy Scriptures. In 1616 and 1620, decrees were issued allowing to set up the system of Copernicus as a hypothesis, but forbidding it to be defended as a thesis. Galileo paid no attention to this demand, but sixteen years later published his "Dialogues on the two greatest cosmic systems, that of Ptolemy and that of Copernicus," in which the two systems are compared, and, to satisfy the Inquisition, the victory is awarded to the champion of the system of Ptolemy; but, in fact, the arguments used in its behalf are so weak, and so manifestly inferior to those adduced in favor of the Copernican system, as to leave no doubt as to the real opinions of Galileo. His enemies found it easy to cause new measures to be taken against him by the Inquisition. Galileo was in 1633 again summoned to Rome. He was at first allowed to live in the Villa Medici; subsequently he was some time detained as a prisoner in the buildings of the Inquisition; finally he

was sent back to the Villa Medici. The result of the investigation was that Galileo was found guilty of having adhered to and of having supported heretical opinions; and he had to abjure his errors in a kneeling posture, and to sign the minutes of the proceedings against him. He was condemned to be imprisoned at the Inquisition during pleasure, and to recite once a week for three years the penitential Psalms. Galileo submitted to the judgment, and, kneeling and in sackcloth, swore upon the Gospels never again to teach the earth's motion and the sun's stability. When rising from the ground, he is reported to have said, in an undertone, *E pur si muove* ("And it does move, for all that"); but the authenticity of this report is doubted. After four days' confinement, he was allowed to remove to the residence of the Tuscan ambassador, but he was kept under surveillance during the whole remainder of his life. In 1634 he asked permission to visit Florence for medical assistance, but the permission was not granted until 1638. The severity of the Inquisition was somewhat relaxed in 1637, when he became almost totally blind. During the latter years of his life he seems to have paid less attention to astronomy, but the works of this period on other subjects show that his genius was as great as ever. He died January 8, 1642. The city of Pisa erected a statue in his honor. The completed edition of the works of Galileo is *Le Opere di Galileo Galilei* (Florence, 1842-56, 15 vols.). The most important of his works is *Discorsi intorno a due nuove scienze* (Leyden, 1638). Biographies of Galileo were written by Ghirardini, Viviani (1651), Frisi (Livorno, 1775), Jagemann (Weimar, 1783), Nelli (Lausanne, 1793), Venturi (Milan, 1818-21), Libri (Milan, 1841), Brewster (London, 1841), Cattaneo (Milan, 1843), Caspar (Stuttgart, 1854), Chasles (Paris, 1862). On the trial of Galileo by the Inquisition, there are special works and essays by Marini (*Galileo e l'Inquisizione*, Rome, 1850); Madden (*Galileo and the Inquisition*, London, 1863); Vosen (*G. und die Röm. Verurtheilung des copernicanischen Systems*, Frankf., 1865); *The Catholic World* (Jan. and Feb. 1869). (A. J. S.)

**Galitzin.** See GALLITZIN.

**Gall**, the representative in the A. V. of two Hebrew words and one Greek.

1. *Mererak' or merorak'* (מֵרַרֶקֶת or מֵרַרֶקֶת; Sept.  $\chi\omicron\lambda\eta$ ,  $\kappa\alpha\kappa\acute{\alpha}$ ,  $\zeta\iota\alpha\tau\alpha$ ; Vulg. *fel*, *amaritudo*, *viscera nea*) denotes etymologically bitterness; see Job xiii, 26, "Thou writest bitter things against me." Hence the term is applied to the "bile" or "gall" from its intense bitterness (Job xvi, 13). The metaphors in this verse are taken from the practice of huntsmen, who first surround the beast, then shoot it, and next take out the entrails. The term also stands for the gall-bladder or vitals (Job xx, 25). It is also used of the "poison" of serpents (Job xx, 14), which the ancients erroneously believed was their gall: see Pliny, *H. N.* xi, 37, "No one should be astonished that it is the gall which constitutes the poison of serpents" (comp. Heb. xii, 15, "root of bitterness"). See LIVER.

2. *Rosh* (רֹשׁ or רֹשׁ; Sept.  $\chi\omicron\lambda\eta$ ,  $\pi\iota\kappa\rho\rho\acute{\iota}\alpha$ ,  $\alpha\gamma\rho\omega\sigma\tau\iota\varsigma$ ; Vulg. *fel*, *amaritudo*, *caput*), generally translated "gall" by the A. V., but in Hos. x, 4 rendered "hemlock;" in Deut. xxxii, 33, and Job xx, 16, it denotes the "poison" or "venom" of serpents. From Deut. xxix, 18, "a root that beareth *rosh*" (margin "a poisonous herb"), and Lam. iii, 19, "the wormwood and the *rosh*," compared with Hos. x, 4, "judgment springeth up as *rosh*," it is evident that the Heb. term denotes some bitter, and perhaps poisonous plant, though it may also be used, as in Psa. lxix, 21, in the general sense of "something very bitter." Celsius (*Hierob.* ii, 46-52) thinks "hemlock" (*Conium maculatum*) is intended, and quotes Jerome on Hosea in support of his opinion, though it seems that this commentator had in view the couch-grass (*Triticum repens*) rather than

"hemlock." Rosenmüller (*Bib. Bot.* p. 118) is inclined to think that the *Lolium temulentum* best agrees with the passage in Hosea where the *rosh* is said to grow "in the furrows of the field." Other writers have supposed, and with some reason (from Deut. xxxii, 32, "their grapes are grapes of *rosh*"), that some berry-bearing plant must be intended. Gesenius (*Theo.* p. 1251) understands "poppies;" Michaelis (*Suppl. Lex. Heb.* p. 2220) is of opinion that *rosh* may be either the *Lolium temulentum* or the *Solanum* ("nightshade"). Oedmann (*Vern. Samml.* pt. iv, c. 10) argues in favor of the *Colocynthis*. The most probable conjecture, for proof there is none, is that of Gesenius: the capsules of the *Papaveraceæ* may well give the name of *rosh* ("head") to the plant in question, just as we speak of poppy heads. The various species of this family spring up quickly in cornfields, and the juice is extremely bitter. A steeped solution of poppy heads may be "the water of gall" of Jer. viii, 14, unless, as Gesenius thinks, the מַרְרָה may be the poisonous extract, *opium*. This word is always used figuratively to represent sin, and never designates the animal secretion called gall. See HEMLOCK.

3. Gr.  $\chi\omicron\lambda\eta$ , prop. the bitter secretion gall. In the story of Tobit the *gall* of a fish is said to have been used to cure his father's blindness (Tobit vi, 8; xi, 10, 13). Pliny refers to the use of the same substance for diseases of the eye (*Hist. Nat.* xxxviii, 10); also speaking of the fish *callionymus*, he says it has a similar curative virtue (xxxii, 4, 7). Galen and other writers praise the use of the liver of the *silurus* in cases of dimness of sight. See BLINDNESS.

The passages in the Gospels which relate the circumstance of the Roman soldiers offering our Lord, just before his crucifixion, "vinegar mingled with gall," according to Matthew (xxvii, 34), and "wine mingled with myrrh," according to Mark's account (xv, 23), require some consideration. The first-named evangelist uses  $\chi\omicron\lambda\eta$ , which is the Sept. rendering of the Heb. *rosh* in the Psalm (lxix, 21) that foretels the Lord's sufferings. Mark explains the bitter ingredient in the sour vinous drink to be "myrrh" ( $\sigma\acute{\iota}\nu\omicron\varsigma \epsilon\sigma\mu\omega\nu\sigma\mu\acute{\epsilon}\nu\omicron\varsigma$ ), for we cannot regard the transactions as different. "Matthew, in his usual way," as Hengstenberg (*Comment.* in Psa. lxix, 21) remarks, "designates the drink theologically: always keeping his eye on the prophecies of the O. T., he speaks of gall and vinegar for the purpose of rendering the fulfilment of the Psalm more manifest. Mark again (xv, 23), according to his way, looks rather at the outward quality of the drink." Bengel takes quite a different view; he thinks both myrrh and gall were added to the sour wine (*Gnom. Nov. Test.* Matt. l. c.). Hengstenberg's view is far preferable; nor is "gall" ( $\chi\omicron\lambda\eta$ ) to be understood in any other sense than as expressing the bitter nature of the draught. As to the intent of the proffered drink, it is generally supposed that it was for the purpose of deadening pain. It was customary to give criminals just before their execution a cup of wine with frankincense in it, to which reference is made, it is believed, by the  $\sigma\acute{\iota}\nu\omicron\varsigma \kappa\alpha\tau\alpha\nu\acute{\omicron}\xi\omega\varsigma$  of Psa. lx, 3; see also Prov. xxxi, 6. This the Talmud states was given in order to alleviate the pain. See Buxtorf (*Lex. Talm.* col. 2131), who quotes from the Talmud (*Sanhed.* fol. 43, 1) to that effect. Rosenmüller (*Bib. Bot.* p. 163) is of opinion that the myrrh was given to our Lord, not for the purpose of alleviating his sufferings, but in order that he might be sustained until the punishment was completed. He quotes from Apuleius (*Metamor.* viii), who relates that a certain priest "disfigured himself with a multitude of blows, having previously strengthened himself by taking myrrh." How far the frankincense in the cup, as mentioned in the Talmud, was supposed to possess soporific properties, or in any way to induce an alleviation of pain, it is difficult to determine. The same must be said of the  $\sigma\acute{\iota}\nu\omicron\varsigma \epsilon\sigma\mu\omega\nu\sigma\mu\acute{\epsilon}\nu\omicron\varsigma$  of Mark, for it is quite certain

that neither of these two drugs in question, both of which are the produce of the same natural order of plants (*Amgrilaceæ*), is ranked among the hypnopoiotics by modern physicians. It is true that Dioscorides (i, 77) ascribes a soporific property to myrrh, but it does not seem to have been so regarded by any other author. Notwithstanding, therefore, the almost concurrent opinion of ancient and modern commentators, that the "wine mingled with myrrh" was offered to our Lord as an anodyne, we cannot readily come to the same conclusion. Had the soldiers intended a mitigation of suffering, they would doubtless have offered a draught drugged with some substance having narcotic properties. The drink in question was probably a mere ordinary beverage of the Romans, who were in the habit of seasoning their various wines, which, as they contained little alcohol, soon turned sour, with various, drugs, and perfumes, such as myrrh, cassia, myrtle, pepper, etc. (Smith, *Dict. of Class. Antiq.* s. v. Vinum).—Smith, s. v. See MYRRH.

**Gall, Nikolaus.** See GALLUS.

**Gall, St.,** monastery of, one of the most celebrated monasteries of Europe, at St. Gall, in Switzerland. It was founded in the 7th century. Its wealth and reputation became very great under Othmar, its first abbot (720-760), who founded a hospital for lepers in connection with the monastery. In the 8th century it became distinguished for learning, especially under abbot Gosbert (815-837). "The abbey of St. Gall gradually became one of the masterpieces of mediæval architecture; and the genius and skill which were lavished on its construction, and on the decoration of its halls and cloisters, had a large share in developing the Christian art of the period. The monks of St. Gall, too, may be reckoned among the best friends and preservers of ancient literature. They were indefatigable in the collection and transcription of MSS.—Biblical, patristic, sacred and profane history, classical, liturgical, and legendary. Several of the classics, especially Quintilian, Silius Italicus, and Ammianus Marcellinus, have been preserved solely through the MSS. of St. Gall. For a time the abbey was subject to the bishop of Constance, and an animated dispute was for a long time maintained between that prelate and the monks as to the right of electing the abbot. It ended, however, in the recognition of the right of free election; and ultimately, from the growth of the monastic possessions, and the important position which the abbot held, the monastic domain, which comprised a great part of northern Switzerland, became a distinct jurisdiction, within which the abbot, like many of his brethren in the great Benedictine monasteries, exercised all the rights of a suzerain. For several centuries the abbey of St. Gall held one of the highest places in the order. Its schools enjoyed wide reputation. Its members held a distinguished place among the scholars of mediæval Germany; and many of them, as, for example, Notker, are known to have cultivated not only the ordinary learning of the schools, but also physic, mathematics, and astronomy. The school of St. Gall, too, was one of the most eminent for the cultivation of music, and its MSS., preserved in its library, have been extensively made use of by the restorers of ancient ecclesiastical music. A town of considerable importance grew up around the monastery, and was called by the same name; and as the wealth and influence which attached to the dignity of the abbot began to make it an object of ambition to rich and powerful families, we find the succession of abbots, in the 13th and 14th centuries, sadly degenerated from their pious and learned predecessors in the office. A stringent reform was enforced about the time of the Council of Constance; but the burghers of St. Gall had grown dissatisfied under this rule, and on the out-

break of the Reformation in 1525 they threw off their subjection, and embraced the new doctrines. At the close, however, of the religious war in 1532, the Catholic religion was re-established, and the abbot reinstated, though with diminished authority, in his ancient dignity. At the French Revolution, the abbey of St. Gall was secularized (1798), and its revenues were soon afterwards sequestrated (1805). By a later ecclesiastical arrangement, the abbacy of St. Gall was raised to the dignity of a bishopric, which in 1823 was united to that of Chur. They were afterwards, however, separated, and in 1847 St. Gall was erected into a bishopric, with a distinct jurisdiction."—Chambers, *Encyclopædia*, s. v.; Herzog, *Real-Encyclopædie*, iv, 643.

**Gall, St., Manuscript** (CODÆX SANGALLENENSIS, usually designated as Δ of the Gospels), one of the most important of the later uncial MSS., containing the four Gospels (with only a single hiatus, John xix, 17-35) and an interlined Latin version, rudely written on coarse vellum in a very peculiar character. It comprises 197 leaves, 4to, 10 inches by 8½ in size, with 20 to 26 (usually 21) lines of text on each page. Before Matthew are placed prologues, Latin verses, the Eusebian canons in Roman letters, tables of the κεφάλαια in Greek and Lat., etc. The text is divided into regular στίχοι. There are also τίτλοι, and the Ammonian sections. It has so many resemblances to the Codex Boernerianus (G of Paul's epistles), as to show that they both once belonged together. See BOERNER MANUSCRIPT. The Gospel of Mark seems to represent a text different from that of the other evangelists. It agrees in general with the older MSS. There are scarcely any breathings or accents; the words are often wrongly divided, with dots at the end of almost every Greek word, and marks >>> inserted to fill up vacant spaces.

dixit uni eorū amice non iusto tibi nne  
 εἶπεν· μοναδί· αυτων· Ἐταρε· ουκ· ἀδικω· σε· Ουχι  
 ex denario convenisti μετ' tolle tuū et vade  
 ἡγραμου συνεφωρησας· μοι· Ἀρον· το· σον· κα· υπαγε  
 volo autē hūc novissimo dare sicut et tibi antā non it  
 Ἐλω δὲ τουτω τω εσχατω δοναι ωσ· κα· σοι· Η· ουκ· εἶ  
 Specimen of the Codex Sangallensis (Matt. xx, 13-15), in ordinary type.

This MS. is preserved in the monastery of St. Gall, Switzerland, where it was probably transcribed originally. It was first inspected by Gerbert in 1773, was named by Scholz (in his *N. T.* 1830), and has been published in a full lithographic fac-simile of every page by Rettig (Zürich, 1836), with Prolegomena. It seems to have been written by Latin (perhaps Irish) monks in the 9th century.—Scrivener, *Introd.* p. 122 sq.; Tregelles in Horne's *Introduction*, iv, 196 sq. See MANUSCRIPTS, BIBLICAL.

**Galland, ANDREA, or Gallandius, ANDREAS,** an Italian priest and abbot of the Oratorian congregation, was born at Venice Dec. 6, 1709, and died in the same city Jan. 12, 1779. He rendered great service to literature by his edition of the fathers, entitled *Bibliotheca Veterum Patrum, antiquorum que scriptorum eccl. Gr. et Lat.* (Venet. 1765-1781, 14 vols. fol.). It comprises in all 380 writers, and is considered to be one of the most accurate and useful of all the libraries of the fathers. He left in MSS. *Thesaurus Antiquitatis Ecclesiasticæ* (13 vols. fol.).—Hoefcr, *Nouv. Biog. Générale*, xix, 291.

**Gallas** ("invaders"), a race inhabiting the south and east of Abyssinia. "The general name by which the tribes designate themselves is *Oroma* (*orma*, men). Although generally belonging to the negro race, they are not purely negroes, but form with the Fulahs, Mandingoes, and Nubas, as it were, the transition to the Shemitic variety, and seem to belong to that great family inhabiting the east of Africa, from the frontiers

of the Cape land to Abyssinia, and usually denominated the Kafirs. They are a vigorous, well-formed people, of a dark-brown color, with hair frizzled, but not quite woolly, round faces, and small, sharp eyes, and are distinguished not less by their energy and warlike spirit than by their mental capacities. They first appear in history in the 16th century as a barbarous people, extending their conquests from the interior of Africa, laying waste, by constant incursions, the countries of Eastern Africa to the mountains of Abyssinia, gradually subduing or expelling the original inhabitants (hence their name), occupying great part of Abyssinia, and advancing as far as the Red Sea and the Gulf of Aden. It is only of late years that their power in Abyssinia, and their incursions into that country, have been partially checked, chiefly by the vigorous government of the king of Shoa, who has subdued some of the Gallas tribes, and induced them to profess such Christianity as exists in Abyssinia. They still, however, occupy many districts of Abyssinia, and extend their power to an indefinite extent over the countries situated south and south-west of it. Politically, the Gallas do not form a single nation, but are divided into numerous tribes, forming separate kingdoms and states, which are frequently at war with each other. Most of the Gallas follow pastoral avocations. Some, however, through intercourse with the semi-Christian, semi-civilized Abyssinians, have become tillers of the soil. The wandering Gallas are mainly engaged in hunting and the slave-trade. The larger number of the Gallas are still heathens, though Mohammedanism has lately made great progress among them. Their religion bears a resemblance to that of the Kafirs" (Chambers, s. v.). Compare Jomard, *Notices sur les Gallas* (Paris, 1839); Beke, *On the Origin of the Gallas* (London, 1848); Plowden, *Abyssinia and the Galla Country* (London, 1868). Behm (*Geograph.-Jahrbuch*, vol. i, Gotha, 1864) assigns to the Gallas a territory of about 280,000 sq. miles and 7,000,000 people. The Roman Catholic Church has a mission among the Gallas, which in 1841 was erected into a vicariate apostolic. The letters of the vicar apostolic, Massaia, in the *Annales de la Propag. de Foi*, are among the chief sources of our information on the Gallas. Massaia was the founder of the mission, and was in 1869 still at its head. (A. J. S.)

**Gallaudet**, THOMAS HOPKINS, LL.D., an eminent Congregational minister and philanthropist, was born Dec. 10, 1787, in Philadelphia. He graduated at Yale College in 1805, and was chosen tutor in 1808, which office he held two years, after which he was engaged in mercantile business until 1811, when he entered the theological seminary. In 1814 he received his license, and became pastor at Portsmouth. Here he became interested in a little deaf and dumb girl, Alice Cogswell, and instructed her with success. Her father, Dr. Cogswell, became the founder of an association for the aid of deaf mutes; and funds being provided, Mr. Gallaudet resigned his ministry, and went to Europe in 1815 to study the existing deaf and dumb institutions. At the London Deaf and Dumb Asylum he was refused admission except as junior assistant. He then went to Edinburgh, but there the teacher had learnt his system from the Messrs. Braidwood, and had been compelled to sign an engagement not to impart the method to any other person intending to become a teacher. He then betook himself to Paris, and was warmly received by the abbé Sicard. Everything was laid freely open to him. He was able to return to America before the close of 1816, and Sicard allowed Laurent le Clerc, a deaf-mute, who was one of the best teachers of the institution, to accompany him to America. During his absence in Europe the society had been incorporated; Mr. Gallaudet was now appointed its principal, Le Clerc being his head assistant, and on the 15th of April, 1817, *The American Asylum for the Deaf and Dumb*, at Hartford, Conn., was

formally opened. Mr. Gallaudet remained head of the asylum until 1830, when he resigned from failing health. The system which he established was founded on that of Sicard, with modifications. "It is known as the American system. The main principle with Mr. Gallaudet was to call out the intelligence of the pupil as much as possible, by exercising him in describing things for himself, and to discourage the mere learning by rote; and the result was to stimulate the mind of the teacher, as well as of the pupil, in no ordinary degree. Mr. Gallaudet's exertions were by no means confined to the deaf and dumb asylum. He took an ardent and active interest in the improvement and extension of common schools, and in the raising up of a superior body of teachers, and wrote several pamphlets on the subject. He also zealously advocated the adoption of means of imparting moral and religious training to prisoners, and was an earnest promoter of the movement for improving the management of the insane. So strongly did he feel on this matter, that, though in but feeble health, he accepted in 1838 the office of chaplain of the state *Retreat for the Insane* at Hartford, where, it is stated, 'the experience of each successive year furnished accumulating evidence of the usefulness of his labors, and the efficacy of kind moral treatment and a wise religious influence in the melioration and care of the insane.'" He died Sept. 10, 1851. Besides a number of tracts and essays on the education of the deaf and dumb, and on the treatment of the insane, he published *Discourses on various Points of Christian Faith and Practice* (London, 1818, 8vo);—*Remarks on Teachers' Seminaries* (1826);—*The Child's Book on the Soul* (1830, often reprinted, and translated into most European languages);—*Scripture Biography* (5 vols. 1838-1844). See HUMPHREY, *Life and Labors of Gallaudet* (N. Y. 1857, 12mo); *English Cyclopædia*; Sprague, *Annals*, ii, 609.

**Gallery**, an architectural term describing the porticoes or verandas which are not uncommon in Eastern houses. See HOUSE. It is doubtful, however, whether two of the three Hebrew words so translated have any reference to such an object. See ARCHITECTURE.

1. גָּלֵרִיָּה, *attik'* (Ezek. xli, 15 [where the text has גָּלֵרִיָּה, *attuk'*], 16; Sept. ἀπόλοιπον; xlii, 3, 5, Sept. περίστουλον; according to Gesenius, from גָּלַץ, to cut off; according to Fürst, from an obsolete גָּלַץ, to set off), by some thought to mean (as in xlii, 6) *pillars* or columns (so Villalpandus, Cocceius); by others a *decrement* or *terrace* (so Gesenius, Fürst, Hävernick, Hitzig), as the context requires (Böttcher, *Froben*, p. 350). See TEMPLE. The ancient interpreters are wholly at fault; the Sept. renders ambiguously, the Talmud "corners," the Syr. "balustrade," and the Jewish interpreters confess their ignorance (Kimchi, Jarchi).

2. רַחִיט', *rachit'* (Cant. i, 17; either, with Fürst, from an obsolete root רָחַץ, to trim, or, with Gesenius, for רָחַץ, *rachit'*, as in the margin), prob. *panel-work* or *fretted ceiling* (so Sept. φανόματα, Vulg. *laquearia*, A. V. "rafters," marg. "gallery"). See CEILING. In consequence of the var. read. in the Masoretic text (q. d. *ambulatory* or place of exercise), this term has been confounded with

3. נַחֲת', *ra'hat* (from נָחַת, to flow down; spoken of watering-troughs, Gen. xxx, 38, 41; Exod. ii, 16), curled locks or *ringlets* of a maiden (Cant. vii, 6; Sept. παραδρομή, Vulg. *canalis*). See HAIR.

**Gallery**, originally a banqueting hall. The word is now applied, in ecclesiastical architecture, to any floor elevated above the floor of a main audience room of a church, and built to contain hearers. Galleries of this kind date from the time of the Reformation, though somewhat similar galleries existed in the Byzantine churches. Narrow covered passage-ways,

within or without a church, especially in Romanesque churches, are also termed galleries. (G. F. C.)

**Galley** is the rendering in the A. V. in one passage (Isa. xxxiii, 21) of *גליות*, *oni'*, a *ship or fleet*, elsewhere rendered "navy." See **SIMP.**

Ancient Assyrian Galley.

**Gallican Church**, a name often given to the Roman Catholic Church of France. The peculiar spirit of that Church, especially with regard to its relations to Rome, is called **GALLICANISM**. The term is especially used with reference to the principles of the French Church, in opposition to Ultramontanism (the extreme papal view of Church polity), as embodied in the four articles of 1682 (see below). But it is historically certain that from a very early period the national Church of France had a character and spirit of freedom peculiar to itself, and that the roots of the so-called modern Gallicanism are to be traced far back into antiquity (see Bossuet's sermon at the opening of the Assembly of 1682, and his *Defensio Declarationis*, and our article **FRANCE**).

The Frankish Church, in the time of Charlemagne, assumed a form and gave evidence of a spirit marked by the national temper, and obviously different from the Italian ideal of the Church as organized under the pope. In almost every century thereafter the monarchs and bishops of France resisted what they held to be unauthorized claims on the part of Rome. Nevertheless, the Gallican spirit often yielded, and not unfrequently the French bishops were themselves, in part at least, ultramontane. The French Parliaments were generally on the side, naturally, of the Gallican spirit. Hincmar, bishop of Rheims († 882), manfully stood by his king, Charles the Bald, when pope Adrian II attempted to drive him from the throne. Charles himself, in an epistle to Adrian, "argues respecting the distinction between the temporal and the spiritual power, and also alleges the peculiar supremacy of the kings of France. To prove these and similar points, he refers not only to the archives of the Roman Church, but to the writings of St. Gelasius, St. Leo, St. Gregory, and even St. Augustine himself. (See *Hist. Littéraire de la France*, Fleury, i, lii, s. 8, 22.) Hincmar wrote many of that king's letters, and may probably have been the author of this" (Waddington, *History of the Church*, chap. xiv). But no formal attempt to fix the position of the Church in France on a basis of independence was made by any of the monarchs of the country before Louis IX (St. Louis, † 1270). His "Pragmatic Sanction" (A. D. 1268) was directed chiefly against the pecuniary claims and extortions of Rome. It is comprised in six articles: (1.) The churches, the prelates, the patrons, and the ordinary collators of benefices, shall enjoy their rights to their full extent, and each shall be sustained in his jurisdiction. (2.) The cathedral and other churches shall possess the liberties of elections, which shall be carried into complete effect. (3.) We will that simony, the pest of the Church, be wholly banished from our kingdom. (4.) Promotions, collations, provisions and dispositions of prela-

tures, dignities, and other ecclesiastical benefices and offices, whatsoever they may be, shall be made according to the institutions of common law, of the councils, and of our ancient fathers. (5.) We renew and approve of the liberties, franchises, prerogatives, and privileges granted by the kings our predecessors, and by ourselves, to churches, monasteries, and other places of piety, as well as to ecclesiastical persons. (6.) We prohibit any one from in any manner levying and collecting the pecuniary exactions and heavy charges which the court of Rome has imposed, or may hereafter impose, upon the Church of our kingdom, and by which it has been miserably impoverished—unless it be for a reasonable and very urgent cause, or by inevitable necessity, and with the free and express consent of the king and of the Church. See *Ordonnances des Rois de France de la troisième race recueillies par M. de Laurière* (Paris, 1723, folio), i, 97. In the Latin text, "the chief points are: statumimus et ordinamus primo ut ecclesiarum regni nostri prelati, patroni, et beneficiorum collatores ordinarii jus suum plenarium habeant, et unicuique sua jurisdictioni debite serventur. II. Item ecclesie cathedrales et alie regni nostri liberas electiones et earum effectum integraliter habeant.—V. Item exactiones et onera gravissima pecuniarum per Curiam Romanam ecclesie regni nostri impositas vel imposita, quibus regnum nostrum miserabiliter depauperatum exitit, sive etiam imponenda vel imponenda, levari aut colligi nullatenus volumus, nisi duntaxat pro rationabili, pia et urgentissima causa, et inevitabili necessitate, ac de spontaneo et expresso consensu nostro et ipsius ecclesie regni nostri. The conclusion: Harum tenore universis justitiaris, officiaris et subditis nostris—mandamus, quatenus omnia et singula preedicta diligenter et attente servent—atque servari—inviolabiliter faciant: nec aliquid in contrarium quovis modo faciant vel attentent, seu fieri vel attentari permittant: transgressores aut contra facientes—tali pena plectendo, quod cæteris deinceps cedat in exemplum. The genuineness of this document, which is questioned chiefly by P. Daniel, is shown by E. Richer, *Hist. concil. general.*, lib. iii, p. 189; *Libertés de l'église Gallicane*, edit. ann. 1771, t. iii, p. 633, 667; Velly, *Hist. de France*, t. iii, p. 239" (Gieseler, *Church History*, per. iii § 62).

The "liberties" of the Gallican Church, according to Bossuet, were substantially set forth in these ordinances. The Gallican spirit was also strongly shown in the disputes between Philip le Bel and Boniface VIII towards the end of the 13th century, which disputes culminated in the bull *Unam Sanctam*, and in the abduction and death of the pope, A. D. 1303. See **BONIFACE VIII**. The questions involved in these disputes were vital ones: the authority of the pope in temporals, the royal prerogative, and the power of the episcopacy as related to the supremacy of the pope. The Gallican writers vindicated the rights of the Church and the supremacy of councils over the pope with brilliant talents and solid learning. The Roman writers nevertheless maintained the papal claims unwaveringly, but with little success, in France. In 1455 the bishop of Nantes undertook to appeal from a royal ordinance to the pope, but the Parliament of Paris decided that he had violated the privileges of the French Church, as well as the fundamental laws of the kingdom. The Pragmatic Sanction of Bourges, called the "great bulwark of the Gallican Church against Rome," was adopted at the Synod of Bourges in 1438, and confirmed by the Parliament July 13, 1459. It involved two great principles: 1. That the pope has no authority in the kingdom of France over anything concerning temporals. 2. That, though the pope is acknowledged as sovereign lord in spirituals, his power even in these is restricted and controlled by the canons and regulations of the ancient councils of the Church received in the kingdom. (For details, see **BOURGES**, **PRAGMATIC SANCTION**

OF.) Louis XI himself strongly repressed all ultramontane reaction against the decisions of the French assemblies, or against the immunities of the national church. The ultramontanists obtained a temporary success in the revocation of the Pragmatic Sanction of Bourges in 1512 by the Council of Lateran, with the renunciation of it by Francis I (1516), with the understanding that his concordat with Leo X secured to him its substantial benefits. This act was instigated by certain private aims of the king's, and by the hope of his chancellor, Duprat, obtaining the dignity of cardinal. But this revocation gave rise to a long resistance by the Parliament and the Sorbonne, and to great anger and even turbulence of spirit among the French people. The effects of the revocation were practically insignificant, and Gallicanism only showed itself the more energetic and active afterwards. The Pragmatic Sanction of Bourges was, it is true, abrogated, but the fundamental principles established at the councils of Pisa, Constance, and Basle, which inspired that sanction, remained intact as a guide for the opinions of the nation and of the clergy, while the antipathy of the Parliaments against ultramontanism became still more deeply rooted. The decrees of the Council of Trent (1545-1663) were, indeed, intended to supplant and supersede those of the earlier councils, but from among them France admitted only such as agreed with her own policy, with the privileges of the king, and with the customs and usages of her Church. Gallicanism was greatly advanced, in fact, by the issues of the Council of Trent, and by the discussions to which they gave rise. The numerous writings of Pithou (q. v.; † 1596) on the canon law gave true scientific and ecclesiastical expression to the tenets of Gallicanism. What Pithou advances in behalf of the Gallican Church in his *Corpus Juris Canonici*, in his *Codex Canonum*, and in his *Gallicæ Ecclesiæ in schismate status*, were by him collected in eighty-three articles, in 1594, in the *Libertés de l'église gallicane* (1633, 2 vols. fol.), by the aid of which it became easy both for the laity and the clergy to see how far the questions involved were questions of order and organization, and how little they applied to religion or dogmas. Pithou himself condensed the eighty-three articles into two: (1.) That the pope has no right of interference with the king's prerogative in temporals; (2.) That he cannot enforce a decision in spirituals in contradiction with those of the councils received in the kingdom. Ultramontanism, however, continued to assert its claims with the usual persistence of Rome. Cardinal Duperron, and the two succeeding cardinals and prime ministers of Louis XIII and Louis XIV, Richelieu and Mazarin, maintained the Concordat. But, in spite of the Concordat, the Sorbonne presented the six celebrated *Declarations* following to the king, May 8, 1663: 1. The pope has no authority over the king's temporal power. 2. In temporals the king has no superior but God. 3. The subjects of the king cannot be released from their fealty and obedience under any pretexes whatsoever. 4. It is inconsistent with the king's prerogative, and with the freedom of the Gallican Church, that the pope should depose bishops contrary to the decrees of councils. 5. It is not the doctrine of the Church that the pope is superior to general councils. 6. It is not matter of dogma that the pope is infallible, apart from the concurrence of the Church.

As Pithou was the legal pillar of Gallicanism, so Bossuet became its ecclesiastical champion. Under his guidance, the *Assemblée du clergé* of 1682 asserted the Gallican liberties, in the celebrated *Declaration du clergé de France*, which was upheld by the monarch and by all the state authorities. It runs as follows: "I. St. Peter and his successors, vicars of Jesus Christ, and the whole Church itself, have received power from God only over things spiritual, and which concern salvation, and not over things temporal and civil; Jesus Christ teaching us himself that his kingdom is not of

this world; and in another place, that we must render to Cæsar the things of Cæsar, and to God the things of God; and thus that precept of St. Paul can in nothing be altered or overthrown. Let every person be subject to the higher powers, for there is no power but comes from God, and it is he who ordains those that are on the earth. He, then, who opposes himself to the powers, resists the order of God. We, in consequence, declare that kings and sovereigns are not subject to any ecclesiastical power by the order of God in temporal matters; that they cannot be deposed, directly or indirectly, by the authority of the keys of the Church; that their subjects cannot be dispensed from the submission and obedience which they owe them, and absolved from the oath of fidelity; and that this doctrine, necessary for the public peace, and not less advantageous to the Church than the state, ought to be inviolably followed, as conformable to the word of God, the tradition of the holy fathers, and the examples of the saints. II. The plenitude of power which the holy apostolic see and the successors of St. Peter, vicars of Jesus Christ, have over spiritual is such, that nevertheless the decrees of the holy General Council of Constance, contained in the fourth and fifth sessions, approved by the holy apostolic see, confirmed by the practice of all the Church and the Roman pontiffs, and religiously observed at all times by the Gallican Church, remain in all their force and virtue; and that the Church of France does not approve the opinion of those who attack these decrees, or who enfeeble them by saying that their authority is not well established, that they are not approved, or that they are in force only in time of schism. III. That thus the use of the apostolic power must be regulated in following the canons made by the Spirit of God, and consecrated by the general respect of all the world; that the rules, the manners, and the constitutions received in the kingdom and in the Gallican Church ought to be maintained, and the usages of our fathers remain unassailable; and that the greatness of the holy apostolic see itself requires that the laws and customs established with the consent of that respectable see and the churches remain invariable. IV. Although the pope has the chief post in the questions of faith, and his decrees regard all the churches, and each church in particular, yet his judgment is still not unalterable, until the consent of the Church intervene. We have resolved to send to all the churches of France, and to the bishops who preside in them by the authority of the Holy Ghost, these *maxims* which we have received from our fathers, in order that we may all say the same thing, and that we may all be in the same mind, and that we may all follow the same doctrine."

The *Declaration du clergé de France* was sent to the pope, with an address from Bossuet. Alexander VIII annulled the declaration, but the clergy maintained their ground, although Louis XIV himself condescended to a step which was by some considered as a retraction. In consequence of this difficulty with Rome, the French Church found itself in 1691 with thirty-five bishoprics vacant; the king allowed the twelve signers of the declaration, whom he had nominated as bishops, but whom the pope had for ten years refused to recognise as such, to retract all which had displeased the pontiff. The king himself stated that he had given orders so that his edict of March 22, 1682, which had been promulgated in view of the then existing circumstances, should no longer have effect. But that he did not abandon the Gallican maxims is proved in his letter of July 7, 1713, directed to cardinal La Tremouille, and addressed to the See of Rome, wherein he enforced the recognition, as bishop of Beauvais, of the abbot of St. Aignan, who had defended the four propositions in a thesis in 1705. The position of the question was still more clearly defined by the decision of the *Conseil de Régence* of 1718, that the bishops could dispense with the papal inauguration bull, as, "the Sor-

bonne having so decided, the national churches could again avail themselves of the right suspended by the Concordat."

Gallicanism fell into disgrace through the political events of 1790 to 1800, and particularly through the *Constitution civile du clergé*, which was by many considered as a revolutionary triumph of Gallicanism over Ultramontaniam, and which resulted in the synods of 1795 and 1797 submitting themselves to the papal authority. Stanch Gallicans, on the other hand, found that the concordat of 1801 did not do justice to Gallicanism, and they regretted still more the forcible rejection of the Concordat of 1813, which would have somewhat restored their position. This led to a fierce internal conflict during the following years, in which Joseph de Maistre, Louis de Bonald, and François de Lamennais stand forth as the most prominent characters. Yet the four "principles" of 1682 have kept their authority under all the forms of government, republic, empire, and restored monarchy; they are received by the new university as they were by the old, and, whenever occasion demands it, are immediately brought forth. See FRANCE. They were recognised as law by the imperial ordinance of Feb. 25, 1810, and there is no likelihood of their being ever abrogated. In the present altered state of things there is no occasion for upholding or enforcing them, but should at any day a reactionary tendency be manifested, the state councils would again bring the Gallican doctrine forward as emphatically as did the decree of 1766 (*arrêt du conseil d'état* du 24 Mai), which stated that the rights and privileges enjoyed by the ecclesiastical body in the kingdom "*sont des concessions des souverains dont l'Eglise ne peut faire usage sans leur autorité*," which is also stated in the *Constitution civile du clergé* (1790).

The principles of 1682 are recognised as fundamental in the present French empire, but the majority of the French bishops are at present ultramontane. Political ultramontaniam, however, is extinct, in spite of the reassertion of its antiquated formulas by papal writers. The old system of taxation at the will of the court of Rome cannot be revived. The *hierarchy* is indestructible; for, so long as papacy retains its character, and so long as the French Church remains Roman Catholic, so long must the supremacy of the papal chair be upheld; and the favorite expression "National Church" is only correct in a restricted sense, since, not being independent, it cannot really be altogether national. Only in moments of high excitement did Gallicanism entertain the idea of having a separate, particular, independent patriarch. As to liturgical and even dogmatical ultramontaniam, it is complained of in periodicals and pamphlets, and even by bishops, and the old Gallicanism is appealed to against it, but with the less success, as there is a tendency to agree with Rome in dogmas and liturgies, for fear of her still exorbitant power, and also with the general aim of unity, so dear to the Roman Catholic mind. That the French nation, its episcopate, or its clergy will ever become Italianized, is neither to be hoped by Rome nor feared by France. Bossuet's statement to the cardinal d'Estrées is as correct now as it was when first written by him: "Trois points peuvent blesser les Romains: l'indépendance de la temporalité des rois; la juridiction épiscopale immédiatement de Jésus-Christ, et l'autorité des conciles. Vous savez bien que sur ces trois choses on ne blesse point en France." This is the true Gallican doctrine; other issues have arisen only as the effects of the momentary excitement of conflict.

As for the ruling powers of the Church of Rome at present, they hold Gallicanism to be simply the decayed, but not defunct view of a sect within the Church. For the revival of Gallican principles in Germany, see HONTHEIM. A good exponent of opinion is given by the fact that in Wetzer and Welte's

*Kirchen-Lexikon*, the best Roman Catholic Cyclopædia ever issued, to which the best and most learned German Roman Catholic theologians are contributors, Gallicanism is throughout classed with Jansenism as a pernicious mode of ecclesiastical thought. The reception of the dogma of the Immaculate Conception by the Church of France was a violation of the old Gallican spirit.

*Literature.*—See, besides the voluminous writings of Pithou and Bossuet on this subject, Maimbourg, *Traité historique de l'église d. Rome* (Paris, 1686, 4to); *Hist. du droit public franç. ecclési.* (Lond. 1737); J. de Maistre, *De l'égl. gallic.* (1 vol. 8vo); *Du Pape* (2 vols. 8vo); André Dupin, *Défence de la loi organique d. concordat; Les libérs. de l'église Gall.* (Paris, 1824, 12mo); Bordas-Dumoulin, *Les pouvoirs constitutifs de l'église* (Paris, 1855, 8vo); Fr. Huet, *Le Gallie., son passé, s. situation présente dans l'ordre polit. et relig.* (Paris, 1855); Fleury, *Discours sur les libérs. d. l'égl. gallic.*; Grégoire, *Essai hist. sur les libérs. d. l'égl. gallic.* (two editions); Frayssinon, *Les vrais principes de l'église gallic.* (three editions); Chausel de Montals (a French bishop of decided Gallican views), *Efféts probables d. disputes sur les art. Gall.* (1858); *Portrait fidèle de l'égl. gallic.* (1854); *Mémoire (anonyme) sur la situation présente d. l'église gallic., et ses maximes renvies contre les attaques de Monsieur le Comte de Montalembert*; Herzog, *Real-Encyclop.* iv, 647 sq. (from which much of this article is translated); Guettée, *Histoire de l'église de France* (12 vols. 8vo); Guettée's periodical journal *L'Observateur Catholique*; Dupin, *Manuel du droit public ecclésiastique français* (Paris, 1845); Phillips, *Kirchenrecht*, iii, 339-365; Hare, *Contest with Rome* (London, 1852), 209 sq.; *Westminster Review*, xii, 213; *North British Review*, xiii, 241; Ranke, *History of the Popes* (passim); *Erit. and For. Evang. Review*, October, 1866, art. iii; Gesselin, *Power of the Popes* (London, 1852, 2 vols. 8vo). See POPE, TEMPORAL POWER OF.

**Gallican Confession** (*Confessio Gallicana*). The *Confession of Faith of the Gallican Churches* was proposed and accepted at the first synod held by the Reformed at Paris in 1559. In 1560 it was presented to Francis II, and in 1561 it was presented to Charles IX, king of France, by Theodore Beza. This confession has been repeatedly printed, and in various forms, both separately and together, with Bibles, Psalters, Catechisms, and other ecclesiastical publications of the Reformed French Church. It is thoroughly Calvinistic in doctrine, and is supposed by many to have been written by Calvin himself, but there is no sufficient ground for the opinion (Niemeyer, *Prof.* xlix). It is given in Latin by Niemeyer, *Collectio Confessionum* (Lips. 1840, 311 sq.).

**Gallican Liturgy.** See LITURGY.

**Gallienus**, PUBLIUS LICINIUS, a Roman emperor, became sole sovereign A.D. 260, and was assassinated at Milan in 268. His reign is memorable in Church history, as he gave peace to the Christians by an edict in which he recognised the Church as a *civil corporation*.—Eusebius, *Hist. Eccl.* vii, 13; Hase, *Ch. Hist.* § 48.

**Gallim** (Heb. *Gallim'*, גַּלִּים, *heaps*, or perhaps *fountains*), a place which is twice mentioned in the Bible: (1.) As the native place of the man to whom Michal, David's wife, was given—"Phalti, the son of Laish, who was from Gallim" (גַּלִּים, 1 Sam. xxv, 44; Sept. *Πόμμα*; Josephus *Γελλία*, *Ant.* vi, 13, 8); but there is no clew to the situation of the place. In 2 Sam. iii, 15, 16, where Michal returns to David at Hebron, her husband is represented as following her as far as Bahurim, i. e. on the road between the Mount of Olives and Jericho (comp. 2 Sam. xvi, 1). But even this does not necessarily point to the direction of Gallim, because Phalti may have been at the time with Ishbosheth at Mahanaim, the road from which would naturally lead past Bahurim. (2.) The name occurs

again in the catalogue of places terrified at the approach of Sennacherib (Isa. x, 30; Sept. Γαλλίη): "Lift up thy voice, O daughter (i. e. inhabitant) of Gallim! attend, O Laish! poor Anathoth!" The other towns in this passage—Aiath, Michmash, Ramah, Gibeah of Saul—are all, like Anathoth, in the tribe of Benjamin, a short distance north of Jerusalem. It should not be overlooked that in both these passages the names Laish and Gallim are mentioned in connection. Possibly the *Ben-Laish* in the former implies that Phalti was a native of Laish, that being dependent on Gallim. Its site was unknown to Eusebius and Jerome (*Onomast.* s. v. Γαλλίη, Gallim), although from hearsay (Λέγεται) they place a village of a similar name (Γαλλαία) near Accaron (Ekron). Schwarz (*Palest.* p. 131) reports a *Beit-Djallin* between Ramleh and Joppa, but by other explorers the name is given as *Beit-Dejan*. Porter suggests the little village of *Himsch* as a suitable locality (*Handb. for Syria*, p. 214); but there are no ruins there, as at *Khirbet el-Haiyeh* (Ruins of the Serpents), on a low tell, a little farther N. E., containing the remains of an ordinary village, with a cistern in the middle (Robinson, *Later Researches*, p. 288).

Among the names of towns added by the Sept. to those of Judah in Josh. xv, 59, Gallim (Γαλλίη v. r. Γαλλίη) occurs between Karem and Thether. In Isa. xv, 8, the Vulgate has Gallim for *Eglithim*, among the towns of Moab.—Smith, s. v.

**GAL'IO** (Græcized Γαλλιόν), a son of the rhetorician M. Annaeus Seneca, and elder brother of Seneca the philosopher. His name was originally *M. Ann. Novatus*, but changed to JUNIUS ANNEUS (or ANNIE-NUS) GALLIO, in consequence of his adoption by L. Junius Gallio the rhetorician (Pliny, *Hist. Nat.* xxxi, 33; Tacitus, *Annal.* xvi, 17; Quintil. *Inst. Orat.* iii, 1, 21; ix, 2, 91). Seneca dedicated to him his treatise *De Vita Beata*, and in the preface to the fourth book of his *Naturalis Questiones* describes him as a man universally beloved (comp. Stat. *Silv.* ii, 7, 32); and who, while exempt from all other vices, especially abhorred flattery. Dion Cassius (ix, 35) mentions a witty but bitter joke which he made in reference to the persons put to death by Claudius. According to Eusebius, he committed suicide before the death of Seneca (*Theaurus Temporum*, p. 161, Amstel. 1658), but Tacitus speaks of him as alive after that event (*Annal.* xv, 73), and Dion Cassius states that he was put to death by order of Nero (see Antonii *Bibl. Hispan.* vet. i, 121 sq.). One writer (Gelpo, *De familiarit. Pauli c. Senec.* Lips. 1813, p. 18) thinks that Seneca was converted through the instrumentality of Paul. He was *Proconsul* (ἀρχιπραιβύτης, Tex. rec.; ἀρχιπαίρων ὄντος, Tischendorf) of Achaia (Acts xviii, 12) under the emperor Claudius, when Paul first visited Corinth, and nobly refused to abet the persecution raised by the Jews against the apostle (see Dannhauer, *De Gallionismo*, Argent. 1664; also in his *Disp. theol.* p. 175 sq.), A. D. 49. See ACILIA. Dr. Lardner has noticed the strict accuracy of Luke in giving him this designation, which is obscured in the Auth. Vers. by the use of the term *deputy* (*Credibility*, pt. 1, bk. i, ch. i; *Works*, i, 34). See PROCONSUL. He is said to have resigned the government of Achaia on account of the climate not agreeing with his health (see Seneca, *Ep.* 104).—Kitto, s. v. See PAUL.

**Gallitzine** or **Galitzin**, DMITRI AUGUSTIN, son of the Russian princess Amalie of Gallitzine, was born at the Hague Dec. 22, 1770. His mother was an enthusiastic Roman Catholic convert, and under her influence he joined the Roman Church at seventeen. He entered the Austrian army, and served with it in the Netherlands in 1792. He set out, after leaving the army, for a journey in America, and on the voyage was led by the counsels of a missionary named Brosius to turn his mind to the priesthood. He was ordained

March 18, 1795, and devoted his life to missionary labors. In 1799 he selected a spot among the Alleghanies as the seat of a Roman Catholic town, and founded Loretto, now a town of several thousand inhabitants, with Roman Catholic schools for boys and girls in the neighborhood. As "Father Smith" he labored extensively in the wild region of the Alleghanies, and left enduring marks of his energy, faith, and devotion throughout that country. He died at Loretto May 6, 1840. He published a *Defence of Catholic Principles* (Pittsburg, 1816; new edit. Dublin, 1867);—*Appeal to the Protestant Public* (Pittsburg, 1818), and other small works.

**Gallows** (גָּלוּת, *ets, a tree or wood*), a post or gibbet, rendered in Esth. 6, 4 "gallows," but in Gen. xi, 19, and Deut. xxi, 22, "tree." Hanging appears to have been a punishment practised among the Egyptians and other ancient nations, as well as among the Hebrews. See PUNISHMENT.

**Galluppi**, PASQUALE, an Italian philosopher, was born at Tropea, in Calabria Ultra, April 2, 1770, and died at Naples in November, 1846. The groundwork of his education was laid at Tropea under the instructions of J. A. Ruffa, and he afterwards completed his studies at the University of Naples, in which institution he subsequently became professor of philosophy. In his writings he combated the philosophical doctrines in vogue in the 18th century, and strove to re-establish Italian philosophy on its old bases, recognizing in man's nature a double element, the spiritual and material, in accord with the philosophy of the Church fathers. His first work, a pamphlet, dated 1807, on Analysis and Synthesis, sets forth his philosophical method. Shortly after it he published his *Essay on Knowledge*, in four books, treating (1) of knowledge, (2) of the analysis of the faculties of the human mind, (3) of the analysis of ideas, and (4) of the legitimate reasons of our judgments and our errors. His *Saggio Filosofico sulla critica della conoscenza* (Naples, 1819, 6 vols. 8vo) contains an examination of the principal doctrines of ideology, Kantianism, and the transcendental philosophy. His *Elements of Philosophy* (*Elementi di Filosofia*, Messina, 1832) treats successively of pure logic, psychology, mixed logic, and morals, and has been often reprinted. In 1827 Galluppi published twelve *Letters on Philosophy* (*Lettere filosofiche sulle vicende della Filosofia*, etc.), of which a 2d edition appeared in 1838, and a French translation by Peisse in 1844. His other works are, *Filosofia della Volontà* (Naples, 1835–42, and Milan, 1845);—*Considerazioni filosofiche sull' Idealismo transcendente e sul Razionalismo assoluto* (Naples, 1841; Milan, 1846);—*Lezioni di Logica e di Metafisica* (Naples, 1842, 5 vols.);—*Storia della Filosofia* (Naples, 1842);—*Elementi di Teologia Naturale* (Naples, 1844, 4 vols.).—Hoefler, *Now. Biog. Générale*, xix, 334–5. (J. W. M.)

**Gallus, Cestius** (Græcized Κέστιος Γάλλος), son of C. Cestius Gallus Camerinus, a Roman senator of consular rank, was president ("legatus," Suetonius, *Vesp.* 4) of Syria, A. D. 64, 65, at the time of the final Jewish war (Tacitus, *Hist.* v, 10). Maddened by the tyranny of Gessius Florus (q. v.), the Jews applied to Gallus for protection; but, though he sent Neapolitanus, one of his officers, to investigate the case, and received from him a report favorable to the Jews, he took no effectual steps either to redress their injuries, or to prepare for any outbreak into which their discontent might drive them. When at last he found it necessary to act, he marched from Antioch, and, having taken Ptolemais and Lydda, advanced on Jerusalem. There he drove the Jews into the upper part of the city and the precincts of the Temple, and he might, according to Josephus, have finished the war at once, had he not been dissuaded by some of his officers from pressing his advantage. Soon after he unaccountably drew off his forces (leaving an interval of which the

Christians availed themselves to escape, according to our Saviour's direction, Luke xxi, 21, 22), and was much harassed by the Jews, who took from him a quantity of spoil. Nero was at this time in Achaia, and Gallus sent messengers to him to give an account of his affairs, and to represent them as favorably as possible for himself. The emperor, much exasperated, commissioned Vespasian to conduct the war; and the words of Tacitus (*ut sup.*) seem to imply that Gallus died before the arrival of his successor, his death being probably hastened by vexation (Josephus, *Life*, 43; *War*, ii, 14, 3; 16, 1, 2; 18, 9, 10; 19, 1-9; 20, 1; iii, 1).—Smith, *Dict. of Class. Biog.* s. v. See GOVERNOR.

**Gallus, C. Vibius Trebonianus**, Roman emperor (early history unknown), was elected to the throne A.D. 251. His reign was disgraced by concessions to the Goths, and by a renewal of the persecution of the Christians. See PERSECUTION. He was assassinated A.D. 253 or 254.

**Gallus, St. Gal, St. Gilian, or St. Gall**, was a native of Ireland, born about 560, and a disciple of Columban (q. v.). He founded the celebrated abbey of St. Gall (q. v.), in Switzerland, of which he was made abbot A.D. 614. He died in 646, Oct. 16, which is his day in the Roman Calendar. There are no writings of his except a sermon in Canisius, *Lectiones Antiq.* i, 781, in Galland, *Bib. Patr.* xii, 721, and in Migne, *Patrolologia Latina*, vol. lxxxvii.

**Gallus (or Gallo), Thomas**, a French theologian, who died Dec. 5, 1246, was a member of the regular Augustines, canon of the congregation of St. Victor of Paris, and in 1223 was appointed abbot of St. Andrew of Verceil, by which latter title he is frequently exclusively designated. The name Gallus is regarded by some as only the Latinized form of his real name, *Cog*; by others as indicating his nationality; while others suppose that he was of Italian origin. Gallus taught at St. Victor and other Augustine establishments, and, when abbot of Verceil, drew around him the best professors of Northern Italy, achieving for himself and his monastery a European reputation in theology and ecclesiastical learning. J. Gerson (q. v.), in the preface to his Commentary on the Canticles, praises highly Gallus's *Explications du Cantique des Cantiques* (published, with commentary, by Halgrin, Paris, 1521, and Lyons, 1571, fol.). This work was published at Rome in 1666 under the care of J. Magloire, together with a decree of the Congregation of the Index forbidding its publication under the name of *Scotus*, showing that it had been attributed to the celebrated Irish philosopher. Another work of Gallus's (*Traduction paraphrasée des livres sur la hiérarchie et la théologie mystique attribués à Saint Denis l'Aréopagite*) is found in the *Theologia Mystica* of J. Eckhius (Ingolstadt, 1519), and in the *Commentarius in S. Dionysii Aréopagite Opera* of Dionysius the Carthusian (Cologne, 1536). Léon Alacci (*Ipse urbanae*) erroneously attributes to Gallus some sermons (*Sermones*) which belong to John, abbot of Vincelles.—Hoefer, *Nouv. Biog. Générale*, xix, 345; Oudin, *Comment. de Scriptoribus ecclesiasticis*, iii, 9. (J. W. M.)

**Gam'aël** (Γαμαήλ v. r. Γαμαλιήλ), given (1 Esdr. viii, 29) as the name of one of the chief Levites that returned from the captivity, instead of the DANIEL (q. v.) of the Heb. text (Ezra viii, 2).

**Gamal**. See CAMEL; GENALLI.

**Gamāla** (τὰ Γάμαλα, so called from its situation on a ridge like a camel's hump, Josephus, *War*, iv, 1, 1), a town of trans-Jordanic Palestine, in the district of Gamalitis (Josephus, *War*, iii, 3, 5) or Lower Gaulanitis (*ib.* iv, 1, 1), first mentioned as a fortress reduced by Alexander Jannæus (*ib.* i, 4, 8); it retained its allegiance to Rome on the first outbreak of the final hostilities (Josephus, *Life*, 11), but afterwards revolted, and was so strongly fortified by Josephus (*ib.* 37), as

to be only taken after a siege of seven months by a desperate assault (*War*, iv, 1, 2). It was situated on the Lake of Tiberias, opposite Taricheæ (*ib.* iv, 1, 1). Schwarz is inclined, from a notice in the Talmud and certain local traditions, to place it between Hurim and Kedesh in Naphtali (*Palest.* p. 190); and Pliny speaks of a Galilean town of the same name (*Hist. Nat.* v, 13); but this position is not to be thought of (see Reland, *Palest.* p. 784). Lord Lindsay found the site in the steep insulated hill east of the lake opposite Tiberias (*Travels*, ii, 92), now called *El-Hussn*, between the village of Fik and the shore, "having extensive ruins of buildings, walls, and columns on its top" (Burckhardt, *Syria*, p. 278). This identification is confirmed by Thomson, who gives a detailed description of the spot (*Land and Book*, ii, 47 sq.); though Ritter thinks, on account of Josephus's mention of a large place back of the fortress, we should rather locate it at *Khan el-Akubah*, as described by Seetzen (*Erkunde*, xv, 350). See CAPHAR-GAMALA.

**Gama'iel** (Heb. *Gamliel*, גַּמְלִיֵּאל, *reward of God*; Sept. and N. T. Γαμαλιήλ), the name of two men in Scripture.

1. Son of Pedabzur, and chief (נֹרִאָה) of the tribe of Manasse at the census at Sinai (Numb. i, 10; ii, 20; vii, 54, 59), and at starting on the march through the wilderness (x, 23). B.C. 1657.

2. A Pharisee and celebrated doctor of the law, who gave prudent and humane advice in the Sanhedrim respecting the treatment of the followers of Jesus of Nazareth (Acts v, 34 sq.), A.D. 29. We learn from Acts xxii, 3 that he was the preceptor of the apostle Paul. He is generally identified with the very celebrated Jewish doctor Gamaliel, who is known by the title of "the glory of the law," and was the first to whom the title "Rabban," "our master," was given. The time agrees, and there is every reason to suppose the assumption to be correct. He bears in the Talmud the surname of גַּמְלִי, "the elder" (to distinguish him from a later rabbin of the same name), and is represented as the son of Rabbi Simeon, and grandson of the famous Hillel: he is said to have occupied a seat, if not the presidency, in the Sanhedrim during the reigns of Tiberius, Caligula, and Claudius, and to have died eighteen years after the destruction of Jerusalem (see Lightfoot, *Centuria chorographica Matthæo præmissa*, ch. xv). But, as this statement would give him an extreme old age, it may perhaps refer to the later Gamaliel; and the elder probably died about A.D. 50. Ecclesiastical tradition makes him become a Christian, and be baptized by Peter and Paul (Phot. Cod. 171, p. 199), together with his son Gamaliel, and with Nicodemus; and the Clementine Recognitions (i, 65) state that he was secretly a Christian at this time. But these notices are altogether irreconcilable with the esteem and respect in which he was held even in later times by the Jewish rabbins, by whom his opinions are frequently quoted as an all-silencing authority on points of religious law (see Thilo, *Codec. Apoc.* p. 501; Neander, *Planting and Training*, i, 46, Bohn). Neither does his interference in behalf of the apostles at all prove—as some would have it—that he secretly approved their doctrines. He was a dispassionate judge, and reasoned in that affair with the tact of worldly wisdom and experience, urging that religious opinions usually gain strength by opposition and persecution (Acts v, 36, 37), while, if not noticed at all, they are sure not to leave any lasting impression on the minds of the people, if devoid of truth (ver. 38); and that it is vain to contend against them, if true (ver. 39). That he was more enlightened and tolerant than his colleagues and contemporaries is evident from the very fact that he allowed his zealous pupil Saul to turn his mind to Greek literature, which, in a great measure, qualified him afterwards to become the apostle of the Gentiles; while by the laws of the Pales-

tinian Jews, after the Maccabean wars, even the Greek language was prohibited to be taught to the Hebrew youth (Mishna, *Sotah*, ix, 14). Another proof of the high respect in which Gamaliel stood with the Jews long after his death is afforded by an anecdote told in the Talmud respecting his tomb, to the effect that Onkelos (the celebrated Chaldaean translator of the Old Testament) spent seventy pounds of incense at his grave in honor of his memory (*Yuchasin*, 59). These last notices, however, have been shown to refer to Gamaliel II, the grandson of the apostle's teacher (comp. Grätz, in Frankel's *Monatschrift*, i, 320; *Geschichte der Juden* [Lpz. 1856], iii, 289; iv, 114, 152; Jost, *Gesch. der Juden* [Lpz. 1857], i, 281; and especially Frankel's *Hodegetien in Mishnam* [Lips. 1859], p. 57 sq., where all the fragments about Gamaliel are collected).—Kitto, s. v. See Kitto's *Daily Bible Illust.* in loc.; Pfaffreuter, *Diss. de consil. Gamal.* (Jen. 1680); Conybeare and Howson, *St. Paul*, i, 56, 67; Graun, *Hist. Gamalielis* (Viteb. 1687); Baier, *De consilio Gamalielis* (Jen. 1680); Bucher, *De Θεωμάχου* (Viteb. 1681); Chladenius, *De Θεωμάχου* (Viteb. 1715); Lange, *Julicium Gamalielis* (Hal. 1715); Meulengracht, *De religione Gamalielis* (Hafn. 1698); Palmer, *Paulus u. Gamaliel* (Giess. 1806).

**GAMALIEL BAR SIMON**, also called **GAMALIEL OF JAENE**, or the *younger*, was born about A.D. 50. He was a man of great erudition; was the teacher of Aquila, author of a Greek translation of the O. T., and of Onkelos, the Chaldee translator of the Pentateuch. Like his father, he labored earnestly to introduce the Platonic philosophy into Jewish theology. On the death of Jochanan ben Zachai, he was elected to the presidency of the rabbinical college at Jamnia. Shortly after his accession he reconstituted the Sanhedrim, which, though divested at this time of all secular authority, nevertheless exerted a great influence on the moral life of the Jews of their time. By the vigorous measures which Gamaliel adopted, he made many enemies, and was even for a time deposed from the presidency, and instead of being superseded by his lineal descendant, as had been customary, R. Eleazar b. Azzariah, was elected, and a re-examination of all the opinions which Gamaliel affirmed to belong to the Hillel school was ordered by the Sanhedrim. About twenty years before Christ a division arose among the Jewish rabbis, and the result was the founding of a separate rabbinical college, called "School of Shamai." When the Sanhedrim entered upon a re-examination of Gamaliel's doctrines, they "decided in favor of the opinions which were in harmony with the most ancient traditions, *irrespective of schools*." "This collection of decisions is called *Elnjoth* (עֲלֵנוֹת, *collection of witness*) or *Bechirah* (בְּחִירָה, *selection*). Among the decisions reconsidered was the opinion about the *book of Ecclesiastes* and the *Song of Songs*, which constituted one of the differences between the school of Shammai and Hillel." The former excluded and the latter included them in the canon, and "after a minute investigation of the evidence, it was found that, according to the most ancient traditions, these books were regarded as inspired, and hence the *former decision* of the school of Hillel was confirmed, viz. that the said books should be retained in the canon" (*Jadwin*, iii, 5; *Edjoth*, v, 3). Gamaliel was, however, reinstated in his position, but with defined and restricted power; and the regard in which he was held at the time of his death, about A.D. 116, is evinced by Onkelos, "who showed him royal honors at his funeral, and burned costly garments and furniture to the amount of *seventy Tyrian minæ*, i. e. about twenty-one pounds sterling. Such a funeral pile was generally raised only to kings."—Kitto, *Cyclopædia of Biblical Literature*, ii, 62; Etheridge, *Introduction to Hebrew Literature*, p. 59; Hoefler, *Nouv. Biog. Gén.* xix, 382. (J. H. W.)

**Gamba, FRANCIS**, a native of Como, one of the

Protestant martyrs of the 16th century. He was apprehended and condemned to death by the senate of Milan. At the place of execution a monk presented a cross to him, to whom he said, "My mind is so full of the real merits and godness of Christ, that I want not a piece of senseless stick to put me in mind of him." His tongue was perforated to prevent his addressing the crowd, but he gave a sign with his hand indicating peace and confidence. He was then strangled, and his body was burnt after his death, July 21, 1554.—Fox, *Book of Martyrs*, ii, 473; McCrie, *Reformation in Italy*, chap. v.

**Gambold, JOHN**, a pious bishop of the Moravians, was born April 10, 1711, at Punchedon, South Wales, and was educated at Christ Church, Oxford. In 1733 he became vicar of Stanton Harcourt, in Oxfordshire; but in 1742 he joined the Moravians, and was consecrated bishop in 1754. "And certainly few, in any age of the Church, ever possessed, in a higher degree, the spiritual qualifications which the apostle specified as distinguishing a good bishop—fervor of devotion, humility of mind, disinterestedness of spirit, a disposition to universal benevolence, and a willingness to undertake any labor, or submit to any privation, in order to promote the glory of God and the spiritual welfare of men. From the time of his consecration, he resided for ten years, performing all the duties of a primitive bishop over the Moravian congregation, in the metropolis, and at the same time maintaining an active oversight by correspondence with all the ministers of his communion throughout England." He died Sept. 13, 1771. Among his writings are *A Memoir of Count Zinzendorf:—Doctrine and Discipline of the United Brethren:—History of the Greenland Mission of the United Brethren:—Hymns* (1748):—*Summary of Christian Doctrine* (1767, 12mo). His *Works* were edited, with an introductory essay, by Thos. Erskine, Esq. (Glasg. 1822, 12mo).—Jamieson, *Cyclopædia of Biography*, s. v.

**Games** are so natural to man, especially in the period of childhood, that no nation has been or can be entirely without them. (I.) Accordingly, a few traces are found in the early Hebrew history of at least private and childish diversions. The heat of the climate in Syria would indispose the mature to more bodily exertion than the duties of life imposed, while the gravity which is characteristic of the Oriental character might seem compromised by anything so light as sports. Dignified ease, therefore, corresponds with the idea which we form of Oriental recreation. The father of the family sits at the door of his tent, or reclines on the house-top, or appears at the city gate, and there tranquilly enjoys repose, broken by conversation, under the light and amid the warmth of the bright and breezy heavens, in the cool of the retiring day, or before the sun has assumed his burning ardors (Deut. xvi, 14; Lam. v, 14). Of the three classes into which games may be arranged, juvenile, manly, and public, the first two alone belong to the Hebrew life; the latter, as noticed in the Bible, being either foreign introductions into Palestine, or the customs of other countries.

1. With regard to juvenile games, the notices are very few. It must not, however, be inferred from this that the Hebrew children were without the amusements adapted to their age. The toys and sports of childhood claim a remote antiquity; and if the children of the ancient Egyptians had their dolls of ingenious construction, and played at ball (Wilkinson, *Anc. Egypt.* abridgm. i, 197), and if the children of the Romans amused themselves much as those of the present day (Horace, 2 *Sat.* iii, 247), we may imagine the Hebrew children doing the same, as they played in the streets of Jerusalem (Zech. viii, 5; comp. Jer. xxx, 19). The only recorded sports, however, are keeping tame birds (Job xli, 5; compare Catull. 2, 1), and imitating the proceedings of marriages or funerals (Matt. xi,

16). Commenting on Zech. xii, 3, Jerome mentions an amusement of the young which is seen practised in more than one part of the north of England. "It is customary," he says, "in the cities of Palestine, and has been so from ancient times, to place up and down large stones to serve for exercise for the young, who, according in each case to their degree of strength, lift these stones, some as high as their knees, others to their middle, others above their heads, the hands being kept horizontal and joined under the stone." A similar mode of exercise prevailed in ancient Egypt (Wilkinson, i, 207). See CHILDREN.

Ancient Egyptians lifting Bags of Sand.

Music, song, and dancing were recreations reserved mostly for the young or for festive occasions. From Lam. v, 16, "the crown is fallen from our head" (see the entire passage on the subject of games), it might be inferred that, as among the Greeks and Latins, chaplets of flowers were sometimes worn during festivity. To the amusements just mentioned frequent allusions are found in holy writ, among which may be given Psa. xxx, 11; Jer. xxxi, 13; Luke xv, 25. In Isa. xxx, 29, a passage is found which serves to show how much of festivity and mirth was mingled with religious observances; the journey on festival occasions up to Jerusalem was enlivened by music, if not by dancing. Some of the chief objects aimed at in the Greek and other games were gained among the Hebrews by their three great national festivals—the Passover, the Feast of Weeks, and the Feast of Tabernacles. At the recurrence of these festivals the nation was brought together in honor of the true God; and in times of religious feeling these great meetings were looked forward to and were celebrated with perhaps not less joy, though joy of a somewhat different kind, from that with which the Greeks looked forward to and celebrated their Olympic, Isthmian, and Nemean games. The public games of the Hebrews seem to have been exclusively connected with military sports and exercises, and even of these the notices are few and brief. It was probably in this way that the Jewish youth were instructed in the use of the bow and of the sling (1 Sam. xx, 20, 30-35; Jude xx, 16; 1 Chron. xii, 2). Allusion to what would seem to have been a kind of wardance, such as we read of in different countries, seems to be made in 2 Sam. ii, 14, where Abner proposes that the young men should arise and "play" before the two armies. The Hebrew שָׁחַק (*shachak*), for "play," is frequently used for dancing (2 Sam. vi, 21; Jer. xxxi, 4); and Abner seems here to refer to a sport of this kind, not now to be used as an amusement, but turned into stern real-

ity. This may indicate the practice among the ancient Israelites of games somewhat similar to the jousts and tournaments of the Middle Ages. On the subject of dancing, see Michaelis, *Mosaische Recht*, article 197. No trace is found in Hebrew antiquity of any of the ordinary games of skill or hazard which are so numerous in the Western world. Dice are mentioned by the Talmudists (*Mishna, Sanhedr.* iii, 3; *Shabb.* xxiii, 2), probably introduced from Egypt (Wilkinson, ii, 424); and, if we assume that the Hebrews imitated, as not improbably they did, other amusements of their neighbors, we might add such games as odd and even, *mora* (the *micare digitis* of the Romans), draughts, hoops, catching balls, etc. (Wilkinson, i, 188). If it be objected that such trifling amusements were inconsistent with the gravity of the Hebrews, it may be remarked that the amusements of the Arabians at the present day are equally trifling, such as blind man's buff, hiding the ring, etc. (Wellsted's *Arabia*, i, 160). See SPORT.

2. With regard to manly games, they were not much followed up by the Hebrews; the natural earnestness of their character and the influence of the climate alike indisposed them to active exertion. The chief amusement of the men appears to have consisted in conversation and joking (Jer. xv, 17; Prov. xxvi, 19). The military exercise noticed above in 2 Sam. ii, 14, if intended as a sport, it must have resembled the *jeu de la paille*, with the exception of the combatants not being mounted; but it is more consonant to the sense of the passage to give the term there used the sense of *fencing or fighting* (Thenius, *Comm.* ad loc.). Even among the active Egyptians, however, whose games have been figured on their mural tablets, we find little that suggests a comparison with the vigorous contests of the Grecian games. One of the most remarkable is the following, showing what appears to be play with the single-stick (Wilkinson, i, 206). In some instances

Ancient Egyptians Fencing.

wrestling or similar athletic exercises are exhibited on the Egyptian monuments, and even *women* are represented as tumbling in like sportive manner; but

Ancient Egyptian Men swinging Women round by the Arms.

their favorite sport appears to have been the more sordid game of draughts, which even royalty did not disdain to share (Wilkinson, i, 189 sq.). See *PLAY*.

3. Public games were altogether foreign to the spirit of the Hebrew institutions; the great religious festivals supplied the pleasurable excitement and the feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such gatherings should be exclusively connected with religious duties. Accordingly, the erection of a *gymnasium* by Jason, in which the discus was chiefly practised, was looked upon as a heathenish proceeding (1 Macc. i, 14; 2 Macc. iv, 12-14), and the subsequent erection by Herod of a theatre and amphitheatre at Jerusalem (Josephus, *Ant.* xv, 8, 1), as well as at Caesarea (*Ant.* xv, 9, 6; *War.* i, 21, 8) and at Berytus (*Ant.* xix, 7, 5), in each of which a quinquennial festival in honor of Cæsar was celebrated with the usual contests in gymnastics, chariot-races, music, and with wild beasts—was viewed with the deepest aversion by the general body of the Jews (*Ant.* xv, 8, 1). In the Old Testament two passages contain a clear reference to games: Psa. xix, 5, "Rejoiceth as a strong man to run a race;" Eccl. ix, 11, "I said that the race is not to the swift." The entire absence of verbal or historical reference to this subject, however, in the Gospels shows how little it entered into the life of the Jews. Some of the foreign Jews, indeed, imbibed a taste for theatrical representations; Josephus (*Life*, 3) speaks of one Aliturus, an actor of farces (*μυμολόγος*), who was in high favor with Nero. (See Eichhorn, *De Jubeor. re scenica*, in the *Comment. Goetting. Rec.*)

(H.) Among the Greeks, on the other hand, and subsequently among the Romans likewise, the rage for theatrical exhibitions was such that every city of any size possessed its theatre and stadium. At Ephesus an annual contest (*ἀγὼν καὶ γυμνικός καὶ ποσειδώνος*, Thucyd. iii, 104) was held in honor of Diana, which was superintended by officers named Ἀσιάρχαι (Acts xix, 31; A. V. "chief of Asia"). See *ASLARCHI*. It is possible that Paul was present when these games were proceeding, as they were celebrated in the month of May (see Conybeare and Howson's *St. Paul*, ii, 82); but this hardly agrees with the notes of time in Acts xx, 1-3, 16.

1. *Roman Beast-fights and Gladiatorial Shows.*—(1.) A direct reference to the exhibitions that took place on such occasions is made in the term *ἔθρο μάχιστα*, "I fought with beasts" (1 Cor. xv, 32). The *θηρμαχία* or beast-fight (*venatio* in Latin) constituted among the Romans a part of the amusements of the circus or amphitheatre. It consisted in the combat of human beings with animals. The persons destined to this barbarous kind of amusement were termed *θηρομαχοί*, *bestiarii*. They were generally of two classes: 1. Voluntary, that is, persons who fought either for amusement or for pay: they were clothed and provided with offensive and defensive weapons. 2. Con-

Ancient Roman Beast-fighter.

demned persons, who were mostly exposed to the fury of the animals unclothed, unarmed, and sometimes bound (Cicero, *Pro Sext.* 64; *Ep. ad Quint. Frat.* ii, 6; Seneca, *De Benef.* ii, 19; Tertull. *Apol.* 9). Political offenders especially were so treated, and Josephus (*War.* vii, 3, 1) records that no less than 2500 Jews

were destroyed in the theatre at Caesarea by this and similar methods. The expression as used by Paul is usually taken as metaphorical, both on account of the qualifying words *κατ' ἄθροπον*, "after the manner of a man," the absence of all reference to the occurrence in the Acts, and the rights of citizenship which he enjoyed: none of these arguments can be held to be absolutely conclusive, while, on the other hand, the term *θηρομαχίαν* is applied in its literal sense in the apostolical epistles (Ignatius, *ad Eph.* 1; *ad Trall.* 10; *Mart. Polyc.* 3; comp. Euseb. *E. H.* iv, 15), and, where metaphorically used (Ignatius, *ad Rom.* 5), an explanation is added which implies that it would otherwise have been taken literally. Certainly Paul was exposed to some extraordinary suffering at Ephesus, which he describes in language borrowed from, if not descriptive of, a real case of *θηρομαχία*; for he speaks of himself as a criminal condemned to death (*ἐπιθανάσιον*, 1 Cor. iv, 9; *ἀποκρίμα τοῦ θανάτου ἰσχυράμεν*, 2 Cor. i, 9), exhibited previously to the execution of the sentence (*ἀπέδειξεν*, 1 Cor. i. c.), reserved to the conclusion of the games (*ἰσχυρόν*), as was usual with the *theriomachi* ("novissimos elegit, velut bestiarios," Tertull. *De Pudic.* 14), and thus made a spectacle (*θεῖατρον ἰσχυρίσθημεν*). Lightfoot (*Exercit.* on 1 Cor. xv, 32) points to the friendliness of the asiarchs at a subsequent period (Acts xix, 31) as probably resulting from some wonderful preservation which they had witnessed. Nero selected this mode of executing the Christians at Rome, with the barbarous aggravation that the victims were dressed up in the skins of beasts (Tacitus, *Ann.* xv, 44). Paul may possibly allude to his escape from such torture in 2 Tim. iv, 17. As none but the vilest of men were in general devoted to these beast-fights, no punishment could be more condign and cruel than what was frequently inflicted on the primitive Christians, when they were hurried away "to the lions" (as the phrase was), merely for their fidelity to conscience and to Christ its Lord. Ephesus appears to have had some unenviable distinction in these brutal exhibitions (Schleusner, *Lex. s. v.*), so that there is a peculiar propriety in the language of the apostle.

Of these beast-fights the Romans were passionately fond. The number of animals which appear to have been from time to time engaged in them is such as to excite in the reader's mind both pity and aversion. Sylla, during his praetorship, sent into the arena no fewer than 100 lions, which were butchered by beings wearing the human shape. Pompey caused the destruction in this way of 600 lions. On the same occasion there perished nearly twenty elephants. These numbers, however, are small compared with the butchery which took place in later periods. Under Titus, 5000 wild and 4000 tame animals, and in the reign of Trajan, 11,000 animals, are said to have been destroyed. See Smith, *Dict. of Class. Ant.* s. v. *Bestiarii*.

(2.) The fights of the gladiators with one another was also a common practice at Rome. It began B. C. 264, and increased to such a fearful extent that on a single occasion, in honor of the triumph of the emperor Trajan over the Dacians, 10,000 gladiators fought for the amusement of the people. They were at first composed of captives or

Ancient Figure of the famous Gladiator Baton.

condemned malefactors, but afterwards, as the passion for blood grew stronger, free-born citizens, men of noble birth, and even women, fought after this fashion. The spectators betted on their favorite gladiators with much the same feelings as they betted on the favorite horses which ran before them in the circus. See Smith, *Dict. of Class. Ant.* s. v. *Gladiatores*.

The games and theatrical exhibitions of the heathen were regarded by the early Christians with as strong disapprobation as they were by the Jews generally, and for better reasons (Neander's *Church Hist.* i, 365, § iii). National antagonism to everything foreign as such had much effect in producing Jewish opposition to the games. It was as ministering in themselves and by their attendant circumstances to the lusts of the flesh and of the eye, as producing almost of necessity a cruel temper in the beholders, and running counter to the moral feeling, modesty, and sobriety of the Christian character, that the public spectacles and games of the heathen were ranked among those pomps and vanities which the Christians were obliged to renounce by their baptismal vow. Even the better-minded among the heathen regarded these games with disapproval. Pliny the consul speaks with approval of Junius Mauricius, who expressed an earnest wish that they could be abolished at Rome (Pliny's *Letters*, iv, 22); nor does Tacitus appear to treat them with much greater respect (*Hist.* iii, 83). Rome added to the Greek example features of cruelty which were unknown in the original Grecian games; and there was one feature of difference between the Grecian and Roman games which rendered the former a much more fitting illustration of the Christian life than the latter were, namely, that in the Grecian games the most eminent men in the land came forward and contended personally for victory, while in Rome the most eminent men were merely spectators of the contests of their inferiors (Gibbon, *Decline and Fall*, chap. xl, p. 11). Diomed and Menelaus, Antilochus and Ajax, and Ulysses, the kings, great warriors, and wise men of the Grecian states, deemed it an honor to contend for victory in their countries' games, and even old Nestor, the Homeric type of perfection in the qualities of mind and body, regretted that his years prevented him from joining in the glorious strife (*Iliad*, xxiii, 634); but "a senator, or even a citizen, conscious of his dignity, would have blushed to expose his person or his horses in the circus of Rome." See Smith's *Dict. of Class. Ant.* s. v. *Ludi*.

2. *Grecian Prize or Gymnastic Contests*.—The scriptural allusions (Gal. ii, 2; v, 7; Phil. ii, 16; iii, 14; 1 Tim. vi, 12; 2 Tim. ii, 5; Heb. xii, 1, 4, 12) are the more appropriate, because the Grecian games were in their origin and in their best days intimately connected with religion. Games in Greece were very numerous. They are traceable by tradition back to the earliest periods of Grecian civilization. Indeed, much of the obscurity which rests on their origin is a consequence and a sign of their high and even mythic antiquity. See Smith, *Dict. of Class. Ant.* s. v. *Athletæ*.

(1.) Four of these games stood far above the rest, bearing the appellation of *ἱεροί*, "sacred," and deriving their support from the great Hellenic family at large, though each one had special honor in its own locality: these four were the Olympic, Pythian, Nemean, and Isthmian. The first were held in the highest honor. The victors at the Olympic games were accounted the noblest and happiest of mortals, and every means was taken that could show the respect in which they were held. These games were celebrated every five years at Olympia, in Elis, on the west side of the Peloponnesus. Hence the epoch called the Olympiads.

The gymnastic exercises were laid down in a well-planned systematic series, beginning with the easier (*κοῖνὰ*), and proceeding on to the more difficult (*βαρῆα*). Some of these were specially fitted to give

strength, others agility; some educated the hands, others the feet. Among the lighter exercises was reck-

Ancient Leapers.

oned running (*δρόμος*), leaping (*ἄλμα*), quoiting (*εἰς-*

Ancient Game of Quoits.

*κοε*), hurling the javelin (*ἀκόντιον*). When skill had been obtained in these, and the consequent strength, then followed a severer course of discipline. This was twofold—1, simple; 2, compound. The simple con-

sisted of wrestling (*πάλη*), boxing (*πυγμαί*): the com-

Ancient Boxers.

compound we find in the *pentathlon* (*πένταθλον*, *quinquertium*, the five contests), made up of the union of leaping, running, quoiting, wrestling, and in hurling the spear; and in the *pankration* (*παγκράτιον*, general trial of strength), which consisted of wrestling and boxing. It is not necessary here to speak in detail of the distinctions which Galen makes between the ordinary motions of the body and those which were re-

Ancient hurling the Javelin.

quired in these exercises, since the names themselves are sufficient to make manifest how manifold, severe, long, and difficult the bodily discipline was, and the inference is easy and unavoidable that the effect on the bodily frame must have been of the most decided and lasting kind. See EXERCISE (BODILY).

*Racing*, which is the kind of contest chiefly referred to in the N. T., may be traced back to the earliest periods of Grecian antiquity, and may be regarded as the first friendly contest in which men engaged. Accordingly, the Olympic and Pythian, probably also the other games, opened with foot-races. Foot-racing, perfected by systematic practice, was divided into different kinds. If one ran merely to the end of the course (*στάδιον*), it was called stadium; if one went thither and back, he ran the double course (*δίανδρος*).

Ancient Foot-race.

The longest course was the *δολιχος*, which required extraordinary speed and power of endurance. What it involved the ancients have left in no small uncertainty. It is sometimes given as seven times over the stadium; at others, twelve times; at others again, twenty; and even the number of four- and twenty times is mentioned. In the preparatory discipline everything was done which could conduce to swiftness and strength. The exercises were performed with the body naked and well oiled. Minute directions were established in order to prevent foul play (*κακοτεχνία, κακούργια*), of any kind, so that all the competitors might start and run on terms of entire equality. The contest was generally most severe; to reach the goal sooner by one foot was enough to decide the victory. See Smith, *Dict. of Class. Antiq.* s. v. Stadium. See DISCUS; LEAPING; WRESTLING.

Olympic Chariot-race.

Besides the athletic games above described, there were others, consisting of racing in chariots, on horseback, or with torches; and still others, in which the parties strove to excel one another in skill in playing upon various instruments. See RACE.

At the Olympic games the prize was simply a chaplet made of wild olive. The crowns were laid on a tripod, and placed in the middle of the course, so as to be seen by all. On the same table there were also exposed to view palm-branches, one of which was given into the hand of each conqueror at the same time with the chaplet. The victors, having been summoned by proclamation, were presented with the ensigns of victory, and conducted along the stadium, preceded by a herald, who proclaimed their honors, and announced their name, parentage, and country. The real reward, however, was in the fame which ensued. A chaplet won in the chariot-races at Olympia was the highest of earthly honors. What congratulations from friends; how was the public eye directed to the fortunate conqueror; what honor had he conferred on his native city, and for what office was such a one not fit! With what intense and deep delight must his bosom have been filled when the full acclaim of assembled Greece fell upon his ear, coming in loud salutations and applauses from every part of the crowded course! Then came the more private attentions of individual friends. One brought a chaplet of flowers; another bound his head with ribbons. Afterwards came the triumphal sacrifice made to the twelve gods, accompanied by sumptuous feasting. The poet now began his office, gaining in some cases, both for himself and the happy victor, an unexpected immortality. Music also lent her aid, and his name was sung wherever the noble accents of the Greek tongue asserted their supremacy. In order to perpetuate the memory of these great men, their names and achievements were entered into a public register, which was under the care of suitable officers. A no less privilege was that of having a statue of themselves placed, either at the expense of their country or their friends, in the sacred grove of Jupiter. A perhaps still greater honor awaited the victor on his return home. The conquerors at the Isthmian games were wont to be received in their chariots, superbly attired, amid thronging and jubilant multitudes. One or two other privileges belonged to these victors, such as immunity from public offices, and a certain yearly stipend. At the Isthmian games the prize was ivy during the mythic periods. In later ages the victor was usually crowned with a chaplet of pine-leaves. If the conqueror had come off victorious in the three great divisions—music, gymnastics, and racing—he was in the Pythian, as well as in the other sacred games, presented also with a palm-branch. See Smith's *Dict. of Class. Antiq.* s. v. Isthmian, Olympian, Nemean, Pythian Games severally. See CROWN.

Corinthian Coin of Antoninus, with Isthmian Crown.

(2.) Paul's epistles (as above) abound with allusions to the Greek contests, borrowed probably from the Isthmian games, at which he may well have been present during his first visit to Corinth (Conybeare and Howson, ii, 206). These contests (*ἀγώνων*—a word of general import, applied by Paul, not to the *fight*, as the A. V. has it, but to the *race*, 2 Tim. iv. 7; 1 Tim. vi. 12) are minutely illustrated by his references, in which they are used as a figure of the Christian's

course of duty and struggle with opposing influences. The competitors (*ὁ ἀγωνιζόμενος*, 1 Cor. ix, 25; *ἐν ἀθλῷ τις*, 2 Tim. ii, 5) required a long and severe course of previous training (comp. *σωματικὴ γυμνασία*, 1 Tim. iv, 8), during which a particular diet was enforced (*πάντα ἐγκρατεύεται, ἐουλαγωγῶ*, 1 Cor. ix, 25, 27). In the Olympic contests these preparatory exercises (*προγυμνάσματα*) extended over a period of ten months, during the last of which they were conducted under the supervision of appointed officers. The contests took place in the presence of a vast multitude of spectators (*περικείμενον νέφος μαρτύρων*, Heb. xii, 1), the competitors being the spectacle (*θεάτρον=θέαμα*, 1 Cor. iv, 9; *θεαζόμενοι*, Heb. x, 33). The games were opened by the proclamation of a herald (*κηρῦξας*, 1 Cor. ix, 27), whose office it was to proclaim the name and country of each candidate, and especially to announce the name of the victor before the assembled multitude, as well as to signify the other crises of the game. Certain conditions and rules were laid down for the different contests, as, that no bribe be offered to a competitor; that in boxing the combatants should not lay hold of one another, etc.; any infringement of these rules (*ἐὰν μὴ νομίμως ἀθλήσῃ*, 2 Tim. ii, 5) involved a loss of the prize, the competitor being pronounced disqualified (*ἀδόκιμος*, 1 Cor. ix, 27, "cast-away," a term that seems to picture the condition of one disgraced by being adjudged unfit to enter the lists or rejected after the game was over). The judge was selected for his spotless integrity (*ὁ ἕκαστος κριτής*, 2 Tim. iv, 8): his office was to decide any disputes (*βραβεύειτω*, Col. iii, 15; A. V. "rule") and to give the prize (*τὸ βραβεῖον*, 1 Cor. ix, 24; Phil. iii, 14), consisting of a crown (*στέφανος*, 2 Tim. ii, 5; iv, 8) of leaves of wild olive at the Olympic games, and of pine, or, at one period, ivy, at the Isthmian games. These crowns, though perishable (*φθαρτόν*, 1 Cor. ix, 25; comp. 1 Pet. v, 4), were always regarded as a source of unflinching exultation (Phil. iv, 1; 1 Thess. ii, 19): palm-branches were also placed in the hands of the victors (Rev. vii, 9). Paul alludes to two only out of five contests, boxing and running, most frequently to the latter. In boxing (*πυγμαί*; compare *πεκτεῖω*, 1 Cor. ix, 26), the hands and arms were bound with the *cestus*, a band of leather studded with nails, which very much increased the severity of the blow, and rendered a bruise inevitable (*ὀσπυρίζω*, 1 Cor. I. c.; *ὀσπυρία=τὰ ὑπὸ τῶν ὀπαστῶν πλῆγῶν ἴχνη*, Pollux, *Onom.* ii, 4, 52). The skill of the combatant was shown in avoiding the blows of his adversary, so that they were expended on the air (*οὐκ ὄς αἶρα ἔειρον*, 1 Cor. I. c.), or the phrase may allude to the prejudicial trials of comparative strength (comp. Statius, *Theb.* vi, 487; Virgil, *Aeneid.* iv, 370). The foot-race (*δρομος*, 2 Tim. iv, 7, a word peculiar to Paul; comp. Acts xiii, 55; xx, 24) was run in the *stadium* (*ἐν σταδίῳ*; A. V. "race," 1 Cor. ix, 24), an oblong area, open at one end and rounded in a semicircular form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The race was either from one end of the *stadium* to the other, or, in the *διὰυλος*, back again to the starting-post. There may be a latent reference to the *διὰυλος* in the expression *ἀρχηγὸν καὶ τελειωτὴν* (Heb. xii, 2), Jesus being, as it were, the starting-point and the goal, the *locus a quo* and the *locus ad quem* of the Christian's course. The judge was stationed by the goal (*σκοπόν*; Auth. Vers. "mark," Phil. iii, 14), which was clearly visible from one end of the *stadium* to the other, so that the runner could make straight for it (*οὐκ ὄς ἀδύλω*, 1 Cor. ix, 26). Paul brings vividly before our minds the earnestness of the competitor, having cast off every encumbrance (*ὄγκον ἀποθεμεῖνοι πάντα*), especially any closely-fitting robe (*ἐμπόριστον*, Heb. xii, 1; comp. Conybeare and Howson, ii, 553), holding on his course uninterrupted (*ἐνώκω*, Phil. iii, 12), his eye fixed on the distant goal (*ἀφορῶντες, ἀπέβλεπε*, Heb. xii, 2;

xi, 26), unmindful of the space already past (*τὰ μὲν ὀπίσω ἐπιδεικνόμενος*, Phil. I. c.), and stretching forward with bent body (*τοῖς ἔπι ἐμπροσθεν ἐπικτεινόμενος*), his perseverance (*ἐπι-ὑπομονή*, Heb. xii, 1), his joy at the completion of the course (*μετὰ χαρᾶς*, Acts xx, 24), his exultation as he not only receives (*ἐλαβον*, Phil. iii, 12), but actually grasps (*καταλάβω*, not "apprehend," as A. V. Phil.; *ἐπιλάβω*, 1 Tim. vi, 12, 19) the crown which had been set apart (*ἀπόκειται*, 2 Tim. iv, 8) for the victor. The lengths of the bounds (a stade or furlong apart) give some idea of the severity of the trial, and serve to illustrate the meaning of the apostle when he speaks of running with patience the race set before him (*ὑπομονή*, sustained effort). Indeed, one Ladas, a victor of the Olympic games, in the *ὀδύχος*, or long race, was so exhausted by his efforts that, immediately on gaining the honor and being crowned, he yielded up his breath: a fact which also serves to throw light on scriptural language, as showing with what intense eagerness these aspirants (*κολυθόδρομοι*, long-runners) strove for perishing chaplets (*φθαρτὸν στέφανον*).—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v. See RUNNER.

On the subject here treated of, see West's *Odes of Pindar*, 2d ed.; Potter's *Antiquities of Greece*, bk. ii, ch. xxi-xxv; and Adams's *Roman Antig.* p. 224-234. By far the best work, however, is Krause's *Die Gymnastik und Agonistik der Hellenen* (Halle, 1835); his *Darstellung der Olympischen Spiele* (Vien, 1838); and his *Die Pythien, Nemeen und Isthmeen* (Leipzig, 1841). See also Nagel, *De ludis secularibus Romanorum in Gemara commemoratis* (Altorf, 1743); Eckhard, *De Paulo atleta* (Viteb. 1688); Guhling, *De locutionibus sacris e palustra petitis* (ibid. 1726); Schöpfer, *De locutionibus Pauli gymnasticis* (ibid. 1764); Auerswald, *De veterum arte luctu-i* (ibid. 1720); Günther, *De cursoribus veterum* (ib. 1709); Hofmann, *De athletis veterum* (Halle, 1717); Lydii *Agonistica sacra* (Franeq. 1700).

**Gam'madim** (Heb. *Gammadim*, גַּמְדִּים; Sept. *φύλακες*, Vulg. *Pugmaï*, A. V. "Gammadims") is the name of a class of men mentioned in Ezek. xxvii, 11, as defenders of the towers of Tyre in connection with the mercenaries from Arad. See TYRE. A variety of explanations of the term have been offered.

(1.) Some (e. g. Forster, *Dict. Ebr. Nor.* s. v.) suppose a connection with *גַּמְדָּא*, *go'med*, a cubit, q. d. *cubit-high men*, whence the Vulg. has *pigmies* (so Rashi, Kimchi, and others). Michaelis (*Supplem.* p. 326) thinks that the *apparent* height alone is referred to, with the intention of conveying an idea of the great height of the towers. Spencer (*De Leg. Heb. Rit.* ii, cap. 24) explains it of small images of the tutelary gods, like the Lares of the Romans (see also his *Dissert. de Gammadim*, in Ugolini *Thesaur.* xxiii, 18). This view seems to be refuted by Anthing, *Dissertat. de sublesta τῶν גַּמְדִּים per Pymaios interpretatione* (Viteb. 1710).

(2.) Others (e. g. Pfeiffer, *Dub. Ver.* p. 783; Ludolf, *Comment. hist. Ethiop.* p. 73, 74) treat it as a geographical or local term; Grotius holds *Gamad* to be a Hebrew form (*אָגמון* for *גַּמְדָּא*) of the name *Ancon*, a Phœnician town; the Chaldee paraphrase has *Cappadocians*, as though reading גַּמְדִּים; Fuller (*Miscell.* vi, 698) identifies them as the inhabitants of *Gamala* (Plin. v, 14); and again the word has been broken up into גַּמְדִּים גַּמְדָּא=*also the Medes*. Rosenmüller (*Schol.* ad loc.) thinks it the name of some obscure Phœnician town, not elsewhere mentioned. But these conjectures are equally without foundation (see Harduin, ad loc.; Reland, *Palæst.* p. 784).

(3.) Most later interpreters give a more general military sense to the word. Gesenius (*Thesaur.* p. 292) connects it with *גַּמְדָּא*, a *rough*, whence the sense of *brave warriors*. Lee renders *short-swordsmen*, from the same Arabic root. Hävernick (ad loc.) understands

daring ones, from an Aramaean root. Hitzig (ad loc.) suggests deserters (*Ueberläufer*), and draws attention to the preposition *in* as favoring this sense: he inclines, however, to the opinion that the prophet had in view Cant. iv, 4, and that the word גַּמְלוֹת in that passage has been successively corrupted into גַּמְלוֹת, as read by the Sept., which gives φύλακας, גַּמְלוֹת, as in the present text. The Syr. and Arabian interpreters agree with the Sept., rendering *watchmen* (so Luther, "Wächter"). Fürst (*Heb. Lex. s. v.*) refers the word to an obsolete גַּמְלָה, to *place or make stand* (akin with the above Arabic *gamal*, to be firm), and translates *garison* (Besatzung), a view that seems to agree with their context. The following words of the verse—"They hanged their shields upon thy walls round about"—are illustrated by one of the bas-reliefs found at Kouyunjik (Layard, *Nineveh*, ii, 296).—Smith, s. v.

Castle of a maritime People (probably the Tyrians), with the shields hanging upon the walls.

**Ga'mul** (Heb. *Gamul'*, גַּמְלוֹת, *weaned*; Sept. Γαμουλ v. r. Γαμουήλ), the chief of the twenty-second course of priests as reinstated after the captivity (1 Chron. xxiv, 17), B.C. 535. See BETH-GAMUL.

**Ganganelli.** See CLEMENT XIV.

**Ganges, or Gunga,** a great river in India, important not only in the geography, but also in the religion of Hindustan. The sources of the streams which unite to form it are within the snowy range of the Himalaya Mountains. The *Bhagiratti* rises from a snowfield near lat. 30° 54' N., and long. 79° 7' E. The *Aluknaada* joins it, with a volume of water one half greater than its own, at about lat. 30° 10' N., long. 78° 35' E., where it first receives the name *Ganges, or Gangā*. At Hurdwar, in lat. 29° 57' N., long. 78° 07' E., it enters the great plain of Hindustan. At Allahabad it is joined by the Jumna River; and again, about 270 miles below that, by the Ghogra, having previously received the Gumbi and some others. About half way between Allahabad and the Ghogra is the holy city of the Hindūs—Benares. Farther east it is joined by the Sone Gunduk and Koosy, and below Seebgunj it begins to divide into the multitudinous streams by which it enters the sea. The one of these many mouths of the Ganges which is most available for commerce is the Hooghly, upon whose banks is the city of *Calcutta*. The Ganges varies much in its width at different places and with the seasons. Bishop Heber, at the last of June, says that he could scarcely see across it: "It looked like a sea, with many sails upon it." Again, at Bogliipoor he writes: "A little below Bogliipoor, last year, it was nine measured miles across; and this year, though far less ground is covered, it is supposed to be full seven; and here we are perhaps 600 miles, reckoning the windings of the river, from the sea" (*Indian Journal*, i, 130). At Cawnpoor, after the rains, he writes: "The Ganges is still a noble stream; its width, at the usual place of ferrying, I should think not far from a mile and a half, but at this season the water is in many places shallow. At Allahabad it has an average width of four miles, within the limits of which it changes its course annually. Like all rivers that overflow their banks, the Ganges holds a large admixture of mud and sand. It has been computed that it delivers into the sea annually an average of 534,600,000 tons of solid matter."

*Its Religious Aspects.*—The worship of this river is enjoined in the Hindū Shasters. Certain places on it are particularly sacred. At Hurdwar, or the Gate of Vishnu, where the Ganges issues from the Himalaya, the number assembling annually is calculated to amount to two millions and a half. Most of them come to wash away their sins. After every twelve years, which is a more auspicious period, millions assemble on certain festival days, and it requires a strong police force to keep the people from drowning each other, in the rush to bathe at the auspicious moment. At Allahabad, where the Ganges and Jumna unite, a third river, called *Saraswatee*, sister to these two, according to Hindū notions, flows under them. The junction is called *Tribenee*, and the sanctifying and purifying influences are secured to the worshipper by lying for a short time in the water in a prescribed position. The place where the Ganges empties itself into the sea is also sacred (see Dass, *Manners and Customs of Hindūs*). According to Ward, the water is used for food, bathing, medicine, religious ceremonies, etc.; and formerly, when a Hindū king was crowned, it was poured upon his head as a part of his consecration. Until recently, the water of this river was used in the English courts of India in administering the oath to Hindūs. So much is this river revered among the Hindūs, that many Brahmans will not cook upon it, nor throw saliva into it, nor wash themselves nor their clothes in it. Some persons perform a journey of five or six months to bathe in the Ganges, or to perform rites for deceased relations, and to carry this water to places in their houses for religious and medicinal purposes. Many rich men, living at a great distance, keep men constantly employed in making the journey to and fro to bring Ganges water. In these cases a relay of men is established at convenient distances, and the water, carried in small bottles, carefully placed in baskets suspended on a bamboo swung across the shoulder. All castes worship *Gangā*. She is represented, according to Ward, as a white woman wearing a crown, sitting on the sea-animal named *Makara*, and having in her right hand a water-lily, and in her left the lute. In certain months the merit of bathing in the Ganges is greater than in others. In every month, on the first, sixth, and eleventh of the moon, and at its total wane also, bathing in the Ganges is recommended. According to the *Gangā, Yakya, Yulee*, there are 3,500,000 holy places belonging to *Gangā*. The person who looks at *Gangā*, or bathes in this river, will obtain all the fruit which arises from visiting all these 3,500,000 places. If a person who has been guilty of killing cows, Brahmans, or his holy teacher, or of drinking spirits, touch the waters of the Ganges, desiring in his mind the remission of these sins, they will be forgiven. "Amongst the rivers which, at the *classical* and the *Purāvic* period of India, were held in peculiar sanctity by the nation, the Ganges undoubtedly occupied the foremost rank. In the Vedic poetry it is but seldom mentioned; and, whenever its name occurs, whether in the hymns of the *Rigveda*, or the ritual text of the *Yajurveda*, no legendary fact or mythical narrative is connected with it. Nor does the law-book of Manu justify the conclusion that its author was acquainted with any of the myths which connect this river in the epic poems and in the Purānas with the Pantheon of India. The earliest, and by far the most poetical legend of the Ganges, occurs in that masterpiece of Sanscrit poetry, the *Rāmāyana*. We give its substance, because it explains the principal epithets by which this river is spoken of, or invoked in ancient and modern Hindū poetry, and because it may be looked upon as the type of the many fables which refer to the purifying and supernatural properties of its waters. There lived, says the *Rāmāyana*, in Ayodhyā (the modern Oude), a king, by the name of Sagara, who had two wives, Kesini and Sumati; but they bore him no issue. He therefore repaired to the Himalaya; and

after a hundred years' severe austerities, Bhṛigu, the saint, became favorable to his wishes, and granted him posterity. Kesini bore him a son, who was named Asamanjas, and Sumati brought forth a gourd, whence sprang 60,000 sons, who in time became as many heroes. Asamanjas, however, in growing up, was addicted to cruel practices, and was therefore banished by his father from the kingdom. His son was Ansumat, who thus became heir to the throne of Ayodhyā. Now it happened that Sagara resolved to perform a great horse-sacrifice; and, in accordance with the sacred law, chose for this purpose a beautiful horse, which he confided to the care of Ansumat. But while the latter was engaged in the initiatory rites of the sacrifice, a huge serpent emerged from the soil, and carried off the horse to the infernal regions. Thereupon Sagara, being informed of the obstruction which had befallen his pious undertaking, ordered his 60,000 sons to recover the horse from the subterranean robber. These then set to work, digging the earth, and striking terror into all creation. Having explored, for many years, the infernal regions, they at last found the sacred horse grazing, and watched by a fiery saint, in whom they recognised the serpent, the cause of their troubles. Enraged, they attacked him; but the saint, who was no other being than Vishnu, at once reduced them to ashes. Waiting in vain for the return of his sons, Sagara sent his grandson, Ansumat, in search of them and the sacred horse. Ansumat went, and soon ascertained the fate of his relatives; but when—mindful of his duties—he wished to sprinkle consecrated water on their ashes, so as to enable their souls to rise to heaven, Garuda, the bird of Vishnu, and brother of Sumati, came in sight, and told Ansumat that it was improper to use terrestrial water for such a libation, and that he ought to provide the water of the Gangā, the heavenly daughter of Himavat (the Himalaya). Ansumat, bowing to the behest of the king of birds, went home with the horse to Sagara; and the sacrifice being achieved, Sagara strove to cause the descent of the Gangā, but all his devices remained fruitless; and, after 30,000 years, he went to heaven. Nor was Ansumat more successful in his attempt with the austerities he performed for the same purpose, nor his son Dvīlipa, who, obeying the law of time, after 30,000 years, went to the heaven of Indra. Dvīlipa had obtained a son, named Bhāgiratha. He, too, was eager to obtain the descent of the Gangā; and having completed a course of severe austerities, he obtained the favor of Brahma, who told him he would yield to his prayers provided that Siva consented to receive the sacred river on his head, as the earth would be too feeble to bear its fall when coming from heaven. And now Bhāgiratha recommenced his penance, until Siva consented, and told the Gangā to descend from heaven. The river obeyed; but, enraged at his command, she assumed a form of immense size, and increased her celerity, thinking thus to carry him off to the infernal regions. Yet the god, becoming aware of her intentions, caught and entangled her in his matted hair, out of which she could find no means of extricating herself, though erring there for many years. Nor would she have been released had not Bhāgiratha, by his renewed penance, appeased the god, who then allowed her to descend from his head in seven streams—Māḍīni, Pāvini, and Nalinī, which went eastwards; and Sitā, Suchakshu, and Sindhu, which went westwards, while the seventh stream followed Bhāgiratha wherever he proceeded. But it so happened that the king, on his journey, passed by the hermitage of an irascible saint, whose name was Jahnu. The latter, seeing the Gangā overflowing in her arrogance the precincts of his sacrificial spot, and destroying his sacred vessels, became impatient, and drank up all her waters; thereupon all the gods became terrified, and promised him that, in future, the Gangā would pay him filial respect, and become his daughter, if he would restore her again

to existence. Quieted by this promise, Jahnu then allowed her to flow out from his ear, and therefore she is still called Jāhnavī, or the daughter of Jahnu. But, because Bhāgiratha, by dint of his exertions, enabled his ancestors, now sprinkled with the waters of the Gangā, to ascend to heaven, Brahma allowed him to consider her as his daughter, whence she is called Bhāgirathi. And she is also called the river of 'the three paths,' because her waters flow in heaven, on earth, and pervaded the subterranean regions. Such is the account of the *Rāmāyana*, and its substance is repeated by the *Mahābhārata* and several of the Purānas, though they differ in the names of the streams formed in her descent by the Gangā, some (for instance, the *Vishnu- and Vāyu-Purāna*) restricting their number from seven to four, called by the *Vishnu-Purāna* Sitā, Alakanandā, Chakshu, and Bhadrā. A further deviation may be seen in that, while in the *Rāmāyana* the Gangā springs from the Himavat (Himalaya), whose daughter she is, the *Vishnu-Purāna* assigns her source to the nail of the great toe of Vishnu's left foot, and allows Siva merely to receive her on his head. The following passage from this Purāna will show the ideas on the history and the properties of this river: "From that third region of the atmosphere, or seat of Vishnu, proceeds the stream that washes away all sin, the river Gangā, embrowned with the unguents of the nymphs of heaven, who have sported in her waters. Having her source in the nail of the great toe of Vishnu's left foot, Dhruva (Siva) reverses her, and sustains her day and night devoutly on his head, and thence the seven Rishis practice the exercises of austerity in her waters, wreathing their braided locks with her waves. The orb of the moon, encompassed by her accumulated current, derives augmented lustre from her contact. This applies to the *heavenly* Ganges. Falling from on high, as she issues from the moon she alights on the summit of Meru, and thence flows to the four quarters of the earth for its purification. The Sitā, Alakanandā, Chakshu, and Bhadrā, are four branches of but one river, divided according to the regions towards which it proceeds. The branch that is known as Alakanandā was borne affectionately by Siva upon his head for more than a hundred years, and was the river which raised to heaven the sinful sons of Sagara by washing their ashes. The offences of any man who bathes in this river are immediately expiated, and unprecedented virtue is engendered. Its waters, offered by sons to their ancestors in faith for three years, yield to the latter rarely attainable gratification. Men of the twice-born orders, who offer sacrifice in this river to the lord of sacrifice, Pūmshottama, obtain whatever they desire, either here or in heaven. Saints who are purified from all evil by bathing in its waters, and whose minds are intent on Kesava (Vishnu), acquire thereby final liberation. This sacred stream, heard of, desired, seen, touched, bathed in, or hymned day by day, sanctifies all beings; and those who, even at a distance of a hundred leagues, exclaim "Gangā, Gangā," atone for the sins committed during three previous lives!" (Chambers, s. v.).

*The Ceremonies.*—The following is taken from Ward's *Hindis*: "Crowds of people assemble from the different towns and villages near the river, especially at the most sacred places of the river, bringing their offerings of fruit, rice, flowers, cloth, sweetmeats, etc., and hang garlands of flowers across the river, even where it is very wide. After the people have bathed, the officiating Brahma ascends the banks of the river with them; and, after repeating religious texts, places before him a jar of water, and, sitting with his face to the north or east, performs what is called *Ghātā-st hapānā*. After this, the Brahma performs other ceremonies; then the worship of the five gods, of the nine planets, of the regions of the ten quarters, etc. To this succeeds meditation. The priest next presents the offerings, which may be

sixty-four, or eighteen, or sixteen, or ten, or five, or merely flowers and water, according to the person's ability. To these offerings the worshipper must add sesamum, clarified butter, and barley flour. The officiating Brahman next performs the worship of Narayāna, Māheshwārā, Bramha, Sōoryā Bhāgēcārāhā, and Hīmalāyā; then the worship of the inhabitants of the waters, as the fish, the tortoises, the frogs, the water-snakes, the leeches, the snails, the mākārās, the shell-fish, the porpoises, etc. The offerings, after having been presented to the inhabitants of the waters, are thrown into the Ganges. Ten lamps of clarified butter are then lighted up, and all the other offerings presented. After this the names of certain gods are repeated, with forms of praise; the fee is presented to the priest, the Brahmans are entertained, and the offerings sent to the houses of Brahmans. At the close of these ceremonies the people perform obeisance to Gangā, and then depart. Great multitudes assemble on the banks of the river on these occasions, and expect much, both in this life and hereafter, from this act of worship. If a person place on his head ten fruits of any kind, and thus immerse himself in the Ganges on this day, the sins of ten births will be removed. In this month also images of Gangā are set up in domestic temples and worshipped, and the next day thrown into the river. In some places clay images of this goddess are preserved in clay temples, and worshipped daily. Persons escaping dangers on water present offerings to Gangā, as well as to Varoona, the Indian Neptune, as mariners, having escaped the dangers of the sea, used to offer a sacrifice to Venus. On the thirteenth of the decrease of the moon in *Chaitra*, the people descend into the water, and, with their hands joined, immerse themselves, after which the officiating Brahman reads a portion of the Shastra, describing the benefits arising from this act of bathing. The people repeat after the priest certain significant words, as the day of the month, the name of Vishnu, etc., and then immerse themselves again. Gifts of rice, fruits, and money are offered to the poor, the Brahmans, and the priests. On this occasion groups of ten or twelve persons stand in the water in one spot, for whom one Brahman reads the formulas. These groups are to be seen extending themselves very far along the river. At the moment of the conjunction of the moon (on the thirteenth of its decrease) with the star Shatabhisha, this festival is called the Great Varoonee. The merit arising from bathing at this lucky moment is supposed to be very great. The people fast till the bathing is over. When there is a conjunction as above, and the day falls on Saturday, the festival is called the *Great Great Varāni*."

The exposure of sick and dying on the banks of the Ganges is of uncertain date. The following summary is from the *Calcutta Review*, No. xx, vol. x, 1848: "The *Kurma Purāna* says, 'Those that *consciously* die on the banks of the Ganges shall be absorbed into the essence of Brahma; and those who die *unconsciously* shall surely go to the heaven of Brahma.' The *Agni Purāna* says, 'those who die when half their body is immersed in Gangā water, shall be happy thousands of ages, and resemble Brahma.' In the *Skanda Purāna*, Shiva says, 'To him who dies in Gangā I give my footstool to sit upon.' There are a great many traditional stories concerning Gangā believed by the majority of Hindūs. The following is a specimen: 'On the banks of the Bhagirathi there grew a stately banian-tree, in whose ample folds a paddy-bird had made her nest. On a certain day the tree was torn up by the roots by the violence of the storm. The bird was destroyed, and its bones buried in the deep channel of the Gangā. The paddy-bird, in the next transmigration, was taken up into heaven simply because her bones had accidentally been deposited in the river. After this she became one of Indra's queens in his heaven.' In consequence of this sort of

teaching the Hindūs almost universally throw into the river the bones of those who had died at some distance from its shores. Even the bodies of those that die on the banks of the Ganges, and suffer cremation there, are not wholly burnt. Some part of the body, generally the part surrounding the navel, is thrown into the river. Those who are too poor to burn their dead throw them bodily into the river. The exposure of the sick and dying is as follows. When the patient seems to be beyond recovery, the relatives make preparations to 'give him to Gangā.' This is a stronger duty than seeking his recovery. 'Life and death are in the hands of God, but the carrying of the sick to the river lies in our own hands, therefore we must do our duty.' A couch is procured, called the *khal*, for the dead, a number of torches if it be night, and notice is given throughout the neighborhood. . . . On the way the attendants repeat loudly the names of the gods and goddesses. At the *ghat* they lay him close to the water, and cause him to say that he has come to see the Mother Ganges. He is laid in a miserable hut, amid dirt and nuisance, and multitudes of dying sick, whose shrieks and groans fill the air. A few minutes before his death he is again brought down on the brink of the river, half immersed in water, to give up the ghost. 'The habit of choking the dying patients with water and mud is unquestionably a legitimate portion of the rite, but is not uniformly put in practice.' . . . If any one survives the exposure, and return from the bank of the river, he ought to be regarded as rejected by the goddess, and be treated thenceforward as an outcast—'an alien to his mother's children.' The British government, which has so nearly extirpated *salt*, and is doing its utmost to abolish infanticide, whether in the Ganges or elsewhere, is giving its attention to the subject of these ghāt murders."—Ward's *Manners and Customs of the Hindūs; Vishnu Purāna* (Wilson's transl.); *Calcutta Review*, vol. x; Moore's *Hindū Pantheon*. (J. T. G.)

**Gangra**, COUNCIL of (*Concilium Gangrense*), a synod held at Gangra, in Paphlagonia, 4th century, against Eustathius of Sebaste. See EUSTATHIANS. The precise date of the council is uncertain. Pagi, following Socrates, fixes it about A.D. 360; Ceillier about A.D. 379 (*Auteurs Sacrés*, iv, 379); Hefele (*Concilienge-schichte*, ii, 765) leaves it uncertain. It has been questioned, also, whether the Eustathians (*οἱ πρὸς Ἐβεράθιον*), against whom this council was directed, really sprung from Eustathius of Sebaste. "All the facts are in favor of an affirmative answer to this question. Not only is the testimony of Socrates, ii, 43, and of Sozomen, iii, 14, to this effect, but the whole is in perfect accordance with the character of Eustathius, who was a zealous ascetic, and the first preacher of the ascetic life in the countries around the Pontus, and had formed a whole school. See *Basilii Cæsarensis*, ep. 233. (Here we find mentioned, in fact, the ascetic dress, to which the Eustathians, according to the report of the Council of Gangra, ascribed a peculiar sanctity—the *ἐξνα ἀφοσάματα*, that is, according to the letter of Basilus, τὸ κατὰ ἡμέρας, καὶ ἡ ζώνη καὶ τῆς ἀεὶ ἐξήτων βύρασι τὰ ὑποδήματα), and ep. 119 (Epiphanius, *Hæres.* 75.) We perceive, also, in the letters of Basilus a trace of opposition to the new monastic spirit in the districts of the Pontus. At least at Neocesarea, where the attachment to old usages prevailed, the spreading of the ascetic life among men and virgins was brought up as an objection against Basilus of Cæsarea. See ep. 207 *ad Neocesarensis*. § 2" (Neander, *Ch. History*, Torrey's transl. ii, 244).

The acts of the council are very important as testimonies against certain doctrines and practices which have since characterized the Church of Rome. Eustathius taught that it is unlawful to marry, and to eat certain meats. He separated several married persons; advised those who disliked the public offices of the Church to communicate at home. He wore, and made

his followers also wear, an extraordinary dress; obliged women to cut off their hair; and directed his followers to avoid, as the greatest profanation, the communion and the benediction of a married priest living with his wife. In opposition to these errors, twenty-one canons were published by the Council of Gangra. Fifteen bishops subscribed them, and addressed them, together with a synodal letter containing briefly the causes which led to the assembling of the council, to the bishops of Armenia. Canon 1. Condemns with anathema those who blame marriage, and who say that a woman living with her husband cannot be saved. 2. Condemns with anathema those who forbid the eating of meat. 4. Condemns those who separate themselves from the communion of a married priest, and refuse to partake of the holy communion consecrated by him. 9. Condemns those who embrace the state of virginity or continence, not for the sake of perfection, but from a horror of the married state. 10. Condemns those who, having themselves embraced the state of virginity, insult married persons. 11. Condemns those who despise the agapæ or love-feasts, and refuse to participate in them. 12. Condemns those who, under pretence of extraordinary strictness, wear a peculiar dress, and condemn those who wear ordinary clothing. 14. Condemns those who forsake their husbands through a false horror of marriage. 15. Condemns those who, under pretext of leading an ascetic life, forsake their children, without providing for their sustenance or conversion. 16. Condemns children who, upon the same plea, desert their parents.—Landon, *Manual of Councils*, s. v.; Hefele, *l. c.*; Neander, *l. c.*; Schröckh, *Kirchengeschichte*, vi, 247.

**Gano, John**, a Baptist minister, was born at Hope-well, New Jersey, July 22, 1727, and was there ordained to the ministry in 1754. His first labors were in the Southern States, where, as an itinerant, he was inferior, it is said, "to none but Whitefield." During the Revolutionary War he was an army chaplain. In 1762 he was ordained pastor of the first Baptist church in New York, where he remained until 1788, when he removed to Kentucky, where he became pastor of the Town Fork Church, near Lexington. He died at Frankfort, August 10, 1804. His pulpit talents were of a high order. See *Life of Gano*, principally an autobiography (1806, 12mo); Benedict, *History of the Baptists*, vol. ii; Sprague, *Annals*, vi, 62.

**Gano, Stephen**, a Baptist minister, was born in New York Dec. 25, 1762. After being educated for the medical profession, he spent two years in the army as surgeon during the Revolutionary war, and then settled as a physician in Rockland Co., N. Y. Becoming impressed with the belief that it was his duty to preach the Gospel, he was ordained Aug. 2, 1786; and after being for a while a missionary on the Hudson, became pastor of the Baptist church at Hillsdale and Hudson. In 1792 he became pastor of the first Baptist church in Providence, R. I., where his ministrations were very successful. He received the honorary degree of M. A. from Brown University in 1800, having been one of the overseers of that institution since 1794. He died pastor of the church in Providence, Aug. 18, 1828. Mr. Gano published a number of occasional sermons.—Sprague, *Annals*, vi, 229.

**Gannim**. See EX-GANNIM.

**Gans, David**, a Jewish historian, was born about the middle of the 16th century. He is considered by Jost to be an untrustworthy writer. Among his best works are *Zernach David*, or *The Branch of David*, in two parts; of which the first is a chronicle of sacred and Jewish history from the Creation to 1592; the second recounts some of the events of secular history (Prague, 1592; Furth, 1784). He died in Prague in 1613.—Grässe, *Allgem. Literärgeschichte*, v, § 311; Jost, *Geschichte d. Judenthums*, iii, 215; Etheridge, *Introd. to Hebr. Lit.* p. 444. (J. H. W.)

**Gap** (𐤒𐤓𐤁, *pe'rets*, a breach, as elsewhere rendered), a rent or opening in a wall (Ezek. xiii, 5; comp. Amos iv, 3). The Jewish false prophets did not stand in the gap (Ezek. xxii, 30); they did nothing to stop the course of wickedness which opened a door for the vengeance of God to break in upon their nation. See PEREZ.

**Gar** (Γάρ, Vulg. *Sasus*), a man whose "sons" are named in the Apocrypha among the "sons of the servants of Solomon" (1 Esdr. v, 34). There are not in the lists of Ezra and Nehemiah any names corresponding to the two preceding and the six succeeding this name.—Smith, s. v.

**Garasse, Francis**, a French Jesuit, was born at Angoulême in 1585; in 1600 he entered the society, and after teaching for a while took the vows in 1618. He subsequently wrote books of controversy (mostly under false names, and of which he repeatedly denied being the author). Their sarcastic tone, violent outburst of passion, and wholesale abuse of all whom he considered as enemies of his order, provoked the censure of Roman Catholics themselves. The expressions *fool, sot, ass*, etc., abound in his writings against the Protestants. The expressions *Modestia, affidilitate, mansuetudine, supra modum amabilis*, applied to him by the historian of his order, will always appear to any one acquainted with his works as a bitter sarcasm rather than a compliment. When the plague broke out at Poitiers, where he had been exiled by his superiors for writing a *Somme théologique* (1625, fol.), which was condemned by the Sorbonne, he asked permission to devote himself to the care of the sick, and fell a victim to his devotion June 14, 1631. Among his other works we notice *Elucid. Calvinisticum* (1615, 4to), under the name of Andrew Scioppius;—*Craison funèbre d'André de Nesmond* (1656);—*Le Rabelais réformé par les ministres* (1619, 12mo), a violent attack against Protestant ministers, and particularly Du Moulin;—*Recherche des Recherches d'Etienne Pasquier* (1622, 8vo), the full title of which affords a good example of Garasse's style: "Inscribed to Etienne Pasquier, wherever he may be; for never having been able to recognise your religion, I do not know the way and route you have taken on leaving this life, and therefore I am obliged to write to you at hazard, and to address this bundle, wherever you may be . . ." etc. See Nicron, *Mémoires*, vol. xxxi; Bayle, *Dictionnaire*; Alegambe, *Eiblioth. Script. Soc. Jesu*; Hoefler, *Nouv. Biog. Génér.* xix, 426; *Mémoires du Père Garasse, de la Société de Jésus*, publ. by C. Nisard (Paris, 1861, 18mo).

**Garcia, D. Francisco**, a Portuguese Jesuit, joined the order at the age of eighteen, and went to the East Indies with fifty-eight other Jesuit missionaries. He resided successively at Goa and Cochín, and was appointed coadjutor of the archbishop of the mountain region inhabited by the Christians of St. Thomas (q. v.). The archbishop dying in 1641, Garcia succeeded him, and exerted great influence over the people by his knowledge of the native dialects. He had many disputes with the Christians of St. Thomas. He died Sept. 3, 1659. He left a MS. entitled *Relação dos sectarios da India oriental. Dialogos espirituos, carta escrita ao arcebispo dos christaos da Serra*, which is said to contain valuable information on the tribes of the East.—Hoefler, *Nouv. Biog. Génér.* xix, 461. (J. N. P.)

**Garcia or Garzia, Gregorio**, a Spanish missionary, was born at Cozar, Andalusia, about the latter half of the 16th century. He studied in the Dominican convent of Baëza in 1627, and joined that order. Appointed missionary to America, he spent twelve years in Mexico and Peru, where he preached with success, and gathered numerous historical documents and traditions, which he published after his return under the title *Origen de las Indias del Nuevo Mundo y Indias occidentales, averiguanda con discurso de opiniones*, etc. (Valencia, 1607, 8vo; Madrid, 1729, fol.). This

work contains a great deal of information which has been made use of by subsequent historians. The author's theory is that America was successively settled by emigration from divers races coming from other parts of the world. He thus attempts to uphold the text of Scripture, which gives but three sons to Noah, one of whom peopled Europe, the second Asia, and the third Africa; and argues in favor of this opinion on the ground that, before the arrival of the Spaniards, the Mexicans possessed the tradition of the creation of the world, the flood, the confusion of tongues, and the dispersion of nations, as is proved by some sculptures he saw which represented these various events in a symbolic manner. He also wrote *Predicacion del Evangelio en el Nuevo Mundo viviendo los Apostoles* (Baeza, 1625, 8vo), in which he attempts to prove that it is impossible that any of the immediate disciples of Christ ever went to preach the Christian faith to America.—Hoefer, *Nouv. Biog. Générale*, xix, 456 sq.; see also Echard, *Scriptores Ordinis Predicatorum*, ii, 437; Nicolas Antonio, *Bibliotheca Nova Hispana*, i, 544.

**Garden** (גַּן, *gan* [fem. הַגַּן, הַגָּן], a park or orchard inclosed and planted; Sept. *παράδεισος*, N. T. κήπος.) See FIELD; ORCHARD, etc.

1. Several gardens are mentioned in the Scriptures, as the garden of Eden (Gen. ii, 8, 9, 10, 15), Ahab's garden of herbs (1 Kings xxi, 2), the royal garden near the fortress of Zion (2 Kings xxi, 18; xxv, 4), the royal garden of the Persian kings at Susa (Esther i, 5; vii, 7, 8), the garden of Joseph of Arimathea (John xix, 41), and the garden of Gethsemane (John xviii, 1). It is clear, from Josh. v, 2, and Lam. ii, 6, that gardens were generally hedged or walled, as indeed Josephus expressly states respecting the gardens near Jerusalem (*War*, v, 7). In Neh. ii, 5, and John xx, 15, gardeners and keepers of gardens by occupation are indicated. See GARDENER.

The traditional gardens and pools of Solomon, supposed to be alluded to in Eccl. ii, 5, 6, are shown in the

wady Urtás (i. e. Hortus), about an hour and a quarter to the south of Bethlehem (compare Josephus, *Ant.* viii, 7, 3). The Arabs perpetuate the tradition in the name of a neighboring hill, which they call "Jebel-el-Fureidis," or "Mountain of the Paradise" (Stanley, *Sin. and Pal.* p. 166). Maundrell is sceptical on the subject of the gardens (*Early Trav. in Pal.* p. 457), but they find a champion in Van de Velde, who asserts that they "were not confined to the wady Urtás; the hillslopes to the left and right also, with their heights and hollows, must have been covered with trees and plants, as is shown by the names they still bear, as 'peach-hill,' 'nut-vale,' 'fig-vale,' etc. (*Syria and Pal.* ii, 27). See SOLOMON'S POOL.

The "king's garden," mentioned in 2 Kings xxv, 4; Neh. iii, 15; Jer. xxxix, 4; lii, 7, was near the Pool of Siloam, at the mouth of the Tyropeon, north of Bir Eyub, and was formed by the meeting of the valleys of Jehoshaphat and Ben-Hinnom (Wilson, *Lands of the Bible*, i, 498). Josephus places the scene of the feast of Adonijah at Enrogel, "beside the fountain that is in the royal paradise" (*Ant.* vii, 14, 4; comp. also ix, 10, 4). See KING'S DALE.

Strabo (xvi, 763), alluding to one of the rose-gardens near Jericho, calls it *ὁ τοῦ βασιλέως παράδεισος*. The rose-garden in Jerusalem, mentioned in the Mishna (*Maaseroth*, ii, 5), and said to have been situated westward of the Temple mount, is remarkable as having been one of the few gardens which, from the time of the prophets, existed within the city walls (Lightfoot, *Hor. Heb.* on Matt. xxvi, 36). They were usually planted without the gates, according to the gloss quoted by Lightfoot, on account of the fetid smell arising from the weeds thrown out from them, or from the manure employed in their cultivation. See ROSE.

The gate Gennath, mentioned by Josephus (*War*, v, 4, 2), is supposed to have derived its name from the rose-garden already mentioned, or from the fact of its leading to the gardens without the city. It was near the garden-ground by the Gate of the Women that Titus

Ancient Egyptian Garden.

was surprised by the Jews while reconnoitring the city. The trench by which it was surrounded cut off his retreat (Joseph. *War*, v, 2). See GENNATH.

But of all the gardens of Palestine none is possessed of associations more sacred and imperishable than the garden of Gethsemane, beside the oil-presses on the slopes of Olivet. Eight aged olive-trees mark the site which tradition has connected with that memorable garden, and their gnarled stems and almost leafless branches attest an antiquity as venerable as that which is claimed for them. See GETHSEMANE.

The orange, lemon, and mulberry groves which lie around and behind Jaffa supply, perhaps, the most striking peculiarities of Oriental gardens — gardens which Maundrell describes as being “a confused miscellany of trees jumbled together, without either posts, walks, arbors, or anything of art or design, so that they seem like thickets rather than gardens” (*Early Trav. in Pal.*, p. 416). The Persian wheels, which are kept ever working, day and night, by mules, to supply the gardens with water, leave upon the traveller’s ear a most enduring impression (Lynch, *Exp. to Jordan*, p. 441; Siddon’s *Memoir*, 187). The gardens near Shechem, containing orange and citron trees (Schubert, *Reise*, ii, 116), are described by Dr. Olin (*Travels*, ii, 350). See FOREST.

2. Gardens are frequently represented in the tombs of Thebes and other parts of Egypt, many of which are remarkable for their extent. The one here introduced is shown to have been surrounded by an embattled wall, with a canal of water passing in front of it, connected with the river. Between the canal and the wall, and parallel with them both, was a shady ave-

nue of various trees; and about the centre was the entrance, through a lofty door, whose lintel and jambs were decorated with hieroglyphic inscriptions, containing the name of the owner of the grounds, who, in this instance, was the king himself. In the gateway were rooms for the porter, and other persons employed about the garden, and probably the receiving-room for visitors, with the *dim* and other trees along the whole length of the exterior wall: four tanks of water, bordered by a grass-plot, where geese were kept, and the delicate flower of the lotus was encouraged to grow, served for the irrigation of the grounds; and small kiosks or summer-houses, shaded with trees, stood near the water, and overlooked beds of flowers. The spaces containing the tanks, and the adjoining portions of the garden, were each inclosed by their respective walls, and a small subdivision on either side, between the large and small tanks, seems to have been reserved for the growth of particular trees, which either required peculiar care, or bore fruit of superior quality (Wilkinson, *Anc. Eg.* i, 33-40, abridgm.).

One interesting but much defaced representation of a similar kind has been found on the Assyrian sculptures. Gardens and orchards, with various kinds of trees, appeared to be watered with canals similar to those which once spread fertility over the plains of Babylonia, and of which the choked-up beds still remain. A man, suspended by a rope, was being lowered into the water. Upon the corner of a slab, almost destroyed, was a hanging garden, supported upon columns, whose capitals were not unlike those of the Corinthian order (Layard, *Nineveh and Babylon*, p. 198 sq.).

Ancient Assyrian Gardens.

3. Gardens in the East, as the Hebrew word indicates, are inclosures on the outskirts of towns, planted with various trees and shrubs. From the allusions in the Bible we learn that they were surrounded by hedges of thorn (Isa. v, 5) or walls of stone (Prov. xxiv, 31). For further protection, lodges (Isa. i, 8;

Lam. ii, 6) or watch-towers (Mark xii, 1) were built in them, in which sat the keeper (Job xxxvii, 18), to drive away the wild beasts and robbers, as is the case to this day. Layard (*Nin. and Bab.* p. 265) gives the following description of a scene which he witnessed: “The broad silver river wound through the plain, the

great ruin cast its dark shadows in the moonlight, the lights of 'the lodges in the gardens of cucumbers' flickered at our feet, and the deep silence was only broken by the sharp report of a rifle fired by the watchful guards to frighten away the wild boars that lurked in the melon-beds." The scarecrow also was an invention not unknown (*τροποσκακάνιον*, Bar. vi, 70). See LODGE.

In a climate like that of Palestine the neighborhood of water was an important consideration in selecting the site of a garden. The nomenclature of the country has perpetuated this fact in the name Engannim—"the fountain of gardens"—the modern *Jenin* (comp. Cant. iv, 15). To the old Hebrew poets "a well-watered garden," or "a tree planted by the waters," was an emblem of luxuriant fertility and material prosperity (Isa. lviii, 11; Jer. xvii, 8; xxxi, 12); while no figure more graphically conveyed the idea of dreary barrenness or misery than "a garden that hath no water" (Isa. i, 30). From a neighboring stream or cistern were supplied the channels or conduits by which the gardens were intersected, and the water was thus conveyed to all parts (Psa. i, 3; Eccl. ii, 6; Ecclus. xxiv, 33). It is a matter of doubt what is the exact meaning of the expression "to water with the foot" in Deut. xi, 10. Niebuhr (*Descr. de l'Arabie*, p. 138) describes a wheel which is employed for irrigating gardens where the water is not deep, and which is worked by the hands and feet after the manner of a tread-mill, the men "pulling the upper part towards them with their hands, and pushing with their feet upon the lower part" (Robinson, ii, 226). This mode of irrigation might be described as "watering with the foot." But the method practised by the agriculturists in Oman, as narrated by Wellsted (*Trav.* i, 281), may answer to this description, and serves to illustrate Prov. xxi, 1: "After ploughing, they form the ground with a spade into small squares with ledges on either side, along which the water is conducted. . . . When one of the hollows is filled, the peasant stops the supply by turning up the earth with his foot, and thus opens a channel into another." See IRRIGATION.

4. Gardens were dedicated to various uses among the Hebrews, such as we still find prevailing in the East. One most essential difference between them and our own is that they are not attached to or in any way connected with the residence, but are situated in the suburbs, sometimes from half a mile to a mile distant from the houses of the persons to whom they belong. It is manifest that all the gardens mentioned in Scripture were outside the several towns. This is, however, to be understood of regular gardens, for shrubs and flowers were often planted in the open courts of the dwelling-houses. People repair to their suburban gardens to take the air, to walk, and to refresh and solace themselves in various ways. For their use there is mostly in each garden a kind of summer-house or pavilion, fitted up with much neatness, gayly painted, and furnished with seats, where the visitors may sit and enjoy themselves. Here sometimes banquets were and are still given, attended by singing and music (Isa. li, 3; lxxv, 3). See GARDEN-HOUSE.

The kings and nobles had their country houses surrounded by gardens (1 Kings xxi, 1; 2 Kings ix, 27), and these were used on festal occasions (Cant. v, 1). So intimately, indeed, were gardens associated with festivity, that horticulture and conviviality are, in the Talmud, denoted by the same term (Buxtorf, *Lex. Talm.* s. v. ארריורה). It is possible, however, that this may be a merely accidental coincidence. The garden of Ahasuerus was in a court of the palace (Esth. i, 5), adjoining the banqueting-hall (Esth. vii, 7). In Babylon, the gardens and orchards were enclosed by the city walls (Layard, *Nin.* ii, 246). Attached to the house of Joachim was a garden or orchard (Sus. 4)—"a garden inclosed" (Cant. iv, 12)—provided with

baths and other appliances of luxury (Sus. 15; comp. 2 Sam. xi, 2). See PALACE.

It would seem that the Jews were much in the habit of performing their devotions in gardens, on account of their retirement (Gen. xxiv, 63; Matt. xvi, 30; xxvi, 36; John ii, 48; xviii, 1, 2). This interesting practice, however, was idolatrously abused; for the worship of idols in these shady seclusions was not of unfrequent occurrence, and is often mentioned in Scripture (1 Kings xiv, 23; 2 Kings xvi, 4; xvii, 10; 2 Chron. xviii, 4; Isa. i, 29; lxxv, 3; lxxvi, 17; Jer. ii, 20; iii, 6; Ezek. xx, 28). See GROVE.

The custom of burying the dead in gardens is indicated in Gen. xxiii, 19, 20; 2 Kings xxi, 4, 18, 26; 1 Sam. xxv, 1; Mark xv, 46; John xix, 41; and still occurs sometimes in the East, but is not very prevalent. We find it also among the Greeks (Heliiodorus, *Ethiop.* i, 2, p. 35), and the Romans (Suetonius, *Galba*, 20). See GRAVE.

5. Gardens were planted not only with fragrant and beautiful plants (Cant. vi, 2; iv, 16), but with various fruit-bearing and other trees (Gen. ii, 9; Exod. xxiii, 11; Jer. xxix, 5; Amos ix, 14). Thus we find mention of nut-gardens (Cant. vi, 11, 14), pomegranate-gardens (Cant. iv, 13), olive-gardens (Deut. viii, 8; 1 Chron. xxvii, 12), vine-gardens (Cant. iv, 2; viii, 8). Here, however, we are not to suppose that the gardens were exclusively occupied by these fruits, but that they were severally predominant in the gardens to which they gave name. The distinction, for instance, between a vine-garden and a vineyard would be, that, in the latter, the vine was cultivated solely for use, whereas in the former it was planted for solace and ornament, to cover walls, and to be trained in arbors and on trellises. The quince, medlar, citron, almond, and service trees are among those enumerated in the Mishna as cultivated in Palestine (*Kilaim*, i, 4). Gardens of herbs, or kitchen-gardens, are mentioned in Deut. xi, 10, and 1 Kings xxi, 2. Cucumbers were grown in them (Isa. i, 8; Bar. vi, 70), and probably also melons, leeks, onions, and garlic, which are spoken of (Numb. xi, 5) as the productions of a neighboring country. In addition to these, the lettuce, mustard-plant (Luke xiii, 19), coriander, endive, one of the bitter herbs eaten with the paschal lamb, and rue, are particularized in the precepts of the Mishna, though it is not certain that they were all, strictly speaking, cultivated in the gardens of Palestine (*Kilaim*, i, 8). It is well known that, in the time of the Romans, the art of gardening was carried to great perfection in Syria. Pliny (xx, 16) speaks of it as proverbially elaborate, and again (xii, 64) he describes the balsam plant as growing in Judæa alone, and there only in two royal gardens. It is evident that the gardens of the Hebrews were in a very considerable degree devoted to the culture of medicinal herbs, the preparation of which in various ways was a matter of much solicitude with them (Jer. viii, 22). This is still the case in the East, where vegetable simples are employed in medicine. See MEDICINE. In addition to the ordinary productions of the country, we are tempted to infer from Isa. xvii, 10, that in some gardens care was bestowed on the rearing of exotics. To this conclusion the description of the gardens of Solomon in the Targum on Eccl. ii, 5, 6 seems to point: "I made me well-watered gardens and paradises, and sowed there all kinds of plants, some for use of eating, and some for use of drinking, and some for purposes of medicine; all kinds of plants of spices. I planted in them trees of emptiness (i. e. not fruit-bearing), and all trees of spices which the spectres and demons brought me from India, and every tree which produces fruit; and its border was from the wall of the citadel, which is in Jerusalem, by the waters of Siloah. I chose reservoirs of water, which, behold! are for watering the trees and the plants, and I made me fish-ponds of water, some of them also for the plantation which rears the trees to water it." In

large gardens the *orchard* (פַּרְדֵּי, *parādēsus*) was probably, as in Egypt, the inclosure set apart for the cultivation of date and sycamore trees, and trees of various kinds (Cant. iv, 13; Eccles. ii, 5). Schroeder, in the preface to his *Thesaurus Linguee Armenicæ*, asserts that the word "parden" is of Armenian origin, and denotes a garden near a house, planted with herbs, trees, and flowers. It is applied by Diodorus Siculus (ii, 10) and Berossus (quoted by Josephus, *Ant.* x, 2, 1) to the famous hanging gardens of Babylon. Xenophon (*Anab.* i, 2, 7) describes the "paradise" at Celenæ in Phrygia, where Cyrus had a palace, as a large preserve full of wild beasts; and Aulus Gellius (ii, 20) gives "*riveria*" as the equivalent of *parādēsus* (comp. Philostratus, *Vit. Apol. Tyan.* i, 38). The officer in charge of such a domain was called "the keeper of the paradise" (Neh. ii, 8). See PARADISE.

The law against the propagation of mixed species (Lev. xix, 19; Deut. xxii, 9, 11) gave rise to numerous enactments in the Mishna to insure its observance. The portions of the field or garden, in which the various plants were sown, were separated by light fences of reed, ten palms in height, the distance between the reeds being not more than three palms, so that a kid could not enter (*Kilaim*, iv, 3, 4).—Kitto, s. v.; Smith, s. v. See DIVERSE.

See Schröder, *De hortis Hebraor.* (Marburg, 1722); Bradley, *Descript. œconom. et hortic. vett.* (Lond. 1725); Van Goeus, *De κηποταφίη* (Utr. 1763). See AGRICULTURE.

GARDENER (κηπότρος), a class of workmen alluded to in Job xxvii, 18, and mentioned in John xx, 15; but how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with the process of grafting is evident from Rom. xi, 17, 24, as well as from the minute prohibitions of the Mishna; and the method of propagating plants by layers or cuttings was not unknown (Isa. xvii, 10). Buxtorf says that אֲרִיסִין, *arisin* (Mishna, *Bikkurim*, i, 2) [or, rather, בְּטֵל אֲרִיסִין], were gardeners who tended and looked after gardens on consideration of receiving some portion of the fruit (*Lex. Talm.* s. v.); but that gardening was a special means of livelihood is clear from a proverb which contains a warning against rash speculations: "Who hires a garden eats the birds; who hires gardens, him the birds eat" (Dukes, *Rabbin. Blumenlese*, p. 141).—Smith, s. v. See GARDEN.

GARDEN-HOUSE is the rendering of the A. V. at 2 Kings ix, 27, of בַּיִת הַגַּן; where, however, a place is rather denoted. See BETH-HAGGAN.

Modern Oriental Garden-house.

Garden-houses are usual in the East, especially in the grounds of kings and wealthy persons. In Cant. i, 16, the bride, looking out from her boudoir into the gayly-planted court-yard, acknowledges the taste and affection of her beloved as she spies the summer-house, all shaded with verdure, and containing the *divan* (פַּרְדֵּי), that invited to the luxurious repose of which Orientals are so fond. See GARDEN.

**Gardiner, James**, Colonel, son of captain Patrick Gardiner, of the British service, was born at Carriden, Linlithgowshire, Scotland, Jan. 11, 1688, and at fourteen became ensign in a Scotch regiment in the Dutch service. In 1702 he obtained a commission in the English army, and was severely wounded at the battle of Ramillies in 1706. In several other battles he gave distinguished proofs of capacity and courage. His licentious habits, with his successful adventures in gallantry, gained for him among his dissolute companions the distinction of the "happy rake." But he was not happy. Passages of the Bible which were still imprinted on his memory, and the thought of his mother's pious character and early instructions, often recurred to make him miserable; and at one time, while entertaining a party of profligate young men by his licentious wit, he felt so degraded in his own estimation, and so inwardly wretched, that, a dog lying at his feet, the wish involuntarily rose in his breast, "Would I were as happy as that dog!" In 1719 he became the subject of profound religious impressions. The circumstances, as narrated by Dr. Doddridge, contain much that is marvellous, if not supernatural. "Doddridge himself hints at the possibility of the whole being a dream instead of a 'visible representation of the Lord Jesus Christ upon the cross, surrounded on all sides with a glory,' etc. He also mentions that Gardiner 'did not seem very confident' whether the voice which came to him was really 'an audible voice, or only a strong impression on his mind equally striking.' Considerable doubt has recently been cast on the whole story by the publication of the *Autobiography of Dr. Alexander Carlyle*, edited by John Hill Burton (Edinb., Blackwood and Sons, 1860), in which Carlyle denies altogether the truth of Doddridge's version of the story, at least of the supernatural portion of it. The attendant circumstances, however, are of little moment one way or another; the great fact is the conversion of the brave but wicked soldier into a pious and excellent Christian, and regarding this there has never been any doubt. In 1724 Gardiner was raised to the rank of major, and in 1726 he married lady Frances Erskine, daughter of the fourth earl of Buchan, by whom he had thirteen children, only five of whom survived him." On his becoming the head of a family he commenced the practice of domestic worship—the presence of no guest, the intervention of no engagement, was ever allowed to interfere with its daily performance. He was also regular in attendance on public worship on the Sabbath, and established a system according to which all the servants accompanied him to church. In 1730 he became lieutenant colonel of dragoons, and in 1743 colonel of a new regiment of dragoons. He was killed at the battle of Preston Pans in 1745.—Chambers, *Encyclopædia*, s. v.; Doddridge, *Life of Col. Gardiner*; Jamieson, *Religious Biography*, s. v.

**Gardiner, Stephen**, bishop of Winchester, was born at Bury St. Edmund's, Suffolk, in 1483. He was the illegitimate son of Dr. Woodville, bishop of Salisbury, the brother of Elizabeth, queen of Edward IV. He was educated at Trinity Hall, Cambridge, and in 1520 took the degree of LL.D. Having thoroughly studied the civil and canon law, he became Wolsey's secretary, and rose to the highest posts under Henry VIII, whom he served diligently in the matter of the divorce. At first he sided with the Reformers, but being unwilling to be second to Cranmer, he took the

Roman Catholic side during Henry's lifetime. Gardiner drew up articles accusing Henry VIII's last queen, Catharine Parr, of heresy; but the queen avoided the storm, and he fell into disgrace. At Henry's death Gardiner experienced a still greater reverse. The young king and his government made great religious changes, to which Gardiner set himself in opposition. The council committed him to the Fleet. "Here he was confined until the act of general amnesty, which passed in the December after the accession of Edward, released him. As soon as he was free he went down to his diocese, and while there he remained unmolested; but on his return to London, on account of a certain sermon which he preached on St. Peter's day, he was seized and committed to the Tower (1548). Various conferences were held with him, and his release was promised him on condition that he would express his contrition for the past, promise obedience for the future, subscribe the new settlement in religion, acknowledge the royal supremacy, and the abrogation of the six articles. With the first of these conditions alone did he absolutely refuse to comply. The terms of liberation were afterwards rendered still more difficult. The number of articles that he was called upon to subscribe was considerably increased. On his refusal to sign them his bishopric was sequestered, and he was soon afterwards deprived. For more than five years he suffered close imprisonment, and it was not until the beginning of the reign of Mary that his liberty was restored (1553). If his fall from power at the conclusion of Henry's reign had been sudden, still more sudden was the rapidity of his reinstatement. A Roman Catholic queen was on the throne, and he who had been ever the foremost of her partisans must necessarily be raised to be one of her first advisers. The chancellorship was conferred upon him. His bishopric was restored, and the conduct of affairs placed in his hands. The management of the queen's marriage-treaty was intrusted to him. He was chosen to officiate at her marriage, as he had also done at her coronation, and became her most confidential adviser. No matters, whatever they might be, could be proceeded in without his privity and concurrence; and he had his full share in the persecutions of this reign. The horrors which were not committed by his actual orders must at least have obtained his sanction, for he had reached a height of power, both civil and ecclesiastical, perhaps unequalled in this kingdom except by his master Wolsey alone. He died Nov. 12, 1555. A list of his writings is given in Tanner's *Bibl. Britannico-Hibernica* (p. 308). The character of Gardiner may be stated in a few words. He was a man of great ability; his general knowledge was more remarkable than his learning as a divine. He was ambitious and revengeful, and wholly unscrupulous. His first object was his own preservation and advancement, and his next the promotion of his party interest. He saw deeply into the characters of those with whom he dealt, dealt with them with remarkable tact, and had an accurate foresight of affairs" (*English Cyclopædia*, s. v.). See Burnet, *Hist. of English Reformation*, passim; Hook, *Eccles. Biography*, v, 256; Collier, *Eccles. History of Great Britain*, vi, 125.

**Ga'reb** (Heb. *Gareb'*, גַּרְעֵב, *scabby*; Sept. Γαριβ and Γαριβ), the name of a man and of a hill.

1. An Ithrite (q. v.), i. e. descendant of Jethro or Jether, and one of David's thirty heroes (2 Sam. xxiii, 38; 1 Chron. xi, 40). B.C. 1046. See DAVID.

2. A hill (גַּרְעֵב) near Jerusalem, apparently on the north-west (Jer. xxxi, 39). See JERUSALEM. According to Dr. Barclay, it is "the ridge running from the north-west corner of the city in the direction of Wely Kamat" (*City of the Great King*, p. 76). See GATH. He thinks it may have been so called because Gareb the Ithrite once owned it, or because it contained quarries for the seclusion of the lepers.

**Gargoyle**, a projecting spout, used in Gothic architecture to throw water from the gutter of a building, so as not to drop down the wall. Gargoyles are usually carved into the resemblance of the human figure or of grotesque animals, real or imaginary. They are placed on cornices and on buttresses, and form salient features in many buildings of the early

St. Stephen's, Vienna.

St. Alkmund's Church, Derby; circa 1450. Horsley Church, Derbyshire; circa 1450.

English and decorated styles of the Gothic architecture. (G. F. C.)

**Garissols, ANTOINE**, a French Protestant minister, was born at Montauban in 1587. He was ordained and appointed pastor at Puylaurens in 1610. In 1620 he was sent to Montauban, and in October, 1627, he was made professor of theology at that place. In 1645 he presided at the Synod of Charenton, and distinguished himself by his firmness in resisting demands made by the government which would have destroyed the Protestant liberties. He attacked at this synod the theory of mediate imputation as held by Placeus (q. v.). When the Protestant schools were disorganized, owing to the irregularity with which they received their subsidies, he remained at his post, with no hope of remuneration, and by teaching all branches of theology supplied the places of his absent colleagues as well as his own. He died at Montauban July, 1651. Among his works are *La voie du Salut, exposé en huit sermons* (Montauban, 1637, 8vo);—*Decretis synodici Carentoniensis de imputatione primi peccati Ade explicatio et defensio* (Montauban, 1648, 8vo);—*Theses theologicae de religione et cultu sive adoratione religiosa* (Montauban, 1648, 4to);—*Disputationes elencticae de capitulis fidei inter reformatos et pontificios controversis in acad. Montalb.*, habite sub presidio Ant. Garissolii et Joan. Verderii (Montauban, 1650, 8vo);—*Catecheses ecclesiarum in Gallia et alibi reformatarum Explicatio, opus a Paulo Carolo inchoatum et ab Ant. Garissolio continuatum et absolutum* (Genève, 1656, 4to).—Hoefler, *Nouv. Biog. Générale*, xix, 491, 492.

**Gar'izim** (Γαριζίν v. r. Γαριζίν), a Græcized form (2 Macc. v, 23; vi, 2) of MOUNT GERIZIM (q. v.).

**Garland** (στέμμα, Acts xiv, 13). See WREATH. It was customary in heathen sacrifices to adorn victims with fillets and garlands; but commentators are not agreed as to the purpose to which the "garlands" mentioned in the above passage are to be applied. As the idolaters used to put garlands on the head of their idol before they offered sacrifice, it has been thought by others that they were intended to be set on the heads of the apostles. They were generally composed of such trees or plants as were esteemed most agreeable to the god who was the immediate object of worship (see Kuinöl and others, in loc.). See Rose, *De στεφανοφορίᾳ* (Jena, 1669); Schmid, *De Coronis* (Lips. 1701); Hoefer, *id.* (En. 1646); Schmeizel, *id.* (ib.

1713); Paschalis, *id.* (L. B., 1671); Grege, *De coronis ephularibus* (Lips. 1670). See CROWN; WEDDING.

**Garlands** in the marriage service. It was usual in the early Church to crown persons contracted in marriage with garlands (Chrysostom, *Hom. ix.* in 1 Tim.). This practice was derived from the heathen ceremonies; but, as it was deemed innocent, the Christians made no scruple to adopt it. It is still practised in the Greek Church. At funerals, however, the custom of crowning the corpse and the coffin was rejected as savoring of idolatry (Tertullian, *De Corona Militis*, c. x). It was usual to strew flowers on the grave.—Riddle, *Christian Antiquities*, bk. vii, ch. iii.

**Garlic** (大蒜, *shum*, so called from its odor; Sept. *σκόροδον*, Vulg. *allium*, A. V. "garlick") occurs only once in Scripture, and that in the plural, Numb. xi, 5; where the Israelites are described as murmuring, among other things, for the leeks, the onions, and the garlic of Egypt. There can be no doubt of its being correctly so translated, as the same Arabic word (*thum*) still signifies a species of garlic which is cultivated and esteemed throughout Eastern countries (Celsii *Herobot*, ii, 53). Ancient authors mention that garlic was cultivated in Egypt (Pliny, xix, 32). Herodotus (ii, 125) enumerates it as one of the substances upon which a large sum (1600 talents) was spent for feeding laborers employed in building the Pyramids, although Hasselquist expresses a doubt whether it was cultivated in that country (*Trav.* p. 562). The species considered to have been thus referred to is *Allium Ascalonicum*, which is the most common in Eastern coun-

*Allium Ascalonicum.*

tries, and obtains its specific name from having been brought into Europe from Ascalon (see Jac. de Vitriaco, in the *Gest. Franco.* iii, 1142). It is now usually known in the kitchen garden by the name of "eschalot" or "shallot." Its ranker congener is the common garlic (*Allium sativum*). See the *Penny Cyclopædia*, s. v. *Allium*. Rosellini, however, thinks he has discovered it upon a painting in Beni Hassan. The Talmudists frequently mention the use of this plant among the Jews, and their fondness of it (*Kilaim*, i, 3; vi, 10; *Maaser*. v, 8; *Terum*. vii, 7; *Nedar*. viii, 6, etc.). It formed a favorite viand with the common people among the Greeks and Romans (Pliny, xx, 23; *Plautus*, *Mostell.* I, i, 38; Horace, *Ep.* iii, 3; Suetonius, *Vesp.* 8). See BOTANY.

**Garment** (represented by several Heb. and Greek words) [see APPAREL; CLOTHING; DRESS; RAIMENT; VESTURE, etc.]. For a list of modern Arabic garments, see Thomson, *Land and Book*, i, 167 sq. In 2 Kings xi, 13, it is said, "Then they hastened and took every man his garment, and put it under him on the top of the stairs, and blew with trumpets, saying, Jehu is king." Here they laid down their garments in-

stead of carpets. The use of carpets was common in the East in the remoter ages. The kings of Persia always walked upon carpets in their palaces. Xenophon reproaches the degenerate Persians of his time that they placed their couches upon carpets, to repose more at their ease. The spreading of garments in the street before persons to whom it was intended to show particular honor was an ancient and very general custom. Thus the people spread their garments in the way before our Saviour (Matt. xxi, 8), where some also strewed branches. In the *Agamemnon* of Æschylus, the hypocritical Clytemnestra commands the maids to spread out carpets before her returning husband, that, on descending from his chariot, he may place his foot "on a purple-covered path." We also find this custom among the Romans. When Cato of Utica left the Macedonian army, where he had become legionary tribune, the soldiers spread their clothes in the way. The hanging out of carpets, and strewing of flowers and branches in modern times, are remnants of ancient customs. See RENDING; SEWING.

A number of sumptuous and magnificent habits was, in ancient times, regarded as an indispensable part of the treasures of a rich man. Thus the patriarch Job, speaking of the riches of the wicked, says, "Though he heap up silver as the dust, and prepare raiment as the clay" (Job xxvii, 16). Joseph gave his brethren changes of raiment, but to Benjamin he gave "three hundred pieces of silver, and five changes of raiment" (Gen. xlv, 22). Naaman carried for a present to the prophet Elisha ten changes of raiment (2 Kings v, 5). In allusion to this custom, our Lord, when describing the short duration and perishing nature of earthly treasures, represents them as subject to the depredations of the moth, from which the inhabitants of the East find it exceedingly difficult to preserve their stores of garments: "Lay not up for yourselves treasures on earth, where moth and rust doth corrupt" (Matt. vi, 19). Paul, when appealing to the integrity and fidelity with which he had discharged his sacred office, mentions apparel with other treasures: he says, "I have coveted no man's gold, or silver, or apparel" (Acts xx, 33). The apostle James likewise (as do the Greek and Roman writers, when they particularize the opulence of those times) specifies gold, silver, and garments as the constituents of riches: "Go to now, ye rich men; weep and howl for your miseries that shall come upon you. Your riches are corrupted, and your garments moth-eaten" (James v, 1, 2). We find that the custom of hoarding up splendid dresses still exists in Palestine and the East. It appears that even Solomon received raiment as presents (2 Chron. ix, 24). Asiatic princes and grandees keep changes of raiment ready made, for presents to persons of distinction whom they wish particularly to honor. The simple and uniform shape of the clothes makes this custom practicable, and accounts also for the change of one person's dress for another's, which is mentioned in sacred history. This will, perhaps, apply to the parable of the wedding garment, and to the behavior of the king, who expected to have found all his guests clad in robes of honor (Gen. xxvii, 15; Deut. xxii, 5; 1 Sam. xviii, 4; 2 Kings v, 5, 22; Matt. xxii, 11; Luke xv, 22). The "changeable suits of apparel" in Isa. iii, 22, should be properly "embroidered robes." See BANQUET, etc.

Women were forbidden to wear male garments, and the reverse (Deut. xxii, 5; see Mill, *De commutatione vestium utriusq. sexus*, Utr. s. a.). On heterogeneous garments, see DIVERSE.

**Gar'mite** (Heb. with the art. גַּרְמִיתַי, *hag-Garmi'*; Sept. Γαρμι v. r. Ὀραρμι and Ὀγαρμι; Vulg. *Garmi*), an epithet of KEILAH (q. v.) in the obscure genealogy (1 Chron. iv, 19) of Mered (q. v.); apparently to denote its *strength* (i. q. *bony*, from גַּרְמִיתַי; see Prov. xxv, 15; Job xl, 18); but regarded by Gesenius and Fürst (after the Targum, ad loc.) as a proper name: the form

(like that of the associated soubriquets) is patrial, as if from a town, Gerem; but no such place is elsewhere mentioned, unless it be the *Beth-Garem* (בֵּית גֵּרֵם) of the Talmud (*Eruvin*, fol. 19, a), and the *Mansul Garem* of Astori, east of Gaza, referred to by Schwarz (*Palest.* p. 118) as now unknown.

**Garner** is the rendering in the Auth. Vers. of the following words:  $\text{אֹסַר'}$ , *osar'*, a *treasure*, as it is usually rendered, a store or stock of goods laid up, hence the place where they are deposited (Joel i, 17; "treasury," 2 Chron. xxxii, 27);  $\text{מֵזֵב}$ , *me'zev* (Sept. *ταμιον*), a *cell* or store-room (Psa. cxliv, 13);  $\text{ἀποθήκη}$ , a *repository* or place for storing away anything, especially a granary (Matt. iii, 12; Luke iii, 17; elsewhere "barn"). See **BARN**. Cisterns (q. v.) are often used for this purpose in the East (Thomson, *Land and Book*, ii, 262 sq.). The structures of the ancient Egyptians for the storage of grain were above ground, and of great importance in so eminently a grain-growing country. See **AGRICULTURE**.

Ancient Egyptians Storing Grain.

This cut shows the section of a granary, to which the grain is in the act of being transferred after it has been winnowed. The clerk, seated on the heap, writes down the number of the measures borne to the granary, seemingly from the oral report of the man who stands on the ground with raised hands.

**Garnet.** See **SARDIUS**.

**Garnet, HENRY**, an English Jesuit, was born in Nottingham in 1555. He was educated as a Protestant at Winchester College; but, having turned Romanist, he travelled in Spain, and afterwards studied at Rome, and gained distinction for his skill in mathematics. He was made provincial of the Jesuits in England in 1586, and served with great astuteness and fidelity the Roman Church in that country. He was tried in 1606 for complicity in the Gunpowder Plot (q. v.), and was executed May 3. A good account of him is given in *Rule, Celebrated Jesuits*.—Mosheim, *Church History*, book iv, cent. xvii, sec. ii, pt. i, chap. i, § 10; Hume, *History of England*, ch. xlvi.

**Garnett, JOHN, D.D.**, an English divine, was born in 1707. He became fellow of Sidney College, Cambridge, and afterwards Lady Margaret's preacher. He was made bishop of Ferns in 1752, and bishop of Clogher in 1758. He died in 1782. His principal work is *A Dissertation on the Book of Job, its Nature, Argument, Age, and Author, wherein the celebrated Text, xix, 25, is occasionally considered and discussed; to which are added four Sermons* (London, 1749, 4to). He contends "that the book of Job is an allegorical drama, designed to represent the fall and restoration of a captive Jew, and with a view to recommend the virtue of patience. The author he supposes to have been Ezekiel, and the period of its production subsequent to the Babylonish captivity."—Orme, *Bibliotheca Biblica*, p. 200; Kitto, *Cyclopaedia*, s. v.

**Garnier, Jean**, a French Jesuit, was born at Paris in 1612. He joined the order in 1628, and soon displayed great talent and aptness for study and teaching. As usual, this gift was fostered by the society, and for forty years Garnier held different professorships of theology and literature. He died at Bologna, on his way to Rome, Oct. 16, 1681. His most important works are on the Pelagian controversy, his editions of *Juliani Eclan. episcopi libellus, notis illustr.*

(1668), and also of *Marii Mercatoris opera cum notis*, etc. (1673, fol.). The dissertations appended to this edition are still valuable to the history of Pelagianism. In 1675 he published the *Breviarium sive historia controversiarum Nestorianae et Eutylichianae* of the archdeacon Liberatus. After his death, father Hardoin published his *Supplement to the Works of Theodoretus*, at the beginning of which he gives a eulogy of Garnier's labors and talents.—Feller, *Dict. Biog.*; Hoefler, *Nouv. Biog. Génér.*, xix, 510.

**Garnier, Julien, DE CONNERRE**, an eminent Benedictine of St. Maur, was born about 1670, and died at Paris June 3, 1725. He enjoyed great reputation for learning, and was highly esteemed both as a man and a priest. His superiors intrusted him with the preparation of a new edition of St. Basil, and the result of his labors was one of the best ever produced at St. Maur; *Scti. Patris nostri Basilii Opera* (Paris, Coignard). The preface is a remarkable production. Garnier, however, was able to complete but two volumes. Maran, who continued the work after the death of Garnier, brought

out the third and last in 1730. See *Histoire littér. de la Congrégation de Saint-Maur*, p. 470; Herzog, *Real-Encyclop.* iv, 662.

**Garnish:**  $\text{הָפָץ}$ , *tsiphah'*, in Piel, to *overlay* (as usually rendered), e. g. with stones, 2 Chron. iii, 6; in a similar sense,  $\text{κοσμίω}$ , to *adorn*, Rev. xxi, 19, which is used of *decking* with garlands, Matt. xxiii, 29; or of a *furnished* apartment, Matt. xii, 44; Luke xi, 25). In Job xxiii, 16, the term is peculiar,  $\text{הַפָּצִים}$ , *shiphrah'*, which Gesenius regards as a noun denoting *brightness*, with which the heavens are clothed; although Fürst, with many others, pointing  $\text{הַפָּצִים}$ , regards it as a Piel form of  $\text{פָּצַע}$ , in the sense of *arch*, referring to the vaulted form of the sky. See **ASTRONOMY**.

**Garrettson, FREEBORN**, a distinguished pioneer preacher of the Methodist Episcopal Church, was born in Maryland August 15, 1752, was converted in 1775, and entered the Conference in the same year. In December, 1784, he was ordained elder by Dr. Coke, and volunteered as missionary to Nova Scotia. In 1788, with twelve young ministers, he opened the work of evangelizing Eastern New York and Western New England. From 1818 to his death, Sept. 26, 1827, he mostly had the relation of Conference missionary. Mr. Garrettson was a very widely-useful minister. "He was among the earliest Methodist preachers of American birth, and, being active and zealous from the commencement of his ministerial career, his life and labors are intimately connected with the rise and progress of Methodism in this country." He preached in almost all the Eastern States, from Nova Scotia to the Gulf of Mexico, and on all his appointments many souls were converted and many churches built up. Although not a man of great learning, Mr. Garrettson was a man of vigorous mind and powerful character. He was imbued with fervor and zeal; and during fifty-two years he was one of the most laborious and efficient evangelists of the age. He died greatly honored

and lamented.—*Minutes of Conferences*, i, 574; Bangs, *Life of F. Garrison* (N. Y. 12mo); Stevens, *Memorials of Methodism*, vol. i; *Methodist Magazine*, March, 1828; Stevens, *History of the Methodist Episcopal Church*. (G. L. T.)

**Garrison**, denoted by four or five Heb. words from the root  $\text{נָצַב}$ , *natsub'*, to stand firm or erect (i. q.  $\text{נָצַב}$ ). 1.  $\text{מַטְּסָב}$ , *matstsab'* (fem.  $\text{מַטְּסָבָה}$ , *matstsabah'*, 1 Sam. xiv, 12), a station, i. e. lit. a standing-place (e. g. where the priests stood in Jordan, "place," Josh. iv, 3, 9); hence a military or fortified post (e. g. the Philistine camp, 1 Sam. xiii, 23; xiv, 1, 4, 6, 11, 12, 15; 2 Sam. xxiii, 14); metaph. an office or public "station" (Isa. xxii, 19). 2.  $\text{מַטְּסָב}$ , *matstsab'*, a cordon of troops ("mount," Isa. xxix, 3; perhaps also "pillar," Judg. ix, 6). 3.  $\text{נֹטֵיב}$ , *netsib'*, properly a prefect or superintendent ("officer," 1 Kings iv, 19; 2 Chron. viii, 10); hence a military post (1 Sam. x, 5; xiii, 3, 4; 2 Sam. viii, 6, 14; 1 Chron. xi, 16; xviii, 13; 2 Chron. xvii, 2); also a monumental "pillar" (q. v.) or *cippus* (e. g. a statue of salt, Gen. xix, 26; a sense in which some take the word also in 1 Sam. x, 5; xiii, 3, like the *stela* erected by Sesostris in conquered countries in token of subjugation, Herod. ii, 102, 106). 4. An improper rendering, Ezek. xxvi, 11, of  $\text{מַטְּסָבָה}$ , *matstsebah'*, which always designates a standing object, either an architectural or monumental column (usually rendered "pillar;" in the passage of Ezekiel perhaps referring to those of the Tyrian temples; comp. Herod. ii, 14), or an idolatrous "image" (q. v.). See FORTIFICATION.

**Garsis**, a town mentioned in the Talmud ( $\text{גַּרְסִיָּה}$ , *Erubim*, fol. 21, b) as the residence of one Rabbi Joshua; also by Josephus (*Γαρσίς*, *Itav*, v, 11, 5) as the native city (*πόλις*) of one Tephthæus, and situated in Galilee—Schwarz adds (*Palest.* p. 178) 20 stadia from Sephoris (evidently confounding it with the *Garisimè*, *Γαρισίμη* v. r. *Γαρίξ κόμη*, of Josephus, *Life*, § 71), but that the site is now unknown.

**Garve**, KARL BERNHARD, a German divine and Christian poet, was born near Hanover, Jan. 4, 1763. He studied theology in the seminary of Barby, and soon after became professor of philosophy and history at Niesky. This he left in 1797, and afterwards served in different functions in Amsterdam, Ebersdorf, Norden, and Berlin successively, distinguishing himself particularly in the latter place, where his ministrations were eminently successful, despite the disordered state of affairs during the years 1810-16. He was afterwards at the head of the Moravian community at Neusalz, on the Oder, which post age and infirmities compelled him to resign in 1838. He died June 22, 1841. Garve was one of the best of modern German hymn writers, especially excelling in versification, and combining fecundity and ease of production with rare beauty of language and deep religious feeling. He published *Christliche Gesänge* (Görlitz, 1825), containing 303 pieces, mostly original:—"Brüdergesänge" (Gnadau, 1827); and left many hymns in manuscript.—*Herzog, Real-Encyclopädie*, iv, 663.

**Garrison**, DANIEL, was born in Washington Co., Md., January 9, 1830. He graduated at Pennsylvania College in 1850, and passed his theological studies in the seminary at Gettysburg. He was licensed to preach, and soon after accepted a professorship in Illinois State University. This position he occupied with honor to himself and advantage to the institution for several years. After spending some time in visiting portions of Europe, Asia, and Africa, he returned to this country, and successively preached at Canton, Ohio, and Greensburg, Pa. He died Sept. 30, 1865. He was an earnest, impressive, and successful minister of the Lutheran Church, a man of enlarged mind and liberal heart, whose memory will be cherished with affectionate interest. His only publications are, *Our*

*Country in the Light of History*, delivered before the alumni of Pennsylvania College, 1861; and *The Sudden Death of Henry J. M. Millan*, pronounced in the Lutheran Church, Greensburg, 1864. (M. L. S.)

**Gary**, GEORGE, a Methodist Episcopal minister and missionary to Oregon, was born at Middlefield, Otsego Co., N. Y., Dec. 8, 1793; entered the New England Conference in 1809; in 1813 was transferred to Genesee Conference; in 1818 was made presiding elder; in 1825 was Conference missionary; in 1834, missionary to the Onondia Indians; in 1836 was transferred to Black River Conference; and in 1844 was appointed missionary superintendent of Oregon, where he remained four years. After his return he labored on until 1854, when his health entirely failed. He died March 25, 1855. Mr. Gary was an eminently holy and useful minister. He was six times delegate to the General Conference, and was deeply engaged in all the ecclesiastical, religious, and educational interests of the Church. He was a wise and safe counsellor, and his influence in his Conference was very great. As a preacher he was widely known for "true, persuasive, and sanctified eloquence," which "mightily moved his hearers."—*Minutes of Conferences*, v, 560; Peck, *Early Methodism* (N. York, 1860, 12mo), p. 480; Sprague, *Annals*, vii, 478. (G. L. T.)

**Gash'mu** (Hebrew *Gashmū'*,  $\text{גַּשְׁמוֹ}$ ; Sept. omits, Vulg. *Gossem*), prob. a prolonged form (Neh. vi, 6) of the name GESHEM (q. v.).

**Gassendi** or **Gassend**, PIERRE, an eminent French philosopher and scholar, was born of humble parentage Dec. 24, 1595, at Champtericier, a village near Digne, in Provence. He died at Paris Oct. 24, 1655. From his earliest years he was noted for sweetness of disposition, quickness of apprehension, keenness of observation, and precocity of genius. As a child he would wander in the fields on clear nights to admire the beauty, variety, and order of the starry hosts, and would thus excite the anxieties of his family, till his habits and occupations became familiar to them. At four years of age he made sermons for the entertainment of his childish companions, at ten he delivered a Latin address to the bishop of his diocese, and at sixteen he had already adopted the motto of his life—*sapere aude*—dare to be wise. He was early sent to school, and, fortunately, fell at Digne into the hands of a teacher able to appreciate and develop his wonderful powers. His father was with difficulty induced to permit his attendance at the University of Aix, along with the sons of a relative, and at that relative's expense. He was required to return after a two-years' course. At Aix he was under the care of Fesaye, a learned Minorite, who introduced him into the thorny labyrinths of philosophy. At the expiration of the appointed time Gassendi returned to the plough, but left it to teach rhetoric at the age of sixteen in the academy of Digne. At nineteen he was appointed, on the death of Fesaye, to give instructions in philosophy at the University of Aix; but he devoted himself chiefly to the study of theology, as he had selected the Church for his career. In 1616, however, he was simultaneously elected to the chairs of theology and philosophy, and he accepted the latter. The authority of Aristotle had been long declining among the learned, and, in common with many of his precursors and contemporaries, Gassendi employed himself in the confutation of the peripatetic dogmas. The controversial views thus promulgated were systematized in his *Exercitationum Paradoxiarum adversus Aristoteleos libri septem*. Before publishing the work he submitted it to the judgment of Nicholas Peirese and the prior of Valetta. By them he was persuaded to complete his design of entering the Church; and, after receiving his doctorate of divinity, was through their influence presented to a canonry at Digne. A portion of the *Paradoxes* was published in 1624, but the

last five books were withheld by the advice of his friends, and his labors in this direction were arrested by the discovery that the subject had been sufficiently discussed by Francisco Patrizzi.

These writings, petulant in character, and full of youthful cavils and superficial objections, provoked opposition, which was not mitigated by Gassendi's manifest predilection for the opinions of Epicurus. The young philosopher had been born at the close of the religious wars of France, and had entered upon life amid the turmoil and strife of the regency of Anne of Austria, during a period when many speculative minds sought relief from controversy, and from the agitation of religious and political dissensions, in the careless scepticism and easy morality which had been rendered attractive by Montaigne. Ecclesiastical duties having summoned him to Paris, he profited by the occasion to augment his multifarious learning, and to form the acquaintance of the learned in the capital. It was probably at this time that he was brought into intimacy with Des Cartes, an intimacy which was interrupted and shaken by his *Observations on the Philosophical Meditations*, and by the disingenuous conduct of Des Cartes in regard to them. Gassendi was induced to accept in 1645 the professorship of mathematics in the Royal College of France; but the exertion of lecturing, in conjunction with his other studious avocations, undermined his health, and compelled him to seek its restoration by a return to his native air. During this period he gave to the world the treatise *De Vita et Moribus Epicuri* (Lugduni, 1647), and his edition of the *Tenth Book of Diogenes Laertius* (1649), with copious annotations, in which he collected and arranged the abundant literary materials which he had gathered for the illustration of the philosophy and the philosopher of the Garden. In 1653 Gassendi returned to Paris, and, after publishing the lives of Tycho Brahe, Copernicus, Purbach, Regiomontanus, and Peiresce, devoted himself assiduously to the completion and perfection of his scheme of speculation, though these last results of his labors did not appear till after his death in the *Synagma Philosophiæ Epicureæ*. His health finally gave way in 1654, and, after much suffering from pulmonary disease, he died, having survived his illustrious rival Des Cartes five years.

The complete works of Gassendi were collected and published in 1658, in 6 vols. fol., by his friends Louis de Montmor and François Henry, with a biography by Sorbière prefixed. The most important of these works have been already mentioned, but they were accompanied by numerous essays on various topics of mathematics, astronomy, natural history, etc. These it is unnecessary to notice, though all branches of contemporaneous investigation engaged the attention of Gassendi, and his reputation was higher and less assailable in science than in philosophy. The range of his inquiries in the latter department is illustrated by his early refutation of the mystical doctrines of Robert Fludd, in the *Examen Philosophiæ Fluddianæ*, by his *Disquisitio Metaphysica*, in opposition to Des Cartes, and by his life-long labors in resuscitating the Epicurean doctrine, especially in its physical developments. His zealous attachment to the daring imaginations of Epicurus, and his ardent rehabilitation of the character of the "*Græius homo*" who first forced the barriers of nature—

"et extra  
Processit longe flammantia moenia mundi"—

invited misapprehension, and were obnoxious to grave criticism. To repel misconception, he appended to the *Synagma Philosophiæ Epicureæ* a series of elaborate essays, in which he repudiated and refuted the infidel tenets ascribed to Epicurus. This late defence, however consonant with the whole tenor of his own life, was inadequate to preclude unfavorable presumptions, particularly on the part of those predisposed to welcome them. Nor was his intimate association with

Hobbes, La Mothe le Vayer, and other notable sceptics of the time, calculated to inspire confidence in his orthodoxy. But there is no reason to suppose that the piety of Gassendi was less sincere than it was habitual, or that he ever questioned the validity of the religion which he professed. It was an age of paradox, and of promiscuous and vague, but earnest inquiry. His early resistance to the Aristotelians may have attracted his favor to the ethical as well as the physical scheme which was most strongly contrasted with the positions of the peripatetic school. The temper of the period, too, after long theological controversy and a century of religious war, desired the conciliation or the relegation of polemical asperities, and cherished a careless scepticism or an uninquiring faith. The morals of Epicurus were contemplated by Gassendi in their original innocence and purity, divested of the corruptions which vitiated them in their later and more familiar applications, and adorned with that chaste simplicity which won the earnest and repeated commendations of the Stoic Seneca.

*Philosophy of Gassendi.*—Neither the desire nor the design of founding a sect was entertained by Gassendi. He left no school, though he made his mark on the scientific and speculative development of Europe. He was distinguished by quick perception, accurate observation, remarkable penetration and discrimination, various research, and manifold accomplishment. He was enthusiastic in the discovery of new facts, eager in the exposure of inveterate error, but he had no taste for system-mongering, and was free from the weaknesses of personal ambition. He aimed rather at rejuvenating ancient knowledge than at inaugurating new fancies. The cardinal principle of Epicurus was accepted and expounded by Gassendi in such a manner as to harmonize with the simplicity, temperance, and purity of his life. Pleasure is the *summum bonum*—the final object, the highest motive of human action, the crown of human aspirations; but this pleasure is the pleasure of the good man; the perfect state of the pagan; the present and eternal bliss of the Christian. It is neither to be attained nor sought by personal indulgences, nor by concession to appetites; but only by the punctilious discharge of every duty, in expectation of that serenity of a conscience at ease, which is the most abiding and the most assuring reward of virtue. Such a theory is liable to great abuses, and is certain to be ultimately abused. An easy conscience is easily mistaken for a conscience at ease, and happiness is identified with pleasure when pleasure ceases to be identical with happiness. Pleasure, in its vulgar sense, thus becomes at once the aim of life and the means of securing that aim; and pleasure, in its philosophic sense, which implies the concord of desire with duty, is totally forgotten or ignored. Thus all the vices of the Epicurean stye are introduced. But it is as uncharitable as it is uncharitable to stigmatize the philosopher instead of the philosophy for the perverseness or the perverse tendency of his doctrine. In the most defeated Epicureanism there is assuredly an intricate confusion which eventuates in grievous error. Violence is habitually done to words, and a greater violence is done to thoughts. There is a continual paronomasia and *paragnomesia*—a play upon terms and upon conceptions—which dazzles, bewilders, and misleads; but the perilous thesis may be held in conjunction with the purest intentions and the most rigorous observance of moral rectitude. So it was held by Gassendi. It must be admitted that the Hedonic theory is not more incompatible with Christianity than the utilitarianism of William Paley, Jeremy Bentham, or John Stuart Mill. The mental philosophy of Gassendi corresponded with his ethical assumptions. He espoused sensationalism, though in no rigid or consistent form. He was the legitimate precursor of Locke in both the statement and the vacillation of his views. While recognising sensation and

reflection as the origin of our ideas, he was by no means inclined to pure materialism. This incoherence of language and doctrine was not peculiar to him. It characterizes the whole school of Locke, and may be ascribed in part to the ambiguity of the terms employed, in part to the indistinctness and undistinguished character of the phenomena commented on. There was a similar inconsequence in the physical system of Gassendi. He received from Epicurus, or, rather, from Lucretius, the doctrine of atoms, of a vacuum, and of the regular operation of natural forces; but he did not admit the accidental collision and casual implication of primary particles, nor did he exclude the divine will and the divine intelligence from the order of creation. In his separate tenets as in his general intellectual habit, he presented a strong contrast to his more famous and more methodical contemporary, Des Cartes. Positions apparently materialistic were maintained by him in conjunction with a faithful adherence to both natural and revealed religion; and he offered the strange spectacle of a sincere and preposterous Epicurean who was equally sincere as a Christian and as an ordained teacher of Christianity. Des Cartes, on the other hand, with principles essentially idealistic, combined the postulates of the infinite tenuity and divisibility of matter, of a *pleuum*, and of the vertiginous evolution of the universe, with practical but unavowed Pyrrhonism. There was point, but there was also inadequacy and injustice in the reciprocated antinomias with which these philosophers discredited each other's system—in the *O anime!* applied by Gassendi to Des Cartes, and in the *O caro!* with which Des Cartes retorted upon Gassendi. No doubt the controversial attitude of Gassendi betrayed him into exaggerated and unguarded expression; but his physical system, though borrowed from Epicurus, may be so limited and explained as to offer no offence to religious faith.

It should be remembered that his speculations were hazarded in the infancy of physical science; that his aptitudes, studies, and aims were chiefly scientific; that the materials, processes, and instruments of science were as yet rude, cumbrous, and unshapen; that, even after the lapse of two centuries, the scientific method and scientific conclusions often appear irreconcilable with religion and revelation. The certain harmony of the book of nature and the Book of God may, indeed, be asserted *à priori* to be a necessity, and was so asserted by Lord Bacon; but this harmony is still very indistinct. The Epicurean creed was an extravagant and premature attempt at scientific procedure, yet it has been recently recognised by high scientific authority to be essentially scientific in form and aim, however conjectural and arbitrary in development. In character as in purpose, it is curiously analogous to the most recent speculations of scientific infidelity. The sublimated Epicureanism of Gassendi was, in like manner, an imperfect anticipation of modern scientific reasoning. It resembles the heterogeneous schemes of those who too hastily combine problematical science with old religious dogmatism. Though it proved itself incapable of instituting a school, it was a potent influence in stimulating, directing, and moulding the scientific spirit which illumined the latter half of the 17th century, and inaugurated the brilliant era of modern science. Dalton's atomic theory is not the only dream of present scientific belief which may be traced back to Gassendi. Hobbes and Locke, Barrow and Newton, were largely indebted to the impetus communicated by him, if not to his teachings; and it is needless to acknowledge our continued and manifest obligations to those great names. On the subject of Gassendi, there is little to be consulted beyond the several editions of his works, the historians of modern philosophy, and the lives of the philosopher by Sorbière (Paris, 1658) and by Bongereel (Paris, 1737), with M. de Levarde's *Historical and Critical Epistle* to the latter biographer. (G. F. H.)

**Gassner**, JOHANN JOSEPH, a Roman Catholic priest, was born at Branz, near Pludenz, August 20, 1727, studied theology at Innsbruck and Prague, was ordained priest in 1750, and in 1758 was settled as pastor at Klösterle. After filling that station for some fifteen years, he began to believe in the cure of physical disorders by exorcism, in virtue of the power conferred on him by his ordination. His first attempts were made upon himself, and having been, as he thought, successful, he felt encouraged to follow what he considered his calling. He travelled much, curing the sick, who were brought to him often from places afar off. "The bishop of Constance called him to his residence, but, having come very soon to the conviction that he was a charlatan, advised him to return to his parsonage. Gassner betook himself, however, to other prelates of the empire, some of whom believed that his cures were miraculous. In 1774 he even received a call from the bishop at Ratisbon to Ellwangen, where, by the mere word of command, *Cesset* (Give over), he cured persons who pretended to be lame or blind, but especially those afflicted with convulsions and epilepsy, who were all supposed to be possessed by the devil. Although an official person kept a continued record of his cures, in which the most extraordinary things were testified, yet it was found only too soon that Gassner very often made persons in health play the part of those in sickness, and that his cures of real sufferers were successful only so long as their imagination remained heated by the persuasions of the conjuror" (Chambers, from *Conn. Lexikon*, s. v.). Finally, the emperor, Joseph II, forbade his exorcisms, and the archbishops Anton Peter of Prague and Hieronymus of Salzburg declared themselves against him (see *Act. histor. eccl. nostri temporis*, xix, 315). Pope Pius VI expressed his disapprobation both of Gassner's deeds and writings. He died in retirement April 4, 1779. Lavater (q. v.) believed in the reality of many of the cures ascribed to Gassner, and regarded them as the result of an extraordinary power of faith. Among his works, the most remarkable are *Weise, fromm und gesund zu leben, und ruhig und gottselig zu sterben*, etc. (Kempten, 1774; Augsb. 1775, 3d ed.), and *J. J. Gassner's Antwort auf d. Anmerkungen wider seine Gründe u. Weise z. exorciren* (Augsburg, 1774).—Herzog, *Real-Encyclop.* iv, 664; Hoefler, *Nov. Biog. Générale*, xix, 595; Sterzinger, *Die aufgedeckten Gassnerschen Wundcuren* (1775); Semler, *Sammlung von Briefen u. Aufsätzen über die Gassnersche Geistesbeschwörung* (Halle, 1776).

**Gaston**. See ANTHONY, ST., ORDERS OF (vol. i, p. 252).

**Gastrell**, FRANCIS, bishop of Chester, was born at Slapton, in Northamptonshire, about 1662, and was educated at Westminster School and at Christ Church College, Oxford. He became preacher at Lincoln's Inn, and Boyle lecturer. In 1700 he took the degree of D.D., and in 1702 he was appointed canon of Christ Church, Oxford. In 1711 he was made chaplain to the queen, and in 1714 bishop of Chester, with permission to retain his canonry, but he resigned his preachership at Lincoln's Inn. Though never friendly to bishop Atterbury's politics, he stood by him in Parliament when the Bill of Pains and Penalties was brought in against him, and voted against his banishment. He survived that event but a few years. The gout put an end to his life, Nov. 24, 1725. His most important writings are, *The Certainty of Religion in general*, Boyle lecture (Lond. 1697, 8vo);—*The Certainty of the Christian Revelation* (Lond. 1699, 8vo);—*The Christian Institutes* (Lond. 1717, 12mo, 3d ed.);—*Lat. Institutiones Christianæ* (Lond. 1718, 12mo);—*Deism truly represented* (Lond. 1722, 8vo);—*Remarks on Clarke's Doctrine of the Trinity* (Lond. 1714, 8vo).—Hook, *Biog. Eccles.* vol. v; Chalmers, *Biog. Dictionary*, s. v.

**Gataker**, Charles, son of Thomas Gataker (see

below), was born at Rotherhithe about 1614, and was educated at St. Paul's School, at Sidney College, Cambridge, and at Pembroke College, Oxford. He became chaplain to viscount Falkland, and afterwards rector of Hoggeston, in Buckinghamshire, where he continued from 1647 till his death in 1680. Among his writings are, *The Way of Truth and Peace, or a Reconciliation of St. Paul and St. James concerning Justification* (1669, 8vo):—*An Answer to five captious Questions propounded by a Factor for the Papacy, by parallel Questions and positive Resolutions* (Lond. 1673, 4to):—*The Papists' Bait, or their usual Method of gaining Proselytes answered* (Lond. 1674, 4to):—*Ichnographia Doctrinæ de Justificatione secundum Typum in Monte* (Lond. 1681, 4to). Gataker wrote *Animadversions on Bull's Harmonia Apostolica*, which brought out Bull's *Execræ Censuræ*.—Hook, *Ecl. Biog.* v, 276; Woods, *Athen. Oxon.* vol. ii.

**Gataker, Thomas**, was born Sept. 4, 1574, in London, where his father was rector of St. Edmund's. He was educated at St. John's College, Cambridge, and about 1601 became preacher at Lincoln's Inn. He held this employment for ten years, and applied himself especially to the study of the Scriptures in Hebrew and Greek, and wrote several works in illustration of the Old Testament. He also wrote *Of the Nature and Use of Lots* (Lond. 1619, 4to), in which he distinguishes between innocent and unlawful games of chance. In 1611 he was appointed rector of Rotherhithe. In 1637 he printed a defence of his treatise on *Lots* under the title *Thomæ Gatakeri Londinensis Antithesis partim G. Aresii, partim G. Voetii de Sorte thestibus reposita* (4to). In 1642 he was chosen to sit in the Westminster Assembly, where in several instances he differed from the majority. He afterwards wrote, with others, the *Annotations on the Bible*, which were published by the Assembly; the notes on Isaiah and Jeremiah are by him. "In 1648, Gataker, with other London clergymen, to the number of forty-seven, remonstrated against the measures taken by the Long Parliament with respect to king Charles, and he became, in consequence, an object of suspicion to the ruling powers, but by his mild conduct he escaped personal annoyance. In 1652 he published a Latin translation of M. Aurelius's *Meditations*, with valuable notes, tables of reference, and a preliminary discourse on the philosophy of the Stoics. In the latter part of his life he had to sustain a controversy against the pretended astrologer William Lilly." He died June 27, 1654. His *Opera Crivica*, edited by Witsius, were published at Utrecht, 1698, 2 vols. fol., containing, besides the *Meditations*, his *Cinnus* and *Adversaria Miscellanea*, being disquisitions on Biblical subjects, and *De Novi Testamenti Stylo*, with other philological and critical essays. Gataker was a man of high reputation for learning. Echard remarks of him that he "was the most celebrated of the assembly of divines, being highly esteemed by Salmasius and other foreigners; and it is hard to say which is most remarkable, his exemplary piety and charity, his polite literature, or his humility and modesty in refusing preferments."—Hook, *Eccles. Biog.* v, 275; Jones, *Christian Biography*; *English Cyclopædia*, s. v.; Wood, *Athene Oxon.* vol. ii.

**Gat'am** (Heb. *Gatam'*, גַּתְאִם, according to Gesenius from the Arab. *puny*; according to Fürst from גַּתְאִם, a burnt valley; Sept. Γοθώμ and Γοθάμ v. r. Γουθώμ; Vulg. *Gotham* and *Gothan*), the fourth named of the sons of Eliphaz, the son of Esau, and founder of a corresponding Edomitish tribe (Gen. xxxvi, 11, 16; 1 Chron. i, 36). B.C. post 1927. Knobel (*Gen.* ad loc.) compares *Jodam*, an Arab tribe inhabiting the Hisma, a part of Mt. Sherah, the 2 having dropped from the name (Gesenius, *Thes.* p. 976); while Rödiger (*ib.* Append. p. 80) refers to the Arab tribe *Setham*, mentioned by Ibn-Duraid (1854, p. 300). See IDUMÆA.

**Gatch**, PHILIP, a Methodist Episcopal minister, was born in Maryland March 2, 1751; was converted in 1772; entered the Philadelphia Conference as a travelling preacher in 1774; labored in New Jersey, Pennsylvania, and Maryland for some years, and in Virginia for about twenty years. He then emigrated to the Northwestern Territory in 1798, and settled near the village of Cincinnati, where, after a useful career as a citizen and minister in that new country, he died, December 28, 1835. See McLean, *Sketch of Philip Gatch* (Cincinnati, 1854); *Minutes of Conferences*, ii, 403; Sprague, *Annals*, vii, 50.

**Gate** (prop. גַּת, *sha'ar*, πύλη; which are also used [espec. the Heb. word] for door [q. v.], although this latter is more properly designated by פֶּתַח, *pe'thach*, an opening, of which פֶּתַח, *de'leth*, was the valve, Gr. θύρα; there also occur גַּת, *saph*, 1 Chron. ix, 19, 21, a vestibule or "threshold," as usually elsewhere rendered; and the Chald. גַּתְרָא, *tera'*, an entrance, only in Ezra and Dan.), the entrance to inclosed grounds, buildings, dwelling-houses, towns, etc. (see Thomson, *Lawd and Book*, i, 29 sq.). Thus we find mentioned—1. *Gates of Cities*, as of Jerusalem, its sheep-gate, fish-gate, etc. (Jer. xxxvii, 13; Neh. i, 3; ii, 3; v, 3); of Sodom (Gen. xix, 1); of Gaza (Judges xvi, 3). 2. *Gates of royal palaces* (Neh. iii, 8). 3. *Gates of the Temple*. The temple of Ezekiel had two gates, one towards the north, the other towards the east; the latter closed (Ezek. xliv, 1, 2), the other must have been open. The gates of Solomon's Temple were very massive and costly, being overlaid with gold and earrings (1 Kings vi, 34, 35; 2 Kings xviii, 16). Those of the Holy Place were of olive-wood, two-leaved, and overlaid with gold; those of the Temple of fir (1 Kings vi, 31, 32, 34; Ezek. xli, 23, 24). Of the gates of the outer courts of Herod's temple, nine were covered with gold and silver, as well as the posts and lintels; but the middle one, the Beautiful Gate (Acts iii, 2), was made entirely of Corinthian brass, and was considered to surpass the others far in costliness (Joseph. *War*, v, 5, 3). This gate, which was so heavy as to require twenty men to close it, was unexpectedly found open on one occasion shortly before the close of the siege (Joseph. *War*, vi, 5, 3; *Ap.* ii, 9). 4. *Gates of tombs* (Matt. xxvii, 60). 5. *Gates of prisons*. In Acts xii, 10, mention is made of the iron gate of Peter's prison (xvi, 27). Prudentius (*Peristephanon*, v, 346) speaks of gate-keepers of prisons. 6. *Gates of caverns* (1 Kings xix, 13). 7. *Gates of camps* (Exod. xxxii, 26, 27; see Heb. xiii, 12). The camps of the Romans generally had four gates, of which the first was called *porta pretoria*, the second *decumana*, the third *principalis*, the fourth *quintana* (Rosin. *Antiq. Rom.* x, 12). The camp of the Trojans is also described as having had gates (Virgil, *Æn.* ix, 724). The camp of the Israelites in the desert appears to have been closed by gates (Exod. xxxiii, 27). We do not know of what materials the inclosures and gates of the temporary camps of the Hebrews were formed. In Egyptian monuments such inclosures are indicated by lines of upright shields, with gates apparently of wicker, defended by a strong guard. In later Egyptian times, the gates of the temples seem to have

Ancient Egyptian Camp-gate guarded.

been intended as places of defence, if not the principal fortifications (Wilkinson, *Anc. Eg.* i, 409, abridgm.).

Egyptian Gateway at Medinet Abâ.

The gateways of Assyrian cities were arched or square-headed entrances in the wall, sometimes flanked by towers (Layard, *Nineveh*, ii, 388, 395; *Nin. and Bab.* p. 231; *Mon. of Nin.* pt. ii, pl. 49; see also Assyrian bas-reliefs in Brit. Mus. Nos. 49, 25, 26). The entrances

Ancient Assyrians setting fire to an enemy's gates.

to their own royal mansions were a simple passage between two colossal human-headed bulls or lions. See PALACE.

Portal of Ancient Assyrian Palace.

As the gates of towns served the ancients as places of security [see FORTIFICATION], a durable material was required for them, and accordingly we find mentioned—1. *Gates of iron and brass* (Psa. cvii, 16; Isa. xlv, 2; Acts xii, 10). It is probable that gates thus described were, in fact, only sheeted with plates of copper or iron (Faber, *Archæol.* p. 297), and it is probably in this sense that we are to interpret the hundred brazen gates ascribed to the ancient Babylon. Thevenot (*Voyage*, p. 283) describes the six gates of Jerusalem as covered with iron, which is probably still the case with the four gates now open. Other iron-cover-

ed gates are mentioned by travelers, such as some of the town gates of Algiers (Pitt's *Letter*, viii, 10), and of the towers of the so-called iron bridge at Antioch (Pococke, vol. ii, pt. i, p. 172). Gates of iron are also mentioned by Hesiod (*Theog.* 732), by Virgil (*Æneid*, i, 482; vii, 609), and by Ovid (*Metamorphoses*, vii, 126). 2. *Gates of stone*, and of pearls, are mentioned in Isa. liv, 12, and Rev. xxi, 12, which, it has justly been supposed, refer to such doors, cut out of a single slab, as are occasionally discovered in ancient countries (Shaw, p. 210; Burckhardt, *Syria*, p. 58, 74; Porter, *Damasc.* ii, 22, 192; Ray, *Coll. of Trav.* ii, 429). At Esswan (Syene), in Upper Egypt, there is a granite gateway bearing the name of Alexander, the son of Alexander the Great (Wilkinson, iii, 403). The doors leading to the several chambers of the so-called "Tombs of the Kings," near Jerusalem, were each formed of a single stone seven inches thick, sculptured so as to resemble four panels: the stiles, muntins, and other parts were cut with great art, and exactly resembled those of a door made by a carpenter at the present day—the whole being completely smooth and polished, and most accurate in its proportions. The doors turned on pivots, of the same stone of which the rest of them were composed, which were inserted in corresponding sockets above and below, the lower tenon being of course short. This is one of the modes in which heavy doors of wood are now hung in the East. One of these doors was still hanging in Maundrell's time, and "did not touch its lintel by at least three inches." But all these doors are now thrown down and broken (Monconys, p. 308; Thevenot, p. 261; Pococke, ii, 21; Maundrell, *sub Mar.* 28; Wilde, ii, 299; Robinson, i, 530). Similar doors are described by Dr. Clarke (*Travels*, pt. ii, vol. i, p. 252) in the remarkable excavated sepulchres at Tellmessus, on the southern coast of Asia Minor; and others were noticed by Irby and Mangles (*Travels*, p. 302) in the sepulchres near Byzan (Bethshan). There are stone doors to the houses in the Hauran beyond the Jordan (Burckhardt, p. 58); and in the north of Persia the street doors of superior houses are often composed of a single slab of a kind of slate. In the ancient sepulchre recently discovered, as described by Dr. Wilde (*Narrative*, ii, 343), the *outer* door is formed by a single slab, and moves on *horizontal* pivots that run into sockets cut in the pilasters at the top, in the manner of a swinging hinge. 3. *Gates of wood*. Of this kind were probably the gates of Gaza (Judg. xvi, 3). They had generally two valves, which, according to Faber's description (*Arch.* p. 300), had sometimes smaller doors, or wickets, to afford a passage when the principal gate was closed—a fact which he applies to the illustration of Matt. vii, 13.

The parts of the doorway were the threshold (שׁוּבַת, Judg. xix, 27; Sept. πρὸ-θύρα, Vulg. *limen*), the side-posts (שׁוּבַת; σθαβ-ποι; *uterque postis*), and the lintel (שׁוּבַת; φάλα, *superliminare*, Exod. xii, 7). It was on the lintel and side-posts that the blood of the Passover lamb was sprinkled (Exod. xii, 7, 22). A trace of some similar practice in Assyrian worship seems to have been discovered at Nineveh (Layard, *Nin.* ii, 256). Gates were generally protected by some works against the surprises of enemies (Jer. xxxix, 4). Sometimes two gates were constructed one behind another, an outer and inner one, or there were turrets on both sides (2 Sam. xviii, 24, 33; see Faber's *Archæology*, p. 361). The gates of the ancients were generally secured with

strong, heavy bolts and locks of brass or iron (Deut. iii, 5; 1 Sam. xxiii, 7; 1 Kings iv, 13; 2 Chron. viii, 5; Jer. xlv, 2; xlix, 31; Psa. cxlvii, 13). This was probably done with a view to the safety of the town, and to prevent hostile inroads (Harmer's *Observations*, i, 188). The keys of gates, as well as of doors, were generally of wood; and Thevenot observes that gates might be opened even with the finger put into the key-hole—from which Harmer elucidates the passage in the Song of Solomon, v. 4. The doors themselves of the larger gates mentioned in Scripture were two-leaved, plated with metal (Judg. xvi, 3; Neh. iii, 3-15; Psa. cvii, 16; Isa. xlv, 1, 2). Gates not defended by iron were of course liable to be set on fire by an enemy (Judg. ix, 52).

The gates of towns were kept open or shut according to circumstances: in time of war they were closed against the inroads of the enemy (Josh. ii, 5), but they were opened when the enemy had been conquered. On festive occasions they were also thrown wide open, to which Psa. xxiv, 7 alludes. This opening of the gates, as well as closing them, was done by means of keys. That near the gates towers were often constructed, serving for defence against attacks of the enemy, may be inferred from Deut. iii, 5; 2 Sam. xviii, 24; Judg. ix, 35, comp. with 52. So Juvenal (*Sat.* vi, 290) puts the towers of the gates for the gates themselves. Virgil (*Æn.* vi, 550) represents the infernal gate as having a tower. Enemies, therefore, in besieging towns, were most anxious to obtain possession of the gates as quickly as possible (Deut. xviii, 52; Judg. ix, 40; 2 Sam. x, 8; xi, 33; 1 Kings viii, 37; Job v, 4; Isa. xxii, 7; xxviii, 6); and generally the town was conquered when its gates were occupied by the invading troops (Deut. xxxviii, 57; Judg. v, 8). This observation is made also by several Greek and Roman authors (Herodian, *Histor.* i, 12, § 14; Virgil, *Æn.* ii, 802 sq.). In or near the gates, therefore, they placed watchmen, and a sufficiently strong guard, to keep an eye on the movements of the enemy, and to defend the works in case of need (Judg. xviii, 16; 2 Kings vii, 3; Neh. xiii, 22; see Herodian, *Histor.* iii, 2, § 21; Virgil, *Æn.* ii, 265 sq., 365). Regarded, therefore, as positions of great importance, the gates of cities were carefully guarded and closed at nightfall (Deut. iii, 5; Josh. ii, 5, 7; Judg. ix, 40, 44; 1 Sam. xxiii, 7; 2 Sam. xi, 23; Jer. xxxix, 4; Judith i, 4). They contained chambers over the gateway, and probably also chambers or recesses at the sides for the various purposes to which they were applied (2 Sam. xviii, 24; Layard, *Nin. and Bab.* p. 57, and note). In the Temple, Levites, and in houses of wealthier classes and in palaces, persons were especially appointed to keep the gates (Jer. xxxv, 4; 2 Kings xii, 9; xxv, 18; 1 Chron. ix, 18, 19; Esth. ii, 21; פֶּרְזֵי הַשַּׁעַיִם; Sept. *θυρωροί, πύλωροι*; Vulg. *portarii, juniores*). In the A. V. these are frequently called "porters," a word which has now acquired a different meaning. The chief steward of the household in the palace of the shah of Persia was called chief of the guardians of the gate (Chardin, vii, 369).

We read that some portions of the law were to be written on the gates of towns, as well as on the doors of houses (Deut. vi, 9; xi, 20); and if this is to be literally understood (comp. Isa. liv, 12; Rev. xxi, 21), it

receives illustration from the practice of the Moslems in painting passages of the Koran on their public and private gates (Maundrell, *E. T.* p. 488; Lane, *Mod. Eg.* i, 29; Rauwolff, *Travels*, pt. iii, chap. 10; Ray, ii, 278). Various artificial figures and inscriptions were engraved on their gates by the Romans (Virgil, *Georg.* iii, 26 sq.). See *POSTR.*

Gates are often mentioned in Scripture as places at which were held courts of justice, to administer the law and determine points in dispute: hence *judges in the gate* are spoken of (Deut. xvi, 18; xvii, 8; xxi, 19; xxv, 6, 7; Josh. xx, 4; Ruth iv, 1; 2 Sam. xv, 2; xix, 8; 1 Kings xxii, 10; Job xxix, 7; Prov. xxii, 22; xxiv, 7; Lam. v, 14; Amos v, 12; Zech. viii, 16). The reason of this custom is apparent; for the gates being places of great concourse and resort, the courts held at them were of easy access to all the people; witnesses and auditors to all transactions were easily secured (a matter of much importance in the absence or scanty use of written documents); and confidence in the integrity of the magistrate was insured by the publicity of the proceedings (comp. Polyb. xv, 31). There was within the gate a particular place, where the judges sat on chairs, and this custom must be understood as referred to when we read that courts were held *under the gates*, as may be proved from 1 Kings xxii, 10; 2 Chron. xviii, 9. Apart from the holding of courts of justice, the gate served for reading the law, and for proclaiming ordinances, etc. (2 Chron. xxxii, 6; Neh. viii, 1, 3). We see from Prov. xxxi, 23; Lam. v, 14, that the inferior magistrates held a court in the gates, as well as the superior judges (Jer. xxxvi, 10); and even kings, at least occasionally, did the same (1 Kings xxii, 10, comp. with Psa. xxvii, 5). The gates at Jerusalem served the same purpose; but for the great number of its inhabitants, many places of justice were required. Thus we find that Nehemiah (iii, 32) calls a particular gate of this city the counsel-gate, or justice-gate, which seems to have had a preference, though not exclusive, since courts must have been held in the other gates also. After the erection of the second Temple, the celebrated great Sanhedrim, indeed, assembled in the so-called *conclave cesure* of the Temple; but we find that one of the Synedria of Jerusalem, consisting of twenty-three members, assembled in the east gate, leading to the court of Israel, the other in the gate leading to the Temple Mount. The same custom prevails to the present day among other Oriental nations, as in the kingdom of Morocco, where courts of justice are held in the gate of the capital town (Döpler, *Theatrum pænarum*, p. 9 sq.). Hence came the usage of the word "Porte" in speaking of the government of Constantinople (*Early Trav.* p. 349). Respecting the Abyssinians and inhabitants of Hindūstan, we are likewise assured that they employed their gates for courts of justice. Homer (*Iliad*, i, 198 sq.) states of the Trojans that their elders assembled in the gates of the town to determine causes, and Virgil (*Æn.* i, 509 sq.) says the same. From Juvenal (*Satir.* iii, 11) it appears that with the Romans the porta Capena was used for this purpose (Graevii *Thesaurus Antiquit. Roman.* x, 179). We may refer to J. D. Jacobi's *Dissertat. de foro in portis*, Leipzig, 1714, where the custom of holding courts in the gates of towns is explained at large. See *TRIAL*. The

A Persian Satrap dictating Terms to Greek Chiefs at a City Gate. (From the Lycian Monuments.)

Egyptian and Assyrian monuments represent the king as giving an audience, especially to prisoners, at his tent-door.

In Palestine gates were, moreover, the places where, sometimes at least, the priests delivered their sacred addresses and discourses to the people; and we find that the prophets often proclaimed their warnings and prophecies in the gates (Prov. i, 21; viii, 3; Isa. xxix, 21; Jer. xvii, 19, 20; xxvi, 10; xxxvi, 10).

Among the heathen gates were connected with sacrifices, which were offered in their immediate vicinity; in which respect the hills near the gate are mentioned (2 Kings xxiii, 8). In Acts xiv, 13, the gates of Lystra are referred to, near which sacrifice was offered; in which passage Camerarius, Dedicen, and Heinsius take *πυλώνας* to mean the town-gate. The principal gate of the royal palace at Ispahan was in Chardin's time held sacred, and served as a sanctuary for criminals (Chardin, vii, 368, and petitions were presented to the sovereign at the gate. See Esth. iv, 2, and Herod. iii, 120, 140).

The gate was, further, a public place of meeting and conversation, where the people assembled in large numbers to learn the news of the day, and by various talk to while away the too tedious hours (Psa. lxxix, 13). It was probably with this view that Lot sat under the gate of Sodom (Gen. xix, 1); which is more probable than the Jewish notion that he sat there as one of the judges of the city (comp. Gen. xxiii, 10, 18; xxxiv, 20; 1 Sam. iv, 18; 2 Sam. xviii, 24; see Shaw, *Trav.* p. 207).

Under the gates they used to sell various merchandises, provisions, victuals, e. g. at Samaria (2 Kings vii, 1); and for this purpose there were generally recesses in the space under them (see Herodian, vii, 6, § 6). The same is stated by Aristophanes (*Equit.* 1245, ed. Dind.) of the gates of the Greeks. But the commodities sold at the gates are almost exclusively country produce, animal or vegetable, for the supply of the city, and not manufactured goods, which are invariably sold in the bazaars in the heart of the town. The gate-markets also are only held for a few hours early in the morning. See BAZAAR.

On an uproar having broken out at Jerusalem, the heads of the people met under the New-gate (Jer. xxix, 26), where they were sure to find insurgents. The town-gates were to the ancient Orientals what the coffee-houses, exchanges, markets, and courts of law are in our large towns; and such is still the case in a great degree, although the introduction of coffee-houses has in this, and other respects, caused some alteration of Eastern manners. In capital towns the quidnuncs occasionally sat with the same views near the gate of the royal palace, where also the officers and messengers of the palace lounged about; and where persons having suits to offer, favors to beg, or wishing to recommend themselves to favorable notice, would wait day after day, in the hope of attracting the notice of the prince or great man at his entrance or coming forth (Esth. ii, 19, 21; iii, 2).

Criminals were punished without the gates (1 Kings xxi, 13; Acts vii, 59), which explains the passage in Heb. xiii, 12. The same custom existed among the Romans (see Plaut, *Milit. Glorios.* act ii, sc. iv, 6, 7). At Rome executions took place without the Porta Metia or Esquilina. As to the gate through which Christ was led before his crucifixion, opinions differ; some taking it to have been the Dung-gate (Lamy, *Apparat. Geograph.* ch. xiii, § 3, p. 321); others, following Hottinger (*Cipp. Hebr.* p. 16) and Godwyn, understand it of the Gate of Judgment. But for all that concerns the gates of Jerusalem, we must refer to the article JERUSALEM.

Gates are put figuratively for public places of towns and palaces. The gates of a town are also put instead of the town itself (Gen. xxii, 17; xxiv, 60; Judg. v, 8; Ruth iv, 10; Deut. xii, 12; Psa. lxxxvii, 2; cxxii, 2).

By *gates of righteousness* (Psa. cxviii, 19) those of the Temple are no doubt meant. The *gates of death* and of *hell* occur in Job xxxviii, 17; Psa. ix, 14; Micah ii, 13. Doors and gates of hell are especially introduced, Prov. v, 5; Isa. xxxviii, 10; Matt. xvi, 19; and the Jews go so far in their writings as to ascribe real gates to hell (Wagenseil, *Sota*, p. 220). Virgil (*Æn.* vi, 126) also speaks of infernal gates. The origin of this metaphorical expression is not difficult to explain; for it was very common to use the word gates as an image of large empires (Psa. xxiv, 7); and in pagan authors the abode of departed souls is represented as the residence of Pluto (see Virgil, *Æn.* vi, 417 sq.). In the passage, then, Matt. xvi, 19, by "gates of hell" must be understood all aggressions by the infernal empire upon the Christian Church.—Kitto, s. v.; Smith, s. v. See CITY.

**Gath** (Heb. *יד גת*, a wine-vat, as in Isa. lxiii, 2, etc.; Sept. usually Γέθ; Josephus Γίττα or Γέττα), one of the five royal cities of the Philistines (Josh. xiii, 3). It was one of the cities upon which the ark is said to have brought calamity (1 Sam. v, 8, 9), and which offered in connection therewith a trespass-offering, each one a golden emerald (1 Sam. vi, 17). Goliath, of the family of giants which Joshua spared (Josh. xi, 22), of which other members may be found mentioned in Scripture (1 Chron. xxi, 5-8; 2 Sam. xxi, 19-22), has rendered Gath a word familiar from our childhood; but it is not certain whether Goliath was a native or merely a resident of Gath (1 Sam. xvii, 4). To Achish, king of Gath, David twice fled for fear of Saul (1 Sam. xxi, 10; xxvii, 2-7; Psa. lvi). At his own entreaty David received from Achish the city of Ziklag. David dwelt in the country of the Philistines "a full year and four months." David's connection with Gath throws light on the feelings which dictated the words (2 Sam. i, 20), "Tell it (the death of) Saul and Jonathan his son" (not in Gath." Micah also (i, 10) says, "Declare it (the wound come unto Judah, ver. 9) say at Gath." It was conquered by David, and fortified both by him and by Rehoboam (2 Sam. viii, 1; 1 Chron. xviii, 1; 2 Chron. xi, 8). From 2 Sam. xv, 18, it appears that David had a band (600 men) of Gittites in his service at the time of the rebellion of Absalom. Their devotedness to him under Ittai their leader forms a beautiful episode in the history of David's varied fortune (2 Sam. xv, 19 sq.). Shimei's visit to Gath and its fatal consequences to himself may be read in 1 Kings ii, 39-46. In the reign of Solomon mention is made of a king of Gath (1 Kings iv, 24), who was doubtless a tributary prince, but powerful enough to cause apprehension to Solomon, as appears from the punishment he inflicted on Shimei. Under Jehoash, Hazael, king of Syria, took Gath (2 Kings xii, 17); from his successor, Benhadad, the place was recovered (2 Kings xiii, 24). It must, however, have soon revolted; for Uzziah (2 Chron. xxvi, 6), finding it necessary to war against the Philistines, "broke down the wall of Gath." Probably the conquest was not of long duration. This constant withstanding of the power of Jerusalem shows that Gath was a place of great resources and high eminence—a conclusion which is confirmed by the language employed by the prophets (Amos vi, 2; Micah i, 10). The ravages of war to which Gath was exposed appear to have destroyed it at a comparatively early period, as it is not mentioned among the other royal cities by the later prophets (Zeph. ii, 4; Zech. ix, 5, 6).

Gath occupied a strong position (2 Chron. xi, 8) on the border of Judah and Philistia (1 Sam. xxi, 10; 1 Chron. xviii, 1). It was near Shocoh and Adullam (2 Chron. xi, 8), and it appears to have stood on the way leading from the former to Ekron; for when the Philistines fled on the death of Goliath, they went "by the way of Shaaraim, even unto Gath and unto Ekron" (1 Sam. xvii, 1, 52). Yet, with all these indications,

there has been great uncertainty as to the site (Iteland, *Palæst.* p. 785 sq.). Josephus places it in the tribe of Dan (*Ant.* v, i, 22; in *Ant.* viii, 10, 1, he calls it *Ipan*, *Ἰπαν*, by an error of the copyist, *Reland*, p. 747). The accounts of Eusebius and Jerome are confused. In the *Onomast.* (s. v. *Γεθ*) they both say, "Gath, from which the Anakim and Philistines were not exterminated, is a village seen by such as go from Eleutheropolis to Diospolis, at about the fifth milestone." Yet in the same connection Eusebius mentions another Gath (or *Γεθ*), a large village between Antipatris and Jamnia, which he considered to be that to which the ark was carried (1 *Sam.* v, 8); hence the Crusaders identified Gath with Jamnia (*Gesta Dei*, p. 886). On the other hand, Jerome says (on *Micah*, i), "Gath is one of the five Philistine cities lying near the confines of Judah, on the road from Eleutheropolis to Gaza; now it is a very large village." On *Jer.* xxv, the same authority declares that Gath was not far from Azotus. Yet in his preface to *Jonah* he says that Geth, in Opher, the native place of the prophet, is to be distinguished. Bonfère suggests (In the *Onomast.* s. v.) that there were several places of the same name, and this may account for the discrepancies. Dr. Robinson sought in vain for some traces of its site (*Researches*, ii, 421); yet Schwarz (*Palæst.* p. 121) says it still remains in "a village by the name of *Gath*, three English miles south of Jaifa, on the shore of the Mediterranean"—a statement confirmed by no other traveller. See also GITTAIM. Thomson (*Land and Book*, ii, 360) contends for *Beit-Jibrin* or Eleutheropolis as the true site; but Mr. Porter, who made a special visit to Philistia in 1857 for the purpose of discovering the spot, argues for its identification with the conspicuous hill now called *Tell es-Sâfieh*. This hill stands upon the side of the plain of Philistia, at the foot of the mountains of Judah, ten miles east of Ashdod, and about the same distance south by east of Ekron. It is irregular in form, and about 200 feet high. On the top are the foundations of an old castle; and great numbers of hewn stones are built up in the walls of the terraces that run along the declivities. On the north-east is a projecting shoulder, whose sides appear to have been scarped. Here, too, are traces of ancient buildings; and here stands the modern village, extending along the whole northern face of the hill. In the walls of the houses are many old stones, and at its western extremity two columns still remain on their pedestals. Round the sides of the hill, especially on the south, are large cisterns excavated in the rock (*Hand-book for Syria and Pal.* p. 252).—Kitto, s. v.; Smith, s. v. See MIZPEH.

The inhabitants are called GITTITES (גִּתִּיִּם, Sept. Γεθῆῖται). See also GATH-HEPHER; GATH-RIMMON; MORESHETH-GATH.

**Gath-he'pher** (Heb. with the art. *Gath ha-Ché'pher*, גַּת הַחֶפְרַיִם, wine-press of the well; Sept. Γεθ'χόφρ. Vulg. *Geth que est in Opher*), a town in Galilee, the birthplace of the prophet *Jonah* (2 *Kings* xiv, 25). It is stated by Eusebius and Jerome to have been in the tribe of Zebulun (*Onomast.* s. v. *Γεθ'χόφρ*, Gethfer). The latter (*Præf. ad Jon.*) speaks of it as a small place two miles from Sepphoris, on the way to Tiberias, and says that the sepulchre of *Jonah* was shown in his day. Benjamin of Tudela, in the 12th century, says that the tomb of *Jonah* was still shown on a hill near Sepphoris (*Early Travels in Pal.* p. 89). It was doubtless the same as GITTAIM-HEPHER, situated in the east of Zebulun (*Josh.* xix, 13). The position corresponds well to that of *el-Meshal*, a village on the top of a rocky hill, in which is still shown a Muslim tomb of the prophet *Jonah* (Robinson, *Researches*, iii, 209, note; De Saulcy, *Narrative*, ii, 318; Thomson, *Land and Book*, ii, 122; Schwarz, *Palæst.* p. 89; Van de Velde, *Memoir*, p. 312). See GUFTA.

**Gath-rim'mon** (Heb. *Gath-Rimmon'*, גַּת רִמּוֹן, press of the pomegranate; Sept. Γεθ'ρμμών, Vulgate *Gethrimmon*), a town in the tribe of Dan (*Josh.* xix, 45), and a Levitical city (*Josh.* xxi, 24; 1 *Chron.* vi, 69). In the time of Eusebius and Jerome it was a very large village, "twelve miles from Diospolis as you go hence to Eleutheropolis" (*Onomast.* s. v. *Γεθ'ρμμών*, Gethrimmon); but the same writers also mention a Gath five Roman miles north of Eleutheropolis (*ib.* s. v. *Γεθ*, Geth). Dr. Robinson thinks them to be one place, and that the site is found in *Deir Dabbân*, where are some remarkable excavations (*Researches*, ii, 421). In that case, however, it could not have lain within the territory of Dan, which passed at a point between the two positions. The first-mentioned distance would correspond to that of the modern site *Rafat*, containing wide-spread ruins (Robinson, *Researches*, iii, 20).

The Gath-rimmon mentioned in *Josh.* xxi, 25 as being in the tribe of Manasseh, Raumer (*Palästina*, p. 173) supposes to be another Levitical city; but Winer (*Realwörterbuch*, s. v. Gath) ascribes its origin to a mistake of the transcriber, who repeated the word from the preceding verse. The Sept. has *Γεθ'αζά* (v. r. Βαζαά), probably intended for the IBEAM (q. v.) of *Josh.* xvii, 11.

**Gaubil**, ANTOINE, a Roman Catholic missionary, was born at Gallac (Languedoc) July 14, 1689. He joined the Jesuits in 1704, and was sent to China as a missionary in 1723. He arrived in China just after the accession of the emperor *Young-Tsching*, who was bent on banishing the Jesuits. Through the skilful management of Gaubil, most of the members of the order kept their positions. When the son of *Young-Tsching*, *Kiang-Loung*, ascended the throne in 1736, Gaubil, who had become thoroughly acquainted with the Chinese and Mantchou languages, was appointed chief director of the imperial colleges where the children of the nobility were educated. He thus managed to remain in high standing at the Chinese court until his death, which took place at Pekin July 24, 1759. He was a correspondent of the Academy of Sciences of Paris, and a member of that of St. Petersburg. He wrote *Le Chou-King*, trad. du Chinois (Paris, 1771, 4to); the oldest and most important historical book of the Chinese, compiled by Confucius, and giving the basis of the Chinese government and law:—*Histoire de Gentchiscan et de toute la dynastie des Manyoux, ses successeurs, conquérants de la Chine* (Paris, 1739, 4to):—*Traité de Chronologie chinoise* (publ. by De Sacy, Paris, 1814, 4to):—*Traité historique et critique de l'Astronomie chinoise:—Traité de Chronologie chinoise (Mémoires concernant les Chinois, vol. xv):—Histoire de la Dynastie des Tang (Mémoires concernant les Chinois, vols. xv and xvi):—Journal de mon Voyage de Canton à Pekin (Prévost, Hist. des voyages, vol. v):—Notices et description sur la Chine, le Thibet, etc. (in Lettres éditantes). M. Abel de Rémusat considers him also as the author of the *Description de la ville de Péking* (Paris, 1785, 4to), published under the names of Delisle and Pingré. See Amyot, *Mémoires sur les Chinois; Lettres éditantes*, t. xxxi; G. Pauthier, *La Chine (Univers pittoresque*, p. 22, 31, 363); Abel de Rémusat, *Nouveaux Mélanges Asiatiques*.—Hofer, *Nouvelle Biog. Générale*, xix, 636.*

**Gauden**, JOHN, D.D., bishop of Worcester, was born at Mayfield, Essex, in 1605. He studied at St. John's College, Cambridge, and subsequently obtained the rectorship of Brightwell, Berkshire, and the deanery of Boeking. In 1660 he became bishop of Exeter, and was translated to Worcester in 1662, "much disappointed at missing the lucrative see of Winchester." He died in the same year. He was a man of great talents, and very industrious, but ambitious and avaricious. He was the publisher of king Charles I's *Edkon Basilike*, of which some have considered him as the

author. Of his own works, the principal are, *Three Sermons preached upon several public Occasions* (London, 1642, 4to):—*Hieraspistes*, a defence of the ministry and ministers of the Church of England (London, 1653, 4to):—*Considerations touching the Liturgy of the Church of England*, etc. (London, 1661, 4to):—*A Sermon preached on the Occasion of the Death of Ep. Brownrig* (London, 1660, sm. 8vo):—*Ecclesie Anglicanæ suspiria* (London, 1659, fol.):—*Anti Baul Berith* (London, 1661, 4to):—*Analysis of the Covenant* (London, 1660, 4to).—Darling, *Cyclop. Bibliographica*, s. v.; Nichols, *Catechism and Arminianism*, vol. i ad fin.; Hook, *Ecol. Biog.* v, 279.

**Gaudentius**, bishop of Brescia, succeeded Philastrius in the see of Brescia in the 4th century. He was chosen while away upon his travels, and extraordinary means were used that he might be induced to assume the office. He was ordained by St. Ambrose about 387. He does not appear to have interfered in the disturbances of the times except in being one of the deputies sent to Constantinople in 404 or 405 by the bishops of the West for the reinstatement of St. Chrysostom in his see of Constantinople. When he died is unknown; some fix the date at 410, others at 427. Nineteen sermons of his are extant, preceded by a preface to *Benevolus*, which may be found in *Bib. Marc. Patrol. vol. v*; in *Migne's Œuvres tres complètes des écrivains ecclés. du v siècle* (Paris, 1849, 4to); and in *Migne, Patrol. Latine*, vol. xx.—Clarke, *Succ. of Suc. Lit.* vol. i; Cave, *Hist. Lit.* i, 180; Ceillier, *Auteurs Sacrés* (Paris, 1861), viii, 34.

**Gaul.** See FRANCE.

**Gaulonitis.** See GOLAN.

**Gaultier** or **Gautier**, FRANÇOIS DE, of St. Blacard, a Protestant writer and divine, was born in the first half of the 17th century at Gallargues, in the department of Gard, and died at Berlin in 1703. He was minister at Montpellier, and presided over the last synod of Bas-Languedoc, held at Uzès in 1681; but, having compromised his safety through his zeal for Protestant interests, he withdrew to Switzerland with his family in 1683, and afterwards to Holland. The prince of Orange esteemed him highly, and employed him in several important affairs; among others, on a confidential mission to the elector of Brandenburg, who retained Gaultier at his court, and named him his chaplain. We have from his pen *Réflexions générales sur le liere de Mgr. de Meaux, ci-devant évêque Condom*, etc. (on Bossuet's Exposition of the Catholic Doctrine, Berlin, 1685, 12mo):—*Histoire Apologétique ou défense des libertés des Eglises réformées de France* (Amst. 1688, 2 vols. 12mo):—*Sermons* (Berlin, 1696, 8vo).—Hoefler, *Nouv. Biog. Gén.* xix, 675; Haag, *La France Protestante*, s. v. (J. W. M.)

**Gaume**, JEAN, a Roman Catholic theologian of France. He was a prolific writer of the strictest ultramontane school, and in 1852, while vicar general of the diocese of Nevers, kindled a great literary controversy by his pamphlet *Ver Rongeur*, in which he condemned the study of the Latin and Greek classics, and advocated the substitution for them of the Church fathers in the course of classical education. The leading organ of the ultramontane party in France, the *Univers*, and several bishops, sided with Gaume; but many others declared against his views, and his own diocesan, the bishop of Nevers, censured him for the publication of the pamphlet. In consequence of this censure, Gaume resigned at the close of the year 1852. He died in 1869. Among his other numerous writings are, *Du Catholicisme dans l'éducation* (1835):—*Manuel des Confesseurs* (6th edit. 1842):—*Catéchisme de Persévérance* (1838):—*Tableaux de l'histoire de la religion*:—*Histoire de la Société domestique* (1844):—*Credo ou refuge du Chrétien dans les temps actuels* (Paris, 1867). (A. J. S.)

**Gaus**, supposed descendants of the Parsees, still

subsisting in different parts of the East. See PARSEES.

**Gausson, Étienne**, a French Protestant theologian, was born at Nismes in the early part of the 17th century, and died at Saumur in 1675. In 1651 he was made professor of philosophy in the Protestant Academy of Saumur, and in 1655 succeeded Josué de la Place in the chair of theology. He agreed with La Place that the study of philosophy was useful to the theologian, and strongly urged it upon his pupils. His works are marked by vigor and depth of thought, and enjoyed for a long time a high reputation in the schools of Holland and Germany. The titles are, *Theses inaugurales de Verbo Dei* (Saumur, 1655, 4to):—*De Consensu Gratie cum Natura* (ib. 1659, 4to):—*De Ratione Studii theologicæ*:—*De Natura Theologicæ*:—*De Ratione Concionandi*:—*De Utilitate Philosophiæ ad theologiam, quibus accessit breve scriptum de recto usu clariorum erga ægrotantes* (ib. 1670, 4to: this collection, regarded by Bayle as the best guide for the study of the theology of the time, has passed through numerous editions—last one Halle, 1727):—*Theses theologicæ, altera de natura theologicæ, altera de divinitate Scripturæ Sacre* (ib. 1676, 4to).—Hoefler, *Nouv. Biog. Générale*, xix, 690, 691; Haag, *La France Protestante*, s. v. (J. W. M.)

**Gausson, Louis**, a Swiss divine, was born in Geneva Aug. 25, 1790, and in 1816 became pastor of Satigny, near Geneva. Here he came under the influence of pastor Cellier, who had retained his Christian fidelity and simple faith amid the general falling away of the Swiss clergy. The revival of religion in Switzerland about that time, due largely to the labors of the brothers Haldani (q. v.), was odious to the majority of the Geneva clergy, and the *Vénérable Compagnie des Pasteurs* passed some ordinances infringing strongly upon Christian liberty. Gausson and Cellier protested against the proceeding by republishing the Helvetic Confession in French, with a preface advocating the need and utility of confessions of faith. Gausson continued to labor faithfully in Satigny for twelve years, and his name became known throughout Switzerland as an earnest upholder of evangelical Christianity. His aim was, not to divide the national Church, but to reinspire it with Christian life. His energy and orthodoxy were alike displeasing to the Rationalists, and he was involved in long disputes with the *Vénérable Compagnie*. They ordered him to use the emasculated and Rationalistic Catechism which had been substituted in Geneva for Calvin's: he refused, and was censured (see *Letters du Pasteur Gausson à la Vénérable Compagnie*, etc., 1831; and, on the other side, *Exposé des discussions entre la Compagnie etc. et M. Gausson*, 1831). He kept on his way, and, in union with Merle (d'Aubigné) and Galland, formed the "Evangelical Society" for the distribution of Bibles, tracts, etc. The Consistory at last suspended him, so low had orthodox Christianity sunk in Geneva, the home of Calvin. In 1834 he took the chair of theology in the newly-founded evangelical school of Geneva, where he taught a strictly orthodox doctrine, perhaps without sufficient knowledge of the condition of modern thought. In his *Theopneustic* (1840; translated in England and America) he maintained, in its strongest form, the verbal inspiration of the Scriptures. In 1860 he published his *Canon des Ecritures Saintes* (translated, *Canon of Holy Scripture*, 1862) in which he vindicated his theory of inspiration against the attacks of Scherer and others. His *Leçons sur Daniel* contained the substance of his lectures and catechetical lessons on Daniel. He died June 18, 1863. We have translations of several of his writings besides those already named, viz. *Geneva and Jerusalem* (1844):—*Geneva and Rome, a discourse* (1844):—*It is written, Scripture proved to be from God* (1856):—*Lessons for the Young on the six Days of Creation* (1860).—Herzog, *Real-Encyclop.* xix, 538.

**Gautama.** See **GOTAMA.**

**Gautbert,** also called **AUTBERT** or **GAUZBERT**, one of the earliest missionaries of Sweden. He was a nephew of archbishop Ebbo (q. v.), and was appointed bishop of Sweden by St. Ansgar. Accompanied by his nephew Nithard and several other priests, he set out in 834 for Sweden, and at once began to preach the Gospel. He built the first Christian church of Sweden at Birka. A large number of pagans were soon converted, and the prospects of the mission appeared to be brilliant, but the pagan priests raised a tumult against the missionaries, in which Nithard was killed, while Gautbert had a narrow escape, being chained and transported with his companions across the frontier. All of them repaired to the monasteries of Welna (now Münsterdorf, in Holstein), in order to await there a favorable occasion for returning to Sweden. As, however, no new opening seemed to present itself, he accepted, in 845, the see of Osnabruck, which he administered until April 11, 860, when he resigned. He died three or four years afterwards. (A. J. S.)

**Gavanti,** **BARTHELEMI,** an Italian ecclesiastic, was born at Monza in 1569, and died at Milan in 1638. He was consultor of the Congregation of Rites and general of the Barnabites (q. v.). His most important work, *Thesaurus Sacrorum Rituum*, is a commentary on the rubrics of the Missal and the Roman Breviary, more learned than critical. The best edition of the *Thesaurus* is that containing the observations of Merati (Turin, 1736, -40, 4 vols. 4to); another, in 2 vols. fol., was published at Venice in 1762. Gavanti wrote also *Præcis visitationis episcopalis et synodi diœcesane celebrande* (Rome, 1628, 4to), and *Manuale Episcoporum* (Paris, 1647, 4to).—Hoefler, *Nouv. Biog. Générale*, xix, 735. (J. W. M.)

**Gay,** **EBENEZER,** D.D., a Unitarian clergyman, was born in Dedham, Mass., Aug. 15, 1696. He graduated at Harvard College in 1714; was admitted into the ministry in 1718, and installed as pastor of the church in Hingham, which position he held till his death. While quite a young man he gained a high reputation for scholarship, and he received many testimonials of public respect, both in his earlier and later days. He was opposed to all creeds and confessions of faith considered as binding, and is often mentioned as the father of American Unitarianism. He had no sympathy with the "great revival" of 1740. His name is signed to a paper entitled "The Sentiments and Resolutions of an Association of Ministers, convened at Weymouth January 15, 1745," in which they bear testimony against Whitefield's "enthusiastic spirit." In 1781 he delivered a sermon on his eighty-fifth birthday, which was published under the title of "The Old Man's Calendar." It has passed through several editions in this country, been reprinted in England, and translated into the Dutch language and published in Holland. He died March 8, 1787. He printed a number of occasional sermons.—Sprague, *Annals*, viii, 1.

**Gay de Vernon,** **LEONARD,** a French priest and politician, was born at St. Léonard (Limousin) in 1748. When the French Revolution broke out he was curate of Compeignac, a town near Limoges. Siding at once with the people, he was the first to place the *Domine salvem fac q. ntem* before the *Domine salvem fac regem*, and, in consequence, was appointed constitutional bishop of Haute-Vienne, March 13, 1791. Sent as deputy to the Legislature, he sided with Torné, metropolitan of Cher, in demanding that the clergy should be permitted to lay aside their peculiar dress. Having been re-elected to the Convention, he joined the extreme Republicans, and from the midst of "La Montagne" cast his vote for the death of Louis XVI, and caused the arrest of some of the Girondists. In the Council of Five Hundred, of which he was a member, he maintained the same opinions. The Directory, to get rid of him, appointed him, June 9, 1798, on a commercial

mission to Tripoli, in Syria. He afterwards became general secretary of the Roman republic at Rome, but was deposed by Barras, and even forbidden to enter France. He nevertheless secretly came back, and remained hidden in the department of Doubs until June 18, 1799, when a change of government enabled him to obtain the repeal of the sentence of exile. About 1802 he founded a school in Paris, in connection with several other learned men, but was again exiled in consequence of the law of Jan. 12, 1816. In 1819 he finally obtained leave to return, and died at Vernon, near Limoges, Oct. 20, 1822. See Mahul, *Ann. nécrologique* (1822, p. 99); Thiers, *Hist. de la Révolution*.—Hoefler, *Nouv. Biog. Générale*, xix, 756.

**Gayley,** **SAMUEL MAXWELL,** a Presbyterian minister, was born in Co. Tyrone, Ireland, June 4, 1802. He came to this country in 1823, studied in Philadelphia, and was licensed to preach in 1828. In 1832 he was installed pastor in Wilmington, Del., where he also established the Wilmington Classical Institute, which he conducted with great success until July 4, 1854, when his house was burnt to the ground. In Oct., 1854, he removed to Media, Pa., and established the Media Classical Institute, which he conducted successfully until his death, Dec. 19, 1862. As an educator of youth Mr. Gayley did a great work. He was most thorough and conscientious in his instructions, aiming to make solid thinkers rather than conceited coxcombs. He had more than one thousand youths under his care. They were from twenty different states, and from Canada, Cuba, Ireland, England, Mexico, Poland, Barbadoes, India.—Wilson, *Presbyterian Historical Almanac*, 1864.

**Ga'za** (Heb. *Azzah*, אַזָּח, *strong*, q. d. *fortress* or *Valentia*, or fem. of *goat*, Sept. and other Greek writers *Γάζα*, sometimes confounded with *Gazara* [q. v.]; "Azzah" in Deut. ii, 23), a city remarkable for its early importance and continuous existence, lying along the Mediterranean sea-coast, in latitude 31° 29', longitude 34° 29' (Robinson), on the great thoroughfare between the head of the Persian Gulf and Hebron, as well as between Egypt and Palestine, of which it was indeed the frontier town (Arrian, *Exp. Alex.* ii, 26). It is chiefly noted as having been one of the cities of the Philistine pentarchy (Josh. xv, 47). It is mentioned in Gen. x, 19 as one of the border-cities of the Canaanites. Its earliest inhabitants of whom we find any mention, though probably not the aborigines, are the *Azim*, who appear to have lived in a semi-nomad state, roving over the neighboring plain and desert. They were attacked and driven northward by "the Caphtorim, who came forth out of Capthor, and which dwell in their stead" (Deut. ii, 23, with Josh. xiii, 2, 3; see Keil's note on the latter passage). The Caphtorim and Philistines were identical, or at least different families of the same tribe who afterwards amalgamated and formed the powerful nation of whom we read so much in the Bible (comp. Deut. ii, 23; Amos ix, 7; Gen. x, 14; Jer. xlvii, 4). See **CAPHTORIM**; **PHILISTINES**. The time of the conquest of Gaza by the Philistines is not known. It must have been long before Abraham's time, for they were then firmly established in the country, and possessed of great power (Gen. xxi, 32). Gaza was from the first their principal stronghold. Joshua smote the Canaanites as far Gaza (Josh. x, 41), but spared the Anakim (giants) that dwell there (Josh. xi, 21, 22). In the division of the land, Gaza fell to the lot of Judah (Josh. xv, 47), and was taken by him with the coast thereof (Judg. i, 18), but its inhabitants ("Gazites," Judg. xvi, 2; "Gazathites," Josh. xiii, 3) were not exterminated (Judg. iii, 3). Gaza was one of the five Philistine cities which gave each a golden eimer as a trespass-offering to the Lord (1 Sam. vi, 17). Gaza is celebrated for the exploit recorded of Samson (Judg. xvi, 1-3), who "took the doors of the gate of the city,

and the two posts, and went away with them, bar and all, and put them on his shoulders, and carried them up to the top of a hill that is before Hebron." The Philistines afterwards took Samson, and put out his eyes, and brought him to Gaza, and bound him with fetters of brass, and he did grind in the prison-house: he, however, pulled down the temple of Dagon, god of the Philistines, and slew, together with himself, "all the lords of the Philistines," besides men and women (Judg. xvi, 21-30). Solomon's kingdom extended as far as Gaza (1 Kings iv, 24). But the place always appears as a Philistine city in Scripture (Judg. iii, 3; xvi, 1; 1 Sam. vi, 17; 2 Kings xviii, 8). Hezekiah smote the Philistines as far as Gaza (2 Kings xviii, 8). Gaza fell into the hands of the Egyptians, probably Pharaoh-Necho, as a diversion of Nebuchadnezzar in his efforts against Jerusalem (Jer. xlvii, 1), an event to which has been incorrectly referred (Rawlinson, *Herod.* i, 411) the statement of Herodotus (ii, 159) respecting the capture of *Calytis* by the Egyptians. See JERUSALEM. During this period of Jewish history, it seems that some facts concerning the connection of Gaza with the invasion of Sennacherib may be added from the inscriptions found at Nineveh (Layard's *Nineveh and Babylon*, p. 114). See CUNEIFORM INSCRIPTIONS. The prophets speak in severe terms against it (Jer. xxv, 20; xlvii, 5; Amos i, 6, 7; Zeph. ii, 4; Zech. ix, 5). After the destruction of Tyre it sustained a siege of two (Quint. Curt. iv, 6, 7, says five) months against Alexander the Great (Josephus, *Ant.* xi, 8, 4), a fact that illustrates the propriety of its name and its military importance. As Van de Velde says (p. 187), it was the key of the country. So vigorously was it then defended by the forces under the command of the eunuch Batis, and of such massive strength were its walls, that the engineers of Alexander's army found themselves completely baffled in their attempts to effect a breach. They were obliged to erect an enormous mound 250 feet in height, and about a quarter of a mile in width, on the south side of the town; and even with this advantage, and the use also of the engines that had been employed at the siege of Tyre, the besiegers were frequently repulsed, and Alexander himself sustained no slight bodily injury. It was at last carried by escalade, and the garrison put to the sword. The town itself was not destroyed, but most of the inhabitants that remained were sold into slavery, and a fresh Arab population settled in their stead (Arrian, ii, 27). What had happened in the times of the Pharaohs (Jer. xlvii, 1) and Cambyzes (Pomp. Mel. i, 11) happened again in the struggles between the Ptolemies and the Selencidae (Polybius, v, 68; xvi, 40). Jonathan Maccabeus (1 Mace. xi, 61) destroyed its suburbs; Simon Maccabeus (1 Mace. xiii, 43) took the city itself, though not without extraordinary efforts. Alexander Jannæus spent a year (B.C. cir. 96) in besieging it and punishing its inhabitants (Josephus, *Ant.* xiii, 13, 3). The place was rebuilt by Gabinius (Josephus, *Ant.* xiv, 5, 3). It was among the cities given by Augustus to Herod (Josephus, *Ant.* xv, 7, 3), after whose death it was united to the province of Syria (Josephus, *Ant.* xvii, 11, 4). It was near Gaza—on the road from Jerusalem to that place—that Philip baptized the eunuch "of great authority under Candace, queen of the Ethiopians" (Acts viii, 26 sq.). As Gaza lay some distance from the sea (Arrian, ii, 26), it had a port on the sea (? *Ἐλπίων λιμὴν*, Ptol. v, 16) called *Ἐλπίων θάλασσα*, "Gaza on the sea;" called also *Μαίημα* (*ὁ Μαίημας*), which Constantine called *Constantia*, from the name of his son, giving it, at the same time, municipal rights. Julian took away this name, and ordered it to be called the port of Gaza. Subsequent emperors restored the name and the privileges of the place. It was afterwards called the sea-coast of Gaza. Further particulars may be read in Reland (*Palästina*, p. 791 sq.), where mention is made, from Pausanias,

of something like a parallel to the feat of Samson; and where, as well as in Kuinöl (in loc.) and in Winer (*Realwörterbuch* in voc.), explanatory circumstances may be found of the words in Acts viii, 26—"Gaza, which is desert;" an expression that appears to refer rather to the road (*ὁδός*) from Jerusalem in that direction than to Gaza itself (see Robinson, *Researches*, ii, 640). Besides the ordinary road from Jerusalem by Ramleh to Gaza, there was another, more favorable for carriages (Acts viii, 28), further to the south, through Hebron, and thence through a district comparatively without towns, and much exposed to the incursions of people from the desert. The matter is discussed by Raumer in one of his *Beiträge*, incorporated in the last edition of his *Palästina*; also by Robinson in the Appendix to his second volume. The latter writer suggests a very probable place for the baptism, viz. at the water in the *wady el-Hazy*, between Eleutheropolis and Gaza, not far from the old sites of Lachish and Eglon. The legendary scene of the baptism is at *Beit-sar*, between Jerusalem and Hebron: the tradition having arisen apparently from the opinion that Philip himself was travelling southwards from Jerusalem. But there is no need to suppose that he went to Jerusalem at all. Lange (*Apost. Zeitt.* ii, 109) gives a spiritual sense to the word *ἄνθρωπος*. About A.D. 65 Gaza was laid in ruins by the Jews, in revenge for the massacre of their brethren in Caesarea (Josephus, *War.* ii, 18, 1). It soon recovered again; and it was one of the chief cities of Syria during the reigns of Titus and Adrian (see Smith's *Dict. of Class. Geogr.* s. v.). Though Christianity was early intro-

Roman imperial Coin of Gaza.

duced into Gaza, the city long remained a stronghold of idolatry. In the beginning of the 5th century its bishop received authority to demolish its temples and build a large Christian church (Sozomen, *H. E.* ii, 5). In A.D. 634 Gaza was taken by the Moslems, and its splendid church turned into a mosque (Elmakim, *Hist. Saracen.* ch. ii, p. 20). From this period it gradually declined under the blight of Islamism, and the Crusaders found it deserted. They built a castle on the hill, which became the nucleus of a new town (*William of Tyre*, xvii, 12). In the 12th century we find the place garrisoned by the Knights Templars. It finally fell into the hands of Saladin, A.D. 1170, after the disastrous battle of Hattin.

The modern town is called *Ghuzzeh*, and contains about 15,000 inhabitants. It resembles a cluster of large villages. The principal one stands on the flat top of a low hill, and has some good stone houses, though now much dilapidated. The others lie on the plain below; their houses are mean mud hovels, and their lanes narrow and filthy. The hill appears to be composed in a great measure of the accumulated ruins of successive cities. We can see fragments of massive walls, and pieces of columns cropping up everywhere from the rubbish. Traces of ruins have been discovered at various places among the sand-hills to the west, which are supposed to be those of primeval Gaza. The great mosque crowns the hill, and can be distinguished in the distance by its tall minaret and pointed roof. The town has no walls or defences of any kind. Its inhabitants have been long known as a fierce and lawless set of fanatics. Between Gaza and the sea there is a broad belt completely covered with mounds of drifting sand. A mile east of the town a long ridge of low hills runs parallel to the coast line. Between

the sand and the hills the ground is very fertile, and supplies the town with abundance of the choicest fruit and vegetables. The climate of the place is almost tropical, but it has deep wells of excellent water. There are a few palm-trees in the town, and its fruit-orchards are very productive. But the chief feature of the neighborhood is the wide-spread olive-grove to the N. and N.E. Hence arises a considerable manufacture of soap, which Ghuzzeh exports in large quantities. It has also an active trade in corn. For a full account of nearly all that has been written concerning the topographical and historical relations of Gaza, see Ritter's *Erdkunde*, xvi, 45-60. Among the travellers who have described the place we may mention especially Robinson (*Biblical Researches*, ii, 375 sq.) and Van de Velde (*Syria and Palestine*, ii, 179-188); also Thomson (*Land and Book*, ii, 331 sq.). The last writer speaks of the great extent of corn-land near Gaza, and of the sound of mill-stones in the city. Even now its bazaars are better than those of Jerusalem. "Those travelling towards Egypt naturally lay in here a stock of provisions and necessities for the desert, while those coming from Egypt arrive at Gaza exhausted, and must of course supply themselves anew" (Robinson, ii, 378). The place is often mentioned in the Talmud (*Otho, Ler. Rabb. p.* 258). See Cellarii *Nolit.* ii, 603 sq.; Siber, *De Gaza* (Lips. 1715); Burscher, *De Gaza narr. t.* (Lips. 1767), and *De Gaza delicta* (Lips. 1768).—Kitto, s. v.; Smith, s. v.

**Gazæus.** See GAZET.

**Gazam.** See PALMER-WORM.

**Gaz'ara** [usually *Gaz'ara'*] (*g* or *ra* Γάζαρα), a town of Palestine, often mentioned in the Apocrypha and by Josephus as the scene of many battles in the Maccabæan period, and as alternately possessed by each of the opposing parties. When Gorgias, general of Antiochus Epiphanes, was defeated by Judas Maccabæus, his forces were pursued "unto Gazara, and unto the plains of Idumæa, and Azotus, and Jamnia" (*εως Γαζαρων*, etc., 1 Macc. iv, 15; *μέχρι Γαζάρων*, etc., Josephus, *Ant.* xii, 7, 4); Nicanor was also defeated by Judas, and pursued from "Adasa to Gazara" (*εις Γάζαρα*, 1 Macc. vii, 45). After the defeat of the Idumæans, Judas went against Timotheus, who fled to Gazara for refuge. Judas, after several days' siege, took the city (2 Macc. x, 32-37; comp. Josephus, *Ant.* xii, 8, 1-4); many of its towers were burnt, and Timotheus himself killed (2 Macc. l. c.). When Bacchides returned to Jerusalem, after the defeat of Jonathan, he fortified several cities, and among them Bethsura and Gazara, and the tower (*ἀκρόα*) of Jerusalem (1 Macc. ix, 52; Josephus, *Ant.* xiii, 1, 3), and it was again fortified by Simon when it had been recovered by the Jews (1 Macc. xiv, 7, 33, 34; Josephus, *Ant.* xiii, 6, 6; *War.* i, 2, 2). Simon built himself a house at Gazara, and also made it the abode of his son John, the captain of all his hosts (1 Macc. xiii, 53; xvi, 1, 19, 21). It is described as being "a very strong hold" (*ὄχυρον*, 2 Macc. x, 32; Γάζαρα . . . οὐσαν ὄχυρὸν ὄρει, comp. Josephus, *Ant.* viii, 6, 1). Gazara is mentioned with Joppa in the treaty of friendship between Hyrcanus and the Romans after the death of Antiochus VII, Sidetes, B. C. cir. 129-8 (Josephus, *Ant.* xiii, 9, 2; comp. Clinton, *F. II.* iii, 332). The *Gaza* in 1 Macc. (xiii, 43) and the *Gadara* in Josephus (*Ant.* v, 1, 22; xii, 7, 4) should doubtless be read Gazara (comp. Prideaux, *Connection*, lib. iv, p. 267, note; Reland, *Palæst.* p. 679). It may perhaps be identified with the *Gadaris* of Strabo (xvi, 2, Didot, ed., p. 646), also described by him as a town not far from Azotus (Reland, *Palæst.* l. c.; Cellarius, *Geog.* ii, 530). See also GAZERA.

It is mentioned by Eusebius (*Nicomasticon*, s. v. Γαζάρη) as being four miles from Nicopolis or Emmaus, but it was more probably nearer the sea-coast, as in the Maccabees and Josephus it is nearly always coupled with Joppa, Azotus, and Jamnia (1 Macc. xiv, 34;

xv, 28, 35; iv, 15; Josephus, *Ant.* xii, 7, 4; xiii, 6, 6; 9, 2; *War.* i, 2, 2), and again in distinct language as bordering upon Azotus (1 Macc. xiv, 34). It appears to have been the same place with GAZER or GEZER (q. v.), a town frequently mentioned in the O. T. under similar connections. As David chased the Philistines from Geba to Gazer (2 Sam. v, 25; 1 Chron. xiv, 16; *ἀχρι πόλεως Γαζάρων*, Josephus, *Ant.* vii, 4, 1), so Judas defeated Gorgias at Emmaus and pursued him to Gazara (1 Macc. iv, 15). Pharaoh, the father-in-law of Solomon, took Gazer (1 Kings ix, 16, 17), then a Canaanitish city, burnt it, slew the Canaanites that were in it, and gave it in dowry to his daughter, Solomon's wife (compare Josephus, *Ant.* viii, 6, 1). This must have occurred during the reign of David, or early in that of Solomon, and it seems out of the question to suppose that Pharaoh, when the Israelitish kingdom was so powerful, could have advanced far into the interior of the country. The site near the sea-coast is therefore confirmed by this circumstance.

Gazara may be identified with the modern village *Yazur*, 3½ miles E. of Joppa; though as a coast town and a place of strength in the time of the Maccabees it is unlikely that it should have so entirely lost its importance (comp. Kitto, *Palestine*, i, 695 n.). It must be remembered, however, that names sometimes linger in the neighborhood of sites.—Kitto, s. v.

**Gazares**, a sect of Paulicians, so named from Gazarre, a town of Dalmatia. They were particularly distinguished by this tenet—that no human government had any right to sentence men to death for any crime whatever. See PAULICIANS.

**Gaz'athite** [usually *Ga'zathite*] (Heb. with the art. *ha-Azathî*, *הַאֲזַתִּי*; Sept. *ὁ Γαζαῖος*, A. V. "the Gazathites"), a designation (Josh. xiii, 3) of the inhabitants of the city of GAZA (q. v.), elsewhere rendered *Gazites* (Judg. xvi, 2).

**Gazelle** (*Antelope dorcas*), an animal of the genus *Antelopidae*, probably designated by the Gr. term *δορκας* (comp. Acts ix, 36) and the Heb. *תְּשִׁבִי*, *tsebi'* (rendered "roe" in 2 Sam. ii, 18; 1 Chron. xii, 8; Prov. vi, 5; Cant. ii, 7, 9, 17; iii, 5; viii, 14; Isa. xiii, 14; and "roebuck" in Deut. xii, 15, 22; xiv, 5; 1 Kings iv, 23), or in the feminine form *תְּשִׁבִיָּה*, *tsebiyah'* ("roe," Cant. iv, 5; vii, 3); "both terms, however, being applicable to the whole group; and the Hebrew name is by distant nations now used for allied species which are unknown in Arabia and Syria. Of this sub-genus *gazelle* at least one species, but more probably four or five, still inhabit the uplands and deserts of Egypt, Arabia, and the eastern and southern borders of Palestine. All these species are nearly allied, the largest not measuring more than two feet in height at the shoulder, and the least, the corinna, not more than about twenty inches. They are graceful and elegant in form, with limbs exceedingly slender, and have large and soft eyes, lyrate horns, black, wrinkled, and striated—most robust in *sub-gutturosa* and *kevela*, most slender in *corinna*, and smallest in *cora*. Their livery is more or less buff and dun, white beneath, with small tufts of hair or brushes on the fore-knees; they have all a dark streak passing from each ear through the eyes to the nostrils, and a band of the same color from the elbow of the fore-leg along the sides to the flank, excepting the corinna, whose markings are more rufous and general colors lighter. Most, if not all, have a feeble bleating voice, seldom uttered, are unsurpassed in graceful timidity, gregarious in habit, and residents on the open deserts, where they are unceasingly watchful, and prepared to flee with such speed that greyhounds are liable to be killed by over-exertion in the chase" (Kitto). They roam over the plains of Syria sometimes in herds of one thousand (Russell, *Aleppo*, ii, 14). Their flesh is lean, but highly prized (Prosop. Alpin, *Hist. nat. Æg.* iv, 9). They are often

made the symbol of female beauty (Cant. ii, 9, 17; viii, 14) by Orientals (Seth, *al ben Zohair*, p. 98 sq.; Döpfke, *Comment. z. Hohesl.* p. 97; Rosenmüller, *Morgenl.* iv, 129). See Thomson, *Land and Book*, i, 251 sq.; Kelly's *Syria*, p. 38 sq. See ANTELOPE; DEER.

Ariel (*Gazella Arabica*).

**Ga'zer** (2 Sam. v, 25; 1 Chron. xiv, 16). See GEZER.

**Gaze'ra**, the name of a place and also of a man in the Apocrypha.

1. (ἡ Γάζηρα v. r. Γάζηρα, Vulg. *Gazeron, Gazara*), the town of Palestine (1 Macc. iv, 15; vii, 45), elsewhere called GAZARA (q. v.).

2. (Καζήρα v. r. Γαζήρα, Vulg. *Geze*), one of the Temple-servants whose "sons" returned from Babylon (1 Esdr. v, 31); evidently the GAZZAM (q. v.) of the Heb. text (Ezra ii, 48).

**Gazet** (Latinized *Gazicus*), GUILLAUME, a French ecclesiastical historian and theologian, was born at Arras in 1554, and died in the same city Aug. 25, 1611. He was for a time professor of belle-lettres at Louvain, quitting that position about 1580. He was also canon of the collegiate Church of St. Peter of Aire, and subsequently *curé* of the parish of St. Marie Madeleine of Arras. Gazet was an ardent student, especially of hagiography, but is by some regarded as credulous and inexact in giving the results of his investigations, though the Flemish historians and litterateurs, who have treated of his epoch, bestow high praise upon him. His most noted work, the *Ecclesiastical History of the Low Countries*, published after his death under the care of his nephew, G. Montearré, contains much of the material found in his other writings bearing on the subject, only recast to suit it. Among his works are, *Histoire de la vie, mort, passion et miracles des Saints desquels l'Église catholique fait fête et mémoire*, etc. (t. i, Arras, 1584, 12mo; t. ii, Rouen, 1605, less carefully printed than the i; a 2d edit. Rouen, 1619, 4to);—*Magdalis, tragœdia Sacra* (Douay, 1589, 8vo);—*La Somme des Pêchés et le remède d'eux*, etc. (ibid. 1592, 8vo);—*Hymnorum Libri septem in Christi Jesu etc. gloriam* (ib. 1592, sm. 4to); the poems of Robert Obridge, with epistolary dedication and laudatory verses);—*L'Ordre et Suite des Evesques et Archevesques de Cambrai*, etc. (ibid. 1597, 12mo);—*Thesaur. Precum et Litaniarum, Script. Sacra*, etc. (ibid. 1602, 18mo);—*Idiota de Vita et Moribus Religiosorum*, etc. (ibid. 1606, 18mo);—*Tableaux Sacrez de la Gambe Belg.*, etc. (ibid. 1610, 8vo, of which the *Biblioth. Sacrée* forms the second part);—*Brieve hist. de la sacrée Manne, et de la sainte Chredelle*, etc. (ibid. 1612, 16mo; new editions 1625, 1682, 1710, 1738, Arras, 12mo);—and the following posthumous works: *Les Vies des Saints, avec des exhortations Morales* (Rheims, 1613, 2 vols. 8vo);—*Histoire ecclésiastique des Pays-Bas*, etc. (Arras and Valenciennes, 1614, 4to);—*Le Consolateur des Ames Scrupuleuses*, etc.

(Arras, 1617, 18mo);—*Les Règles et Constitutions des Ordres réformés*, etc. (ibid. 1623, 18mo). Gazet wrote also *Le Sacré Banquet*:—*Exercices spirituels, with Litaniés pour toute la semaine*, and some ascetic tracts, *pour la consolation et instruction du peuple Chrétien*.—Hoefer, *Nouv. Biog. Générale*, xix, 781-784. (J. W. M.)

**Ga'zez** (Heb. *Guzzz'*, גִּזְזִי, *shearer*; Sept. Γαζοζι'), the name of two men, supposed by some to have been identical.

1. A "son" of Caleb (son of Hezron, son of Judah) by his concubine Ephah (1 Chron. ii, 46). B.C. cir. 1856.

2. A grandson of the same Caleb, through another of his sons Haran (1 Chron. ii, 46). B.C. post 1856.

**Ga'zite** (Heb. in the plur. with the art. *ha-Azza'im*, אֲזַיִם; Sept. oi Γαζοιτοί, Vulgate *Philiſthim* A. V. "the Gazites"), the designation (Judg. xvi, 2) of the inhabitants of GAZA (q. v.); elsewhere rendered "Gazathites" (q. v.).

**Gaz'zam** (Heb. *Gazzam'*, גַּזְזָם, *devouring* [comp. לוֹעֵטֵר], or [Fürst] *swaggerer*; Sept. Γαζζιμ and Γηζζιμ, Vulg. *Gazzam* and *Gezem*), the progenitor of one of the families of Nethinim that returned from the captivity with Zerubbabel (Ezra ii, 48; Neh. vii, 51). B.C. ante 536.

**Geb.** See LOCUST.

**Geb'a**, the name of at least two places in Central Palestine.

1. (Heb. *Gé'ba*, גִּבְעָה, often with the art. i. e. *the hill*, in pause "*Ga'ba*," גַּבְעָה, Josh. xviii, 24; Ezra ii, 26; Neh. vii, 30; yet this form is also Anglicized "Geba" in 2 Sam. v, 25; 2 Kings xxiii, 8; Neh. xi, 31), a city of Benjamin with "villages" (Josh. xviii, 24; on its settlement, see 1 Chron. viii, 6), hence more fully "Geba of Benjamin" (1 Kings xv, 22; 1 Sam. xiii, 16 [Josephus *Gibcon, Γαβζαών, Ant.* vi, 6, n.; for which, perhaps, compare 1 Chron. viii, 29; ix, 35), situated on the northern border of the kingdom of Judah (2 Kings xxiii, 8; Zech. xiv, 10), near to Gibeah, apparently towards the east or north-east (Isa. x, 29; Josh. xviii, 24, 28). It is often asserted that *Geba* and *Gibeah* were names of the same place; the A. V. in at least 1 Sam. xiii, 15, 16, confounds them; the Sept. and Vulg. render both indifferently by *Γαβζαα* and *Gabau*; and in two passages (Judg. xx, 10, 33) the same error has crept into the original. Schwarz's identification of these places (*Phys. Descrip. of Palest.* p. 132) is full of errors in locality. The two names are indeed only masculine and feminine forms of the same word, signifying "hill;" but that they were two different places is evident from Josh. xviii, 24, compare 28; 1 Sam. xiii, 2, compare 3; Isa. x, 29. In 2 Sam. xx, 8, the name "Geba" stands erroneously for GIBCON (compare 1 Chron. xiv, 16). Gela, with its "suburbs," was assigned to the priests (Josh. xxi, 17; 1 Chron. vi, 60). The Philistines were smitten from Geba unto Gazer by David (2 Sam. v, 25). As it lay on the frontiers of Judah and Israel, Asa rebuilt Geba and Mizpah with the stones of Ramah (1 Kings xv, 22; 2 Chron. xvi, 6). "From Geba (in the north) to Beersheba" (in the south) (2 Kings xxiii, 8) expressed the whole extent of the separate kingdom of Judah, just as "from Dan to Beersheba" expressed the whole length of Palestine. It would seem from the manner in which Geba (Gaba) and Lamah are coupled in Neh. vii, 30, that they were very near each other. Reland (*Palest.* p. 802) thinks it the *Gebath* (גִּבְתָּה) or *Gibbethon* (גִּבְתֹּן) mentioned by Talmudical writers in connection with Antipatris (comp. 2 Sam. v, 25). During the wars of the earlier part of the reign of Saul, Geba was held as a garrison by the Philistines (1 Sam. xiii, 8), but they were ejected by Jonathan, a feat which, while it added greatly to his renown, exasperated them to a more overwhelming invasion. Later in the same campaign we find it re-

ferred to in defining the position of the two rocks which stood in the ravine below the garrison of Michmash, in terms which fix Geba on the south and Michmash on the north of the ravine (1 Sam. xiv, 5; the A. V. has here Gibeah). Exactly in accordance with this is the position of the modern village of *Jeba*, which stands picturesquely on the top of its steep terraced hill, on the very edge of the great wady Suweinit, looking northwards to the opposite village, which also retains its old name of Mikhmas. (See Stanley, *Pal. Est.* p. 210, 489; Porter, *Hand-book for Syria*, p. 215.) The names, and the agreement of the situation with the requirements of the story of Jonathan, make the identification all but certain; but it is still further confirmed by the list of Benjaminite towns visited by the Assyrian army on their road through the country southward to Jerusalem, which we have in Isa. x, 28-32, where the minute details—the stoppage of the heavy baggage (A. V. “carriages”), which could not be got across the broken ground of the wady at Michmash; then the passage of the ravine by the lighter portion of the army, and the subsequent bivouac (“lodging,” יָרַחְנוּ = rest for the night) at Geba on the opposite side—are in exact accordance with the nature of the spot. Standing as it does on the south bank of this important wady—one of the most striking natural features of this part of the country—the mention of Geba as the northern boundary of the lower kingdom is very significant. Thus commanding the pass, its fortification by Asa (1 Kings xv, 22; 2 Chron. xvi, 6) is also quite intelligible. It continues to be named with Michmash to the very last (Neh. xi, 31). Geba is probably intended by the “Gibeah-in-the-field” of Judg. xx, 31, to which its position is very applicable. The “fields” are mentioned again as late as Neh. xii, 29. The town was occupied by the Benjamites after the captivity (Ezra ii, 26). It appears to have been unknown to Eusebius and Jerome (*Orientalion*, s. v. Γαβαί, *Gabe*; comp. Reland, *Pal. Est.* p. 708). The village of Jeba is small, and is half in ruins. Among these are occasionally seen large hewn stones indicating antiquity. There is here the ruins of a square tower, almost solid, and a small building having the appearance of an ancient church (Robinson, *Researches*, ii, 113; *Bib. Sac.* 1844, i, 598-602; *Lat. Researches*, p. 288).—Kitto, s. v.; Smith, s. v. See GIBEAH.

2. The Geba (Γαβαί v. r. Ταυζάν) between which and Scythopolis (therefore S. of Mount Gilboa) Holofernes is said to have made his encampment (Judith, iii, 10), must be the *Jeba* on the road between Samaria and Jenin, about 45' S. of Sanur (Van de Velde, *Narrat.* i, 367), with evident traces of antiquity (Wilson, *Lands of Bible*, ii, 84; Robinson, i, 440). The Vulg. strangely renders *venit ad Idumeos in terram Gabba*.

**Gē'bal** (kindred with the Arabic *Jebel*, a mountain), the name of two places in Palestine (although some regard them as one, Schwarz, *Pal. Est.* p. 63), both doubtless so called as being situated in a mountainous region. The root is the Heb. גַּבַּל, *gibal'*, to *mount*; whence גַּבְעוֹן, a line or natural boundary, such as mountain ranges usually form. There seems also to have been an orthography גַּבְעוֹן, *Go'bel* (Γόβελ, Euseb, *Onomast.* s. v. Βίβλος; comp. *Alcoñle*, i. e. El-Gobel, of the Pentinger tables), whence *Gobolites* = *Sobal*. The *Gablan* (גַּבְלָן) in the Mishna, along with Galilee (*Sotah*, fol. 49, 6), arose out of the גַּבְלָן, or *Jaulan*, which is considered as the eastern border of Galilee (Josephus, *War*, iv, 1, 1).

1. (Heb. *Gēbal'*, גַּבְעוֹן; Sept. Βιβλοια, Vulg. *Giblii*, Ezek. xxvii, 9), better known from the Gentile form GIBLITES (גַּבְלִיִּים, Sept. Γαβλί, Vulg. omis, Josh. xiii, 5; plur. גַּבְלִיִּים, Sept. Γιβλοια, Vulg. *Giblii*, Auth. Vers. “stone-squarers,” 1 Kings v, 18 [32]), the inhabitants of the city and district of Gebal, in Phœni-

cia, 34° 7' N. latitude, 35° 42' E. longitude, on the shore of the Mediterranean, under Mount Lebanon. (See a passage from Lucian, quoted by Reland, *Pal. Est.* p. 269.) “The land of the Gibletes,” with “all Lebanon,” was assigned to the Israelites by the original appointment (Josh. xiii, 5); but it does not seem that they ever possessed themselves of it. Gebal was called *Byblos* (Βύβλος, sometimes Βιβλος) by the Greeks, and so the Sept. has it in one passage. It was an important place, and celebrated for the birth and worship of Adonis, the Syrian Tammuz. Pliny and other Roman authors call it *Gabale* (*Hist. Nat.* v, 20). The Gibletes, or Bybllians, seem to have been pre-eminent in the arts of stone-carving (2 Kings v, 18) and ship-calking (Ezek. xxvii, 9); but, according to Strabo, their industry suffered greatly from the robbers infesting the sides of Mount Lebanon. Pompey not only destroyed the strongholds from whence these pests issued, but freed the city from a tyrant (Strabo, xvi, 2, 18). Some have confounded Gebal, or Bybllus, with the *Gabala* of Strabo, just below Laodicea, and consequently many leagues to the north, the ruins and site of which, still called *Jebili*, are so graphically described by Maundrell (*Early Travellers in Palestine*, by Wright, p. 394). By Moroni (*Dizion. Eccles.*) they are accurately distinguished under their respective names. Finally, Bybllus became a Christian see in the patriarchate of Antioch, subject to the metropolitan see of Tyre (Reland, *Pal. Est.* p. 214 sq.). It shared the usual vicissitudes of Christianity in these parts; and even now furnishes episcopacy with a title. It is called *Jebail* by the Arabs, thus reviving the old Biblical name. It is seated on a rising ground near the sea, at the foot of Lebanon, which here approaches close to the coast. It is walled on the three sides towards the land, and open on the west towards the sea, being perhaps about half a mile in circuit. Within the wall, which seems to be of the age of the Crusades, the chief building is an old castle, which has received modern repairs, and is now used as the abode of the agha or commandant. There are three or four open and lofty buildings belonging to the chief people of the place, a mosque with a low minaret, and an old Maronite church of good masonry; but the houses generally are of poor construction, and nearly half the space within the walls is occupied with the gardens of the inhabitants. The population is estimated at 600, none of whom are Jews (Maundrell's *Journey*, p. 45; Burekhardt's *Syria*, p. 180; Buckingham's *Arab Tribes*, p. 455; Pococke, *Travels*, ii, 98; Wilson, *Lands of Bible*, ii, 40). Its antiquity is attested by multitudes of granite columns which are built into the walls and castles, choke up the small harbor, and lie scattered over the fields. The substructions of the old castle are of bevelled masonry, and some of the stones are nearly twenty feet long. Beautiful sarcophagi are frequently dug out of the ruins. The columns are of the Grecian style, like those of the other cities of ancient Phœnicia (*Bibliotheca Sacra*, 1848, p. 7). See BYBLUS.

2. (Heb. *Gēbal'*, גַּבְעוֹן, Sept. Γεβάλ, Vulg. *Gēbal*; Psa. lxxxiii, 7), a district, or perhaps sovereignty, south of Judæa, in the land of Edom. Gebal signifying a mountain, apparently belongs not to the most ancient times, as it does not occur when the Israelites were actually in this quarter, but is first found in Psa. lxxxiii, which was probably written in the time of Jehoshaphat. That king had, in the beginning of his reign, humbled the Philistines and Arabians (2 Chron. xvii, 9, 10), and still more recently had assisted Ahab against the Syrians (ib. ch. xviii). Now, according to the poetic language of the Psalmist, there were symptoms of a general rising against him: on the south, besides these Gebalites, the other Edomites, the Ishmaelites, and the Hagarenes; on the south-east, Moab and Ammon; along the whole line of the south-west coast (and, with Jehoshaphat's maritime projects, this

would naturally disturb him most; see 2 Chron. xx, 36), the Amalekites, Philistines, and Phœnicians, or inhabitants of Tyre; with the aid and comfort even of Assur, i. e. the Syrians, or Assyrians, from the more distant north. The country south of the Dead Sea, and on the east of the Ghor, or great Jordan valley, bears the same name (*Jebal*) at the present day (Burckhardt, p. 401 sq.), and is doubtless the same as the Gebal of Scripture, the *Gebalitis* (or, rather, *Gobolitis*) of Josephus (*Γοβολίτις*, *Ant.* ii, 1, 2; iii, 2, 1; *Γαβαλίται*, *Ant.* ix, 9, 1), and the *Gebalene* of the Romans (Euseb. and Steph. Byz. have *Γάβαλα*, *-ληνίη*; *Γέβαλα*, *-ληνίη*). Josephus says, indeed, that the sons of Eliphaz, son of Esau, settled in that part of Idumæa which was called Gebalitis, and that denominated from Amalek Amalekitis: "For Idumæa," he adds, "was the name of a large country, which in its several parts retained the names of its peculiar inhabitants" (*Ant.* ii, 2, 1). We may therefore take Gebal as the name of the northernmost portion of Idumæa, which was nearest to Palestine. In Judith iii, 1, Lat. Vers., and also in the writings of the Crusaders, it is called Syria *Sobal* (q. v.). The Jerusalem *Targum* generally reads *Mount Gablah* (*גַּבְלָהּ מִצְרַת*) instead of Mount Seir; so also the Samar. in Deut. xxxii, 2. Seir, however, was the ancient name of Edom, whereas Gebal was only a part of it. (See Reland, *Palæst.* p. 84; Michaelis, *Suppl.* i, 261 sq.; Robinson, *Researches*, ii, 552.)—Kitto, s. v.; Smith, s. v. See IDUMÆA.

**Gebalênê.** See GEBAL, 2.

**Gebath.** See GEBAL, 1.

**Ge'ber** (Heb. *גֵּבֵר*, a valiant man, as often; Sept. *Γάβρο*, Josephus *Γαβάροης*, *Ant.* viii, 2, 3), the son of Uri, and one of Solomon's purveyors, having sole (i. e. supreme) jurisdiction (*גֵּבֵר*) over Gilead (1 Kings iv, 19); from which fact he appears to be the same as BEN-GE'BER ("son of Geber") mentioned in ver. 13 as having charge of the same region, unless, indeed, the latter were a deputy or assistant to his father. B.C. 1013. See also EZION-GE'BER.

**Gebelin.** See COURT, ANTOINE.

**Gebhard, TRUCESSE,** archbishop of Cologne, was born at Waldburg Nov. 10, 1547; was made prebendary of Augsburg in 1562, of Strasburg in 1567, of Cologne in 1570, and in 1577 elector and archbishop of Cologne. In 1582 he became a Protestant, and in the following year he married the countess Agnes von Mansfeld. He proclaimed unrestricted religious liberty, and intended to convert his spiritual into a temporal electorate. His plan was highly approved by the people and the nobility, but the cathedral chapter opposed it with all its might. The pope fulminated a ban against him, and the emperor, Rudolph II, declared him deposed. The Protestant princes ultimately deserted him, and the newly-elected archbishop, duke Ernest of Bavaria, overcame him by force of arms (1584). He fled to Holland, but not receiving any help there, he returned to Germany, where he vainly solicited the assistance of the Protestant princes, as well as petitioned queen Elizabeth of England for aid in regaining his bishopric; he finally retired to Strasburg, where he officiated as dean of the cathedral, and died May 21, 1601. See Köhler, *De actis et factis Gebhardi* (Altd. 1723); Barthold, in *Rammer's Historisches Taschenbuch* (1820); Pierer, *Universæl-Lexikon*, s. v.

**Ge'bin** (Heb. *Gebim'*, *גֵּבִים*, cisterns [as in Jer. xiv, 3, "pits"], or locusts [as in Isa. xxxiii, 4]; Sept. *Γεβίμεις*, Vulg. *Gabin*), a small place a short distance north of Jerusalem, mentioned between Madmenah and Nob, Isa. x, 31, where its inhabitants are prophetically described as fleeing at the approach of the invading Assyrian army. Eusebius and Jerome (*Onomast.* s. v. *Γεβέρα*, *Gebin*) identify it with "*Geba*, a village five miles from Guphna towards Neapolis;" and Schwarz

(*Palæst.* p. 131) identifies it with the Gob of 2 Sam. xxi, 18; but both these are at variance with the order of the places named by the prophet. The associated localities require a position corresponding to that of the present *El-Isawiyyeh*, a little village in a valley near the road leading N.E. from Jerusalem (Robinson, *Researches*, ii, 108). See NOB. It probably derived its Heb. name from the vicinity of excavations (*גְּבִים* = the ditches; comp. 2 Kings iii, 16).

**Gedali'ah** (Heb. *Gedalyah'*, *גְּדַלְיָהּ*, made great by *Jehovah*, Ezra x, 18; Jer. xl, 5, 8; xli, 16; Zeph. i, 1; elsewhere in the prolonged or full form *Gedalya'hu*, *גְּדַלְיָהוּ*; Sept. usually *Γοδολία*, Vulgate *Godolia*), the name of five men.

1. The son and second assistant of Jeduthun in the Levitical choir of the Temple in the time of David (1 Chron. xxv, 3, 9). B.C. 1013.

2. The (son of Amariah and father of Cushî) grandfather of the prophet Zephaniah (Zeph. i, 1). B.C. ante 635.

3. Son of Pashur, and one of the Jewish nobles who conspired to accuse and imprison Jeremiah (Jer. xxxviii, 1). B.C. 589.

4. The son of Ahikam (Jeremiah's protector, Jer. xxvi, 24), and grandson of Shaphan, the secretary of king Josiah. After the destruction of the Temple, B.C. 588, Nebuchadnezzar departed from Judæa, leaving Gedaliah with a Chaldaean guard (Jer. xl, 5) at Mizpah, a strong (1 Kings xv, 22) town, six miles north of Jerusalem, to govern, as tributary (Josephus, *Ant.* x, 9, 1) of the king of Bablyon, the vine-dressers and husbandmen (Jer. lii, 16) who were exempted from captivity. He was probably of the number of those who left the city at the instance of the prophet, justly despairing of the successful defence of a place which God had abandoned. Gedaliah had inherited his father's respect for Jeremiah (Jer. xl, 5 sq.), and was, moreover, enjoined by Nebuzaradan to look to his safety and welfare. Gedaliah was in every way worthy of the difficult post he had to fill; and he adopted, as the principle of his conduct, that submission to existing circumstances which was requisite in one who believed that Judah had, according to the declared will of God, been justly doomed and punished for her iniquities, and who yet believed that his loving kindness had not utterly departed from her. He established the seat of his melancholy government at Mizpah, in the tribe of Benjamin; and there the inhabitants, who had fled at the advance of the Chaldaean armies, or when the troops of Zedekiah were dispersed in the plains of Jericho, quitting their retreats, began to gather around him. Gedaliah wisely counselled them to submission and quietness; and he promised, on that condition, to insure them the undisturbed enjoyment of their possessions, and of the produce of the ground. In this hope the labors of the field were resumed, and the extraordinary returns of that season secured as if specially given to repair the recent injuries of war. Jeremiah joined Gedaliah; and Mizpah became the resort of Jews from various quarters (Jer. xl, 6, 11), many of whom, as might be expected at the end of a long war, were in a demoralized state, unrestrained by religion, patriotism, or prudence. The gentle and popular character of Gedaliah (Joseph. *Ant.* x, 9, 1 and 3), his hereditary piety (Rosenmüller on Jer. xxvi, 24), the prosperity of his brief rule (Jer. xl, 12), the reverence which revived and was fostered under him for the ruined Temple (xli, 5), fear of the Chaldaean conquerors, whose officer he was—all proved insufficient to secure Gedaliah from the foreign jealousy of Baalis, king of Ammon, and the domestic ambition of Ishmael, a member of the royal family of Judah (Joseph. *Ant.* x, 9, 3). This man came to Mizpah with a secret purpose to destroy Gedaliah. Gedaliah, generously refusing to believe a friendly warning which he received of the intended treachery, was murdered, with his

Jewish and Chaldaean followers, two months after his appointment. After his death, which is still commemorated in the Jewish Calendar (Prideaux, *Connexion*, anno 588, and Zeel. vii, 19) as a national calamity, the Jews, in their native land, anticipating the resentment of the king of Babylon, gave way to despair. Many, forcing Jeremiah to accompany them, fled to Egypt under Johanan. By this series of tragical events the utter ruin of Judæa was consummated (2 Kings xxv, 22-26; Jer. xxxix, 14; xli, 18).—Kitto, s. v.; Smith, s. v. See JEREMIAH.

5. A descendant of Jeshua, and one of the priests who divorced their heathen wives after the return from the Babylonian captivity (Ezra x, 18). B. C. 458.

**Gebirol.** See IEN GEBIROL.

**Geddes, Alexander**, a Roman Catholic divine, was born in 1737, at Arradowl, Banffshire, Scotland. He studied theology at the Scotch College in Paris, and, after his return to Scotland, he officiated at various chapels till 1782, when he desisted entirely from clerical functions. For many years he was engaged on a new translation of the Old and New Testament, and Lord Petre allowed him a pension of £200 a year to enable him to carry it into effect. "The prospectus, which contained an account of his plan, was published in 1786; this was soon followed by a letter to the bishop of London, containing 'Queries, doubts, and difficulties relative to a vernacular version of the Holy Scriptures,' by a specimen of the work, and by a 'General Answer to the queries, counsels, and criticisms' which his prospectus and specimens had called forth. It was not, however, till 1792 that the first volume of the translation was published under the title of '*The Holy Bible, or the Books accounted Sacred by the Jews and Christians, otherwise called the Books of the Old and New Covenants, faithfully translated from corrected texts of the originals, with various readings, explanatory notes, and critical remarks.*' The second, which contained the translation to the end of the historical books, appeared in 1793; and the third, which contained his critical remarks upon the Pentateuch, in 1800. The remainder of the work was never finished; he was employed, at the time of his death, on a translation of the Psalms, which he had finished as far as the 118th Psalm, and which was published in 1807." In 1800 he published *Critical Remarks on the Hebrew Scriptures* (Lond. 4to). He died Feb. 26, 1802. *A Memoir of his Life and Writings*, by Dr. John Mason Goode, appeared in 1803 (London, 8vo). See Graves, *On the Pentateuch*; *British Critic*, vols. iv, xix, xx; *English Cyclop.*; Cotton, *Rheims and Douay*, Oxford, 1864.

**Geddes, Janet**, "known in Scottish ecclesiastical history as 'Jenny Geddes,' has had her name transmitted as the person who took a prominent part in resisting the introduction of the Liturgy, or Service-book, into the Church of Scotland in 1637. The circumstances were these. Sunday, 23d July, 1637, was the day fixed for this innovation, so obnoxious to the Scottish Presbyterians, and an immense crowd filled the High Church of St. Giles's, Edinburgh, on the occasion. On the dean of Edinburgh beginning to read, his voice was lost in a tumultuous shout, and an old woman, said to have been one Jenny Geddes, who kept a green-stall in the High Street, bawling out, 'Villain! dost thou say mass at my lug' (that is, ear), launched her stool at the dean's head. Universal confusion ensued, and the dean, throwing off his surplice, fled, to save his life. The bishop of Edinburgh, on attempting to appease the storm, was assailed by a volley of sticks, stones, and other missiles, accompanied by cries and threats that effectually silenced him. This tumult proved the death-blow of the liturgy in Scotland. It has been doubted, however, if there ever was such a person as Jenny Geddes. In 1756, a citizen of Edinburgh, of the name of Robert Mein (who died in 1776), known for his exertions for the improvement of his

native city, published a tract called *The Cross Removed, Prelacy and Patronage Disproved*, etc., in which he claims the exploit of Jenny G. for his great-grand-mother, 'the worthy Barbara Hamilton, spouse to John Mein, merchant and postmaster in Edinburgh, who, in the year 1637, spoke openly in the church at Edinburgh against archbishop Laud's new Service-book, at its first reading there, which stopped their proceedings, and dismissed their meeting, so that it never obtained in our Church to this day.' In the obituary notice of Robert Mein, *Weekly Magazine*, vol. xxxix, and *Scots Magazine*, vol. xxxvi (1776), this Barbara Hamilton is said to have been descended from the Hamiltons of Bardowie, 'but was better known in our history by the name of Jenny Geddes, though called so erroneously.' Jenny Geddes's famous stool is said to have been burned by herself in the bonfires at the cross of Edinburgh at the Restoration, and what has been called hers in the Museum of the Society of Antiquaries at Edinburgh has no claim to that name beyond gratuitous conjecture. See *Proceedings of Society of Antiquaries of Scotland*, vol. iii, pt. ii, p. 179, 180."—Chambers, *Cyclopaedia*, s. v.

**Geddes, Michael**, a divine of the Church of England, was born in Scotland, and in 1678 was appointed chaplain to the English factory at Lisbon. In 1686 he was summoned to appear before the court of the Inquisition. The judges received him at first with great affectation of civility and courtesy, desiring him to sit down and to be covered before they proceeded to examine him. After this ceremony was over, they sternly asked him how he dared to preach or exercise his function in that city? He answered that he enjoyed that liberty by virtue of an article in the treaty between the crowns of Portugal and England; that it was a privilege which had never been called in question; and that he had resided at Lisbon for eight years, during which time he had served the English factory in the capacity of chaplain, as many others had done before him. To these declarations they falsely replied that they were entirely ignorant till lately that any such liberty had been assumed, and that if they had known it they would never have suffered it. They strictly forbade him to minister any more to his congregation; and, after threatening him with vengeance if he should disobey, dismissed him. It is said that they were encouraged to take this step by the Romanist party in England. Upon this interdiction, letters of complaint were addressed by the factory to the bishop of London; but as they did not reach England before the suspension of his lordship, all hopes of speedy redress were lost. Geddes returned to his native country in the beginning of 1688. He was soon made LL.D. by the University of Oxford, and was made chancellor of Sarum by bishop Burnet. He wrote a *History of the Church of Malabar* (Lond. 1694, 8vo).—*The Church History of Ethiopia* (Lond. 1696, 8vo).—*Miscellaneous Tracts against Popery* (Lond. 1730, 3 vols. 8vo); and the *Council of Trent no Free Assembly*. He died in 1715.—Birch, *Life of Tillotson*; Hook, *Eccles. Biog.* v, 308.

**Ged'ar** (Γεδ'άρ), one of the "Temple servants" or Nethinim, whose "sons" are stated to have returned from the exile (1 Esdr. v. 30); evidently the GADAR (q. v.) of the Heb. texts (Ezra ii, 47; Neh. vii, 49).

**Ged'eon** (Γεδεών, the Grecized form of *Gideon*), the name of two men.

1. The judge GIDEON (q. v.), thus Anglicized in the N. T. (Heb. xi, 32).

2. The son of Rephaim and father of Ananias, among the ancestors of Judith (Judg. viii, 1; where, however, many copies have "Gideon").

**Ged'er** (Heb. גֶּדֶר, Sept. Γάδερον), a name signifying a wall (e. g. of a court, garden, sheepfold, etc., Prov. xxiv, 31; Ezek. xlii, 10), hence an inclosed or fortified place, and thus the basis of several names of

castellated towns (e. g. Gederah, Gedor, Gadara, Gederoth, etc.); used once only (Josh. xii, 13) in this simple form as that of one of the thirty-one ancient royal towns of the Canaanites, whose kings were defeated by Joshua. It is mentioned between Debir and Hormah; but, as the localities in that list are not strictly in geographical order, it may be identified with the GEDOR (q. v.) in the mountains of Judah (Josh. xv, 58), and with the BETI-GADER (q. v.) of 1 Chron. ii, 51. The notices of Schwarz (*Palest.* p. 86, 104) are quite confused.

**Ged'erah** (Heb. with the article *hag-Ged'erah'*, גְּדֵרָה, the fortress or *sh ep-cote* [see GEDER]; Sept. Γάρα, a town in the Shephelah or plain of Judah (Josh. xv, 36, where it is mentioned between Adithaim and Gederothaim [q. v.]). According to Eusebius and Jerome (*Onomast.* s. v. Γάρα, Gaddera), it was still a village (Γάρα, *Gadara*) near Jerusalem "around the Terebinth," an expression which Rammur (*Palest.* p. 133) interprets of the valley of Elah or the terebinth (1 Sam. xvii, 1); although Keil (on *Joshua*, ad loc.) shows that it means the wood of Mamre, near Hebron, and Reland had pointed out that this was in the mountains and not the lowlands of Judah (*Palest.* p. 802). Van de Velde has identified the site with that of "Gheterah or Ghederah, a village on the south banks of wady Surar, near the high road from Ramleh to Ghuzzel" (*Memoir*, p. 313); a position exactly agreeing with that of the *Cedus* (Κέδου, Jerome *Gedrus*), described by Eusebius (*Onomast.* s. v. Γέδου, Jerome *Gadur*) as a very large village ten miles from Diospolis (Lydda) towards Eleutheropolis (Beit-Jibrin). The inhabitants seem to be those designated as *Gederites* (q. v.) in 1 Chron. xxvii, 28.

**Ged'erathite** (Heb. only with the art. *hag-Gederathite*, ἡ γὰδερᾶθιτῆ, as if from *Gederah*; Sept. ὁ Γαδερῶσιτι v. r. Γάρασιτίπ, Vulg. *Gaderothites*), an epithet of Josabab (q. v.), one of David's famous warriors at Ziklag (1 Chron. xii, 4); so called as being a native probably of the GEDOR (q. v.) of the same passage (ver. 7).

**Ged'erite** (Heb. with the art. *hag-Gederi'*, הַגְּדֵרִי, as if from *Geder*; Sept. ὁ Γεδωρίτης v. r. Γέδω, Vulg. *Gederites*), an epithet of Baal-hanan, David's overseer of olive and sycamore groves in the lowland of Judah (1 Chron. xxvii, 28); hence probably so called as being a native of GEDERAH (q. v.) in that region (Josh. xv, 36).

**Ged'eroth** (Heb. *Gederoth'*, גְּדֵרוֹת, fortresses or *sheep-cotes* [see GEDER]; in Chron. with the art.; Sept. Γαδρωθ v. r. in Chron. Γαδρωθ, etc.; Vulg. *Giderothim*, *Gederoth*), a town in the "valley" of Judah (Josh. xv, 41, where it is mentioned between Kithish and Beth-dagon); one of those captured by the Philistines from Ahaz (1 Chron. xxviii, 18). It cannot be identical with the Gederah or Gederothaim (q. v.) of Judah (which lay in a different group), nor yet with either Gedor or Gedor (which were in the mountains). The associated names require a position "in the actual plain from north to south between the hilly region and the Philistine coast" (Keil, on *Josh.* ad loc.); perhaps at the modern *Beit-Tima*, marked on Van de Velde's *Map* as 6 miles east of Ascalon.

**Gederothaim** (Heb. *Gederothaim'*, גְּדֵרוֹתַיִם, two folds [see GEDER]; Sept. omits, but some copies translate it ἐπ' αὐταῖσι ἀβυθῆ, Vulgate *Gederothaim*), the name of a town in the plain of Judah (Josh. xv, 36), mentioned in connection with GEDERAH (q. v.); where, probably, instead of rendering the copulative "and," we should (with the margin) translate it "or," since otherwise there would be 15 instead of 14 cities enumerated, as stated in the text. So Schwarz (*Palest.* p. 103), who, however, confounds it with Gederoth, and even with the Gazara (q. v.) of the Apocrypha (see Reland, *Palest.* p. 778).

**Gedi.** See GOAT; EX-GEDI.

**Gediyah.** See GOAT.

**Ge'dor** (Heb. *Gedor'*, גְּדוֹר or [in 1 Chron. iv, 4, 18] גְּדָר, a wall [see GEDER]; Sept. Γεδωρ, but 1 Chron. viii, 31 Γεδωρ, and 1 Chron. xii, 7 Γέγαρα; Vulg. *Gedor*), the name of one or two places, and also of a man.

1. An ancient city in the mountains of Judah (Josh. xv, 58), some of whose inhabitants joined David at Ziklag (1 Chron. xii, 7). It was probably this town to which "Josabab the *Gederathite*" (q. v.) belonged (1 Chron. xii, 4); as also "Jeroham of Gedor," whose sons Joelah and Zebadiah were among the mighty men that joined David in his difficulties at Ziklag (1 Chron. xii, 7); for it does not appear that all in that list were "Saul's brethren of Benjamin" (compare the terms "Haruphite," "Korhite," following). See HAREPH. The name has the definite article to it in this latter passage (גְּדוֹר־יְרֹחָם). The place was probably the same as the GEDER (q. v.) of the ancient Canaanites (Josh. xii, 13), rebuilt as BETI-GADER (q. v.) by Hareph (1 Chron. ii, 51), in conjunction with Penuel (1 Chron. iv, 4) and Jered (1 Chron. iv, 18). See MERED. It is doubtless the *Gibra* of the *Onomasticon*, between Jerusalem and Hebron. See GEDERAI. It is very doubtful (see below) whether this be the same Gedor in whose fertile valley the Simeonites found good pasture for their flocks (1 Chron. iv, 39), yet Reland regards them both as the same (*Palest.* p. 803). Dr. Robinson, travelling from Jerusalem to Gaza, came in sight of a place called *Jedür*, with ruins, on the brow of a mountain ridge, which he identifies with Gedor (*Researches*, ii, 338; also new ed. iii, 283). It was also recognised by M. De Saunay (*Narrative*, ii, 451); comp. Schwarz (*Palest.* p. 86) and Wilson (*Lands of Eble*, i, 386).

2. The above-named place (1 Chron. iv, 39) was originally inhabited by Hamites, and its fertility induced a predatory incursion and forcible occupation by a party of Simeonites. From this it would seem to have adjoined the territory of Simeon on the south; and a writer in the *Journal of Sacred Literature* (July, 1860, p. 318) suggests the solution that these aborigines were Philistines, the place itself being no other than GERAR (by the slight and frequent error in transcription of גְּדָר, which latter the Sept. appears to have actually read). Ewald had already adopted this emendation (*Gesch. Isr.* i, 332, note), although the term (גְּדָר, *wady*) elsewhere applied to Gerar (q. v.) is different from that here used (גְּדָר־יְרֹחָם, the valley).

3. A chief of the Benjamites (apparently of the house of Gibeon) resident at Jerusalem (1 Chron. viii, 31; ix, 37). B.C. 536 or ante.

**Gee, JOSUA**, a Congregational minister, was born at Boston in the year 1698. He graduated at Harvard in 1717, and was early regarded as a young man of promise. He accepted an invitation to settle as colleague of Cotton Mather, and was ordained December 18, 1723, Cotton Mather giving the charge. In this relation he continued till the close of his life. Mr. Gee distinguished himself by a vigorous and earnest defence of the great Whitfieldian revival. He cordially welcomed Whitfield to Boston, adopted in his own church the measures which Whitfield recommended, and opposed the action of a convention of Congregational ministers in 1743 which protested against his doings. Mr. Gee was an invalid during the latter part of his life, and was obliged to have an assistant. He died May 22, 1748. He published *A Sermon on the Death of Cotton Mather* (1728);—*Two Sermons on Luke xiii, 24* (1729);—*Letter to the Rev. Nathaniel Eelle, Moderator of the late Convention of Pastors at Boston* (1743).—Sprague, *Annals*, i, 312.

**Geffcken, JOHANNES**, a Lutheran clergyman of Germany, was born in 1803 at Hamburg. He became

in 1829 pastor of St. Michael's church, in his native city, and retained this position until his death, Oct. 2, 1865. He wrote a history of Semipelagianism (*Gesch. des Semipelagianismus*, Hamb. 1826); on the division of the Decalogue (*Ueber die verschiedene Einteilung des Dekalogus*, Hamb. 1838); on the picture catechism of the 15th century (*Ueber d. Bilderkatechismus, des 15<sup>ten</sup> Jahrhunderts*, Leipzig, 1855), and several other works.—*Allgem. Real-Encyclop.* s. v. (A. J. S.)

**Gegnæsius**, **TIMOTHEUS**, a leader of the Paulicians about A. D. 700. About this time "the sect was divided into two parties. The schism grew out of the antagonism betwixt a Catholic and a Protestant principle. Gegnæsius held that spiritual gifts were communicated by tradition, and connected with the regularity of succession. But his younger brother, Theodore, refused to acknowledge any such principle, maintaining that any such outward mediation was unessential, and that he had received the Spirit immediately from the same divine source with his father. Under the reign of Leo the Isaurian, new complaints were lodged against the Paulicians at Constantinople, and the emperor ordered Gegnæsius to appear at the capital and undergo a trial. The examination was committed to the patriarch, before whom Gegnæsius contrived to answer all the questions proposed to him respecting his orthodoxy in a satisfactory manner; attaching, however, quite a different sense from the true one to the formularies of Church orthodoxy. The patriarch asked him why he had left the Catholic Church? Gegnæsius replied that he had never entertained the remotest wish of forsaking the Catholic Church, within which alone salvation was to be found. But by the Catholic Church he meant only the Paulician communities, called, as they believed, to restore the Church of Christ to its primitive purity. The patriarch demanded why he refused to give the mother of God the reverence which was her due? Gegnæsius here pronounced the anathema himself on all who refused reverence to the mother of God—to her into whom Christ entered, and from whom he came—the mother of us all. But he meant the invisible, heavenly city of God, the celestial Jerusalem, mother of the divine life, for admission of the redeemed into which Christ had prepared the way by first entering it himself as their forerunner. He was asked why he did not pay homage to the cross? Gegnæsius here pronounced the anathema on all who refused to venerate the cross; but by this he understood Christ himself, called by that symbolical name. Furthermore, he was asked why he despised the body and blood of Christ? The reply to this also was satisfactory; but by the body and blood of Christ he was accustomed to understand the doctrines of Christ, in which he communicated himself. So also he answered the question respecting baptism; but by baptism he understood Christ himself, the living water, the water of life. This trial having been reported to the emperor, Gegnæsius received from his sovereign a letter of protection securing him against all further complaints and persecutions."—Neander, *Church History* (Torrey's transl.), iii, 249. See PAULICIANS.

**Gehazi** (Heb. *Geychazi*, גֵּחָזִי, as if for גֵּחָזִי; גֵּחָזִי, *valley of vision*; but, according to Fürst, *denier*, from an obsol. גֵּחָזִי; occasionally contracted *Gechazi*, גֵּחָזִי, 2 Kings iv, 31; v, 25; viii, 4, 5; Sept. Γαζό, the servant of Elisha, whose entire confidence he at first enjoyed. He personally appears first in reminding his master of the best mode of rewarding the kindness of the Shunammite (2 Kings iv, 14). B. C. 889. He was present at the interview in which the Shunammite made known to the prophet that her son was dead, and was sent forward to lay Elisha's staff on the child's face, which he did without effect (2 Kings iv, 31). B. C. cir. 887. The most remarkable incident in his career is that which caused his ruin. When Elisha,

with a noble disinterestedness, declined the rich gifts pressed upon him by the illustrious leper whom he had healed, Gehazi felt distressed that so favorable an opportunity of profiting by the gratitude of Naaman had been so wilfully thrown away. He therefore ran after the retiring chariots, and requested, in his master's name, a portion of the gifts which had before been refused, on the ground that visitors had just arrived for whom he was unable to provide. He asked a talent of silver and two dresses; and the grateful Syrian made him take two talents instead of one. Having deposited this spoil in a place of safety, he again appeared before Elisha, whose honor he had so seriously compromised. His master asked him where he had been, and on his answering, "Thy servant went no whither," the prophet put on the severities of a judge, and, having denounced his crime, passed upon him the terrible doom that the leprosy of which Naaman had been cured should cleave to him and his forever. "And he went forth from his presence a leper as white as snow" (2 Kings v, 20-27). B. C. cir. 885. The case is somewhat parallel with that of Ananias (q. v.) and Sapphira (Acts v). The rebuke inflicted on Gehazi, though severe, cannot justly be reckoned too hard for the occasion. He ought to have understood, from the determined rejection of Naaman's offers by Elisha, that there were important principles involved in the matter, which he should have been careful on no account, or by any movement on his part, to bring into suspicion. There was a great complication of wickedness in his conduct. He first arrogated to himself a superior discernment to that of the Lord's prophet; then he falsely employed the name of that prophet for a purpose which the prophet himself had expressly and most emphatically repudiated; further, as an excuse for aiming at such a purpose, he invented a plea of charity, which had no existence but in his own imagination; and, finally, on being interrogated by Elisha after his return whither he had gone, he endeavored to disguise his procedure by a lie, which was no sooner uttered than it was detected by the prophet. Such accumulated guilt obviously deserved some palpable token of the divine displeasure; the more so, as it tended to give a covetous aspect to the Lord's servant at a time when the very foundations were out of course, and when the true worshippers of God were called to sit loose to all earthly possessions. This, indeed, is the thought that is most distinctly brought out in the prophet's denunciation of Gehazi's conduct (ver. 26)—the false impression it was fitted to give of Elisha's position and character. See NAAMAN.

We afterwards find Gehazi recounting to king Joram the great deeds of Elisha, and, in the providence of God, it so happened that when he was relating the restoration to life of the Shunammite's son, the very woman with her son appeared before the king to claim her house and lands, which had been usurped while she had been absent abroad during the recent famine. Struck by the coincidence, the king immediately granted her application (2 Kings viii, 1-6). B. C. 876. Lepers were compelled to live apart outside the towns, and were not allowed to come too near to uninfected persons. See LEPROSY. Hence some difficulty has arisen with respect to Gehazi's interview with the king. Several answers occur. The interview may have taken place outside the town, in a garden or garden-house; and the king may have kept Gehazi at a distance, with the usual precautions which custom dictated. Some even suppose that the incident is misplaced, and actually occurred before Gehazi was smitten with leprosy. Others hasten to the opposite conclusion, and allege the probability that the leper had then repented of his crime, and had been restored to health by his master, a view which is somewhat corroborated by the fact that he is there still called "the servant of the man of God," from which it is supposed that the relationship between him and Elisha contin-

ued to subsist. — Kitto, s. v.; Fairbairn, s. v. See ELISHA.

**Gehēn'na** (Γέεννα, A. V. invariably "hell"), the Greek representative of גֵּהֶנְנוֹם, Josh. xv, 8; Neh. xi, 30 (rendered by the Sept. Γαέννα, Josh. xviii, 16); more fully, גֵּהֶנְנוֹם הַבְּרָזִי, or גֵּהֶנְנוֹם בְּרָזִי (2 Kings xxiii, 10; 2 Chron. xxviii, 3; xxxiii, 6; Jer. xix, 2), the "valley of Hinnom," or "of the son" or "children of Hinnom," a deep narrow glen to the south of Jerusalem, where, after the introduction of the worship of the fire-gods by Ahaz, the idolatrous Jews offered their children to Moloch (2 Chron. xxviii, 3; xxxiii, 6; Jer. vii, 31; xix, 2-6). In consequence of these abominations the valley was polluted by Josiah (2 Kings xxiii, 10); subsequently to which it became the common lay-stall of the city, where the dead bodies of criminals, and the carcases of animals, and every other kind of filth was cast, and, according to late and somewhat questionable authorities, the combustible portion consumed with fire. From the depth and narrowness of the gorge, and, perhaps, its ever-burning fires, as well as from its being the receptacle of all sorts of putrefying matter, and all that defiled the holy city, it became in later times the image of the place of everlasting punishment, "where their worm dieth not, and the fire is not quenched;" in which the Talmudists placed the mouth of hell: "There are two palm-trees in the valley of Hinnom, between which a smoke ariseth . . . and this is the door of Gehenna" (Talmud, quoted by Barclay, *City of Great King*, p. 90; Lightfoot, *Centur. Chorograph. Matt.* proem, ii, 200). The Mohammedans still use the term as the current designation of the infernal regions (see D'Herbelot, *Bibliothèque Orient.* s. v. Gehennem). In this sense the word is used by our Lord, Matt. v, 29, 30; x, 28; xxiii, 15, 33; Mark ix, 43, 45; Luke xii, 5; and with the addition *τοῦ πυρός*, Matt. v, 22; xviii, 9; Mark ix, 47; and by James, iii, 6. See HINNOM, VALLEY OF; TORNET; HELL.

**Geibel**, JOHANNES, a clergyman of the Reformed Church of Germany, was born April 1, 1776, at Hanau. After finishing his theological studies at the University of Marburg, he was for a short time tutor in a family at Copenhagen. In 1797 he was appointed vicar of the aged pastor of the Reformed church at Lubeck, and, when the latter died in 1798, Geibel became his successor. In his theological views Geibel had been influenced at first by Daub, Jacobi, and Schleiermacher, subsequently by the mysticism of Kerner and the peculiar tenets of the Darbyites; but gradually he conformed himself more fully to the Reformed Church, in which he found the best expression of apostolical simplicity and truth. His theology remained, however, always more Biblical than denominational. He gained a great reputation as a pulpit orator, and was regarded as one of the most successful champions of Biblical orthodoxy against Rationalism, which at that time prevailed in a large number of the Reformed churches of Germany. He severely criticised the Lutheran theses of Harms (q. v.), which he designated as obscure, one-sided, and dictatorial, and inspired with an injurious spirit of sectarianism. He published an "Introduction into the Christian Doctrine" (*Einleitung in die christliche Lehre*, 1821), and two "Guides to the Instruction in the Christian Doctrine" (*Leitfaden bei dem Unterrichte in der christl. Glaubenslehre*, 1822; and *Kurzer Leitfaden*, etc., 1825). He also wrote several pamphlets in defence of his son, pastor Karl Geibel, of Brunswick, who by his orthodox zeal had offended the rationalistic majority of his own congregation, and was censured by the Reformed Synod of Lower Saxony. Geibel declined several calls to other more lucrative positions, and remained in Lubeck until April 11, 1847, when he resigned. He died on the 25th of July, 1853. He is the father of the celebrated Ger-

man poet Geibel. — Herzog, *Real-Encyclopädie*, xix, 543. (A. J. S.)

**Geier**, MARTIN, D.D., a German theologian, was born at Leipzig in 1614, became court-preacher at Dresden in 1656, professor of theology at Leipsic in 1661, and died at Freiburg in 1680. Among his writings are commentaries on the Psalms, Proverbs, and Ecclesiastes, which, with some valuable theological treatises, are collected in his *Opera omnia que Latine edita sunt* (Amst. 1695, 2 vols. fol.). His commentary on the Psalms has been often published separately, and is still esteemed.

**Geiger, Franz Tiburtius**, a Roman Catholic theologian, was born at Harting, near Ratisbon, in 1755. He studied at first under the Jesuits, then joined the Franciscans at Lucerne in 1772, and after 1773 applied himself to the study of philosophy at Ratisbon, and of theology at Würzburg. He subsequently became professor of Hebrew at Ratisbon, of rhetoric at Offenburg, of philosophy at Freiburg, and afterwards in the Franciscan school of Solothurn, and finally, in 1792, professor of theology at Lucerne, whence he became a leader of ultramontaniam through Switzerland and Germany. This, however, made him many enemies, and in 1819 he was obliged to resign his position. He died May 8, 1843. A collection of his works has been published (Lucerne, 8 vols.). — Pierer, *Universal-Lexikon*, s. v. (J. N. P.)

**Geiger, Jacob**, a minister of the German Reformed Church, was born in Allentown, Lehigh County, Pa., Oct. 17, 1793. He began his studies with the Rev. Dr. J. C. Becker in Northampton County, Pa., in 1814, and subsequently completed them with the Rev. Dr. C. L. Becker in Baltimore, Md. He was licensed and ordained in 1816, and in 1817 took charge of congregations in and around Manchester, Md., and not far from Baltimore, in which he labored up to the time of his death, Oct. 19, 1848. He was a very successful minister, having baptized 2714 and confirmed 1668 during a ministry of thirty-one years. His charge at the time of his death numbered 1200 members. He preached only in the German language. (H. H.)

**Geiler von Kaisersberg**, an eminent preacher, was born March 16, 1445, at Schaffhausen, and was educated at the University of Freiburg, where he became bachelor in 1462, master in 1463, member of the faculty of philosophy in 1465, and dean in 1469. In 1470 he went to Basel, where he studied theology for five years, and was received as doctor in 1475. The following year he accepted the professorship of theology in Freiburg, and became also rector; but the bent of his genius led him to abandon a literary life, and devote himself to the pulpit. He was preacher of the cathedral of Strasburg until 1488, when he removed to Augsburg, but returned to Strasburg, where he remained until his death, March 10, 1510. As an earnest, powerful, and popular preacher, he had few rivals in that age. "His sermons, usually composed in Latin and delivered in German, are marked by great eloquence and earnestness; nor do they disdain the aids of wit, sarcasm, and ridicule. Vivid pictures of life, warmth of feeling, and a bold, even rough morality, are their leading characteristics. In fact, Geiler's ethical zeal often urged him to a pungency of satire hardly in keeping with modern views of the dignity of the pulpit, but quite congruous with the taste of his own age. His style is vigorous, free, and lively, and in many respects he may be regarded as a sort of predecessor of Abraham a Sancta-Clara" (Chambers, s. v.). The only work of his published during his lifetime was the *Oratio habita in synodo Argentinensi* (1482); he also edited the first collection of Gerson's Works (Strasb. 1488, 3 vols.). From his MSS. a large number of sermons were compiled and published after his death. Of these, the best known are his *Navicula sive speculum futuro-*

*rum* (Strasb. 1510, 1511, 1513), translated into German by Pauli, *D. Kaisersbergers Narrenschiff* (Strasb. 1520); there is also another translation (Basel, 1513). Of another of his works, *Das Schiff des Heils, dann der Seelen Paradies* (first edit.), a free translation into modern German has been published by H. Bone (Mentz, 1864). Many collections of his sermons have been published. See Von Ammon, *G.'s Leben, Lehren und Predigten* (Erl. 1826); Weick, *Johann G. von Kaisersberg, sein Leben u. seine Schriften*, etc. (Frankf. 1826, 3 vols.); Illgen's *Zeitschrift*, xxvii, 530; Höber, *Ueber G.'s Leben und Schriften* (1834); also in the French language, *Essai historique et littéraire sur la vie et les sermons de G.*, Strasburg, 1834, containing a selection from G.'s works); Kehrein, *Geschichte der katholischen Kanzelredtsamkeit d. Deutschen* (Ratisb. 1843, 2 vols.); Pierer, *Universals-Lexikon*, s. v.; Herzog, *Real-Encyclopädie*, iv, 714.

**Geissenhainer, Frederick Wilbono, D.D.**, was born June 26, 1771, at Mülheim, on the Ruhr. In early life he gave evidence of great intellectual precocity, and a wonderful facility in the acquisition of knowledge. He studied in the universities of Giessen and Göttingen, and in the latter institution became for a season *professor extraordinarius*. When he reached his twentieth year he applied for ministerial ordination, which, although usually withheld from all under twenty-five years of age, was granted to him as an honorable exception to the general rule, on account of his superior qualifications for the office. For nearly two years he preached in his native land, and then came to America in 1793. For fifteen years he labored in the Goschenhoppen and associated churches in Pennsylvania, and in 1808 removed to the city of New York as successor to Dr. Kunze. His health failing, he suspended for a time his ministerial labors, and repaired to Clearfield Co., Pa. Subsequently he resumed the pastoral work, and labored at the Trappe, Pottstown, Vincent, and other places. In 1822 he returned to New York. He died May 27, 1838, in the 67th year of his age, and the 47th of his ministry. Dr. Geissenhainer enjoyed the reputation of an eminent divine in the Lutheran Church. He possessed an intellect of the highest order, which had been brought under the influence of the most thorough culture. The Latin and Greek were as familiar to him as his native tongue. From the University of Pennsylvania he received the doctorate of divinity in 1826. His MS. lectures on Church History, on the Gospels, Epistles, and portions of the Old Testament, in the hands of surviving relatives, we trust, will yet be given to the Church. (M. L. S.)

**Geistweit, George**, a minister of the German Reformed Church, was born in the year 1761; licensed and ordained in 1794; became pastor of churches in Northumberland Co., Pa. His large field of labor lay on both sides of the Susquehanna, and along both its branches. He became pastor in York, Pa., May, 1804. By failing health he was compelled to resign and quit the active duties of the ministry in 1820. He died Nov. 11, 1831. He was a very useful man, in his old age highly venerable, and always greatly beloved for his childlike piety, well-tempered zeal, and amiable spirit. He preached only in the German language. (H. H.)

**Gelasius Cyzicenus** was son of a presbyter of Cyzicum. He flourished about A.D. 476. He compiled *A History of the Council of Nice*, put together without judgment, in three books, the last of which is lost. It was published under the title of *Gelasii Histor. Nicen.*, cura Rob. Balfour, Gr. et. Lat. (Paris, 1599, 8vo). It may be found also in Labbe, *Concilia*, vol. ii, and in Migne, *Patrologia Latina*, vol. lxxxv. See Dupin, *Ecc. Writers*, vol. iv; Fabricius, *Bibl. Græca*, vol. ix; Cave, *Hist. Lit. Ann.* 476.

**Gelasius of Cæsarea** was nephew of Cyril, bishop of Jerusalem, by whose influence he was made

bishop of Cæsarea perhaps about A.D. 370. Of his works there are extant only some fragments, explanatory of the Apostles' Creed and of the traditions of the Church. He died in 394. The accounts of him are obscure; some writers make two persons of the same name. See Fabricius, *Bibl. Græc.* vol. ix.

**Gelasius I.**, a pope and saint of the Roman Church, succeeded Felix III March 1, 492. He is one of the popes who contributed most to the extension of the temporal power of the see of Rome. He was the first to claim for the Papacy a complete independence of the emperors or from the synods in matters of faith. See his *Letter to Faustus* (Mansi, *Sacrorum Conciliorum nova et ampliss. collectio*, viii, 19), in which he argued that the pope has not only a right to decide all ecclesiastical questions, but that an appeal from such decision to any other tribunal is inadmissible; that the pope holds the first rank (*prima sedes*) in the Church, and councils derive their authority from his countenance and co-operation (*pro suo scilicet principatu*). "There are two powers," he wrote to the emperor, "who have sovereign rule over the world: the spiritual and the temporal authority; the sacred authority of the bishops is so much the greater, as on the day of judgment they must render an account of the actions of kings. You know, magnanimous emperor, that your dignity surpasses that of other princes of the earth; nevertheless, you are obliged to submit to the power of the ministers in sacred things, for it is to them you address yourself to know what are the sources of your safety, and the rules which you ought to follow in receiving the sacraments, and in disposing of religious things. The bishops persuade the people that God has given you a sovereign power over temporal things, and they cause them to submit to your laws. In return, you should obey, with entire submission, those who are destined to distribute to you the holy sacraments. If the faithful ought blindly to follow the orders of bishops who acquit themselves worthily in their functions, so much the more ought they to receive the decree of the pontiff of Rome, whom God has established as the first of his bishops, and whom the Church has always recognised as its supreme chief." The schism of the Eastern Church, which had already taken place, continued during his administration, notwithstanding the efforts he made in the Synod of Rome, 495, to heal the breach. He wrote on this controversy his *De duabus in Christo naturis aduersus Eutychen et Nestorium*. He is said to have written also the so-called *Decretum Gelsii de libris recipiendis et non recipiendis*, which is a list of the scriptural books, etc., considered authentic and unauthentic by another synod, which he held at Rome in 496, but this work was probably compiled in the 6th century. Among the minor works ascribed to Gelasius are a *Liber sacramentorum*, published by Jos. Maria Thomasius (Rome, 1680), and a number of letters. He died in Rome Nov. 19, 496. See Schröckh, *Kirchen-gesch.* (xvii, 181 sq.); Regenbrecht, *de canonibus Apostolorum et codice Eccl. hispanæ Diss.* (Vratisl. 1828).—Herzog, *Real-Encyclop.* iv, 761; Bower, *History of the Popes*, ii, 216 sq.

**Gelasius II.**, Pope (JOHN OF GAETA), studied theology at Monte Casino, ascended gradually to the higher degrees of the Roman hierarchy, and was finally elected pope in 1118, as successor of Pascal II. The emperor Henry V, dissatisfied with this election, took upon himself to appoint another pope, under the name of Gregory VIII; and one of his generals took Gelasius prisoner, but was obliged to release him. Gelasius then went to Gaeta, where he was ordained, and afterwards to Capua, where he called a council, and excommunicated both Gregory VIII and Henry V. He finally retired to France, where he died in the convent of Cluny, Jan. 29, 1119. See Muratori, *Scriptores Rerum Italicarum*, iii, 367; Mansi, xxi, 162.—Hoefler, *Nouv. Biog. Gén.* xix, 819; Bower, *Hist. of Popes*, vi, 1.

**Geldenhaur**, GERARD (*Gerardus Noxiomagus*, *Gerard of Nimeguen*), an eminent German writer, was born in 1422 at Nimeguen, and educated at Louvain and at Deventer, where he had for his instructor Alexander Hegius, the preceptor of Erasmus. In 1517 his skill in Latin versification obtained for him the laurel crown from the emperor Maximilian I. He afterwards became chaplain and secretary to Philip of Burgundy, bishop of Utrecht. He was sent to Wittemberg in 1526 to visit the schools and Church, and found that he "could not oppose a doctrine so consonant with that of the prophets and apostles" as that of Luther. He renounced popery, and retired towards the Upper Rhine, where, at Worms, he married, and became a school-master. Afterwards he was called to Augsburg, and eventually became professor, first of history, and then of theology, at Marburg. Erasmus, who at one time was his friend, attacked him violently on his secession to Lutheranism. Geldenhaur died of the plague in 1542. He wrote *Historia Batavica:—Historie sue Etatis*, lib. vii.;—*Descriptio Insule Batavorum:—Catalogus Episcoporum Ultrajectinorum:—Epistola Zelandica:—De Viris illustribus Inferioris Germaniæ*, and several controversial pieces.—Hook, *Eccles. Litig.* v, 285; Bayle, *Dictionary* (London, 1736), iii, 145.

**Gel'ilôth** (Heb. *Gelilôth*, גְּלִילוֹתַי, *circuits* [see below]; Sept. Γαλιλάζ, Vulg. *tumulii*), the name of a place on the boundary of Judah and Benjamin, between En-Shemesh and the ascent to Adummim (Josh. xviii, 17); apparently another form of the GILGAL (q. v.) of the parallel passage (Josh. xv, 7).

The same word is distinctively used (see Stanley, *Sinai and Pal.* Append. § 23) five times in the original: twice with reference to the *precincts* of the Philistine heptarchy ("borders of the Philistines," Josh. xiii, 2; "coasts of Palestine," Joel iii [iv], 4); twice to the *circle* [see CICCARE] of the Jordan ("borders," Josh. xxi, 10, 11); and once (in the sing.) to the *district* sloping easterly towards the Dead Sea ("country," Ezek. xlvi, 8). Its derivation (from גְּלִיל, to *roll*) connects it with that of *Gal'lee* (q. v.), with which the versions sometimes confound it. See TOPOGRAPHICAL TERMS.

**Gell**, ROBERT, D.D., an English divine, who was rector of St. Mary Aldermanbury, London, and chaplain to the archbishop of Canterbury. His "*Remains* contain much ingenious and solid criticism." They are commended by John Wesley, and also by Charles Wesley, who took from them some hints for hymns. He died in 1655. We have from him *Sermons* (London, 1650, 4to);—*Sermons* (1654, 4to);—*Essays towards the Amendment of the English Trans. of the Bible* (1659, fol);—*Remains, or select Script. of the New Test.* (1676, 2 vols. fol.).—Darling, *Cycloped. Bibliographica*, i, 1230; Allibone, *Dictionary of Authors*, i, 638; Wesley, *Works* (N. Y. ed.), vii, 601.

**Gellatly**, ALEXANDER, a minister of the Associate Church, was born in Perth, Scotland, in 1720. In 1752 he became a student of theology in connection with the Antiburgher Synod of Scotland. By that synod he was sent out in 1753 as a missionary to the inhabitants of the eastern counties of Pennsylvania, who were chiefly emigrants from Scotland and Ireland. He was accompanied by the Rev. Andrew Arnot, and together they formed themselves into a Presbytery, under the name of the Associate Presbytery of Pennsylvania. They soon became obnoxious to the Presbyterians who had occupied the ground before them, and who issued a series of publications against them, which were answered by Mr. Gellatly and others. Mr. Gellatly was settled first at Middle Octorara, Lancaster County, and then at Oxford, Chester County, Pa., where he labored with great diligence during the remainder of his life. He died March 12, 1761. He was a man of vigorous intellect, and an

earnest, faithful minister of the Gospel.—Sprague, *Annals of Am. Pulpit*, ix (*Associate*), 1.

**Gellert**, CHRISTIAN FÜRCHTEGOTT, a German poet and hymn writer, was born July 4, 1715, in Hainichen, Saxony, and studied philosophy and theology at Leipzig. In 1744 he was made *privat docent*, and in 1751 professor extraordinary of philosophy in the University of Leipzig. He became professor *ordinarius* in 1761, and died Dec. 13, 1769, after gaining the high esteem of Frederick the Great. His *fables* have never been surpassed in German literature, and his narrations and moral essays occupy a creditable place in German literature, while his *comedies* are forgotten. He also composed some fifty-four hymns, which will give him a more enduring reputation than all his other writings. A translation of his hymn *Jesus lebt, mit ihm auch ich*, is given in Schaff's *Christ in Song*, p. 275. "In order to understand Gellert's position as spiritual song-writer, we must consider him with reference to his age. The *spirit* which was the basis of the old songs of Germany had altogether departed. Gellert's songs were so fully the expression of his pious inner nature that they found a hearty response in the breasts of many kindred natures. 'Never did he attempt a spiritual poem,' his biographer, Cramer, informs us, 'without carefully preparing himself, and striving with all his soul to experience previously the truth of his utterances. He then chose his most ecstatic moments for composition, and as soon as his ardor cooled he laid aside his pen until the golden moments came again. . . . Even among Roman Catholic circles Gellert's songs found a welcome reception. A country priest in the mountains of Bohemia had been so impressed by them that he wrote to Gellert and urged him to join the Catholic Church, since this Church could much better reward his good works than the Protestants were able to do. Also in Milan, Vienna, and other great Catholic cities, Gellert found many warm admirers. There can be more purely *Christian* songs than Gellert's; songs that would be the evidences of recent improvement in our language and literature, and might partake of more of the old fire of reformative times, or bear the romantic coloring of mysticism or recent orthodoxy; but all these perfections could not supply the place of the simple, glowing language of a Gellert, which was his expression of inner, self-experienced truth. Gellert will long remain the poet of our masses. By the agency of pious mothers he will long continue to plant the seeds of virtue in the hearts of tender youth; and where the later tendencies have not obliterated the old German method of domestic training, he will continue to save many a young man from the ways of sin. He will still console the sick and broken-hearted. And though but few of his songs have been reserved for use in our churches, even these few—for instance, the Easter song, *Jesus lives, and I live with him*—will continue to elevate our Christian congregations, and help them to gain the victory over the world. Gellert has not only influenced one generation by his songs, but has deeply affected succeeding ones. That humble man wished no higher honor than the salutation of any one whom he met, "You have saved my soul—you!" But in the coming world of bliss there will thousands meet him who on earth would have gladly done what the Prussian sergeant did, walk five miles to press the hand of the man who had saved his soul" (Hagenbach, *Recent Church History*, translated by J. F. Hurst). Among his works are, *Fabeln und Erzählungen* (Lpz. 1746);—*Geistliche Oden u. Lieder* (Lpz. 1757);—*Moralische Vorlesungen* (Schlegel and Hoyer, 1 pz. 1770);—*Sämmtliche Schriften* (Lpz. 1769-74, 10 vols.; 1840-41, 6 vols.; and 1853, 6 vols.). See J. C. Cramer, *Lebensbeschreibung* (Lpz.: 1774); H. Döring, *Lebensbeschreibung* (Greiz, 1833, 2 vols.); Eck, *Gellert's Empfehlung* (Lpz. 1770); F. Naumann, *Gellertbuch* (Dresd. 1854); Pierer, *Univ. Lex.* s. v.

**Gelmon.** See GILOH.

**Gem** (קָמָרִים or קָמָרִים, usually "precious stone"). The Hebrews, among whom, as among all Asiatic nations (see especially Heeren, *Jden*, I, i, 118 sq.), gems constituted an essential and highly-prized ornament of kings (2 Sam. xii, 30; Ezek. xxviii, 13), of the high-priest (Exod. xxviii, 17), and of distinguished persons generally (Judith, x, 21; xv, 15), especially when set in rings (Cant. v, 15), derived them chiefly from Arabia (see Ezek. xxvii, 22; 1 Kings x, 2) and India, by the overland as well as maritime traffic of the Phœnicians (Ezek. i. c.). In the time of Solomon they procured them themselves directly from Ophir (1 Kings x, 10 sq.). The art of cutting (engraving letters) and setting them was a highly respectable vocation (Exod. xxxv, 33). In the Bible (especially Exod. xxviii, 17 sq.; xxxix, 10 sq.; Ezek. xxviii, 13; Rev. xxi, 19 sq.) the following names and kinds of gems chiefly occur (comp. Josephus, *Ant.* iii, 7, 6; *War*, v, 5, 7; Epiphani. *Opp.* ii, 225; see Hiller, *Syntagn. hermen.* p. 83 sq.; De Dieu, on Exod. xxviii; Braun, *De vestit. sacerdot.* Hebr. II, viii, p. 497 sq.; Hartmann, *Hebräerinn.* i, 278 sq.; iii, 27 sq.; Bellermann, *Urim und Thummim*, p. 32 sq.; Eichhorn, *De gemmis sculptis Hebr.* in the *Commentat. Soc. Gotting.* rec. ii; Rosenmüller, *Alt. terth.* IV, i, 28 sq.; Wetstein, *A. T.* ii, 844 sq.). See ENGRAVING.

1. *O' dem*, קָמָרִים (Exod. xxviii, 17; xxxix, 10), according to the Sept. and Vulg., the *Sardius* (compare Rev. xxi, 20), i. e. *carneolium*, a well-known, mostly flesh-colored, semi-transparent gem, akin to the chalcedony, valued for its hardness, which, however, did not render it incapable of being cut. The most beautiful specimens come from Arabia (Niebuhr, *Beschr.* p. 142). Josephus (*War*, v, 5, 7) assigns the above meaning to the word; but elsewhere (*Ant.* l. c.) he calls it the *sardonyx*. (For other significations, see Gesenius, *Thes. Heb.* p. 26.) See SARDIUS.

2. *Pitdah'*, קָמָרִים (Exod. i. c.; Ezek. xxviii, 13; Job xxviii, 19), according to most of the versions, the *Topaz*, τὸπάζιον (Josephus τὸπάζιον), described by the Greeks as a gold-yellow stone (Strabo, xvi, 770; Diod. Siculus, iii, 39), although Pliny (xxvii, 32) assigns it a green color. Hence moderns have regarded the topaz of the ancients as our *chrysolite*. The passage in Job describes the mineral in question as coming from Cush, and Pliny (vi, 34) mentions a topaz-island in the Red Sea (comp. Diod. Sic. l. c.). The topaz now so called is a transparent, chiefly wine-colored or citron-yellow stone of the silicious species (Hoffmann, *Mineral.* i, 557 sq.; comp. Pareau, *Comment.* ad Job xxviii, p. 333 sq.). See TOPAZ.

3. *Bare'keth*, קָמָרִים (Exod. xxviii, 17; xxxix, 10; Ezek. xxviii, 13), according to the Sept., Vulg., and Josephus, the *Emerald* (Rev. xxi, 19; Tobit xiii, 21, etc.), grass-green, very hard, transparent, with double refraction (Pliny, xxxvii, 16 sq.). The Hebrews obtained this stone almost entirely from Egypt (Pliny, l. c.; comp. Braun, *Vestit.* p. 517 sq.; yet see Theophr. *Lapid.* xxiv). See CARBUNCLE.

4. *No'phet*, קָמָרִים (Exod. xxxix, 11; Ezek. xxvii, 16; xxviii, 13), according to the Sept. and Josephus, the *av'paz*, i. e. *Carbuncle*. By this name the ancients (Theophr. *Lapid.* xviii sq.; Pliny, xxxvii, 25) mostly designate red (like glowing coals) brilliant stones ("a similitudine ignium appellati," Pliny, l. c.), as rubies and garnets. But their most valued carbuncles appear to have been the Oriental or Indian rubies. They were engraved (Theophr. *Lapid.* xxi; comp. Eichhorn, *ut sup.* p. 12), which is also the case with the ruby, although they had a great degree of hardness—not greater, however, than the sapphire, which was likewise engraved. See EMERALD.

5. *Sappir'*, קָמָרִים (Exod. xxiv, 10; xxviii, 18; xxxix, 11; Ezek. xxviii, 13), σάπφειρος. Our *Sap-*

*phire* is sky blue (comp. Ezek. i, 26; Exod. xxiv, 10), transparent, and harder than the ruby. What the ancients so named must, according to the description (Pliny, xxxvii, 39; Theophr. *Lapid.* xxiii, xxxvii), be the *lapis lazuli*, azure-stone (Beckmann, *Erftw.* 111, i, 182 sq.). This is opaque, often shading into dark blue (violet), and sometimes has gold-colored quartzose spots (Hoffmann, *Mineral.* ii, 276 sq.; comp. i, 548). But as this stone is not so costly as to be justly estimated, as in Job xxviii, 16, nor possessed of sufficient hardness ("inutile sculptura," Pliny, l. c.) to correspond with its use in Exod. xxviii, it is probable that the Heb. term denotes the true sapphire, which occurs in notices of ancient gems. See SAPPHIRE.

6. *Yahalom'*, קָמָרִים (Exod. xxxix, 11; Ezek. xxviii, 13), by which most of the ancient versions and Josephus appear (if we can trace the order of the gems enumerated, see Bellermann, *ut sup.* p. 47) to understand the *Onyx* (Luther, with some of the Rabbins, the *Diamond*), a kind of *chalcedony*, in resembling the human nail with the flesh showing through. The simply so-called onyx (of the ancients) has milk-white or brown streaks, and is non-transparent, but takes on, when polished, a mirror-like lustre (Pliny, xxxvi, 12; xxxvii, 24). Eichhorn understands the *Beryl*. See DIAMOND.

7. *Le'shem*, קָמָרִים (Exod. xxviii, 19; xxxix, 12), Sept., Josephus, Vulg. *λεγιόνιον* (figure) or *λεγιόνιον*, i. e. *Jacinth* (as in Rev. xxi, 20), a transparent, hard, usually hyacinthine stone, but sometimes shading into yellow or brown. In the fire it loses its color. Many ancient cut specimens are still extant. See LIGURE.

8. *Shebo'*, קָמָרִים (Exod. xxviii, 19; xxxix, 12), Sept., Vulg., and Josephus *Agate* (ἀγάθης), a mixed sort of stone, consisting of quartz, chalcedony, carnelian, flint, jasper, and so forth, so that two kinds are usually compounded; hence agates have all possible ground-colors, with numerous streaks, spots, and even figures. The Oriental are finer than the European. In high antiquity they were very valuable, but later their value sank considerably (see Pliny, xxxvii, 54; Hoffmann, *Mineral.* i, 123 sq.). See AGATE.

9. *Achlamah'*, קָמָרִים (Exod. xxviii, 19), Sept., Vulg., *Amethyst* (ἀμύθυστος; comp. Rev. xxi, 20), a transparent, mostly violet-blue stone, usually found in a six-sided crystalline form, but sometimes pebble-shaped. The ancients prized it highly, especially the specimens from India. But Arabia and Syria also afforded amethysts (Pliny, xxxvii, 40). As the Greek name points to a superstitious attribute of the stone (dispelling intoxication; see Harduin, *ad Plin.* ii, 783), so the Heb. designation refers to another property (q. d. "dream-stone;" see Simonis, *Lex.* p. 331). See AMETHYST.

10. *Tarshish'*, קָמָרִים (Exod. xxviii, 20; xxxix, 13; Ezek. i, 16; Dan. x, 6, etc.), according to the Sept. (in the Pentat.) and Josephus (comp. Rev. xxi, 20), the *Chrysolite* (χρυσόλιθος). The stone now so called is generally found crystallized, and is of a pale green color, wholly transparent, with double refraction. According to Pliny (xxxvii, 42), the ancients appear to have had a yellow stone called the *chrysolite*, which would seem to have been our *topaz* (but compare Bellermann, *ut sup.* p. 62). Bredow (*Histor. Untersuch.* p. 295) would take the *tarshish* to be *amber*, as the name probably came from the place so called [see TARSHISH], whence the Phœnicians imported it; a not altogether unlikely view, inasmuch as *electrum* was well known in earliest antiquity, was highly prized, and bore an excellent polish (Pliny, xxxvii, 11). Nevertheless, the authority of the ancient versions must here prevail; and when our attention is once directed by the name to Spain, the statement of Pliny (xxxvii, 43) makes it clear that the *chrysolite* was also produced there. See BERYL.

11. *Sho'ham*, קָמָרִים (Gen. ii, 12; Exod. xxviii, 9;

Ezek. xxviii, 13; Job xxviii, 16, etc.), according to the Sept., Vulg., and most others, as well as Josephus (*Jar.*, nt sup.), the *Beryl* (Rev. xxi, 20), a pale green gem, passing at times into water-blue, at others into yellow, with a hexagonal crystallization, streaked longitudinally. The most esteemed specimens came from India (but comp. Dionys., *Perieg.* 1012), and were of a clear sea-green (Pliny, xxxvii, 20; see Hoffmann, *Mineral.* i, 601 sq.). The *chrysoprase* (λίθος ὁ παράστρος), which the Sept. has in the passage in Gen for *shoham*, may be the *beryl*. Many versions (with Braun, Michaelis, Eichhorn, Pareau, Ewald, and others) understand the *onyx* (see Huec, *De situ paradisi*, c. 11). Reland (following the Sept. in Exod. xxviii, 9, 20) holds it to be *emerald*, on the ground that Havilah (q. v.) was a part of Scythia, whence emeralds were obtained (Pliny, xxxvii, 16 and 17). See ONYX.

12. *Yashepheh'*, יַשְׁפֵּה or יַשְׁפֵּה (Exod. xxviii, 20; xxxix, 13; Ezek. xxviii, 13), according to the Sept., Vulg., and Josephus, the *Jasper* (comp. Rev. xxi, 19), a well-known opaque stone, sometimes of one, at others of many colors, of a shelly, compact fracture, granulous texture, often wrought by the ancients into gems and ornaments (Pliny, xxxvii, 37; comp. Fuller, *Miscell.* vi, 8). See JASPER.

13. *Kalkol'*, כַּלְכֹל (Ezek. xxvii, 16; Isa. liv, 12), and

14. *Ekdah'*, עֲדָה (Isa. ib.); both a red (fiery), brilliant, costly stone, like the ruby, garnet, etc. (see Hartmann, *Hebräer.* iii, 91 sq.). The ancient versions give no definite clew to the identity (see Gesenius, *Thees.* p. 600). See AGATE; CARUNCLE.

15. *Chrysoprase*, χρυσόπρασος (Rev. xxi, 20), a pale green stone, inclining to yellow or brown, and transparent (Pliny, xxxvii, 20). See CHRYSOPRASUS.

16. *Chalcedony*, χαλκιδών (Rev. xxi, 16), semi-transparent, sky-blue, with a dash of other colors (compare No. 8 above). See CHALCEDONY.

17. *Sardonyx*, σαρδόνυξ (Rev. xxi, 20), a mixture of the agate and carnelian (comp. No. 6 above), very highly valued by the ancients (Pliny, xxxvii, 23). See SARDONYX.

18. *Shamir'*, שָׁמִיר (Jer. xvii, 1; Ezek. iii, 9; Zech. vii, 12), according to the Sept. (in Jer.) and Vulg., the *Diamond*, the hardest of minerals (Pliny, xxxvii, 15), hence compared with adamant (Pinder, *De adamante*, Berl. 1829). Bochart (*Nieroz.* iii, 843 sq.) compares the *σμίρις* or *σμίρις* (σμιρτίτης λίθος, Job xli, 7 or 15, Sept.; comp. Veltheim in Velthusen's *Theolog. Magaz.* ii, 219 sq.), or *emery* (Diosc. v, 160), a quartzose earth mixed with calcined iron, used for polishing (Hoffmann, *Mineral.* i, 561 sq.); but the origin of this Greek word is not Shemitic (see Passow, s. v.).—Winer, i, 281. See DIAMOND.

See generally Pliny, *Hist. Nat.* xxxvii, 14 sq.; Theophrastus, *Ἡσίο λίθων* (in *Opp.* iv, ed. Schneider); Rau, *Specim. e libris Achemed de gemmis* (Utr. 1784); Dutens, *Pierres précieuses* (Par. 1776. Lond. 1777); Mariette, *Pierres gravées* (Par. 1750); Blum, *Taschenbuch d. Edelsteink.* (2d ed. Stuttg. 1835); Hindmarsh, *Precious Stones of Scripture* (Lond. 1851); Anon. *Gems, ancient and modern* (Lond. 1852); King, *Antique Gems* (Lond. 1861); Thomson, *Land and Book*, i, 437 sq. See MINERALOGY.

**Gemal'li** (Hebrew *Genallí'*, גִּמְלָלִי, camel-driver; Sept. Γαμάλι), the father of Ammiel, which latter was the Danite messenger among those who explored the land of Canaan (Numb. xiii, 12). B.C. ante 1657.

**Gemará.** See TALMUD.

**Gemari'ah** (Heb. *Gemaryah'*, גִּמְרִיָּה [Jer. xxix, 3], and in its prolonged form, *Gemarya'hu*, גִּמְרִיָּהּ, whom *Jehozah has made perfect*; Sept. Γαμαριάς), the name of two men.

1. The son of Shaphan, one of the nobles of Judah, and a scribe of the Temple in the time of Jehoiakim. B.C. 605. Baruch read aloud the prophecies of Jeremiah to the people at the official chamber of Gemariah (or from a window in it), which was attached to the new gate of the Temple built by king Jotham (Jer. xxxvi, 10; comp. 2 Kings xv, 35). Gemariah's son Michaiah having reported this to his father, Baruch was invited to repeat the reading at the scribe's chamber in the palace, before Gemariah and other scribes and councillors, who gave an account of the matter to the king (Jer. xxxvi, 11-20). Gemariah, with the other princes, heard the divine message with terror, but without a sign of repentance; though Gemariah joined two others in entreating king Jehoiakim to forbear destroying the roll which they had taken from Baruch (Jer. xxxvi, 21-25). See JEREMIAH.

2. The son of Hilkiah, who, with Elash, son of Shaphan, was sent to Babylon by king Zedekiah with his tribute-money for Nebuchadnezzar. He also took charge of a letter from Jeremiah to the Jewish captives at Babylon, warning them against the false prophets who deluded them by promises of a speedy return to their own land (Jer. xxix, 3, 4). B.C. 594. See JEREMIAH.

**Gems.** See GEM.

**Gená.** See GINA.

**Genealogy** (Γενεαλογία), literally the act or art of the γενεαλόγος, i. e. of him who treats of birth and family, and reckons descents and generations. Hence, by an easy transition, it is often (like *ιστορία*) used of the document itself in which such series of generations is set down. In Hebrew the term for a genealogy or pedigree is סֵפֶר הַיְהוּדָה, or סֵפֶר הַיְהוּדִים, "the book of the generations;" and because the oldest histories were usually drawn up on a genealogical basis, the expression is often extended to the whole history, as in the case of the Gospel of Matthew, where "the book of the generation of Jesus Christ" includes the whole history contained in that gospel. So Gen. ii, 4, "These are the generations of the heavens and of the earth," seems to be the title of the history which follows. Gen. v, i; vi, 9; x, 1; xi, 10, 27; xxv, 12, 19; xxxvi, 1, 9; xxxvii, 2, are other examples of the same usage, and these passages seem to mark the existence of separate histories from which the book of Genesis was compiled. Nor is this genealogical form of history peculiar to the Hebrews or the Shemitic races. The earliest Greek histories were also genealogies. Thus the histories of Acusilaus of Argos and of Hecataeus of Miletus were entitled *Γενεαλογίαι*, and the fragments remaining of Xanthus, Charon of Lampascus, and Hellanicus are strongly tinged with the same genealogical element (comp. Josephus, *Apion*, i, 3), which is not lost even in the pages of Herodotus. The frequent use of the patronymic in Greek, the stories of particular races, as Heraclides, Alcmaeonidae, etc., the lists of priests, and kings, and conquerors at the games, preserved at Elis, Sparta, Olympia, and elsewhere; the hereditary monarchies and priesthoods, as of the Branchidae, Eumolpidae, etc., in so many cities in Greece and Greek Asia; the division, as old as Homer, into tribes, fratricae, and γέννη, and the existence of the *tribe*, the *gens*, and the *familia* among the Romans; the Celtic clans, the Saxon families using a common patronymic, and their royal genealogies running back to the Teutonic gods, these are among the many instances that may be cited to prove the strong family and genealogical instinct of the ancient world. Coming nearer to the Israelites, it will be enough to allude to the hereditary principle, and the vast genealogical records of the Egyptians, as regards their kings and priests, and to the passion for genealogies among the Arabs, mentioned by Layard and others, in order to show that the attention paid by the Jews to genealogies is in entire accordance with the manners and tendencies of their contemporaries.

In their case, however, it was heightened by several peculiar circumstances. The promise of the land of Canaan to the seed of Abraham, Isaac, and Jacob successively, and the separation of the Israelites from the Gentile world; the expectation of the Messiah as to spring from the tribe of Judah; the exclusively hereditary priesthood of Aaron with its dignity and emoluments; the long succession of kings in the line of David; and the whole division and occupation of the land upon genealogical principles by the tribes, families, and houses of fathers, gave a deeper importance to the science of genealogy among the Jews than perhaps in any other nation. We have already noted the evidence of the existence of family memoirs even before the flood, to which we are probably indebted for the genealogies in Gen. iv, v; and Gen. x, xi, etc., indicate the continuance of the same system in the times between the flood and Abraham. But with Jacob, the founder of the nation, the system of reckoning by genealogies (הַיְהוּדָה, or in the language of Moses, Numb. i, 18, הַיְהוּדָה) was much further developed. In Gen. xxxv, 22-26, we have a formal account of the sons of Jacob, the patriarchs of the nation, repeated in Exod. i, 1-5. In Gen. xlvi we have an exact genealogical census of the house of Israel about the time of Jacob's demise in Egypt. The way in which the former part of this census, relating to Reuben and Simeon, is quoted in Exod. vi, where the census of the tribe of Levi is all that was wanted, seems to show that it was transcribed from an existing document. When the Israelites were in the wilderness of Sinai, in the second month of the second year of the Exodus, their number was taken by divine command, "after their families, by the house of their fathers," tribe by tribe, and the number of each tribe is given "by their generations, after their families, by the house of their fathers, according to the number of the names, by their polls" (Numb. i, iii). This census was repeated 38 years afterwards, and the names of the families added, as we find in Numb. xxvi. According to these genealogical divisions they pitched their tents, and marched, and offered their gifts and offerings, and chose the spies. According to the same they cast the lots by which the troubler of Israel, Achan, was discovered, as later those by which Saul was called to the throne. Above all, according to these divisions, the whole land of Canaan was parcelled out amongst them. But now of necessity that took place which always has taken place with respect to such genealogical arrangements, viz. that by marriage, or servitude, or incorporation as friends and allies, persons not strictly belonging by birth to such or such a family or tribe, were yet reckoned in the census as belonging to them, when they had acquired property within their borders, and were liable to the various services in peace or war which were performed under the heads of such tribes and families. Nobody supposes that all the Cornelii, or all the Campbells, sprang from one ancestor, and it is in the teeth of direct evidence from Scripture, as well as of probability, to suppose that the Jewish tribes contained absolutely none but such as were descended from the twelve patriarchs. (Jul. Africanus, in his *Ep. to Aristides*, expressly mentions that the ancient genealogical records at Jerusalem included those who were descended from proselytes and *γεῖνῶται*, as well as those who sprang from the patriarchs. The registers in Ezra and Nehemiah include the Nethinim, and the children of Solomon's servants.) The tribe of Levi was probably the only one which had no admixture of foreign blood. In many of the Scripture genealogies, as e. g. those of Caleb, Joab, Segub, and the sons of Rephaiah, etc., in 1 Chron. iii, 21, it is quite clear that birth was not the ground of their incorporation into their respective tribes. See BECHER; CALEB. However, birth was, and continued to be throughout their whole national course, the foundation of all the Jewish organization, and the

reigns of the more active and able kings and rulers were marked by attention to genealogical operations. When David established the Temple services on the footing which continued till the time of Christ, he divided the priests and Levites into courses and companies, each under the family chief. The singers, the porters, the trumpeters, the players on instruments, were all thus genealogically distributed. In the active stirring reign of Rehoboam, we have the work of Iddo concerning genealogies (2 Chron. xii, 15). When Hezekiah reopened the Temple, and restored the Temple services which had fallen into disuse, he reckoned the whole nation by genealogies. This appears from the fact of many of the genealogies in Chronicles terminating in Hezekiah's reign, from the expression, "So all Israel were reckoned by genealogies" (1 Chron. ix, 1), immediately following genealogies which do so terminate, and from the narrative in 2 Chron. xxxi, 16-19, proving that, as regards the priests and Levites, such a complete census was taken by Hezekiah. It is indicated also in 1 Chron. iv, 41. We learn, too, incidentally from Prov. xxv, that Hezekiah had a staff of scribes, who would be equally useful in transcribing genealogical registers as in copying out Proverbs. So also in the reign of Jotham, king of Judah, who, among other great works, built the higher gate of the house of the Lord (2 Kings xv, 35), and was an energetic as well as a good king, we find a genealogical reckoning of the Reubenites (1 Chron. v, 17), probably in connection with Jotham's wars against the Ammonites (2 Chron. xxvii, 5). When Zerubbabel brought back the captivity from Babylon, one of his first cares seems to have been to take a census of those that returned, and to settle them according to their genealogies. The evidence of this is found in 1 Chron. ix, and the duplicate passage Neh. xi; in 1 Chron. iii, 19; and yet more distinctly in Neh. vii, 5, and xii. In like manner, Nehemiah, as an essential part of that national restoration which he labored so zealously to promote, gathered "together the nobles, and the rulers, and the people, that they might be reckoned by genealogy" (Neh. vii, 5; xii, 26). The abstract of this census is preserved in Ezra ii and Neh. vii, and a portion of it in 1 Chron. iii, 21-24. That this system was continued after their times, as far at least as the priests and Levites were concerned, we learn from Neh. xii, 22; and we have incidental evidence of the continued care of the Jews still later to preserve their genealogies in such passages of the apocryphal books as 1 Macc. ii, 1-5; viii, 17; xiv, 29, and perhaps Judith viii, 1; Tob. i, 1, etc. Passing on to the time of the birth of Christ, we have a striking incidental proof of the continuance of the Jewish genealogical economy in the fact that when Augustus ordered the census of the empire to be taken, the Jews in the province of Syria immediately went each one to his own city, i. e. (as is clear from Joseph going to Bethlehem, the city of David), to the city to which his tribe, family, and father's house belonged. Thus the return, if completed, doubtless exhibited the form of the old censuses taken by the kings of Israel and Judah.

Another proof is the existence of our Lord's genealogy in two forms, as given by Matthew and Luke. (See below.) The mention of Zacharias as "of the course of Abia," of Elizabeth as "of the daughters of Aaron," and of Anna, the daughter of Phanel, as "of the tribe of Aser," are further indications of the same thing (Luke i, 5; ii, 36). This conclusion is also expressly confirmed by the testimony of Josephus in the opening of his *Life*, § 1. There, after deducing his own descent, "not only from that race which is considered the noblest among the Jews, that of the priests, but from the first of the twenty-four courses" (the course of Jehoiarib), and on the mother's side from the Asmonæan sovereigns, he adds, "I have thus traced my genealogy as I have found it recorded in the public tables" (*ἐν ταῖς δημοσίαις δέλτοις ἀναγεγραμμένην*); and

again, *contr. Apion*, i, 7, he states that the priests were obliged to verify the descent of their intended wives by reference to the archives kept at Jerusalem; adding that it was the duty of the priests, after every war (and he specifies the wars of Antiochus Epiph., Pompey, and Q. Varus), to make new genealogical tables from the old ones, and to ascertain what women among the priestly families had been made prisoners, as all such were deemed improper to be wives of priests. As a proof of the care of the Jews in such matters, he further mentions that in his day the list of successive high-priests preserved in the public records extended through a period of 2000 years. From all this it is abundantly manifest that the Jewish genealogical records continued to be kept till near the destruction of Jerusalem. Hence we are constrained to disbelieve the story told by Africanus concerning the destruction of all the Jewish genealogies by Herod the Great, in order to conceal the ignobleness of his own origin. His statement is, that up to that time the Hebrew genealogies had been preserved entire, and the different families were traced up either to the patriarchs, or the *γεῖωροι* or mixed people; but that on Herod's causing these genealogies to be burnt, only a few of the more illustrious Jews who had private pedigrees of their own, or who could supply the lost genealogies from memory, or from the books of chronicles, were able to retain any account of their own lineage—among whom, he says, were the Desposyni, or brethren of our Lord, from whom was said to be derived the scheme (given by Africanus) for reconciling the two genealogies of Christ. But there can be little doubt that the registers of the Jewish tribes and families perished at the destruction of Jerusalem, and not before. Some partial records may, however, have survived that event, as it is probable, and indeed seems to be implied in Josephus's statement, that at least the priestly families of the dispersion had records of their own genealogy. We learn, too, from Benjamin of Tudela, that in his day the princes of the captivity professed to trace their descent to David, and he also names others, e. g. R. Calonymos, "a descendant of the house of David, as proved by his pedigree" (*Itin.* ed. Asher, i, 32), and R. Eleazar ben-Tsemach, "who possesses a pedigree of his descent from the prophet Samuel, and knows the melodies which were sung in the Temple during its existence" (*ib.* p. 106, etc.). He also mentions descendants of the tribes of Dan, Zabulon, and Naphtali, among the mountains of Khasvin, whose prince was of the tribe of Levi. The patriarchs of Jerusalem, so called from the Hebrew *אֲבֹתֵי יְרוּשָׁלַיִם*, claimed descent from Hillel, the Babylonian, of whom it is said that a genealogy, found at Jerusalem, declared his descent from David and Abital. Others, however, traced his descent from Benjamin, and from David only through a daughter of Shephathiah (*Wolf, B. II.* iv, 380). But, however tradition may have preserved for a while true genealogies, or imagination and pride have coined fictitious ones after the destruction of Jerusalem, it may be safely affirmed that the Jewish genealogical system then came to an end. Essentially connected as it was with the tenure of the land on the one hand, and with the peculiar privileges of the houses of David and Levi on the other, it naturally failed when the land was taken away from the Jewish race, and when the promise to David was fulfilled, and the priesthood of Aaron superseded by the exaltation of Christ to the right hand of God. The remains of the genealogical *spirit* among the later Jews (which might, of course, be much more fully illustrated from Rabbinical literature) has only been glanced at to show how deeply it had penetrated into the Jewish national mind. It remains to be said that just notions of the nature of the Jewish genealogical records are of great importance with a view to the right interpretation of Scripture. Let it only be remembered that these records have respect to

political and territorial divisions, as much as to strictly genealogical descent, and it will at once be seen how erroneous a conclusion it may be, that all who are called "sons" of such or such a patriarch, or chief father, must necessarily be his very children. Just as in the very first division into tribes Manasseh and Ephraim were numbered with their uncles, as if they had been sons instead of grandsons (*Gen. xlviii, 5*) of Jacob, so afterwards the names of persons belonging to different generations would often stand side by side as heads of families or houses, and be called the sons of their common ancestor. For example, *Gen. xli, 21* contains grandsons as well as sons of Benjamin [see *BELAI*], and *Exod. vi, 24* probably enumerates the son and grandson of Assir as heads, with their father, of the families of the Korhites; and so in innumerable other instances. If any one family or house became extinct, some other would succeed to its place, called after its own chief father. Hence, of course, a census of any tribe drawn up at a later period would exhibit different divisions from one drawn up at an earlier. Compare, e. g. the list of courses of priests in Zerubbabel's time (*Neh. xii*) with that of those in David's time (*1 Chron. xxiv*). The same principle must be borne in mind in interpreting any particular genealogy. The sequence of generations may represent the succession to such or such an inheritance or headship of tribe or family rather than the relationship of father and son. Again, where a pedigree was abbreviated, it would naturally specify such generations as would indicate from what chief houses the person descended. In cases where a name was common the father's name would be added for distinction only. These reasons would be well understood at the time, though it may be difficult now to ascertain them positively. Thus, in the pedigree of Ezra, (*Ezra vii, 1-5*), it would seem that both Seraiah and Azariah were heads of houses (*Neh. x, 2*); they are both therefore named. Hilkiah is named as having been high-priest, and his identity is established by the addition "the son of Shallum" (*1 Chron. vi, 13*); the next named is Zadok, the priest in David's time, who was chief of the sixteen courses sprung from Eleazar, and then follows a complete pedigree from this Zadok to Aaron. But then, as regards the chronological use of the Scripture genealogies, it follows from the above view that great caution is necessary in using them as measures of time, though they are invaluable for this purpose whenever we can be sure that they are complete. What seems necessary to make them trustworthy measures of time is, either that they should have special internal marks of being complete, such as where the mother as well as the father is named, or some historical circumstance defines the several relationships, or that there should be several genealogies, all giving the same number of generations within the same termini. When these conditions are found, it is difficult to overrate the value of genealogies for chronology. In determining, however, the relation of generations to time, some allowance must be made for the station in life of the persons in question. From the early marriages of the princes, the average of even thirty years to a generation will probably be found too long for the kings.

Another feature in the Scripture genealogies which it is worth while to notice is the recurrence of the same name, or modification of the same name, such as Tobias, Tobit, Nathan, Mattatha, and even of names of the same signification, in the same family. This is an indication of the carefulness with which the Jews kept their pedigrees (as otherwise they could not have known the names of their remote ancestors); it also gives a clew by which to judge of obscure or doubtful genealogies. In some cases, however, this repetition seems to have resulted from erroneous transcription.

The Jewish genealogies have two forms, one giving the generations in a descending, the other in an ascending scale. Examples of the descending form may be

seen in Ruth iv, 18-22, or I Chron. iii. Of the ascending, I Chron. vi, 33-43; Ezra vii, 1-5. The descending form is expressed by the formula A begat B, and B begat C, etc.; or, the sons of A, B his son, C his son, etc.; or, the sons of A, B, C, D; and the sons of B, C, D, E; and the sons of C, E, F, G, etc. The ascending is always expressed in the same way. Of the two, it is obvious that the descending scale is the one in which we are most likely to find collateral descents, inasmuch as it implies that the object is to enumerate the heirs of the person at the head of the stem; and if direct heirs failed at any point, collateral ones would have to be inserted. In all cases, too, where the original document was preserved, when the direct line failed, the heir would naturally place his own name next to his predecessor, though that predecessor was not his father, but only his kinsman; whereas in the ascending scale there can be no failure in the nature of things. But neither form is in itself more or less fit than the other to express either proper or imputed filiation.

Females are named in genealogies when there is anything remarkable about them, or when any right or property is transmitted through them. See Gen. xi, 29; xxii, 23; xxv, 1-4; xxxv, 22-26; Exod. vi, 23; Numb. xxvi, 33; 1 Chron. ii, 4, 19, 35, 50, etc.

The genealogical lists of names are peculiarly liable to corruptions of the text, and there are many such in the books of Chronicles, Ezra, etc. Jerome speaks of these corruptions having risen to a fearful height in the Septuagint (*Præfat. in Parakip.*). In like manner, the lists of high-priests in Josephus are so corrupt, that the names are scarcely recognisable. This must be borne in mind in dealing with the genealogies.

The Bible genealogies give an unbroken descent of the house of David from the creation to the time of Christ. The registers at Jerusalem must have supplied the same to the priestly and many other families. They also inform us of the origin of most of the nations of the earth, and carry the genealogy of the Edomitish sovereigns down to about the time of Saul. Viewed as a whole, it is a genealogical collection of surpassing interest and accuracy (Rawlinson, *Herodot.* vol. i, ch. ii; Burrington, *Geneal. Tables of the Old and New Test.* London, 1836; Selden's *Works*, passim).—Smith, s. v.

GENEALOGY OF JESUS CHRIST, the only one given in the New Testament.

I. *Object of this Genealogical Record.*—From the foregoing article it is evident that no nation was more careful to frame and preserve its genealogical tables than Israel. Their sacred writings contain genealogies which extend through a period of more than 3500 years, from the creation of Adam to the captivity of Judah. Indeed, we find from the books of Ezra and Nehemiah that the same carefulness in this matter was observed after the captivity; for in Ezra ii, 62 it is expressly stated that some who had come up from Babylon had sought their register among those that were reckoned by genealogy, but were not found; therefore were they, as polluted, removed from the priesthood. The division of the whole Hebrew nation into tribes, and the allotment to each tribe of a specified portion of the land of Canaan as an inalienable possession, rendered it indispensable that they should keep genealogical tables. God had, however, a still higher object than that of giving stability to property in Israel in leading successive generations of his people thus to keep an accurate list of their ancestry. That they should do this was especially required from the moment that the voice of prophecy declared that the promised Messiah should be of the seed of Abraham, of the posterity of Isaac, of the sons of Jacob, of the tribe of Judah, and of the family of David.

The Rabbins affirm that after the Captivity the Jews were most careful in keeping their pedigrees (*Babyl. Gemar. Gloss.* fol. xiv, 2). Since, however, the period of their destruction as a nation by the Romans, all their

tables of descent seem to be lost, and now they are utterly unable to trace the pedigree of any one Israelite who might lay claim to be their promised and still expected Messiah. Hence Christians assert, with a force that no reasonable and candid Jew can resist, that *Shiloh must have come*.

The priesthood of Aaron having ceased, the possession of the land of Canaan being transferred to the Gentiles, there being under the N.-T. dispensation no difference between circumcision and uncircumcision, Barbarian and Scythian, bond and free, there is but one whose genealogy it concerns us as Christians to be acquainted with, that of our Lord Jesus Christ. Him the prophets announced as the seed of Abraham, and the son of David, and the angels declared that to him should be given the throne of his father David, that he might reign over the house of Jacob forever. His descent from David and Abraham being therefore an essential part of his Messiahship, it was right that his genealogy should be given as a portion of gospel truth. Considering, further, that to the Jews first he was manifested and preached, and that his descent from David and Abraham was a matter of special interest to them, it seems likely that the proof of his descent would be one especially adapted to convince them; in other words, that it would be drawn from documents which they deemed authentic. Such were the genealogical records preserved at Jerusalem. See GENEALOGY. Now when to the above consideration we add the fact that the lineage of Joseph was actually made out from authentic records for the purpose of the civil census ordered by Augustus, it becomes morally certain that the genealogy of Jesus Christ was extracted from the public registers. Another consideration adds yet further conviction. It has often excited surprise that the genealogies of Christ should both seem to be traced through Joseph, and not Mary. But if these genealogies were those contained in the public registers, it could not be otherwise. In them Jesus, the son of Mary, the espoused wife of Joseph, could only appear as Joseph's son (comp. John i, 45). In transferring them to the pages of the gospels, the evangelists only added the qualifying expression "as was supposed" (Luke iii, 23, and its equivalent, Matt. i, 16).

We find other traces of the existence of the public tables of descent in the New Testament: the taxation spoken of by Luke ii, 2, 3, would clearly indicate this, for how could each one be able to go to his own city unless he knew the specific tribe to which he belonged? Hence it was, we think, that Paul was able with confidence to appeal to the Hebrews concerning the lineage of Christ, "for it is evident," says he, "that our Lord sprung out of Judah" (Heb. vii, 14; 2 Tim. ii, 8). To evince this beyond reasonable doubt, it pleased God to give us, by his inspired servants Matthew and Luke, these genealogies.

II. *Statement of the Subject.*—The following is a tabular view of these records, with which it will be convenient to compare the parallel lists as found in the Hebrew copies of the Old Testament.

No.	Luke iii, 23-38. (Inverted.)	Matt. i, 2-17.	Gen. v, x, xi, and Ruth iv.	1 Chron. i, ii, iii.
1.	Adam	Adam	Adam	Adam.
2.	Seth	Seth	Seth	Sheth.
3.	Enos	Enos	Enos	Enosh.
4.	Cainan	Cainan	Cainan	Kenan.
5.	Maleleel	Mahalaheel	Mahalaheel	Mahalaheel.
6.	Jared	Jared	Jared	Jered.
7.	Enoch	Enoch	Enoch	Henoeh.
8.	Methuselah	Methuselah	Methuselah	Methuselah.
9.	Lamech	Lamech	Lamech	Lamech.
10.	Noe	Noah	Noah	Noah.
11.	Sem	Shem	Shem	Shem.
12.	Arphaxad	Arphaxad	Arphaxad	Arphaxad.
13.	Cainan	.....	.....	.....
14.	Salah	Salah	Shelah	Shelah.
15.	Eber	Eber	Eber	Eber.
16.	Phalec	Peleg	Peleg	Peleg.
17.	Ragau	Reu	Reu	Reu.
18.	Sarouch	Serug	Serug	Serug.
19.	Nachor	Nahor	Nahor	Nahor.

No.	Luke iii, 23-38. (Inverted.)	Matt. i, 2-17.	Gen. v, x, xi, and Ruth iv.	1 Chron. i, ii, iii.
20.	Thara	.....	Terah	Terah.
21.	Abraam	Abraam	Abram	Abra(ha)m.
22.	Isaac	.....	Isaac	Isaac.
23.	Jacob	Jacob	.....	Israel.
24.	Joudas	Joudas	.....	Judah.
25.	Phares	Phares	Pharez	Pharez.
26.	Esrom	Esrom	Hezron	Hezron.
27.	Aram	Aram	Ram	Ram.
28.	Aminadab	Aminadab	Amminadab	Amminadab.
29.	Naason	Naason	Nahshon	Nahshon.
30.	Salmon	Salmon	Salmon	Salma.
31.	Booz	Booz	Booz	Boaz.
32.	Obed	Obed	Obed	Obed.
33.	Jessai	Jessai	Jesse	Jesse.
34.	David	David	David	David.
35.	Nathan	Solomon	.....	Solomon.
36.	Mattathia	Roboam	.....	Rehoboam.
37.	Mainan	.....	.....	.....
38.	Melea	.....	.....	.....
39.	Eliakeim	Abia	.....	Abia.
40.	Jonan	Asa	.....	Asa.
41.	Joseph	Josaphat	.....	Jehoshaphat.
42.	Jouda	Joram	.....	Joram.
43.	Simoon	.....	.....	Ahaziah.
44.	Levi	.....	.....	Joash.
45.	Matthai	.....	.....	Amaziah.
46.	Joreim	Ozias	.....	Azariah.
47.	Eliezer	Jotham	.....	Jotham.
48.	Jese	Ahaz	.....	Ahaz.
49.	Er	Ezekias	.....	Hezekiah.
50.	Elmodam	Manasses	.....	Manasseh.
51.	Cosam	Amon	.....	Amon.
52.	Addi	Josias	.....	Josiah.
53.	Melehi	Jechonias	.....	Jehoiakim.
54.	Neri	.....	.....	Jechoniah.
55.	Salathiel	Salathiel	.....	Salathiel and Pedaiah.
56.	Zorobabel	Zorobabel	.....	Zerubbabel.
57.	.....	.....	.....	Hananiah.
58.	Rhesa	.....	.....	Pelathiah and Rephaiah.
59.	Joanna	.....	.....	Arnan.
60.	Joudas	Abioud	.....	Obadiah.
61.	Joseph	Eliakeim	.....	Shechaniah.
62.	Scimi	.....	.....	Shemaiah.
63.	Mattathias	.....	.....	.....
64.	Maath	.....	.....	.....
65.	Naggai	.....	.....	.....
66.	Esi	Azor	.....	.....
67.	Naoum	.....	.....	.....
68.	Amos	.....	.....	.....
69.	Mattathias	Sadek	.....	.....
70.	Janna	Acheim	.....	.....
71.	Jouba	Elioud	.....	.....
72.	Melehi	Eliouad	.....	.....
73.	Levi	Elezar	.....	.....
74.	Matthai	Matthan	.....	.....
75.	Eli	Jacob	.....	.....
76.	Joseph	Joseph	.....	.....
77.	Jesca	Jesca	.....	.....

ted generations in the latter part of the list. See RAHAB; RUTH.

On the other hand, the names Menan and Melea, also Mattathias and Maath, seem to be superfluous repetitions of others in the same list.

1. *Difficulties that apply to the Evangelists INDIVIDUALLY.*—(1.) It is objected that Jechoniah was not the son of Josiah, but his grandson. Answer: Matthew does not mean to say he was his son; for verses 11 and 12 are obviously intended to designate two different persons, viz. *Jehoiakim*, and his son *Jehoiachin*. That the former is the person meant in ver. 11 is evident from the addition of "his brethren." Whose brethren? Not Jehoiachin's (or Jechonias), for he had none, but Jehoiakim's, viz. Jehoahaz and Zedekiah, the former of whom reigned before him (though a younger brother), and the latter after him (1 Chron. iii, 15-17). Admitting this, we see the consistency of the evangelist as to the number of generations in the second and third series; whereas they who make Jechonias (ver. 11, 12) to be the same person leave only thirteen in the second series, if Jechonias be added to the third; or in the third, if he be placed to the second. If the objection had any truth, the evangelist would be palpably inconsistent with himself! St. Jerome (*in Matthæum*, cap. i) confirms this view: "If Jechonias be included in the first tessarodecade there will not be fourteen generations; we may therefore assume that the first Jechonias meant *Joakim* and the latter *Joachin*—the one spelt with the letters *k* and *m*, the other with *ch* and *n*; which letters, in the course of time, by fault of transcribers, were confounded by Greeks and Latins." Porphyry brought forward this objection against Matthew's genealogy, and we find the same father, in his *Comment. on Daniel*, thus replying: "In the Gospel of Matthew one generation seems to be wanting, for the second tessarodecade ends with Joakim, the son of Josiah, and the third begins with Joachin, the son of Joakim. Porphyry, ignorant of this, would exhibit his own skill in proving the falsity of the evangelist Matthew." We may add that some respectable MSS. still exhibit the name of Jehoiakim as well as that of Jechonias. (See Strong's *Greek Harmony of the Gospels*, ad loc.) The triple series of fourteen generations will therefore stand thus

1. Abraham.	1. Solomon.	1. Jechoniah.
2. Isaac.	2. Rehoboam.	2. Salathiel.
3. Jacob.	3. Abijah.	3. Zerubbabel.
4. Judah.	4. Aza.	4. Abiad.
5. Phares.	5. Jehshaj hat.	5. Eliakim.
6. Esrom.	6. Jehoram.	6. Azor.
7. Aram.	7. Uzziab.	7. Sadek.
8. Aminadab.	8. Jotham.	8. Achim.
9. Nanson.	9. Abaz.	9. Eliud.
10. Salmon.	10. Hezekiah.	10. Eleazar.
11. Boaz.	11. Manasseh.	11. Matthan.
12. Obed.	12. Amon.	12. Jacob.
13. Jesse.	13. Josiah.	13. Joseph.
14. David.	14. <i>Jehoiakim</i> .	14. Jesus.

III. *Solution of Difficulties.*—We do not find that there was any objection made to these genealogies, either by Jew or Gentile, during the 1st century. Had any difficulty on this head existed, we may reasonably suppose that the Jews, of all others, would have been but too ready to detect and expose it. We may, therefore, fairly conclude that, whatever difficulty meets us now in harmonizing our Lord's pedigree as given by the two evangelists, it could have had no place in the first age of the Christian Church. In subsequent ages, however, objections were and still are made to the genealogies of Matthew and Luke.

A preliminary difficulty, which applies, however, equally to the O.-T. lists, lies in the small number of names between Judah and David, being only nine for an interval of 833 years, making the incredible average of nearly a century for each generation. Hence arises the presumption that some names have been omitted (see Browne, *Ordo Sacclorum*, p. 283), and at least three—more probably *nine*—must be supplied, in order to reduce this average to the ordinary age of paternity; three, Judah, Boaz, and Jesse, are known to have been advanced in life at the birth of their youngest sons, and Salmon was considerably so. The synchronism of Nahshon with the Exode, and Boaz with the earlier judges, requires the insertion of these omit-

(2.) It is objected that Matthew omits three kings, viz. Ahaziah, Joash, and Amaziah (comp. 1 Chron. iii, and 2 Kings viii), from his second series. In reference to this objection, it might suffice to say that Matthew, finding fourteen generations from Abraham to David inclusively, contracted, most likely in order to assist memory and give uniformity, the second, and possibly the last series. If we compare Ezra vii, 1-5 with 1 Chron. vi, 3-15, it will be seen that Ezra, in detailing, with apparent particularity, his own lineal descent from Aaron, calls Azariah, who was high-priest at the dedication of the first Temple, the son, not of Johanan his father, but of Meraioth, his ancestor at the distance of six generations. Doubtless the desire of abridgment led him to omit those names with which there were connected no very remarkable associations. Some of the early fathers, however, give a different solution of this difficulty. Hilary (*in Matthæum*, cap. i) says: "Three generations are designedly passed

over by Matthew, for Jaras is said to have begotten Ozias, when, in fact, he was the fourth from him, i. e. Jaras begat Oehazias from the Gentile family of Ahab, whose wife was Jezebel." That the omission of the three kings was a punishment inflicted upon the house of guilty Joram to the fourth generation is the view yet more pointedly put forth by St. Jerome also, and by many of our own best commentators. See SOX.

(3.) Moreover, it is said that Matthew terms Zorobabel the son of Salathiel, whereas in 1 Chron. iii, 19, he is called the son of *Pedaiah*. How is this? We answer that the Sept. version of 1 Chron. iii agrees with Matthew, and that this is the manner in which Zorobabel is designated in Ezra, Nehemiah, and Haggai. Josephus also calls him the son of Salathiel. Were he not the immediate son of Salathiel, but of *Pedaiah*, yet is it suitable to the language of the Jewish nation to count the grandson the son of the grandfather. Thus Laban is called the son of Nahor (Gen. xxix, 5), as being the son of Bethuel, who was, in fact, the son of Nahor (xxiv, 47). If, according to another manner of rendering ver. 17 and 18, Salathiel and *Pedaiah* were brothers, Zorobabel might have been, by the Levirate law, the natural son of the one and the legal son of the other. See *PEDAIAH*.

(4.) It is again asked, if it be, as Matthew states, that Salmon, son of Naason, prince of Israel, had married so remarkable a person as Rahab, how then comes it that such a circumstance is not noticed in the book of Joshua? This objection will have no force if we remember that this book, full as it is in describing the partition of Canaan among the several tribes, is yet very silent concerning the exploits, and even names, of the subordinate leaders of Israel. There is nothing, therefore, surprising in the circumstance that it should pass over in total silence Salmon's marriage with Rahab. Had the matter in question been the espousal of Rahab by Joshua himself, the presumption against its truth would be very different. Indeed Kimchi, in his *Commentary on the Book of Joshua*, alludes a tradition to this effect, taken from the Babylonian Talmud. Every consideration, moreover, of a *chronological* character is in favor of the circumstance of the son of Naason, born to him in the wilderness, being married to Rahab. See *RAHAB*.

(5.) But a far graver objection than that which is alleged against Matthew for having omitted names is brought against Luke for having inserted that of *Cainan* as son of Arphaxad—a name neither to be found in the Hebrew nor Samaritan text, nor yet in any of the Targums or versions, save the Sept. We may infer from the fact that neither Philo nor Josephus, who in other respects followed this version, receive this name as genuine, that it was not found in the earlier copies of the Sept.: it was, no doubt, borrowed from the corrupted Sept. which has come down to us, containing the name in question, but which cannot, with any propriety, be raised to a level of authority with the Heb. text. It is clear, moreover, that Irenæus, Africanus, Eusebius, and Jerome reject it as an interpolation. [See, on this subject, Whitty's *Preface to the Reader*, and Lightfoot's *Harm.*; also Usher's *Dissertation on Cainan*, and Kidder's *Demonstr. of Messiah.*] See *CAINAN*.

2. We are now to compare the evangelists as to the points on which they agree and differ. It does not appear that Celsum attacked the genealogies on the score of any *inconsistency* with each other. Not so the emperor Julian; he made their discrepancies the specific ground of attack. Jerome (*in Matt.* i) thus writes: "Julianus Augustus in this place attacks the evangelists on the ground of *discrepancy*: Matthew calls Joseph the son of Jacob, whereas Luke calls him the son of Heli! Had Julian been better acquainted with the modes of speech of the Jews, he would have seen that one evangelist gives the natural and the other the legal pedigree of Joseph."

(1.) The first solution of the apparent discrepancies of the evangelists (one to which this ancient father obviously here alludes) is that of Africanus, which, he informs us (Eusebius, *Hist. Eccles.* i, 7), he received from the relatives of our Lord, who, because of their consanguinity to him, were called *Δεσπόσωνοι*. It is to the effect that Matthan, the third in the list from Joseph in Matthew's genealogy, and Melchi, the third in Luke's list, married successively the same woman, by whom the former begat Jacob, and the latter Heli. Heli dying without issue, his maternal brother took his widow to wife, by whom he had Joseph, who, according to law (Deut. xxv, 6), was registered by Luke as the son of Heli, though naturally the son of Jacob, as Matthew records him. This is the explanation which was generally admitted by Eusebius, Nazianzen, the writer of *Ad orthodoxos*, and others, *for ages*.

(2.) Grotius, however, availing himself of the tradition that Heli and Jacob were both sons of the same mother, but of different fathers (Matthan and Melchi), supposes that Luke traces the *natural* pedigree of Christ, and Matthew the *legal*. This he argues on two grounds: first, that Salathiel *could not* have been the natural son of Jechonias, who was *childless*—according to the declaration of God by Jeremiah (xxii)—and was, therefore, as Luke states, the son, properly so called, of Neri, of Nathan's line; and, secondly, that the *Levirate* law imposed no necessity on Jacob to marry Heli's widow, they being only *uterine* brothers. The learned commentator might have been led to this view by St. Ambrose, who, in his *Commentary on Luke*, says, "Heli, fratre sine liberis decedente, copulatus est fratris uxori, et generavit filium Joseph, qui juxta legem Jacobi filius dicitur." But both the reasons assigned by Grotius for differing from the solution of Africanus would seem to be founded on a *petitio principii*. It does not appear an ascertained fact that Salathiel was not the natural son of Jechonias, nor yet that the law which obliged a man to marry the widow of his deceased brother might be departed from when they were only *maternal* brethren; for even in cases of distant relationship the law seemed obligatory, as we see in the case of Boaz marrying Ruth, the widow of his distant kinsman. Whitty defends Africanus's account; Hammond, Le Clerc, and Wetstein agree with Grotius.

(3.) Dr. Barrett, who, in his preliminary dissertation to a curious *fac-simile* of a most ancient MS. of Matthew's Gospel (an abridgment of which treatise may be found in Clarke's *Commentary*, at the end of Luke iii), brings to bear upon this difficult question a large share of sound learning and correct criticism, objects to the above theory as given by Africanus and altered by Grotius, on the ground principally that it refers entirely to the descent of Joseph from David, without attempting to prove that the son of Mary was the son of David. Dr. Barrett then states his own hypothesis, viz., that Matthew relates the genealogy of Joseph, and Luke that of Mary. He supposes a sufficient reason, that after Matthew had given his genealogical table another should be added by Luke, fully to prove that Christ, according to the flesh, derived his descent from David, not only by his supposed father Joseph, but also by his real mother Mary. The writers who agree in this opinion Dr. B. divides into two classes: first, those who assert that the families of Solomon and Nathan met in Salathiel and Zorobabel, after which they separated, and were again reunited in Joseph and Mary; secondly, those who suppose that Salathiel and Zorobabel were distinct individuals, and deny that any union took place between them previously to the marriage of Joseph and Mary. He rejects this latter opinion because it seems to contradict the divine promise (2 Sam. vii, 12-16), which intimates that Christ should be *lineally* descended from David through *Solomon*. He therefore receives the former hypothesis, and supports it by numerous and profound arguments. (See his *Preliminary Dissertation to Codex Rescriptus*; see

also, on both hypotheses, Lightfoot's *Harmony Ev.*; South's *Sermon on Rev. xii, 16*, vol. iii; Wetstein, *ad Matthæum*, i, 17; Bishop Kidder's *Demonst. of Messiah*, part. ii to ch. xiii; Hale's *Analysis of Chronology*, vol. iii.)

In constructing their genealogical tables, it is well known that the Jews reckoned wholly by males, rejecting, where the blood of the grandfather passed to the grandson through a daughter, the name of the daughter herself, and counting that daughter's husband for the son of the maternal grandfather (Numb. xxvi, 33; xxvii, 4-7). On this principle Joseph, begotten by Jacob, marries Mary, the daughter of Heli, and in the genealogical register of his wife's family is counted for Heli's son. Salathiel, begotten by Jecaniah, marries the daughter of Neri, and, in like manner, is accounted his son: in Zorobabel, the offspring of Salathiel and Neri's daughter, the lines of Solomon and Nathan coalesce; Joseph and Mary are of the same tribe and family; they are both descendants of David in the line of Solomon; they have in them both the blood of Nathan, David's son. Joseph deduces his descent from Abiud (Matt. i, 13), Mary from Rhesa (Luke iii, 27), sons of Zorobabel. The genealogies of Matthew and Luke are parts of one perfect whole, and each of them is essential to the explanation of the other. By Matthew's table we prove the descent of Mary, as well as Joseph, from Solomon; by Luke's we see the descent of Joseph, as well as Mary, from Nathan. But still it is asked how know we that Mary was the daughter of Neri?

[1.] Because the angel Gabriel, at the Annunciation, told the Virgin that God would give her divine son the throne of his father David (Luke i, 32), and thus it was necessary to prove this by her genealogy afterwards.

[2.] Mary is called by the Jews ברת עלי, "the daughter of Heli," and by the early Christian writers "the daughter of Joakim and Anna" (Lightfoot, *on Luke* iii, 23). But Joakim and Eliakim (as different names in Hebrew for God) are sometimes interchanged (2 Chron. xxxvi, 4): Eli or Heli, then, is the abridgment of Eliakim.

[3.] The evangelist Luke has critically distinguished the *real* from the *legal* genealogy by a parenthetical remark: Ἰησοῦς ὢν (ὡς ἐνομιάζετο) υἱὸς Ἰωσήφ, τοῦ Ἥλι, "Jesus being (as was reputed) the son of Joseph (but in reality), the son of Heli," or his grandson by the mother's side, for so the ellipsis should be supplied. Moreover, on comparing the two tables, we find that from Abraham to David they agree with each other because they are in accordance with the genealogies of Genesis, Ruth, and 1 Chron. iii; but from David to Joseph they are evidently distinct lines of pedigree, agreeing only in two persons, viz. Salathiel and Zorobabel.

Again, it is objected that there are now in Luke's genealogy seventy-seven names; whereas Ireneus, Africanus, and other early fathers, acknowledge but seventy-two. But if we omit the names *Maath*, *Mattathias*, *Melen*, *Mainan*, and *Cuinan*, as being interpolations, then the number will be reduced to seventy-two.

It is said that Abiud and Rhesa are called by the evangelists the sons of Zorobabel, though in 1 Chron. iii, 19 we have no mention of them among his sons. We remark that it was a custom with the Jews to call the same person by different names, and that this custom was peculiarly prevalent about the time of the captivity (Dan. i, 6, 7; also comp. 2 Sam. iii, 3 with 1 Chron. iii, 1).

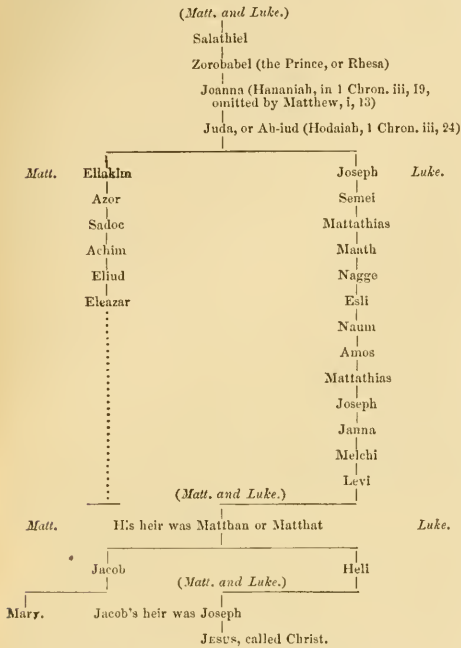

Lastly, it is inquired whence the evangelists had their genealogies from Zorobabel to Christ, there being nothing of them to be found in Scripture. We answer, from those authentic public tables kept by the Jews, of which, as before noticed, Josephus speaks; and regarding which also Eusebius (*Hist. Eccles.* i, 1)

says, "Omnes Hebræorum generationes descriptæ in archivis Templi secretioribus habebantur." It was doubtless from this source that they had the above-named parts of our Lord's legal and natural pedigree; for, otherwise, they would have exposed themselves to the cavils of the Jews; nor could the apostles have appealed, as they did, with confidence, to Christ's pedigree, as answering all the requirements of prophecy. —Kitto, s. v.; Smith, s. v.

(4.) Rejecting all the above identifications and Levirate marriages, Lord Hervey (*Genealogies of our Lord*, Cambr. 1853) contends that both evangelists give the genealogy of Joseph, Matthew's being the legal or royal line, and Luke's the private. He supposes that Mary was the daughter of Jacob, and thus the first cousin of Joseph. The discrepancies in the latter names of the two lists he attempts to reconcile by supposing "Rhesa" to be merely a title (Chald. for prince) of Zorobabel, so that "Joanna" of Luke will

be the "Hananiah" of 1 Chron., but omitted by Matt.; then identifying Matthew's "Abiad" with Luke's "Juda," and both with the "Hodaiah" of 1 Chron.; also Matthew's "Matthan" with Luke's "Matthat;" and finally cutting off all the remaining names in 1 Chron., and supposing a number of generations to have been omitted in the following names of Matthew; so that the lists will, in this part, stand thus:

The violent character of these suppositions is sufficiently obvious. (See each name in its place.)

(5.) Others, like Alford (*Comment. ad loc.*), content themselves with saying that solution is impossible without further knowledge than we possess. But this is a view in which, with the actual documents before us, few will be disposed to acquiesce.

See, in addition to the works already referred to, Mill, *Indication of the Genealogies* (Cambridge, 1842); Beeston, *Geneal. of Matt. and Luke* (3d ed. Lond. 1842); *Jour. Sac. Lit.* July, 1856; *Meth. Quar. Rev.* Oct. 1852, p. 593 sq.; Schleyer, in the *Theolog. Quartalschr.* 1836. Older treatises may be seen in Darling's *Cyclop. Bibliograph.* ii, col. 771 sq., 1854; Volbigen, *Index*, p. 7; Hase, *Leben Jesu*, p. 51. See LINEAGE.

**Genebrard**, GILBERT, a celebrated Benedictine, was born at Rioni, in Auvergne, in 1537. Having entered into the Benedictine order at the abbey of Mauseac, he studied at Paris, where he learned Greek under Turnebius. In 1569 he was made professor of Hebrew at the Royal College of Navarre. In 1592 he was made archbishop of Aix by Gregory XIV. He had, in the same year, published a "Treatise of Elections" (*De Sacrarum Electionum Jure et necessitate, ad Ecclesie Gallicane Reintegrationem*), in which he maintained that the elections of bishops belong of right to the clergy and people, and argued acutely against the nominations of kings and princes. The Parliament of Aix in 1596 decreed that his book should be burnt by the hands of the common executioner, and, after depriving the author of his see, condemned him to banishment from the kingdom, prohibiting his return to it on pain of death. He was afterwards permitted to return to his priory at Semur, where he died March 24, 1597. Genebrard was one of the most learned men of his time. He wrote in Latin, besides the work above mentioned, and others of which a list is given in Dupin, *A*

*Sacred Chronology* (8vo).—*Notes upon the Scripture*.—*A Commentary upon the Psalms* (8vo), in which he particularly applies himself to reconcile the Hebrew text with the vulgar Latin, and defends the Septuagint version; the best edition is that of Paris (1588, fol.).—*A Translation of the Canticles into Iambic Verse*.—*Notes upon the Hebrew Grammar*. He published an edition of *Origen's Works*, with a Latin version (1578); and a translation into French of *Josephus* (2 vols. 8vo).—*Dupin, Eccl. Writers*, cent. xvi; *Hoefer, Nouv. Biog. Générale*, xix, 865; *Hook, Eccl. Biog.* v, 287.

**General** (of religious order), "in the Roman Catholic Church, the supreme head, under the pope, of the aggregated communities throughout Christendom belonging to a religious order. The governing authorities of the monastic orders in the Roman Catholic Church may be arranged in three classes: (1.) The superiors of individual convents or communities, called in different orders by the various names of abbot, prior, rector, guardian, etc.; (2.) The provincials, who have authority over all the convents of an entire province—the provinces, in the monastic sense of the word, being usually coincident as to local limits with the several kingdoms in which the order is established; (3.) The general, to whom not only each member of the order, but all the various officials of every rank, are absolutely subject. The general is usually elected by the general chapter of the order, which, in the majority of orders, consists properly of the provincials, with whom, however, are commonly associated the heads of the more important monasteries, as also the superiors of certain subdivisions of provinces. The office of general in most orders is held for three years. In that of the Jesuits it is for life; but in all, the election of the general chapter must be confirmed by the pope. In most orders, too, there is assigned to the general a consultor (*almonitor*) or associate (*socius*), who, however, is entitled to advise, but has no authority to control the superior. The general, also, is supposed to consult with and to receive reports from the various local superiors. He sends, if necessary, a visitor to inquire into particular abuses, or to report upon such controversies as may arise, and he holds a general chapter of the order at stated times, which differ according to the usage of the several orders. The general is exempt from episcopal jurisdiction, being subject to the immediate jurisdiction of the pope himself. He resides in Rome, where he enjoys certain privileges, the most important of which is the right to sit and vote with the bishops in a general council of the Church."—*Chambers, Encyclopædia*, s. v.

**Generation** (הַגֵּרָה, *γένεσις*, the act; *γέννημα*, the result; הַיּוֹר, *γενεά*, a period). Considerable obscurity attends the use of this word in the English version, which arises from the translators having merged the various meanings of the same original word, and even of several different words, in one common term, "generation." The remark, too, is just, that in the literal translations of the Scriptures, the word "generation" generally occurs wherever the Latin has *generatio*, and the Greek *γενεά* or *γένεσις* (*Rees's Encyclopædia*, article Generation). The following instances seem to require the original words to be understood in some one of their derivative senses: Gen. ii, 4, "These are the generations" (הַגֵּרָה); Sept. ἡ βιβλὸς τῆς γενέσεως; *Vulg. generationes*), rather "origin," "history," etc. The same Greek words, Matt. i, 1, are rendered "genealogy," etc., by recent translators: *Campbell* has "lineage." Gen. v, 1, "The book of the generations" (סֵפֶר הַגֵּרָה); Sept. as before; *Vulg. liber generationis*) is properly a *family register*, a history

of Adam. The same words, Gen. xxxvii, 2, mean a history of Jacob and his descendants; so also Gen. vi, 9; x, 1, and elsewhere. Gen. vii, 1, "In this generation" (בְּיָמֵינוּ; Sept. *ἐν τῇ γενεᾷ τάρτην*, Vulg. *in generatione hac*) is evidently "in this age." Gen. xv, 6, "In the fourth generation" (דָּוָר; Sept. *γενεᾷ*, Vulg. *generatio*) is an instance of the word in the sense of a *certain assigned period*. Psa. xlix, 19, "The generation of his fathers" (דָּוָר אֲבוֹתָיו; Sept. *γενεᾶς πατέρων αὐτοῦ*) Gesenius renders "the dwelling of his fathers," i. e. the grave, and adduces Isa. xxxviii, 12. Psa. lxxiii, 15, "The generation of thy children" (דָּוָר בְּנֵיךָ; Sept. *γενεᾷ τῶν υἱῶν σου*) is "class," "order," "description;" as in Prov. xxx, 11, 12, 13, 14. Isa. liii, 8, "Who shall declare his generation?" (דָּוָר; Sept. *τὴν γενεάν αὐτοῦ τίς ἀγγήσεται*, Vulg. *generatio*) Lowth renders "manner of life," in translation and note, but adduces no precedent. Some consider it equivalent to דָּוָר, ver. 10; *γενεᾷ* (Sept.) answers to דָּוָר, Esth. ix, 28. Josephus uses πολλῶν *γενεῶν*, Ant. i, 10, 3 (Hengstenberg, *Christology of the Old Testament*, vol. i, Washington, 1836-9; Pauli, *Analect. Hebraic.* p. 162, Oxford, 1839). Michaelis renders it, "Where was the providence that cared for his life?" Gesenius and Rosenmüller, "Who of his contemporaries reflected?" Seiler, "Who can describe his length of life?" In the New Testament (Matt. i, 17), *γενεαί* is a series of persons, a succession from the same stock; so used by Josephus (Ant. i, 7, 2); Philo (Vit. Mos. i, 603); Matt. iii, 7, *γεννηματα ἑλιδῶν*, is well rendered by Doddridge and others "brood of vipers." Matt. xxiv, 34, *ἡ γενεᾷ αὐτῆς* means the generation or persons then living *contemporary with Christ* (see Mac-knight's *Harmony* for an illustration of this sense). Luke xvi, 8, *εἰς τὴν γενεάν τὴν ἑαυτῶν*, "in their generation," etc., wiser in regard to their dealings with the *men* of their generation; Rosenmüller gives, *inter se*. 1 Pet. ii, 8, *γένος ἐλεκτόν*, is a "chosen people," quoted from Sept. Vers. of Isa. xliiii, 20. The ancient Greeks, and, if we may credit Herodotus and Diodorus Siculus, the Egyptians also, assigned a *certain period* to a generation. The Greeks reckoned three generations for every hundred years, i. e. 33½ years to each; Herod. ii, 142, *γενεαί τρεῖς ἀνθρώπων ἑκατὸν ἑταί ἴσται*, "Three generations of men make one hundred years." This is nearly the present computation. To the same effect Clem. Alexandrinus speaks (*Strom.* i, 2); so also Phavorinus, who, citing the age of Nestor from Homer (*Il.* i, 250), *τῷ δ' ἦδη ἑκοστὸν μὲν γενεαί*, "two generations," says it means that *ἡπείροισι τὰ ἔξῃκοιντα ἔτη*, "he was above sixty years old." The Greeks, however, assigned different periods to a *γενεᾷ* at different times (Perizonius, *Orig. Egypt.* p. 175 sq.; Jemsius, *Fercal. Literar.* p. 6). The ancient Hebrews also reckoned by the generation, and assigned different spaces of time to it at different periods of their history. In the time of Abraham it was one hundred years (comp. Gen. xv, 16, "In the fourth generation they shall come hither"). This is explained in ver. 13, and in Exod. xii, 40, to be four hundred years. Caleb was *fourth* in descent from Judah, and Moses and Aaron were *fourth* from Levi. In Deut. i, 35; ii, 14, Moses uses the term for thirty-eight years. In later times (Baruch vi, in the Epistle of Jeremiah, ver. 2) *γενεᾷ* clearly means ten years. In Matt. i, 17, *γενεᾷ* means a single descent from father to son. Homer uses the word in the same sense (*Il.* i, 250); also Herodotus (i, 3). (See Gesenius's and Robinson's *Lexicons*, under the above Heb. and Gr. words.)—Kitto, s. v. See GENEALOGY.

**Generation, Eternal, of the Son of God.** See CHRISTOLOGY; SONSHIP OF CHRIST.

**Genesis** (Sept. *Γένεσις*, *generation*), the first book of the Law or the Pentateuch, is in Hebrew called

בְּרֵאשִׁית, *Beresith*, from the word with which it begins. See LAW.

I. *General Character.*—The book of Genesis has an interest and an importance to which no other document of antiquity can pretend. If not absolutely the oldest book in the world, it is the oldest which lays any claim to being a trustworthy history. There may be some papyrus-rolls in our museums which were written in Egypt about the same time that the genealogies of the Semitic race were so carefully collected in the tents of the patriarchs. But these rolls at best contain barren registers of little service to the historian. It is said that there are fragments of Chinese literature which, in their present form, date back as far as 2200 years B.C., and even more (Gröner, *Urgeschichte*, i, 215); but they are either calendars containing astronomical calculations, or records of merely local and temporary interest. Genesis, on the contrary, is rich in details respecting other races besides the race to which it more immediately belongs; and the Jewish pedigrees there so studiously preserved are but the scaffolding whereon is reared a temple of universal history.

If the religious books of other nations make any pretensions to vie with it in antiquity, in all other respects they are immeasurably inferior. The Mantras, the oldest portions of the Vedas, are, it would seem, as old as the 14th century B.C. (see Colebrooke, *Asiat. Res.* vii, 283, and professor Wilson's preface to his translation of the *Rig-Veda*). The Zendavesta, in the opinion of competent scholars, is of very much more modern date. Of the Chinese sacred books, the oldest, the Yih-king, is undoubtedly of a venerable antiquity, but it is not certain that it was a religious book at all; while the writings attributed to Confucius are certainly not earlier than the 6th century B.C. (Gröner, i, 270).

But Genesis is neither like the Vedas, a collection of hymns more or less sublime; nor like the Zendavesta, a philosophic speculation on the origin of all things; nor like the Yih-king, an unintelligible jumble whose expositors could twist it from a cosmological essay into a standard treatise on ethical philosophy (Hardwick, *Christ and other Masters*, III, i, 16). It is a history, and it is a religious history. The earlier portion of the book, as far as the end of the eleventh chapter, may properly be termed a history of the world; the latter is a history of the fathers of the Jewish race. But from first to last it is a religious history: it begins with the creation of the world and of man; it tells of the early happiness of a paradise in which God spake with man; of the first sin and its consequences; of the promise of redemption; of the gigantic growth of sin, and the judgment of the Flood; of a new earth, and a new covenant with man, its unchangeableness typified by the bow in the heavens; of the dispersion of the human race over the world. It then passes to the story of redemption; to the promise given to Abraham, and renewed to Isaac and to Jacob, and to all that chain of circumstances which paved the way for the great symbolic act of Redemption, when with a mighty hand and a stretched out arm Jehovah brought his people out of Egypt.

It is very important to bear in mind this religious aspect of the history if we would put ourselves in a position rightly to understand it. Of course the facts must be treated like any other historical facts, sifted in the same way, and subjected to the same laws of evidence. But if we would judge of the work as a whole we must not forget the evident aim of the writer. It is only in this way we can understand, for instance, why the history of the Fall is given with so much minuteness of detail, whereas of whole generations of men we have nothing but a bare catalogue. Only in this way, too, can we account for the fact that by far the greater portion of the book is occupied, not with the fortunes of nations, but with the biographies of the three patriarchs. For it was to Abraham, to Isaac, and to Jacob that God revealed himself. It was to

them that the promise was given, which was to be the hope of Israel till "the fulness of the time" should come. Hence to these wandering sheiks attaches a grandeur and an interest greater than that of the Babels and Nimrods of the world. The minutest circumstances of their lives are worthier to be chronicled than the rise and fall of empires. This is not merely from the patriotic feeling of the writer as a Jew, but from his religious feeling as one of the chosen race. He lived in the land given to the fathers; he looked for the seed promised to the fathers, in whom himself and all the families of the earth should be blessed. See ABRAHAM.

II. *Unity of Design*.—This venerable monument, with which the sacred literature of the Hebrews commences, and which forms its real basis, is divided into two main parts; one universal, and one special. The most ancient history of the whole human race is contained in chapters i-xi, and the history of Israel's ancestors, the patriarchs, in chapters xii-l. These two parts are, however, so intimately connected with each other that it would be erroneous to ascribe to the first merely the aim of furnishing a universal history. That a distinct plan and method characterize the work is now generally admitted. This is acknowledged, in fact, quite as much by those who contend for, as by those who deny the existence of different documents in the book. Ewald and Tuch are no less decided advocates of the unity of Genesis, as far as its plan is concerned, than Ranke or Hengstenberg. Ewald, indeed (in his *Composition der Genesis*), was the first who established it satisfactorily, and clearly pointed out the principle on which it rests.

What, then, is the plan of the writer? First, we must bear in mind that Genesis is, after all, but a portion of a larger work. The five books of the Pentateuch form a consecutive whole; they are not merely a collection of ancient fragments loosely strung together, but, as we shall prove elsewhere, a well-digested and connected composition. See PENTATEUCH.

The great subject of this history is the establishment of the theocracy. Its central point is the giving of the law on Sinai, and the solemn covenant there ratified, whereby the Jewish nation was constituted "a kingdom of priests and a holy nation to Jehovah." With reference to this great central fact all the rest of the narrative is grouped.

Israel is the people of God. God rules in the midst of them, having chosen them to himself. But a nation must have laws, therefore he gives them a law; and, in virtue of their peculiar relationship to God, this body of laws is both religious and political, defining their duty to God as well as their duty to their neighbor. Further, a nation must have a land, and the promise of the land and the preparation for its possession are all along kept in view.

The book of Genesis then (with the first chapters of Exodus) describes the steps which led to the establishment of the theocracy. In reading it we must remember that it is but a part of a more extended work; and we must also bear in mind these two prominent ideas, which give a characteristic unity to the whole composition, viz. the people of God, and the promised land.

We shall then observe that the history of Abraham holds the same relation to the other portions of Genesis that the giving of the law does to the entire Pentateuch. Abraham is the father of the Jewish nation: to Abraham the land of Canaan is first given in promise. Isaac and Jacob, though also prominent figures in the narrative, yet do but inherit the promise as Abraham's children, and Jacob especially is the chief connecting link in the chain of events which leads finally to the possession of the land of Canaan. In like manner, the former section of the book is written with the same obvious purpose. It is a part of the writer's plan to tell us what the divine preparation of

the world was, in order to show, first, the significance of the call of Abraham, and, next, the true nature of the Jewish theocracy. He does not (as Tuch asserts) work backwards from Abraham till he comes, in spite of himself, to the beginning of all things. He does not ask, Who was Abraham? answering, of the posterity of Shem; and who was Shem? a son of Noah; and who was Noah, etc. But he begins with the creation of the world, because the God who created the world and the God who revealed himself to the fathers is the same God. Jehovah, who commanded his people to keep holy the seventh day, was the same God who, in six days, created the heavens and the earth, and rested on the seventh day from all his work. The God who, when man had fallen, visited him in mercy, and gave him a promise of redemption and victory, is the God who sent Moses to deliver his people out of Egypt. He who made a covenant with Noah, and through him with "all the families of the earth," is the God who also made himself known as the God of Abraham, of Isaac, and of Jacob. In a word, creation and redemption are eternally linked together. This is the idea which, in fact, gives its shape to the history, although its distinct enunciation is reserved for the N. T. There we learn that all things were created by and for Christ, and that in him all things consist (Col. i, 16, 17); and that by the Church is made known unto principalities and powers the manifest wisdom of God. It would be impossible, therefore, for a book which tells us of the beginning of the Church, not to tell us also of the beginning of the world.

The book of Genesis has thus a character at once special and universal. It embraces the world; it speaks of God as the God of the whole human race. But, as the introduction to Jewish history, it makes the universal interest subordinate to the national. Its design is to show how God revealed himself to the first fathers of the Jewish race, in order that he might make to himself a nation who should be his witness in the midst of the earth. This is the inner principle of unity which pervades the book. Its external framework we are now to examine. Five principal persons are the pillars, so to speak, on which the whole superstructure rests, Adam, Noah, Abraham, Isaac, and Jacob.

(I.) *Adam*.—The creation of the world, and the earliest history of mankind (ch. i-iii). As yet, no divergence of the different families of man.

(II.) *Noah*.—The history of Adam's descendants to the death of Noah (ch. iv-ix). Here we have (1) the line of Cain branching off while the history follows the fortunes of Seth, whose descendants are (2) traced in genealogical succession, and in an unbroken line as far as Noah, and (3) the history of Noah himself (ch. vi-ix), continued to his death.

(III.) *Abraham*.—Noah's posterity till the death of Abraham (x-xxv, 18). Here we have (1) the peopling of the whole earth by the descendants of Noah's three sons (xi, 1-9). The history of two of these is then dropped, and (2) the line of Shem only pursued (xi, 10-32) as far as Terah and Abraham, where the genealogical table breaks off. (3) Abraham is now the prominent figure (xii-xxv, 18). But as Terah had two other sons, Nahor and Haran (xi, 27), some notices respecting their families are added. Lot's migration with Abraham into the land of Canaan is mentioned, as well as the fact that he was the father of Moab and Ammon (xix, 37, 38), nations whose later history was intimately connected with that of the posterity of Abraham. Nahor remained in Mesopotamia, but his family is briefly enumerated (xxii, 20-24), chiefly, no doubt, for Rebekah's sake, who was afterwards the wife of Isaac. Of Abraham's own children, three branches off first the line of Ishmael (xxi, 9, etc.), and next the children by Keturah; and the genealogical notices of these two branches of his posterity are apparently brought together (xxv, 1-6, and xxv, 12-18), in order that, being here severally dismissed at the end of Abra-

ham's life, the main stream of the narrative may flow in the channel of Isaac's fortunes.

(IV.) *Isaac*.—Isaac's life (xxv, 19—xxxv, 29), a life in itself retiring and uneventful. But in his sons the final separation takes place, leaving the field clear for the great story of the chosen seed. Even when Nahor's family comes on the scene, as it does in ch. xxix, we hear only so much of it as is necessary to throw light on Jacob's history.

(V.) *Jacob*.—The history of Jacob and Joseph (xxxvi, 1).—Here, after Isaac's death, we have (1) the genealogy of Esau (ch. xxxvi), who then drops out of the narrative, in order that (2) the history of the patriarchs may be carried on without interruption to the death of Joseph (ch. xxxvii-1).

Thus it will be seen that a specific plan is preserved throughout. The main purpose is never forgotten. God's relation to Israel holds the first place in the writer's mind. It is this which it is his object to convey. The history of that chosen seed who were the heirs of the promise, and the guardians of the divine oracles, is the only history which interprets man's relation to God. By its light all others shine, and may be read when the time shall come. Meanwhile, as the different families drop off here and there from the principal stock, their course is briefly indicated. A hint is given of their parentage and their migrations; and then the narrative returns to its regular channel. Thus the whole book may be compared to one of those vast American rivers which, instead of being fed by tributaries, send off here and there certain lesser streams or bayous, as they are termed, the main current meanwhile flowing on with its great mass of water to the sea.

Beyond all doubt, then, we may trace in the book of Genesis in its present form a systematic plan. It is no hasty compilation, no mere collection of ancient fragments without order or arrangement. It coheres by an internal principle of unity. Its whole structure presents a very definite and clearly marked outline. But does it follow from this that the book, as it at present stands, is the work of a single author?

III. *Unity of Composition*.—This, which is a point in dispute among the critics with regard to all the books of the Pentateuch, has been particularly questioned in the case of Genesis. The question was raised whether the sources from which the writer of Genesis drew his information were written documents or oral tradition. Writers as early as Vitrina (*Obs. Sac.* i, 4), Richard Simon, Clericus, and others, though they were of opinion that Genesis is founded on written sources, did not undertake to describe the nature and quality of those sources. Another opinion, advanced by Otmar in Henke's *Magaz.* ii, that Egyptian pyramids and other monuments of a similar nature were the sources of Genesis, was but transient in the critical world; while the attempt of some critics not only to renew the previous assumption that Genesis is founded on written sources, but also to determine more closely the character of those sources, has gained more lasting approval among the learned. Why different names of God are prevalent in different portions of Genesis is a question much discussed by early theologians and rabbis. Astruc, a Belgian physician, in his *Conjectures sur les Mémoires originaux*, etc. (Bruxelles, 1753-8), was the first to apply the two Hebrew names of God, *Jehovah* and *Elohim*, to the subject at issue. Astruc assumed that there had originally existed a number of isolated documents, some twelve in all, which had subsequently, by the fault of transcribers, been joined and strung together in the present form of Genesis. Eichhorn's critical genius procured for this hypothesis a favorable reception almost throughout the whole of Germany. See Astruc. Eichhorn pruned away its excrescences, and confined his own view to the assumption of only two different documents, respectively characterized by the two different names of *Jehovah* and

*Elohim*. Other critics, such as Illgen (*Urkunden des Jerusalem Tempel-Archivs*, 1798), Gramberg (*Adumbratio libri Geneseos secundum fontes*, 1828), and others, went still farther, and presupposed three different documents in Genesis. Vater went much beyond Eichhorn. He fancied himself able to combat the authenticity of the Pentateuch by producing a new hypothesis. He substituted for Eichhorn's "document-hypothesis" his own "fragment-hypothesis," which obtained great authority, especially on account of its being adopted by De Wette. According to this opinion, Genesis, as well as the greater part of the Pentateuch, consists of a great number of very small detached fragments, internally unconnected with each other, but transcribed *seriatim*, although originating in very different times and from different authors. This "fragment-hypothesis" has now been almost universally given up. Even its zealous defenders, not excepting De Wette himself, have relinquished it. In its place the former "document-hypothesis" has been resumed by some critics, simplified, however, and supported by new and better arguments. There is at present a great variety of opinion among divines concerning this hypothesis. The leading features of this diversity may be comprised in the following summary. According to the view of Stäbelin, De Wette, Ewald, Von Bohlen, Tuch, Knobel, Delitzsch, and others, Genesis is founded on two principal original documents. That of *Elohim* is closely connected in its parts, and forms a whole, while that of *Jehovah* is a mere complementary document, supplying details at those points where the former is abrupt and deficient, etc. These two documents are said to have been subsequently combined by the hand of an editor, so ably as often to render their separation difficult, if not altogether impossible. But Ranke, Hengstenberg, Drechsler, Hävernick, Baumgarten, Keil, and others, maintain that Genesis is a book closely connected in all its parts, and composed by only one author, while the use of the two different names of God is not owing to two different sources on which Genesis is founded, but solely to the different significations of these two names. The great weight of probability lies on the side of those who argue for the existence of different documents, but only as sources to some extent which, together with original materials, were wrought by the author into one homogeneous whole.

1. It is almost impossible to read the book of Genesis with anything like a critical eye without being struck with the great peculiarities of style and language which certain portions of it present. Thus, for instance, chap. ii, 3-iii, 24 is quite different both from chap. i and from chap. iv. Again, chap. xiv and (according to Jabn) chap. xxiii are evidently separate documents, transplanted in their original form without correction or modification into the existing work. In fact, there is nothing like uniformity of style till we come to the history of Joseph.

2. We are led to the same conclusion by the *inscriptions* which are prefixed to certain sections, as ii, 4; v, 1; vi, 9; x, 1; xi, 10, 27, and seem to indicate so many older documents.

3. The resumptive form of some of the narratives, e.g. the repetition of the account of the creation of man in chap. ii, with additional particulars, is evidence of the same character. We may even hazard the conjecture that the pure *cosmogony* of chap. i may have been one of the mysteries of the Egyptian theosophy, while the more distinct accounts of the subsequent chapters may have been derived from the early traditions of the Hebrews and cognate nations. See Moses.

4. Lastly, the distinct use of the divine names, *Jehovah* in some sections, and *Elohim* in others, is characteristic of two different writers; and other peculiarities of diction it has been observed fall in with this usage, and go far to establish the theory. All this is quite in harmony with what we might have expected *à priori*, viz., that if Moses or any later writer were the author

of the book, he would have availed himself of existing traditions, either oral or written. That they *might have been* written is now established beyond all doubt, the art of writing having been proved to be much earlier than Moses. That they *were* written we infer from the book itself. Yet these peculiarities are not so absolute as to show that the same writer did not embody them all into one composition, for they are sometimes found blended in the same piece.

The evidence alluded to is strong; and nothing can be more natural than that an honest historian should seek to make his work more valuable by embodying in it the most ancient records of his race; the higher the value which they possessed in his eyes, the more anxious would he be to preserve them in their original form. Those particularly in the earlier portion of the work were perhaps simply transcribed. In one instance we have what looks like an omission (ii, 4), where the inscription seems to promise a larger cosmogony. Here and there throughout the book we meet with a later remark, intended to explain or supplement the earlier monument. In some instances there seems to have been so complete a fusion of the two principal documents, the Elohist and the Jehovist, that it is no longer possible accurately to distinguish them. The later writer, the Jehovist, instead of transcribing the Elohist account intact, thought fit to blend and intersperse with it his own remarks. We have an instance of this, according to Hupfeld (*Die Quellen der Genesis*), in chap. vii: vers. 1-10 are usually assigned to the Jehovist; but whilst he admits this, he detects a large admixture of Elohist phraseology and coloring in the narrative. But this sort of criticism, it must be admitted, is very doubtful. Many other instances might be mentioned where there is the same difficulty in assigning their own to the several authors. Thus in sections generally recognised as Jehovistic, chaps. xii, xiii, xix, here and there a sentence or a phrase occurs which seems to betray a different origin, as xii, 5; xiii, 6; xix, 29. These anomalies, however, though it may be difficult to account for them, can hardly be considered of sufficient force entirely to overthrow the theory of independent documents which has so much, on other grounds, to recommend it. Certainly when Keil, Hengstenberg, and others, who reject this theory, attempt to account for the use of the divine names on the hypothesis that the writer designedly employed the one or the other name according to the subject of which he was treating, their explanations are often of the most arbitrary kind. As a whole, the documentary character of Genesis is so remarkable when we compare it with the later books of the Pentateuch, and is so exactly what we might expect, supposing a Mosaic authorship of the whole, that, whilst contending against the theory of different documents in the later portions, we feel convinced that this theory is the only tenable one in Genesis.

Of the two principal documents, the Elohist is the earlier. So far as we can detach its integral portions, they still present the appearance of something like a connected work. This has been very well argued by Tuch (*Die Genesis, Allgem. Einl.* li-1xv), as well as by Hupfeld (*Die Quellen der Genesis*), Knobel, and Delitzsch. This whole theory of a double origin of the book, however, is powerfully opposed by Tiele in the *Stud. u. Krit.* 1852, i.

Hupfeld, however, whose analysis is very careful, thinks that he can discover traces of three original records, an earlier Elohist, a Jehovist, and a later Elohist. These three documents were, according to him, subsequently united and arranged by a fourth person, who acted as editor of the whole. His argument is ingenious and worthy of consideration, though it is at times too elaborate to be convincing.

The following table of the use of the divine names in Genesis will enable the reader to form his own judgment as to the relative probability of the hypotheses

above mentioned. Much as commentators differ concerning some portions of the book, one pronouncing passages to be Elohist which another, with equal confidence, assigns to the Jehovist, the fact is certain that whole sections are characterized by a separate use of the divine names. (See Quarry, *Genesis*, p. 400 sq.)

(1.) Sections in which Elohim is found exclusively, or nearly so: chap. i-ii, 3 (creation of heaven and earth); v (generations of Adam), except ver. 29, where Jehovah occurs; vi, 9-22 (generations of Noah); vii, 9-24 (the entering into the ark), but Jehovah in ver. 16; viii, 1-19 (end of the flood); ix, 1-17 (covenant with Noah); xvii (covenant of circumcision), where, however, Jehovah occurs once in ver. 1, as compared with Elohim seven times; xix, 29-38 (conclusion of Lot's history); xx (Abraham's sojourn at Gerar), where again we have Jehovah once and Elohim four times, and Ha-elohim twice; xxi, 1-21 (Isaac's birth and Ishmael's dismissal), only xxi, 1, Jehovah; xxi, 22-34 (Abraham's covenant with Abimelech), where Jehovah is found once; xxv, 1-18 (sons of Keturah, Abraham's death, and the generations of Ishmael), Elohim once; xxvii, 46-xxviii, 9 (Jacob goes to Haran, Esau's marriage), Elohim once, and El Shaddai once; xxxi (Jacob's departure from Laban), where Jehovah twice; xxxiii-xxxvii (Jacob's reconciliation with Esau, Dinah and the Shechemites, Jacob at Bethel, Esau's family, Joseph sold into Egypt). It should be observed, however, that in large portions of this section the divine name does not occur at all. (See below.) xl-i (history of Joseph in Egypt): here we have Jehovah once only (xlix, 18). [Exod. i-ii (Israel's oppression in Egypt, and birth of Moses as deliverer).]
